## R. SCOTT WALLINGER

Scott Wallinger is an NC State graduate who has been instrumental in advancing the concept of sustainability among businesses around the world.

Sustainable development was a cornerstone of Mr. Wallinger's professional mission long before it became a buzzword. Early in his career at the Westvaco Corporation, the forerunner of Meadwestvaco, he pioneered a program that provided thousands of Southeastern private forest landowners with the advice they needed to make good decisions about their land, based on their own vision of sustainability. Building on that program, in the 1990s he led the entire forest industry to establish the sustainable forestry initiative, which commits every member company to implement sustainability practices on their own lands.

By the time Mr. Wallinger recently retired from Meadwestvaco, he and his company had firmly established sustainable development as both principle and practice that are good for the economy, good for the environment and good for communities. Through a career of efforts focused on improving the sustainability of forest lands, Mr. Wallinger has become one of the world's foremost spokespersons on the topic, advocating for sustainability across the globe.

Mr. Wallinger has served as a delegate to the World Business Council for Sustainable Development; as the co-leader of The Forests Dialogue, an international panel made up of leaders from the private sector and nongovernmental organizations; and as a member of the board of directors for the Council of the Americas. He was awarded the Order of the Palmetto from the Governor of South Carolina in 1981.

Today, Mr. Wallinger continues his efforts on behalf of sustainable forestry. He is a founding director of the National Commission on Science for Sustainable Forestry. He is on the Board of Directors of the Forest History Society, and he recently helped to organize the first Governor's Forestry Summit held in South Carolina.

Mr. Wallinger received his Bachelor of Science in Forest Management from NC State, his Master of Science in Forestry from Yale University, and he completed the Advanced Management Program at the Harvard Graduate School of Business Administration.

## RICHARD E. BENEDICK

Regarded as a major figure in global environmental affairs, Ambassador Richard Benedick has spent his career in service to the United States and to the world. His contributions to global environmental policies are many. He was chief negotiator, and a principal architect, of the historic Montreal Protocol on protecting the stratospheric ozone layer, and has served as Special Advisor to Secretaries-General of the United Nations conferences on environment, development, and population.

He is Senior Advisor at Battelle Pacific Northwest National Laboratory and President of the National Council for Science and the Environment, an organization of over 500 universities, scientific societies, and industry and civic groups dedicated to improving the scientific basis for environmental decision-making. He has concurrently been a Visiting Fellow since 1995 at the Wissenschaftszentrum Berlin – a social science research center. Ambassador Benedick's book, *Ozone Diplomacy: New Directions in Safeguarding the Planet*, was selected for an anthology of twentieth-century environmental classics and is used in universities throughout the world.

His honors are also numerous. Ambassador Benedick was elected in 2002 to the American Academy of Diplomacy, an association of 100 former cabinet secretaries, ambassadors and statesmen who have made notable contributions to American foreign policy. In 1991, he was elected a Fellow of the World Academy of Art and Science. He is also a recipient of the United Nations Tenth Anniversary Ozone Award, and the highest Presidential Foreign Service Award, the State Department's John Jacob Rogers Medal.

A career diplomat, Ambassador Benedick served in Iran, Pakistan, Paris, Bonn and Athens. As Deputy Assistant Secretary of State for Environment, Health and Natural Resources, he supervised policy formation and international negotiations on climate change, stratospheric ozone, biotechnology, tropical forests, oceans, wildlife conservation and AIDS.

Ambassador Benedick received his bachelor's degree from Columbia, his Master's in Economics from Yale, a doctorate in international finance from the Harvard Graduate School of Business Administration, and was Evans Fellow at Oxford University in metaphysical poetry.

## ROBERT WARD

Robert Ward is an internationally renowned composer whose work continues to inspire and delight musicians and audiences of all ages. As Mary Duke Biddle Professor and now Professor Emeritus at Duke University, Mr. Ward has called Durham home since 1979. While he is technically retired, he continues to compose and to have a dramatic impact on the arts in North Carolina and the rest of the nation as well.

Mr. Ward was awarded a Pulitzer Prize in 1962 for his best-known opera *The Crucible*, which was based on Arthur Miller's play. He has received numerous accolades and awards over the years, including the New York Music Critics Circle Citation Award, election to the National Institute of Arts and Letters, and Guggenheim fellowships in 1950, 1952 and 1956. He is also a member of the National Academy of Arts and Letters.

Besides being a noted composer himself, he has helped to shape and mold future musicians and composers through education and training. He served both on the faculty and as the assistant president of the Julliard School of Music; as director of the Third Street Music School Settlement; as Vice-President and Managing Editor of Galaxy Music Corporation and Highgate Press; as chancellor of The North Carolina School Of The Arts, and as professor of composition at that institution before coming to the Triangle and Duke University In 1979.

Mr. Ward's key operatic works include *He Who Gets Slapped*, *The Crucible*, *The Lady From Colorado*, *Claudia Legare*, *Abelard and Heloise* and *Minutes Till Midnight*. He has also composed numerous works of orchestral, chamber and vocal music, as well as ballet. When he turned 80 years old in 1997, birthday celebrations including a concert featuring all aspects of his work were heard throughout the year in various parts of the country.

After attending the Eastman School of Music, Mr. Ward completed the Julliard Graduate School of Music in 1946. He completed his student composition work under Bernard Rogers, Howard Hanson, Frederick Jacobi, and Aaron Copland. He studied conducting under Albert Stoessel and Adgar Schenkman.

# ACADEMIC COSTUME

Academic gowns represent a tradition handed down from the universities of the Middle Ages. These institutions were founded by the Church; the students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards; the hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns which are different from those commonly used in this country. Some of the gowns are of bright colors and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed, the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor--long pointed sleeves; master--oblong, square cut in the back with an arc cut away in front; doctor--bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold and those for other graduate and professional degrees may be of the color corresponding to the trimmings on the hoods.

Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution which awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's, and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty. A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Education, light blue; Engineering, orange; Forestry, russet; Physical Education, sage green; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. The following faculties have the same color--dark blue: Anthropology, History, Languages, Literature, Philosophy, Political Science, Sociology.

## ACADEMIC HONORS

Undergraduate degree honor designations are noted on transcripts and diplomas for the following grade point averages.

*Cum Laude* - for GPA of 3.250 through 3.499 (white sash)

*Magna Cum Laude* - for GPA of 3.500 through 3.749 (red sash)

*Summa Cum Laude* - for GPA of 3.750 and above (gold sash)

Students have the opportunity to participate in several programs that provide a more individualized and rigorous approach to learning through special classes, seminars, and research. Participants in the University Honors Program, University Scholars Program, and college honors programs are noted as follows:
