COLLEGE OFFICIALS ENTER NEW OFFICES IN HOLLADAY HALL

Remodeling Begun Dur- ing Fall of 1928

BUILDING MATERIALS FROM NORTH CAROLINA

All Remodeling on New Building Done by North Carolina State College With Money Appropriated by Last Session of the General Assembly.

Work of remodeling Holladay Hall has been completed, the end sections of 1911 Dormitory have been interiorly renovated, and minor repairs made on Fifth, Sixth, and South dormitories during the summer vacation period. More than \$80,000 has been spent in improving college buildings during the past year, \$30,000 of which was spent during the summer on the end sections of 1911.

Holladay Hall, work on which was begun about a year ago, has been remodeled into an attractive and appropriate administration building at a cost of \$50,000. New floors have been laid, new stairways built, old windows and doors replaced, and the walls replastered in this building. By being the first building on the campus to wear the N. C. S. monogram, Holladay Hall reiterates its honor of being the first building erected at State College. The monogram, carved from Sanford red stone, is at the top of the newly built red stone entrance.

The college officials have already moved from Peele Hall into their new offices in the Administration Building. A Philippine mahogany floor in Dr. Brooks' office, held down with wooden pegs instead of nails, adds quaintness and individuality to the college president's office. The doors to his office are also of mahogany from the Philippine Islands.

Interiorly both end sections of 1911 Dormitory have been entirely renovated. Immediately after the close of the third term last spring work was begun on this building and continued throughout the summer, only to be halted by the resumption of school. New floors have been laid, new doors hung, and the stairways replaced in this dormitory. The walls have been papered, with nearly every room having a different design wallpaper. Hot and cold water has been put in every room, and bathrooms have been built on every floor. Large closets, wired for electric lights, are in every room. The floors and walls in Fifth and Sixth dormitories have been repaired and repainted during the summer. The leaky tile in the bathrooms of South have been repaired, and the long needed sidewalk and driveway to the gymnasium is now under construction.

CO-EDS RUSH STUDENT SUPPLY STORE TO BUY FIRST FRESHMAN CAPS

Their registration completed, five hundred co-eds tripped into the Student Supply Store yesterday afternoon, planked down seventy-five cents each, and marched out wearing their newly purchased freshman caps set at a cocky angle. They were the first co-eds to buy caps for this year, and with the exception of Ada Spenser, Class of '30, are the only co-eds to buy the little red lids. Trade was temporarily suspended in the store during the selection and purchase of the caps. The lazy smiles of the interested onlookers spread into broad grins as the girls tried and retired the caps to be sure of a fit before making the purchase. As the dainty misses went chattering out of the building, proudly wearing their newly bought headgear, observing freshmen seemed to see new beauty and take added pride in their own red caps.

COLLEGE PRESIDENT

DR. E. C. BROOKS

R.O.T.C. Commander Promoted to Rank of Lieutenant Colonel

Lieutenant Colonel Clifford Cabell Early, formerly known as "Major," to old State College students, received his lieutenant colonelship August 8, 1929. Major Early was directed to report for duty at State College in the summer of 1925, and has been in command of the R.O.T.C. unit here ever since.

His tour was for four years only, but due to the splendid progress that was made in the military department, President Brooks requested that he be allowed to stay a year longer, and the request was granted. At the present time, under the leadership of Colonel Early, the State College R.O.T.C. unit is recognized as one of the best in the South.

SIX STATES REPRESENTED IN THE CERAMIC SCHOOL

Rapid Rise in Industry's Popu- larity Due Largely to Work of Graduates

Five states, in addition to North Carolina, are represented among the students of the Department of Ceramic Engineering. Connecticut, Georgia, and Pennsylvania each having one and Illinois and South Carolina two representatives.

The growing popularity of this department at State College in outside states is due, according to Professor A. F. Greaves-Walker, to the rapid rise to executive positions in the ceramic industries made by the graduates of the department and to the success he has had in placing students in remunerative and instructive summer jobs.

In addition to the number of students who were located in summer jobs in this State, three spent the summer in plants in Ohio, four in Pennsylvania, two in Connecticut, one in New Jersey, and one in Kentucky. The industries in which these men received training were: sheet steel, enameling, wall and floor tile, scientific instruments, architectural terracotta, face brick, sewer pipe, dinner ware and ceramic machinery.

Brooks and Choplin Extend Welcome To Freshman Class

By DR. E. C. BROOKS
President of State College

State College extends a cordial welcome to the new students entering this institution. The president, the deans, and the members of the faculty will always be willing to meet and to advise with the new men about courses of study, their professional aims, and other matters pertaining to college life, and frequent interviews, especially with the deans, will be very helpful in getting the right start in college.

Students are especially urged to begin their college year with a serious purpose. It is necessary for each to enlarge his knowledge of his chosen vocation if he expects to increase his capacity for useful work, and this broader knowledge can only come through study. It is even more desirable that students form habits of conduct that will commend them to the public. A young man, to succeed in a permanent way, must be reliable and trustworthy, and these qualities are acquired through habits formed in the daily routine.

In extending this welcome, therefore, to the students for the year 1928-'29, I am urging them especially to begin now to enlarge their equipment for usefulness by a proper application to their college duties, to increase daily their capacity for true friendship through the right kind of associations, and to strengthen their fidelity to duty by adhering at all times to fundamental principles of good citizenship, which are always in harmony with the aims of a gentleman and the ideals of a Christian.

By J. P. CHOPLIN
President Student Government

On behalf of the student body I wish to extend a hearty welcome to the Class of '33. Each year new men come to State College to take the place of men who have gone on to other work. It gives me great pleasure to see new men come to State College with high ideals and ambitions, and I sincerely wish each man great success in materializing these ideals and ambitions.

The loneliest of all lonely places is in a crowd without a friend. So, Freshmen, make friends first of all. You have no enemies here. Introduce yourself to any one you may see. He may be looking for a friend, too. When you see a "red cap," meet the freshman under it. He has the same feeling that you have, so mix these feelings and enjoy the friendship of your fellow students.

You are not entering a new life, but you are having a new experience of the same life. College men must live a natural life in order to be happy and in order to accomplish their purpose. And the quicker a college student settles down to his task the more successful he will be. Do not think of college as "four years" of preparation for "life," but as "four years of life at college" in order to live a bigger life.

You have now entered a new community; adjust yourself to it and to your work and you will soon learn to love State College and to think of it as your home.

I wish each of you great success while at N. C. State College.

FRESHMAN CLASS HOLDS MEETING SEPTEMBER 19

Dean E. L. Cloyd Initiates New Men Into Campus Mysteries; Refreshments Served

State's new crop of freshmen, the class of thirty-three, held its first meeting Thursday night in Pullen Hall, Dean E. L. Cloyd presiding. The meeting was called for the purpose of initiating the frosh into the more elementary mysteries of campus.

The new men assembled immediately after the evening meal, and Dean Cloyd wasted no time in getting started. He confined the major part of his remarks to an explanation of the registration pending the following morning. When the dean had finished, Bill Garibaldi, Demon cheer leader, arose and produced from the throats of the frosh the first Wolfpack yell of the season. After some more of that the frosh retired to the Y for refreshments. One feature of the meeting was music rendered by a "washboard" orchestra, brought to the campus by Ed King of the Y.

PHI BETA KAPPA TAKES TWENTY-EIGHT NEW MEN

Gordon Gray, Winston-Salem Boys, Leads List With Aver- age of 97.29

Twenty-eight University of North Carolina students were formally initiated last spring into Phi Beta Kappa, national honorary scholastic fraternity, for high scholastic averages maintained over a period of three or more years.

The honor was conferred on 19 juniors and 9 seniors. Students must have an average of B (95.5 per cent or better) on all courses to be eligible in their junior or senior years, and the honor is considered one of the highest that can come to a student.

Gordon Gray, Winston-Salem junior, led the list with a three-year average of 97.29 on all courses, and automatically becomes president of the society for next year. William J. Adams, Jr., of Carthage, was second with 96.48, and automatically becomes vice-president.

Y. M. C. A. Student Members Acquaint Frosh With College

The Y. M. C. A.'s welcome committee Thursday put into effect its plans for handling the incoming freshmen here as planned last fall.

At least eight hundred new students arrived at old State and were piloted directly to rooms or were helped directly by the committee. The new men came by rail, bus, and car, the majority of them coming in during the afternoon.

Not only did the "Y" attend to those rooming on the campus, but also, through the efforts of E. S. King, secretary, and J. E. Moore, ex-president of the "Y," established and conducted a bureau for obtaining rooms in town for those men who could not get into the dormitories. By the late afternoon everything was flowing along smoothly with the freshmen making the "Y" their temporary headquarters.

Thirty of State's upperclassmen arrived on the campus between Tuesday morning and Wednesday evening for the purpose of receiving the new freshman class. They were the Y. M. C. A.'s welcome committee, which each year assembles to guide the trembling frosh over the rough spots of securing rooms and fighting off homesickness. After arriving, the committee assembled Thursday evening at Powell's Cabin for the pur-

pose of organizing. The meeting was more or less informal, and business soon got under way.

