

Student Council Officers Take Office For Next Year At Wednesday Chapel Meet

Dan Paul Installed As President of Student Government

KIRK PRESENTED MEDAL OF DORMITORY COUNCIL

Hazing Is Condemned By Incoming President of the Student Body—Dr. E. C. Brooks Lauds Work of Dormitory and Booster Clubs and Praises Administration of J. P. Choplin—Rivalry Advocated By Incoming Student Government Head.

Dan M. Paul, of Pantego, president-elect of the North Carolina State College student body, in his inaugural address in Pullen Hall, Wednesday, at noon, said "Hazing at State College is not wanted and neither are the participants in this unnecessary evil." There are a few students each year that persist in this form of entertainment and think that it is necessary, but these men are disappearing and are finding themselves confronted with the laws of the State and of the college which deal in no lenient way with the men who make themselves exceptions.

In offering a substitute for hazing, the president of the Student Body offered the suggestion of sports and meets which would promote friendly rivalry between the various classes. He commented favorably on the work of the Dormitory and Boosters' Clubs at the college and commended the organizations for their improvements and enrichment of dormitory life. "It is my desire," said Mr. Paul, "to establish higher standards at State wherever possible, and to work in cooperation with the clubs to improve"

JUNIOR-SENIOR DANCING TO BE HELD ON SATURDAY

Bob Mason's Collegians Will Furnish Music for the First Promenade

Tomorrow evening at 9 p. m. will see the beginning of the first junior-senior prom to be held in the history of the college. This prom, to be held in the Frank Thompson gymnasium, is given by the junior class in honor of the seniors.

Decorations of pine and fir trees will enclose the interior of the gym, with colored balloons and silvered stars forming the canopy overhead. A unique lighting effect will play on the overhead decorations from the four corners of the balcony.

Many out-of-town guests will be present at this social event and other week-end dances. Miss Dorothy Mae Allen, of Richmond, Va., escorted by Milton R. Vipond, president of the junior class, will lead the junior figure. With proper ceremony, the juniors will receive their rings from partners during the dance. Presentation of the rings to the juniors will, like the prom, innovate a new custom in college history.

Bob Mason and his State College Collegians will furnish music for the prom.

MEOW!

"Our cat, Tom, found kittens," according to an assistant librarian and campus "catalogist," who found four kittens and their mother crunched back in the stacks in a devastated encyclopedia.

Tom had made the library his home for quite a while and was often seen prowling up and down the aisles between the book shelves in the basement. It seemed that it was trying to get educated, and a student remarked that the youngsters should intellectually be very highly developed because of their place of birth.

The birth of the library cats came as a total surprise to all the employees. It is thought that they will have to change the cat's name.

PRESIDENT INSTALLED

D. M. PAUL

Military Leaders Hold Convention With State Corps

North Carolina State College was the point of interest to militarists in the R.O.T.C. colleges of the Fourth Corps Area when the annual convention of the military officers and presidents of these institutions was held here Monday of this week.

The meeting was held here at State with Dr. E. C. Brooks, who was president of the Association of R.O.T.C. Colleges of the Fourth Corps Area, as presiding officer. Dr. Harcourt A. Morgan, president of the University of Tennessee, was elected president of the association for the ensuing year at the convention here. Knoxville, Tenn., was selected for the next annual meeting.

Among the dignitaries present at the meeting this week were Major W. E. Duvall, who came from the Army Corps Headquarters at Atlanta, to represent the War Department; Major-General Amos A. Fries, president of the National Reserve Officers Training Corps Association, and Lieutenant-Colonel Orvel Johnson, who is executive secretary of the National Reserve Officers Association. Eight states were represented at the convention.

Major Duvall told the regional convention that the War Department plans to issue next year a distinctive R.O.T.C. uniform. It will be olive drab; with infantry blue lapels on the coat. Trousers will be long and no leggings will be worn. A new model overseas cap will replace the present garrison cap.

National economy programs have prevented the use of a distinctive uniform for college cadets, so long as the"

BRIDGE TOURNAMENT SET FOR LAMBDA CHI ALPHAS

Twenty-one Fraternities Will Be Represented in the Tournament

The third annual Inter-fraternity bridge tournament, sponsored by the Lambda Chi Alpha, will begin Tuesday afternoon, May 6, at 4:30 p. m., at the Lambda Chi Alpha house, 2407 Clarke avenue.

A mahogany plaque is awarded the fraternity winning the championship. The name is engraved on the plaque and the winning fraternity will retain it for the ensuing year.

Phi Kappa Tau, represented by Warlick and Nelson, were the first to win the trophy, followed the next year by Theta Kappa Nu, represented by Hodges and Sawyer.

