GREETINGS FROM THE CHANCELLOR

Dear Graduates:

On behalf of the faculty and staff at North Carolina State University, I want to offer congratulations to each of you, and to your families, on completing your degree requirements and achieving this important milestone in your life.

Think of the word "achieve" as you end this phase of your academic career and begin the next phase of your life. Whether that means a successful career, the start of a family or the quest for worldly adventures, it is now up to you. You have been successful on our campus and you can look forward to the chance to excel in your chosen field -- locally, nationally and globally. I believe you will discover, as you begin this journey, that your education at NC State has prepared you to succeed in the opportunities and challenges that lie ahead.

Those who have preceded you on this stage have gone on to do many exciting things -- in research, education, economic development and technology -- all those things that make NC State one of the nation's top universities. Imagine how they felt on this day, with the many possibilities of the world waiting for them. You have unique possibilities before you; you can achieve greatness in whatever you choose to do.

We hope throughout your life that you will always feel a desire to return to NC State, whether it is for a football or basketball game, to drop by a professor's office to say thank you one more time or just to take a walk on the Brickyard to reflect on your time here. We also hope you will want to give back to the university, to help improve the quality of education for those who follow in your footsteps on our campus, just as those who preceded you have done by offering their time, ideas and financial support to make this a better place. NC State will always need your devotion and loyalty.

Please accept my congratulations from the entire faculty and staff that helped you reach this long-awaited goal. I wish you all the best in the future. Always keep NC State in your heart. Again, congratulations.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jim. Oblinger". The signature is fluid and cursive.

DANIEL L. MCFADDEN

Honorary Degree Recipient

Doctor of Sciences

Daniel McFadden is a professor of economics at the University of California, Berkeley and is a North Carolina native. He shared the 2000 Nobel Memorial Prize for Economic Sciences for his work in microeconometrics, a method for studying economic decisions using complex mathematical equations. His groundbreaking work used mathematical models to analyze how consumers make decisions on where they work, shop and travel. McFadden's models have become standard tools for interpreting the economic decisions made by consumers, firms and governments.

He was awarded the Nemmers Prize in Economics from Northwestern University in 2000. That same year, he received the Richard Stone Prize in Applied Econometrics from the Journal of Applied Econometrics.

McFadden is widely respected for his research on travel demand forecasting, consumer utilization of energy-consuming appliances, the economics of aging and the use of contingent valuation methods to value public goods. With support from the National Institute on Aging at the National Institutes of Health, he has performed research on the economic status of elderly Americans, examining the adequacy of housing arrangements, financial planning, and the delivery and cost of health services. In San Francisco, he is best known for developing models to determine the expansion of the Bay Area Rapid Transit system.

He was elected to the National Academy of Sciences in 1981 and served on the NAS committee on behavioral and social sciences and education. He was also elected to the American Academy of Arts and Sciences. He is a member of the American Statistical Association, Mathematical Association of American and served as president of the American Economics Association in 2005. He has also served on the board of directors for the National Bureau of Economic Research.

McFadden has been a professor of economics since 1962, teaching at the University of Pittsburgh, UC Berkeley, Yale University and the Massachusetts Institute of Technology. While at MIT, he served as the director of the school's statistics center. He has been at UC Berkeley since 1990, serving as the director of graduate studies in 1994 and as chair of the school's Department of Economics from 1995-96. He received his bachelor's degree in physics and his doctorate in behavioral sciences from the University of Minnesota.

McFadden will receive an honorary Doctor of Sciences degree.

JOHN RUFFIN

*Honorary Degree Recipient
Doctor of Sciences*

Ruffin is the director of the National Center on Minority Health and Health Disparities at the National Institutes of Health (NIH). He is recognized worldwide for more than 25 years of work in improving the health status of minority populations in the United States and in developing and supporting educational programs for minority researchers and health care practitioners.

At NIH he has been successful in planning and implementing the largest program in the country promoting minority biomedical training and health research. He convened an advisory minority fact-finding team to help NIH identify specific minority health concerns and current gaps in minority training. Working in collaboration with the 53-member fact-finding team, he organized three large national meetings involving nearly 1,000 members of minority communities. Their recommendations served as guidelines for the Minority Health Initiative, a set of programs aimed at improving minority health and increasing the participation of underrepresented minorities in all phases of biomedical research.

