REPRESENTATIVE FROM HOLLYWOOD TALKS TO LEAZAR

L. A. Wilkinson Answers Critics of Leazar Literary Society

COLLEGE MEN DIRECTORS IN MOVIES, SAYS SPEAKER

Leazar Men Fail to Give Specific Faults When Challenged by Speaker—Motion Pictures Catter to Public and Must Necessarily Be Exaggerated, Says Movie Representative—Also Points Out College Films Directed by College Men.

Lupton A. Wilkinson, secretary to Will Hays who is president of the Motion Pictures Producers and Distributors of America, defending the collegiate movie before the Leazar Literary Society of North Carolina State College Wednesday, pointed out that motion pictures cater to the public and necessarily have to be exaggerated. Leazar Society recently tabulated and sent Mr. Hays, as well as newspapers throughout the country, a list of eight alleged defects in motion pictures dealing with college life.

"College pictures are made by college folks and most college pictures are made on the campus and acted by students of Southern California," Mr. Wilkinson said in answer to the claim of the society that college pictures should be made by college men.

Mr. Wilkinson read the titles of many of the last "movies" dealing with college life, and in nearly every case he cited that the directors, writers, and actors were college men and women, most of them graduates.

Tracing the changes in the types of plots used by the movies in the

Leading Colleges Send Men To Hear Dr. John R. Mott

"From all my work in foreign lands the most dominant impression that comes to me is that the forces of pure Christianity as they face the world today are coming in contact with a world situation that is absolutely unprecedented in the history of the world," declared Dr. John R. Mott, founder of the World's Christian Federation and chairman of the International Missionary Council, in speaking at the State College Y. M. C. A. to a group of outstanding Christian students selected from the leading colleges in North Carolina.

Among the colleges represented were Duke University, E. C. T. C., Guilford, Carolina, Atlantic Christian, Wake Forest, Greensboro College, North Carolina State College, N. C. C. W., Meredith College, and Salem College—90 persons being present at the dinner.

Dr. Mott was introduced by Col. C. C. Early of the R.O.T.C. unit at State College. E. W. Buchanan, president of State College Y. M. C. A., presided at the meeting. Thanks were returned by the Rev. E. M. Po-

JUNIOR WOMAN'S CLUB WILL HAVE CHARGE OF HONEYCUTT'S SHOP

On Wednesday, December 18, the Junior Woman's Club of Raleigh will have charge of Honeycutt's London Shop downtown, on the corner of South Salisbury and West Hargett streets.

Sara Busbee, prominent member of Raleigh's social set, will be manager of the store for that day. The club will receive ten per cent of the total receipts of sales for the day, which will be added to the charity

STUDENT PUTS MOLASSES IN COLLEGE AUTO

Cars lubricated with molasses won't run at all, according to T. T. Wellons, superintendent of buildings at State.

"Mr. Harris, over at the Bull Hall, gets molasses in 5-gallon cans and gives them to us to put gasoline in," he said, "and the last one he gave us included about half the molasses. We didn't notice it and filled it with gas. When it got in the carburetor something went wrong. We had to chisel it out, and also buy a new battery."

Mr. Wellons says he is going to be more careful from now on.

Riddick Addresses Pine Burr Members At Thursday Meet

Dr. W. C. Riddick, dean of the school of engineering at State College, made a talk to the members of the Pine Burr last Thursday evening, December 5, at their regular meeting in the Y. M. C. A.

He told the members that he had dealt with college students for forty years, and that he was of the opinion that the best index to the success that a man would make in life after he finished school was his scholarship record, which is the most important phase of college life; that scholarship was not good grades unless the grades were a true measure of learning. He emphasized the fact that any average student could attain a high scholastic standing without working himself to death or becoming a bookworm.

Dr. Riddick said that many might think him hard and old-fashioned when he said that the student should not try to select his courses, but should take the tasks as he came to them daily and let the outside activities be secondary. They are even more secondary in a school like this where a man is preparing himself for a specific occupation in life, because a man does not have the time to do everything in his stay here.

"The most important thing in college is the curriculum," says Dr. Riddick, "and if it were not the most important I would quit teaching and coach football or run a dancing school."

Dr. Riddick gave activities a place in school, but said that the first duty of a student was to apply himself to his studies, and then when he had mastered them he would advise any college man to engage in football, societies, or anything else that he wished to, and that he would find it profitable.

He pointed out that a good scholarship record is a good index to the

DELTA SIGMA PI INITIATE NINE STUDENTS SATURDAY

Clarence Mitchell of Raleigh Is Principal Speaker at Meeting

Nine men were initiated into the Delta Sigma Pi last Saturday at a meeting starting at 1:30 in 101 Peele Hall. Directly following the meeting, a banquet was held in the north end of the "Y."

Clarence Mitchell, of the Mitchell Printing Co., of Raleigh, was the principal speaker of the evening. His speech on "Foundation For a Business Career" dealt with some of the practical problems that the students will have to solve when they enter the field of business.

"Christian character is the main essential," stated Mitchell. "Begin with this essential and build foundation on God's principles. Have faith in God and a confidence in yourself. Do your job just a little better and finish what you start," further admonished Mr. Mitchell.

"Apply the Golden Rule; whatever vocation you follow, think of the others always. Gain all the information pos-

Man-Hunting Is Co-Eds' Purpose At College, Says Former Student

PUBLICITY SEEKER DESPISED, SAYS COLLEGE JOURNALIST

Gives Talk to Stewart Robertson's Class on "Rewards of Journalism"

"If there is any one thing that the average journalist despises it is the person who is seeking personal publicity," declared Frank H. Jeter, extension editor here, in an address Tuesday to students in agricultural journalism on "The Rewards of Journalism."

Mr. Jeter said that although the major reward of the journalist is his opportunity and ability to help others, the financial return is sufficient to afford him a comfortable living if he consistently works and studies his profession.

"Write about the things you know about," Mr. Jeter advised the students. "Knowledge is the foundation and source of all good writing." Write clearly, simply, constructively, and briefly, he continued, for a newspaper is written for all classes of people.

The extension editor pointed out that journalism courses only give the student the mechanics of news writing, and that the difference between success and failure lies in the basic supply of knowledge the writer has tucked away under his hat.

Mr. Jeter pictured the present-time as the golden age of journalism, and pointed out that competition is so strong in literary lines that a person choosing journalism as his life's work must be prepared to get a job and have ability to hold it.

AERONAUTICAL SOCIETY TO HAVE FLOAT AT FAIR

As a means by which to create more interest in aviation at State College, the Aeronautical Society has started plans for the building of a glider, which will represent the society in the Engineers' Fair. The glider will serve a twofold purpose; besides being used as a float in the fair it will probably be tried out and experiments made with it which will be of much practical value to the boys in aeronautical engineering.

The glider will be built by the members of the society and is expected to create much interest.

College Boosters' Club Elects Charles Belvin First President

At a banquet held in the north end of the Y. M. C. A. Tuesday night the Boosters' Club organized and elected the following officers for the ensuing year: Charles H. Belvin, president; W. R. McRacken, vice-president; and H. G. Love, secretary and treasurer.

The Boosters' Club is an organization sponsored by student government, the purpose of which is to unify and enrich the State College student life. This club functions without the use of a written constitution. Nothing pertaining to the welfare of this student body and the progress of North Carolina State College shall be considered beyond the scope of the serious consideration of this body.

The members of the faculty or administration who are members of the club are: the college president, the deans of the college, the commandant, the graduate manager of athletics, the professor of physical education, the comptroller, the director of music, secretary of the Y. M. C. A., chairman of the student advisory committee, and the superintendent of buildings.

The student members are: the dormitory captain, presidents of social fraternities, president and vice-president of student body, editors of college publications, presidents of all non-professional organizations, captains of varsity athletic teams, captain of the college band, presidents of the four classes, cadet colonel of

Editor C. F. Shuford Thinks Co-eds Have Ruined College

STATE ALUMNUS EDITS N. C. WEEKLY PAPER

"The Spirit of State College Has Been Sold Because a Few Thimble-Riggers Wanted to See the College Keep Up With the Joneses and Smiths, In This Case Duke University," Says Shuford in Letter To "The Technician."

"You (co-eds) have wanted to be different from the average run of women. You who have wanted to wear pants and spit tobacco juice and go to State College," says Charlie Shuford, editor of the Windsor News, in a letter to The Technician. "You co-eds who are upon the campus of State College have come to State College—a man's school—and broken down opposition to your coming. You have won a fight, but have RUINED the college."