First came a light supper prepared by Carolina's foremost amateur chef, Dean E. L. Cloyd, of N. C. State. E. W. Buchanan, "Y" president, then urged every one present to strive to surpass the enviable record of the committee of the previous year in the matter of aiding the freshmen. Dr. E. C. Brooks, president of State, delivered an informal address praising the work of the "Y" in years past and holding forth hopes of even greater success this year. Several of the men present from the previous year's committee remarked on the greater number of volunteers on this year's committee.

Dr. John Powell, traveling secretary of the Presbyterian Church, invoked a blessing on the assemblage. Rev. Joe Walker gave a brief talk on his own freshman experiences. E. S. King, "Y" secretary at State, urged the committee to greater efforts this year.

It was decided to assign the various committees to their respective posts on the following morning, Thursday. Henry Brock, chairman of the committee, expects to be able to meet all emergencies with large groups of volunteers.

Largest Freshman Class In History For Registration

STUDENT BODY PRESIDENT

J. P. CHOPLIN

College Faculty Hold Their First Meeting; Dr. Brooks Presides

The first meeting this year of the North Carolina State College Faculty was held Thursday afternoon, with Dr. E. C. Brooks, president, presiding. The plan of registration was explained to the faculty, and the organization was perfected to better accommodate the large number of new men this year.

At the first faculty meeting President Brooks discussed the educational objectives of the several schools, emphasizing the need of keeping these aims clear and definite, so that when a student graduates from State College he may be transferred readily into the profession he has chosen to follow.

"The fact that our graduates easily adjust themselves to their chosen professions speaks well for the work of the deans, the heads of the departments, and the teachers, who keep abreast of our industrial and social progress, and are thereby able to give proper direction to the students while in college," said Dr. Brooks.

The president stressed the necessity for the faculty to study carefully the curricula and instruction in the several schools, in order to be assured

ORGANIZATION OF CLASSES IN EXTENSION DIVISION

Librarian Gives Information Concerning Prospects; Last Year's Record Good

With a record last year of more than doubling the enrollment of the previous year, the Extension Department of North Carolina State College has already begun the organization of its classes throughout the county. For the past week E. W. Ruggles, assistant director of extension, has been working in Craven and Jones counties, with favorable results.

"The prospects this year are even better than last year," said Frank Capps, director, "and we hope to make it the best yet."

The courses that are taught by the Extension are the same as those taught on the campus, and are usually by the heads of the departments. Each of the courses is given one night a week, with the teachers motoring from here to meet their classes.

Among the courses that will be offered this year are English, Journalism, Psychology, Sociology, Modern Languages, and History.

Some of the men who will teach these courses are Professors Leifer, Garrison, Showalter, Hinkle, Paget, Robertson, Ladu, Boshart, Anderson, Winston, and Armstrong.

The classes in Raleigh have not been started yet, but they will be begun next week. Most of these classes are held downtown in one of the public buildings, and are made up mostly of teachers who want to get college credit.

New Men Arrive Thurs- day, With Friday As Registration Day

FUTURE ENGINEERS LEAD WITH THREE HUNDRED

School of Science and Business Comes Second, With School of Agriculture Running Third—Other Schools Enroll Remainder of the Eight Hundred New Men—Upperclassmen Are Expected to Register Between 850 and 1,100.

Six hundred brilliant red caps, crowning 600 hopeful entrants into the realm of college life, have made their appearance on the campus. A proud smile beams on most of the wearers of the authorized freshman caps as the knowing ones understand that instead of a stigma these little caps are marks of distinction—placed only on 600 sons of North Carolina and sister states.

"Pap" Riddick's Engineering School is the choice of the incoming freshman class, 309 men having registered in the technical field. In this school, Electrical takes a far lead by claiming 94 new students, while Mechanical follows with 50. Seven lofty-minded new students have joined the new school of Aeronautics. With no new students enrolled at the present time, Highway Engineering seems to be the dark horse of the engineering field.

With a total enrollment of 110, the School of Science and Business proves itself second choice of the new men. Most of these aspiring boys seem intent on being powerful figures on Wall Street and the business world, for 99, or all but 11, are registered for Business Administration. Four new students are registered for Industrial Management; Science wins five fol-

MORE WOMEN APPEAR ON COLLEGE CAMPUS; TOTAL THIRTY-FOUR

Lads who yell "Woman on the campus" every time they see a skirt and a pair of hose will either cease to yell or suffer from hoarseness this winter, for 34 captivating smiles and as many "wind-blown" skirts will grace the campus this year.

Of these thirty-four, twenty-two will be new faces on the campus. The remaining twelve will just be re-painted.

Twenty of these co-eds are Raleigh girls, and all but one are natives of this State. One young lady from the blasty heights of New Jersey makes her debut in our midst.

Twenty-four pre-registration cards show that as many co-eds have chosen teaching as their profession. Scientific and business interests claim the attention of the other ten.

Although none of the co-eds are registered in the Graduate School, it's a safe bet that some of them will win their "Mrs." before commencement rolls around.

DECLINE IN TEMPERATURE CAUSES FROSH TO SHIVER BENEATH MEAGER COVER

Many freshmen got the impression Thursday night that college life was not so hot after all, as the unseasonable drop in the temperature pulled the mercury down to as low as 44 degree, as they shivered and shook under such meager bed clothing as could be brought in hand bags. Because of the cold snap no trouble has been experienced in preventing the new men from going up street minus the conventional coat and tie. The weather bureau promises a rise in temperature this week.

Governor Views Techs' Workout

Thursday evening the Wolfpack was visited by Governor O. Max Gardner, who is a former captain of the pack, who spent some time in talking to Captain John Lepo of the State team, after which he adjourned to the sidelines to watch the practice.

Tech alumni, scattered around the field, got a big kick out of the Governor's visit, as did the football squad. Governor Gardner, a lineman himself, captained the 1902 football team at "Old A. and M.," as State was then called. He was graduated at State College in the class of 1903.

On Thursday the Wolfpack ended its thirteenth day of practice, and, to show that there is nothing unlucky in the symbol, Coach Tebell and his assistants sent their charges through one of the toughest scrimmages of the pre-season campaign. The provisional varsity failed to gain consistently through a stubborn reserve defense, but, although the offense failed to click smoothly, the work of the squad as a whole shows clearly that it is coming along.

The line still offers a big problem for the Tech staff. Al Vann, tackle guard, who is now playing tackle, seems to be the best bet as a running mate for Captain Lepo. The big boy is green in the position, but he is a willing worker. In all probability he will start at tackle in the opening game against Washington and Lee.

The guard positions are still uncertain, with Mack Stout and Boyd Smathers apparently favored to start hostilities. At center, Gardner and Choplin are making the best showing of the pivot men. Both are holdovers from the reserves.

Jakie Jordan, letter end, scrimmaged Thursday for the first time this season. He grabbed a couple of heaves for touchdowns, and looked good on the defense.

Largest Freshman Class In History for Registration

(Continued from page 1)
lowers, and two are registered in Social Science.

The School of Agriculture proves a close runner-up with 105 new students enrolled. General Agriculture leads in this field with 65, over half of the students registered. The School of Forestry, opening here for the first time, proves its popularity by being second in the Agriculture School with 21 new students. Agri-

culture Specialist is third choice of the new men with 10 students. Agriculture Economics follows with 7, and Landscape Gardening brings up the rear with two freshmen enrolled.

The School of Education has the next berth with a total enrollment of 55 freshman students. Of these, 32 are registered for Agriculture Education and 22 for High School Teaching. The remaining two new students are registered, one each, in Industrial Arts and Commercial Subjects.

Regardless of existing labor conditions, the Textile School has been the choice of 58 new men, 43 of whom are registered in Textile Manufacturing, with the remaining 15 taking Chemistry and Dyeing.

About 1,100 old men are eligible to resume their work this fall. It is not known yet how many will take advantage of this privilege, but a fair estimate should be at least 850 men. Upperclassmen register on the 24th.

CHANCES IN NEW SCHOOL APPEAR GOOD, AS SHOWN BY WORK OF DENVER BOY

A scholarship to Guggenheim school of aeronautics, New York University, valued at \$1,000, is the reward won by Paul C. Speiss, Denver, Colo., in the Eaglerock awards competition sponsored by the Alexander Aircraft Company among undergraduate college students throughout the United States.

Speiss submitted four papers on "Eight Above-Ground Altimeters." They included calculations and experimental problems resulting from his study of the subject. He was a freshman at the University of Colorado last year and as honor student.

After Speiss has completed his technical education he hopes to find a job which will give him some part in building and designing airplanes. He has already shown marked aptitude for technical subjects, as indicated by his grades, which were among the highest of those earned by freshmen engineering students. Speiss states that by doing his work thoroughly rather than hurriedly he has found that he could make better grades.

Fifteen hundred college students competed for the Eaglerock awards. Besides the scholarship, an Eaglerock airplane valued at \$3,500 and sixteen flying courses valued at \$300 each were given as prizes.

"Full Stomach" Unknown

Newcomer: "Has this boarding house any special advantages?" Old Boarder: "Yes. You'll find it quite safe to bathe directly after a meal."

CULLINS GOES TO COURT TO ESCAPE BEING THROWN OUT; CONTRACT TIME UP

Operators Charge College Failed to Live Up to Terms; Could Not Stand Changing

Another episode of the local laundry "litigation" was revealed here Thursday when the Cullins brothers, J. B. and Nathan, unpopular and unsatisfactory managers and proprietors of the laundry, obtained a court order prohibiting their being evicted from the campus by college authorities or prevented from using necessary facilities.

