GREETINGS FROM THE CHANCELLOR

Dear Graduates:

On behalf of the faculty and staff at North Carolina State University, I want to offer congratulations to each of you, and to your families, on completing your degree requirements and achieving this important milestone in your life.

Think of the word “achieve” as you end this phase of your academic career and begin the next phase of your life. Whether that means a successful career, the start of a family or the quest for worldly adventures, it is now up to you. You have been successful on our campus and you can look forward to the chance to excel in your chosen field – locally, nationally and globally. I believe you will discover, as you begin this journey, that your education at NC State has prepared you to succeed in the opportunities and challenges that lie ahead.

Those who have preceded you on this stage have gone on to do many exciting things -- in research, education, economic development and technology -- all those things that make NC State one of the nation’s top universities. Imagine how they felt on this day, with the many possibilities of the world waiting for them. You have unique possibilities before you; you can achieve greatness in whatever you choose to do.

We hope throughout your life that you will always feel a desire to return to NC State, whether it is for a football or basketball game, to drop by a professor’s office to say thank you one more time or just to take a walk on the Brickyard to reflect on your time here. We also hope you will want to give back to the university, to help improve the quality of education for those who follow in your footsteps on our campus, just as those who preceded you have done by offering their time, ideas and financial support to make this a better place. NC State will always need your devotion and loyalty.

Please accept my congratulations from the entire faculty and staff that helped you reach this long-awaited goal. I wish you all the best in the future. Always keep NC State in your heart. Again, congratulations.

Sincerely,

A handwritten signature in dark ink, which appears to read "James L. Oblinger". The signature is fluid and cursive.

ACADEMIC COSTUME

Academic gowns represent a tradition handed down from the universities of the Middle Ages. Universities were founded by the church and students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards. The hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns different from those commonly used in this country. Some of the gowns are brightly colored and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed, the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor's have long pointed sleeves; master's are oblong, square cut in the back with an arc cut away in front; doctor's are bell-shaped.

Caps are black. The tassels for the Ph.D. degree are gold, and those for other graduate and professional degrees may correspond to the trimmings on the hoods. Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution that awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's and doctor's hoods are three feet, three and one half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty.

A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Education, light blue; Engineering, orange; Forestry, russet; Physical Education, sage green; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. Anthropology, History, Languages, Literature, Philosophy, Political Science and Sociology are all dark blue.

ACADEMIC HONORS

Undergraduate degree honor designations are noted on transcripts and diplomas for the following grade point averages.

Cum Laude - for GPA of 3.250 through 3.499 (white sash)

Magna Cum Laude - for GPA of 3.500 through 3.749 (red sash)

Summa Cum Laude - for GPA of 3.750 and above (gold sash)

Students have the opportunity to participate in several programs that provide a more individualized and rigorous approach to learning through special classes, seminars, and research. Participants in the University Honors Program, University Scholars Program, the Park Scholars Program, and college or departmental honors programs are listed in the full graduation program.

ALVIN M. FOUNTAIN, 23

Music by:
BONNIE F. NORRIS, JR., 23

Where the winds of Dixie softly blow

HONORARY DEGREE RECIPIENTS

Eduardo Catalano

Honorary Degree Recipient
Doctor of Fine Arts

A world-renowned architect who headed NC State's architecture department for five years during the 1950s, Argentina native Eduardo Catalano has produced revolutionary and notable works of architecture in a career spanning more than 50 years.

Some of his most important works as an architect include the Student Center at the Massachusetts Institute of Technology, where he taught from 1956 to 1977; United States embassies in Buenos Aires and Pretoria, South Africa; the Governmental Center in Greensboro, N.C.; and, in collaboration with Pietro Belluschi, the Juilliard School of Music in New York City.