"No longer is State College a school; it is now only an imitation of Duke, and a very sad one at that. Women—who caused man to be driven out of the Garden of

-Continued on page 2.

'Regular Boy' Latest Addition To List Of Campus Publications

The latest addition to the State College list of publications is *The Regular Boy*, a magazine of amateur fiction, published by Robert Berryman, freshman in architecture.

The Regular Boy is the only publication of its kind in Raleigh, and, so far as is known, in the State. The magazine contains fiction, jokes, editorials, and quite a bit of advertising. Berryman launched out in the field of journalism last January, and since then the circulation has increased by leaps and bounds to about 500—including subscribers in seventeen foreign countries.

In an interview Berryman would not say just what he thought the future of his magazine would be. His college work, he says, must come first.

Band Will Broadcast Over Station WPTF

Beginning the second week in January, the State College Band will broadcast regularly every Thursday night over radio station WPTF. These programs will be broadcast from the college band-room and will last about thirty minutes, as they did last year, and will continue throughout the year until about the middle of May.

The State College broadcasting band is composed of twenty-seven of the best musicians on the campus, picked from the three leading bands, under the direction of "Daddy" Price, and this year are putting out programs that will be of great interest to the radio public.

Short Story Prize Awarded Berryman By The Wataugan

The December issue of *The Wataugan*, glowing in a Christmas cover of red and green, came from the press Wednesday.

The second issue of the college literary magazine is well in keeping with the standard of modernity established by the first issue of the year. The opening article, "Wanting Menckensism," by Felix Italiano, points out the decadence of the man who has for so long been the evangelist and seer of modernism.

The modern note is also struck in the discussion, after the manner of the Forum, of the question of collegiate movies. C. E. Brake is the exponent of the attitude that college students cannot correct moving picture producers' deliberate misrepresentation of college life. J. W. Southerland takes the opposite viewpoint. Southerland's article incidentally includes the famous "eight points" mailed to Will Hays.

Another of the features of the magazine is "This Way Out," the short story by Robert Berryman awarded first prize in the freshman short-story contest. Lee Mercer also contributes a short story that is worth while.

The book review section contains discussions of two of the year's most important contributions to modern literature—Ernest Hemingway's "A Farewell to Arms" and Henry Handel Richardson's "Ultima Thule." "Life, Jr.," continues to be very entertaining. Perhaps its best single feature is Mike Whitehurst's clever cartoon contribution to the growing tradition of the yo-yo.

Virginia Anderson turns columnist delightfully in "Epigraphs." An interesting innovation is "The Waste-Basket," a department devoted to short, familiar essays and miscellaneous odds and ends.

ROBERTSON'S SIDE WINS RALEIGH SPELLING MATCH

Librarian Frank Capps Flops On First Word He Was Asked To Spell

"Spell 'thyme'—not 'time' by the clock," said Publisher John Park, referee of the spelling match held in the Wiley School auditorium Friday night.

"Y-M-E," said Frank Capps, State College Librarian.

"Sit down," said Mr. Park, and the spelling match for the championship of Raleigh was on.

Two teams under the leadership of Stewart Robertson, professor of journalism at State, and Tom Bost, Raleigh correspondent of the Greensboro Daily News, faced each other.

The match was well attended, and some of the foremost citizens of Raleigh had the courage to expose themselves to John Park's thrusts. Among these were a college president, Dr. W. C. Pressley of Peace, and a judge, Wiley Barnes of the Raleigh court.

When the smoke of battle had cleared away, after a grueling intellectual contest, only Mr. Craven of

FROSH CAP STAYS BY 15 MAJORITY WHEN 1013 VOTE

Freshman Class, Will Make Appeal To Trustees

132 UPPERCLASSMEN VOTE IN FAVOR JUNKING CAPS

Result of Ballot Shows That Vote Finally Narrows Down to Upperclassmen versus Freshmen—Cap Disturbance Began Here When Four Hundred First-Year Men Gathered on Campus to Protest Sentence Imposed on "Mope" Comiskey.

The North Carolina State College freshmen will continue to wear the fresh rat cap, according to a vote of the student body of 514 votes for retention and 499 for abolition, which gives a majority of fifteen votes to the upperclassmen. The question was made an issue resulting from a petition of Arthur H. Rogers, president of the frosh, when called for a secret ballot of the student body.

Voting on the "cap question" was conducted separately for the two classes. The tabulated figures of the frosh and upperclassmen are: Frosh, 367 for abolition and 86 for retention, and upperclassmen, 428 for retention and 132 for abolition.

The freshman class president stated that the next move of the class of 1933 would be to present the "cap question" to the State College Board of Directors for final consideration. He said the majority of the frosh were in favor of abolishing the cap and that all possible steps would be taken to comply with the wishes of the freshmen.

The result of the ballot shows that the question finally narrowed down to a vote of the upperclassmen versus the frosh, with the number practically

Olsen Addresses Chemical Society At December Meet

An address by Dr. J. C. Olsen, vice-president of the American Institute of Chemical Engineers, featured a meeting of the Society of Chemical Engineers held Thursday evening, December 5.

Dr. Olsen announced the early establishment here of a student chapter of the American Institute of Chemical Engineers at State College. At present only fifteen student chapters of the institute have been established, and this is the first chapter to be granted to a southern technical college. The board of directors of the institute were strongly impressed with the type of technical education given at this institution. At its annual meeting in Asheville last week Dr. E. C. Brooks, president of State College, made an address at the banquet.

Professor A. H. Grimshaw gave a paper on "The Relation of the Chemical Engineer to the Textile" -Continued on page 2.

PROF. W. H. DARST ELECTED 1930 COMMITTEE CHAIRMAN CROPS JUDGING CONTEST

Prof. W. H. Darst, of the agronomy department, was elected chairman of the committee in charge of the 1930 International Collegiate Crops Judging contest, at the meeting of the State representatives of the Crop Improvement Association at Chicago this week. Professor Darst was one of the principal speakers at the convention. The Crops Judging contest next year will be held at the International Livestock and Grain Exposition at Chicago. Heretofore the contest has been sponsored by the International Livestock and Grain Exposition, but the 1930 meet will be held under the auspices of the National Crop Improvement Association.

Richard C. Tucker Is Cadet Captain Of Military Unit

Pictured above is another Raleighite who has received a few honors at State College since his entrance here four years ago. It is Cadet Captain R. C. Tucker, who is on the regimental staff of the R.O.T.C. unit.

His work includes the planning and training of military tactics as far as the student corps is concerned. Besides his high rank in the R.O.T.C. unit he has other honors, such as Phi Theta, Sigma Pi, Chemical Engineering Society, and Scabbard and Blade. He is enrolled in the school of engineering, majoring in chemistry.

There is in the hands of the military department a letter from the commander of the Chemical Warfare R.O.T.C. camp at Edgewood Arsenal, Maryland, where Captain Tucker attended camp last summer, stating that he did very well at the camp in all his work, as well as making an average of 75 per cent as a pistol marksman.

Colonel Early is well pleased with the work that Captain Tucker has been doing and the showing that he has made for himself as well as for the school and unit.

SENIOR RATES HIGH IN MILITARY UNIT

CAPTAIN R. C. TUCKER

Juniors and Seniors In Const. Engineering Plan for Organization

At a recent meeting of the Juniors and seniors in the school of construction engineering plans were formulated for an entirely new organization made up of students in that particular school.

"There are only three schools in the nation at present offering a curriculum in construction engineering, and not one of these has a society for students taking that course. Therefore, local students are very anxious to get their organization on foot at once.

Professor Gelle, head of the department, delivered a speech to the 22 men present, stating the purpose and function of such an organization. At the close of the lecture the following officers were elected: H. D. Pinkston, president; P. K. Cowhig, vice-president; G. G. Eason, secretary and treasurer. The committee to draw up the charter are: Frank Clark, chairman; Ed Bethea, assistant, and G. G. Eason, junior adviser.

At the next meeting of the group, which will be held December 16 at 6:45, Earle Whitton, president of North Carolina branch of A. G. C., will deliver a speech on a subject pertaining to construction engineering.

He (earnestly): "Say something soft and sweet to me, dear." She: "Custard pie."

Man-Hunting Is Co-eds' Purpose At College, Says Former Student

(Continued from page 1)

Eden. Ages have not changed you. You still drive men out of the places where they belong—some to fame, and others to madness," continued Editor Shuford.

Mr. Shuford states: "Men gnash their teeth when you cross your legs on class and use your sex and winning smile to make an 'A.' Men gnash their teeth when you copy from books and ride your way into the highest honor societies.

"Co-eds, you have won; but where is your victory? You have come to college just for man-hunting. You have seen hundreds of college men, but you have not conquered one. Girls are no longer a mystery to boys. No boy who cares to investigate women will ever be puzzled by a painted cheek, a short-skirt has who calls herself a co-ed," continues the editor.

"The spirit of State College has been sold because a few thimble-riggers wanted to see State College keep up with the Joneses and Smiths, in this case Duke University. There is a landslide coming. The day when the State of North Carolina will allow itself to be bled for an unneeded school of education at North Carolina State College of Agriculture and Engineering, Co-eds, you have won, but State will LOSE."

This letter was signed in a very interesting manner: "C. F. Shuford, Windsor, North Carolina." Then he further explains himself as "Expelled quietly for missing classes by a faculty which did not agree with my style of writing the truth about State College." "That faculty did not have the backbone to say 'Shuford, you are expelled because you wrote articles that we did not like.'"

Riddick Addresses Pine Burr Members At Thursday Meet

(Continued from page 1)

success that a man would make after leaving school, because it shows that the man has mastered the subject-matter, that he has applied himself as he would have to apply himself in the outside world if he is to attain distinction.

The student who comes here to prepare himself for an occupation will have to sacrifice many things that he might enjoy while here if he is to succeed after he leaves. He must put his studies first and allow nothing to take him away from them until they are done. He cannot be a good student and at the same time be the college hero.

Delta Sigma Pi Initiate Nine Students Saturday

(Continued from page 1)

sible and use it through the use of the Golden Rule. Whatever you make in life will depend on the things that you do between the age of 24 and 40. Treat everybody fairly and be honest with yourself."

Upon speaking of knowledge of profession and business, Mr. Mitchell said, "Knowledge of your profession and of business is of primary importance. Study modern methods. Use common sense. Study problems and work them out. If you make mistakes, profit by them; don't make the same mistake twice. You must get experience and apply knowledge in order to be successful. Plan your work and work what you plan," he concluded.

The members of the faculty present were: E. F. Brown, R. W. Green, E. Goehring, R. O. Moon, and C. B. Shulenberg.

Representative From Hollywood Talks to Leazar

(Continued from page 1)

past 33 years, the age of the motion picture industry, Mr. Wilkinson prettily but insistently said the college picture likely would be a thing of the past. The public is fickle in its demands, and it is the public that governs the plots, he continued.

In answer to specific criticism of "The Wild Party," by Edwin H. Paget, associate professor at State College, Mr. Wilkinson showed that the picture was directed and adapted by college graduates. J. Dorothy Arzner, director of the picture, was a former student of the University of Southern California, while the dialogue and adaptations were the work of Lloyd Shelden, with A.M. and A.B. degrees from Harvard.

"Give us specific criticism of specific pictures and all will be attended to," Mr. Wilkinson said, when he found the members of the society unable to give definite faults at the meeting. He also told the students that constructive criticism would do much more to effect a change in the movies than would destructive. "When you see a good picture, one that you like, praise it," admonished the movie man, and that will do much to get public interest in that type of picture.

The student critics were advised to get in connection with the college men in Hollywood and plead their case direct to them. More can be accomplished by this method than in any other way, he continued.

When asked whether it was unethical for a person to give a letter to the press before giving the addressee time to receive it, Mr. Wilkinson refused to make a direct statement, but said that the practice was fast becoming obsolete. "President Hoover," he continued, "will not answer a letter that appears in the press before he receives it, and this is the policy of all other big men, which includes Mr. Hays."

Olsen Addresses Chemical Society At December Meet

(Continued from page 1)

Industry," and Dr. E. E. Randolph led a discussion on the "Purification and Disposal of Waste Gas Liquor from City Gas Plants."

Proceeding further, Dr. Olsen spoke on "Chemical Engineering as a Profession." He declared that while the chemical profession acquired its present name only a few decades ago, it had been practiced for the past three or four thousand years, certainly since the extraction of iron ore in 1000 B. C. Chemical engineering is one of the main branches of engineering, and is in itself a science and an art. One accepted definition of engineering is "The science of controlling the forces and of utilizing the materials of nature for the benefit of man, and the art of organizing and directing human activities in connection therewith." Illustrating and applying this definition to the chemical branch of engineering, Dr. Olsen declared that the control of the forces of nature and the utilization of our natural materials were primarily the work of the chemical engineer—as examples, the fixation of atmospheric nitrogen and the recovery of bromine from sea waters. Furthermore, this power of the chemical engineer should not be used in any way that will be harmful or destructive to mankind. Economically interpreted, all chemical engineering must be on a sound financial basis; the chemical engineer should not spend time nor money in the manufacture of an unmarketable product.

But a chemical engineer must be more than a scientist, Dr. Olsen declared, as he took up the second part of his definition. He should be a student of human nature, of financial and industrial organization and management. He should be able to receive orders as well as to issue them. A composite survey of engineers as to their ideas of the qualifications of a good engineer revealed a surprisingly predominant sentiment for character as a prime essential, rather than technical ability. In closing, Dr. Olsen again emphasized the importance of developing personality, integrity, and other essentials of a forceful character as a part of engineering education.

Robertson's Side Wins Raleigh Spelling Match

(Continued from page 1)

the King Drug Company was left standing, thus bringing the victory to Professor Robertson's side.

"In an imaginary interview with Professor Robertson, captain of the Wiley team, he explained his victory by saying: "In choosing my team I decided that the only way for me to win was by selecting the very best material available, so I chose my men with the utmost care. After looking carefully over the entire faculty, I decided that Dr. L. F. Williams was the only one I wanted. Then I looked over the entire student body and decided on Jimmy Parker, Edgar Buchanan, and Mitchell Lightfoot. I knew none of the rest could spell, and I wasn't sure about these. Then I decided it wouldn't be fair to leave the library out, so I asked Frank Capps—but I put him on the opposing side.

"Anyway, we established the fact that Dr. Williams is the champion speller of the faculty, and Lightfoot is the champion of the student body. Mr. Capps has the doubtful honor of leading the Murphy team to defeat. Prof. Louis Wooten tried to do the same for the Wiley side, but was checkmated."

Frosh Cap Stays By 15 Majority When 1,013 Vote

(Continued from page 1)

balanced, when 86 frosh wanted to keep the red lid and 132 upperclassmen were in favor of junking the paraphernalia.

The freshman cap disturbance began at State College December 15, when 400 frosh held a mob meeting to abolish the red headgear, because of a fine imposed by the Court of Customs on "Mope" Comiskey for not wearing the "F" cap. Comiskey was sentenced to wear a dress for thirteen days for not wearing the frosh cap. The fine was later commuted when the Council changed the sentence to five dollars and the wearing of the "Fresh rat cap" for the same number of days.

The college polls were held under the Australian ballot system and the voting was conducted in an orderly manner, according to Henry Love, of Burlington, vice-president of the Student Body.

Love stated that approximately half of the North Carolina State College student body did not vote on the question.

College Boosters' Club Elects Charles Belvin First President

(Continued from page 1)

the number has doubled during the last few years.

Paul Choplin next introduced Dr. C. Taylor, dean of the graduate school, J. Dr. Taylor spoke of school spirit and what State College should mean to the students. He stated that State College is the most important institution of learning in the State, and substantiated his statement with the fact that State College trains men for professions in which 91 per cent of the people are engaged. He further stated that since the club was composed of the heads of the different organizations, only the realization of the importance of each organization would insure success for the club. He closed by admonishing the club to be a working organization.

Several well-timed and appropriate remarks were made by Paul Choplin relative to the manner in which the club would accomplish its aims. He stated that any improvements of the college (giving a new stadium as an example) would be projected and boosted by the club.

The meeting closed with a standing vote of thanks for Paul Choplin and W. N. Hicks for their work in organizing the club.

The following members of the faculty and administration were present: Dr. E. C. Brooks, Dr. C. C. Taylor, Dean E. F. Brown, Dean Riddick, Dean Nelson, Dr. Metcalf, Dr. Sernon, "Daddy" Price, Professor J. D. Clark, Professor W. N. Hicks, E. S. King, and T. T. Wellons.

Atlantic Christian-N. C. State Game Opens Basketball Here

Game Will Be Played In Gym Wednesday Night

PT. JOHNNY JOHNSON AND HAAR ARE READY

ly Two First-String Men Reporting From Last Year's Team; Woodworth and Brown, Sophomores, Likely To Get First Call; Gus Wright May Be Other Guard

State will open its 1929-30 basketball season next Wednesday night when it meets the Atlantic Christian College team here in the Frank Thompson gym at 7:30.

Coach Gus Tebell has been with the team only a few days in getting men ready for their first game, but Hank Goodwin, all-southern center last year's southern champs, has led the squad going through workouts for three weeks, and the men are in good condition.

A scrimmage session will probably be held tonight.

Tebell has a good bunch of men to pick his starting line-up from. In forward position either Larry Ar. Bill Woodworth, Jimmy Brown, or Skeet Atkinson will start. Captain Johnny Johnson will be at the head of the guard, with Gus Wright, Brake, or Bud Rose at the center. The center post will be occupied by either Hunk Waring or Armon.

Not much has been heard from the Christian camp, but Coach Tebell is expecting a hard scrap from the team visitors.

At the University of Maryland the co-eds built themselves a worthy house—laid the brick, moved the beams themselves, and did all the rest alone.

About the only difference between the men and when the country belonged to the Indians, according to the Dr. Plainsman, is that in the days of old it wasn't the squaws who hunted and went on the warpath.

The Pipe even helps you say nothing at all...

YOU'VE noticed how expressive the pipe can be, what meaning it can put into the simplest gesture. The pipe even helps you say nothing at all—and that, O mortal, takes a man among men!

Men to their pipes and women to their lipstick—but suppose you had no pipe and faced repression? Suppose you had no tobacco to put in your pipe? Empty pipes make empty gestures that have no meaning. Filled with good tobacco, your pipe becomes eloquent. Filled with Edgeworth, it is Olympian!

What, no Edgeworth? Lose not a moment—haste to the mails with the coupon. Let the machinery of government rush to you a free packet of good old Edgeworth, delicious and friendly Edgeworth, full-flavored, slow-burning, cool.

EDGEWORTH SMOKING TOBACCO

CAPTAIN JOHNNY

Johnson, who will engineer his first basketball game Wednesday night when State meets Atlantic Christian College here. Johnson was an All-Southern guard last year.

SWAN SONGS BY ELEVEN FOOTBALL MEN THIS YEAR

Captain Lepo Heads List Of Departing Warriors Of the Gridiron

Eleven State College seniors and members of the State College Wolfpack saw their last day in State College football togs a few weeks ago when State played South Carolina. The men singing their swan song were Captain John Lepo, May, Vann, Smathers, Morgan, Melton, Choplin, Jordan, Jeffrey, Aderholt, and Crowson.

Manager Johnson was also among those shedding tears on the sideline. May, Vann, Smathers, Lepo, Melton, and Jeffrey were classed as regulars, and all turned in a good game. The positions these men left open will be rather hard to fill next year, and students of State College will greatly miss their names in the lineups that will be tabulated next fall.

10 O'CLOCK SOPHOMORE GYM CLASS WINS HANDBALL TEST

Tennis Finals Will Be Played This Afternoon On Courts Next To Gym

The sophomore hand-ball tournament ended this week with the ten o'clock section, Monday and Wednesday, carrying off the honors. This team won over teams from the rest of the sophomore gym classes.

The sophomore tennis competitions were scheduled to be finished last week, but, due to inclement weather, will not be finished until today. The finals will be played on the courts beside the gym.

Thirty-seven organizations have signified their intention of entering teams for the intramural basketball league, which will start the thirteenth of January. The schedule is now being made out, and the winners of this sport will be the campus champions for the year.

FOOTBALL SUPERSTITIONS

"I have never worn a pair of football stockings in a game since my high school days," says Al Marsters, Dartmouth's star halfback, in his article, "Football Superstitions," in the November College Humor.

"This atmosphere of superstition stayed with me through prep school and my freshman year at Dartmouth, and in my sophomore year I developed a new one. I had played fairly consistently, but not too brilliant, football during my freshman year, and consequently did not expect to make the regular position upon the varsity my sophomore year. I was surprised when the coach read my name off in the starting line-up of the first game, and having a slight feeling of inferiority as we went from the locker building, I was the last man of the first team to leave the building. From then on, throughout the rest of the season, I was the eleventh man to go upon the field. Naturally, when the 1928 season came around I was still the last man to go upon the field. Everything went well for the first three games and I was leading the scorers of the country at that time, when I cracked one of my bones in my ankle, and I believed my luck had left me."

Awards To Be Given Cross-Country Team Soon, States Coach

That probably awards to eight varsity and eight freshman members of the cross-country team will be issued was announced today by Dr. Ray Sermon, athletic director at N. C. State College, with the closing of the harrier season.

The athletic council was requested by Coach Alec Redfearn to award the monograms, as under the present ruling at State College only three members of the varsity and two of the freshman team would receive their letters. The ruling states that a man must finish the season with an average of ten points to his credit for the year, or place under sixteenth in Southern Conference meet or under sixth in the State meet. According to these rules only five members would have been awarded, but with the request of Coach and Captain Redfearn, the whole sixteen will be considered, and it is quite likely that they will be recommended by the athletic council, Dr. Sermon stated.

The following men from the varsity squad will likely receive the sweater and letter:

Coach and Captain Alec Redfearn, New Bedford, Mass.; J. N. Johnson, Raleigh; H. A. Hicks, Rocky Mount; J. R. Ashe, Whitsett; R. E. Truesdell, Charlotte; M. M. Alexander, Concord; W. E. Lawrence, Enfield, and W. F. Bowers, student manager.

The following freshmen will no doubt receive sweaters and numerals: Captain J. H. Troutman, Statesville; L. L. Rich, Tomahawk; W. R. Humphrey, Richmond; A. L. Drumwright, Norfolk, Va.; W. C. Huband, Winston-Salem; W. E. Harrill, Lattimore; A. E. Bennett, Asbury Park, N. J., and Student Manager J. M. Barnes, Ahoskie.

Preliminaries This Afternoon In Varsity-Freshman Wrestling

This afternoon, in the Frank Thompson Gymnasium, the first preliminaries in freshman and varsity wrestling will be staged, it was announced by Coach Drennan. The men have been working out daily for the past two weeks, and the bouts are being held so that Drennan can get a better idea of his men and find their faults, as if they were in a real match.

The schedule starts with meets booked for after Christmas, and Coach Drennan has announced a team that will represent State College as W. and L. Duke, and V. P. I. in the ensuing season.

The squad has increased, and at present about 35 men, of both varsity and freshman, have been working out steadily. No pairings were announced for the preliminary contest today.

To Deliver Address At Farmers' Mass Meeting In Pullen Hall, Dec. 18

A mass meeting of tobacco farmers from all parts of North Carolina has been called by Dean I. O. Schaub, the head of the agricultural extension service, to meet in Pullen Hall at State College, Wednesday morning, December 18, at 11 o'clock to decide whether or not a cooperative tobacco association shall be organized in this state.

James C. Stone, vice-chairman of the Federal Farm Board and tobacco representative of the board, has agreed to attend the meeting and to outline the policy of the Government in aiding tobacco farmers.

"The purpose of this meeting," Mr. Schaub said, "is to discuss the advisability of attempting the organization of a tobacco association. It is our plan to take a secret ballot of those in attendance, asking them to vote 'Yes' or 'No' on the question. Should they vote favorably, we shall ask for the appointment of an organization committee, which would have the responsibility of developing a plan and the actual organization of the association in the state."

Mr. Schaub said he did not consider it the job of the extension service to do the actual organization work.

FOR CHRISTMAS

Cigars, Cigarettes, Cigar Lighters, Tobaccos, Tobacco Pouches, Sheaffer's Pens and Pencils

LITTLE DOC MORRIS College Rendezvous Phones 4784-9197

Even though it will be the first basketball game played by State this season, the game next Wednesday night with Atlantic Christian College promises to be a good scrap.

Captain Johnny Johnson looks like he is back in his old-style form.

The Terrors lost a lot of good material last year, but the men working out down at the gym look plenty good.

Eleven senior football men sang their swan song with the last game of the year. They were May, Vann, Smathers, Morgan, Captain Lepo, Melton, Choplin, Jordan, Jeffrey, Aderholt, and Crowson.

If they play the game of life as they play football, their success is firmly established.

The barbecue the Wake County Alumni is giving the football men is worth working three months on the team for. Ask any of the men who went last year.

Carolina finished its 1929 football year in a great game, defeating Duke 48-7. The victory gave the Tar Heels second place in team scoring in the nation, being led by Southern California.

Self-Help Men Improve In Neatness of Books, According to Joe Moore

"The increase of neatness and accuracy in keeping the 'budget books' has been far beyond my expectation," said Joe E. Moore, head of Self-Help Bureau here, when interviewed by a staff reporter.

In September only one student received an "A" on his budget book. The increase of accuracy can be judged by the fact that in November eight men received "A's."

John C. McLean, of Lincolnton, N. C., won first place in the rating of self-help for the month of November by earning \$45.00 during the month. Fred W. Crews, of Summerfield, gave McLean a close run, earning \$25.00 for the month.

The total amount earned by 86 students keeping budgets was \$573.84 for the month; not including the students working in the dining hall. Mr. Moore thinks this was doing remarkably well considering the conditions prevailing.

"Self-help students show an increase in care of spending money and are spending it more systematically," said Mr. Moore. He further stated that 1,000 blotters have been distributed in the Hayes-Barton and Cameron Park sections, announcing self-help students at State College and their willingness to do odd jobs and other work.

It seems that there will continue

Eighteen Varsity Football Players To Get Monograms

Varsity football awards at N. C. State College, as announced by Athletic Director Ray Sermon, show 18 members of the Wolfpack as winners of the monogram in the season just closed.

Two members of the varsity squad, Ken Aderholt and Fred Crowson, were awarded sweaters with the athletic appreciation monogram in recognition of three years of service on the reserve team.

Varsity sweaters and service stripes were awarded to the following (figures indicate number of service stripes):

Mack Stout (2), Sanford; Al Vann (2), Salemburg; Jim May (1), La-Grange; John Lepo (3), Youngstown, Ohio; Herman Gardner (1), Greensboro; Boyd Smathers (1), Canton; "Bud" Rose (1), Marshall, Minn.; Henry Morgan (1), Tryon; "Jagle" Jordan (3), Raleigh; John Silver (2), Bandanna; Frank Gorham (1), Raleigh; Maurice Johnson (2), Marshall, Minn.; Gus Wright (1), Independence, Mo.; Basil Melton (3), Badin; Dick Dellinger (1), Cherryville; Norris Jeffrey (2), Raleigh; "Phil" Edmondson (1), Roanoke Rapids; Ed Davant (1), Greensboro; F. M. Johnson, student manager, Asheville; Ken Aderholt, Sanford, and Fred Crowson, Goldsboro, athletic appreciation monogram.

to be self-help students at State College, as about 15 applications for work during the year of 1930-31 have already been received from prospective candidates for entrance to the institution.

CO-EDS AND THE CAP

The election yesterday closed the question of the abolition of the freshman cap for another year. The freshmen will now wear the cap and it will be necessary for them to find something else to kick about. And as to the campus leaders, they can now turn their talents to a more worthy cause.

But after being told repeatedly that the co-eds were not required to wear the cap because they were not under the existing student government as it applies to the boys, and they would not be allowed to vote—they did! Yes, seven skirts wandered to the polls and cast votes. Three of these were freshmen who should be wearing the cap. It is presumed that they voted in favor of keeping the headgear (?)

For the officers of student government to allow such a violation of their word causes the other students to wonder if they are being treated fair. Why they would allow such a thing to happen is more than we can see.

COMMENT from other COLLEGES

By R. M. L.

We read in the Lynchburg College "Criticograph" that freshmen at Union College who do not buy their caps on time are given a close haircut as a penalty for their delinquency.

It doesn't say what they do if they don't wear them after they buy them.

At Salem an "Ideal Man" (we hope they find him!) and have interviewed four girls and published their ideas of what he should be.

One says that in looks he must be somewhere between John Gilbert and Lon Chaney, and must not wear spotted neckties. Another says he must be a college graduate (Carolina preferred), and must be an athlete and an insurance agent. The third girl has already picked hers, so she's excluded. He's a good-natured blonde, and the young lady merely says he "has everything every other girl wants her ideal man to have." The last girl seems to be desperately in love. She's even moved to compose a sonnet about him. He has wavy golden hair, lots of money, a raccoon coat, spats, a reckless past, and loves his likker!

Oh, well!

Read all of this, and pronounce each word distinctly—if you can!

"The Oosterbann, Mitterwainers and Ukeibergs, whose names harried headline writers and radio announcers, have gone, but the Big Ten has plenty of unique names to replace them.

"Ohio State offers Bueschenschuss, Ujehelyi, Kazmerchak, Wiragos and Erf, which Indiana matches with Magnabosco, Antonini and Hojnacki, among others.

"Wisconsin's threats to easy football conversation are Lubratovitch and Ketelaar, which are not so bad when Minnesota presents Pulkrabek, Kakela, and Oja.

"Illinois has Nusspichel and Yanuskus to stack up against Yunevick of Purdue, Diedendorf of Chicago, and Captain Joe Truskowski of Michigan."

From the Auburn Plainsman we plucked this peculiar bit of news:

"According to statistics issued by the University of Boston last year there were men in attendance from every State in the Union except Georgia. We suppose the Georgians were raising peanuts for the other students to eat on all solemn occasions, like at football games and picture shows."

It isn't often we find records of football games that lasted more than one afternoon, but we discovered this ambiguous piece of information in that thoroughly veracious periodical, The Raleigh Times:

"Charlottesville, Va., Oct. 19.—(AP)—Scott, right end for V. M. I., took a pass from Williams and raced thirty yards for a touchdown in the first period of today's game with the University of Virginia."

Columbia University houses some bright freshmen.

On registration day one wrote after the notation, "Give full name," the remarkable answer: "Same name whether full or sober." In the space for names of parents, another brilliant high school graduate wrote "Ma and Pa."

At Birmingham-Southern College recently the freshman officers—president, vice-president, secretary, and treasurer—were all co-eds.

Will this ever happen at State?

Through the Transom

R. E. Yates

This is an age of specialization. Brick masons specialize in brick masonry. Accountants specialize in accountancy. College professors specialize in teaching. Movie producers specialize in movie production. College professors know more about teaching than movie producers do. On the other hand, movie producers know more about the production of movies than do college professors. There you are.

Examinations start tomorrow. We wonder if our honor system will work as efficiently as it should. Last year saw State's honor system seriously questioned. Some stated that we had a wonderful system, but were sadly lacking in honor.

Two new organizations have recently been organized on the campus—the Dormitory Club and the Boosters' Club. These organizations will fill a long-felt need. They should, and in all probability will, make "State" a better college.

We are told that an examination of the records in the library revealed the following: One day only 60 books were taken out. Salaries and overhead divided by the number of books removed showed that each book removed cost the college \$147. Of course, 1,000 books could have been removed at the same cost that sixty were. But 1,000 books weren't taken. Students, the library belongs to you. Use it!

We wonder if Mr. King does not need to start an investigation about his president going on a country date and coming in with a "possum in his car, and coming in from a town date in such a state that he brushed his teeth with Mennen's skin balm instead of Listerine."

Before the reader commits himself further, let him pause and scan the following lines:

This column is not intended as a literary achievement. The spelling, grammar, and sentence structure will invariably be abominable. Dangling participles and split infinitives will be used with reckless abandon. However, the main object of this column is to give the reader a clear and concise account of events he is interested in. These accounts will be interspersed with some opinions. If our opinion happens to differ radically from yours, don't mention it.

Our director of registration, W. L. Mayer, not only dispenses credit points to the students here at State, but he has granted the "Little Girl's" request for some State stickers. Mr. Mayer, you are to be commended; you have undertaken a gigantic task of enlightenment. More power to you—you'll need it!

The freshman class voted almost unanimously to abolish the freshman cap. The three upper classes voted just as unanimously to retain it. In our childhood days we objected very vehemently (and as much in vain) to the spankings which were administered to us by our elders. We, too, needed the spankings.

The question: "When is a major a captain, or when a captain a major?" is puzzling many friends of Major (Captain) John Lepo. On the football field Lepo is a captain—when on the drill field he is a major. Just what is his official status in the classroom? "Mister?"

A lesson to anyone who may use it: When writing an open letter to a man, use particular care in mailing it. Be sure that the copy intended for the recipient is received by him before the newspapers receive and print theirs. It sometimes proves embarrassing for the recipient to receive newspaper clippings relative to an open letter six days before he receives the letter. We refer to none other than the one who is responsible for the mailing of the open letter to Will Hays. He received his under the circumstances outlined above. Was that not a most unethical thing?

A rather tragic affair took place in a four-room flat in Manhattan last week. The wife of a wholesale grocer eloped with one of her husband's customers. The grief-stricken grocer committed suicide. Creditors, when going over the effects of the couple, found the following items in a sewing basket: Two spools of black thread, some bits of lace, a pair of scissors, several needles, and a thimble (a token of the 1928 presidential campaign). On the thimble the following words were engraved: "Hoover—Home—Happiness."

Six Heifers Purchased

Six yearling grade Hereford heifers have recently been purchased by the Animal Husbandry Department from Mr. B. F. Shelton, Jr., near Speed, N. C. They were brought to the college farm, where they will be fattened and later killed by the meat classes. While at college they will be used for judging and feeding demonstrations by the freshman, junior, and senior animal husbandry courses.

ELECTS WILKINS PRESIDENT ANIMAL HUSBANDRY SOCIETY

Professor R. H. Ruffner Speaks To Club On Value of Grange Here

The Animal Husbandry Club at its regular meeting last Thursday night elected officers for the second term: J. S. Wilkins, president; W. H. Ferguson, vice-president; T. N. Cook, secretary-treasurer, and W. H. Brake, reporter.

The retiring officers for the present term are: W. H. Brake, president; D. H. Latham, vice-president; J. W. Crawford, secretary-treasurer, and J. S. Wilkins, reporter.

Professor R. H. Ruffner gave an interesting talk on the value of the Grange coming on this campus.

The Animal Husbandry Club has made great progress this year. With the aid of Professor R. H. Ruffner, head of the animal husbandry department, interest has been revived and the club reorganized. About twenty new men have been taken into the club this year, mostly freshmen and sophomores.

The programs this year have consisted of discussion of the Grange, Federal Farm Board, and other interesting topics. The program committee is planning programs for next term of many more interesting topics. These programs will be made out and posted a couple of weeks previous to each meeting. The big event of the year comes in the spring when the club has a barbecue banquet.

NOVEMBER IS LOW MONTH FOR SELF-HELP MEMBERS ACCORDING TO JOE MOORE

November was a low month in self-help circles, according to Joe Moore. There was a scarcity of work, but there were a number of students who reported their earnings as exceeding their expenses.

Mr. Moore says that there is a much better spirit shown in the way the budget books are being kept, and that the new system used by the Self-Help Bureau is succeeding better than had been expected.

Two men tied for first place on the excellence of their budgets. George K. Schaeffer and Albert H. Evans won equal honors on their monthly report, their work being neat and easily checked. There was also a tie for second place, R. M. Holder and W. E. Vinson having equal rating. John McLean, with a reported earning of approximately \$38, took first place in size of income.

The Phi assembly at Carolina debated the advisability of outlawing the practice of bumming. They decided not to do it.

Congratulations, Phi!

Antioch College has introduced what is believed to be the first collegiate "Leap Week," during which co-eds do all the dating.

Engineers Return From Annual Meet At New York City

Registration of the delegates consumed all of Monday morning and afternoon. As the students were at a loss for something to do, a trip to Hoboken was made.

Tuesday afternoon an excursion was made to the "Hellgate Station of the United Electric Light and Power Company." This station has a floor space of two acres and rises to a height of six stories. Enough electricity is generated to light and keep burning \$3,350,000 100-watt bulbs. In spite of the fact that the students had all of Tuesday afternoon, only a hasty inspection of the huge plant was possible.

The day of the student conference came Wednesday. Three inspection trips were offered: one to the N. Y. Times' press room, one to the Rocky Theatre cooling plant, and one to the Crispholen motorship. The latter trip proved very popular. The ship is owned by the Swedish-American Lines and is powered by two 22,000 h.p. Diesel engines.

At 12:15 a seven-course luncheon was served. All the notables of the A.S.M.E. were there and rendered many excellent short talks. At 2 o'clock the student branch conference was held. Representatives from thirty-five states and forty-six colleges were present. The State College branch received much applause, as it numbered more than any other branch which was located more than 75 miles from New York City. At the conference three addresses were given. The first address, "Possibilities in the Application of Engineering to Plant Economy in Industrial Plants," was given by A. Adler, consulting engineer, New York City. "What is Ahead of the Engineering Graduate?" by W. A. Hanley, chief engineer to Eli Lilly and Company, Indianapolis, was the second address. Mr. Hanley spoke of the characteristics of successful engineers and how to acquire these characteristics, and what the future held for the engineering graduate. Mr. Hanley is a very young man and an excellent speaker. The final address was given by L. A. Scipio, dean of engineering at Robert College, Constantinople. His subject was "Engineering in the Near East." He gave the history of Robert College. He told of the various developments of the college, and in a two-reel movie he showed the college as it is today. He gave the requirements of an engineer in the Near East and told the work in which they were engaged.

The students left New York Thursday morning for Philadelphia, where they inspected the Westinghouse turbine plant Thursday afternoon. After inspecting the plant they left for Baltimore, where they spent the night, returning home Friday night.

Those making the trip were: T. C. Smith, president of the local branch of the A.S.M.E.; C. H. Jourdan, M. Cooper, J. H. Douthett, G. O. Fornes, I. W. Leggett, A. B. Sim, William Wright, and E. B. Wort. The following professors made the trip: J. M. Foster, honorary chairman of the student branch; Dr. W. Dana and L. L. Vaughan, and M. Rothgeb, engineer at the State Hospital.

Saunders McLean, a preacher, son, has received the highest average ever received in the 225 years of the history of Yale. His average for three years was 96½.

Can any one at State College beat that?

Robert: "Have you a heater in your car?"

Arthur: "You bet she is!"

FUTURE MARKSMEN PREPARE FOR COMPETITIVE MEETING

Lieutenant C. H. Elms is Coaching State College Rifle Team

Lieutenant C. H. Elms and 16 array of future marksmen have been hard at work since the opening school, and the scores following will show that their work has proved worthy. Each month is held a company match. During the month of November the men fired on the outdoor range, and due to inclement weather all of them did not get chance to finish. However, the month will be different because the indoor range is being used.

Company D of the second battalion won the match for November, with Pardie, Rodgers, Bullard, Albert and King scoring a total number of 481 points. Company A was second with Lysterly, Brewer, Smith, Sha and Stokes scoring 479 points. Company E was third, with Whitehel, Wallace, Clapp, Meece, and Wild, scoring 472 points. Fourth and fifth places were awarded to Company and Drum and Bugle Corps, respectively, scoring 467 and 456.

A great deal of interest has been shown during the practice as well during the matches, and it is expected that next spring when a rifle team is selected to represent the school it will be one of the best in the country.

stantinople. His subject was "Engineering in the Near East." He gave the history of Robert College. He told of the various developments of the college, and in a two-reel movie he showed the college as it is today. He gave the requirements of an engineer in the Near East and told the work in which they were engaged.

Our advertisers were solicited with the purpose of putting before you dependable shopping points. Remember this, and feel perfectly safe in guiding your shopping by THE TECHNICIAN.

It is rumored that Jim Nasium is looking for a lot of dumb-bells. We have no suggestion as to where to find any.

Every one should believe in Santa Claus; and if they don't, we hope they get nothing for Christmas.

The war begins tomorrow, and even though the sides are uneven the chances should be for the students. Time and worry will tell.

Another columnist enters his contributions with this issue. His views may seem somewhat radical, but they are as he sees them.

TRAFFIC PROBLEMS

State College is somewhat unfortunately located along one of the main entrances to the city. Sometimes the traffic is so congested that persons attempting to cross Hillsboro Street are required to wait several minutes until the way is clear. Cars pass daily by the thousands and at a rate of speed that would make New York take notice.

During the last four years several fatalities have occurred to students that State College will always regret. In the past two months the night watchman of the college was seriously injured by a motorist. Our infirmary had its first occupants of the season when several students were knocked down by a hit-and-run driver. It is only a matter of time before another fatal accident is going to occur. Are the college and the city going to sit by and wait for this before action is taken?

The Blue Key, in their meeting last Friday, passed a resolution to petition the city of Raleigh to aid us in this matter by placing signs at the beginning of the college grounds on the outskirts of the city and at the other extreme in front of the College Pharmacy. In view of the fact that the college post-office and several shopping concerns are located across the street, it is necessary for every student to cross the street on an average of four times daily. With around 2,000 enrolled this will make a total of 8,000 crossings per day. It is up to each man to look out for himself, but with the presence of the hill just above the main entrance and a fast motorist coming the student is taken unawares.

COLLEGE COURT HARGETT AT SALISBURY

Lumber Association Gives College Relic Of Old White House

Professor F. B. Wheeler of the woodworking department of State College has recently obtained from the National Lumber Manufacturers Association, Washington, D. C., an interesting souvenir of historical interest in the form of a block of wood cut from the timbers of the wood trusses of the White House which were removed from the roof at the time it was remodeled two years ago. The block will be preserved by Mr. Wheeler, and will be on display at the library for a few days.

