1955 PLAN OF WORK
FOR ANIMAL HUSBANDRY EXTENSION
IN NORTH CAROLINA

I. Analysis of Project Situation

Beef Cattle, Sheep and Swine producers in North Carolina are still very much interested in balancing their farm income with livestock. Three years of dry weather and a shortage of feed in some sections has not discouraged livestock producers in the State as was expected. Farmers are beginning to plan long range livestock programs with special emphasis on feed production so that they can meet emergencies such as the dry summers that we have had during the past three years. There is an increase in the number of silos constructed with more farmers saving grass silage during the spring when there is an abundance of grass. Many farmers are growing grain other than corn that may be substituted for corn in feeding of hogs and beef cattle.

The demand for heifer calves has decreased but the demand for steers is increasing. Farmers are quality conscious and there is a wider spread between the price of good quality cattle and low quality than there has been for several years.

1954 was a very profitable year for swine growers and indications are that we will have a small increase in the number of sows farrowing in 1955 as compared with 1954.

Beef Cattle: Special emphasis will be given to fattening cattle for market using feeding demonstrations and field days to promote the feeding of more cattle. Some time will be devoted to the feeding and management of cow and calf herds with special attention being given to providing an adequate and economical source of winter feed. The importance of improving quality in cow-calf herds will be stressed through the use of good type purebred bulls and culling poor producing cows. Demonstrations on herd management will be conducted on one farm in each of the seventeen counties in the Western District.

The promotion of demonstrational feeder calf sales and special sales for finished cattle will be expanded to increase the volume of cattle marketed through these sales.

Some bull testing and rate of gain work that has been started will be continued and expanded.

More time will be devoted to consumer education in the form of demonstrations on carcass grading, meat cutting and identification of the various cuts of beef.

Sheep: The number of sheep in North Carolina is increasing about 1,000 per year. This is a very small increase as sheep shows more profit per dollar invested than any other class of livestock in the State. Demonstration counties have been selected in the western part of the State, Northwestern and Southwestern Districts. Sheep programs are being planned in the demonstration counties with the idea of trying to increase the number of sheep in these counties and develop a program that will help increase sheep in other counties of the State. Cooperative wool and lamb marketing will be available in all sections of the State, sponsored by the North Carolina Department of Agriculture and the North Carolina Extension Service.

Swine: The production of meat type hogs will be emphasized during 1955. Carcass cut out, and grading demonstrations will be conducted to show producers the necessity of producing and marketing more desirable cuts of pork.

County Agents and producer groups will be encouraged to hold more swine field days in 1955. These field days have been one of the best methods of selling a better feeding, breeding and sanitation program to swine producers. Greater emphasis will be placed on swine grazing demonstrations to show the value of Ladino clover and other grazing crops for hogs.

Special attention will be given to 4-H Pig Chain projects to encourage sound management practices by these young hog men who will be our leading swine producers of the future. Assistance with herd management problems will also be given to commercial and purebred breeders through farm visits and field days. Purebred and commercial producers will be assisted with marketing and purchasing breeding stock through organized purebred sales. Assistance will be given junior and adult swine producers with market hog shows and sales in connection with fat stock shows.

Producer and consumer education in the production and processing of pork for home use will be given more attention in 1955. Proper methods of killing, cutting, and curing of pork as well as the preparation, freezing and storage of meat in home freezers will be emphasized in meetings and demonstrations.

II. Major Problems

1. Shortage of animals with superior performance records.
2. Improper control of parasites and diseases.
3. Production of home grown meat animals too low to furnish an adequate diet for a farm family.
4. Improper curing and storage of meat on farms resulting in a high percentage of loss.
5. Poor managerial practices for most economical production.

6. Inadequate processing plants and marketing facilities.
7. Too much corn is sold rather than fed to hogs and cattle.
8. Inadequate equipment and fences for properly handling livestock.
9. Inadequate finances.
10. Shortage of personnel to meet requests from County Agents and livestock producers for assistance with livestock problems.

