THE AGROMECK

VOLUME 10

1912

PUBLISHED ANNUALLY BY

THE SENIOR CLASS OF THE NORTH
CAROLINA COLLEGE OF AGRICULTURE
AND MECHANIC ARTS

To

William Hand Browne, Jr., A.B.

Professor of Electrical Engineering

*The Class of 1912 respectfully Dedicates this,
the tenth volume of the Agromeck*

PROF. BROWNE

*LD3921

William Hand Browne, Jr.

William Hand Browne, Jr., son of William Hand Browne, Professor Emeritus of English of Johns Hopkins University, was born after the Civil War, in Baltimore County, Maryland. After attending public and private schools in Baltimore, he entered Johns Hopkins University. From this institution he received the A.B. degree in 1890, and the Certificate in Electrical Engineering in 1892. During the year 1892-'93, he was Electrician for the Baltimore Traction Company, and was in charge of the electrical equipment of the Baltimore and Pikesville Railway. As Electrical Engineer for Heywood, Warfield, and Company, 1893-'96, Mr. Browne was engaged in testing, remodeling, and installing light and power plants, and in constructing electric railways. In 1896 he became Instructor in Electrical Engineering in the University of Nebraska; in 1898 Assistant Professor of Electrical Engineering in the University of Illinois; and in 1902 Technical Editor of the *Electrical Review*, New York City. This position he held until 1908, when he became Professor of Electrical Engineering in the North Carolina College of Agriculture and Mechanic Arts, the position he now holds.

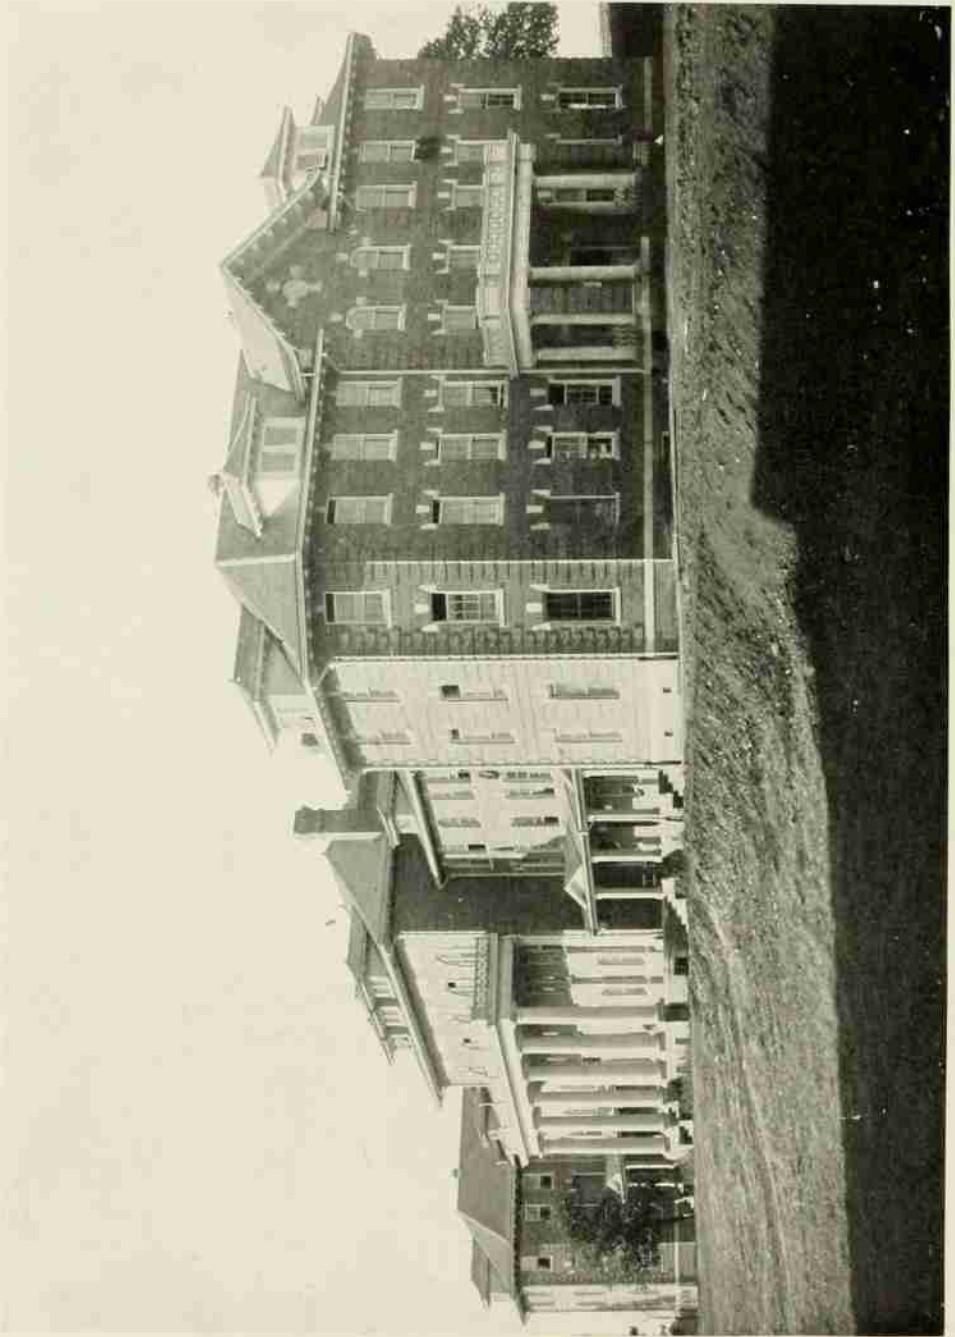

Professor Browne has contributed largely to the scientific discussion of the problems of electricity. Besides his regular articles while editor of the *Review*, comprising about four thousand words in weekly editorials, and original articles as well, he wrote for other journals. For several years he was called upon to write the annual review of electrical industry for the *New York Times*. He wrote various articles for Nelson's Encyclopedia, "The Electric Railway" being one of these. A number of articles he contributed also to the Encyclopedia Americana. Professor Browne still has occasional articles in the electrical journals.

Professor Browne is a member of the Sigma Xi (the honorary scientific fraternity), of the Tau Beta Pi (the honorary engineering fraternity), an associate member of the American Institute of Electrical Engineers—for five years he was a member of the "Edison Medal Committee" of the Institute, a charter member of the American Electro-Chemical Society, also of the Illuminating Engineers' Society—the editor of its Transactions for two years, a member of the Society for the Promotion of Engineering Education, and a contributing member of the Society for the Promotion of Industrial Education.

Professor Browne was married in the city of Chicago in 1898. His wife and four children, with himself as head, make an interesting group in the social life of the college community in West Raleigh.

IN THE BEGINNING.

OUR NEW DORMITORY

Greeting

*We greet with hearty salutations
those few who appreciate the
difficulties of producing
a College Annual*

Foreword

Fellow students and friends, the result of a laborious task is before you. It has been our one great aim to present to you a representation of the most interesting points of our college life. Therefore, if you peruse this volume with interest and pleasure, we have attained our object.

One great favor we ask and that is, judge us not too harshly for our mistakes but try and appreciate the labor of the hours we have spent.

We are exceedingly grateful to every one who has contributed in any way to the success of this volume.

Realizing that every one is somewhat inclined to criticism we now leave our work to your tender mercy.

Faculty

DANIEL HARVEY HILL, A.M., LL.D.

President

A.B., Davidson College, '80-'86; Lit.D., '05; University of North Carolina, '10; Professor of English, Georgia Military and Agricultural College, '80-'89; Professor of English, N. C. A & M, '89-'08; Vice-President, '05-'08; President, '08—

WALLACE CARL RIDDICK, A.B., C.E.

Vice-President and Professor of Civil Engineering

A.B., University of North Carolina, '85; C.E., Lehigh, '90; Engineer, Roanoke (Virginia) Water and Power Co., '90-'92; Professor of Mathematics and Civil Engineering, N. C. A & M, '92-'95; Professor Civil Engineering, '05; Vice-President, '08—

WILLIAM ALPHONSO WITHERS, A.M.

Professor of Chemistry

A.B., Davidson College, '83; A.M., '85; Postgraduate Student, Cornell, '88-'90; Fellow, '89-'90; Elected to Sigma Xi; Assistant Chemist, N. C. Experiment Station, '84-'88; Chemist, '97; Acting Director, '97-'98; State Chemist N. C., '97-'98; Professor of Chemistry, N. C. A & M, '89—; Member Executive Committee, Pure Food and Drug Congress, '98; Vice-President, American Chemical Society, '01-'02; Fellow, American Association for the Advancement of Science; President, American Association of Official Agricultural Chemists, '09-'10; Author, N. C. Pure Food Law, '99.

*FRANK LINCOLN STEVENS, M.S., PH.D.

Professor of Botany and Vegetable Pathology

B.L., Hobart, '91; B.S., Rutgers, '93; M.S., '97; Ohio State University, '94-'96; Fellow, Chicago University, '98-'99; Ph.D., '00; Traveling Fellow (Bonn, Halle, and Naples), '00-'01; Instructor on Science, Racine, '93-'94; North High School, Columbus, O., '94-'98; Sanitary Analyst, Chicago Drainage Canal, '98-'00; Instructor in Biology, N. C. A & M, '01-'02; Professor, '02-'03; Professor of Botany and Vegetable Pathology, '03—; Biologist, North Carolina Experiment Station, '03—; Author of Technical and Practical Books, Contributor to Scientific and Practical Journals, and a member of several Botanical Societies.

ROBERT E. LEE YATES, A.M.

Professor of Mathematics

A.M., Wake Forest College, '88; Adjunct-Professor of Mathematics, N. C. A & M, '91-'05; Student in Higher Mathematics, Chicago University, '05-'06; Professor of Pure Mathematics, N. C. A & M, '06—

*Resigned.

THOMAS NELSON
Professor of Textile Industry

Diploma, Cotton Manufacturing, Harris Institute, Textile School of Preston, Lancashire, England, 1910; Special Designing and Cloth Analysis Course, Lowell Textile School, 1898; Certificate, Weaving and Designing, City and Guilds of London Institute; Private Pupil in Designing and Mill Management of Mr. John Fish, Manager Queens Mill, Preston, Eng.; Experience in English, Northern and Southern Mills; Member of American Textile Association and Author of Technical Books and Textile Journal Correspondent; Instructor in Warp Preparation and Power Loom Weaving, Lowell Textile School, Mass., '00; Instructor in Weaving and Designing, N. C. A & M, '01-'06; Professor of Textile Industry, '06—

CLIFFORD LEWIS NEWMAN, M.S.
Professor of Agriculture

B.S., A. & M. of Alabama, '86; M.S., '87; Assistant Professor of Agriculture, University of Tennessee, '87-'89; Principal, Athens (Alabama) Agricultural School, '89-'91; Assistant Agriculturist, Arkansas Experiment Station, '91-'97; Professor of Agriculture, University of Arkansas, '97-'05; Professor of Agronomy, Clemson College, S. C., '05-'08; Professor of Agriculture, N. C. A & M, '00—

WILLIAM HAND BROWNE, JR., A.B.
Professor of Physics and Electrical Engineering

A.B., Johns Hopkins, '90; Practical Engineer, '90-'96; Instructor in Electrical Engineering, University of Nebraska, '96-'98; Assistant Professor of Electrical Engineering, University of Illinois, '98-'02; Technical Editor, *Electrical Review*, '02-'08; Professor of Physics and Electrical Engineering, N. C. A & M, '08—

HOWARD ERNEST SATTERFIELD, M.E.
Professor of Mechanical Engineering

B.S. in M.E., Purdue University, '04; M.E., '09; Professor of Mechanical Engineering, N. C. A & M, '08—

THOMAS PERRIN HARRISON, Ph.D.
Dean and Professor of English

B.S., South Carolina Military Academy, '86; Instructor, South Carolina Military Academy, '86-'88; Ph.D., Johns Hopkins University, '91; Associate Professor of English, Clemson College, S. C., '91-'96; Professor of English, Davidson College, N. C., '96-'08; Professor of English, N. C. A & M, '08—

GUY ALEXANDER ROBERTS, B.S., D.V.S.
Professor of Veterinary Science and Physiology

B.Agr., University of Missouri, '99; D.V.S., Kansas City Veterinary College, '03; Assistant North Carolina State Veterinarian, '03-'07; Instructor in Veterinary Science and Physiology, N. C. A & M, '03-'05; Assistant Professor, '05-'06; Associate Professor, '06-'08; Professor, '08—

IRA OBEN SCHAUB, B.S.

Professor of Agricultural Extension

B.S., N. C. A & M, '00; Postgraduate, Johns Hopkins, '00-'03; Assistant Chemist, Experiment Station University of Illinois, '03-'05; Assistant Professor of Soils, Iowa State College, '05-'09; Professor of Agricultural Extension, N. C. A & M, '10—

WILLIS GRANDY PEACE, CAPTAIN, U. S. A.

Professor of Military Science and Tactics

West Point, Class of 1901; Fort Fremont, S. C., in defense of Port Royal and Beaufort, '01-'02; Fort Screven, Ga., in defense of San Francisco, '04-'05; San Diego, Cal., at work on the Progressive Military Map of the U. S., '05-'06; with Thirteenth Field Battery, Philippine Islands, '05-'07; Fort Hamilton, N. Y., in defense of New York Harbor, '07-'10; Professor Military Science and Tactics, N. C. A & M, '10—

JOHN CHESTER MCNUTT, B.S.AGR.

Professor of Animal Husbandry and Dairying

B.S. Agr., Ohio State University, '07; Superintendent, Hartman Stock Farm, of Columbus, O., '07-'08; Assistant in Animal Husbandry, New Hampshire State College, '08-'09; Assistant Professor, '09-'10; Associate Professor, '10; Professor of Animal Husbandry and Dairying, N. C. A & M, '10—

JOSHUA PLUMMER PILLSBURY, B.S.

Associate Professor of Horticulture

Missouri Botanical Garden, '91-'95; Certificate, Pennsylvania State College, '06-'10, B.S.; Connected with Pennsylvania State College, '95-'11, N. C. A & M, '11—

MELVIN ERNEST SHERWIN, B.S.A., M.S.

Associate Professor of Soils

B.S.A., University of Missouri, '08; M.S., University of California, '09; University of Missouri, '06-'08; Assistant in Agronomy, University of California, '08-'09; Assistant in Agronomy, University of Maine, '09-'10; Associate Professor of Soils, N. C. A & M, '10—

Assistants and Instructors

BARTHOLOMEW MOORE PARKER, B.S.

Assistant Professor of Textile Industry

B.S., N. C. A & M, '98; Student in Lowell Textile School, Mass., '98-'01; Assistant in Clemson College, S. C., '01-'03; Instructor in Textile School, N. C. A & M, '03-'05; Assistant Professor of Textile Industry, '05—

CARROLL LAMB MANN, B.S., C.E.

Assistant Professor of Civil Engineering

B.S., N. C. A & M, '99; C.E., '06; Isthmian Canal Commission, Nicaragua, '99-'01; Civil Engineer, Seaboard Air Line Railroad, '01-'02; Instructor in Civil Engineering, N. C. A & M, '02-'08; Assistant Professor, '08—

GEORGE SUMMEY, JR., Ph.D.

Assistant Professor of English

A.B., Southwestern Presbyterian University, '97; Ph.D., '01; Student, University of Leipzig, '01-'02; Instructor in English, N. C. A & M, '03-'09; Assistant Professor, '09—

LILLIAN LEE VAUGHAN, M.E.

Instructor in Mechanical Engineering

B.E., N. C. A & M, '06; M.E., N. C. A & M, '09; M.E., Columbia University, '11—

WELDON THOMPSON ELLIS, B.E., M.E.

Assistant Professor of Machine Design and Steam Laboratory

B.E., N. C. A & M, '06; M.E., '08; Assistant Professor of Machine Design and Steam Laboratory, N. C. A & M, '08—

LEON FRANK WILLIAMS, A.B., A.M., Ph.D.

Assistant Professor of Chemistry

A.B., Trinity, '01; A.M., '02; Ph.D., Johns Hopkins, '07; Assistant Professor of Chemistry, N. C. A & M, '07—

HENRY K. McINTYRE, E.E.

Assistant Professor of Physics and Electrical Engineering

E.E., Columbia University, '99; with the Sprague Electric Co., '99-'00; New York Telephone Co., '00-'07; Grey Electric Co., '07-'08; Special Work in Electrical Engineering, '07-'08; Assistant Professor of Physics and Electrical Engineering, N. C. A & M, '09—

CHARLES BENJAMIN PARK

Instructor in Machine Shops and Assistant in the Power Plant

Graduate, Raleigh Male Academy, '82; Machinist for Seaboard Air Line Railroad, '82-'89; Instructor in Machine Shops and Assistant in the Power House, N. C. A & M, '90—

JOHN STRAUCHON JEFFREY

Instructor in Poultry Husbandry

Graduate, Ontario Agricultural College, Canada, '86; Dairy Farmer, Toronto, Canada, '86-'88; Wholesale Hardware Manufacturer, '88-'01; Fruit Growing and Poultry Farming, '01-'03; Poultryman, North Carolina Experiment Station, '03; Instructor in Poultry Husbandry, N. C. A & M, '06—

ABRAHAM RUDY, A.M., PH.D.

Instructor in Modern Languages

A.B., Polytechnic University, Riga, Germany, in Modern Languages, '85; A.M., University of New York, '02; Ph.D., '04; Public School Teacher with Certificates in Iowa, Nebraska, and New York, '85-'02; in Philippine Islands, '04-'07; Instructor in Modern Languages, N. C. A & M, '07—

WILEY THEODORE CLAY, B.E.

Instructor in Woodwork and Pattern Making

B.E., N. C. A & M, '06; M.E., '09; Instructor in Woodwork and Pattern Making, '05—

W. P. ANGEL, B.A.

Instructor in Mathematics

B.A., University of Tennessee, '03; M.A., '06.

JOHN EDWARD HALSTEAD, B.S.

Instructor in Dyeing

B.S., Leeds University, England, '95; Chemist large carpet factory, Yorkshire, Eng., '96-'98; in charge of Chemistry and Dyeing Department, Leicester Technical College, Eng., '98-'99; Assistant Dyer in large dyeworks of Yorkshire, '00-'01; Assistant Manager of Cotton Pierce Dyeworks, Yorkshire, '01-'07; in charge of Dyeing Department, N. C. A & M, '08—

WILLIAM FRANKLIN PATE, B.S.

Instructor in Chemistry

B.S., N. C. A & M, '01; Assistant Chemist, University of Illinois, '01-'06; Assistant Chemist, Ohio Agricultural Experiment Station, '06-'11; Instructor in Chemistry, N. C. A & M, '11—

HERBERT NATHANIEL STEED

Instructor in Weaving and Designing

Special Textile Student, N. C. A & M, '03-'05; Assistant Instructor in Carding and Spinning, '05-'06; Instructor in Weaving and Designing, '06—

ROBERT PEACHEY LATANE, B.S.

Instructor in Physics

B.S., Virginia Polytechnic Institute, '05; Instructor in Physics and Mathematics, Miller School, Va., '05-'07, '08-'09; Instructor, West Maryland College, '07-'08; Instructor in Physics, N. C. A & M, '09—

HAL H. COBURN, M.E.

Instructor in Drawing

M.E., Massachusetts Institute of Technology, '09.

FRED BARNETT WHEELER

Instructor in Forge

Student, N. C. A & M, '06-'11; Instructor in Forge, '07—

WILLIAM FLAUD MORRIS, B.E.

Instructor in Shopwork and Drawing

B.E., N. C. A & M, '09; Instructor, '09—

BURTON JUSTICE RAY, A.B., Ph.D.

Instructor in Chemistry

A.B., Wake Forest College, '04; Ph.D., Cornell University, '09; Assistant Chemist, North Carolina Experiment Station, '09; Instructor in Chemistry, N. C. A & M, '09—

JOHN WILLIAM HARRELSON, B.E.

Instructor in Mathematics

B.E., N. C. A & M, '09; Instructor in Mathematics, '09—

VIRGIL CLAYTON PRITCHETT, M.S.