This year 21 fraternities will enter the championship and a great deal of interest already is being shown. The fraternities entered are: Alpha Chi Beta, Alpha Gamma Rho, Alpha Lambda Tau, Beta Sigma Alpha, Chi Alpha Sigma, Delta Sigma Phi, Kappa Alpha, Kappa Sigma, Phi Kappa Tau, Pi Kappa Alpha, Pi Kappa Phi, Pi Phi, Phi Omega, Sigma Nu, Sigma Phi Epsilon, Sigma Pi, Sigma Tau Beta, Theta Kappa Nu, Theta Phi, Theta Phi Theta, Tau Rho Alpha.

REGIMENTAL BALL HELD TONIGHT IN GYMNASIUM

Decoration Committee Works Hard To Make Interior Attractive

The members of the State College R.O.T.C. Regiment will turn their attention to the Frank Thompson Gymnasium tonight to attend the second annual military ball.

The ball held last year was a huge success, but the one tonight promises to be more than a success, according to reports.

The decoration committee, composed of the company commander of each company and his cohorts, have been hard at work making the gymnasium as attractive as possible. Pine boughs have been set up in such a manner as to give each company a booth. Flags, banners, and balloons have been placed in such a manner as to form an artistic atmosphere for the occasion.

Members of the R.O.T.C. Regiment other than the decorators who are on the dance committee are: C. H. Belvin, J. W. Workman, C. H. Jordan, seniors; L. R. Mercer, W. T. Clement, juniors; J. Halstead, F. Gorham, sophomores; G. Scott, T. Cooper, and B. Chapman, freshmen.

Bob Mason, a local boy, and his Collegians, will furnish music for the affair. He has played frequently for dances at State College.

Chaperons and honor guests for tonight's ball will be Lieut.-Colonel and Mrs. Early, Dr. and Mrs. E. C. Brooks, Major and Mrs. Newgarden, Captain and Mrs. Eden, Captain Watson, Lieutenant and Mrs. Elms, and Lieutenant Carraway. Invitations have been sent out to prominent people in military circles, also friends of the students of the R.O.T.C. Unit.

Debating Season At College Most Successful In History

ELECT COUCH AND GAMMON 1931 AGROMECK OFFICERS

Staff Officers Will Be Selected for the Year Book At Early Date

Everett Couch, of Darlington, S. C., was unanimously elected editor of the Agromeck, college annual, for next year at the meeting of the junior class Wednesday in the Y. M. C. A. Couch is a junior in engineering and has served as assistant editor of the annual this year. He was recently elected president of the North Carolina Collegiate Press Association at their convention in High Point.

The business side of that publication will be controlled by John Gammon, of Griffen, Ga., who defeated Leslie Vipond, of Norfolk, Va., for the office. Gammon is a junior in textile and has served on the business staff of the annual.

Staff officers for the Agromeck will be selected by the two heads at a later date.

Army Airplane Assists N. C. State Cadet Corps In Staging Sham Battle

An airplane from Pope Field was in Raleigh at noon yesterday to assist a battalion of the Reserve Officers Training Corps at State College in the enactment of a tactical problem simulating war conditions.

The problem was part of the annual proficiency inspection of the R.O.T.C. at the college.

The plane carried out a war-time observation mission, dropping messages to the student soldiers informing their leaders of activities of an imaginary enemy and keeping their supporting artillery informed of their location.

The inspection, which started last Monday, included a test of all instructional work in the R.O.T.C. course. On results obtained the War Department gives the unit its annual rating. For the past few years the State College unit has received the highest rating obtainable, and the students are determined to maintain this standing this year, according to the military officials.

Colonel H. G. Davids of the Regular Army, was the inspecting officer.

SCABBARD AND BLADE SEND GARIBALDI TO CONVENTION

Silver Jubilee Convention Is Held At the University of Minnesota

W. T. Garibaldi, cadet lieutenant-colonel in the R.O.T.C. unit at N. C. State College, attended the Silver Jubilee convention of Scabbard and Blade, national honorary military fraternity at B Company, First Regiment, University of Minnesota, April 21, 25, and 26.

Approximately 200 delegates from 26 states and representing the 77 chapters of the society were present. All delegates from the active companies were junior or senior cadet officers in colleges and universities offering advanced course work in military science and tactics.

The local chapter, known as "G" Co., Third Regiment, was installed at State College in 1925.

Among the speakers who addressed the convention were: Governor Theodore Christensen, Governor of Minnesota; Dr. L. D. Coffman, president of the University of Minnesota; Col. T. S. Moorman, in charge R.O.T.C. affairs, 7th Corps Area; Brig. Gen. Edward Orton, Jr., senior vice-president R. O. A. and Maj. John H. Hester, commander, R.O.T.C. unit, University of Minnesota.

