Words by:

ALVIN M. FOUNTAIN, '23

Music by:

BONNIE F. NORRIS, JR., '23

Where the winds of Dixie softly blow
o'er the fields of Caroline,

There stands ever cherished N.C. State,
as thy honored shrine.

So lift your voices; Loudly sing
from hill to oceanside!

Our hearts ever hold you, N.C. State
in the folds of our love and pride.

MR. GERALD J. BUTTERS

Gerald J. Butters is group president of Lucent Technologies' Optical Networking Group. His selection as commencement speaker at the first graduation ceremonies held in the Raleigh Entertainment and Sports Arena marks the second time this year he has played a central role in a historic NC State event.

In April, Butters joined Chancellor Marye Anne Fox and Governor James B. Hunt, Jr. to announce that Lucent would build a 120,000-square-foot optical networking research and development facility on NC State's Centennial Campus.

The new facility, slated to open in spring 2000, will employ 500 research and development professionals, making Lucent the largest corporate partner yet to locate on Centennial Campus.

As president of Lucent's Optical Networking Group, Butters is responsible for all development, manufacturing, product marketing and management for Lucent's optical networking product line, including Dense Wave Division Multiplexing (DWDM) systems, SONET/SDH, and Bandwidth Management elements. He previously was president of the North American Region of Lucent Technologies' Network Systems business.

Prior to joining Network Systems in 1994, he was president of Northern Telecom Inc. in Research Triangle Park.

Butters is a member of the Industrial Strategy Council of the Internet 2 Board of Trustees and the Business Advisory Board of the College of Business Administration of Rider University. He also is a board member of Junior Achievement of New York. The Mississippi University for Women awarded him the Medal of Excellence for his leadership in the development of new technology applications to augment high school education in Mississippi. Earlier this year, Butters was named a Fellow by the International Engineering Consortium. His previous affiliations include a board membership at the North Carolina Museum of Art.

Butters attended Mount San Antonio College, Ryerson Polytechnical Institute and the University of Western Ontario Advanced Management Program. He and his wife, Carolyne, live in New Jersey.

DR. JOHN THOMAS BIGGERS

In 1941, John Thomas Biggers enrolled at the Hampton Institute in Hampton, Virginia, intending to become a plumber. Luckily for the world of art, things worked out a little differently for the 17-year-old boy from Gastonia, North Carolina.

Today, Biggers is one of our country's most accomplished artists. His paintings and drawings hang in museums and private collections nationwide, and his murals -- including two at Winston-Salem State University, and one in the North Carolina Legislative Building on which he advised his nephew, James Biggers -- are widely considered to be the finest painted by any artist of his generation. Throughout his long and productive career, Biggers has created works that draw upon the experiences of African Americans in the rural South to illustrate and celebrate the richness of diversity and the commonality of all human experience. He has said, "I'm not a big-city artist telling a big-city story; I'm a Southern man telling a story about home."

Biggers was born in Gastonia on April 13, 1924, the seventh and youngest child of Paul and Cora Biggers. Overcoming poverty, racism and personal tragedy -- his father died in 1937 when his youngest son was just 13 -- Biggers persevered, and enrolled as a freshman at Hampton Institute in 1941. There, despite his initial goal of becoming a plumber, he was drawn to art and began to develop his own personal style, a bold synthesis of African and African-American folk cultures with Western modernism. By 1943, one of his earliest and most famous murals, *Dying Soldier*, was exhibited in a show, "Young Negro Art," at the Museum of Modern Art in New York City.

Following two years of service in the U.S. Navy during World War II, Biggers returned to college and earned bachelor's and master's degrees in art education from Pennsylvania State University in 1948. With the exception of 1954, when he returned to Penn State to complete work on his doctorate in art education, Biggers spent the next 34 years of his life as a professor of art at Texas Southern University in Houston, where he directed a program that has produced many of America's most prominent black artists, art historians and teachers.

Biggers retired from his teaching post at Texas Southern in 1983, but continues to serve the university as professor emeritus, and to paint and inspire new generations of artists. He and his wife of nearly 51 years, Hazel Hales Biggers, live in Gastonia and in Houston, Texas.

Academic Costume

Academic gowns represent a tradition handed down from the universities of the Middle Ages. These institutions were founded by the Church; the students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards; the hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns which are different from those commonly used in this country. Some of the gowns are of bright colors and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed, the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown--bachelor--long pointed sleeves; master--oblong, square cut in the back with an arc cut away in front; doctor--bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold and those for other graduate and professional degrees may be of the color corresponding to the trimmings on the hoods.

Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's, and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty. A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Education, light blue; Engineering, orange; Forestry, russet; Physical Education, sage green; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. The following faculties have the same color--dark blue: Anthropology, History, Languages, Literature, Philosophy, Political Science, Sociology.