Instructor in Physics

Ph.B., Elon College, '07; Harvard Summer School, '07; Instructor in Physics, Elon College, '08-'09; M.S., University of North Carolina, '10; Instructor in Physics, N. C. A & M, '10—

WARREN CARY NORTON, Ph.B.

Instructor in Botany and Bacteriology

Ph.B., Brown University, '10; Instructor in Botany and Bacteriology, N. C. A & M, '10—

EDSON DANA SANBORN, B.S.

Instructor in Dairying and Animal Husbandry

B.S., New Hampshire College, '10.

RUBLE ISAAC POOLE, B.E., C.E.

Instructor in Civil Engineering

B.E., N. C. A & M, '08; C.E., Cornell University, '10; Instructor in Civil Engineering, N. C. A & M, '10—

BENNETTE THOMAS SIMMS, D.V.M.

Assistant in Anatomy and Physiology

D.V.M., Alabama Polytechnic Institute, '11.

HARRY TUCKER

Instructor in Mathematics and Civil Engineering

B.A., B.S., Washington and Lee, '10; Assistant in Physical Culture, '09-'10; Instructor in Mathematics and Civil Engineering, N. C. A & M, '10—

FRANKLIN JACOB CRIDER, B.S., M.S.

Assistant in Horticulture

B.S., Clemson College, S. C., '08; Assistant in Horticulture, Clemson, '08-'09; M.S., University of Minnesota, '10; Instructor in Horticulture, N. C. A & M, '10—

HARRY HOUSTON PECKHAM, A.B.

Instructor in English

A.B., Hiram College, Ohio, '06; Graduate Student, University of Chicago, '08-'10; Instructor in English, N. C. A & M, '10—

T. H. TAYLOR

Assistant in Poultry Husbandry

Graduate, R. I. College Poultry School, '00; Instructor in charge of the Experiment Work, '00-'02; Briarcliff Farms, N. Y., '02-'04; Monmouth Poultry Farms, Freneau, N. J., '04-'06; Poultry Department Pinehurst Farms, N. C., '06-'11; Assistant in Poultry Husbandry, N. C. A & M, '11—

FRANCIS WEBBER SHERWOOD, M.S.

Instructor in Chemistry

B.S., N. C. A & M, '09; M.S., N. C. A & M, '11.

L. F. KOONCE, B.S., D.V.S.

Demonstrator in Anatomy, Physiology, and Clinics

DUANE B. ROSENKRANS, A.B.

Instructor in Botany

A.B., Upper Iowa University.

Alma Mater A. & M.

(By A. E. Escott, '06.)

We are the men of the A. & M.
But they are not all here.
Sun-kissed Carolina.

We sing a song of cheer.
Tar Heel State's a great old State.
She rambles far and wide,
From the Blue Ridge in the sky
To broad Atlantic's side.

On the hill we've paced our beat,
With gait and tired feet;
But on warpath marching,
Oh on onto, foes vanquish.
Then with scenes of college days
The recollection comes,
And we'll sing of Alma Mater
In our gladsome dreams.

North Carolina A. & M. College,
Sons in many climes,
True to thee and loyal
In peace and in stirring times.
Hail the flag of Red and White
For a college strong and true,
Alma Mater, Heaven's blessings
Always follow thee.

Senior Class

The Senior Girl

Senior Class Poem

Oh, the good ship 1912 was launched
In warm September, 1908.
'Twas fitted, captained, giv'n a crew,
And sent forth ripe for any fate.
'Twas guided through the Freshman Stream,
Past shoals where threatening dangers lurked
Of Math, Inspections, Conduct Book—
Each claimed some member who had shirked.

The Soph'more Rapids next it shot,
'Twas easier riding than before;
But too-swelled heads and hours late
And Math again claimed near a score.
The Junior Sea it then sailed o'er,
Its voyage more than halfway done,
But sad to say, not more than half
Remained, who with it had begun.

The Senior Ocean now it sails,
Commencement Harbor, clear to sight,
Brings joy to sixty anxious hearts,
The sixty who have fought the fight.
The Harbor's gained, the ship is docked,
Each man now claims his just reward,
And starts to carve out for himself
The name he set his soul toward.

For four long years this gallant crew,
By joys and sorrows closely knit,
Have toiled and played and sweet ties formed,
Which strengthen as the long years flit.
But now they part to meet no more
On this same close, endearing plane;
For them all crew work now is done—
Each sails alone life's boundless main.

But may the memory never fade,
In whate'er climes they dig or delve,
Of their comrades and the good old times
When they sailed in the good ship 1912.

POET.

Senior Class History

THE Class of 1912 came to A & M in an attitude of expectancy, but with a definite purpose and an unflinching will power. The classes before us had all suffered at the hands of the Sophomores, and especially bad were the newspaper reports of hazing during the year preceding ours at college. In spite of all these dreadful reports there were ninety-nine of us who had heard enough about the true A & M spirit to have determined to get the kind of training offered here and to enter the college in the Fall of 1908. It is due to the fact that the class was made up of fellows who were ready to brave difficulties and who possessed tenacity of purpose to an unusual degree that has brought sixty out of ninety-nine through the Senior year.

Instead of finding a bunch of ruffians, as the newspaper reports would have led one to expect, we found a lot of clean, clever boys, who believed in the existence of a Freshman Class, but who also believed that the individual of that class must keep his place as a Freshman. And by constantly reminding us of this, a majority of us must have kept our places fairly well; for it was this year that hazing was first, and forever, it is hoped, "cut out" at A & M. Too much credit can not be given to the Class of 1911 for their courage in doing away with hazing; neither should the Class of 1912 be forgotten, for by our keeping our place as Freshmen and offering our hearty support in the three years that lay before us at A & M, we have done much to clinch the work of last year's class.

Although modesty would forbid our claiming it for ourselves, our teachers give us credit for being above the average in intelligence, and a glance at the honor men for the last three years will show that a great many of the class have applied themselves. There are only five men in the class who have made the honor roll for the four years at college. These are J. G. Kellogg, T. F. Gibson, H. L. Taylor, McN. Dubose, and J. E. McGee. But nearly a fourth have made the honor roll for the last three years, and from one-fourth to one-half for the last two years.

Our class football and baseball teams have not made any startling records, owing to the fact that we have furnished so much material for the 'Varsity teams. We won the championship in baseball in our Freshman year, and though this year was the only time that we were victorious over the other teams, there have never been any odds against us.

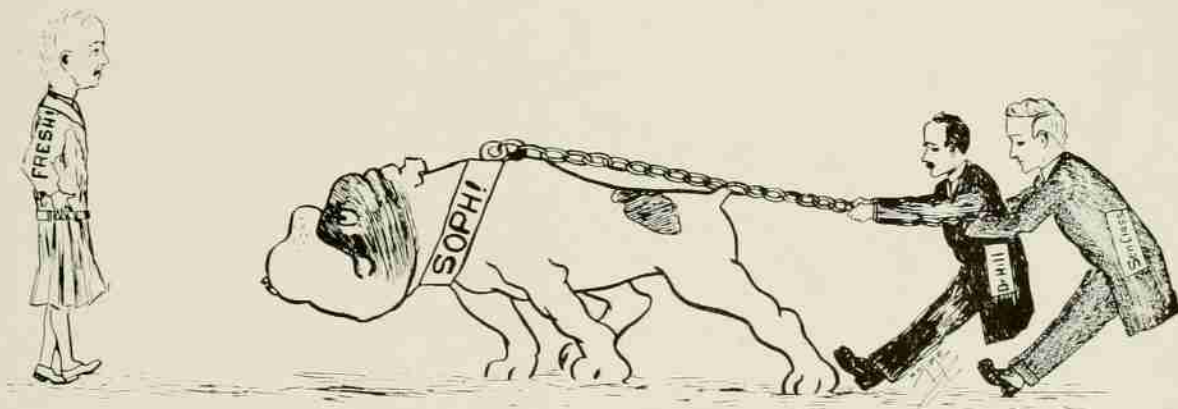

During our entire four years' stay at A & M we have been represented on the 'Varsity football team by Seifert and Hartsell. In the Sophomore year Stafford completed the mighty trio which has shown its strength for the past three years. Two other men who have made good this year are Fetzer and Hargrove. In baseball we gave Hartsell, Bost, Seifert, and Stafford in our Freshman year, and the next year Speer was added. For the last two years we have furnished Stafford, Speer, Seifert, and Hartsell. Bost did not return after his Sophomore year. To these men, in both baseball and football, many victories are to be credited, they being easily the stars of their teams.

Through the influence of some of the leaders of the Class of 1912 there was introduced and put into effect at A & M something that will mean more to the college than anything else that is within the power of any student body to control; something essential to every college of good standing; and it is something that is in vogue in one form or in another in nearly every college of first rank in the United States. This is the Honor System. It was introduced by some of the members of the Class of 1912 near the end of the Junior year; was voted on by the student body, and was carried unanimously. Since that time A & M has been under the rules of the Honor System; and here it has met with marvelous success. It is hoped by every one that all classes that come after us will give it their undivided support. By doing so they help themselves, as well as their college and their State.

Our President during our Freshman year was Wakefield, who, however, did not return to college after the first term of that year. The next year Hartsell was elected President. The Junior year was reigned over by Seifert, while for the Senior year we selected Speer.

Now the time approaches when we must bid farewell to dear old A & M and to the closest friendships that can ever be formed in life. Some of us may never meet again; but I dare say that with the affectionate feeling found in the Class of 1912, the face of each individual will forever be fresh in the memories of us all, and may we always be ready to speak a good word for our classmates. In this let there be a continuation of our class motto, "Aim high, but reach higher."

R. M. HARDISON,
Class Historian.

Seniors

NEILY ORMON ALEXANDER, Mathews, N. C.

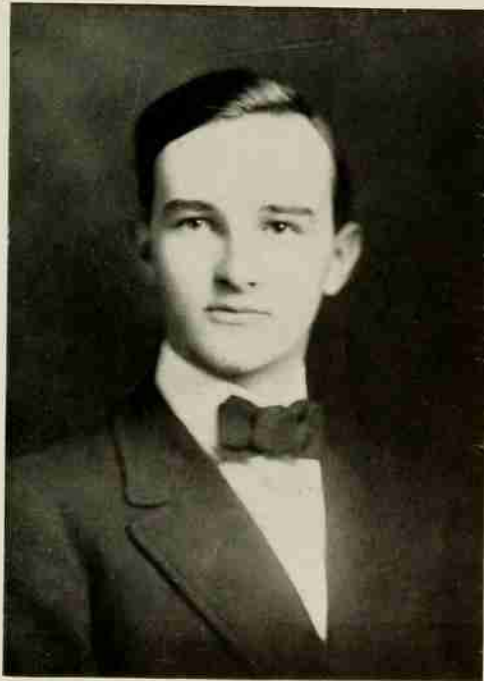

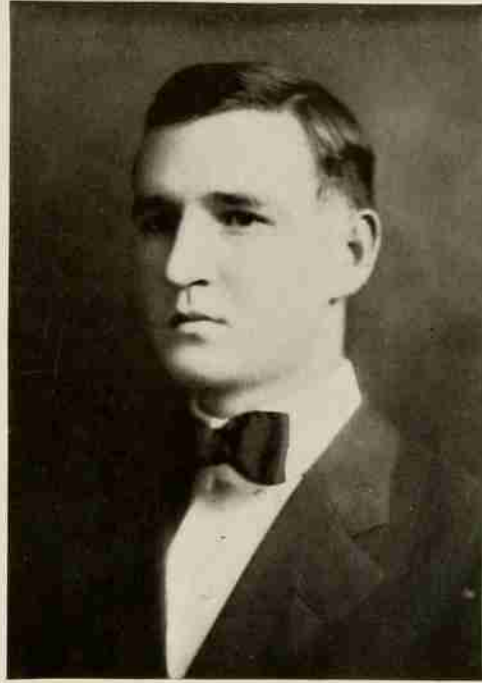

Agriculture

Silence is my god.

Age 22. Height 6 ft. 1½ in. Weight 170.

Leazar Literary Society; Y. M. C. A.; Biological Club; Rural Science Club; Vice-President Rural Science Club '11; President Rural Science Club '12; Bi-Ag Society; Hornet Club; Division Inspector '11-'12; Country Gentlemen; Eta Beta Pie.

"Alec" is known only by a few of his brothers of the agricultural science. A solemn silence does he keep. But perhaps he is in some deep study of theories with which he will some day astound the agricultural world.

ALLISON HODGES BOND, Fayetteville, N. C.

Mechanical Engineering

It is better to have loved and lost,
Than never to have loved at all.

Age 19. Height 5 ft. 10 in. Weight 153.

Corporal '09-'10; Sergeant '10-'11; Y. M. C. A. '09-'12; Leazar Literary Society '09-'12; Censor; '12; Mechanical Society '10-'12; Eta Beta Pie. Honor Roll '10; Division Inspector '11-'12.

"A. H."—Everybody admits that he is the most handsome fellow in the Class. On Mondays and second Saturdays you are sure to find him at Meredith College. He lost out in the Majorship of the Battalion, but Professor Park thinks he will awaken the minds of the Mechanical Engineers some day, if he does not allow his inclination for the fair sex to detract him from his line of business.

ALLAN THURMAN BOWLER, K. A.
Sanford, Fla.

Civil Engineering

He is never alone whose hourly companions
are noble thoughts.

Age 23. Height 5 ft. 9 in. Weight 140.

Manager Varsity Football Team '11; Assistant Manager Varsity Football Team '10; Manager Sophomore-Class Football Team '09; Commencement Marshal '11; Leazar Literary Society; Freshman Class Baseball Team '08; Thalarian German Club; Student Dining Room Committee '11, Chairman '12; President Florida Club '09-'10; Vice-President Florida Club '10-'11; Athletic Editor *Wax Goss Roc* '11-'12; Secretary Athletic Council '11-'12; Secretary Governing Board Thalarian German Club '11-'12; Senior Civil Engineering Society; Eta Beta Pie.

"Dixie" has always been admired as a gentleman by all with whom he comes in contact. Just naturally conceded to be a "good egg." Takes great interest in every phase of college life and his opinion on any question is deserving of credit. Being a good talker and also very politic, he has made a big name in college as manager of the football team.

CLAYTON EDWARD BROWN, Σ N,
Chocowinity, N. C.

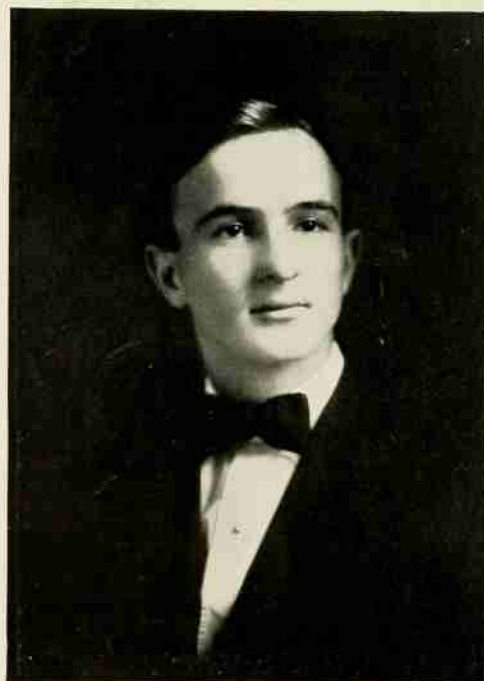

Civil Engineering

A man not afraid to say his say,
Though the majority be against him.

Age 21. Height 5 ft. 5½ in. Weight 120.

Class Secretary and Treasurer '09-'10; Honor Roll '09-'10, and '10-'11; Sergeant Co. B '10-'11; First Lieutenant Co. A '11-'12; President Wabean Club '11-'12; President Senior Civil Engineering Society; Editor in Chief *AGROMECK*; Battalion Cotillion Club; "Owls."

"Brownie"—Here is a man diminutive in stature though broad in mind. He is kind hearted and generous. You would take him for a kid, for you can not conceive of the amount of knowledge he carries in his head. He is the most successful Editor in Chief the *AGROMECK* has ever had, and his work and toil will show for themselves in this volume. He has been one of the best students in the Civil class, and he is sure of success it matters not what he undertakes. He hails from Chocowinity, but, somewhat like his friend "Bob," he has allowed his heart to drift away from his home to the Gate City.

STEPHEN COLE BRUNER, Raleigh, N. C.

Agriculture

I worship at the Shrine of Nature.

Age 20. Height 5 ft. 10 in. Weight 138.

Eta Beta Pie; Biological Club '11-'12; Country Gentlemen '11-'12; Art Editor *AGROMERCK* '11-'12; Track '10-'11.

"Steven" is somewhat of an Entomologist and is too deeply interested in his studies to while away his time on the Campus. He is quite a musician and as a cornetist he has contributed greatly to our excellent Band. He also possesses the artistic touch. To him we owe some of the most artistic illustrations of this Annual.

BRICE LEGRIER CALDWELL, Concord, N. C.

Chemistry

I pray that I might sometimes be
Great in the world of Chemistry.

Age 22. Height 5 ft. 7 in. Weight 155.

Pullen Literary Society; Corporal '09-'10; Sergeant '10-'11; Class Football Team '09-'10; '10-'11; Assistant Manager Football Team '10-'11; Assistant Manager Track Team '10-'11; Manager Track Team '11-'12; Eta Beta Pie.

"Cap" hails from the town of Concord. He entered College with the Class of 1911 but dropped for a while that he might graduate with us. He always takes great interest in athletics and as Manager of the Track Team has done much to encourage that branch of sport in College.

CHARLIE LEE CRUSE, Salisbury, N. C.

Agriculture

Every man should aim to know more than he does, but should not make the error of believing that he knows.

Age 24. Height 5 ft. 11 in. Weight 144.

Honors in Scholarship '11-'12; Second Lieutenant Co. E '10-'11; Sergeant Co. D '09-'10; President Rural Science Club '11; Sophomore-Freshman Debate '08; won Prize; President Rowan County Club; Y. M. C. A. Cabinet '10-'11; Senior Inter-Society Debate '12; Orator Inter-Society Contest '11; Secretary and Treasurer "Vet" Club; Secretary Biological Club '09; Stock Judging Contest '10; won Medal; Critic Leazar Literary Society '11; Eta Beta Pi; Division Inspector '11-'12; Country Gentlemen '11-'12; President Inter-Society Sophomore Debate '12; Tennis Club '10-'11.

"General Greene" entered College with '10 Class, but dropped that he might finish with us. Takes great interest in all agricultural activities. Has done much for the societies of Agricultural Department and Y. M. C. A.

RALPH CAMPBELL DEAL, Spencer, N. C.

Electrical Engineering

An electrical genius.

Age 22. Height 6 ft. 1 in. Weight 156.

Corporal Co. B '09-'10; First Sergeant Co. A '10-'11; First Lieutenant Co. E '11-'12.

"R. C." is the College electrician, and is certainly the man for the job. Why, he is a second Edison. No doubt he will some day even surpass that gentleman in genius. Don't think, for a minute, that Electricity is his only strong point, for he is some heavy weight with the fair sex.

ERNEST COFIELD DERBY, Rocky Mount, N. C.

Civil Engineering

He believes whatever idle rumors he may hear.

Age 21. Height 5 ft. 6½ in. Weight 144.

Private Co. C '08-'09; Private Co. B '09-'10; Private Co. E '10-'11; Freshman Football Team '08-'09; Sophomore Football Team '09-'10; Junior Football Team '08-'11; Freshman Baseball Team '08-'09; Sophomore Baseball Team '09-'10; Junior Baseball Team '10-'11; Captain Junior Football Team; Scrub Football Team '09-'10; Eta Beta Pie '11-'12.

"Derby" has done a great deal for our football teams. For three years he has been on the strong scrub teams which offer so much training for the Varsity teams. His agencies for various firms has won for him the name E. C. Derby, Agent. With the ladies he is a star—but they all get married. He is a hard worker and no doubt will come out all right in life.

MCNEELY DUBOSE, K Σ, Morganton, N. C.

Electrical Engineering

A more excellent student would be hard to find.