III. Numerical Goals for 1955.

In order that each county in the State could have a definite Plan of Work for the year a brief outline of Animal Husbandry Projects was prepared, Exhibit A. Colored maps show counties planning beef cattle, sheep and swine programs. They also show counties requesting assistance from Livestock Specialists in carrying out county programs.

Exhibit A

OUTLINE OF ANIMAL HUSBANDRY PROJECT PLANS FOR 1955

Prepared For County Agents' Consideration

By

Animal Husbandry Extension Specialists

BEEF CATTLE

A. Breeding: A. V. Allen, J. S. Buchanan, James W. Patterson, Animal Husbandry

1. Purebred Bull Placement, List of purebred breeders.
2. Selection of Breeding animals.
3. Controlled breeding for early calves.

B. Feeding: A. V. Allen, J. S. Buchanan, James W. Patterson, Animal Husbandry

1. Methods of feeding breeding herd. Extension Circular No. 268, "Raising Beef Cattle".
2. Method of feeding steers. Extension Folder "Possibilities with Feeder and Stocker Calves"; Extension Circular No. 217, "Feeding Cattle for Market".

C. Herd Management: A. V. Allen, J. S. Buchanan, James W. Patterson, An. Husb. This project consists of selecting one or more farms where beef cattle are kept by either adults or 4-H Club members, and working closely with the owner or manager. Careful attention and guidance should be given in regard to pastures, both winter and summer, as well as all other phases of breeding, feeding, and management. It is suggested that these farms be included on county farm tours and that special meetings be held on them where there is something definite to show in the results of improved practices. Extension Circular No. 268, "Raising Beef Cattle"; Extension Folder No. 79, "Profits with Cow and Calf Program"; set of slides.

1. Dehorning and Castrating Demonstrations.

   Farmers will be given practice under supervision at these demonstrations.

Farmer's Bulletin No. 1600, "Dehorning, Castrating, Branding, and Marking Beef Cattle"; Extension Circular No. 268, "Raising Beef Cattle".

2. Disease and Parasites.

Educational meetings and Field Demonstrations. Extension Folder No. 77, "Bloat in Cattle and Sheep"; Extension Circular No. 268, "Raising Beef Cattle".

3. External Parasite Control: George D. Jones and H. Eldon Scott, Entomology

Beef cattle are attacked by various flies, lice, grubs and screw worms.

4. Buildings, Equipment, Chutes and Pens: R. M. Ritchie, Jr., Agricultural Engineering

D. Marketing: Animal Husbandry Staff; Guy R. Cassell, Marketing

1. General

Work will be conducted in all livestock producing and marketing areas of the State in order to provide a better market through improved marketing practices, structures and facilities. This work will be carried on with producers, marketing agencies, slaughterers, and packers, distributors and consumers, with the help of local agriculture workers.

2. Determining Market Needs.

Assistance will be given local agricultural workers in conducting market surveys to determine what livestock facilities and practices are needed in order to improve and expand market outlets.

3. Feeder Calf Sales.

Feeder Calf Sales are organized on State basis. Regulations governing sales will be furnished by State Feeder Calf Sales Committee. Feeder

Calf Sales have proven to be the best market available for beef producers to buy and sell.

4. Grading Demonstrations:

   a. Demonstrations to teach grades of feeder calves.

   b. Demonstrations to teach grades of slaughter cattle.

      Extension Circular No. 385, "Grading and Chtting Beef"; U.S.D.A. Leaflet No. 310, "U.S. Grades of Beef"; set of slides.

5. Efficient Production and Marketing Practices:

   a. Economics of feeding.

   b. Balanced livestock farming.

   c. Seasonal variation in prices for different classes and grades of livestock.

   d. Determining value of livestock for sale.

6. Outlook for Future Livestock Production and Prices.

7. Consumer Education.

   a. Relative value of the different grades and different cuts of meat.

   b. Promotional work to encourage consumption of local meat.