The temporary order was signed by Judge W. C. Harris, and was made returnable before Judge R. A. Nunn here on September 26.

The trouble arose over a contract, entered into between Cullins and the college on January 1, 1923. It provided that the contract could be broken for "unsatisfactory service" upon thirty days notice of such service, and then, if it were not remedied, upon six months notice of intention to terminate the contract.

Shortly following the trouble with the student and a general demonstration of the laundry, President E. C. Brooks notified Cullins that the service was unsatisfactory. That was on February 20. On March 20 President Brooks wrote Cullins that the contract would be terminated on September 20, six months later. Thus the restraining order.

In the interim there was an exchange of many letters. Cullins stated he called for a bill of particulars and was accorded none. He likewise stated the college had not offered to fulfill another portion of the contract calling for appraisal of the laundry machinery, and its purchase by the college in the event of termination of the contract.

It becoming apparent that Cullins would resist eviction, the Board of Trustees met on September 10 and called on Attorney-General Dennis G. Brummitt. The Attorney-General filed a letter to Cullins informing him of the demand that he vacate.

Cullins, claiming that he would be irreparably injured, retained Attorneys R. N. Simms and C. A. Douglass, and took the case to court.

Why Go To Bed?

New Hired Man: "What time do I have to get to work?" Farmer: "Oh, 'most any time, so's it ain't later than half-past four."

Eagerness To Help Frosh Almost Causes Undoing Of Local Y.M.C.A. Man

A certain young man on the Y welcome committee came very near to making more of a dol of himself than usual during the extremely recent freshman week.

This young man, respresent in Y arm-band, was doing his noble best to help all the new frosh he could. A former professor of his approached, leading a very young fellow. The professor introduced the two, and immediately the industrious Y worker became solicitous for the immediate well-being of the new man. He had gotten to the point of inquiring as to whether or not the new man had secured his room, when the professor interrupted. "Mr. — is a new member of the faculty. He's going to teach freshman math this year," he said.

State College Faculty Holds First Meeting

(Continued from page 1)

that the courses selected for the support of a curriculum are both fundamental and in harmony with modern needs. He also emphasized the need of examining into the character of the instruction offered and the methods used by the teachers.

Four new departments of the college were announced as follows, each to begin courses of instruction this year: Forestry, Aeronautical Engineering, Science Teaching in the High Schools, and Sanitary Engineering.

The following new teachers were presented by the deans of the several schools:

Agriculture: Dr. J. G. Knapp, associate agricultural economist and professor of farm marketing; Ralph W. Hayes, professor of forestry; Leonard Giovannoli, instructor in zoology; R. E. Stevens, instructor in poultry laboratory.

Engineering: J. Summie Whitener, assistant professor of sanitary engineering; Karl B. Gleen, instructor in electrical engineering; A. M. Greaves-Walker, instructor in ceramic engineering; F. B. Turner, instructor in engineering drawing.

Textile: George G. Osborne, instructor in textiles.

Education: Merle F. Showalter, associate professor of education.

Science and Business: Hayes A. Richardson, professor of marketing; Karl R. Bopp, assistant professor of business administration; Edwin H.

Many Boys Seek To Secure Work Thru Self-Help Channel

Approximately two hundred freshmen have already signed the self-help roster in an effort to secure work, stated Joe E. Moore the latter part of this week. Mr. Moore said that many more applicants are expected.

Last year there were approximately seven hundred students who were part-time self-help workers, according to Mr. Moore, organizer and now director of the Self-Help Bureau. Most of these boys had regular employment, either with the College in private homes, or with uptown business firms, but some of them depended solely on odd jobs that came through the Self-Help Bureau of the Y. Last year the College Y.M.C.A. Self-Help Bureau, besides placing many of the boys on work that proved to be regular employment, secured odd jobs, averaging two or three hours in length, which, in the nine months, netted the student \$1,682.40. About forty students of the majority of this work, but it was open to any needy student who could sign the work register.

Every afternoon except Sunday during the school year a new work roster is placed on the table at the Y.M.C.A., to be signed by students desiring and available for work on following day. As the requests come in to the "Y," and me at frequent intervals during the day, jobs are assigned to the different boys whose names appear on the register. If a boy has signed for the work, announcement of the number of boys needed is made at the dining hall at the lunch hour. The jobs are open to the fellows of foot or with the least aptitude.

"First come, first served." The range of work offered by the students is wide as a range of various the proverbial colors of Job at, but the most popular works to be some form of salesmanship of practical experience money. N. C. State will probably place Yale as a school for graduates salesmen.

Adding its many forms is employ the agent, salesmen in an effort to increase their trade. Bulletin & room boys, walls and postcard the camp are literally plastered with various catchisms and inge slogans. All these add to the enjoyment of the student workers, who are able to com-

mand a good price for their advertising work. Firing furnaces, waiting on tables, gardening, mowing lawns, clerical work, and messenger boys are only a few of the many types of work engaged in by the students.

The odd jobs are the most variable of any of the work, though. Each time the telephone tinkles in the Self-Help Bureau, and it does about every thirty minutes, it probably brings some new and different request; it may be a lady wanting some blonde boy (she explains little Abner just abhors brunettes) to come out and amuse her young prodigy while she enjoys a movie or else engages in war at a bridge party; or it may be the foreman of a fertilizer factory calling for some brawny student with little sense of smell to mix plant food.

Most of these odd jobs pay the same wage, 30 cents per hour; occasionally some kindhearted old lady, in her generosity, exceeds this amount, but not often. The regular jobs pay from as low as 15 cents to as high as \$1 per hour.

Ten boys on the campus paid all their expenses last year by outside work, and three of them reported saving over \$100. But cases such as these are very rare, for, according to figures recently compiled by the Self-Help Bureau, it requires at least seven hours work a day, combined with conservative spending, for the average boy to pay all of his expenses while in college.

Boys from 14 to married men of 32, from the oil wells of Pennsylvania to the orange groves of Florida, send in the universal plea, "I have no money, but I want to come to school." Some of the letters are pathetic in their ignorance, while others are surprisingly well written.

STATE CO-ED MAKES HONORS AT COLUMBIA

Miss Ada C. Spencer, most popular co-ed of the campus and first girl to take a regular four years course as a regular student of State College, spent the greater part of her summer in New York at summer school, bringing back an A on her work at Columbia.

Such an achievement is regarded quite excellent, considering the standard of that university and that many teachers and professors of journalism strive for lesser grades. Miss Spencer's report is causing much gratification to her friends, relatives, and instructors, especially the head of the local journalism department, under whom the co-ed has done nearly all her previous work.

The polish of a college education shows mostly on the hair and shoes.

State College Men Gain Benefit From Meet At Blue Ridge

State College was well represented this summer at the Y. M. C. A. conferences that are held every year at Blue Ridge, N. C. The meetings this summer were the most successful ever attended.

The program for this year seemed to draw more interest than ever before. It was integrated around the central idea of adjustment, which was worked out primarily through a morning personal adjustment period in which were considered vocational, men and women, religious and personality adjustments. In general, the conference was directed by Dean F. F. Bradshaw, assisted by Harry Bone, Dr. English Bagby, and R. M. House. On the whole, the vocational problems were the most numerous, and exceptional success crowned the conference's efforts in dealing with them. Twenty skilled counsellors gave large blocks of time to personal interviews, centering primarily around vocational problems.

Five outstanding personalities lent a strong power of stimulus to the evening platform addresses. They were: President Hutchins of Berea, Dr. Henry Crane, President Gaines of Wake Forest College, K. T. Paul of India, and Fletcher Brockman of China.

Other important features were Bible Study and Worship and Interest groups. These took extremely well at the conference. The group on Southern Industry had Tom Tippet, of Brookwood Labor College, to bring facts from the standpoint of labor, and Mr. E. E. Geer, of the Judson Mills, Greenville, S. C., to speak from the standpoint of the employer. The whole was then evaluated under the leadership of a competent discussion leader. International Night program was conducted by seven foreign students. A record attendance of church board delegates set a new mark for this section, indications pointing to a new era in church cooperation as a result. That colleges in general are taking an increasing interest in Blue Ridge is pointed out by the unusually large attendance of college presidents and professors. June, 1929, is by far the best session Blue Ridge has ever had.

State's delegates were: E. S. King, our Y secretary; E. W. Buchanan, Y president at State; A. D. Stuart, L. A. Powell, Neno Gross, Bob Wilson, E. H. Whitley, M. L. Shepherd, J. W.

Most Colleges

"went Sheaffer"

Like athletic leadership, sales leadership comes only with merit. Sheaffer leads in actual sales at 73 of the 119 foremost American universities and colleges*. To know why, just write with one at your Sheaffer dealer's. You'll be told that Sheaffer's Lifetime° is guaranteed for the rest of your life... against everything except loss. See the modern design of the Balanced Lifetime°, and experience its restful "feel". That's why it takes notes so swiftly in class and races through long themes without tiring the hand. Once you've used Sheaffer's Lifetime° pens and pencils, you'll never be satisfied with any others!

* This was proved by a disinterested organization whose sole purpose was to find the real pen leader. Documents covering this survey are available to anyone.