Age 20. Height 6 ft. Weight 155.

Sergeant Band '10-'11; Lieutenant Band '11-'12; "Q. T. C."; Electrical Engineering Society; Honor Roll '09-'10; '10-'11; '11-'12.

"Mac"—The Faculty thought he was too smart to while away his time, so as pastime he now instructs the more ignorant ones in the theory of Electricity. Mac is great on experimenting. He has tried everything from air ships down. We expect some day to hear of some great invention by this worthy classmate of ours.

NEVIN GOULD FETZER, K Σ , Concord, N. C.

Chemistry

It is not my face but my figure.

Age 20. Height 5 ft. 11 in. Weight 175.

Scrub Football Team '10-'11; Varsity Football Team '11-'12; Honor Roll '10-'11; Saints; Eta Beta Pie; Y. M. C. A.

"Nick," desirous of making a name in the football world, came into our midst in our Junior year and he has held down his part of the game in the old A & M style. But by no means has athletics been his sole purpose in coming here, for he has made especially good in his studies. Everybody likes "Nick." His qualities assure him success in after life.

THOMAS FENNER GIBSON,
Red Springs, N. C.

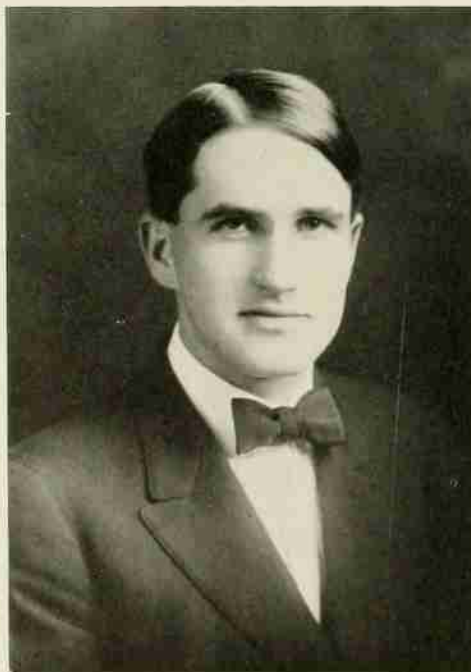

Civil Engineering

You can not be happy unless you have something to do.

Age 20. Height 5 ft. 11 in. Weight 145.

Chairman Honor Committee; Honor Graduate; Eta Beta Pie; Senior Civil Engineering Society.

"Doc" is a hard worker and has made good in all his work. He entered College a year later than the Class but he has finished well the four years of work. As Chairman of the Honor Committee he has done much to establish it here at A & M. His inclination in the Civil Department is towards Architecture.

RICHARD FREDERICK GIERSCH, JR.,
Raleigh, N. C.

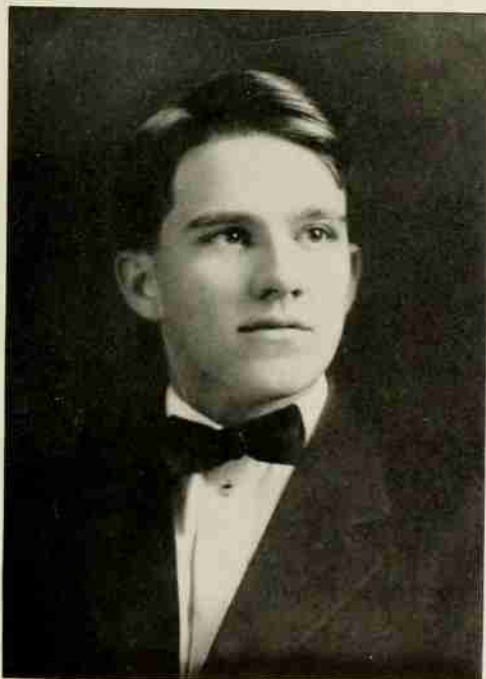

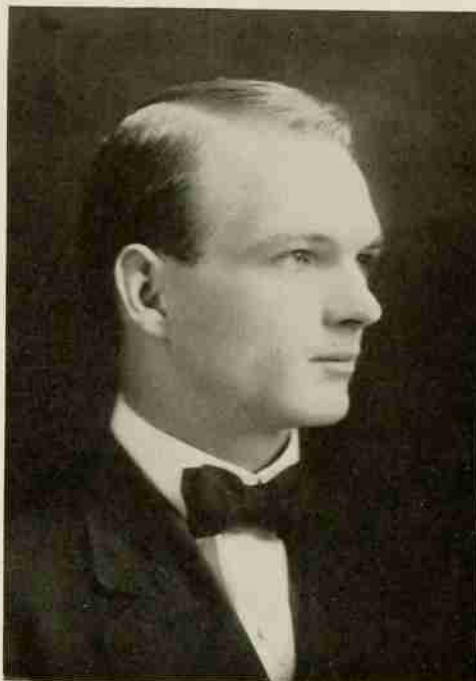

Electrical Engineering

I have taken my fun where I have found it,
I have rogued and ranged in my time.

Age 21. Height 5 ft. 10 in. Weight 157.

Honors '10-'11; First Lieutenant Band '11-'12;
Sergeant '10-'11; Electrical Society; "Q. T. C."

"Dick" is the son of the proprietor of the well known Giersch Hotel. Perhaps that accounts for his great strength. Why! with his powerful grip, he can mash a billiard ball to sawdust. Dick has an inventive turn of mind. No doubt he and DuBose will go into the aeroplane business when he leaves College.

WILLIAM HAYWOOD GRAHAM, JR.,
Rowland, N. C.

Electrical Engineering

Behold an angel without wings.

Age 20. Height 5 ft. 7½ in. Weight 150.

President Y. M. C. A. '11-'12; Assistant Editor in Chief AGROMECK '11-'12; Secretary A & M College Branch American Institute of Electrical Engineers '11-'12; Secretary Athletic Association '12; Critic Leazar Literary Society '12; Recording Secretary Y. M. C. A. '10-'11; First Lieutenant Co. D '11-'12; Vice-President Leazar Literary Society Spring '11; Treasurer Leazar Literary Society Fall '10; President Robeson County Club '10-'11; Sergeant Co. E '10-'11; Captain Class Football Team '10-'11; Commencement Marshal '10; Honors in Scholarship '09-'10; Delegate Southern Student Conference Y. M. C. A. '11; Delegate Bible Study Institute at Wake Forest Fall '11; Secretary Leazar Literary Society '09-'10; Class Baseball Team '08-'11.

"Woody"—And here we have the little President of the Y. M. C. A. He shines with the ladies and at Y. M. C. A. meetings. But we can not say that he stops at this, for he is sometimes referred to as the "Fungsten" of his division. Woody is an all round good fellow and we expect to hear of him later.

ROBERT MCKENZIE HARDISON, Morven, N. C.

Civil Engineering

Large is his bounty and his soul sincere.

Age 22. Height 5 ft. 10 $\frac{1}{2}$ in. Weight 160.

Sergeant '10-'11; Captain Co. E; Punctuality Roll '08-'09; '10-'11; Honor Roll '09-'10; '10-'11; '11-'12; Grounds Committee '11-'12; Class Historian '11-'12; Associate Editor *Academick* '11-'12; Vice-President Senior Civil Engineering Society '11-'12; Battalion Cotillion Club; Owl.

"Bob" has been quiet through all his College life. He tends strictly to business and is a hard worker. In our Soph year Bob's thoughts turned towards Agriculture, but soon he found that he preferred "Math" to "Bugs" and Botany. A Tarheel throughout, except his heart, and that lies in the Palmetto State.

NATHAN DAVID HARGROVE, Richmond, Va.

Agriculture

A man with an open heart.

Age 23. Height 5 ft. 10 in. Weight 193.

Varsity Football Team '11; Varsity Basketball Team '12; German Club; Eta Beta Pie.

"Piggie" came to us from V. P. I. Although he has been here only this year, Piggie has won a great number of friends by his exceedingly charming personality. A good student and a good athlete. An Irishman through and through.

HARRY HARTSELL, K. A., Asheville, N. C.

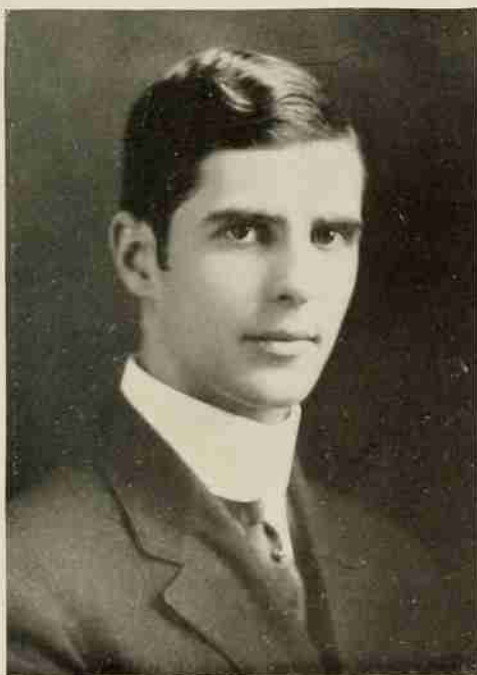

Electrical Engineering

Swift as Mercury.

Age 21. Height 5 ft. 11 in. Weight 165.

German Club '09-'12; Vice-President German Club '11; Commencement Marshal '09; St. Mary's Choir; Student Branch of the American Institute of Electrical Engineers; Vice-President Freshman Class '08-'09; President Sophomore Class '09-'10; Coach Class Football and Baseball Teams '08-'10; Varsity Basketball Team '08; Varsity Football Team '08-'11; Varsity Baseball Team '09-'12; Captain Varsity Football Team '10; Varsity Track Team '09; Eta Beta Pie.

"Fuz"—Here is one of the best all round athletes A & M has ever had to participate in her athletics. This is, however, not his sole purpose in College, for he has always been up with his work and made very creditable grades. He is one of the most popular boys in College. Has overworked himself in athletics but retains his fleetness of foot. His sidestepping in football is a terror to his opponents. His great delight is picking on "Kid" and "Brownie," and he charges them a "jit" if they wink their eyes.

WILLIS ASKEW HOLDING, II K. A. T. N. E.
Raleigh, N. C.

Chemistry

Though modest, on his unembarrass'd
brow Nature had written—gentleman.

Age 21. Height 6 ft. Weight 161.

Senior Private; Eta Beta Pie; Class Football Team '08-'11; German Club '08-'12; Saints.

"Willis"—Here is one of those rare geniuses who can keep up a gay social life without neglecting his studies. He always has a good time and yet is well up in his class. Is popular and deserves to be. Thinks College whistles are an unnecessary nuisance. Is quiet and makes no display, yet gets there.

SAMUEL BENJAMIN HOWARD,
Morganton, N. C.

Mechanical Engineering

An honest man's the noblest work of God.

Age 20. Height 5 ft. 11 in. Weight 165.

Y. M. C. A.: First Lieutenant and Adjutant '12; Second Lieutenant Co. F '11; Sergeant Co. C '10-'11; Corporal Co. D '09-'10; President Mechanical Society '11; Division Inspector '11-'12.

"Ben"—He is quiet and unassuming and yet is well known throughout the College. All the boys like him for he is always cheerful. Makes a good looking Adjutant, albeit without ostentation. Has a marked predilection for "going back to Dixie," and has an inexhaustible supply of old time ditties.

RALPH WILKINSON HOWELL,
Belhaven, N. C.

Agriculture

I am my own ideal.

Age 19. Height 6 ft. 1 in. Weight 148.

Second Lieutenant Co. A '11-'12; Sergeant '10-'11; Corporal '09-'10; Bi-Ar Society; Allons; President Wabean Club '10-'11; Vice-President '11-'12; Thalarian German Club; Biological Club; Battalion Cotillion Club; Country Gentlemen.

"Ralph" is a regular student at Meredith second Saturdays and every Monday. It would be impossible for "Stead" to keep straight if "Ralph" was not here to watch him. Where you find "Stead," there you will find "Ralph." He is an apt student and a shining light in society. Always at hand when a social stunt is to be pulled off.

JOHN GORDON KELLOGG, Sunbury, N. C.

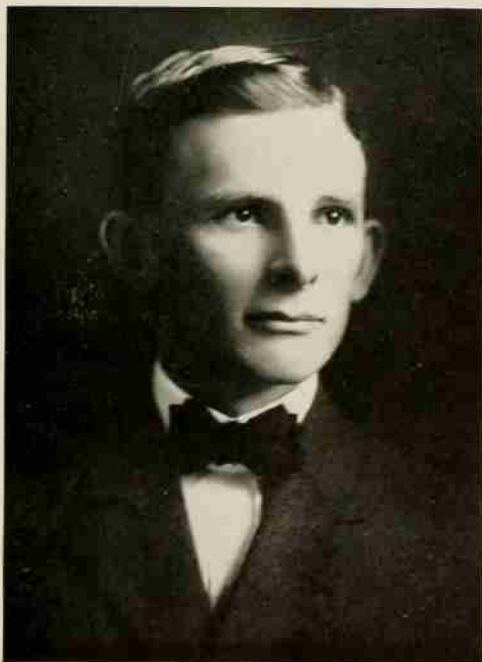

Agriculture

His face speaks for the man within.

Age 22. Height 5 ft. 11 in. Weight 165.

Corporal Co. D '09-'10; Sergeant Co. D '10-'11; Second Lieutenant Co. E; Honors in Scholarship '08-'09, '09-'10, '10-'11; Winner of Non-commissioned Officers Medal Co. D '09-'10; Member "Owls."

"J. G."—A singular character and a strong personality. He takes his fun along with work, but never forgets his work. His studies are his main objects in College. The other features of College life do not appeal to him. The fact that he is an Honor Graduate speaks for his ability as a student.

SAM JONES KIRBY, A Z. Selma, N. C.

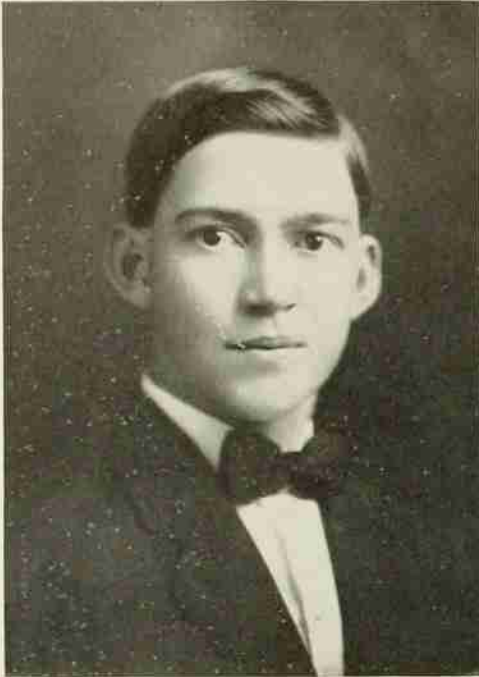

Agriculture

If you want to please him, start an argument.

Age 24. Height 5 ft. 11 in. Weight 160.

Secretary Biological Club '11; Censor Leazar Literary Society '11; Comic Editor *Red and White* '11-'12; Y. M. C. A. Cabinet '11-'12; President Biological Club '11; Manager Senior Basketball Team; Country Gentlemen; Eta Beta Pie.

"Sam Jones"—The College politician. Prefers an argument, any day, to a good meal. It is doubtful whether "Sam" will follow agriculture work or not. More than likely, he will run "William Jennings" off the job as boss politician of the Democratic Party.

CARL JOSHUA LAMBETH, Thomasville, N. C.

Mechanical Engineering

A merry heart goes all the day.

Age 22. Height 5 ft. 8½ in. Weight 145.

Sergeant Co. A '10-'11; Mechanical Society '10-'11; Vice-President Leazar Literary Society '10-'12; Class Baseball Team '10-'11; Class Football Team '09-'10; Randolph County Club; Eta Beta Pie; Punctuality Roll '11.

"Red"—His laughter can be heard almost any time of day. Get's all the good out of life that he can and doesn't bother about the rest. Has been one of those who journey weekly to the environs of the city for quite a while. Loves to have it out with "Fesser" Park as to the respective colors of their hair.

CURTIS WILLIAMS LEE, Monroe, N. C.

Mechanical Engineering

Thou still unravished bride of quietness
Thou foster child of silence and slow time.

Age 20. Height 6 ft. Weight 160.

Y. M. C. A.; Leazar Literary Society; Mechanical Society; Aero Club; Punctuality Roll '08-'09; Secretary and Treasurer Mechanical Society '10-'11; Secretary and Treasurer Senior Class; President Union County Club; Corporal Co. C '09-'10; Sergeant Co. C '10-'11; Captain Co. E '11-'12.

"Curt" is our representative of Union County, and we hope the county is as good as its representative. Except for his duty of keeping his roommate, Rip Shull, awake with the clarinet, he can not be accused of lack of appreciation. Possessing the good nature that he does, he has won the heart of Co. F, of which he is Captain, and with this same personality he will win the hand of some "Fair One."

THOMAS PINKNEY LOVELACE, Σ N,
Henrietta, N. C.

Electrical Engineering

A lover and a hugger of the ladies.

Age 24. Height 5 ft. 11 in. Weight 165.

Sergeant '10-'11; German Club '11-'12; Vice-President German Club '12; Associate Member American Institute Electrical Engineers; Eta Beta Pie; Student Buildings and Grounds Committee '11-'12; Q. T. Club.

"Pink" came to us from Wake Forest, in our Sophomore year. Could have graduated last year but did not feel disposed to push himself. Never known to injure himself by overstudy. When not on class, he is generally to be found in town. Never hunts trouble and never troubles work.

JAMES EDWARD MCGEE, Mt. Olive, N. C.

Textile

If ever such lived in this land,
Here he is—a true and noble man.

Age 22. Height 5 ft. 10½ in. Weight 143.

Secretary and Treasurer of Textile Society; Corporal Band '09-'10; First Sergeant Band '10-'11; Captain Band '11-'12; Vice-President Textile Society; President Textile Society; Manager "'1912" Baseball Team; Honor Roll in Freshman, Sophomore, and Junior years; Member "Owls"; Associate Editor *AGROXREK*.

"Maggie" has music in his very soul. Can play most any instrument in the Band and has the voice of a mocking bird. Never seeks honors but honors seek him. "Maggie" makes a success of anything he undertakes. He is quite a business man as well as a grand student. It is a sure thing that he will make a great success in the world unless he marries too soon.

WALTER R. MANN, Cleveland, Ohio

Horticulture

He that throws bouquets at himself should afford to pay the florist's bill.

Age 23. Height 5 ft. 10 in. Weight 159.

Won Private's Medal Co. C '09-'10; Sergeant Co. E '10-'11; First Lieutenant Co. B '11-'12; Pullen Literary Society Declamatory Contest '10; Biological Club; Captain Class Basketball Team '10-'11; Alumni Editor *Wau Gau Rac*; Secretary-Treasurer Battalion Cotillion Club; Member Athletic Council; Country Gentlemen Club; Manager Basketball Team.

"Walter" hails from Cleveland, but since his entrance in College he has become naturalized to the soil of Carolina. He now makes his home in this State. Entered College in our Sophomore year. He is very uncertain which he likes the most, basketball or Meredith College.

HENRY BASCOM MERCER, Wilmington, N. C.

Civil Engineering

Alas! what fate is mine.

Age 20. Height 5 ft. 8½ in. Weight 158.

Captain Freshman Football Team '08; Class Baseball Team '09, '10, '11; Class Football Team '10; Corporal Co. B '10; Comic Editor *Wau Gau Rac* '11-'12; Substitute Basketball Team '12; Senior Civil Engineering Society; Eta Beta Pie.

"Henry" is one of the happy-go-lucky kind. Little but loud expresses him. He seldom lets a small thing like a textbook interfere with his pleasures. But this does not say that he is at the bottom of his class. When it comes to class athletics Henry is always on the job. We expect to hear of him later in the Civil Engineering world.

SIMON TURNER MITCHNER, Garner, N. C.

Mechanical Engineering

And kept the noiseless tenor of his way.

Age 25. Height 6 ft. Weight 145.

Corporal Co. B '09-'10; Sergeant Co. E '10-'11;
President Oak Ridge Club; Mechanical Society;
Leazar Literary Society.