8. Purebred Sales.

E. Other Activities

1. County Beef Cattle Program.

   Educational meetings with Extension Agents and leading beef cattle producers to plan a long range beef cattle program. Leaders are to be selected to help carry out program.

2. Fitting and Showing Purebred Cattle.

   Demonstrations to show the proper methods of fitting and showing purebred cattle for sale.

3. Field Day.

   Livestock Field Days may be held on demonstration farms or on farms

where improved practices are being carried out.

4. 4-H Project Activities.

   a. Baby Beef. Steer calves are fed and exhibited at regular organized shows and sales. It is an excellent forerunner for a breeding herd and numerous club members have invested their profits in breeding cattle. Club Series No. 48, "4-H Livestock Record Book".

   b. Heifer Project. 4-H Club members should start with at least two grade or purebred heifers. It is recommended that this project be started in September or October.

   c. Fitting and Showing Demonstrations. At this demonstration the club members will be shown the proper methods to fit and show the animals and will be given an opportunity to participate. Club Series No. 48, "4-H Livestock Record Book"; set of slides; Extension Folder, "Fitting and Showing".

SHEEP

A. Breeding: A. V. Allen, J. S. Buchanan, James W. Patterson, An. Husb.

1. Ram selection and placement.
2. Ewe selection and placement. (Western ewes provide good source for replacement. Orders are made through North Carolina Department of Agriculture.)

B. Flock Management: A. V. Allen, J. S. Buchanan, James W. Patterson, Animal Husbandry.

1. Feeding.
   a. Ewes.
   b. Lambs.
2. Disease Control.
3. Parasite Control.
   a. External: George D. Jones and H. Eldon Scott, Entomology
   b. Internal.
4. Building and Equipment: R. M. Ritchie, Jr., Agricultural Engineering
5. Docking and castrating.

C. Marketing: Animal Husbandry Staff, and Guy R. Cassell, Marketing.

Marketing lambs, wool, and ewes.

D. Activities:

1. County meetings with leading sheep producers.
2. Sheep-shearing schools.
3. Field Days.
4. Drenching, docking, and castrating demonstrations.
5. Lamb pools.
6. Wool pools.
7. 4-H Projects and Activities.
   a. 4-H Sheep Club Project.

b. 4-H Judging

c. 4-H Fitting and Showing.

E. References:

Extension Circular No. 356, "Raising Sheep in North Carolina".

USDA Farmers' Bulletin No. 810, "Equipment for Farm Sheep Raising".

USDA Farmers' Bulletin No. 1199, "Judging Sheep".

USDA Farmers' Bulletin No. 1805, "Grading Wool".

USDA Farmers' Bulletin No. 1134, "Castrating and Docking Lambs".

Extension Folder No. 61, "Control of Internal Parasites in Sheep".

SWINE

A. Breeding: Jack Kelley, J. K. Butler, Jr., Animal Husbandry

1. Placement of purebreds. A list of purebred breeders will be furnished. Purebred sales will be organized.
2. Sow Testing. The purpose is to test the performance of sows so as to increase production. Purebred breeders should get nomination blanks from their breed association. Ear notch pigs at birth. Enter all litters with County Agent and purebred breeders should enter litters with breed association. Weigh at 56 days of age.
3. Breeding the meat type hog.

B. Feeding: Jack Kelley, J. K. Butler, Jr., Animal Husbandry

1. Brood Sow.
2. Hogs for Market.
3. Grazing. Start demonstration with pigs weighing 60 pounds or more Grow on Ladino clover with grain and limited supplement. Keep feed record. Extension Folder No. 67, "Grazing Hogs for 12 Months".

C. Herd Management: Jack Kelley, J. K. Butler, Jr., Animal Husbandry

Assist commercial and purebred breeders in planning a feeding, breeding, and management program. Extension Circular No. 238, "Raising Hogs in North Carolina"; Extension Circular No. 338, "Raising Hogs on Shares"; Extension Folder No. 83, "Profits with Sow and Pig Program".