After serving as professor of architecture at the Architectural Association in London in 1950-51, he was appointed as head of the Department of Architecture in the NC State School (now College) of Design where he taught and practiced for five years. During his tenure at NC State, he received four first prizes in national architectural competitions and designed and constructed his revolutionary house in Raleigh. When originally published in *House and Home* magazine in 1955, the editors wrote, "This is a structure that is all 'skin' and no 'bones,' a structure that reaches into the magic design world of the soap bubble and the cobweb, a structure that reflects the most advanced engineering know-how of our time ... The result is a flight of engineering fancy so daring, so nearly unbelievable as to make most structures of 1955 seem ponderous and obsolete by comparison."

A letter to the editor from Frank Lloyd Wright, who rarely praised other's work, read, "It is refreshing to see the service of shelter ... so imaginatively and able treated as in this design." *House and Home* would later name it the "house of the decade," and *Life* magazine would feature it prominently in a special 1957 issue devoted to marvels of design and technology that would shape the world of tomorrow.

He is a corresponding member of the Academy of Science of Buenos Aires and of Argentina's National Academy of Fine Arts. He is the author of six books on architecture, the last of which, titled "The Constant," received a prize from the Fundacion del Libro in Buenos Aires in recognition of its intellectual content. He was also awarded the Architectural Prize by the Fondo de las Artes in Argentina. A graduate of the University of Buenos Aires, he has graduate degrees in architecture from the University of Pennsylvania and Harvard University. He will receive an honorary Doctor of Fine Arts degree.

Roger Milliken

Honorary Degree Recipient
Doctor of Sciences

As chairman of Milliken & Company, the 141-year-old textile and chemical product company headquartered in Spartanburg, S.C., Roger Milliken has championed continuous quality improvement and industry innovation. A contributor to the emergence of bar coding, rapid response standards, supplier recognition and many other practices now standard throughout the textile industry, Milliken served as president of the company for more than 35 years before assuming chairman and CEO titles in 1983. Milliken & Company is the largest privately held textile and chemical manufacturer in the world, and was recently named the 38th Best Company to Work For by *Fortune* magazine.

In recognition of his efforts, the American Textile Manufacturing Institute honored him in 1986 with its "Samuel Slater Distinguished Service Award," and he was the first recipient of The Textile & Needle Trades Division of ASQC Quality Award in 1991. In 1999, the Northern Textile Association presented him with its "Lifetime Achievement Award" and *Textile World Magazine* named him "Leader of the Century" that same year.

Since 1984 he has been chairman of the Crafted With Pride in the U.S.A. Council Inc., and in 1997, the South Carolina Quality Forum inaugurated its first "Roger Milliken Medal of Quality" award in his name, dedicated to his contributions to the promotion of quality principles in South Carolina and the entire nation.

A strong advocate for the environment, Milliken's company was named one of only 21 "Environmental Champions" in the nation by the U.S. Environmental Protection Agency and McGraw Hill publishing.

He has received numerous awards for his contributions to business and was among the first of seven laureates elected to the South Carolina Business Hall of Fame. He received South Carolina's highest civilian honor, the Order of the Palmetto, in 1994. The Greenville Chamber of Commerce presented him with the 2006-Buck Mickel Leadership Award for his positive influence in shaping the Upstate of South Carolina. He received his bachelor's degree from Yale University. He will receive an honorary Doctor of Sciences degree.

UNIVERSITY MACE

The NC State University Mace is carried by the chief faculty marshal, a position held by the chair of the faculty. The academic mace, derived from a medieval weapon, represents the need to protect and nurture the fragile search for knowledge. The NC State University Mace has been specifically designed for this community. It was carried for the first time at the installation of Chancellor Oblinger. Each aspect of the mace represents an important characteristic of the university.

When freestanding, the mace is supported in a base of North Carolina stone representing the foundation of knowledge and the dependence of this academic community on the support of the people. At the base of the mace is a brass ring with the names of individuals who have held the position of chancellor, indicating the contribution of generations of academic leaders to the formation and maturation of NC State University.