Throughout his career, Ruffin has been committed to creating new learning opportunities for minority students and faculty and developing research programs to improve minority health. He has received numerous awards and recognitions, including the Samuel L. Kountz Award for his significant contributions to the cause of increasing access and participation in organ and tissue transplantation in minorities.

He is also the recipient of the NIH Director's Award, National Hispanic Health Leadership Award, National Medical Association Award of Appreciation, the U.S. Department of Health and Human Services' special recognition award and the U.S. Presidential Merit Award.

Ruffin is a former dean of the College of Arts and Sciences at North Carolina Central University, where he also served as a professor of biology. He has been with NIH for more than 15 years, serving as associate director for minority programs and as associate director for research on minority health.

Ruffin received his bachelor's degree from Dillard University, his master's degree from Atlanta University and his Ph.D. – in systematic and developmental biology – from Kansas State University. He also did postdoctoral work at Harvard University.

Ruffin will receive an honorary Doctor of Sciences degree.

GEORGE S. TOLLEY

Tolley is president of RCF Economic and Financial Consulting Inc., and professor emeritus of economics at the University of Chicago. In a career spanning nearly 50 years, he has helped to shape domestic policy and influence international development by performing extensive international work for the World Bank and the Agency for International Development.

He has served as an economic policy consultant to the governments of China, Venezuela, Panama, Korea, Thailand, Iran, and Gambia, and has made major recommendations on agricultural and natural resource policies, housing privatization, regional development, and taxation.

Tolley is a member of the Energy Engineering Board at the National Research Council, the President's Task Force on Urban Renewal and the National Center for Environmental Economics under the U.S.

Environmental Protection Agency. He has written 17 books and published more than 100 articles in professional journals.

He has served on various committees of the National Academy of Sciences, including automotive pollution, water policy, and energy engineering. From 1955-66, Tolley was a faculty member in the NC State Department of Economics and Business.

Tolley has analyzed proposed environmental regulations for the Illinois Department of Energy and Natural Resources and has conducted several projects for the Wisconsin Electric Power Company, Commonwealth Edison, the Edison Electric Institute, and Peoples Gas, including evaluation of company environmental and conservation programs, forecasts of the impacts of new regulation, and market analysis of plant construction plans. Tolley has performed economic analyses for many private companies as well as the City of Chicago.

He received his undergraduate degree in economics from American University and his master's and doctoral degrees in economics from the University of Chicago.

Tolley will receive an honorary Doctor of Sciences degree.

RALPH J. CICERONE

*Commencement Speaker and
Honorary Degree Recipient
Doctor of Sciences*

Commencement speaker Dr. Ralph Cicerone is an atmospheric scientist and president of the National Academy of Sciences (NAS). His research in atmospheric chemistry and climate change has helped shape science and environmental policy both nationally and internationally. Prior to his election as NAS president in 2005, Cicerone was chancellor of the University of California, Irvine.

Among his many achievements in shaping policy on climate change, global warming and pollution was the landmark 2001 study, *Climate Change Science: An Analysis of Some Key Questions*, which was conducted by the NAS at the request of President George W. Bush. His research was also recognized on the citation for the 1995 Nobel Prize in chemistry awarded to his UC Irvine colleague, F. Sherwood Rowland.

The Franklin Institute recognized Cicerone's fundamental contributions to the understanding of greenhouse gases and ozone depletion by selecting Cicerone as the 1999 laureate for the Bower Award and Prize for Achievement in Science. One of the most prestigious American awards in science, the Bower also recognized his public policy leadership in protecting the global environment. The American Geophysical Union awarded him its 2002 Roger Revelle Medal for outstanding research contributions to the understanding of earth's atmospheric processes, biogeochemical cycles, or other key elements of the climate system. In 2004, the World Cultural Council presented him with another of the scientific community's most distinguished awards, the Albert Einstein World Award in Science.

In addition to being a member of the NAS, Cicerone is a member of the American Academy of Arts and Sciences and the American Philosophical Society. He has served as president of the American Geophysical Union, the world's largest society of earth scientists, and he received the union's James B. Macelwane Award in 1979 for outstanding contributions to geophysics. He has published about 100 refereed papers and 200 conference papers, and has presented invited testimony to the U.S. Congress. Cicerone served as Daniel G. Aldrich Professor of Earth System Science, department chair and dean of physical sciences at UC Irvine before being named chancellor in 1998. From 1980 to 1989, he served as a senior scientist and director of the atmospheric chemistry division at the National Center for Atmospheric Research in Boulder, Colorado. He also served as a research chemist at the Scripps Institution of Oceanography at the University of California, San Diego, and held faculty positions in electrical and computer engineering at the University of Michigan.