1. Parasite and Disease Control.

   Educational meetings. Farmers' Bulletin No. 1787, "Internal Parasites of Swine"; Extension Folder No. 84, "Sodium Fluride for Worming Hogs"; Extension Folder No. 93, "Brucellosis of Swine".
2. External Parasites: George D. Jones and H. Eldon Scott, Entomology

   Hogs are attacked by lice, flies, and screw worms when present. General recommendation likely will be all that is needed.

3. Buildings and Equipment: R. M. Ritchie, Jr., Agricultural Engineering.

D. Marketing: Animal Husbandry Staff and Guy R. Cassell, Marketing.

1. Educational meetings.
2. Purebred sales.
3. Market hog shows and sales.
4. Outlook information.
5. Meats.

Educational meetings and demonstrations.

E. Activities:

1. County Swine Program.

Educational meetings with Extension Workers and leading swine producers to plan long range swine program. Extension Circular No. 238, "Raising Hogs in North Carolina"; Extension Circular No. 338, "Raising Hogs on Shares".

2. Better Sires.

A Better Sires Contest will be held. The county winning the contest will be able to send one Extension Worker and one Teacher of Vocational Agriculture to the International Livestock Show in Chicago. Points will be given for the placement of bulls, boars, and rams. Better Sires Placement Records.

3. Meat Type Hogs.

Educational meetings and demonstration to show the type of hog to produce for the producers and consumers.

4. Field Days.

Swine Field Days may be held on demonstration farms or other farms having a good swine program.

5. 4-H Activities.

a. 4-H Pig Chain.

The chain is started with eight gilts and a boar. Club members receiving gilts pay price of gilt within one year or return gilt pig out of first litter.

b. Brood Sow Project: (4-H Club)

Start with good grade or purebred gilt. Extension Folder No. 83, "Profits with Sow and Pig Program"; 4-H Livestock Record Book; 4-H Pig Production Manual.

c. Fattening for Market: (4-H Club)

Feed three or more pigs. Enter pigs in Fat Stock Show where possible. Extension Circular No. 238, "Raising Hogs in North Carolina"; 4-H Livestock Record Book.

d. Fitting and Showing:

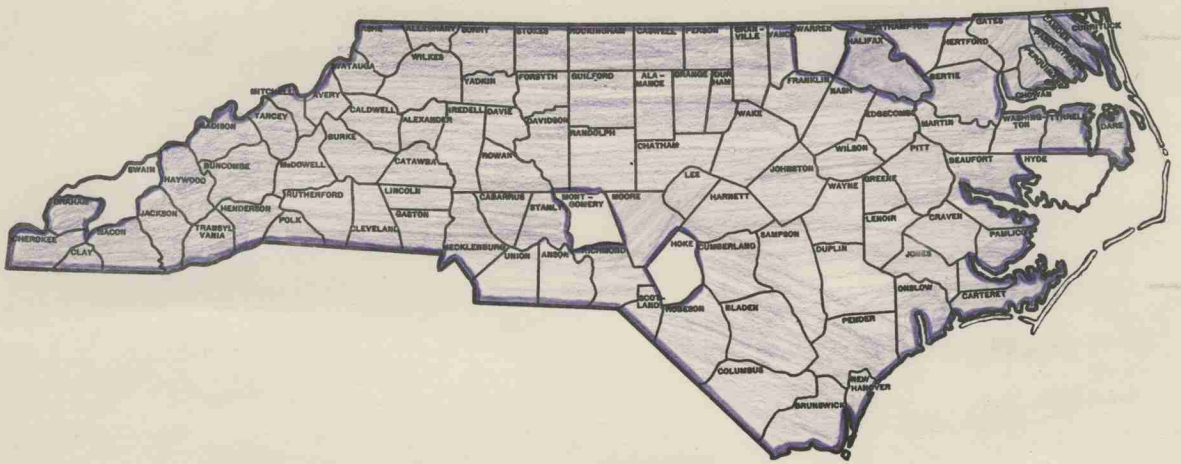
Demonstration to show how animals should be fitted for purebred shows and sales. Farmers' Bulletin No. 1455, "Fitting, Showing, and Judging Hogs".