The long lower fluted handle is the primary means by which the mace is grasped, representing the responsibility for the stewardship of knowledge. The shorter fluted, upper handle is the primary means by which direction is shown, and therefore represents the responsibility for guardianship. A block embedded with the seal of the university on four faces represents the university community and its charge to reach out in all directions. At the top of the mace is a geometric progression of layers representing the continual experimentation and testing of knowledge within the NC State academic community. At the very top of the mace is a bronze prow symbolizing the continual exploration that energizes our community.

The mace is fashioned from burl walnut recovered from a North Carolina tree felled in a storm, emphasizing the need to make wise use of resources even in difficult circumstances. The wood is a gift of the Jordan family, representing the importance of the generosity of the people of North Carolina to the university. The wood is complemented by bronze and silver fittings emphasizing the precious nature of the academic experience in society. During the course of fabrication, an error was made. After much discussion, the design team decided to make the revisions necessary to correct the error rather than refabricate the flawed component. This adjustment, difficult to identify, represents the valuable lessons learned from failure as an essential component of the university experience.

The mace was designed and fabricated by a team that included College of Design Dean Marvin J. Malecha, Chris Jordan (1975, Product Design), Jack Lancaster and Jim Dean (1983, Product Design) in the College of Design Materials Laboratory.

UNIVERSITY MEDALLION

The NC State University Medallion is worn by the chancellor for ceremonial occasions such as commencement, convocations and installations.

Similar to the University Mace, the medallion is derived from the Middle Ages, the period of the birth of the modern university. Today, universities strike medallions to commemorate special events, the contributions of exceptional individuals and to recognize individuals in positions of responsibility.

The NC State University Medallion also has been designed with symbolic gestures. The necklace has been shaped by two circles of differing focal points, representing the diverse nature of academic community. It includes pieces that combine into a whole, further signifying that many voices comprise the NC State community. The chain is joined by a small disk inscribed with the year of the founding of the university (1887) in tribute to the vision of the founders. The medallion joined to the necklace is the seal of the university, a representation of the responsibility and authority of the chancellor.

The necklace and medallion are fashioned from custom-made gold-plated brass. This choice of materials represents the pride of the university community in its accomplishments. It is a sign of the wealth of knowledge at NC State University.

The medallion and necklace were first designed by Mary Ann Scherr. It has been redesigned and reconfigured by a team that included College of Design Dean Marvin J. Malecha, Chris Jordan (1975, Product Design), Jack Lancaster and Sarah Tector.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as heart disease, diabetes, and asthma. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another reason for the increase is the increasing number of people who are employed in the public sector. The public sector is a major employer in the UK, and the number of people employed in the public sector has increased from 10.5 million in 1990 to 12.5 million in 2000. This increase has been driven by a number of factors, including the increasing demand for public services and the increasing number of people who are employed in the public sector.

There are a number of challenges facing the public sector in the UK. One of the main challenges is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as heart disease, diabetes, and asthma. This has led to an increase in the number of people who need to be treated in hospitals and other health care settings.

Another challenge is the increasing number of people who are employed in the public sector. The public sector is a major employer in the UK, and the number of people employed in the public sector has increased from 10.5 million in 1990 to 12.5 million in 2000. This increase has been driven by a number of factors, including the increasing demand for public services and the increasing number of people who are employed in the public sector.

There are a number of ways in which the public sector can meet these challenges. One way is to increase the number of people who are employed in the public sector. This can be done by recruiting more people to the public sector and by providing training and development opportunities for existing employees.

Another way is to improve the efficiency of the public sector. This can be done by reducing costs and by increasing the quality of services. This can be done by a number of ways, including by introducing new technologies and by improving the way in which services are delivered.

There are a number of other ways in which the public sector can meet these challenges. These include by increasing the number of people who are employed in the public sector, by improving the efficiency of the public sector, and by increasing the quality of services. These are all ways in which the public sector can meet the challenges of the future.