New Members Initiated In Beta Pi Kappa Frat

At the spring initiation of the North Carolina Chapter of Beta Pi Kappa, national ceramic engineering fraternity, held in the Ceramics building on April 22, nine men were admitted to fellowship in the organization. This constituted the largest class ever taken into the local chapter. The annual election of officers will be held at the May meetin.

E. G. COUCH

State Collegians Form Federation At Carolina Meet

Representatives from the student bodies of the colleges of North Carolina will meet at Chapel Hill May 10 for the purpose of formulating plans for the organization of a State Federation of Students. It was announced from the University last week.

In a personal interview Paul Choplin, ex-president of the Student Body, told a staff writer that the State College Student Government would cooperate to the fullest extent in this movement to organize the students of the various institutions of the State. He stated that N. C. State would be represented by three official delegates and as many volunteers as wished to attend the convention. The ones to represent State have not definitely been decided upon, he said, but that they would more than likely be Dan Paul, president of the Student Body; Mack Stout, vice-president, and another one to be decided upon at a later date. Choplin added that he would be present at the convention.

The purpose of the organization, as set forth by those sponsoring it, is to create a closer, more friendly and intimate relation between the students of the various institutions of the State of North Carolina. It is to eliminate the spirit of competitiveness, rivalry and indifferent feeling which now exist between some of the colleges. Mr. Choplin said that one of the big things that is hoped to be accomplished is the reciprocal alliance regarding athletic events of the "big five," which was worked upon last fall.

Pronounced action has already been taken by the University of North Carolina.

BUSINESS STAFF SELECTED FOR COMING YEAR BY LAND

Buchanan, Gaffney, Lynch, Macaulay, Mayo, and Sharp Selected

With the selection this week of Phil Buchanan, Ed Gaffney, W. H. Lynch, George T. Macaulay, Sam Mayo, and Walter Sharp, the business staff of THE TECHNICIAN is ready to start in earnest the work of next year.

Each man on the staff was selected only after he had proved that he was capable of selling advertising space in THE TECHNICIAN to the merchants of Raleigh, and in other ways proved that he possessed the necessary energy and ability to hold down his job.

Beginning next September, a record of each man's sale of ads will be kept and a suitable prize will be given each month to the man who has sold the most space for that month. By this method the interest of the men on the staff will always be kept at the highest pitch and a wholesome spirit of competition will be generated among the business staff.

M. A. Abernethy will still handle the circulation for the remainder of the year with Jimmy Creech as his assistant.

State College Agromeck Is Selected As Best Year Book

HIGH POINT COLLEGE IS CONVENTION HOST

College Newspaper Award Presented To High Point Collegian—Duke University Given Prize for Best College Literary Magazine—Editors From All Parts of North Carolina Delivered Addresses To Press Convention—Bob Shapard Is Editor Winning Annual.

Everett G. Couch, editor of next year's Agromeck, was elected president of the North Carolina Collegiate Press Association at the business session of that body in High Point Saturday. He won over Charles Honeycutt of Duke University.

The Agromeck of N. C. State took first prize in the college annual contest. The book was edited by Bob Shapard, '29. High Point won first and N. C. C. W. second place among college newspapers, according to the decision of the judges. "The Archive," Duke's literary magazine, was awarded first place in the magazine contest.

Other honors awarded were: Duke annual, second place; N. C. C. W. annual, third place; N. C. C. W. magazine, second place, and Carolina magazine, third place.

Other officers elected included: First vice-president, Bette Brown, N. C. C. W.; second vice-president, Clyde Pugh, High Point College; secretary, Evelyn Wright, E. C. T. C., and treasurer, Robert King, Davidson.

State College was represented by A. L. Weaver, Fred Plank, Roy Park, and Alfred Erwin Lund, all of THE TECHNICIAN; Everett Couch and E. H. Roberts, of the Agromeck; and Leslie Vipond and "Mike" Whitehurst, of the Watagan.

The convention voted to hold its

JUDGING TEAM SENDS MEN TO WEST VIRGINIA MEET

Taking Part In Intercollegiate Judging Contest At the University

At the Block Animal Contest, held at the University of West Virginia this week, State College has four members of the judging team participating. These men left Tuesday and will work under the direction of Professor Foster, coach of the team.

The men making the trip are: J. S. Wilkins, W. H. Brake, P. C. Shaw, and N. F. Regan. One of these men will act as alternate, but latest information from the team fails to reveal which man will act in this capacity.

The West Virginia students will act as hosts to teams from all over the country, but they will not take part in the contest.