e. 4-H Judging:

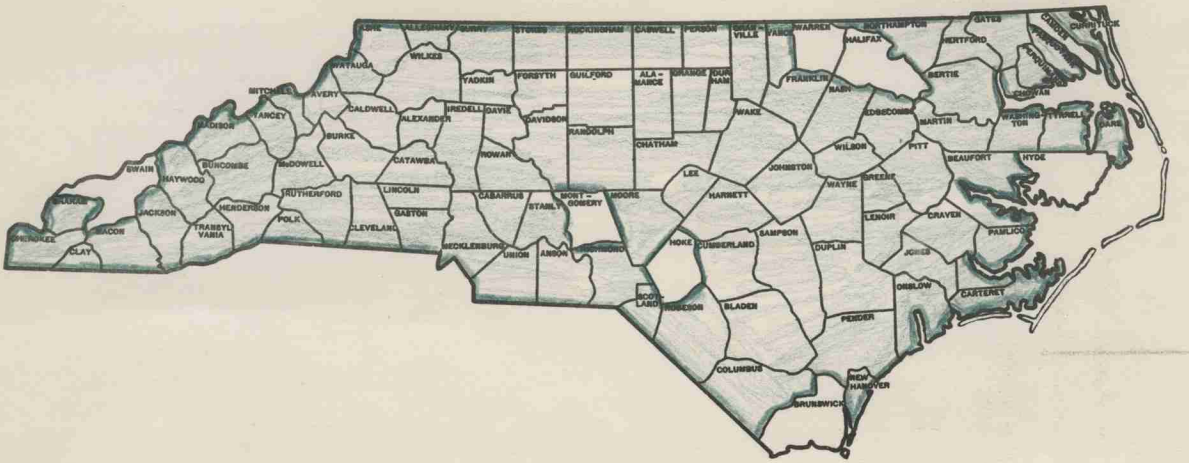
A Livestock Judging team consisting of three members and one alternate. The team will judge beef cattle, sheep and swine. State elimination contests will be held in July with four top teams to be selected. Final contest in October to determine State winner for National Contest in Chicago. Farmers' Bulletin No. 1455, "Fitting, Showing and Judging Hogs"; N. C. Extension Circular, "Judging Livestock"; set of slides.

6. 4-H Livestock Conservation Demonstrations

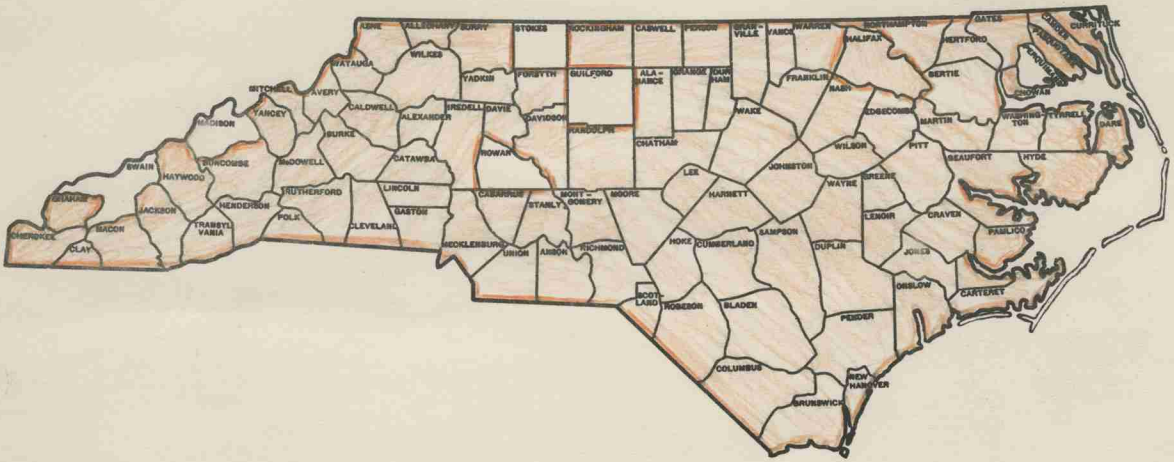
Two members are required for this demonstration and any subject may be selected that will show how to prevent loss of beef cattle, sheep or swine.