All fountain pens are guaranteed against defects, but Sheaffer's Lifetime° is guaranteed unconditionally for your life, and other Sheaffer products are forever guaranteed against defect in materials and workmanship. Green and black Lifetime° pens, \$3.75; Ladies', \$7.50 and \$8.25. Black and Pearl DeLuxe, \$10.00; Ladies', \$8.50 and \$9.50. Pencils, \$5.00. Others lower.

Halstead, L. E. Anderson, T. Chang, and Rev. J. D. Walker. These men have come back to State ready to put our Y through the best year it has ever seen.

"It is high time you were getting insured against accidents, sir."
"Why is that?"
"That hat you are sitting on belongs to the college boxing champ."

"Women always say they are younger than they are."
"Not always. I promised my betrothed a necklace with a diamond for every year."

The more we see of girls the more we believe in clothes.

The less fat there is in pastry, the quicker it will cook.

"When I dance with you I feel as though I were treading on clouds."
"Not quite. They are just my feet."

Advice to College Boys: Stay in college. There's no place outside for a college man.

"Why don't you wear that pretty underwear you got on your birthday?"
"Oh, I'm waiting for a windy day."

Our advertisers were solicited with the purpose of putting before you dependable shopping points. Remember this, and feel perfectly safe in guiding your shopping by THE TECHNICIAN.

We see in the Student Handbook: FRESHMAN RULES. Wonder who the FRESHMAN is?

"IF I WERE A FRESHMAN AGAIN—"

(Looking back through the clarifying lens of five-and-twenty years.)

If I were going to college next year I would aim for:

1. A letter in Athletics. Because play is an essential part of life. Athletic contests—some of them—are play at its best for a normal, healthy man.
2. A grade average of B. Grade "C" or "D" usually means shoddy work, and that's a bad habit. "A" for me would require a grind and neglecting life, which I refuse. "B" is all that is left.
3. Time for some real friendships, both men and women. Life's chief value finally is friends. These four years must not be friendless or hurriedly, superficially "friendly."
4. Some real piece of service on the campus or in the community. A great growing selfish life—"There ain't no such animal."
5. To do well what I do. It's a slow college nowadays that has less than one hundred extra-curricular activities on the campus. Well, about ninety-six of these I would let the other fellow run, and I would "saw wood" on the few that seemed to me of most value.
6. The discovery of scientifically valid processes of growth—physical, mental, religious, and the beginning of habits of growth in this direction. Life is not a storehouse. It is an organism. Not what I know on Commencement Day, but what habits are mine which will give drive and productivity increasingly when I'm out in life. So I'd test any college activity by habit-producing value.

Would I join a fraternity if I had a chance? Oh, well—maybe. I (I am a fraternity man) would tell the fellow who waxed eloquent on "All the real fellows in college are in the frats" that his information is inaccurate, that there is no need of hurry, and I may join later and I may not.

Would I date it and "say it with flowers"? Sure, but I wouldn't talk myself hoarse saying it.

In a word, I'd try to be a growing, human Christian student, and if any one got more fun out of life than I, I'd ask him how he got that way.

(Editor's Note: The author of this editorial is unknown, but it is being reprinted upon request of the Student Government President.)

A Student's Ten Commandments

1. THOU SHALT HAVE NO OTHER GODS BEFORE ME. Thou shalt not in a far country forget the God of thy fathers. He is on the campus even as He is at home.
2. THOU SHALT NOT MAKE UNTO THEE ANY GRAVEN IMAGE. Neither anything else shalt thou worship—whether a social organization, athletic interests, or any outside activity.
3. THOU SHALT NOT TAKE THE NAME OF THE LORD THY GOD IN VAIN; no, not even in minced oaths.
4. REMEMBER THE SABBATH DAY, TO KEEP IT HOLY. Six days shalt thou labor and do all thy studies; fill the seventh with those things acceptable to God.
5. HONOR THY FATHER AND THY MOTHER by holding fast to the best that they have taught thee.
6. THOU SHALT NOT KILL hopes or ideals; no, nor the reputation of the girl or boy across the hall.
7. THOU SHALT NOT COMMIT ADULTERY. Respect the sacredness of love; regard it never lightly.
8. THOU SHALT NOT STEAL either thy roommate's or neighbor's time, ideas, work, or friends.
9. THOU SHALT NOT BEAR FALSE WITNESS AGAINST THY NEIGHBOR neither in thy room nor thy society hall nor anywhere else among thy friends.
10. THOU SHALT NOT COVET thy friends' clothes, grades, social position, nor anything else that thou hast not earned.

—Written by a Simpson College (Iowa) Student.

DEAN CLOYD WELCOMES THE FROSH

By DEAN E. L. CLOYD

The calendar year begins with January one, and when we speak of the New Year are accustomed to think of that day. Almost every business has its fiscal year, which may or may not correspond with the calendar year.

Those of us who are connected with the college are in the habit of thinking of our New Year as beginning with the opening of college in September and as ending with Commencement in June.

The fall in a college community is always a happy time. Many of us have been away during the summer, and we return in the fall to renew our friendships, to see what improvements have been made on the campus, to plan our work and our recreation for the fall and winter.

With the coming of the new college year in September we always look forward to and plan for the coming of a new group of students—the freshmen. And it is to this group that this word of greeting is particularly directed. We have tried to form your acquaintance during the summer by writing to you, and through your letters and your application for admission we feel we know a few facts about you, but we can't possibly really know you until we see you and meet you face to face.

So as you, the members of the freshman class, come to our State College community we, its older citizens, extend to you a hearty welcome. It is our desire to meet you personally, to shake you by the hand, and to share with you the impulses and the desires which prompted you to come to State College. Your interests are our interests, and to the degree that you succeed in enriching your life through your stay with us to just that degree can we feel that our lives are successful.

In conclusion let us each ask ourselves this question, which was asked the students of Brown University by their president at the opening of a new college year, "What shall the opening of college be to us this year? The mere unlocking of doors and the sweeping out of dusty rooms, or shall it be the opening of the heart to friendship, of the mind to new truth, of the soul to the inflowing spirit?" The folks who live at State College

welcome you, the members of the freshman class.

POSTMASTER'S MESSAGE

By W. B. DUNCAN, Postmaster

Your postmaster desires to add his welcome to the many others which are being extended to you by the city of Raleigh and its people, and to assure you that it is the earnest desire of your postmaster and of the entire force of the Raleigh postoffice to render you the best service within its power during your residence in our city.

But this service cannot be fully rendered without your cooperation, and this cooperation it is earnestly asked and trusted you will give by following the suggestions outlined hereinafter:

The first step in this cooperation is for you to ascertain just which is the best way for you to receive your mail; whether by delivery to a dormitory box by the mail carrier serving the college campus (in which case you should have assigned to you a definitely numbered box in the college, and should carefully note the number thereof), or through a lock box at the State College Station of the Raleigh postoffice, or by delivery to an address off the college campus by city carrier (in case you reside off the campus in a fraternity house or other dwelling in the city), or through the general delivery window of the State College Station (in case you reside off the college campus and outside of the city delivery limits of the postoffice and do not rent a box at the State College Station). The use of the general delivery is not desirable if you can make any other arrangement for the receipt of your mail.

You are cordially invited and requested, in case you are in any uncertainty as to the manner in which you should receive your mail, to call at the State College Station or at the main postoffice to talk the matter over and be carefully informed as to the handling of your mail. In case you are to receive your mail through a dormitory box on the college campus, you should confer with Mr. T. T. Wellons, Superintendent of Buildings for the College, relative to the box to be assigned to you.

The second step in the cooperation your postmaster desires is that you inform your correspondents of the exact manner in which your mail

should be addressed—either your dormitory box number, the number of your lock box at State College Station (always remembering the importance of adding to the box number "State College" or "State College Station," as the case may be), or the street and number of your residence in the city, if you are to receive your mail by city carrier, or "General Delivery, State College Station, Raleigh, N. C.," if it is necessary for you to receive your mail in that manner. Your postmaster recommends to you the use of the Dormitory Delivery Service.

The third request is that you inform your postoffice promptly of any change in your address. In case your dormitory box number should be changed, you should inform Mr. Wellons at once of the change, in order that he may make proper record of it in his office and notify the postoffice. It is trusted that you will consider carefully the suggestions outlined above, and will follow them as closely as possible. If you will do this you will greatly assist your postmaster and your postoffice toward rendering you the service they earnestly desire to render, and you will save yourselves the annoyance and inconvenience caused by having your mail delayed or misplaced.

And this cooperation will be most sincerely appreciated by your postmaster.

WELCOME BY DEAN BROWN

By B. F. BROWN
Dean, School of Science and Business

The School of Science and Business is glad to welcome the freshmen and other new men to the campus to begin their college career.

They come from all sorts of localities and all sorts of homes. Most of them are good, but some of them only indifferently so; many of them have

high ideals and purposes, but some not so high, and a few with low and selfish and self-centered objectives. They come to be made, they think, by the college and its environment—to get an education, as they call it.

Their presence here implies that they desire to change, to become something different from what they are. And changed they will be if they remain here long enough. The important question is as to the character and direction of the change.

Some one has said that education consists of disillusionment—that is, of discovering, sometimes painfully, that our dearest notions and our pet ideas are false. Disillusionment is undoubtedly part of the process of education, but it cannot be all of it, for if it were an educated person would be one whose head tended toward a vacuum. Think how empty most of our heads would be if there could be taken out of them by the waving of the fairy's wand all the untrue ideas and false notions, the prejudices and intolerant attitudes with which they are stuffed. That would be a good thing and a good beginning toward an education; but only a beginning, for the void would have to be filled with right attitudes, worthy objectives, and true ideas.