ITCHING FEET?

According to a report given out by the United States Public Health Service, too-itch, or ringworm, affects about 60 per cent of all college students, students in the southern colleges having a higher percentage.

The bulletin gives its symptoms as follows: "There are either a few or many blisters, a diffuse scaly eruption, and wart-like growths. When the blisters break, fluid always escapes to the surface and that usually becomes covered with scabs. Itching is frequently intense."

The cure for this disease, of which most of the boys in the dormitories complain, consists of soaking the affected parts in salt solution at least once a day. "This is the common type of treatment for infections in all hospitals," concluded the health article.

COREY SPENCER TO SPEAK LAMBDA GAMMA DELTA MEET

Speaker is the Founder of National Honorary Judging Fraternity

The Epsilon Chapter of the Lambda Gamma Delta, national honorary judging fraternity, will have as its guest, for their annual banquet May 7, 1930, at the Carolina Hotel, Mr. Corey J. Spencer, of Jackson, Mich., the founder of the national fraternity.

Invitations have been sent to all of the fraternity, asking them to try to be present for the banquet.

North Carolina State College ranks highest in this fraternity in membership, as it was recently learned that there are 58 members from this college, with its nearest competitor, Colorado, having 53 members and Ohio with 51 members.

Mr. Spencer organized the fraternity with the idea of honoring the men who work hard to become members of the judging teams which represent their college in the national, international, and sectional judging contests. He also originated the idea of having a home for those needy left by the men killed in the World War. For this purpose he made a present of 500 acres of land to the veterans of Foreign Wars. While traveling over the country for this work he now looks after his duties as founder and secretary and treasurer of the Lambda Gamma Delta.

Since this fraternity has been organized at N. C. State College, records show that the judging teams have gained some outstanding popularity for the college over the entire nation. They have placed in the hands of the Field Crops department of the college three Pullman Scholarship loans of \$250 each. These loans are to be used for the purpose of helping students pay their way through college. The loans are usually given boys who are interested in crops to the extent that they work to make their way on an International Crops Judging team.

Bids for the Junior-Senior Prom will also be given at this time in exchange for your class dues receipt or \$1.50.

R.O.T.C. Regiment To Pass In Review Before Brig. Gen. Albert Cox

Following its weekly parade next Monday at noon, the R.O.T.C. regiment will pass in review before Brig-Gen. Albert L. Cox and a staff of senior officers of the Reserve Corps.

The cadet officers of the regiment will receive commissions in the Officers' Reserve Corps at graduation next June, and most of them will at that time be assigned or attached to units which are commanded by General Cox and the officers who will be with him as honor guests of the R.O.T.C. regiment at the review.

General Cox won distinction during the World War as a regimental commander. After demobilization of the war-time army, he was commissioned in the Officers' Reserve Corps and assigned to command a brigade of the reserve organizations allocated to North Carolina.

A. Z. ELECTS OFFICERS

At a recent meeting of the Alpha Zeta, honorary agricultural fraternity, the members elected the officers which will, with the help of the other members, push the organization forward next year.

The officers elected are as follows: Chancellor, R. G. Vick; censor, W. H. Brake; chronicler, John Crawford; treasurer, H. T. Gryder; scribe, H. W. S. Cheld.

The new officers have taken over their responsibility, but the old officers are leading them on the right trail.

METCALF WRITES TEXT ON ECONOMIC ZOOLOGY

Book Contains 390 Pages, With 240 Illustrations of Animal Kingdom

Dr. Z. P. Metcalf of North Carolina State College has recently written a textbook on "Economic Zoology," which has just come off the press.

Dr. Metcalf's book, which is published by Lea & Febiger, Philadelphia, contains 390 pages, including 240 illustrations of different animals. The book, dealing with animals that are economically important to man, will be used in the Zoology department of State College next year. It will probably be introduced in other colleges in the near future. The price of the book has not yet been announced.

The author seems to be very much enthused over his new book and it will no doubt make a success in other colleges as well as this one. It took Dr. Metcalf about three or four years to complete this material in this book, which will be of great aid to the agricultural school, as it specifically describes the different animals and their relative importance to mankind.

Dr. L. H. Snyder Edits Book on Blood Grouping

Dr. Laurence H. Snyder, who is associate professor of zoology and a member of the committee on blood grouping of the National Research Council, has lately published his book on "Blood Grouping in Relation to Chemical and Legal Medicine." The author has undertaken a task which involved wide and thorough study on the various phases of his subject, and has gathered information from many sources. A bibliography of the most recent is included in the book, which indicates the author's wide range of study and acquired knowledge in that field.

