BONNIE F. NORRIS, JR., '23

Where the winds of Dixie softly blow
o'er the fields of Caroline,

There stands ever cherished N.C. State,
as thy honored shrine.

So lift your voices; Loudly sing
from hill to oceanside!

Our hearts ever hold you, N.C. State
in the folds of our love and pride.

ALBERT CARNESALE

Dr. Albert Carnesale, a North Carolina State University alumnus, has had a distinguished career both in his field of American foreign policy and international security and in higher education administration.

Carnesale currently serves as Harvard University's acting president, provost, dean of the John F. Kennedy School of Government and Don K. Price Professor of Public Policy.

His teaching and research have focused on the implications of the end of the Cold War and on issues associated with nuclear weapons and arms control.

After earning bachelor's and master's degrees in mechanical engineering from Cooper Union and Drexel University, Carnesale was awarded a doctoral degree in nuclear engineering from North Carolina State University in 1966.

He served on NCSU's faculty from 1962 to 1969, working his way up from instructor to associate professor. During that time, he was honored with the Alumni Award for Outstanding Teaching and was inducted into the Academy of Outstanding Teachers.

Carnesale went on to serve as chief of the defensive weapons systems division of the U.S. Arms Control and Disarmament Agency's Science and Technology Bureau. In that post, he was responsible for formulating and evaluating arms-control policies and measures, primarily in the area of strategic defensive weapons systems. He also was a member of the U.S. delegation to the Strategic Arms Limitation Talks, or SALT I, with the Soviet Union in 1970-72.

He returned to NCSU briefly, from 1972 to 1974, to serve as professor and head of the Division of University Studies and as coordinator for environmental studies.

Carnesale then joined the faculty at Harvard University's John F. Kennedy School of Government. He was named provost of the university earlier this year.

Carnesale has consulted widely on foreign and defense policy matters. He also has written on international affairs, defense policy and nuclear energy issues. He is co-author of *New Nuclear Nations: Consequences for U.S. Policy* (1993); *Fateful Visions: Avoiding Nuclear Catastrophe* (1988); *Superpower Arms Control: Setting the Record Straight* (1987); and several other books.

He was born in 1936 in the Bronx, N.Y., and now lives in Cambridge, Massachusetts.

Academic Costume

Academic gowns represent a tradition handed down from the universities of the Middle Ages. These institutions were founded by the Church; the students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards; the hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns which are different from those commonly used in this country. Some of the gowns are of bright colors and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed, the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor--long pointed sleeves; master--oblong, square cut in the back with an arc cut away in front; doctor--bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold and those for other graduate and professional degrees may be of the color corresponding to the trimmings on the hoods.

Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution which awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's, and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty. A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Education, light blue; Engineering, orange; Forestry, russet; Physical Education, sage green; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. The following faculties have the same color--dark blue: Anthropology, History, Languages, Literature, Philosophy, Political Science, Sociology.

Academic Honors

Honors participants benefit from a more individualized and rigorous approach to their desired degree through special classes, seminars and individual research.

Undergraduate degree honor designations are:

Cum Laude--for GPA 3.250 through 3.499 (white sash)

Magna Cum Laude--for GPA 3.500 through 3.749 (red sash)

Summa Cum Laude--for GPA 3.750 and above (gold sash)