"Simon," "Mitch"—Here is the original optimist of the College. Is always happy and spreads it around on his classmates as the sun spreads its rays over the earth. Takes regular trips home, where it is rumored he is always accompanied by a popular official of the College. Plods along cheerfully and by his never-failing perseverance has reached a position where he can afford to smile and look back contented.

JAMES RICHARD MULLEN, Charlotte, N. C.

Chemistry

A good liar is always an artist. He draws on his imagination.

Age 20. Height 5 ft. 1 in. Weight 160.

Chief Rooter '11-'12; Drum Major '11-'12;
Eta Beta Pie; Pullen Literary Society; Gang;
Hornets; Assistant Manager Basketball Team
'09-'10; Assistant Chief Rooter '10-'11; Chief
Trumpeter '10-'11; Corporal '09-'10.

"Dick" hails from the Queen City, so, of course, he is a booster. He has yelled "Watch Charlotte Grow" until he has lost control of his tongue. Now talking is not the only thing he does. "Dick" has a good head and is by no means a bad student. As Chief Rooter he has helped A & M win some hard fought games.

CHARLES MCKEE NEWCOMB, K. A.
Raleigh, N. C.

Civil Engineering

Wise and fairspoken.

Age 21. Height 5 ft. 8 in. Weight 146.

Corporal Co. C '09-'10; Sergeant Co. E '10-'11; Second Lieutenant Co. B '11-'12; Civil Engineering Society; Scrub Football Team '10; Junior Football Team '10; Roman Senate; Saints.

"Charlie" is one of the jolly Raleigh boys. He prefers a good joke any time to a dry textbook, although he comes out all right in his work. You find him the same Charlie every day. If he doesn't turn his arguing ability toward law, we expect to hear from him in the field of Civil Engineering.

CHARLES WASHINGTON OWENS,
Saratoga, N. C.

Civil Engineering

To love and win is very well
But to love and lose is certainly h—l.

Age 25. Height 5 ft. 6 in. Weight 165.

Eta Beta Phi; Division Inspector '12; Assistant Librarian '12; Secretary and Treasurer Civil Engineering Society; Vice-President Pullen Literary Society '12.

"Togie" left his native land, Saratoga, N. C., when a mere boy (?) and came to A & M, and except for a few occasional visits to Meredith and other places of interest, he has remained here on the hill. Togie is always contented on class if he can be close enough to "Ichabod" to worry him. He is looking forward now to the time when he shall be "Monarch of all he surveys" in the Philippines. We expect to hear of his success in whatever he undertakes.

ALEXANDER HOLLADAY PICKEL,
Raleigh, N. C.

Electrical Engineering

Some folks who never talk usually say
what they think.

Age 19. Height 5 ft. 10 in. Weight 130.

Associate Member American Institute Elec-
trical Engineers; Eta Beta Pie.

"Pickle" never loafs on the "hill" much.
He is hardly known by any except his class-
mates and known only slightly by them.
He is so thin and small that it is wonderful
how those sparrow legs support such a great
head.

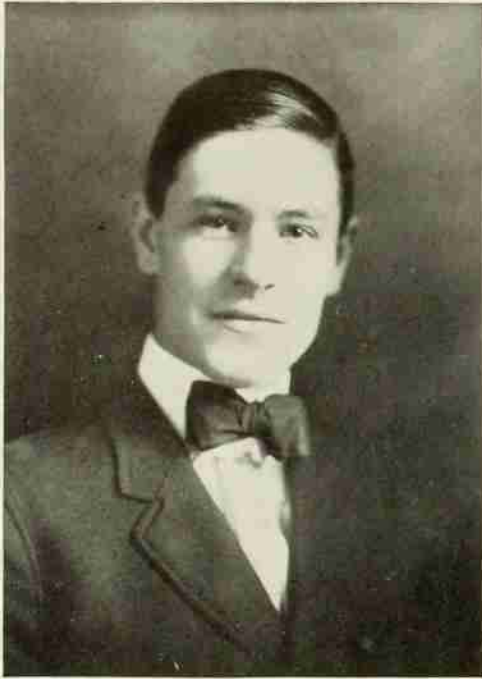

BRYANT MONROE POTTER, Southport, N. C.

Intent to reason or polite to please.

Age 21. Height 6 ft. Weight 148.

Historian Junior Class '10-'11; Vics-President
Senior Class '11-'12; Chief Eta Beta Pie '11-'12;
Secretary Pullen Literary Society '11; Treasurer
Pullen Literary Society '11-'12; Editor in Chief
Red and White; "Gang"; Division Inspector
'11-'12; Honors '09-'10.

"Ich" has received the mantle of departed
editors of the *Red and White*, and has made
it shine with renewed glory. Is most versa-
tile in his work about the College. Not
satisfied with "starring" in his class, he must
needs shine in Pullen, establish a fame as an
author, and dazzle the eyes as an editor.

LOUIS NAPOLEON RIGGAN, Raleigh, N. C.

Civil Engineering

I want but little here below,
But I do want the supply kept fresh.

Sergeant Co. B '10-'11; First Lieutenant '11-'12; Art Editor *Agromeck* '11-'12; Business Manager *Wau Gau Rac* '11-'12; Senior Civil Engineering Society.

"Louie," since his entrance into this College, has made a very creditable record. He might have been the leading light of his Class if he had spent less time on that "paper." He says it is a subject of vital interest, and we are horrified to find its subject to be "Is it out of place to kiss a girl's hand?" He has decided that the hand is not the proper place to kiss her.

ARCHIE KNIGHT ROBERTSON, A Z.
Rowland, N. C.

Agriculture

Proud of you, my boy, proud of you.

Age 21, Height 5 ft. 8 in. Weight 145.

Bi-Ag Society; Y. M. C. A. '10-'12; Treasurer '11-'12; Delegate Bible Study Institute '11; Leazar Literary Society '10-'12; President Leazar Literary Society Fall '11; Treasurer Spring '11; Second Lieutenant Co. C; Sergeant '10-'11; Biological Club '10-'12; Vice-President Biological Club Spring '11; Rural Science Club '10-'12; Corresponding Secretary Spring '11; Critic Fall '11; Robeson County Club '10-'12; Vice-President '10-'11; President '11-'12; Local Editor *R. J. and White* '11-'12; Country Gentlemen '11-'12.

"Archie"—A farmer lad for sure. He is perfectly at home when it comes to Agriculture. A leader in all Agricultural Societies. Also a great Y. M. C. A. worker. Has done much for that institution, for he is a hustler.

DAVID WALTER SEIFERT, New Bern, N. C.

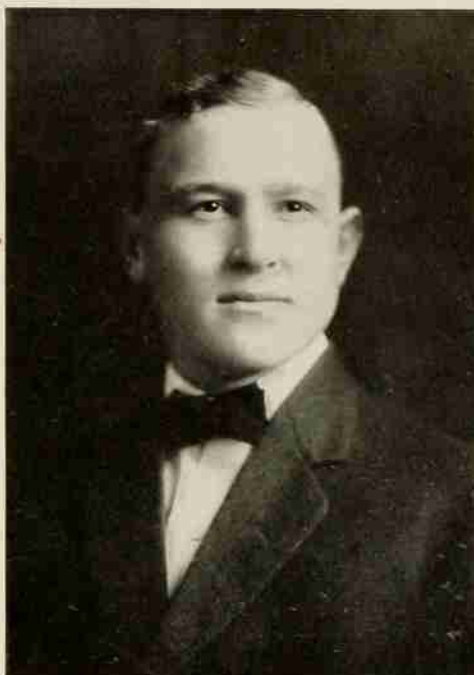

Civil Engineering

I ain't bow legged. They're just warped.

Age 22. Height 5 ft. 6 $\frac{1}{4}$ in. Weight 160.

President Short Course Class '07; President Junior Class '10-'11; Sub Varsity Football Team '07; Varsity Football Team '08-'09, '10-'11; Sub Varsity Baseball Team, '08; Varsity Baseball Team '09-'10, '11-'12; Captain Varsity Baseball Team '12; Vice-President Pullen Literary Society '10-'11; President Pullen Literary Society '12; Vice-President Athletic Association '11; President Athletic Association '12; Eta Beta Pie; Senior Debater; *Red and White* Board; Basketball Team '11.

"Dutch"—He has been with us four years and the Athletic Department wishes that he could stay longer. Has taken a very prominent part in all branches of athletics since his entrance into our midst, and can always be relied upon. We wish him luck in Civil Engineering.

FLEMING BATES SHERWOOD, Raleigh, N. C.

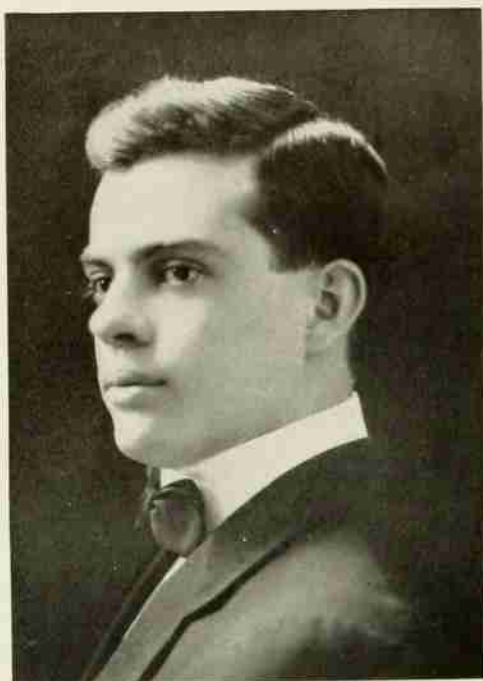

Chemistry

Work makes the man.

Age 20. Height 5 ft. 1 $\frac{1}{2}$ in. Weight 175.

Captain Co. D '11-'12; Sergeant '10-'11; Corporal '09-'10; Class Poet '08-'09; Class Football Team '09-'11; Battalion Cotillion Club.

"Flem"—He is another of the quiet boys, but it is a quietness that covers a character all its own. He has made a good reputation as a student, an excellent one as an officer. Is a type of college man who is worth while, clear headed, with the understanding of what he wishes to do, and the ability to do it.

WILLIAM TALMAGE SHULL, Beaufort, N. C.

Civil Engineering

God bless the man who invented sleep.

Age 22. Height 5 ft. 11 in. Weight 178.

Quartermaster Sergeant '10-'11; Punctuality Roll '10-'11; Senior Civil Engineering Society; First Lieutenant and Quartermaster '11-'12.

"Rip"—His personality can be best understood when you think of the source from which came his nickname. He has been on the Military Staff for the past two years, this year being Quartermaster, and but for this he would be seen very little on the Campus. He makes good on his work when he is not too sleepy to answer the Professors' questions. Rip is an all right fellow and no doubt will succeed in whatever he undertakes.

JAMES MCCREE SMITH, A. Z.,
Rutherfordton, N. C.

Agriculture

He was one of the wisest of men,
Who said "I can bathe in a fountain pen."

Age 22. Height 6 ft. 2 in. Weight 170.

Pullen Literary Society; Biological Club;
Rural Science Club; Y. M. C. A.; Bi-Ag Society.

"Jim," "Archie"—For four years he has been a leader in his classes, and is lasting to the end. His greatest delight is to get hold of a professor's leg, and pull. Jim is an honest worker and deserves lots of credit.

ORUS WILDER SMITH, Kipling, N. C.

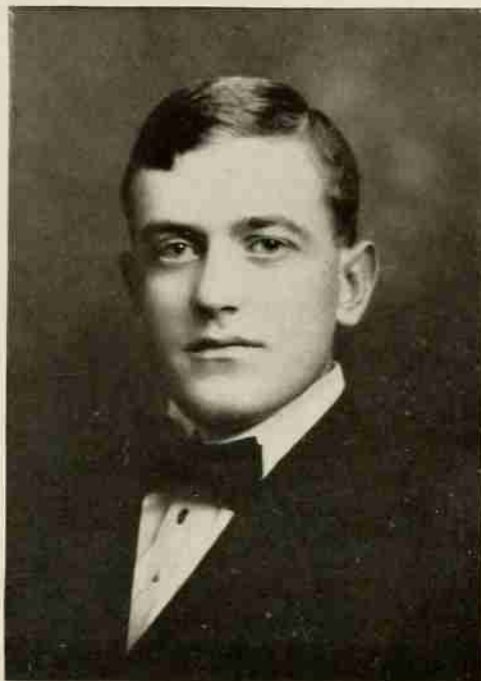

Mechanical Engineering

I dare do all that may become a man.

Age 22. Height 5 ft. 11 in. Weight 165.

Corporal Co. A '09-'10; Sergeant-Major '10-'11; Major '11-'12; Mechanical Society '10-'12; President Mechanical Society '12; President Battalion Cotillion Club '11-'12; Commencement Marshal '11; Assistant Business Manager *Academeck* '12; Y. M. C. A.; Honors in Scholarship '10-'12; Punctuality Roll '10-'12.

"O. W."—"Major" came here with a clear idea of what he wished to do and he has done it. Stands high in his class and has the highest rank as an officer that the College can bestow. Stands four-square and firm to one and all. Is generally liked and respected by all the boys.

EDWARD PINKNEY SPEER, Boonville, N. C.

Electrical Engineering

As a stump orator he was a howling success.

Age 20. Height 5 ft. 8 in. Weight 155.

President Senior Class; Varsity Baseball Team '10-'11-'12; Vice-President Athletic Association '12; President Student Branch of American Institute Electrical Engineers; Eta Beta Pie; Honor Committee '11; Manager Class Football Team '10; Captain Class Baseball Team '09.

"Hay"—As a student, for four years, he has an enviable record, and a good showing in baseball for three years. He would have a fine chance for success if he could forget the fairer portion of humanity long enough to realize his inclinations.

TALMAGE HOLT STAFFORD, A. Z.,
West Raleigh, N. C.

Agriculture

A student, an athlete, and a ladies' man.

Age 22. Height 5 ft. 1 in. Weight 167.

'Varsity Football Team '09-'11; Captain 'Varsity Football Team' '11; 'Varsity Baseball Team '09-'12; President Athletic Association '11; President Pullen Literary Society '11; Inter-Society Declaimer '10; Inter-Society Oratorical Contest '11; Inter-Society Debaters '12; Chief Marshal Inter-Society Debate '11; Bi-Ag '10-'12; Y. M. C. A. '08-'12; Biological Club '08-'12; Associate Editor *Red and White* '11-'12; Associate Editor *AURORAEK*; Gang; Country Gentlemen Club; Eta Beta Pie; Chairman Inaugurative Committee of the Honor System.

"Tal"—He has made good in all branches, and has great aspirations which he expects to fulfill. A good student and a good athlete. Can make a speech whenever necessary. A hero when it comes to protecting "his salary wing." Last but not least, an ideal citizen.

CLARENCE ALEXANDER STEDMAN,
H. K. A., T. N. E., Greensboro, N. C.

Chemistry

The duller things are the better the grinder's business.

Age 20. Height 5 ft. 11 in. Weight 135.

Second Lieutenant Co. B '11-'12; Sergeant Co. B '10-'11; Sergeant Co. C '09-'10; Thalarian German Club '08-'09; Leader Thalarian German Club '09-'12; Leader Battalion Cotillion Club '11-'12; President Guilford County Club '10-'11; Chemical Society; Saints; Aliens.

"Sted"—Not so much of a student but a ladies' man for sure. He is a shining light at the dances and a star in society. Perhaps some day he will be a chemist, but it is very doubtful.

NEEDHAM BRYAN STEVENS, A. Z.,
Goldsboro, N. C.

Agriculture

He has mischief even in his eyes.

Age 21. Height 5 ft. 10 in. Weight 145.

Bi-Ag Society; Eta Beta Pie; President Biological Society Fall '11; Vice-President Biological Society Spring '12; Secretary Biological Society Fall '10; Pullen Literary Society '08-'12; Marshal Senior Debate '10; Critic '12; Chaplain '09-'10; Country Gentlemen Club.

"Sis"—A jolly good fellow. Never worries himself with serious thoughts. If it was not for Sam, we are afraid Sis would be led astray. But Sam has done his work well and Sis is now a young genius in getting others in trouble but staying shy himself.

WILLIAM PERY SUGG, Princeton, N. C.

Civil Engineering

Knowing when to quit is as essential as knowing when to begin.

Age 21. Height 5 ft. 10 in. Weight 150.

Pullen Literary Society '08-'09; Corporal '08-'09; Sergeant '09-'10, '10-'11; Junior Baseball Team '11; Eta Beta Pie.

"Bill" had to leave us during our last term on account of his health. But he intends returning and finishing with next year's class. We were sorry to lose him, and hope that his health will be much improved after the rest.

ARTHUR WILLIS TAYLOR, Raleigh, N. C.

Mechanical Engineering

Truly can it be said, "My mind to me a kingdom is."

Age 20. Height 5 ft. 7 in. Weight 139.

Honor Graduate; Punctuality Roll '09-'12; Class Historian '08-'09; Scientific Editor *Red and White*; Battalion Cotillion Club; First Tenor Senior Mechanical Quintette; Official Pianist Senior Mechanicals; Mechanical Society '10-'12; Secretary-Treasurer Mechanical Society '12; Leazar Literary Society '10-'12; President Leazar Literary Society '12; Senior Debater '12; Sergeant '10-'11; First Lieutenant Co. F; Y. M. C. A. '09-'12.

"A. W."—He is second only to his brother Herbert in scholarship honors. Takes an active part in all phases of College life. Success is the outcome of all his undertakings. We can not say yet whether he will be a novelist, poet, or mathematician.

CULVER MURAT TAYLOR, K Σ, Tarboro, N. C.

Electrical Engineering

Do all the good die young?

Age 22. Height 5 ft. 6 in. Weight 155.

Manager Baseball Team '12; Assistant Manager Baseball Team '11; Second Lieutenant Band, '11-'12; Corporal Band '09-'10; German Club '09-'10-'11-'12; President German Club '12; Student Branch American Institute of Electrical Engineers; Associate Editor *ACROMECK*; Honors in Scholarship '09-'10; Y. M. C. A.; Saints.

"Cully"—He took a great deal of interest in music for three years, and then gave it up as an unprofitable vocation. Whenever there is a dance in order, one may safely expect Cully to be "Johnny on the spot." Taking Electrical Engineering as a side line.

HERBERT LEE TAYLOR, Raleigh, N. C.

Mechanical Engineering

Thus do I live, thus do I die,
Would that all had done so well as I.

Age 22. Height 5 ft. 8½ in. Weight 152.

Honor Roll '09-'12; Punctuality Roll '09-'12; Class Prophet; Business Manager *Red and White* '11-'12; Associate Editor *AGROMARK*; Battalion Cotillion Club; Mechanical Quintette '11-'12; Mechanical Society '10-'12; Vice-President Mechanical Society '11-'12; Leazar Literary Society '10-'12; Secretary Leazar Literary Society '10-'11; Declaimer '11-'12; Sergeant '10-'12; Second Lieutenant '11-'12; Y. M. C. A. '09-'10, '11-'12; Junior Baseball Team '10-'11.

"H. L."—Conceded by all to be the best student in College. Has led the Class in grades since his entrance in our Sophomore year. On Math, he has the Professor beat a mile. His literary qualities have added greatly to the *Red and White*. Herbert is sure to make a great success in the world, for nothing can hold him down.

GEORGE LOGAN THOMPSON, Goldsboro, N. C.

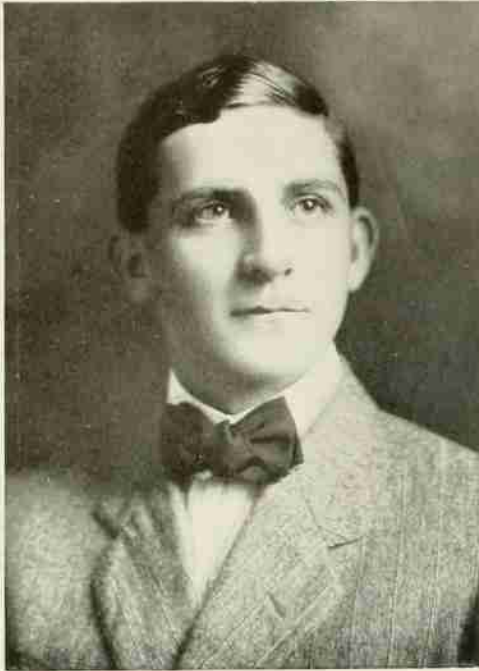

Electrical Engineering

Every man should aim to know more than he does, but should not make the error of believing that he does.

