East Greenwich, Rhode Island

Wm. D. Clifford
611 Kensington St.
Lakeland, Florida

TO HELP YOU ORGANIZE YOUR WATER SKIING CLUB . . .

we invite you to make full use of the bylaws and suggestions in the enclosed "Plans for Organization" booklet. This has already served as the starting point for many other flourishing clubs. Yours can be fully as successful--perhaps even more!

There are as many more things a club can accomplish than so many individuals working and playing separately. Also, much additional progress comes when clubs cooperate with each other. It's just the age-old story of the power of concerted action.

Once you've had your organization meeting, your club will be well on its way. Affiliation with the American Water Ski Association will enable your members to make local use of our national services. Among these are distribution of educational pamphlets on water skiing, course layouts, ramps and tournaments, publication of THE WATER SKIER magazine, promotion of better boating facilities and legislation, and low-cost insurance. We cooperate nationally with other groups such as the Red Cross to foster greater boating and skiing safety. We are the national clearing house for water skiers wherever they may be located.

We welcome your club affiliation to make it an integral part of our national skiing fraternity. Write us the results of your organization meeting so that we can help further in whatever way is possible.

Cordially yours,

Guy W. Hughes
Executive Director