Education thus consists of the double process of weeding out the false and replanting with bitter truth, of letting go of the low and grasping the high, of unlearning and learning, of destroying and building. Those who lack the power to abandon the cherished false and to cleave to the unloved true are said to be stupid. "Against stupidity even the gods contend in vain." The stupid cannot be made over; they cannot be much changed, they cannot be well educated.

Here you have access to accumulated information of the past and learn to use that information. Millions have been before you. In the

world's great laboratory great mistakes in human happiness achievement have been made. Each life goes around in a circle—each begins, each has done exactly as his great-grandfather did; but human beings in large degree begin where their parents left off. Each generation has the chance to stand on the shoulders of the generation before.

The faculty of the School of Science and Business hopes that each freshman will take full advantage of his opportunity to grow here; that he will not wholly lose sight of the aspirations and resolutions which he brings here, but will occasionally get them out, like Aladdin's lamp, and polish them up a bit. Repolished ambitions sometimes have as much power to conjure up genius as did the lamp of Aladdin.

Remember Ye Days of Olde?

When o-eds said "NO!"?
When o-eds wore stockings?
When o-eds closed their eyes?
When they blushed?
When they hid their dimpled knees?
When o-eds walked back?
When they pulled down their shades?
When they studied?
When o-eds wore corsets?
When o-eds wore brassieres?
When they were, oh, so bashful?
When they slept alone?
When o-eds cried?
When they wore negligees?
When they slipped oily sodas?
When they wore clothes?
When o-eds were co-eds?
When they believed in love?
When they slapped your face?
When they called Ma?
When o-eds were wild?
When they displayed garters?
When o-eds wore bloomers?
When they shunned risqué gowns?
When they were the "weak" ones?
—Doc Lov

For a Flying Start in the New School Term Choose a Parker Duofold
—the college favorite by actual census
* Guaranteed Forever Against All Defects

Parker Duofold Pens \$5 to \$10
Pencils to match the pens, \$3 to \$5

Christened "Parker Duofold" by Amelia Earhart, the first trans-Atlantic woman flyer, this 5-Passenger Fairchild Monoplane has, in the few months, given flights to 6,200 Parker dealers and college students. It will continue its tour among the colleges of America.

Now numbers of colleges have their fly clubs and landing fields—but the thing all students like best to pilot through their studies is the light-flying Parker Duofold Pen that leap to its work like a dart and writes with Pressureless Touch.

Pressureless Touch is Geo. S. Parker's 47c Improvement, combining capillary attraction with gravity feed.

A census of pens in 13 technical schools disclosed that Parker leads in popularity 2 to 1. It was voted the favorite by students in 55 colleges. And a nation-wide poll conducted by the Library Bureau proved Parker the preference by 25% above the second pen, and 48% above the third.

Non-breakable barrels of jewel-like, colored Permalite, smartly black-tipped—28% lighter than rubber—holding 24% more ink than average, size for size.

Step to any good pen counter and select your point. Imitations can't deceive you if you look for the imprint, "Geo. S. Parker—DUOFOLD."

THE PARKER PEN COMPANY, Janesville, Wisconsin
Offices and Subsidiaries: New York, Chicago, Atlanta, Dallas, San Francisco, Toronto, Canada; London, England

Parker Duofold

Here's Winfield Killam, University of Texas, all set for a hop between classes. His extra hours for flying come from doing his school work quickly and easily via Parker Duofold.

Here are Bill Baker, Tulane's All-American "Dood Blinnard," and Ike Sewell, former captain of University of Texas football team—all set for a hop in a Cessna wire plane. If you're coming to speedy writing, both are Parker Duofolds.

Elliot Coleman, Louisiana State University, feels fortified against adverse flying conditions when in his Command-are plane. Likewise, he feels fortified against the stiffest exams when he grasps his trusty Parker Duofold Pen.

Here are Bill Baker, Tulane's All-American "Dood Blinnard," and Ike Sewell, former captain of University of Texas football team—all set for a hop in a Cessna wire plane. If you're coming to speedy writing, both are Parker Duofolds.

To prove Parker Duofold is a pen of lifelong perfection, we offer to make good any defect, provided complete repair is sent by the owner direct to the factory with 10c for pay.

Provident Mutual Life Insurance Co.

of PHILADELPHIA

ORGANIZED 1865

The Company of Low Net Cost and Great Financial Stability

Flitcraft's Life Insurance Courant for November says: "An examination of the new net cost schedule, as far as comparisons can be made from the figures now available, seems to indicate that, at the younger and middle ages at least, the Provident is now taking the lead in the item of low net cost of insurance to its policyholders generally."

It will be to the advantage of State College men to get my rates before taking out insurance.

State College Wolfpack Must Depend Chiefly On New Men For 1929 Team

Ten Lettermen Are Lost From 1928 Squad by Graduation

FRED VAUGHAN, GUARD, AMONG LOST VETERANS

John Lepo, Captain This Year, Heads List of Eight Letter Men Returning; '28 Freshman Material Is Not Especially Brilliant.

By FRED DIXON

The North Carolina State College football squad completed its third week of training yesterday on the freshman field at State College. During the coming week the coaches will begin the formidable task of selecting line-ups that will probably be used to start against Washington and Lee here on October 4.

Since the beginning of practice September 2 the squad has had two workouts a day, but with registration for upperclassmen to take place Tuesday, 24th, only afternoon practices will be called.

Coaches Have Hard Task

The coaches of the college are having a rather severe task in developing a team this year. Ten of last year's lettermen will not be back, having graduated in the spring, and the freshman material from last year's yearling team is not especially brilliant.

Chief among the lettermen not reporting are Captain Bob Warren and Fred Vaughan.

Warren was one of the best fullbacks that State has developed in years, and he was the unanimous choice of sport writers for fullback position on the "All-North Carolina" team.

Coaches will have to look a long time and work just as long before they will find another man to do the work at guard as Fred Vaughan did it. Vaughan was State's All-Southern guard last year.

Bill Metts, whom the football fans of North Carolina picked for All-State honors at the pivot post, will not return. John Ford, guard; Jimmy Mayfield, guard; Dave Floyd, tackle; Frank Goodwin, end; "Chink" Outen and Fred Crum, halfbacks, are the other lettermen missing.

Eight Letter Men Report

Captain John Lepo, tackle; Basil Felton, halfback; Maurice Johnson, quarterback; Norris Jeffrey, halfback; Ake Jordan, end; Mack Stout, center; John Silver, end, and Al Vann, guard, are the eight lettermen that have reported for the 1929 team.

Illness kept Captain Lepo out of uniform for a few days this week, but he was in the scrimmage held Thursday. Lepo is expected to be the mainstay in the forward wall this season and is State's chief candidate for All-Southern honors. He claims youngstown, Ohio, as his home.

The Wolfpack leader is a big, rangy fellow. He is six feet one inch and weighs 182 pounds. His outstanding work at tackle the past two years on him a place both years on the All-State team, and last year he was prominently mentioned for All-Southern honors. Lepo is perhaps the best tackle developed at State since the days of "Dogy" Weathers.

The other seven lettermen were all stars last year and are expected to come through with higher ratings this year.

Big Five Schedule

State

- October—
- 4. Washington & Lee at Raleigh.
- 11. Clemson at Florence, S. C.
- 17. Wake Forest at Raleigh.
- 26. Mich. St. at E. Lansing, Mich.
- November—
- 2. North Carolina at Chapel Hill.
- 9. Davidson at Raleigh.
- 16. Duke at Durham.
- 23. Villanova at Philadelphia, Pa.
- 30. South Carolina at Raleigh.
- December—
- 7. Miss. A. & M. at Starksville, Miss.

Carolina

- September—
- 28. Wake Forest at Chapel Hill.
- October—
- 5. Maryland at College Park, Md.
- 11. Georgia Tech at Atlanta, Ga.
- 19. Georgia at Chapel Hill.
- 26. V. P. I. at Chapel Hill.
- November—
- 2. N. C. State at Chapel Hill.
- 9. South Carolina at Chapel Hill.
- 16. Davidson at Davidson.
- 23. Virginia at Chapel Hill.
- December—
- 7. Duke at Durham.

Duke

- September—
- 28. Mercer at Macon, Ga.
- October—
- 5. Pittsburgh at Durham.
- 19. Navy at Annapolis.
- 26. Villanova at Philadelphia.
- November—
- 2. Boston at Boston.
- 9. Louisiana at Durham.
- 16. N. C. State at Durham.
- 23. Wake Forest at Durham.
- 28. Davidson at Davidson.
- December—
- 7. North Carolina at Durham.

Davidson

- September—
- 21. Elon at Davidson.
- 28. Clemson at Charlotte.
- October—
- 5. Wofford at Spartanburg.
- 12. Army at West Point.
- 19. Citadel at Davidson.
- 26. Wake Forest at Greensboro.
- November—
- 2. V. M. I. at Davidson.
- 9. N. C. State at Raleigh.
- 16. Carolina at Davidson.
- 23. Duke at Davidson.