Age 22. Height 5 ft. 8 in. Weight 135.

Class Baseball Team '09-'11. Class Football Team '10; First Lieutenant Co. E '10-'11; Captain Co. C '11-'12; Battalion Club.

"Logue"—Although a man of many ideas, few of them belong to the realm of common sense. Has spent some very serious hours attempting certain original electrical phenomena, but as yet has been unsuccessful in his experiments.

JOHN SAM THOMPSON, K A. Lewiston, N. C.

Agriculture

Silent as is the midtime of the night.

Age 22. Height 5 ft. 7 in. Weight 140.

Eta Beta Pie; President Country Gentlemen.

"Johnnie" is probably known as little as any member of the Class, but to know him is to like him. His favorite pastime is study—at least half a minute is spent at this daily. The Country Gentlemen have found in him an ideal man as President of the Club. The Class has found in him a man that is all to the good.

GEORGE REEDE TROTTER, Charlotte, N. C.

Electrical Engineering

A skeptic is one who believes in nothing that is not on the map.

Age 20. Height 5 ft. 7 in. Weight 130.

Captain Track Team '12; Varsity Track Team '10-'11; President of Hornet's Club '11-'12; Secretary Athletic Association '11-'12; Chairman Bible Study Committee '11-'12; Censor Pullen Literary Society '12; Class Football Team '08-'10; Eta Beta Pie; Student's Branch of the American Institute of Electrical Engineering.

"Trit"—He did not know why he came to College, when he first entered, but after a year he decided that running suited him best. How close he was to right, a smashed State record will testify. We wish him as much success in his chosen profession as he has had in his side line.

HARRY MOORE WALTON, K Σ,
Morganton, N. C.

Electrical Engineering

All the world loves a lover.

Age 20. Height 5 ft. 11½ in. Weight 143.

Captain Co. A '11-'12; First Sergeant Co. B '10-'11; Corporal Co. B '09-'10; Winner Non-Commissioned Officers Medal Co. B '09-'10; Business Manager *Academy*; *Leazar Literary Society*; Secretary *Leazar Literary Society* '09-'10; Chief Marshal Inter-Society Oratorical and Declamatory Contest '11; Associate Member American Institute Electrical Engineers; Punctuality Honor Roll '09-'10; Battalion Cotillion Club; Q. T. C.; Saints.

"Goat" is a man of affairs; although a good student, he is an exceedingly good business man. But he never lets business interfere with his college life. One of those who takes fun where it is to be found. There is no danger of him being a bachelor for he is too progressive.

FRED BARNETT WHEELER, Archdale, N. C.

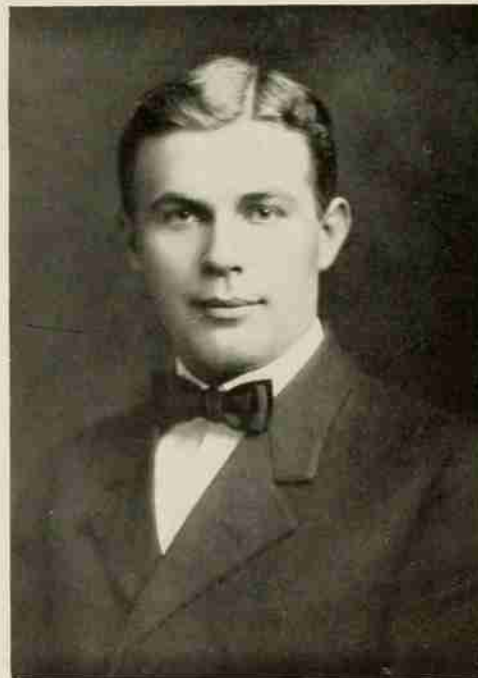

Mechanical Engineering

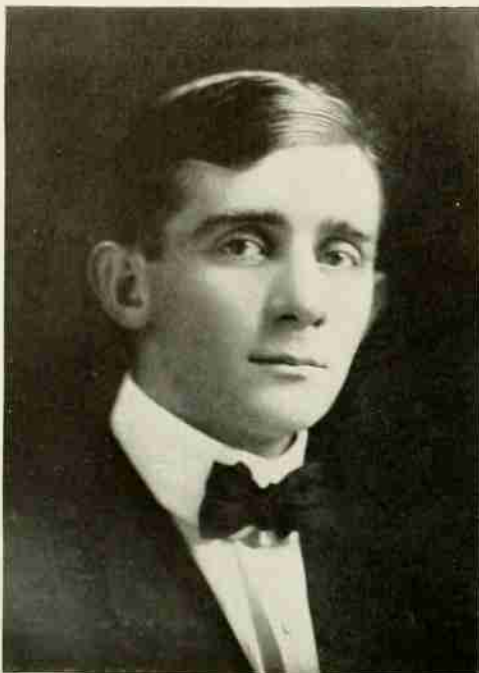

As he is, just so he speaks.

Age 24. Height 5 ft. 10 in. Weight 155.

Y. M. C. A.; Honorary Member Mechanical Society; Corporal Co. D '06-'07; Instructor Forge '07-'12; Instructor Foundry '09-'12.

"Fesser" came to A & M two years ahead of the Class. Although he doesn't like "too much theory," it wasn't lack of ability that has kept him here six years; for as soon as the Mechanical Department saw him work they recognized that they had found a man who was master of the situation in the Forge Shop. Since his first year he has been Instructor in Forge and Foundry. Monday afternoon always finds him at Meredith.

HUGH POWELL WHITTED, K. A.,
Mebane, N. C.

Civil Engineering

Hail fellow well met.

Age 21. Height 6 ft. Weight 155.

Editor in Chief *Wau Gau Rac* '11-'12; Assistant Editor *Red and White* '10-'11; Captain Co. B '11-'12; First Sergeant Co. C '10-'11; Corporal '09-'10; Sergeant at Arms Leazar Literary Society '08-'09; Secretary Leazar Literary Society '09-'10; Vice-President Leazar Literary Society '10-'11; Vice-President Y. M. C. A. '10-'11; Treasurer Alamance County Club '09-'10; Vice-President Alamance County Club '10-'11; Manager Junior Class Baseball Team '10-'11; Marshal Senior Debate '10; Chief Marshal Commencement '11; Owls; Class Poet '10-'11; Senior Civil Engineering Society; Honors in Punctuality '08-'11.

"Dearie" is one of the most original and amusing fellows of the Class when you know him, but quiet and dignified around strangers. Can tell a joke that was stale when Adam heard it and you will split your sides with laughter. You could not tell, by looking at him, that he was in love; but looks are sometimes deceiving. Math has "got his goat," but in the end "Dearie" will come out on top.

WALLACE WOODSON WILLIAMS,
Raleigh, N. C.

Chemistry

Though you were dying, he would make you laugh.

Age 20. Height 6 ft. Weight 133.

Art Editor *AGROMELK*; Eta Beta Pie; Owls.

"Kid"—Except in height, he is all that his nickname implies. He can make a jest out of nothing. The Faculty has politely asked him to withdraw several times but he is determined he will graduate before he leaves this hill. Never does today what he can put off until tomorrow. Professor Withers constantly reminds him that "Promptness is a rare virtue." Never takes life seriously. Mr. Owen says that if Williams lives to be eighty years old people will say, as they see him pass, "There goes Kid Williams."

In Memoriam

William R. Murray

CHARLOTTE, N. C.

DIED DECEMBER 9, 1910

A Toast

BY N. M.

Here's to the steadfast, reliable man—
The man with a tongue that's true,
Who won't promise to do any more than he can,
But who'll do what he says he'll do.

He may not be clever; he's often quite blunt,
Without even polish or air;
But, though it's not in him to "put up a front,"
When you need him he's always there.

So here's to the man on whom one can rely,
And here's to his lasting success;
May his species continue to multiply
And his shadow never grow less!

Senior Class Prophecy

'T WAS the witching hour of midnight, and I sat before my desk trying in vain to adapt my weary brain to the requirements expected of a prophet. Hopeless task. Being only the first son of a third son, I had not a single hope of coming out on an even break with what was expected of me. Just as I sank back in despair, and as the last stroke of the bell for twelve o'clock sounded, there appeared before my unbelieving eyes, a spirit. I sat up and rubbed my eyes.

"Be not afraid," it muttered, "I have seen your plight and have come to help you."

"But who are you?"

"I am the one who originated the idea of having a prophet in a graduating class."

I fixed him with a baleful look.

"And might I ask what put that idea into your head?"

"I just thought of it myself. But," he went on hastily, "I have been well punished for it, as I must wander up and down, never resting, until the class prophet shall be a thing of the past."

Thereupon I gloated with a most horrible gloat, and said,

"But, why help me?"

"Because, for every one I help my future punishment is mitigated a little."

"So you can tell me what my classmates will be doing in 1935?"

"Yes."

"Fire ahead, then. I will give them to you alphabetically."

And as I called the roll of our Class, he told me what I have here set down.

NEELY ORMON ALEXANDER—

He is a prosperous farmer at his old home, and has a most charming wife to help him share his joys. He has been to the Legislature twice, where he showed to advantage his training in the L.L.S. at the A & M. His eldest son graduates at A & M this year, and the next matriculates the following year.

ALLISON HODGES BOND—

He is also prosperous, being the proprietor of a string of blacksmith shops, situated all over North Carolina, with headquarters at Durham, where he makes his home. "A. H. Bond, Jr." also graduates this year at A & M. Mr. Bond is a noted philanthropist, having endowed two colleges handsomely, Meredith and Southern Conservatory of Music.

ALLAN THURMAN BOWLER—

He returned to his Florida home upon graduation, and from there he went to South America, where he made his name by constructing a magnificent railroad through the heart of the Andes. It is said that he kept his men in condition by

dividing them into two squads and developing football teams. It is also said that after such development avalanches, boa constrictors, etc., had no effect upon them and as a consequence his work was done in record time.

CLAYTON EDWARD BROWN—

He has succeeded in life as he did in college, as he is now the head of the engineering corps of the Seaboard Air Line, which is now one of the largest lines in America. His only trouble seems to be bad dreams in which he is heard to mutter these cabalistic letters: T-H-E-A-G-R-O-M-E-C-K.

STEPHEN COLE BRUNER—

He has applied successfully the principles he learned in college, and is now prosperous and lives a life of ease and contentment. He is often seen around the college, where he is a welcome visitor. He is as nonchalant as ever, and life rolls along easily with him.

BRICE LEGRIER CALDWELL—

He is now a member of the Chemical Research Society, one of the most able bodies of chemists in America, which was organized and endowed in perpetuity by one of the richest men of the time.

RALPH CAMPBELL DEAL—

He, following his bent, has invented a solar motor whereby the rays of the sun are converted into electrical energy with marvelous efficiency. This, of course, established him well in life, and now he has an immense electrical laboratory, where he works when the inclination seizes him, and abetted, no doubt, by the presence of the fair lady of his heart, his happiness is complete.

ERNEST COFIELD DERBY—

Just as he helped to build the 'Varsity of the A & M, so he has helped to build a railroad through from the United States to the southernmost portion of South America, and so well has he done his work that they have made him Division Superintendent. The engines on that line are noted for their short stops and they say that if they do not run on time every one gets a quarter back.

MCNEELY DUBOSE—

His insatiable desire for traveling, coupled with his keen brain and distaste for unnecessary work, has placed him among the greatest of pioneers, for his powers of observation together with his marvelous insight into human nature, have made him a force to be reckoned with, and wherever he goes, almost immediately that place breaks forth with new life. Of course his inevitable "side-pardner" is with him.

NEVIN GOULD FETZER—

He has a habit of going through life with a rush, just as he used to do in football. Consequently, he is now a successful manufacturing chemist and he counts his wealth large. Fetzer Hall at the A & M is a fine building, and attests his generosity.

THOMAS FENNER GIBSON—

He has continued his good work at college and is now Professor of Pure Mathematics at Harvard. He is a bachelor, poor fellow, but he seems to like it, so it is all right.

RICHARD GIERSCH—

He, of course, is coupled with "Mac" and the pair are astonishing the world with their genius. It is said that, at nights, when he is not breaking pokers for amusement, he is playing on one of his beloved instruments, haunting a shooting gallery, or adding to his well known collection of talented drawings of cats.

WILLIAM HAYWOOD GRAHAM, JR.—

His knowledge of Electrical Engineering, together with his knowledge of men, gathered from the Y. M. C. A. work, has made him the head of the W—— Electric Company, and people come from all over the world to study his organization methods. They say that Mrs. Graham had to take advantage of 1916, for, although he knew what he wanted, his bashfulness would not let him tell it.

ROBERT MCKENZIE HARDISON—

He went with "Kid" to the Seaboard and his worth was soon recognized; today he is second to Brownie only on the Seaboard and he could not be pleased better. Occasionally he and "Kid" take in a show together.

HARRY HARTSELL—

Harry succumbed to an attack of the heart soon after graduation, and they say that the wedding was one of the most magnificent ever seen in North Carolina. He is doing well in his profession. Harry, Jr., they tell me, could hang on a door knob with his left foot, when three years old, and stop a bullet with one finger, said bullet going at the rate of two thousand feet per second. But he could not determine the energy stored up in it to save his life.

WILLIS ASKEW HOLDING—

With the natural charm with which he is so well endowed, and his unquestioned ability to do what he wishes to do regardless of obstacles, Willis is undoubtedly one of the most successful business men that Raleigh has ever had. His wholesale and retail drug store is the talk of North Carolina, and he is noted for his wide-awakeness, business ability, and frankness of opinion.

SAMUEL BENJAMIN HOWARD—

He is now Governor of the Philippines. He reached this position by his natural ability, after receiving his commission in the Constabulary. His fame, however, rests not on this, but upon the book which he compiled during his first years in the Philippines, entitled, "Legendary Songs of the Carolinas." Such a complete and interesting collection had never been seen before, and the book sold in the hundred thousands.

RALPH WILKINSON HOWELL—

He has the largest holdings of land in Eastern Carolina, and leads a life of luxurious ease. The young bloods of that section despair of ever equaling him in the following of the fashions, as he makes the best of them look like tyros.

JOHN GORDON KELLOGG—

He has revolutionized Agriculture in his section of the State, and the State has made him the head of the Agricultural Institute, located in his section, for the instruction of the farmers in advanced methods of farming. He is ever cheerful and his eloquence is known throughout the State.

SAM JONES KIRBY—

He is editing the *Selma Agricultural Monthly* and is making a huge success of it. The comic columns are especially good. They tell me that he says he lives a merry life and expects to die a merry death.

CARL JOSHUA LAMBETH—

He went to the Philippines to teach the natives and succeeded well in his work. He is now head of one department in the Islands and is happy. They tell me he has built a college there for young ladies and called it Meredith.

CURTIS WILLIAMS LEE—

He has remained at Monroe, where he has built a string of mills, augmenting his father's. He is also proprietor of a college with a peculiar name, "The Almo Grand Academy." He married shortly after leaving college, and has been a model husband ever since.

THOMAS PINKNEY LOVELACE—

He went to Westinghouse after graduation and made good, as he received several offers, but he went to a water power plant in Washington State. He also made good there and as a consequence worked his way up and purchased an interest in the business. With this as a start he continued to purchase until now he is the president of a large power company, owning plants all over the West.

JAMES EDWARD MCGEE—

In 1920 the State, awakened to the absolute lack of any means for the average citizen to identify the different qualities of goods, established a department for the inspection and marking of all styles of goods sold in North Carolina. The excellent work of Mr. McGee attracted their attention and he was made the head of this new department, where he is now, having won fame for the excellence of his work. His headquarters are in Raleigh and consequently his voice can often be heard raised in song in the First Baptist.

NEILL McQUEEN—

When the State established the department wherein Mr. McGee was made head, they also established the position of Inspector of Mills in North Carolina.

The duties of this position were to see that all mills had modern methods of management, in that their goods came up to a certain standard and that their mill was properly lighted, ventilated, and the laws concerning labor were enforced. Mr. McQueen by his excellent work in one of the mills in the State had gotten an enviable reputation, and so this was offered to him. He accepted and has filled the position as no one else could, being liked by the mill owners and enjoying the unbounded confidence of the people.

THOMAS HUNT MACKIE—

He is still as irreproachable in dress as he ever was, and is prosperous in his profession. Of course he was soon captured and is now living a life of happy captivity.

WALTER RAY MANN—

This gifted son of A & M returned to his home after graduation, but did not remain there long. One night there was a lecturer at a town at which he happened to be, discoursing on the political situation of North Carolina. After the lecture was over, he invited questions. Walter proceeded to question him and so tangled him up that he did not know what to do. Of course, his fame locally was established, and at the next election he was persuaded to run for the House of Representatives and defeated his opponent by a handsome majority. His maiden speech is still talked about all over the State. He returned the next election, and at the next one was elected to the Senate, where he is now. It is said that when he runs for Governor the next election he is expected to have the largest majority ever returned in North Carolina. Above all else he is an ardent and noted advocate of Peace.

HENRY BASCOM MERCER—

This cheerful genius took a job with the Southern after graduation and by his joyous alacrity for anything which would help advance him, and by his smiling visage, soon won his way into the good will and approbation of his employers. Consequently, he has steadily advanced until he now is one of the vice-presidents of the road. And as the road has advanced almost as rapidly as Henry has, he is no mean figure in the public eye.

SIMON TURNER MITCHNER—

He also returned home after graduation, but did not stay long, as he received an offer as foreman of a small machine shop in Ohio. He built this shop up by perseverance, and by securing the manufacturing rights on some important patented articles he has extended the shop until it now covers many acres, being one of the largest foundries and machine shops in America. Mr. Mitchner is now one of the authorities on this class of work.

JAMES RICHARD MULLEN—

After leaving college he got a job with a consulting chemist and soon showed that he had absorbed all that he studied in college. The chemist soon learned

that "Dick" was fully competent, and as a consequence gave him full liberty to conduct such experiments as he desired. After years of experiment along original lines he startled the world by his discoveries, which opened up a new field of research and, of course, this made him famous. Added to this he is known everywhere as an advocate of good cheer.

CHARLES MCKEE NEWCOMB—

He went to South America after graduation, taking a position with a company which was building a railroad through the mountains of Chile. While in the heart of a wilderness, surrounded by hostile natives, fever broke out and decimated the camp, Charles being the only white man to recover. He took charge of the remaining men, sent for more and pushed on the work, twice repulsing attacks by the natives. The firm was so pleased with his prompt action that they placed him in charge. While building a tunnel, he was fortunate in discovering one of the secret treasure chambers of the Incas. His fortune being made, he only waited to complete the road before he returned to Raleigh, where she rewarded him with her hand.

CHARLIE WASHINGTON OWENS—

He also went to South America, where he started with the same company that employed Charles Newcomb and proceeded to build a solid reputation for himself as an engineer. His work is as solid as he is, for he grows with advancing years in both directions. As a reward for his good work, she gave him her hand, and they live happily in her home city, where his reputation procures him all the work he can possibly handle.

ALEXANDER HOLLADAY PICKEL—

After finishing college, he continued in the path in which he had traveled before entering college. His work in college having amplified his knowledge, and opened a wider vista before him, he went on with his experiments and was a pioneer in the development of wireless telephony over long distances, and also invented several electrical articles that proved of worldwide importance, in that they superseded old styles, doing the work better, quicker, and in a more convenient way. He spends most of his time in the Old Dominion, as she likes to stay near her friends and relatives.

BRYANT MONROE POTTER—

This man, not content with working his way up from obscurity to the eminence of being regarded as the peer of Civil Engineers in private life, must create for himself undying fame as the author of several novels, dealing with the romantic surroundings of Southport. It is also said that he has had a handsome share in the endowment fund of a college founded for the development of writers of short stories.

LOUIS NAPOLEON RIGGAN—

Of course, one who began so well could not but succeed in life and so he left here and went West, where he helped to build the Trans-Continental Railroad from San Francisco to Norfolk. As time passed on, his value was more and more seen, and now he is head of the easternmost division and doing well. It is rumored that one day the north wind blew off his derby hat and Louis hit the wind so hard that it will not come back in that section, hence the climate is unusually delightful.

ARCHIE KNIGHT ROBERTSON—

He received an offer from the State immediately after graduation and accepted it. His delightful and eloquent voice was soon discovered, and he was requested to join its board of lecturers on the educational car sent around North Carolina for the benefit of the farmers who could not reach the Institutes. Consequently he is now quite famous for his knowledge of Agriculture and for his genial whole souledness.

DAVID WALTER SEIFERT—

After leaving college he went to Mexico, getting a position on the same road as his classmate Derby. He rapidly became prominent, the following incident being the cause of it. One day he was riding on a train and it broke loose from the engine, and ran wild. The road was very crooked but it is said that Dutch rode it out, for nothing in the way of curves could ever feaze him. They appreciated a good thing for he now has a good job with the road and is happy with his wife. They both like Mexico, but like Raleigh better, as the scene of their respective Alma Maters.

FLEMING BATES SHERWOOD—

He did not leave Raleigh, but took up an offer of a position in the city. As a consequence, he continues to go out to the college every morning, not, however, to recite in classes, but to his daily duties as an Instructor at the A & M, in the Chemical Department. His conscientious work, as well as his work in the laboratory, which he did in the time not taken up by his classes, helped to advance him and now he is the head of the Chemical Department. They live happily in Raleigh.

WILLIAM TALMAGE SHULL—

He settled down to work after graduation and applied himself to his work as a Civil Engineer. As a consequence his fine brain soon won him recognition as an unusually accurate and efficient Civil Engineer. His services are eagerly sought whenever he finishes a piece of work, so he is constantly busy. His leisure moments are spent in coaxing harmonious strains from the "swinette." It is also said that he is half owner of the Almo Grand Academy.

JAMES MCCREE SMITH—

He also stayed in Raleigh after graduation, as he was offered a position in the Agricultural Department, where he had done such good work while in college.

He did his work well and as the years went on he steadily climbed until he is now the head of one of the departments. He and Mrs. Smith live happily on Maiden Lane.

ORUS WILDER SMITH—

He took up the special course with the General Electric Company and his ability procured him a position in the drafting department, but the excellence of his work soon brought him into line for promotion, and so well did he use his opportunities that he steadily advanced and now is at the head of the Department of Design. Shortly after he completed the special course and received the offer of a position, he returned to Raleigh long enough to carry away a fair daughter of North Carolina. They are very happy in their Northern home.

EDWARD PINKNEY SPEER—

He took the special course with Westinghouse, and after he had finished the course received several good offers, and took one as the manager of an electric company in the Old North State. Since then his sphere of activity has steadily increased, as his work while with this company was such as to bring him before the eyes of those who had control of the big companies in the State. He is now the manager of a score of plants and is very well known all over the United States. He married shortly after graduation and now is in town to see his daughter graduate at Meredith.

TALMAGE HOLT STAFFORD—

After graduation "Tal" received an offer from the big leagues, where he proceeded to more than make good. In the winter he takes personal control of his big farm, which is a model for this section of the State. During the season, he has a manager to attend to it while the fans idolize him. He is conceded to be one of the greatest pitchers that ever worked in the big leagues. He married a Raleigh girl, and she goes with him wherever he goes and sits in the middle of the grandstand where he can see her. If he ever gets in a tight place she smiles at him and then the opponents are done for.

CLARENCE ALEXANDER STEDMAN—

He took a position with the State after graduation and has steadily advanced. He was so steady in his work that he was rapidly promoted until he is now the head chemist of North Carolina. He also married shortly after graduation and they are considered one of the happiest families in Raleigh.

NEEDHAM BRYAN STEVENS—

He retired to the farm after leaving college and in a very short time his farm was the talk of his section. So well did he manage that he made handsome profits every year. So he began to add to his land and has kept this up until now he owns farms all over his county. In fact his holdings are so extensive that he has to stay in town to watch the markets, leaving his managers to work his farms. He is still as happy as ever and in the winter comes down to talk it over with "Tal."

WILLIAM PERRY SUGG—

He also is in the front of civil engineers, having enlisted with the Norfolk Southern. He has slowly but surely come forward and now he has a good job. He spends a good part of his time in Raleigh, where he first met Mrs. Sugg.

ARTHUR WILLIS TAYLOR—

After graduation he received an offer of a position as Instructor in Mathematics at the Mississippi A & M. He accepted and has advanced with the procession of the years until he is now the head of the department. He is happy, though married.

CULVER MURAT TAYLOR—

He also went to the General Electric Company. After finishing the course he was offered a position with the company, which he accepted, and by hard work and steady application has been promoted, until he now holds a position of much responsibility in the electrical department, which commands a handsome salary. He still plays on his "swinette" whenever the neighbors will allow it. They live very happily at Schenectady.

GEORGE LOGAN THOMPSON—

He entered the Army after graduation, and after many years he is now on the General Staff at Washington, being a Major. He is noted for his thorough grasp of military matters and conscientious and punctilious performance of his duties, as well as being a diplomatist of the first water. He has been back to the college several times since graduation, and the boys are always glad to see him, as he has an inexhaustible fund of good stories and an inimitable way of telling them. Mrs. Thompson is noted for her wit and beauty.

JOHN SAM THOMPSON—

He returned home after graduation and remained there for quite a while, developing a farm that was a model for that part of North Carolina. However, his neighbors and friends said that he was too good to waste his sweetness on the air of that place, and he was nominated and elected to the House of Representatives to represent his county. After several terms in the House he was elected to the Senate, where he now occupies a seat. He is always conservative and they say he can keep his mouth shut, no matter how full his brain is of a subject.

GEORGE REID TROTTER—

He went with Speer to take the special course at Westinghouse, but after finishing the course did not return to North Carolina, going to California to install some turbines. He liked it so well there that he stayed there and got a job with the plant as Chief Engineer. He did so well in that position that he was made chief over all the plants owned by that company, which were not a few. He is also married and, of course, he came back to North Carolina to get her.

HARRY MOORE WALTON—

He also entered the Army after graduation and as the years rolled by he has been gradually promoted, and now he is a Major of Infantry. The men in his battalion will do anything for him, as he treats them so well and takes an interest in their welfare. He came back to North Carolina to be married, as so many of his classmates did, and she has proved a worthy helpmeet to him, as she knows how to manage even better than he, and they say that he is a mighty good manager.

HUGH POWELL WHITTED—

He started out in his profession, but the seductiveness of editorial work overcame all else and he accepted a position with the *Civil Engineering Monthly*, where he immediately became the happiest of mortals. His articles were so able that he was gradually advanced until he is now the Editor in Chief of the magazine. He is now an authority on civil engineering and the magazine has the largest circulation among the technical magazines in America.

WALLACE WOODSON WILLIAMS—

He took a position at the Experimental Laboratory of Ohio after graduation, and surprised everyone by his tremendous application to work, and the result was shown in his slow but sure advancement, and now he is the head of this laboratory. He is one of the authorities of America on the subject of Chemistry. In addition he has cultivated his talent for drawing and he now draws one of the prettiest checks in the United States.

FRED BARNETT WHEELER—

He entered a large machine shop after graduation and his knowledge of forge work, together with his skill as a machinist, soon brought him into the notice of the head of the shop. So he has gone ahead steadily, and now is the head of the shop, which is one of the largest in the country. He, like all the rest, came to Raleigh and stayed long enough to take away a daughter of Raleigh.

* * * * *

As I wrote the last word of the foregoing, I looked up and, behold! the spirit was grinning most maliciously.

“Why the grin?” I asked.

“Because every class prophet fades into obscurity after graduation,” and grinning most horribly, he faded from sight.

PROPHET.

The Last Will and Testament of the Class of 1912

The members of the Class of 1912, having arrived at that juncture in life known as "Graduation," and being both sound in mind and spirit, do herein bequeath, give, donate, and in other ways let unto the persons and organizations hereinafter mentioned, the following property and rights of the said class, to be used by the hereinafter mentioned persons and organizations as they may in their judgment see fit to use and exercise.

First and foremost, unto our College President, Dr. D. H. Hill, we lovingly and sincerely tend our many absences from Chapel, and all those old musty reports not hereinafter bequeathed to others. May these ever keep the remembrance of the class clear in the mind of the Doctor.

Unto the Dean, Dr. T. P. Harrison, is left the remembrance of our little private conversations regarding "Conduct" and the "Skipping of too many classes."

To the Bursar is given all the old wornout board receipts, so that he may have some tangible things to keep in remembrance of our class.

And unto Registrar Owen is lovingly and tenderly given to be kept forever in kind and lasting remembrance all those reports that have been heaped on the class concerning conduct and class absences.

To be ever fresh in the minds of the Professors and Instructors of this college the class tends the numerous and various slips turned in regarding "Conditions Removed" to be divided and bestowed as follows:

To the Math Department:

To the Instructors of Freshman Algebra	40%
To the other Instructors and Professors	20%

Total for the Math Department	60%
-------------------------------------	-----

To the English Department	3%
To the Veterinary Department	2%
To the Agricultural and Kindred Departments	10%
To the Chemistry Department	2%
To the Textile Department	2%
To the C. E., M. E., and E. E. Departments, each 5%	15%

Total	94%
-------------	-----

The remaining 6% is generously given unto the Professor of Modern Languages, by some designated as Herr Rudy and by others known as Senor Doctah Rudy.

Unto the Junior Class we surrender a certain tract or parcel of land situated in the County of Wake, in the State of North Carolina, near the City of Raleigh, known and fully described as the A & M College Campus. Said tract or parcel is bounded as follows: On the north by *nothing*, on the east by *worse*, on the south by *worser*, and on the west by *worstest*. Provided: That the said Junior Class look after, and care for, or oversee by the use of "ramming," "reporting," or by such other methods as will tend to diminish lawlessness, vice, going to town, disorder, missing inspections, crime, smoking cigarettes, freshness, greenness, disobedience, excessive pride, ungovernable tempers, and such like vicious and unmanly habits among the students of the said A & M College. As sovereign rulers of the aforementioned tract or parcel of land situated as hereinbefore described we leave an abundance of the reports in the Registrar's Office to consult in case of the means of "fixing" one of the incoming fresh Freshies.

And to the Sophomores are tendered the studious habits of the Junior, together with the pleasurable anticipations of being a Senior.

To the Freshman Class is given the proud and lordly traits so common to the Sophomores and there is further bequeathed to this class two hundred '16 Freshmen to train in the strait and narrow paths of virtue. The 1912 paint bucket, now sleeping the sleep of the just beneath the old historic water tank, is handed to this class to be kept, admired, and *used* throughout the coming year.

To the class yet unborn, the Class of '16, is given company with six hundred of the best fellows in existence; and there is further tendered to this class all the traditions and records of this school born in the classrooms and on the athletic field to be kept and hallowed throughout the existence of the said class at this college.

To editors of the *AGROMECK*, *Red and White*, and *Wau Gau Rac* is bequeathed and donated a fat subscription list, generous advertisers, a peck and a half of the trouble, a half pint of the sympathy, two hundred gallons of the abuse, the curses, the indignation, the threats, and such other miscellaneous equipment that has been hurled at the editors of the aforementioned periodicals during the year.

To the literary societies, fraternities, and clubs is left some "good pickings" both from the old boys and from the incoming Freshies.

To St. Mary's, Peace, and Meredith is tendered all those dress parades they have witnessed, and the many celebrations during which patriotic college spirit compelled us to sing and yell the delights of the said A & M College; and be it further known that the ardent devotion, real or otherwise, wasted or bearing fruit, with which the said class has always held the inmates of the said schools is still given to the girls of the said schools.

To those of our classmates who by virtue of their wasted opportunities and "bone headedness" will of necessity become "hand me downs" to the 1913 Class is given sympathy that is lasting and real, and to the said "hand me downs" there is further tendered the hope that Dame Fortune will smile more sweetly upon them in 1913.

And unto all those who love and admire our common mother, dear old A & M, there is given a feeling that is kindred to brotherly love, and a lasting and pleasur-

able joy that can only come through being on the right side. May the lives of all who are mentioned in these dissections be long, happy, bright, and useful to humanity.

STATE OF NORTH CAROLINA,

COUNTY OF WAKE.

I, Jack Rastus Mose, a Notary Public in Wake County, hereby certify that personally appeared before me this day the Class of 1912 at the A & M College, who presented the attached Last Will and Testament, and who being duly sworn, deposeth and saith that the said Last Will and Testament is an accurate representation and description of the desires of said Class of 1912 of the A & M College.

(Signed) CLASS OF 1912 AT A & M COLLEGE.

Sworn and subscribed to before me this the first day of March, 1912. Witness my hand and Notarial Seal.

(Signed) JACK RASTUS MOSE,
Notary Public.

Junior Class Poem

Here's to a class so strong and great,
To the class of the Blue and White;
To a class that has never been beat,
Whose motto is fight, fight, fight.

They say that thirteen is unlucky.
But in all things we've shown them we're plucky,
For when in a game
We have yet to be tamed.

We have been here three years,
And what we have done on the hill
Will always be told for years,
So let the Freshmen laugh if they will.

We painted thirteen on the tank—
The Faculty thought it a prank.
From the Fair it showed fine,
And maybe it will wear off in time.

We have loved our class
For the men it has produced,
And now we'll shine like glass
While later we'll be deduced.

So here's to the class so strong and true—
To the class of the White and Blue;
"Thirteen," may we never forget her,
But stick until we are through.

History of the Junior Class

In September, 1909, we registered six score and eight of the greenest Freshmen that ever graced a college campus. We soon found that hazing had been abolished, and that we could roam the college campus unmolested by the "Sophs." The class was soon organized with J. I. McCallum as President, Sol Woolard as Vice-President, R. M. White as Secretary and Treasurer, G. L. Bain as Poet, and F. S. Hales as Historian. The class could not have chosen a more able set of men to lead us through our Freshman year.

We celebrated our promotion to the ranks of Sophomores by painting '13's all over the place, letting others know that we were the "Lords of the College." Some of us were made Corporals in the Battalion, and took great delight in expounding the principles of military science to the Freshmen, who wondered what was coming next. The following officers were chosen to preside during the Sophomore year over the destinies of our glorious class of ninety-six members: D. A. Robertson, President; G. L. Bain, Vice-President; J. O. Rankin, Secretary; T. J. Hewitt, Treasurer; G. W. Brice, Historian, and W. H. Sullivan, Poet.

Most of the fellows returned in the Fall of 1911, no longer as Sophomores, but as Juniors. It was then that we began to realize what college meant to us and what we were here for. We applied ourselves to our back conditions with what success only our Professors know.

Our class has furnished several men for college athletics. On the football team are: Robertson, Von Eberstein, Floyd, Hurtt, Sykes, Spencer, and Davis. Floyd and Robertson made the "All South Atlantic" football team. To baseball we contributed Riddick, Robertson, and Page.

In class athletics we have made a record which has never been made by a class in the history of this college. Our football team has not been scored upon by any other class team, and has won the cup for two years. In our Freshman year we easily won the class championship in baseball, but we lost last year after a hard fought game. In basketball we defeated the Freshmen, who in turn were defeated by the Juniors who had defeated us, thus making a triple tie.

Many of our number have, during the past two and a half years, fallen by the wayside, and some few recruits have joined us. With J. B. Coward, President; L. C. Hand, Vice-President; S. B. Sykes, Treasurer; T. J. Hewitt, Secretary, and W. C. Hopkins, Poet, to lead us through the rest of this year, we hope to return next year and graduate with credit to our college and State.

Sophomore Class Poem

Here's to thee, old A & M,
And thy past so grand;
We drink thy health right lustily,
And pledge with heart and hand
The Class of 14's loyalty—
None truer in the land;
And drink to ideals brave and high,
For which we ever stand.

Here's to thy record in the past
And to thy future bright,
To make it great and glorious
We'll strive with all our might
To make our class a winning one,
Victorious in each fight—
Bringing honors to A & M,
Fame to the red and white.

Here's to the men of A & M,
The men so true and tried,
Who ever make a record good
Out in the world so wide;
Here's health to them and wealth to them
And much of joy beside—
All honor, fame, and praise be theirs
Our Alma Mater's pride.

Sophomore History

Class of 1914

When we entered the A & M College in September, 1910, we were nothing but a bunch of poor, green Freshmen, ready to brave the trials and tribulations of the humble Freshman year, and looking forward with eagerness towards that glorious time when we might be called by that high and mighty name, "Sophomore." Those first days, weeks, and months dragged wearily on, for we soon realized that we were not only green Freshmen, but, judging from the epitaphs used by our fearful Sophomore friends, we were always d—d Freshmen. We heard ourselves called by this name so often that we soon came to the conclusion that such must have been the case. However, the days soon changed into weeks, and the weeks into months, and the Christmas holidays came to break the monotony of our d—d Freshmanship. After Christmas, we had been here long enough to begin to become acquainted with, and to love our class and each other, and to become proud of the fact that we constituted the largest and best Freshman Class in the history of the college. As the end of the year came, and we looked backward on the trials and hardships which we had suffered, we also became aware of the fact that there had been much joy and happiness left behind in that year. Mingled with this was a feeling of delight in the realization of the fact that we were passing into the state of Sophomoreship, and would never be Freshmen again.

In the fall of 1911, when we entered upon the duties and responsibilities of being Sophomores, we enjoyed the distinction of being the largest Sophomore Class in the history of A & M, and hope to show, before the year has passed, that our standard as to quality ranks equal to that as to quantity. We also recognized the sad fact that the present Freshman would not be d—d at all, and in fact, he absolutely refused to be anything except "His Majesty, the Freshman." As we had made a promise, as had the previous Sophomore classes before us, that we would do no hazing, we could not show the Freshmen their places in that way, so it was decided to draw up rules and regulations regarding the conduct of that class, which was approved by the Junior and Senior classes. However, after much excitement and discussion of the matter, it was decided, at a meeting of the President of the College with the Senior Class, that the Freshmen were to be given a lecture regarding their place and responsibilities in college, and the matter be allowed to drop.

Our class is very proud of the place she has held in college athletics. We have three men, Anthony, Cool, and Phillips, to show the big monograms and represent us on the 'Varsity football team. These men not only made the team, but were stars. Besides these, we have several men among the first string of substitutes and scrubs.

On the baseball team we were represented by Farmer and Patton, they having been two of the most consistent players on the team. Farmer showed up espe-

cially well with the willow, having led the team in batting with an average of .415. We also have some promising material among the substitutes and scrubs of the baseball squad, and at this time we have only had one season in which to bring stars to the front, and are counting on others to show up as our class grows older.

We are represented on the track team by Kephart, who won over the man holding the State record for the mile run. The track on which this man made the State record was a much better track than the one used when Kephart beat him.

In basketball we are well represented, with Chambers (Captain) and Austin on the 'Varsity, and others among the promising substitutes.

In class athletics we rank high, having won the Faculty Cup for the class championship in baseball last year. In football, although we lost both years, we held the best class football team A & M has ever had to a score of 6 to 0 in each instance, the teams having been equally matched. This team was the Class of 1913, which has never been scored on. In basketball we beat every other team except the Sophomores, the result in the championship series having been a tie.

As we continue to trudge towards the close of our Sophomore year we begin to acquire that feeling of pride in our class, and good fellowship among our classmates, which go to constitute the "College Spirit," and love for each other which every college man should possess. As the time passes on we continue to know each other better and to discover the qualities and characteristics of the different men in our class who are achieving great things in their college life, and who are destined to achieve greater things in the walks of their lives after they have finished their college course.

HENRY K. NASH, JR.,
Historian.

Freshman Class Poem

We are Freshmen, to be sure,
Sophomore taunts we must endure.
Never have the Juniors said:
"Have your frolic, go ahead."
Paltry in the Seniors' eyes,
Yes, we know we are despised.

When we came, we came to work,
Though at times we've wished to shirk.
When all began our college life,
Each craved heroism in the strife;
Patiently endure and stick to our post,
Else we fail and give up the ghost.

Sophomores, Juniors, and Seniors to be
Ere each one receives his degree;
Many Bachelors of various kinds
When we depart with developed minds.
Although our success remains unseen,
Watch the Class of Nineteen-fifteen.

Class History

Class of 1915

The Class of 1915 began its college life on the seventh of September with something like two hundred men. We were a green set, green as the proverbial grass in color. We kept the Registrar and Bursar busy for awhile getting registered and assigned rooms.

Our fear of the Sophs was great at first, and as they turned a few of us out of our beds it increased; but we soon found that if we behaved as Freshmen should, they would not trouble us.

The first month we were busy learning the ways of college and getting our classes straightened out. Between classes and learning to drill we found our way to the Postoffice, Y. M. C. A., and Library.

About the middle of the first month we elected a temporary President, but later regular officers were chosen. The following were elected: W. T. Grimsley, President; Wilbur Sumner, Vice-President; B. W. Setzer, Secretary; J. F. Brawley, Treasurer; R. K. Hatton, Historian. Mr. Brawley was elected as Honor Representative of the class and W. S. Howell was chosen as football manager.

In athletics I am sure we did our part. We furnished the 'Varsity squad several good men and a number of our men were on the scrub eleven. All did good work. In the class games Captain Sumner lead the team to a tie with the Juniors for the championship.

In basketball we were well represented and are proud of the showing our men made. A number of the men are making a good showing on the track and baseball squads, and we are sure they will develop into first-class men.

We have the largest class ever registered at dear old A & M, and are proud of the class and men. I am sure that our class will give a splendid account of itself and lead all others during the time we are on the hill. I am sure, too, that the boys of 1915 will make records in life after graduation.

The Battalion

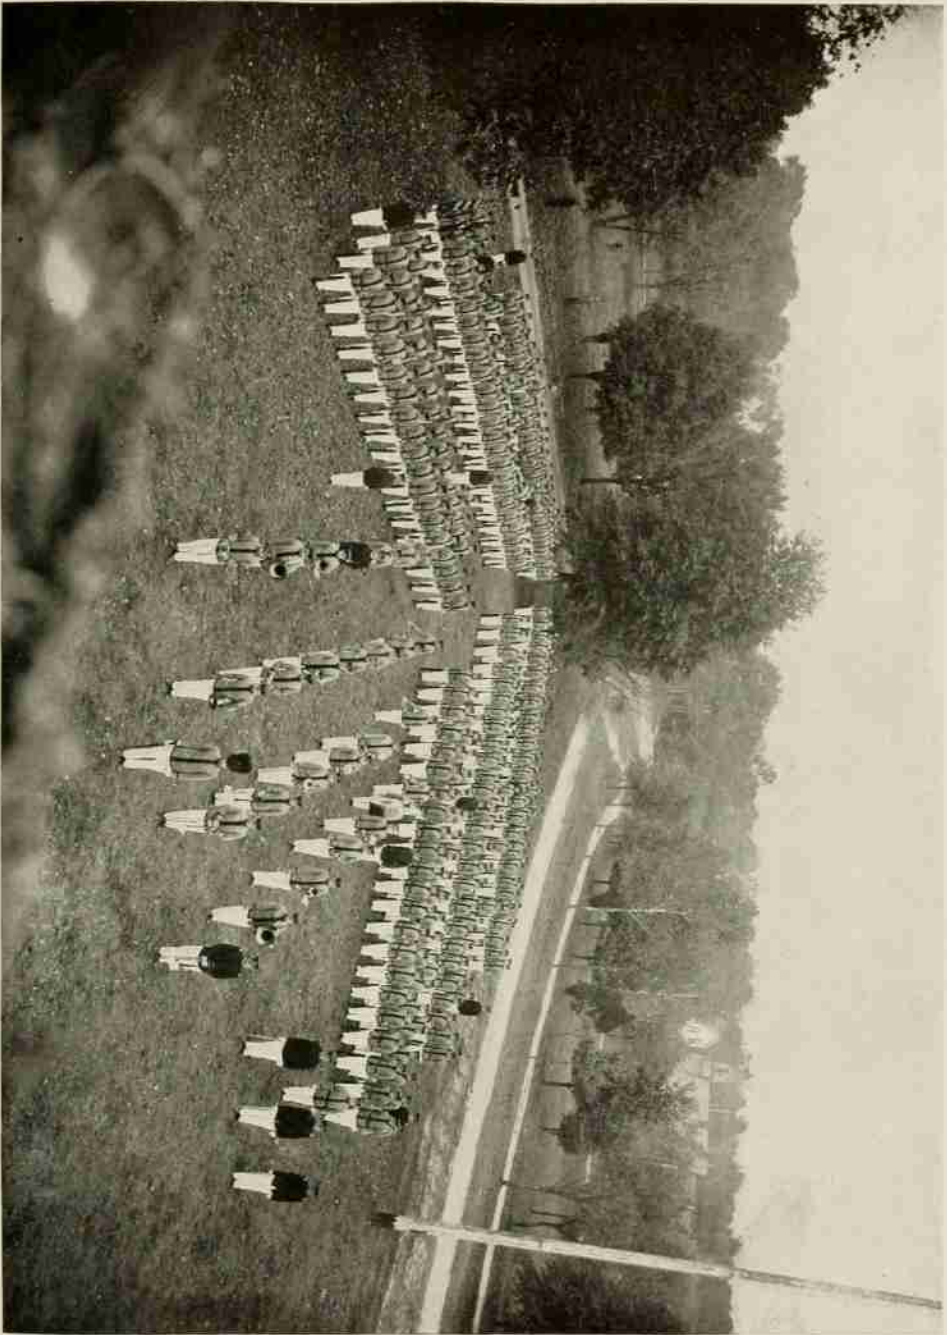

Probably not one-fourth of the knowledge obtained from a college course is of any practical use to the graduate in after life, yet who for that reason would condemn a system of college education? The studies pursued in college find their greatest benefit in the mental exercise and discipline they afford, and no subject affords this more than military drill. It emphasizes the importance of good and accurate use of language; it develops in officers the power to control and command, and affords an excellent form of physical exercise so necessary to students.

At present our college is especially fortunate in having an able, efficient, and highly esteemed officer as Commandant, Captain W. G. Peace, of the Coast Artillery Corps. The Battalion and the whole college feel a deep sense of gratitude and appreciation toward Captain Peace for his untiring efforts to bring the Battalion up to the high standard set by the War Department. The remarkable improvement in the military department here, since the beginning of his administration, two years ago, stands as proof that his efforts have not been in vain.

At the beginning of this session the Battalion was organized with six full companies and the band. After the assignment of the officers and non-commissioned officers to the various companies, came the most difficult and disagreeable task of the whole year—the instruction of about two hundred new men, part of whom had never seen any drill before. However, and to the pleasure of all, the new men went into it with determination and were unusually quick in mastering the knowledge requisite to being a soldier.

The Fall Term was taken up mostly in Company and Battalion drill, both close and extended order. For the first month and a half drill was held five times a week to prepare the new men for an annual competitive drill, which was held on the parade grounds October 30th. Captain Dougherty, U. S. A., now Instructor for the North Carolina State Guard, kindly consented to be the judge for this occasion. The pennant was awarded to Company F, under command of Captain R. M. Hardison, while second honors went to Company B, under command of Captain H. P. Whitted.

The Spring Term was taken up in the various kinds of drill, together with gallery and target practice. After the annual inspection in April no regular drill was held, but target practice was continued.

Edward L. Greene

General Athletic

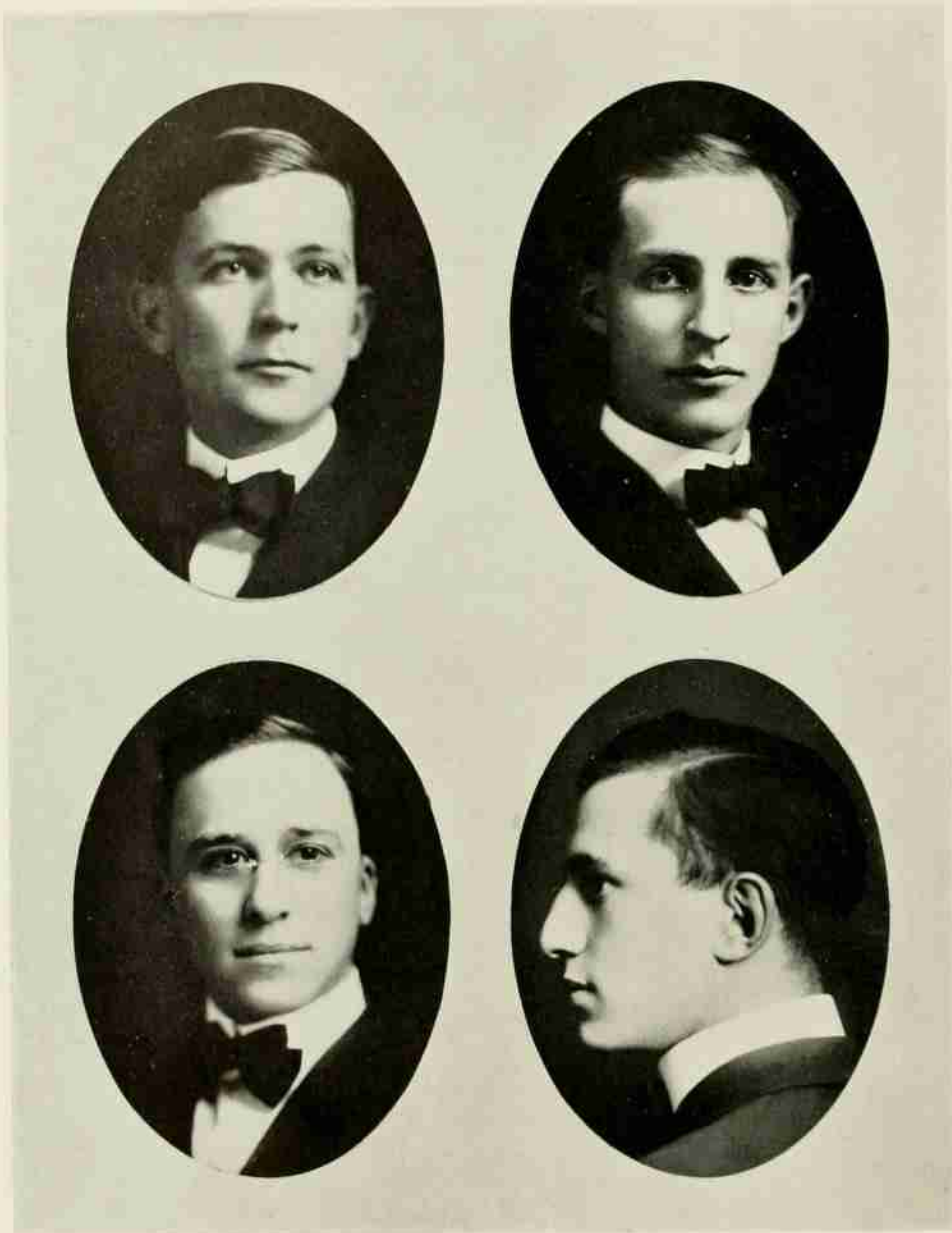

Director

Edward L. Greene is a graduate of the University of Pennsylvania, Class of 1908. He played on the Quaker eleven for four years, being captain of the team in his Junior year. He had the distinction of being selected as an "All American" half-back one year. Besides his activity in football, Greene was a prominent member of the Penn track team for two years, taking part in the dashes, low hurdles, and broad jump. He was a member of the famous Quaker relay team that won the world's championship in 1905. At the World's Fair in St. Louis in 1904 Greene won second place in the world's broad jump, his distance being twenty-two feet and one inch.

In the Fall of 1909 Greene took up the position of football coach at A & M, he having coached the University of North Carolina football team the year previous, his first year out of college. By his personality he soon won a warm place in the regard of the faculty, the student body, and the friends of the college, and his popularity has steadily increased from that time. He has that altogether necessary prerequisite of a successful coach, the ability to handle men, and the football teams that he has turned out for the Red and White in the past three years have been the pride of the whole State.

Feeling the need of a man to be actively in charge of athletics from one year's end to another, the Athletic Council the first of January secured the services of "Eddie" Greene as Athletic Director at A & M, to take active charge of the four athletic teams, viz., football, baseball, track, and basketball, and it is felt that under his capable guidance athletics will more nearly represent its true aim in college life, the physical development of the entire student body, and that successful teams will still be developed to represent A & M in intercollegiate contests.

Tragic Story of Ninth Inning Gave the Farmers a Hard Fought Victory

*Cashion Pitched in Super-Sensational Style Until His Catcher Got Hurt and
Then Gave Free Exhibition of Aviating, Losing Game in Last
Inning--Many Spectacular Performances*

A tragic ending brought Davidson a hard defeat at the hands of the stalwart sons of the Agricultural and Mechanical College, Raleigh, by the score of 4 to 2 yesterday afternoon. The victory probably revolved around an accident that occurred to Catcher Mattison of Davidson in the latter half of the eighth when he suffered a severe laceration of his little finger and had to be replaced by Dunn. Big "Liz" Cashion had the phenom Farmers whiffing at almost everything that he dished out up to this time and his twirling bore every mark of the super-sensational until the ninth when, seeming to lose confidence in his catcher, the slabman went to smithereens and the opposing contingent scored four runs amid tumultuous applause. It was a hard dose for the big fellow and the gamesters from the Presbyterian colony who seemed to deserve the title all through the proceedings by reason of excellent defensive work and Cashion's triumphant twirling.

BAD WEATHER BUT GOOD GAME.

The game was unraveled in a period of exceedingly raw weather. Damp and dark and chill and cold, the day was not made for handling the sphere. The crowd was not large, only about 500 braving the fierceness of the elements to witness the cavortings of the youthful artists of the diamond. The grandstand, however, was lively. Rivalry continued among the adherents of the two teams. The boys shouted and uttered college yells throughout the entire procedure and when Cashion aviated in the ninth, the Farmers' friends gave forth an outburst of enthusiasm and applause that would rival Mt. Etna in one of its fretful moods. The crowd sympathized with the Presbyterians because of their plucky fighting and largely with Cashion because of the accident that probably robbed him of a gilt-edge victory over the big fellows from the capital city.

MANY BRILLIANT BURSTS.

The brilliant twirling of Cashion was not the only lustrous feature to the game. As a matter of fact Stafford was not falling far short of measuring to the doings of the

Davidsonian on the firing line, especially in the pinches where he was even more superior than Cashion. Both yielded the same number of hits, but Cashion's offerings were of such a variety that eleven Farmers ozonized under his reign. He was wilder than Stafford, but in all instances except the ninth frame, he was ready in extricating himself from threatening disaster. Speaking of the features, though, there was plenty of stuff uncorked to interest a crowd. When Tiny Graham raced back in center to a point not far distant from where the Bull Durham sign has been residing for a year and corraled one of the longest balls ever driven on the local grounds from the bat of Hartsell, capturing the thing with one hand on a dead run, there was something of an uproar in the stands. It was a neat and nifty piece of fielding, just about as sensational an execution as is worked out in one season. The ball looked good for the four sacks when it departed and Hartsell never stopped running until he had closed down on the counting-pan, so confident was he that the lick had gone beyond the grasp of the midget gardener in center.

BOOE AND HARTSELL SHINE.

Turning around very quickly and coming back to the infield, Booe and Hartsell at third and short, respectively, for Davidson and A & M, more respectively, seemed to be trying to rival each other in sensational productions. Booe covered three stiff grounders toward short in big league style and Hartsell at short for the Farmers was a tower of strength and then some. His work was of the incandescent kind that is seen only now and then in college baseball. He was up in the air one moment after something, sticking up one hand the next after a liner, cavorting in deep left for swats that seemed safe and going hither and thither just naturally eating things up. His activities were grand operatic.

DAVIDSON SCORES EARLY.

To approach detail more closely, Davidson opened up with a run in the first inning when Graham waited angrily for Stafford to shoot

four wild ones in the vicinity of his frail form. On a splendid sacrificial bunt, Kluttz was safe because of Williams' muff of Stafford's throw and Booe sent the two runners a notch higher by another excellent piece of bunting. Cashion shot a hard grounder to the infield and, on a fielder's choice, Graham registered.

It was not until the sixth that the Presbyterians possessed another open chance at the pot and they called the opportunity when with a couple cemeteried, Booe lifted a high one that fell unharmed in left field, shortly thereafter stealing second. Cashion brought him around with a sizzling double to right that was inclined to travel to the fence without molestation, the blow scoring Booe with an abundance of ease.

FARMERS LOSE FAITH.

Things rocked along uniformly for the Farmers for the first eight innings and without a chance to score. They seemed to lose faith in themselves and gain respect for Cashion's curves when they had passed through the seventh without a change in the balloting. Their efforts in the eighth looked like the last gasp of aggressive fighting, but when Dunn went back in the ninth to catch and evidenced the fact that he was inexperienced and unused to Cashion's terrific speed, the boys of the other faction appeared to revive their drooping spirits. It was a strange coincidence that in this inning when the game was won and lost that Cashion struck out three men, despite the fact that four runs were scored.

THE TRAGIC FINALE.

The bloody thing opened up with Hartsell at the bat. His first slug to center had kept the Davidson advocates ill at ease when he approached the plate. There was exultation when he whiffed at a trio. Robertson, the fiendish slugger and star of the team, fanned for his third time, but Dunn let the ball get away from him and he was safe at first. That was Cashion's undoing. He proceeded to hit Seifert and he then walked Ross. Not content with wild manipulations, he forced

in a run by taking a shot at the earthly tabernacle of Stafford and Tucker was substituted for Speer with the bases continuing in the same mood and disposition as many of the voters on the day of the primaries here last week. The utility hit a hot one to Cashion which was labeled a single and Seifert raced home with the score that congested traffic. Farmer fled to Kluttz on a high one, but Patton, who had been substituted for Brown in the eighth, singled in lovely fashion and scored a couple more. It was a pitiable story for the Presbyterians, an inning of general rejoicing for the Farmers. The curtain closed with victory and defeat apparent in the faces of the friends of the two teams that had watched the gladiatorial struggle.

The following is the box score:

A. & M.	AB	R	H	PO	A	E

Gritty Bucknell Defeated

A. & M. Makes a Touchdown and a Goal in First Quarter

FARMERS SCORE SIX TO GOOSE-EGG

In the presence of 2,500 interested and satisfied spectators yesterday afternoon at the A & M Athletic Field, the A & M eleven defeated the fast Bucknell University eleven by the score of 6 to 0. The victory was, to tell the truth, a bit of a surprise. Since the game of October 14, when the light but highly trained V. M. I. team beat A & M 6 to 5 in what A & M had looked forward to as a nice little practice game, A & M stock had gone down sharply. But A & M shares are up. While there were "stars" yesterday for A & M, the whole team played together very evenly and steadily, and also with unexpected snap and steam. Phillips was, according to the opinions of the experts, the star of the game. But special mention needs also to be made of some others—big Floyd at center, McIver, who played the game through at right guard with one eye closed and blind, and Anthony, who took Harris' place in the first quarter at fullback and played the position like a veteran; Seifert was also playing in his best manner, and Cool won favorable comment by his interference-running. Altogether, the team of October 19 made the team of October 14 look like a bunch of scrubs.

The team which A & M defeated yesterday had previously during the season defeated three teams: Lockhaven, September 28, 23 to 0; Lehigh University, October 6, 3 to 0; and Wyoming (Pennsylvania), on October 14, 22 to 0. It is worth noting that Lehigh University, which Bucknell defeated 3 to 0, held Princeton last week to a tie, 6 to 6.

For the visitors, the stars were Schmidt (center and captain), the two ends, Bartholomew and Jordan, and the fullback, "Tip" Topham, who did some very effective kicking. The team as a whole, though lighter than A & M, was fast and fiery, and unusually well balanced. A & M may have to meet heavier teams this year, but is not likely to meet one which plays football any harder.

THE FIRST QUARTER.

The game was won in the first quarter. After A & M kicked off, at 4:03 o'clock, Bucknell tried an ineffective scrimmage and

then punted. A & M thereupon sent Cool around right end for three yards, Robertson around left end for fifteen, and Cool through the line for five yards. The next two plays were better still. Harris, the 184-pound fullback, catapulted through the line for ten yards, and Robertson followed on the next down with a twenty-yard gain. After one more scrimmage, which netted A & M about two yards, a forward pass was tried, and then another—the latter with the result that Bucknell came into possession, about twenty yards from the Pennsylvania goal.

When Bucknell started on the long road to the A & M goal, it was with a gain of three yards, another of six, and another of enough to make the next scrimmage first down—all of this by "straight football." The next play by the Pennsylvanians was a fifteen-yard run around right end—and a fifteen-yard penalty for holding, which lost the visitors all they had gained by a beautiful end-run. Shortly afterwards, "Dutchy" Seifert and others broke up a Bucknell right-end run with an eight-yard loss on a first down. On the third down with fourteen yards to go, Bucknell did the obvious thing by punting.

Robertson received the punt, and went ten yards before anybody found it possible to stop him. And thereupon A & M went in to redeem all the glory lost at Lexington last week. Seifert pronounced a general benediction by slapping everybody, except the enemy, on the back. Then Anthony was sent through the line for two yards. An A & M fumble lost two yards on the second down, but on the third down Bucknell was penalized five yards for off-side play and A & M made yards. A & M followed this up with a three-yard gain through the line, a fumble most happily recovered, and then—a play which made a touchdown possible. A & M was quite evidently going to punt; but instead of what everybody expected, Robertson was sent through a beautiful big lane in the Bucknell line—for which credit must be given to the A & M right tackle and right guard and some others—for a gain of thirty yards. On the first down thereafter, Cool was sent

over the Bucknell goal line, near the southwest corner of the field. The ball was punted out to Cool and Hurtt kicked goal. Score, 6 to 0 in favor of A & M. In the remainder of the quarter, nothing more notable happened than a penalty of fifteen yards assessed against A & M for holding.

In the second quarter A & M was in very serious danger. A & M found it necessary to punt three times, not with much hope of getting the play into Pennsylvania territory, but in order to save the Red and White from imminent danger. Bucknell employed a cross-play, three punts and three forward passes. Each side did some spectacular fumbling, but the honors for both fumbling and ground-gaining were with the Pennsylvanians. When the quarter ended the ball was in A & M territory, about twenty yards from the Carolina goal.

THE INTERIM AND THE ROOTERS.

As there were no sailors and no goats present the A & M boys had to do their stunt with a beribboned dog named Tige, at the head of their procession. The Battalion Band marched over the field of combat, with banners and martial music. The impressario was Dick Mullen, and his baton was a red and white paper parasol from the Great State Fair. After a concert of yells and military music the Rooters' Club dropped into convict file and marched through the gate to mingle with the crowd.

THE THIRD QUARTER.

At the beginning of the second half Hartsell went in as left halfback, while Cool was shifted to Robertson's position, Robertson being now on the sidelines. But after a few minutes Robertson was returned to his old position and Hartsell, who is not now in condition to play for long at a time, saw the game from the outside.

The features of the quarter were a thirty-yard run by Cool around right end, for A & M, a magnificent twenty-yard run by Seifert, who received a punt and came near getting by with it, and a drop kick for goal by Hurtt for A & M from the twenty-five yard line. This drop kick came so near

succeeding that a considerable part of the crowd thought A & M had scored three more points. But the score was still A & M, 6; Bucknell, 0.

THE FOURTH QUARTER.

The last quarter was not at all lacking in interest. After a succession of indecisive plays, A & M had to punt. When the ball was finally downed, the Johnny on the spot being the ubiquitous Phillips, it was within a yard or so of the Bucknell goal. A punt to A & M was of course necessary; and fortunately for Bucknell, it was managed well enough to take it some forty yards up the field. The next critical moment came when Bucknell tried an outside kick. It was hard for anybody to keep up with all the things the ball did in the next five seconds. It acted like a will o' the wisp, evading the grasp often enough to make five or six persons, or the same persons often enough to make five or six times. In any case, it cheerfully frisked along to within twenty yards of the A & M goal. Then Bucknell tried a forward pass, a trick which the Pennsylvanians had been using with considerable success. It was a situation which made everybody sit up and take notice. The forward pass failed, the ball falling into the possession of the A & M left halfback, Cool, who froze on to it for all he was worth. Time was called before anything more happened. When the game ended, the ball was some forty-five yards from the A & M goal.

The line-up and summary follow:

BUCKNELL—Bartholomew, right end; Dunkle, right tackle; Tenner, right guard; Schmidt (captain), center; Richardson, left guard; Hern, left tackle; Jordan, left end; Cruikshank, quarterback; Keiser, left halfback; Topham ("Tip"), fullback; Gadnie, right halfback.

A & M—Seifert, right end; Dunn, right tackle; Melver, right guard; Floyd, center; Sykes, left guard; Hurtt, left tackle; Phillips, left end; Stafford (captain), quarterback; Robertson, Cool, right halfback; Harris, Anthony, fullback; Cool, Hartsell, left halfback.

Score, A & M, 6; Bucknell, 0.

Touchdown, by Cool. Goal, by Cool.

Officials: Mr. Gass, of Lehigh University, referee; Mr. Jackson, of Baltimore City College, umpire; Mr. McNutt, of Ohio State University, field judge; Mr. Thompson, of A & M, head linesman.

Time of quarters, 10 minutes each.

Attendance, 2,500.

Songs and Yells

TUNE: "You're a Grand Old Flag."

You're a Grand Old Team,
You're the lads with the steam;
You're the boys who are tried, true and brave.
Every team you meet goes down to defeat,
So, Virginia, it's you for the grave!
When our backs brave and bold
In your line tear a hole,
It's then we will yell and scream;
If A & M sand and grit will count,
Keep your eyes on the Grand Old Team!

The Red and White, '11-'12

This year the *Red and White* has changed hands, being now edited by the literary societies. Therefore it has been the object of the editors to have the magazine more full in a literary sense. Of course, the technical side still predominates, inasmuch as the magazine represents a technical college, but the intention has been to branch out more in the literary direction. We hope we have done so. At the same time the departments have been kept up as before and the athletic department has been as full as, if not fuller than, before.

The critics have been uniformly kind to the *Red and White* this year, and we hope that this shows that we have, at least partly, accomplished our object. Therefore the editors of the magazine will take up their work next year with renewed vigor, hoping to improve all the time until the magazine attains the end now only a vision in the minds of the editors, when it will fully represent the college in all its branches, and when it will also represent the students fully, and then it can not help but be the standard of college magazines in the South.

The Wau Gau Rac

Origin, Name, Purpose

Almost every college or university of reasonable importance supports a weekly newspaper or a daily. In the mind of one single man, last year, this fact was making a strong impression. He thought that if other institutions were able to have papers, A & M ought not to be left behind. There is due to this man alone the existence of our present paper, the *Wau Gau Rac*. This was none other than A. T. Bowler. His ideas were encouraged by H. P. Whitted and T. W. Thorne, who were then on the editorial staff of the *Red and White* magazine. The proposition was put before the Athletic Association, advising that a weekly paper should become its official organ. The proposal was accepted favoring the weekly newspaper, for the first time in the history of the college.

Next came the question of name. Several were suggested, but finally the present name was decided upon, it being taken from the most popular college yell.

The purpose of the paper is to sum up the happenings around and in college as they occur in the week, and to put them in printed form for the students and alumni. It acts as a record in which are kept accounts of all athletic events from time to time.

For You—Just You

You said we would forget, dear heart;
That we'd say "Good-bye," and go our ways,
Leading us straying far apart;
And we'd have no memory of yesterdays—
'Twas easy, it seemed, the resolve to make;
'Twas hard, I grant, the resolve to keep,
For memory, soon or late, will wake
Keen as it was when it went to sleep.

I thought I had triumphed. Your step, your face—
I dreamed I had put them behind. At last
Your image had lost its place—
Forgotten the hours of the tender past,
But suddenly today, 'mid the hurrying throng,
The careless, joyous one lost to view,
Were whistled the notes of an old sweet song,
And straight I was crying for you—just you.

And it all came back! How strange, how strange,
That no matter how hard we try and try,
A love once given, through stress and change
Lives on forever and will not die.
A face in the crowd, a voice half heard—
The poise of the head, or a well known strain—
A laugh, a jest, or subtle word,
And years of forgetting have been in vain.

L. T., '13.

Fraternities

Fraternity

The word fraternity is one, perhaps, that has as broad a meaning as any word in the language, and it is one that has been applicable to the relations of man since time began.

As the word fraternity is here used it means the joining together of a number of men, united by common ideals and aspirations. Membership is not based, as some have said, on the ability of a man to dress or to spend money. There have been cases where men not members of fraternities may, perhaps, have had some grounds for believing that a large pocketbook was the prime and only prerequisite for membership, but such has never been the case at A & M.

There has never been a line of demarcation between fraternity and non-fraternity men at A & M until this year, and then only to a slight degree. This is so because of the fact that some who are not fraternity men have gathered distorted ideas from the policy pursued by some fraternities at other colleges. At A & M the best of feeling has always existed between the two elements because of the high character of the men who have been members of the several fraternities represented here, and because of their spirit of fairness and manifest democracy.

Founded as they are upon the very highest principles, fraternities exert a powerful influence on their members to bring out the best that is in them, both during their college careers and in after life, and that their teachings are wholesome and beneficial is evidenced by the phenomenal growth of the college secret orders since their introduction into American college life, and that they will continue to develop and expand is but a natural result of an institution that has such a large number of high minded, influential men as its zealous supporters.

Alpha Zeta

NORTH CAROLINA CHAPTER

The Fraternity of Alpha Zeta is designed to bring together those who are committed to higher education in Agriculture. Its aim is to promote good scholarship, good fellowship, and good citizenship. Its object, to induce through the strong tie of brotherly friendship and the stimulus of science, a steady advance in the great art of Agriculture.

Since it was founded, at the Ohio State University, January 10, 1898, the Fraternity of Alpha Zeta has been a signal success. There are now twenty chapters in as many colleges and universities of the country. The high standard of the Fraternity is manifested by the scores of its members who, in State and Nation, are reflecting credit on Alpha Zeta in general. To have been admitted to the Fraternity of Alpha Zeta is the greatest honor that a student of Agriculture can win while in college.

The North Carolina Chapter of Alpha Zeta was installed in the North Carolina College of Agriculture and Mechanic Arts in 1903, and is the only chapter in any Southern institution. The chapter is at present in every way a credit to the general fraternity. The members have a high average in scholarship and are leaders in the various college activities.

The Battalion Cotillion Club

A new and very popular club has been formed in the college this year. This is the Battalion Cotillion Club. It is practically under the management of the Senior officers, and any drilling member of the Battalion is eligible to membership. One of the most attractive features of this organization is the requirement that all the cadets must dance in full-dress uniform. The students have shown a great interest in it so far and next year, when it is on a firmer basis, the club should prove to be one of the best organizations for social purposes on the "Hill."

Bi-Ag Society

The Bi-Ag Society is strictly an A & M product. It is unique both in name and home. The Society was organized largely through the efforts of Dr. and Mrs. Stevens, and up until the time they left, the meetings were held at their home. Now they are held alternately at the homes of Professors Sherwin, Jeffrey, Roberts, Wilson, Pillsbury, and McNutt.

Active membership is limited to twelve, who are chosen from the Junior and Senior Classes, for their scholarship and high character.

The object of the Bi-Ag Society is the development of high scholarship, morality, sociability, and such attributes as go to the building up of a true man. There comes, from its atmosphere of culture and refinement, a broader knowledge and an intensified interest in Agriculture. The Society strives to develop a higher agricultural interest in North Carolina and the spirit of original investigation is fostered. Its members are winning distinction in various parts of the country as leaders in many lines of both scientific research and practical demonstration.

It is the hope and desire of every member that the high standard of the Society will ever be maintained, and that to be elected into the Society will always be the highest honor to be obtained by an agricultural student in this college.

The Biological Club

The Biological Club is the largest Agricultural Student organization in college. Its meetings are held on alternate Wednesday nights with its sister club, the Rural Science Club, in the Agriculture Hall. The purpose of the Club is to train men to master subjects and then to present them in an intelligent manner to an audience. The Club not only has general essay discussions, talks by members of the Faculty; but it also has three features of special interest.

First, Dr. F. L. Stevens gives five dollars as a prize to the one who scores the highest total number of points in presenting the best discussions on agricultural subjects; second, the Club offers a prize to the one who scores the highest in presenting personal observations before the Club; and third, the "Biological Club Reception" which is usually a success, due in a large measure to the kind assistance rendered by the ladies in West Raleigh. The girls from the colleges of Raleigh and a number of the city girls are invited to the receptions, making these events worth remembering.

The Mechanical Society

The Mechanical Society was organized in 1907, and is composed of Juniors and Seniors in the course of Mechanical Engineering. It is for the purpose of giving these students practice in preparing and delivering papers on live subjects in the mechanical world. It encourages original research and reveals to the students the value of the technical articles that appear in various magazines, to some of which the Society subscribes. Access to others may be had at the college library. The Society also aims to develop the literary side of the mechanical students, which side is generally neglected because the student fails to grasp the important part it plays in his work.

Added interest is given to the Society in lectures, some of them illustrated, by professors and prominent men from the college and from Raleigh. Professor Satterfield, the head of the Mechanical Department, especially takes a great interest in the Society. He is an indefatigable worker and his work is one of the main things that has made the Society the success it has proved to be.

The Parable of the Strong Young Man

1. Now it came to pass that to the wife of John Henry, in the land of Farm, there was born a man child.

2. And the child grew up exceedingly strong of body and swift of foot, so that there was none who could compare with him.

3. And they called him Big-Bill, which being interpreted meaneth "The Strong Young Man."

4. Now when Big-Bill grew up, his father spake unto him saying:

5. Gird up thy loins, my son, and go thee to the land of Wake, even to the college of Agriculture which is in West Raleigh, and there acquire knowledge so that thou mayest till the ground with wisdom, and reap harvests in abundance, and enjoy the fulness of the earth.

6. And the Strong Young Man did as his father had commanded, and entered the college even as a freshman.

7. And lo! the Strong Young Man learned many things, not the least of which was to kick the skin of a pig with mighty force so that his fame went abroad throughout the land.

8. Now it came to pass that each year eleven chosen men went forth from the land of Fruit to do battle with eleven strong men from the land of the Virginianites.

9. But on the day of the feast of Thanksgiving the eleven from the North overcame them and smote them hip and thigh.

10. And the ruler of that land was sorely grieved and refused to be comforted.

11. But one of the king's wise men, of the tribe of High-Brows, spake unto him saying:

12. What profiteth it us, Oh! King, to possess gray matter if we use it not to confuse our enemies? Lo! I have a scheme.

13. And the king was wroth, and answered him saying: Go bust thyself, thou and thy scheme, and come not into my presence again until thou canst deliver the goods.

14. Then the wise man departed and journeyed to the land of Wake, and sought out the Strong Young Man, and spake unto him these words:

15. Verily, our enemies prevail against us and there is no help for us; come thou and do battle by our side, that we may for once rejoice in our hearts and shout the song of victory, and that our women may sing in gladness.

16. But Big-Bill, the son of John Henry, answered him, "Nay! not! nit! no."

17. And the High-Brow went away sorrowfully.

18. But that night while he slept, he dreamed a dream, even a vision of inspiration; and early on the morrow he went unto the Strong Young Man and saith unto him:

19. Know thou that at Podunk, at the celebration of the fourth day of the month of July, there will be held a canine contest in which two lowly curs will do battle against each other. Referee thou this dog fight and I will give thee gold, much fine gold, that thou mayest go to the land of Fruit for wisdom, and there play the game of football, even as an amateur.

20. But Big-Bill answered him, saying: Verily I know not the regulations governing such a battle. Am I acquainted with the Marquis of Queensbury's rules? Or have I ever attended a suffragette meeting?

21. Then the wise man answered: In truth thou speaketh foolishly and without reason. Can a dog reproach thee for un-

fairness, or a dead mongrel bite thy shank for a yellow decision?

22. Then Big-Bill, the son of John Henry, spoke unto the High-Brow, saying: Lo! I am with thee even to the end of the foot-ball season.

23. Then did he forget the words of his parents, and follow after strange gods whom his fathers wot not of.

24. And he went up into the land of Fruit and did many deeds of valor; and all the people round about spoke of him with one voice saying: Great is Big-Bill, the son of John Henry.

25. Now there was another young man who strove mightily to make the team; but as he had never refereed a dog fight, he made the team—not. And verily to this day he knoweth not that he rubbed against a shell game.

26. Now it came to pass that the courage of the men from the land of Fruit waxed

great. And they again went forth against their enemies from the North.

27. But when the battle began, the Virginianites rushed violently over them and overthrew them and trampled them in the dust.

28. And as they returned to their own tents sore and bruised, wicked children gathered together and mocked them, crying "Tee, hee, verily the land of Orange produces lemons."

29. And Big-Bill lifted up his eyes and looked towards the sea, even towards the city where great ships lie at anchor.

30. And he beheld the sky a lurid red even as the town itself was painted.

31. And when he heard a deep sound coming therefrom, like unto the roaring of many bulls, he knew that his former countrymen had taken another city.

32. And he sat himself upon the ground and wept bitterly.

ERROR'S NOTE.—This chapter was found by the AGONOTYCK Archaeologist during the recent excavation made by him in the ruins of ancient Babylon. It is thought to be the work of the prophet Zimri, who lived about 1243 B. C.

The Honor System

The honor system is an institution in college life, the possession of which places a college on the very highest plane, and is a very valuable distinguishing mark between the college with the system and the college that is without its benefits. It is unquestionably the institution in a man's college life which, supported by the students, has the most far reaching influence on their lives after they leave the walls of their Alma Mater. There is no alumnus but who feels a higher regard for his first love when he knows that the students of his old college are supporting an institution which means so much to each individual student during and after his college days.

The honor system at A & M is yet in its infancy, being but one year old, but it has already shown that it is an infant with the greatest possibilities, and is steadily gaining the earnest support of the students who realize its power to bring out all that is best in a man and to keep him in the right path.

Showing plowed ground with rich subsoil unused

Same ground after subsoil has been dynamited

DOUBLE THE FERTILITY OF YOUR FARM

By Breaking up the Rich Subsoil

WITH

RED CROSS DYNAMITE

Ordinary plowing turns over the same shallow top-soil year after year, forming a hard and nearly impervious "plow sole" that limits the waterholding capacity of the land and shuts out **tons per acre** of natural plant food.

Dynamiting the subsoil makes this plant food available, aerates the soil, protects vegetation against both drouth and excess rainfall, and soon repays its cost in **saving of fertilizer expense** and **largely increased yields**.

Write for Free Booklet

To learn how progressive farmers are using dynamite for removing stumps and boulders, planting and cultivating fruit trees, regenerating barren soil, ditching, draining, excavating, and road-making. Write now for Free Booklet—"Farming with Dynamite, No.

NOTHING ON BUT SKIN

When men wore the skins of animals there were differences in quality. The desire to have as good clothing as the other fellow still prevails. You can get the better kind at MURRAY'S.

ROUP in your chicken-yard means loss of money. Don't delay—separate the sick birds from the well and get a package of

Pratts. ROUP CURE

Give it to all the fowls and you will soon have a healthy, productive flock. Nothing can compare with Pratts Roup Cure in promptness and positiveness. If you are in the poultry business for money, you cannot afford to be without it. Cures Roup, Colds, Canker, Catarrh and Diphtheria.

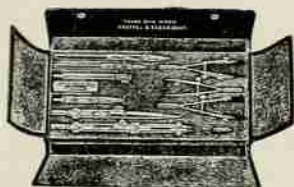

The regular, daily use of Pratts Roup Cure will positively prevent Roup from attacking your flock.

Ask your dealer for Pratts Roup Cure. If he cannot supply you send us his name and 25cts. and we will forward a package, prepaid.

Send for Pratts New Poultry Book, Free.