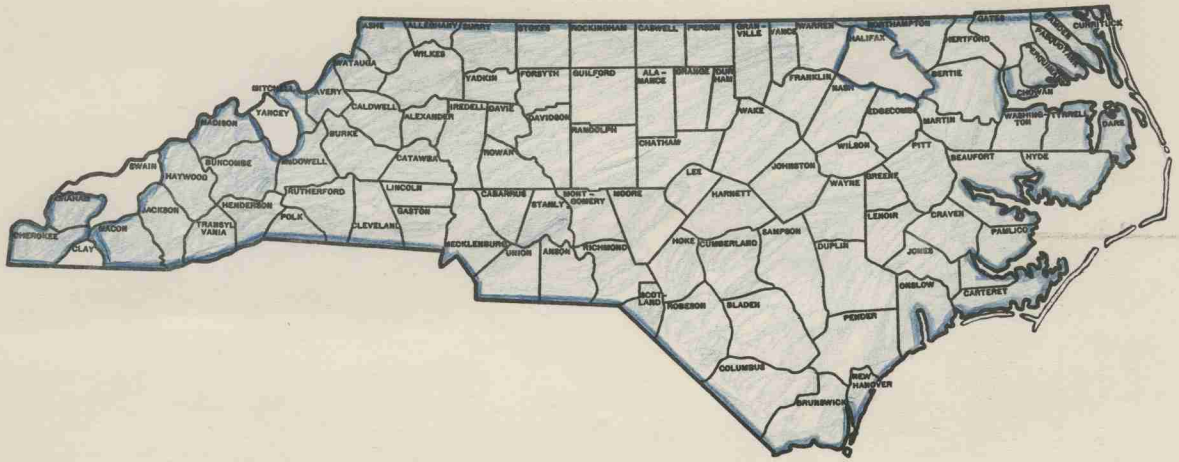
COUNTIES IN PURPLE PLAN BEEF CATTLE PROGRAM



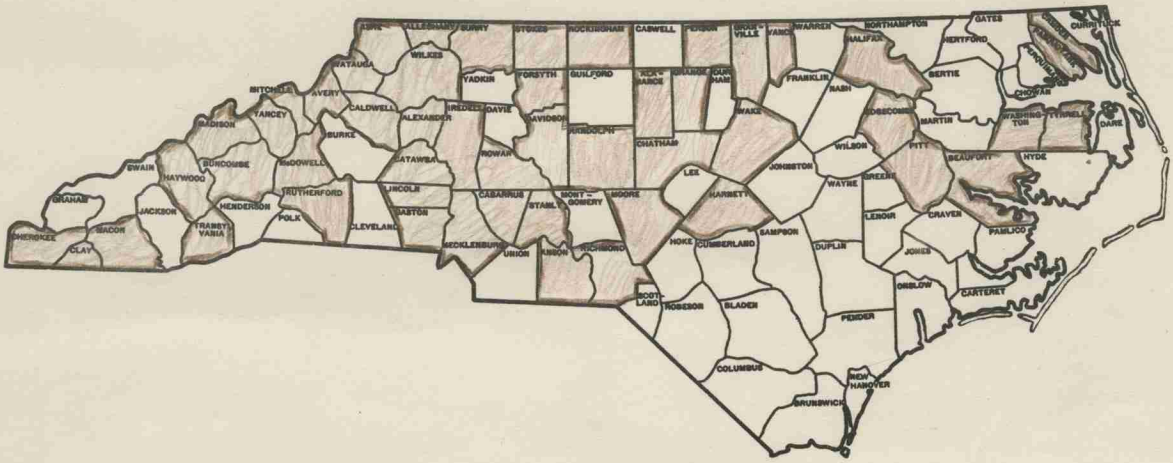
COUNTIES IN GREEN REQUESTING ASSISTANCE WITH BEEF CATTLE WORK



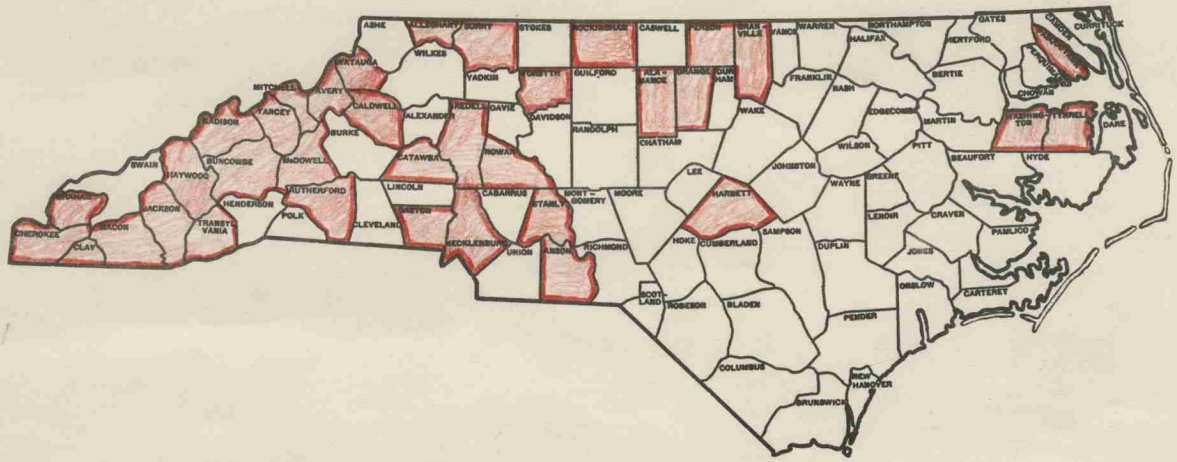
COUNTIES IN ORANGE PLAN SWINE PROGRAM



COUNTIES IN BLUE REQUESTING ASSISTANCE WITH SWINE WORK



COUNTIES IN BROWN PLAN SHEEP PROGRAM



COUNTIES IN RED REQUESTING ASSISTANCE WITH SHEEP WORK

IV. Method of Procedure

1. Livestock Schools for farmers, county agents, teachers of vocational agriculture and other agricultural workers.

2. Field Days will be held at result demonstrations and on farms where improved practices of livestock production may be observed. Method demonstrations will be conducted at these meetings.

3. Better Sires Contest with money donated by the beef cattle and swine breeders associations it is planned to pay the expense of the county agent and a teacher of vocational agriculture in the county that places the largest number of beef bulls and boars, to the International Livestock Show in Chicago.

4. Sheep Shearing Schools for teaching county agents and 4-H Club boys proper method of shearing and preparing wool for market. These schools will be followed by a State Contest for 4-H Club members.

5. Fat Stock Shows and Sales to teach 4-H Club members the proper method of feeding and marketing cattle and hogs.

6. Meat Cutting and Curing Schools.

7. Demonstrations Feeder Calf Sales for the purpose of teaching farmers how to produce and market feeder calves.

8. " Fat Cattle Sales.

9 8. County Livestock Committees will be assisted in working out livestock programs in connection with the challenge programs being conducted in many of the counties.

10 9. Method Demonstrations will be held in grading beef animals, market lambs and market hogs. Also in dehorning cattle, castrating calves, lambs and docking of lambs.