While the book requires learning in that field for most understanding of its meaning and import, it has high value in a technical way for the uses of the medical fraternity as well as in certain aspects of the law. The author's viewpoint in treating the subject has been mainly that of the geneticist and physiologist. As the most important practical application of blood groups, therefore, has been thoroughly discussed in addition to the more theoretical application, it is mainly a book for the medical profession and the thoroughgoing scientist.

State Collegians Form Federation At Carolina Meet

(Continued from page 1)

olina students to establish the student federation. Last week student officials from Carolina visited their neighboring colleges to negotiate plans for the convention which is to be held there. The delegation included: Ralph C. Green, president; Ed Hamer, president of the Y. M. C. A.; Ray Farris, Will Yarborough, editor of the Daily Tar Heel, and John Lang, one of the instigators of the federation movement.

The campuses visited were N. C. State, Wake Forest, Meredith and Duke. Personal interviews with the student leaders of each of the institutions to make certain the success of the visits. Letters setting forth the purpose, data, and outline of the convention have been mailed to all the senior colleges in the State.

Institutions that have been invited to send delegates to the convention include Atlantic Christian, Catawba, Davidson, Duke, Eastern Carolina Teachers, Elon, Flora Macdonald, Greensboro, Lenoir-Rhyne, Meredith, North Carolina College for Women, Queens, Rutherford, Salem, State, Wake Forest, and Western Carolina Teachers.

Couch Is Elected President College Press Association At Meet Held In High Point

(Continued from page 1)

next meeting at Eastern Carolina Teachers College, Greenville.

The nineteenth convention of the association closed Saturday morning after a three-day session featured by brilliant social and instructive program. Approximately 100 students, representing 42 different student publications, attended the convention and heard addresses by Prof. T. C. Johnson, High Point College; President R. M. Andrews, High Point College; Robert Jarrett, president of N. C. C. P. A.; C. M. Waynick, editor of the High Point Enterprise; O. A. Kirkman, Jr., president of Alpha Kappa Psi, national fraternity in commerce and business administration; P. E. Lindley, dean of High Point College, and Rev. T. A. Sykes.

All of these talks were made at the two banquets and two luncheons sponsored by the association. For the first time in its history the association sponsored dances, giving two, one following each banquet. Two strictly business sessions were held during the convention.

Student Council Officers Take Office for Next Year At Wednesday Chapel Meet

(Continued from page 1)

living conditions at the college. Our dormitories have been improved by the addition of shades, and I think the need of telephones in the 'dorms' will be expressed through the councils."

The oath of office to the councilmen, officers and House representatives of the Student Government was given by Henry G. Love, of Burlington, retiring vice-president of the Student Body. Mack Stout, of Sanford, was installed vice-president; C. E. Brake, of Rocky Mount, secretary, and Frank Gorham, of Raleigh, treasurer.

The Dormitory Council medal which will be presented each year to the council president who has done the greatest work in his club, was awarded to R. C. Kirk, of Greensboro. The basis of this award was the high school, intermural sports, and rating of the dormitory in general.

Dr. Eugene Clyde Brooks, president of the college, said: "Eradicate hazing and hazers at State College. This is an evil that the public condemns and for which the State makes laws to prevent."

"Student Government at the college was established to take the place of the mob. When a masked hazer enters your room for the purpose of cutting your hair, he is without the law, and the defendant can use any means to protect himself and be within the law."

"Education has two major aims," says the president. "They are, individual self-reliance and community self-government, which is preserving the honor and promoting the general welfare of the college community. Cooperation is the greatest value of Student Government and will be the greatest value to the graduate in business."

In speaking to the incoming governing body of the students, Dr. Brooks stated that their new undertaking would consist of work, worry, and censure and difference of opinion as to right and wrong, but difference was needed to prevent the slow progress that would be incurred otherwise.

"The establishment of the Dormitory Council and their achievements," said the speaker, "is a distinct accomplishment in the administration of the Student Body. This club, together with the newly-organized Booster

Club, bring from all the students the spirit of the best, and I would urge keen cooperation with the organizations."

In concluding, Dr. Brooks said, "Right human relations is truth. Let us contrive to study and reflect that we may learn more truth for State College."

Military Leaders Hold Convention With State Corps

(Continued from page 1)

large stocks of uniforms manufactured for use during the World War were on hand. These stocks now are so depleted that purchase of new uniforms is necessary, Major Duval stated.

The World War uniform, which was of coarse cloth and not carefully made under the stress of war-time manufacturing, was not popular with the students.

Major General Fries complimented the regional convention on the work it has done in the four years of its existence, and stated that his association is now organizing similar regional associations in the other eight Army Corps Areas of the United States. He was at the meeting, he stated, to get ideas for this organization work. General Fries, until his retirement last year, was chief of the Chemical Warfare Branch of the army.

