YOU OWE IT TO YOURSELF AND FAMILY

There is at work in the home building field a ferment of ideas that is making folks impatient to enjoy the many comforts which are now possible in newly and modernly constructed homes. A great many old houses are being successfully remodeled; but in most cases it is more economical to buy or build a new home.

The design, arrangement and equipment of the home is of very great importance, but next to these is the location. The new home in the newer part of town is what is really wanted.

In this age of advancement you are not satisfied to live in a house which is not modernly equipped. Many of the new homes are not as large as the old; but they possess far greater comfort and liveableness and require very much less housekeeping labor.

"Forest Hills offers broad homesites amid ideal surroundings at very low prices. We will finance your home and furnish beautiful sketches and floor plans of modern homes without extra cost to you. Good soil, good drainage, trees and shrubbery are essentials you cannot afford to overlook. We have all the essentials in Forest Hills which will add to the appearance, the peace and contentment of the home."

We are ready at all times to assist you in owning a new home -- one properly located to suit your desire.

See us before you buy.

Very truly yours,

W. A. McGIRT, Manager.