The souvenir is from timber that was used 112 years ago to build the White House, and it now looks like a piece of wood that has been cut only a few months, although much harder than wood used in house construction of today.

In 1814, after the Battle of Bladensburg, the British soldiers burned the White House, and President Madison and his famous wife, Dolley, escaped. Reconstruction was begun shortly after the fire, the new roof being held in place by sturdy wood trusses. Today these trusses, with their timbers in almost as good condition as when cut, are interesting as examples of early workmanship.

"Three Live Ghosts," United Artists all-talking comedy-drama, featuring an all-star cast, which comes to the Palace Theatre Monday, Tuesday, and Wednesday, is unique in that it is entirely different in its theme, story construction, and locale from any all-talking picture thus far produced.

There are no court-room, theatre, or night-club scenes depicted in "Three Live Ghosts," nor does the picture feature a theme song or song-and-dance specialties.

Thornton Freeland, director of "Three Live Ghosts," pointed out that every all-talking picture produced to date has either featured back-stage life, a court-room locale, or was a singing and dancing revue.

Freeland was quick to make it understood that he was directing no criticism against any talking picture, but merely wanted to point out that "Three Live Ghosts" was entirely different in that it included none of the themes featured in other talking pictures.

"Three Live Ghosts," Freeland revealed, deals with the complications that arise when three British soldiers, after escaping from a German prison camp, return to London and learn to their amazement that they have been listed by the government as "killed in action."

Another distinction claimed for "Three Live Ghosts" is that it is the first all-talking, all-sound motion picture to feature an all-stage cast, which includes Beryl Mercer, Charles McNaughton, Robert Montgomery, Joan Bennett, Claud Allister, Hilda Vaughn, Shayle Gardner, Harry Stubbs, Jack Cooper, Jocelyn Lee, Nancy Price, and Tenen Holtz.

"Three Live Ghosts" is based on the famous comedy-drama stage hit of that name, and enjoyed brilliant engagements in both New York and in London.

Max Marcin, noted playwright, who presented the play in New York, was brought to Hollywood by United Artists to adapt and stage the all-dialogue film version.

brings this famous sleuth to the United States for the first time. The reason for his leaving the retired life is the murder of his faithful friend, Captain Longmore, on the eve of his son's wedding to the daughter of Dr. Watson. Holmes tracks the fiends to New York, and succeeds in bringing them to justice, after a series of the most thrilling adventures he has ever encountered.

A very notable cast is featured in "The Mighty," the Paramount all-talking thriller coming to the State Theatre, starting Thursday, for three days.

George Bancroft, the big, deep-chested star, takes the role of gunman, whom the war makes a peace-time hero.

Eather Ralston is the girl who knows his past, yet believes in him. Warner Oland is the insidious gang leader who underestimates Bancroft's prowess.

Raymond Hatton gives the comedy relief as Bancroft's pal who can't see that titles mean anything.

Dorothy Revier is cast as the sweetheart of the past.

Morgan Parley plays the role of the chap who proves he "isn't yellow."

O. P. Heggie has the role of the father who forgives.

Also there are the major portion of the Los Angeles mounted police and a host of well known character actors and actresses.

A Paramount News, a color classic, "Trail of Western Sun"; a Stan Laurel-Oliver Hardy talking comedy, "Uncastaways As We Are," and a screen song, "Oh, You Beautiful Doll," will complete the program.

Billie Dove, the screen's greatest beauty, becomes an American Beauty again for her picture, "The Man and the Moment," a First National talking picture coming to the State Theatre next Monday, Tuesday, and Wednesday.

After a number of pictures which took her to Europe, technically speaking, in which she played foreign roles, Miss Dove is again an American girl in "The Man and the Moment," which is from the pen of the famous Elinor Glyn.

This is the story of an orphan girl who marries a man to escape the limitations put upon her activities by her guardian. The hectic experiences that follow make up a story of intense interest and with many dramatic experiences.

Rod LaRoque, one of the most popular leading men in pictures, is seen opposite Miss Dove in this story, and Gwen Lee, the talented blonde actress, plays the "other woman."

A talking comedy, "Border Relations"; a Paramount Sound News, and a novelty, "Climbing Golden Stairs," will complete the program.

Leading Colleges Send Men To Hear Dr. John R. Mott

(Continued from page 1) teat, pastor of Pullen Memorial Baptist Church, and the benediction was pronounced by Rev. C. C. Herbert of Winston-Salem.

In his lecture Dr. Mott pointed out

SHEAFFER

has the college vote

Sheaffer's Lifetime[®] pens were discovered by the old alumni of most American schools, and as these writing instruments are guaranteed against every-thing except loss for the owner's whole lifetime, they're probably still in use. The swifter, easier writing brought by Balance in Sheaffer's Lifetime[®] pens and pencils is a very real help in class and makes quick work of long themes. Just try the smartly designed, smooth-writing Sheaffers at your dealer's. You'll know why Sheaffers outsell all others at 73 of the 119 leading American colleges, and you'll go unsatisfied until you own yours!

At better stores everywhere

All fountain pens are guaranteed against defects, but Sheaffer's Lifetime[®] is guaranteed unconditionally for your life, and other Sheaffer products are forever guaranteed against defect in materials and workmanship. Green and black Lifetime[®] pens, \$8.75; Ladies', \$7.50 and \$8.25. Black and pearl De Luxe, \$10.00; Ladies', \$8.50 and \$9.50. Pencils, \$5.00. Golf and Handbag Pencil, \$3.00. Others lower.

SAFETY SKRIP. Successor to Ink, 50c. Refills, 3 for 25c. Practically non-breakable, can't split. Carry it to class!

PAUSE AND REFRESH YOURSELF

ONE SOUL WITH BUT A SINGLE THOUGHT- TO PAUSE AND REFRESH HIMSELF AND NOT EVEN A GLANCE FROM THE STAG LINE

Enough's enough and too much is not necessary. Wait hard enough at anything and you've got to stop. That's where Coca-Cola comes in. Happily, there's always a cool and cheerful place around the corner from anywhere. And an ice-cold Coca-Cola, with that delicious taste and cool after-sense of refreshment, leaves no argument about when, where—and how—to pause and refresh yourself.

The Coca-Cola Co., Atlanta, Ga.

YOU CAN'T BEAT THE PAUSE THAT REFRESHES

IT HAD TO BE GOOD TO GET WHERE IT IS

that never in the history of the world has such a situation existed in three distinct ways: Opportunity for accomplishment, the urgency for action, and the dangers lurking throughout the world today.

"This situation has been brought about," he said, "by the quickened pace of civilization, the rising tide of nationalism, and the great flow of race patriotism that fills the world today.

"Never before was the world in such a plastic state. The great question that confronts us now is in what would will that plastic world set? Shall it be selfish hatred, rivalry, fear, suspicion, economic and military imperialism, or shall it be unselfish and friendly cooperation, service, and international confidence and good will.

"If we befriend these nations while they are in this plastic stage, these vision-forming moments, they will never forget that kind of friend; and on the other hand, if we are unfriendly to them now they will likewise never forget that.

"This supreme urgency and need for service and action is also shown by a rising spiritual tide in all places or the map and a growing interest in religious discussion and the vital things of real religion greater than I have ever known or read about in the history of the world.

"While it is at this high tide it is the time to act before it recedes and we have to wait many years for its return.

"Coupled with these open doors, the unending vistas, and unprecedented opportunities through which may pass the personalities that may render services undreamed of, there also exists an unprecedented danger to our civilization.

"These dangers are demonstrated in the corrupt influences of our western civilization on those nations now in the stage of plasticity and incapable of resisting the weakening influences of economic imperialism, exploitation, propaganda teaching hatred of all religions, misunderstandings and hatreds in the international political realm, which mark the lowering of the prestige of the western nations."

Some of the things which he declared were causing these misunderstandings were immigration laws, foreign policies, large bodies of armaments, and commercial practices which, he said, must be changed or an understanding sought.

He spoke to the students about the needs of these countries in the Far East for workers in education, medicine, industry, and in actual teachers of Christianity. Never before has there existed such a great opportunity to really bring about changes leading to international confidence and good will, he declared.

"But," he said, "I want to go on record as saying that in my judgment the forces present in the world today which may bring about unity and cooperation far transcend all I have said about forces on the other side."

of Nations, World Court, Locarno agreement, Hague, the Washington conference, the Kellogg peace pact, and the visit and conversations of Ramsay MacDonald to the United States, and the world mission of Christianity.