Wake Forest

- September—
- 21. Catawba at Wake Forest.
- 28. Carolina at Chapel Hill.
- October—
- 5. Richmond at Richmond, Va.
- 12. Elon at Wake Forest.
- 26. Davidson at Greensboro.
- November—
- 2. Furman at Greenville, S. C.
- 9. Wofford at Spartanburg.
- 16. Navy at Annapolis.
- 23. Duke at Durham.
- 28. Mercer at Asheville.

New Material

The brightest prospects from the

DUKE HAS PLENTY OF MATERIAL THIS YEAR

Tackle Position Affording Hot Race for Three Contestants

Duke University seems to have plenty of material in which to build her 1929 football team around. Only a few lettermen were lost by graduation and many candidates from the '28 freshman team are making wonderful showings in a desperate attempt to oust the lettermen from their vantage jobs.

Since Nick Warren was shifted to a guard position by the University men's line, the race has begun for the tackle position he once held. Among the chief candidates for the tackle berth is Don Carpenter. He is six feet three and weighs 193 pounds. Two other stars fighting for the berth are Fred Taylor, 198 pounds, and Bill Bryan, 205 pounds. Before the first game the Duke Blue Devils will play, any one of these three men may start, and either of them can turn in a good job.

The center post is also giving the coaches a little worry as to which of two men to use, Emory Adkins or Bert Friedman. Friedman seemed at one time to have it all sewed up, but Adkins has come forward in the last few days to make things hot for Friedman.

The Duke forward wall looks like it will line up for their first game with Hyatt and Peeler, ends; Captain Kistler and Carpenter, tackles; Warren and Thorne, guards; and Friedman, center.

1929 Freshman Football Material Best Obtained At State In Many Years

Not since the freshman football days of Bob Warren and Sam Leaker has State College had such promising football material as that being assembled on the freshman field this season.

The material of Freshman Coach J. F. Drennan and Assistant Freshman Coach J. B. "Shorty" Lawrence has been obtained from all parts of North Carolina and eastern parts of the United States.

With the registration of freshmen yesterday, many other football candidates are expected to report to the freshman coaches for work. Around fifteen men have been in training since the second of September, but active freshman training will not get under way until next week.

It might be painting too rosy a picture, but the freshman team that beats the State yearlings this year will be freshman champions of North Carolina.

freshman squad have been found in Wright, Rose, Dellinger, backs; Burdell and Dowdin, tackles; Gorham, center, and Avera, end.

Dellinger is being used much in the backfield, as he has a fast pair of legs, and they seem to know where the holes are. Gorham looks good at center, and he is also being used at guard. Wright is a big hefty backfield star and he seems to like to hit the line for good gains.

Important Games

State will play six Southern games this season, an increase of one over last year. The schedule should provide a real test for the team, as there are few soft spots from the first game until the last one in December. Coach Tebell, however, will probably bend his best efforts towards pointing the Wolfpack for the State schedule, with special emphasis on the North Carolina and Duke games.

State will open the football season with Washington and Lee here on October 4th. The Generals handed the Wolfpack the worst defeat they received last year when they were turned back, 38-5. The State mentor hopes he will be able to turn the tables this year, but that can't be decided quite yet.

Coaching Staff

With the addition of J. B. "Shorty" Lawrence to the State College coaching roster, this school department now numbers five men in head coach, R. R. Sermon his chief assistant and backfield coach, E. R. Slaughter line coach, J. F. Drennan freshman coach, and J. B. Lawrence assistant freshman coach.

It is from these five men that the State football candidates will learn their where's and what's of football this season and seasons to come.

If the energy wasted by women in pulling down their skirts could be utilized it would be more than sufficient to let out all the hems several inches.

"Auntie, you know that man at the corner who was sick?"
Auntie (Christian Scientist): "He only thought he was ill."
"Well, now he thinks he's dead."

"What kind of berries are those?"
"Blueberries."
"Yes; but that's only while they are green."

'29 CAPTAIN OF WOLFPACK

John Lepo, who will captain the 1929 edition of the North Carolina State College football team, is a tackle and one of the best line-men developed at State College in many years. He has been picked twice on the All-State football team and is State's strongest bid for All-Southern honors this year.

CAROLINA UNIVERSITY HAS GOOD BACKFIELD

Three weeks of intensive training in all branches of football, the football candidates at the North Carolina University are now at the point where they can learn the fine points of the game that they will be required to know when they meet such out-of-state teams as Georgia Tech, Virginia, Navy, and V. P. I.

Coach "Chuck" Collins has many of last year's lettermen back and several promising stars from last year's freshman team. Especially strong is his backfield material, and his chief concern now rests in developing a line capable of serving the backs.

Carolina will miss Captain Harry Schwartz, All-State center of last year's team, but they have another line captain to count on this fall—Captain Farris. This man is not only a lineman, but a backfield star. He has often been called into the backfield to punt, run, and pass.

Some of the outstanding linemen are Nelson, Finner, Tabb and Parsley, ends; Koenig, Adkins, Dorch and Harper, tackles; Crew, Bell, McIver and Chaconas, guards; Lipscomb and Gilbreath, centers; Nash, Magner, Erickson and Houston, halves;

YOUNGER'S WILDCATS OPEN SEASON TODAY

Will Play Elon Christians At Richardson Field, Davidson

Davidson College will help pry the lid off 1929 football activities in North Carolina colleges this season when they meet the Elon Christians on Richardson Field at Davidson today.

Monk Younger and Tex Tilson, Davidson mentors, have been sending their candidates through a stiff order of work in preparation for this game. The scrimmages have brought to light the rough spots in the line and backfield on both defense and offense, and the two coaches have been working frantically to iron them out this week!

A cloud of gloom and pessimism has hung over the Wildcat camp for the past few weeks when it was announced that Lillard, big tackle, would not return, and the knee-injury of Goody-koons would keep him out of the game for several weeks. But, with these two big upsets starting him in the face, Younger has rounded out a team that will still carry on the fighting traditions of Davidson College.

The Davidson line-up will find Fraley, McCall, Brochard, and King in the backfield; Captain Brock and Brown, ends; Raker and Baker, tackles; DeCamp and Parker, guards; and Mason, center.

Branch, Wyrick and Moore, quarters, and McAllister and House, fullbacks.

Carolina's first game will be with Wake Forest at Chapel Hill, September 28.

J. B. LAWRENCE BEGINS FROSH COACHING DUTY

J. B. "Shorty" Lawrence, a former end and tackle on the State College football team, has begun his duties as assistant freshman football coach at State College.

Lawrence was added to the roster of the State coaching staff last spring and will serve as an assistant to J. F. Drennan, freshman football coach.

Lawrence was one of the best line-men ever developed at State College and is expected to be a great asset to the present coaching staff.

WAKE FOREST TO PLAY CATAWBA TEAM TODAY

Johnny Cox, Captain, To Be Out of Game, Mother Sick

When the 1929 football team of Wake Forest College open their season this afternoon at Wake Forest, with Catawba College, they will be without the services of their captain and star half-back, Johnny Cox. Cox has been called to his home in Baton Rouge, La., where his mother is seriously ill.

His departure came as a set-back to Coach Pat Miller on the eve of his first game of the season, as Cox is one of the best back-field men in the State, and the "mystery team" of Wake Forest does not have enough back-field men like him to choose from at random.

Eustace Mills, a half-back from Apex, has been appointed to captain the Baptists against the Indians this afternoon. Mills is a senior.

Pat Miller sent his team through several secret scrimmages this week and is now ready for the Catawba Indians this afternoon. The Baptist mentor is not taking the game with the Indians as an easy one, as he is himself calling his team the "mystery one," but expects to know what kind of material he has after this first encounter.

SAPP, ALL-STATE END, TO COACH TAR BABIES

Odel Sapp, star end on the Tar Heel football team for the past three seasons, and All-State for the last two years, has been added to the coaching staff of the Carolina University.

The announcement of Sapp's being added to the coaching roster of the University was made by Charles T. Woolen, graduate manager of athletics, this summer.

Sapp's job will be as assistant freshman football coach. He will also coach the freshmen boxers and will help Freshman Coach Rex Enright with the baseball team.

Sapp is well fitted for the new berth he now holds. He is one of the few three-letter men the University has had in recent years, having put in two seasons with Tar Heel boxing and baseball teams along with his three years of football.

PUNCTUATE YOUR DAY WITH

Let Camels be the commas and periods in the page of your daily activity. Each Camel is a little interlude a high-spot of pleasure with which to punctuate your changing moods and thoughts. It adds so much to the pleasure of life to pause now and then and say to yourself Time out for a Camel!

In Camel you get that extra measure of pleasure . . . because Camels are expertly blended from the choicest tobaccos grown . . . mild and mellow . . . cool and refreshing . . . their fragrance is always pleasant, indoors and out . . . and they do not tire the taste nor leave an after-taste.

Dr. Sermon Named Graduate Manager At State College

Dr. Ray Sermon has recently been appointed by Dr. E. C. Brooks, president of State College, as acting manager of the Department of Athletics at North Carolina State College.

Dr. Sermon will take over all the duties handled by Tal H. Stafford, former graduate manager, who has been transferred to the Department of Public Information as active director, succeeding C. K. Marshall, who resigned during the summer.

Noted Athlete

Sermon has been trainer, track coach and assistant to Gus Tebell since 1925 at State College.