The association was in session throughout the day. The agenda of subjects before it, all of a rather professional nature, revolved about policies affecting the colleges in their relationship to the War Department

in the conduct of Reserve Officers Training Corps units.

The delegates attended a parade ceremony at noon which was participated in by the 800 students enrolled in the R.O.T.C. at State College. After the parade ceremony the student regiment marched in review before those attending the convention.

Following the military ceremony the delegates were the guests of Dr. Brooks at a luncheon.

THE WORDS on the back of the package still mean what they say. No "extras," which do not contribute to the quality of the smoke, are included in the price of Camels. Just the utmost smoke-enjoyment that modern science can put into a cigarette.

That statement was on the first package of Camels manufactured and has been on every one of the billions of Camel packages sold from that day to this. When it was first written, other cigarette manufacturers were giving away flags, pictures of actresses, pictures of ball players—almost anything that would make the smoker think he was getting something extra for his money. The makers of Camels believed the smoker wanted a cigarette made strictly on its merits, with all of its cost put into quality—a cigarette made of such excellent tobaccos—so perfectly blended—so mellow—so fragrant—that it would win its own way.

The vast popularity of Camels is a tribute to that four-square policy.

Gus Tebell's Successor Not Yet Named

SUNDT MOST LIKELY PROSPECT FOR POST AS YOUNGER FADES

Suppose to Choose Head Grid Mentor Last Thursday

THREE-HOUR SESSION ENDS WITH BOARD UNDECIDED

Sundt is Former Wisconsin Athlete and Had Position There for Seven Years; Younger Fades as Higher Salary is Understood to be Asked

The Athletic Committee of the Board of Trustees entered into a "Bull Session" last Thursday night at the Sir Walter Hotel and after three hours deliberation on supposedly a serious question, they announced that they did not know a thing.

At a late hour last night, no member could be found to certify the statement that a coach had been named to succeed Gus Tebell as head coach of N. C. State College. The Committee of the Board had been divided into a sub-committee to do the "dirty work" and consisted of President E. C. Brooks, Dr. Ray Sermon, Dr. Arthur Wilson, and C. D. Welch, of Cramerton, N. C. Rumor and anticipation had W. L. (Monk) Younger selected as head man here, but the Davidson mentor was practically dismissed from the narrowing of four men yesterday, it is understood, when Younger re-

The trick is to find your pipe and tobacco

YOU will discover the full pleasure of pipe-smoking when you hit on the tobacco that really suits you in the pipe that really fits you. Then you can light up and lean back and cross your feet on the mantel or wherever, and purr and smoke—how you can smoke!

The trick is to find your pipe and your tobacco. Nobody can find them for you, and until you find them you must go on groping in outer darkness—but have you tried Edgeworth? Edgeworth may be just the tobacco you're looking for. It has a certain distinctive flavor that men like; it is slow-burning, cool—it will not bite your tongue; and it is rich with the flavor, fragrant with the aroma, of fine old burley blended exactly right.

Check us up—try Edgeworth in a good pipe. We'll send you some helpful hints on pipes, and we'll even send you some Edgeworth, a generous free packet of it to try, for nothing but the coupon. That's meeting you more than halfway, isn't it? We know our Edgeworth!

I'll try your Edgeworth. And I'll try it in a good pipe.

FRESHMEN SPLIT TWO GAMES DURING PAST WEEK; DEFEAT 'CATS

The freshman baseball team won a game and lost a game the past week, to maintain a steady average in the race of State bay clubs. The Tebellmen handed the Davidson Rats their third successive defeat, the count being 5 to 3, but the tables were reversed Tuesday, and in a freakish tilt with Carolina the Tar Babies downed the growing Wolfs, 8 to 7.

Mystic Orders Play Annual Ball Contest

Two mysterious organizations, the Kooky-Pooks and the Aljenons, had their annual baseball tilt last week, and the tantalizing contest ended 12 to 11 in favor of the Aljenons. The contest went for twelve frames and was fought in the bitterest fashion. The men on the Aljenons club were Woodward, Gardner, Hampton, Gaylord, Eatman, Cobb, Lloyd, Klutz, and John Lepo. The players of the Kooky-Pooks included Morris, Johnson, Rose, Dellinger, Marshall, Stout, Grouley, Espey, and Stroupe. Patterson was umpire. The officers of the Aljenons are: President, Lepo; vice-president, Stacey Lloyd; secretary and treasurer, Hampton. The officials of the Kooky-Pooks are: President, Dellinger; vice-president, Rose; secretary and treasurer, Johnson.

questioned more salary. It is believed that Younger was only "playing with" the N. C. State Board, to have his pay raised by the alumni at Davidson.