Cicerone received his bachelor's degree in electrical engineering from the Massachusetts Institute of Technology, and master's and doctoral degrees in electrical engineering from the University of Illinois, Urbana-Champaign.

Cicerone will receive an honorary Doctor of Sciences degree.

ACADEMIC COSTUME

Academic gowns represent a tradition handed down from the universities of the Middle Ages. Universities were founded by the church and students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards. The hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns different from those commonly used in this country. Some of the gowns are brightly colored and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed, the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor's have long pointed sleeves; master's are oblong, square cut in the back with an arc cut away in front; doctor's are bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold, and those for other graduate and professional degrees may correspond to the trimmings on the hoods. Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution that awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty.

A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Education, light blue; Engineering, orange; Forestry, russet; Physical Education, sage green; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. Anthropology, History, Languages, Literature, Philosophy, Political Science and Sociology are all dark blue.

ACADEMIC HONORS

Undergraduate degree honor designations are noted on transcripts and diplomas for the following grade point averages.

Cum Laude - for GPA of 3.250 through 3.499 (white sash)

Magna Cum Laude - for GPA of 3.500 through 3.749 (red sash)

Summa Cum Laude - for GPA of 3.750 and above (gold sash)

Students have the opportunity to participate in several programs that provide a more individualized and rigorous approach to learning through special classes, seminars, and research. Participants in the University Honors Program, University Scholars Program, the Park Scholars Program, and college or departmental honors programs are listed in the full graduation program.

UNIVERSITY MACE

The NC State University Mace is carried by the chief faculty marshal, a position held by the chair of the faculty. The academic mace, derived from a medieval weapon, represents the need to protect and nurture the fragile search for knowledge. The NC State University Mace has been specifically designed for this community. It was carried for the first time at the installation of Chancellor Oblinger. Each aspect of the mace represents an important characteristic of the university.

When freestanding, the mace is supported in a base of North Carolina stone representing the foundation of knowledge and the dependence of this academic community on the support of the people. At the base of the mace is a brass ring with the names of individuals who have held the position of chancellor, indicating the contribution of generations of academic leaders to the formation and maturation of NC State University.

The long lower fluted handle is the primary means by which the mace is grasped, representing the responsibility for the stewardship of knowledge. The shorter fluted, upper handle is the primary means by which direction is shown, and therefore represents the responsibility for guardianship. A block embedded with the seal of the university on four faces represents the university community and its charge to reach out in all directions. At the top of the mace is a geometric progression of layers representing the continual experimentation and testing of knowledge within the NC State academic community. At the very top of the mace is a bronze prow symbolizing the continual exploration that energizes our community.

The mace is fashioned from burl walnut recovered from a North Carolina tree felled in a storm, emphasizing the need to make wise use of resources even in difficult circumstances. The wood is a gift of the Jordan family, representing the importance of the generosity of the people of North Carolina to the university. The wood is complemented by bronze and silver fittings emphasizing the precious nature of the academic experience in society. During the course of fabrication, an error was made. After much discussion, the design team decided to make the revisions necessary to correct the error rather than refabricate the flawed component. This adjustment, difficult to identify, represents the valuable lessons learned from failure as an essential component of the university experience.

The mace was designed and fabricated by a team that included College of Design Dean Marvin J. Malecha, Chris Jordan (1975, Product Design), Jack Lancaster and Jim Dean (1983, Product Design) in the College of Design Materials Laboratory.

UNIVERSITY MEDALLION

The NC State University Medallion is worn by the chancellor for ceremonial occasions such as commencement, convocations and installations.

Similar to the University Mace, the medallion is derived from the Middle Ages, the period of the birth of the modern university. Today, universities strike medallions to commemorate special events, the contributions of exceptional individuals and to recognize individuals in positions of responsibility.

The NC State University Medallion also has been designed with symbolic gestures. The necklace has been shaped by two circles of differing focal points, representing the diverse nature of academic community. It includes pieces that combine into a whole, further signifying that many voices comprise the NC State community. The chain is joined by a small disk inscribed with the year of the founding of the university (1887) in tribute to the vision of the founders. The medallion joined to the necklace is the seal of the university, a representation of the responsibility and authority of the chancellor.