Sermon first attracted notice as an athlete as a student at the Missouri School for State Teachers. His work was the chief reason why Missouri won three successive championships in football, basketball, and baseball. He coached for a year at Wentworth Military Academy after graduating from the Teachers College. During the summer he played in a western league, and entered Springfield College the next fall.

While a student here, playing on the football, basketball, and baseball teams, he attracted the attention of the late Walter Camp. It was during his second year at Springfield that he captained the football team that defeated Colgate, which in turn licked Brown and Yale. Camp then made a special trip to Springfield to see Sermon play, and named him on his All-American team as quarterback.

Dr. Sermon coached for three years at Central Missouri Teachers College and at the Rollo School of Mines after completing his course of work in physical education at Springfield. After completing his course at the Kirkeville School of Osteopathy, Missouri, where he played as well as coached, he entered State College in the fall of 1924.

GREETINGS FROM TEXTILE SCHOOL

By DEAN THOMAS NELSON

The Textile School extends to all freshmen a welcome to State College; to the privileges and opportunities that can only be offered by a college. This is a privilege that cannot be participated in by every young man in North Carolina, so all of you who are so fortunately situated as to be able to attend college should determine to make the best use of the opportunities that have been spread before you and the talents that have been bestowed upon you.

Every student should endeavor to do his classroom work to the best of his ability, and in addition to this should participate in other college activities such as the literary societies, athletics, Y. M. C. A., or any other phase of college life which tends to develop and broaden a man and bring out the best there is in him.

A cordial greeting is extended to textile students by the faculty of the Textile School. It is our hope that your stay with us will be pleasant and profitable, and that you may get from the college a full measure of all it has to offer for your advancement in education and a higher service to mankind.

Some Soothin' Stuff

The following love lyric was picked up by an inquisitive snooper at the home of one of the leading high school belles of the city one day this past week:

Dearest:
"I love you, I love you, I love you, sweetheart of all my dreams." "Some sweet day you'll be my sweetheart (that's today), some sweet day you'll be my bride." Then, dear, we'll spoon beneath the "Carolina Moon," and ten "Oh, What a Night! Oh, What a Night for Spooning."

"Beloved," while I'm "caressing you" you'll say "I Was Just a Glad Rag Doll," but now "I'll Get By" because "You Are the Song of Songs" to me.

"Let's Get Married" and "Make Whoopee" because, dearest, "I'm So Tired" of "Four Walls," and I want a "Blue Heaven" and "You." That would be "Just" like a melody from out of the sky.

Listen, honey, "I Want To Be Bad," but you "Button Up Your Overcoat" and "Remember" "I Love You" always.

So I'll say adieu "Till We Meet Again." So here's hoping I'll be "Lucky In Love."

Your
"SYNCPATIN" PAPA."

FRESHMEN ALL RUSHING CAMPUS SUPPLY STORE IN DESIRE FOR RED CAPS

Sale of State College's most popular headwear, the Freshman cap, started yesterday about 9 o'clock and brought into the coop store more customers than have been seen there in some time.

Every freshman, as soon as finished with the routine at the gymnasium, hurried over to adorn himself with red, the hurry causing wonder to bystanders, since the first-year men are not usually so enthusiastic to designate their rank. However, a visit to the registering headquarters explained the why of their haste. A big sign, prominently displayed over the door through which all were leaving, gave in no uncertain terms the information that the caps were to be purchased immediately—and no other time would do. Standing beneath this arbitrary direction was Dean Elmer L. Cloyd, who easily dispelled any hesitation on the part of the freshmen as to whether they should purchase a little red bonnet.

The caps are being handled by the cooperative store on the campus this year instead of from the dean of students' office, as of last year, and outside clothing companies as in years past.

The pattern adopted last year is not being used again, the caps being made like the familiar ones of all preceding years, but a little deeper—until they get wet.

Each freshman had his name checked off a list as he stepped up and laid down his six bits, instead of a dollar as heretofore. The freshmen owe thanks to Paul Choplin, student body president, for this change which gives them the cheaper cap.

Of course, all freshmen must wear the caps until emancipated from them next spring, or take the consequences. The coop announces a supply sufficient to cap all freshmen and also to take care of replacements.

A room can be thoroughly disinfected by burning sulphur. Close the windows and the doors and stop up the keyholes. Two pounds of sulphur is sufficient for a room twelve by twenty feet.

Moths will not get into carpets or rugs that are brushed once a week with a broom dipped in hot water to which a little turpentine has been added.

ECKERD'S CUT-RATE DRUG STORE

cast includes Gertrude Astor, Armand Kalla, Ben Hendricks, Jr., Eddie Gribbon, Knute Erickson, Edythe Chapman, Nita Martan, Joselyn Lee, and Zasu Pitts.

"Twin Beds" is the first sole-starring vehicle for Mulhall since he was recently elevated to stardom.

Palace Mon-Tues-Wed

"Four Feathers," that picture that you've been reading about, is now here at the Palace Theater—Monday, Tuesday, and Wednesday of this week.

Richard Arlen, Noah Beery, George Fawcett, William Powell, Clive Brooks, and Fanny Wray all make "Four Feathers" have all the gallant courage of "Beau Geste" and the vital force of "Chang."

This is an action and sound picture that you shouldn't miss.

State College men will be interested in knowing that "Dick" Lashby is an alumnus of State College. "Dick" is a big booster for his school, and why shouldn't we be boosters for him?

Palace Thurs-Fri-Sat

And so they were married. Contrary to the usual rule, the wedding comes first and not last in the rollicking First National-Vita-phone 100-per-cent talking comedy, "Twin Beds," starring Jack Mulhall, which comes to the Palace Theater Thursday, Friday, and Saturday.

Mulhall meets, falls in love with, and marries his leading lady, Patsy Ruth Muller, right in the first reel; and then, in the words of the old saying, "When a man marries his troubles begin."

Twin beds and a proposed trip to Europe provide most of the argument, but a lot of wild and unexpected happenings keep the fun going merrily all through the picture.

"Twin Beds" was adapted from the stage force by Margaret Mayo and Salisbury Field, the adaptation being one by F. McGrew Willis.

Al Santell directed, and a splendid

Library Adding Books Featuring Courses In Aviation and Forestry

Keeping in touch with the progress of the college, the library has built up very good selections of books on forestry and aviation, announced Frank Capps, librarian, who stated that a complete list is not yet available.

Considerable attention was given the addition of courses in forestry and aviation to the college curriculum during the past season. The entire forestry division of a Pennsylvania college moved to State last year when the arrangements were made for the forestry work. The aviation subjects are being offered in conjunction with the Curtis Flying Service, the work done at the college comprising the ground school, which is required before a student may complete any of the courses offered by the Curtiss Company.

Numerous other books have been received by the college, with some extra good ones in biography. The library appropriation does not justify buying much in the way of fiction, which is the most popular type of voluntary reading on the part of students.

Intercollegiate Dance

The Intercollegiate Club of Raleigh welcomed the 1929 fall debutantes to the Capital City by their opening dance Wednesday evening in the Buena Vista ballroom of the Carolina Hotel. This was the opening dance of the celebrations that will be given in honor of the young ladies who make their debut this year.

Miss Marjorie Peacock, who was a popular Norfolk debutante of the 1928 season, sponsored the dance. Miss Peacock was selected by Raymond Griffith, moving picture star, as the prettiest girl at the country club Black and White Ball in Mexico City in 1927.

During intermission of the dance the guests were entertained by Sarah Frances Arnold, who gave an acrobatic dance. Louise Mitchell and Jean McCarthy also performed a musical comedy and step.

Black Cat Dance

Succeeding the Debutante Ball of Thursday evening, the Black Cat Cotillion Club of Raleigh gave a dance in the City Auditorium Friday evening from 9 until 11 o'clock in honor of the debutantes who made their bow to society. The general committee who had charge of the dance was composed of Fletcher Turner, chairman; Robert Biggs, John Park, Roy Franklin, and Willie York. Ted Williamson and his orchestra from Oil City, Pa., played for the dance.

Debutante Ball

The City Auditorium was transformed into a scene of real beauty Thursday night by the rose and gold ninth annual Debutante Ball. With roses predominating, the stage was arranged as a formal garden with flower beds, pathways, and fountains making it look almost real. Roses in tall vases were used throughout the auditorium as floor decorations.

The ball was given by the Terpsichorean Club of the city, and the first thing after the arrival of patrons was the lead-out, which was headed by Miss Margaret Sherrill, general chairwoman of the 1929 debutante committee, and William Ward, president of the Terpsichorean Club. Assisting these two were Miss Dorothy Furr with Wisner Chamblee, business manager of the club, and Miss Anne Hoover Browne with Irvin Bailey, secretary. Those participating in the figure besides the leaders were: Miss Sara Busbee with Sherwood Jones, Miss Billy Freeman with N. H. McLeod, Jr., Miss Susanne Tucker, Miss Annette Tucker with Archie Allen, Miss Margaret Crowder with Hubert Jones, Miss Dorothy O'Donnell with Hubert Parker, Miss Landrum Norris with Sterling Manning, Miss Edith Norris with Henry Phelps, Miss Melissa Browne with Mayne Albright, Miss Anne W. White with Robert McGee, Miss Celia Wearn with Albert Dautridge, Miss Davetta Levine with Joe Sears, Miss Martha Galloway with Henry Royster, Miss Mary Helen Keller with Paul Tillery, Miss Letitia Mason, Miss Elizabeth Barber and Mr. and Mrs. George Thompson.