The most likely candidate at present is Guy Sundt, University of Wisconsin man. The western protege was second choice of the board and was phoned after the meeting last Thursday for a definite answer, but none could be gotten. The former room-mate of Gus Tebell wanted a little time to consider, and was to have phoned here sometime yesterday, but at 10:45 last night no word had been heard from him.

The officials of State stated that approximately 200 applications had been received for the job when Tebell announced his intentions of entering the University of Virginia, but was narrowed to four. The other two mentors under consideration are Pete Vaughn, coach at Wabash College, Crawfordsville, Ind., and John Van Liew, of Grinnell College, Iowa.

Schedule of Sports Program Announced For Next Week

State athletic teams will not find the ensuing week nearly so crowded as the one just past, as only six contests are on record to be encountered. Three of the half-dozen contests are home engagements. Today the baseball machine closes its five-day trip with a clash with V.P.I. The Virginia Techs defeated "Chick" Doak's club on home territory. Averette and Shore are due to see mound duty for this game, while the same youngster who twirled here is Coach Kirscher's choice for today. Reginal Mapp is the lad's name, and he will be remembered as the one who clouted the homer, to break up the game.

V.P.I. Noses Out State In Scintillating Meet

In one of the most scintillating and spectacular track meets ever staged on Riddick Field State was nosed out of a dual match with V. P. I. last Monday by the score of 61 to 65. Races were close and fast, many ending with the winner breaking the tape only a second before another man. Alexander and Palmer, the former a State man and the latter from V. P. I., furnished the most brilliant runs of the day. V. P. I. Men Beat Records Each team collected a total of seven first places. Swart and Zirkle, both V. P. I. weight men, bettered the State record in the shot-put. Mac Stout, State, pulled the Wolves nearer the front when he leaped 21 feet 3 inches in the broad jump to cop first position.

State Breaks Even In Baseball

FOUR GAMES PLAYED IN TRI-STATE LEAGUE ON NORTHWARD TRIP

V. P. I.'s Techs Win From Doakmen Here Last Saturday—Games Annexed From Maryland and Virginia—Last Tilt Today in Blacksburg With V. P. I. Again.

The varsity baseball team of N. C. State broke even in tilts during the past week. Out of five games played, the Staters captured two, dropped the same number, and forfeited one to "Old Man Weather" on account of rain. Beginning last Saturday, the ball began to roll. Here, on Riddick Field, local fans saw Reginal Mapp literally win his own ball game, when in the eighth frame, the star V. P. I. hurler connected for a homer with two men on bases to untie the deadlock, and holding the Wolfpack idle. The final score was 6 to 3 in favor of the visitors.

State started on a tour of northern states the following day to play five contests. The games in this group had direct bearing on the Tri-State League, as a member of this circuit was met every day. Out of the four games played to date on the trip, State has won from Maryland and Virginia, and lost to Washington and Lee.

Monday of this week, Coach "Chick" Doak had his men face to face with the Old Liners of Maryland. The good right arm of Bill Everette pitched the Staters to a 12 to 2 win over the Old Liners. The home folks were allowed only four bingles. Morris, sophomore, relieved Williams in the latter innings, and held the Marylanders to a lone tap of the agate.

Tuesday, State journeyed to Charlottesville and took another win. This time it was Captain Sandy Shore who did the trick, and aided by the old ninth-inning rally, defeated the Old Liners, 4 to 3.

Rain bursted up the game intended for State and V. M. I. the following day. A conflict in games on this day caused the military lads to play two games, as their books called for a clash with V. P. I. too. V. M. I. played the Virginia Techs early in the afternoon and started on the second contest with N. C. State, when rain interferred.

Yesterday the Generals of Washington and Lee pulled a loose contest from State, when after 11 innings of ball, Averette threw wild to allow Cross, General second sacker, to score and make the final score, 7 to 6. State scored three runs in the eighth frame and their hosts rallied in the next for three to tie the count. Then in the disastrous eleventh Averette tossed wild to lose the game.

Out of the five games played this week-end for the State track meet, N. C. State will be represented by both varsity and freshman teams, and it would not be disappointing if one or two records fall into the Raleigh school's hands.

Today, State meets V. P. I. for the concluding game of the week. Captain Shore is due to pitch today and will probably face Mapp, the lad who turned the tide from State in their game here. The squad will return to Raleigh Saturday.