The necklace and medallion are fashioned from custom-made gold-plated brass. This choice of materials represents the pride of the university community in its accomplishments. It is a sign of the wealth of knowledge at NC State University.

The medallion and necklace were first designed by Mary Ann Scherr. It has been redesigned and reconfigured by a team that included College of Design Dean Marvin J. Malecha, Chris Jordan (1975, Product Design), Jack Lancaster and Sarah Tector.

GREETINGS FROM THE ALUMNI PRESIDENT

Dear 2006 NC State Graduate:

Congratulations. I welcome you to the NC State alumni family – more than 150,000 strong.

Through hard work and diligence, you have succeeded in making a dream come true: a college education. Your NC State degree will change your life forever. I am proud that NC State has played a pivotal role in your life, and I urge you to stay connected to your alma mater through membership in the NC State Alumni Association.

Your membership will keep you connected to friends and classmates through an e-mail forwarding address and online directory. Our award-winning *NC State* magazine will highlight the accomplishments of your fellow alumni (or your own). Through our monthly Prowling Pack e-newsletter, keep informed about events and the latest campus news. Our Web site – www.alumni.ncsu.edu – provides countless opportunities for staying connected and providing feedback.

The Alumni Association can be your home away from home, wherever you go. We have active alumni groups and clubs throughout North Carolina and across the nation. We'll roll out the red carpet for you for Homecoming, reunions, travel offerings and special events. Alumni Career Services can help you pinpoint job opportunities to advance your career. And we'll welcome you with open arms at NC State's new alumni home: the Dorothy and Roy Park Alumni Center, located on shores of Lake Raleigh on Centennial Campus.

Join us. We'll keep you connected, involved and informed. We'll nurture the pride you feel today for NC State into a lifelong bond.

Go Wolfpack!

A large, handwritten signature in cursive script that reads "Burley Mitchell". The signature is written in dark ink and is positioned over the typed name and title.

Burley B. Mitchell Jr. '66
President, NC State Alumni Association Board of Directors

*Outstanding Teacher Cash Award Recipients

DEPARTMENTAL AWARDS FOR TEACHING AND LEARNING EXCELLENCE

The Departmental Awards for Teaching and Learning Excellence were established in 1999-2000. Each year, up to two departments are recognized for their exceptional accomplishments in teaching and learning. Nominations are made by college deans, and dossiers supporting these nominations are reviewed by a committee of faculty, students, and staff appointed by the provost. Each department identified for this award receives a continuing base budget adjustment of \$15,000 and a one-time award of \$5,000.

The department selected to receive this award is listed below along with the abstract of its dossier.

The Department of Mathematics

The Mathematics Department has a long-standing commitment to the education of the students at North Carolina State University, both on the undergraduate and graduate levels.

The Department inaugurated a Research Experience for Undergraduates (REU) program, funded in part by the National Security Agency (NSF). Plans are underway to expand the program in 2005, and the Department has applied for increased funding by both the NSA and the National Science Foundation.

For many years, the department has provided a four-day Teaching Assistant Training Workshop for entering graduate student TAs. The program serves as a national model and the director of that program received the 2005 Award for Outstanding Service in Support of Teaching and Learning.

Other highlights of the Mathematics department's successes include:

- Twenty-one (21) members of the Academy of Outstanding Teachers, 6 Alumni Distinguished Undergraduate Professors, 2 Alumni Distinguished Research Professors, 1 Alumni Distinguished Graduate Professor, 2 recipients of the PAMS Board of Governor's Award, and 2 Drexel Professors.
- The Department is ranked 12th in the country in the number of students receiving NSF Graduate Fellowships in Mathematics since 1994.
- National recognition for diversity in PhDs; over the past five years, 23 of the 63 graduating PhDs were women, and 7 were African-Americans.
- The Industrial Applied Mathematics Program organizes an annual, nationally recognized NCSU Industrial Mathematics Modeling Workshop for Graduate Students.
- The department has been a pioneer in distance learning and incorporating appropriate technology in the classroom, providing models and leadership for Project 25 and the LITRE plan.
- The department's assessment efforts have been recognized both inside and outside the University. The outcomes-based assessment has been used as a model for demonstrating active faculty participation and continuous improvement.

In summary, the Mathematics department has a strong commitment to both undergraduate and graduate education. While serving as a department with a large service commitment to many non-mathematics majors, it also attends to the integrity of both the undergraduate Mathematics majors and graduate students.