The formal presentation of more than fifty of the State's most attractive young ladies to society followed this march. As the debutantes walked up on the stage and met their marshals and were presented, and then left the stage to begin the debutante figure, Ted Williamson and his orchestra from Oil City, Pa., played "Moonlight and Roses." After the presentation, wide canopies spread over the stage gave way and showered the girls and their escorts with rose

DR. BROOKS DELIVERS ADDRESS TO FRESHMEN IN FIRST ASSEMBLAGE

The first assembly period for the Class of 1933 was held last night. Dr. E. C. Brooks, president, presented the deans of the several schools, who made appointments with the men enrolled in their respective divisions for group meetings today.

Dr. Brooks discussed the educational objectives of State College, emphasizing the necessity for students to decide upon a definite vocational aim.

"We have been studying freshmen for a long time," said Dr. Brooks, "and we have observed that they may be divided into four main groups. I wish to point these out to you here tonight and to help you, if possible, to decide for yourself in which group you will be classified.

"The first and highest of these groups are those men who have a worthy aim and strive earnestly to attain it. Nearly all of these men succeed. Second, those who are undecided relative to a definite vocation, but seek to discover the right aim. Many succeed and some fail. Third, those who just come to college with no purpose in mind, but are later aroused to seek a worthy aim. A few of these succeed and many fail. And, fourth, those who are aimless and remain so, drifting from classroom to street. These men are shiftless, as a rule spendthrifts, and sooner or later are removed from college. It is a mistake for such as these to come to college at all.

"The object of State College," continued the president, "is to aid in the development of manhood and womanhood, and to direct our students into some worthy vocation. The college will strive to do its part, but all of us to a certain extent are self-made. If the college does its part well, what is your duty? I want to suggest some of the major factors in self-making.

"First, I would mention a dependable character, a character based on a standard of morals, and the greatest agency in the development of character is the church. Then, too, we cannot emphasize too strongly the need for common honesty, in the classroom, in dealing with your fellow students and with the public. I would urge you, too, to safeguard your finances. Education is costly, and reckless spending has deprived many students of the opportunities of an education and embarrassed parents.

"You should cultivate the finer courtesies and good manners. One of the most difficult lessons that a young man learns, and one of the most valuable, is how to present himself properly to his friends and neighbors and to strangers. Have a care for your physical development. A sound mind in a sound body is a most valuable combination.

"Lastly, increase your knowledge and skill, broaden your culture that you may have the mental equipment to develop successfully towards your great aim."

petal confetti. The figure was led by Mary Johnson, Raleigh debutante, with Karl Kooz, vice-president of the Terpsichorean Club. As the groups formed the figure, the orchestra played "Roses of Picardy." General dancing followed the ceremonies, which were some of the most beautiful ever witnessed in the State. More than 5,000 spectators filled the galleries around the auditorium to see the ceremonies.

Dogs—and Dogs

Sailor: "What are you looking for, Miss?"
Miss: "They told me that an old sea dog was to be found on this pier, but I don't see it anywhere."

ANNOUNCEMENTS

Freshmen Cheerleaders

All men interested in cheerleading remain after the meeting tonight and see the cheerleader. If you cannot be present at this time, meet in Pullen Hall Monday night, September 23, at 6:30.

De Molay's Notice

You will find a welcome awaiting you from Professor "Dad" A. H. Grimshaw, of Raleigh Chapter, Order of De Molay. Watch for our first meeting, which will be announced through this column.

Freshman Journalists

If you think you can write and are willing to work, a welcome awaits you in THE TECHNICIAN office, which is located in Primrose Hall.

CollegeLaughs

Seems That Way

One of the two girls in the bus was reading a newspaper.

"I see," she remarked to her companion, "that Mr. So-and-So, the octogenarian, is dead. Now, what on earth is an octogenarian?"

"I'm sure I haven't the faintest idea," replied the other girl. "But they're a sickly lot. You never hear of one but he's dying."

Dead Give-Away

"I've let my moustache and beard grow an dam wearing blue spectacles. How did you manage to recognize me?"

"By my umbrella."

Apprehensive

Employer: "I would like an increase in salary, sir, as I am going to be married."

Employee: "And you would like to have a little bigger fund to draw on for household expenses?"

Employer: "No, it isn't that. My future wife knows exactly how much I get, and I would like a little extra for my own use that she doesn't know about."

The Old Joy-Killer

Ephraim: "How's your rheumatism this morning, Lucinda?"

Lucinda: "It doesn't bother me at all."

Ephraim: "That's too bad! We need rain badly for the crops."

Bright Ensemble

Al Falta: "Well, Rube, what on earth air ye paintin' yer old dung fork sech a bright red fer?"

Ruge Arb: "I was readin' 'all about them up-to-date color schemes an' I want it to match my red rubber boots."

Slightly Mistaken

Gene: "What is your worst sin?"

Fane: "My vanity. I spend hours before the mirror admiring my beauty."

Gene: "That isn't vanity—that's imagination."

All-Important

Campaign Spellbinder: "And now, fellow citizens, we come to that greatest question of all—a question whose outcome is awaited with bated breath and riveted gaze. What is that question; what is it, I ask you?"

Voice in Audience: "Are the girls' skirts going to get any shorter?"

Hewing to the Line

Mother: "Jimmie, if you saw a man starving would you give him a piece of your pie?"

Jimmie: "No, mother. You said a person shouldn't eat pie on an empty stomach."

Softening the Blow

"Take a seat, Miss Smith," said the always tactful manager to his new stenographer. "You are a very handsome looking young woman! You dress neatly and you have a well-modulated voice. I might add that your manner is at all times charming."

The girl blushed as she replied: "Oh! you shouldn't pay me so many compliments."

"That's all right," said the manager. "I merely want to put you in a cheerful frame of mind before taking up the matter of your punctuation and spelling."

Bad for Father

"Jimmy, I wish you would learn better manners; you're a regular little pig at the table," said Jimmy's dad. Silence on Jimmy's part. Then, to make it more impressive, Jimmy's father asked, "Do you know what a pig is, Jimmy?"

"Yes, sir," said Jimmy, meekly, "it's a hog's little boy."

Wouldn't Worry Him

The kitchenware demonstrator desired to call the next day.

"That's my busy day," said Mrs. Jordan. "I usually have so much to do that you would probably find me in a whirlwind."

"Oh, that's all right, madam," the demonstrator replied. "I am used to seeing housewives in their komonoo."

FORESTRY DEPARTMENT ENLISTS SERVICES OF TWO NEW PROFESSORS

Ralph W. Hayes, professor of forestry, and DeLanson Lenhart, graduate assistant, have both been added to the newly created department of forestry. They will be associated with Dr. J. V. Hofmann, head of the department.

Mr. Hayes is a graduate of the Iowa State College, with a Master's degree from the same institution. In addition to his scholastic work in Iowa, Mr. Hayes worked for nine years in the forest service of the Department of the Interior, having charge of special work on Indian reservations. He also taught for two years in the forestry department of the Colorado State College at Fort Collins and for three years in Louisiana State University. While in Louisiana he had much experience with the reforestation program of the Great Southern Lumber Company and published a bulletin dealing with that work.

Dr. Hofmann, in commenting on the fitness of Mr. Hayes, said that he has had experience with forestry problems in all sections of the United States, and his work in the South especially fits him for undertaking many of the problems confronting the forest owners of this State.

Mr. Lenhart was a former student of Dr. Hofmann at the Pennsylvania State Forest School at Mount Alto, where he was graduated in 1927. Mr. Lenhart made a tour of Europe in 1926, studying the community and farm forests of that continent.

Indications are, State College officials said, that the new department of forestry will be one of the most popular and valuable departments of the college. Though offering courses for the first time this fall, advanced registrations are good, and Dr. Hofmann looks for a heavy enrollment from agricultural students. The teaching work will be closely allied with the extension program which is being developed in the State under the direction of R. W. Graber and the county agents of the extension service.

UNIVERSITY BEGINS 136TH YEAR WITH FIRST ADDRESS BY PRESIDENT H. W. CHASE

Yesterday was the opening day of the University of North Carolina. President Harry Woodburn Chase stated that with the constant in-

crease in extra-curricular activities in colleges all over the country, students entering upon a career should keep always in mind that their chief aim is to get an education.

The formal opening marked the beginning of the 136th year of the oldest state university in America. The exercises were held in Memorial Hall, with Francis F. Bradshaw, dean of students, presiding. Dr. Chase delivered the address, and Rev. Eugene Olive, pastor of the Baptist church, conducted the devotional exercises. Appropriate musical selections were rendered by the Carolina Tar Heels Orchestra, under the direction of Alex Mendenhall.

Welcoming both the old and new students, Dr. Chase urged them to make the most of every opportunity for growth during the year.

"Participation in social organizations, athletics, and other extra-curricular activities is fine and commendable, but students should bear in mind that their main objective, after all, in coming here is to get a college education," he said.

"Studies come first and should not be allowed to suffer because of participation in the various student activities, although the latter are important."

"Don't live in a partial world. Learn to live life steadily and as a whole, and not in the compartments and sections in which some of us are prone to pass our existence.

"Take part in athletics, join a fraternity, or take part in any of the numerous extra-curricular activities,