The report that Christianity is not wanted over there, he said, is false; but he brought out the fact that they wanted young men and women of vision, personality, initiative, power to grow, training, social and ethical passions for good, tolerance, ability to cooperate, and most of all those who have had the experience of Christ Himself.

In closing he urged the students to choose the calling where they could make the most use of their personality and in that field where they were most needed.

"And above all, young men and women," he said, "specialize in Christ, for through Him only will there ever be solutions to our great world problems of industry, commerce and finance, and racial and international politics."

BOOSTER CLUB ADVOCATES CURTAINS FOR DORMITORY

Immediately after the organization of the Boosters' Club Tuesday night the dormitory clubs held a short meeting. President Paul Choplin presided.

Members of the club discussed the matter of procuring shades and curtains for the students. The club voted to the effect that a proposal to the administration would be made requesting that the rooms be provided with shades.

W. C. Brake stated that the students could procure curtains for

their rooms by depositing the cost price of the material necessary with him. He will buy the material, and the Woman's Club has consented to make the curtains.

J. F. Miller, prior to the meeting, stated that the Dormitory Club would be eligible to enter the intra-mural sports. During the meeting John Lepo requested that Fourth Dormitory be exempted from the sport. The proficiency of the inmates of Fourth Dormitory in the major sports gives ample reason for its omission.

SOCIAL ACTIVITIES

Chemistry Society

The Society of Chemical Engineers held its fall social Saturday evening, December 7, in the second floor rooms of the C. E. Building. The rooms were attractively decorated in colors suggestive of the approaching holiday season. The society entertained in honor of the science students of Meredith College and of special guests of the members.

A very informal and interesting program was arranged by M. A. Uguiza, chairman of the social and program committee, and was featured by the showing of a two-reel comedy. Refreshments were served at the conclusion of the program.

Present plans of the society call for two more socials to be given during the next two terms.

German and Cotillion Dances

The German Club and Cotillion Club dances last week-end terminated the social events on State College campus for this term. The Cotillion Club entertained last Friday evening at a formal dance, and the

German Club were hosts at an informal dance on the following evening. Both functions were held in the auxiliary gymnasium. The music was furnished by Jimmy Van Cleff and his popular orchestra direct from New York City. This aggregation of musicians proved to be a great source of entertainment with their many specialty acts.

White Spades Plan

The White Spades, one of the foremost social organizations on the campus, will send out bids the first week in January to those sophomores and juniors who have been selected to become members. This club is planning on giving many entertainments during the course of the year. They will give their first dance the latter part of January in honor of their pledges.

The officers of the club are: President, Arthur Thomas, Kappa Alpha; vice-president, Mac Hughes, Kappa Sigma; secretary-treasurer, Robert Caviness, Pi Kappa Phi.

Boosters' Club Organizes

The Boosters' Club, a new civic organization on State College campus, entertained at a most delightful banquet in the Y. M. C. A. on Tuesday evening. The club is composed of the leaders of every phase of campus activity. The special guests of the evening were President Brooks, the athletic director, and the deans of many schools. The officers were elected during the course of the evening. They are as follows: President, Chas. T. Belvin; vice-president, Robert McCracken; secretary-treasurer, Henry Love.

Midwinter Dances

The next social event on State College campus will be the midwinter dances to be given the first part of January.

These dances will attract statewide attention, and many of the younger collegiate set from all over the State will be present. The dances are to be sponsored by Phi Kappa

Tau, the German Club, and Cotillion Club. Many house parties are being planned and many entertainments are to be given.

The orchestra has not yet been obtained, but it is understood that Joe Nesbit and his Pennsylvanians will probably furnish the music.

Dance

North Carolina State College students are cordially invited to attend the opening dance of the festivities of Christmas holidays at the Woman's Club on Wednesday night, December 18, from 9 to 1. Bob Mason's Collegians will furnish the music.

ANNOUNCEMENTS

A. I. E. E. Society

will have its picture made December 15, 1929, at 11:40 a. m. in front of the library. The picture fees are paid by the society.

All Students

who have not been getting their Technician or want to send it to a friend, please call by Primrose Hall before the holidays. This is the last chance, for the mailing list will not be changed after this date.

Agriculture Club

will have its picture made December 15, 1929, at 11:10 a. m. in front of the library. All agriculture students be there on time.

Watauga Hall

will be set aside during the Christmas holidays for those students who will stay in Raleigh. It is important that all those intending to spend the holidays in Watauga come by Mr. Wellons' office and make arrangements at once, as the heat will be cut off in the other buildings. Every boy that is

Poteat Will Teach Course In Ethics At College Y.M.C.A.

Rev. E. M. Poteat, pastor of the Pullen Memorial Baptist Church, will teach a course in Ethics, commencing the first week after second term registration. This course is intended especially for those men who would like a course in the ethics of Jesus, but are unable to get it. The group will meet Monday nights at 6:30 in the Y. M. C. A. building. All students are invited to attend.

Mr. Poteat has experienced in teaching ethics, having held the position of associate professor of philosophy of ethics at Shanghai College, Shanghai, China, prior to his return to North Carolina.

The Y. M. C. A. cabinet has made arrangements for the "Y" program for next term, there being plans for two weekly meetings to be available to all students. One will be the lecture course described above, held Monday nights, and the other will be forum discussions held Wednesday nights at 6:30.

The open forum discussions will be thorough treatments of interesting topics of the day held by outstanding men of Raleigh and of the State. Several out-of-state men are expected to be here at times.

The deputation program will be entered upon actively by the group interested in this work, with C. L. Clark and M. L. Shepherd taking charge. This part of the Y. M. C. A. program has provision for programs to be presented at all churches in Raleigh before commencement. Trips will be made to other near-by churches to hold meetings.

State College Y. M. C. A. has invitations from several of the girls' colleges for groups to present programs at their schools. Meredith, E. C. T. C., and N. C. C. W. are especially desirous of these programs.

The Y. M. C. A. quartet, which was recently organized, will assist in the deputation work by singing at these meetings.

B. B. GOSSETT ADDRESSES TOMPKINS TEXTILE CLUB

Mill Executive Talks on Textile Industrial Strife in North Carolina

The labor situation in the textile industry from the standpoint of the manufacturer and employer, with suggestions for the correction of its evils, were topics touched upon by B. B. Gossett, prominent cotton mill executive, of Charlotte, in an address last (Thursday) evening at 7:30 in the Y. M. C. A. auditorium at State College under the auspices of the Tompkins Textile Society.

The address was of widespread interest, not only in this State, but in the South, as it was one of the first public statements from the mill owners since North Carolina's textile industry has been torn with industrial strife.

Mr. Gossett came to State College upon the invitation of President E. C. Brooks, in accordance with the policy of the institution which seeks to bring to the student body the best thought on the problems of the day. A few weeks ago, Paul Porter addressed the students, speaking from the viewpoint of the textile workers, and Mr. Gossett was selected to present the employers' side of the picture.

The speaker is president of the Chadwick-Hoskins Company, of Charlotte, owners of a chain of cotton mills. He is also chairman of the Industrial Division of the North Carolina Department of Conservation and Development, a clear thinker, and a forceful speaker.

Mr. Gossett, with Mrs. Gossett, arrived in the city Thursday afternoon. While in Raleigh they were the guests of Governor and Mrs. Gardner at the mansion.

Senior: "My girl gives me a pain in the neck sometimes."
Frosh: "Mine too—look at these teeth marks."—College Life.

WHAT YOUNGER COLLEGE MEN ARE DOING WITH WESTINGHOUSE

LIGHTNING HAS LONG BEEN A COSTLY RAIDER OF POWER LINES

Wild lightning meets his master . . .

REMEMBER how you used to sit on the porch during a thunderstorm and shudder just a little at the forces that seemed to tear open the sky and shake the hills? Electrical men have often shuddered in grave seriousness over those same forces. For lightning has been a costly raider of power lines.

Now, however, many means of defense are available, and many more are being developed. Science has been studying lightning, and experimenting with it. Down in the mountains of Tennessee a group of Westinghouse men have been making photographic records of the voltages developed by lightning, with the cathode-ray oscillograph and the klydonograph. Guided by their findings, another group in New Jersey is enabled to reproduce lightning arti-

ficially, and study its effects on a high-tension line. And in East Pittsburgh, with a generator that will produce lightning strokes equivalent to 35,000,000 horse-power and with a laboratory that duplicates power line conditions, others are learning new facts about the behavior of protective devices.

Much of this work is carried on by young men recently out of college. Their achievements will save millions for power companies, and eliminate many hazards to life in sub-station operation.

Lightning jumps the gap between these Westinghouse arcing horns, and spares the insulators.