11 10. Carcass Demonstrations with beef cattle, sheep and swine.

12 11. Result Demonstrations

a. Fattening cattle for market

b. Fattening hogs for market

c. Control of parasites in hogs

d. Growing hogs on pastures

e. Farm flock management

f. Cow and Calf herd management

The press, radio, television, circular letters, bulletins and other printed information will be used to keep the people informed in regard to recommended practices.

Breed Associations will be used to help in promoting the use of good purebred animals, Livestock Marketing Association will also be used as a method of teaching production and marketing.

Type conferences with beef cattle, sheep and hogs will be held for the purpose of teaching county agents, agricultural teachers, farmers, 4-H and FFA Club members the accepted type of animals.

V. Cooperation

State, Federal and Other Specialists or Agencies that will Cooperate	Cooperation to be Given and/or Received
1. Extension Specialist in Agronomy	Pasture and feed production
2. Extension Specialists in Agricultural Engineering	Farm Buildings and Equipment
3. Extension Specialists in Farm Management	Records of Livestock Enterprises
4. Extension Specialists in Forestry	Forest Grazing
5. Extension Specialists in Marketing	Marketing Livestock
6. Extension Specialists in Entomology	Parasite Control
7. Four-H Club Department	Four-H Livestock Projects
8. State and County Veterinarians	Livestock Disease and Parasite Control & Livestock Schools.
9. National & State Livestock Breed Assn.	Promotion of Purebred Livestock
10. Plant Food Institute	Pasture and Feed Production
11. Southeastern Chain Store Council	Livestock Development & Marketing
12. Agri. Stablization & Conservation	Livestock Production & Marketing
13. Farmers' Home Administration	Livestock Production & Marketing
14. Soil Conservation Service	Pasture and Hay Production
15. Bureau of Animal Industry	Information
16. Bureau of Agricultural Economics	Information
17. Bureau of Plant Industry	Information
18. Vocational Agriculture	Assist with F.F.A. & Veteran's Projects
19. Federal Ext. A. H. Specialists	Information on new and better means of carrying on work
20. Agri. Development Agents of Sears-Roebuck, Railroads & Power Companies	Livestock Development & Marketing
21. N. C. State Dept. of Agriculture	Livestock Schools, Marketing and Purchasing of Livestock

VI. Publications, Visual and Other Teaching Aids

Material Available for Use in 1955:

Raising Beef Cattle in North Carolina, Extension Circular No. 268

Fattening Cattle for Market, Extension Circular No. 217

Four-H Baby Beef Production, Club Series No. 48

The Farm Pork Supply in North Carolina, Extension Circular No. 262

Raising Hogs in North Carolina, Extension Circular No. 265

Four-H Pig Club Manual, Extension Club Series No. 4

Graze Hogs for 12 Months, Extension Folder No. 67

Raise 'Em Right, R. J. Reynolds Motion Picture

Sheep Production in North Carolina, R. F. Reynolds Motion Picture

Four-H Sheep Club Manual, Extension Club Series No. 30

Control of Internal Parasites in Sheep, Extension Circular No. 61

Brucellosis In Swine, Extension Folder No. 93

Blue Prints of barns, equipment for beef cattle, sheep, swine and work stock.

U. S. D. A. Publications on related subjects

Raising Sheep in North Carolina, Extension Circular No. 356

Profits with a Cow-and-Calf Program, Extension Folder No. 79

Profits with a Brood Sow and Pig Program, Extension Folder No. 83

Sodium Fluoride for Worming Hogs, Extension Folder No. 84

Sets of Beef Cattle, Sheep, and Swine Slides for County Agents.

Materials to be Prepared in 1955:

Revise Fattening Cattle For Market, Extension Circular No. 217

Fitting and Showing Meat Animals, Extension Folder

Revise Four-H Pig Club Manual, Extension Club Series No. 4

Revise Four-H Baby Beef Production Manual

Set of Slides on Judging of Livestock
