

Viola Alderman  
Clinton, N.C. 1915

I had one tenth ( $\frac{1}{10}$ ) of an acre, and had the ground broken in February  
in May the rows was run off and the Feterlizer was put out. ~~Then~~ Then  
I planted my Beans, when they come up I kept them worked and plowed  
when they got up half grown they taken a disease and lots of them  
died. I didnt make any thing much, But think I will have  
better luck next year, It will make me more Interested in the  
work the second year, as I had a failur this year.

Viola Alderman,