Wolf Pack Taming

D. E. PATTERSON "Pat"

Pat hails from Burlington and is a senior in Dairy Manufacturing this year. In Pat's baby days he attended Friendship High School and performed in basketball, track, and football. In the former Pat was all-state. The record here at State shows Pat very active as a freshman. The old boy was busy in track, football, and baseball. This season will mark the fourth one in the track sport, being co-captain, and during his stay here records have been hung up in the shot-put and discus by himself. Pat has tossed the shot 42 feet 10 inches and the discus 137 feet. The State record for the shot is a little over 43 feet, and Pat is out to write it on the books as a state record when Saturday comes.

Our other hero for this week is none other than

W. F. OTTINGER "Bill"

Bill was born in Augusta, Ga., but moved to Asheville later, and it was there that he attended high school. Since that time the Georgia Cracker has moved his home back to Augusta. He is also a senior and taking Construction Engineering.

Bill is co-captain of the N. C. State track team this year, and runs in the century, 220, and 440. Captain Ottinger has spent four years in outdoor activities here, and in the recent Davidson-State meet Bill broke his own record in the 440 by doing the distance in 56.6 seconds. That was two-fifths of a second from the official state record, and here's hoping that the feat can be repeated in Greensboro Saturday.

ALL eyes, feet, and thumbs are extended towards Greensboro this week-end for the State track meet. N. C. State will be represented by both varsity and freshman teams, and it would not be disappointing if one or two records fall into the Raleigh school's hands.

The Politician

A politician was called up at his office recently and notified that his wife had presented him with triplets. He was silent for a moment, then boomed forth, "I demand a recount."

Former State Men Climb In Pro Ball

Two former State students, "Chink" Outen and Charlie Eatman, have been going nicely in pro baseball this year, as reports circulate into the campus to that effect.

Outen played ball with Asheville, Sally League, last year, and has now risen into Class A group. The youngster is with the American Association League, playing with the Jersey City club, and has been tapping the agate at a high rate. He is utility man, and has been used both in the gardens and on the infield this season.

Charlie Eatman, our latest entry into any circuit, joined the Charlotte Hornets recently. The youngster was declared a little too small by big bee, Dick Hohlittel, and sent away. Eatman has been on the campus lately, but is expected to connect with the Durham club of the Piedmont League soon. He has also had several other offers.

IN DUKE UNIVERSITY'S SCHOOL PAPER, The Chronicle, we notice a story in regard to the all-American basketball club picked by Les Gage, sports editor of College Humor, and in which publication the selection appeared. It seems that the old boys in the Bull City got "sore" at the pick and are hurt about the organs in that some of their men did not make the team. Or rather, I should say, one of their men.

We won't argue with The Chronicle as to who is the best man—that is, Our Johnnie or Mr. Bill Werber. They think their man is the best, and we think ours is the best. So there you are.

BUT PRINTING views of this type seems to State's writer as just a little childish. Who really cares which is the best? It'll all be forgotten in the future, anyway. Probably no one besides Duke students will see The Chronicle, and if they want to have it their way, I vote to let 'em have it.

Wife: "When we were married I thought you were a brave man."
Husband: "So did a good many other people."

CINDERMEN LEAVE SATURDAY A.M. FOR GREENSBORO MEET

Freshmen Enter Meet; Copped Two Wins Last Year

GEO. MCGINN HOLDS FIRST IN HALF-MILE FOR STATE

Patterson and Ottinger, Co-Captains, Out for New Records In Shot and 440 Dash, Respectively—Bettered State Mark In Practice and Unofficial Trials

Coach Ray Sermon and "Buck" Drennan leave tomorrow morning for Greensboro to participate in the annual State track meet. The meet calls for a complete entry of varsity events, while the freshmen are limited to three dashes.

George McGinn will enter the half-mile as defending champ rather than contending artist. The local lad's time is 1 min. 53 1/2 sec., but in the recent V. P. I. meet one-fifth of a second was clipped from the books. Captains Patterson and Ottinger have also bettered their records in the shot-put and the 440 dash, respectively, and they will be out to bring home to State a couple more first places and new low records.

Frosh In Dashes
The freshmen are allowed no field events, but are scheduled for three running events. Drennan has announced the following men as entries in the events: Cook, Tucker, Bridges, Watt, Silver, Lamberth, Hubbard, Drumwright, and Troutman.

The Little Wolflets took two of the three runs two years ago, and duplicated the act last season. The varsity placed third in the State meet last year and several initial places were taken.

Just Few Going
It was announced that the entire varsity team would not journey to Greensboro, but only those to be entered in events. Tryouts were held yesterday, and the men to be taken were not known until then, therefore eliminating the possibility of knowing at time the paper went to press. The teams will journey by bus and return same way after the meet, it was said.

Blow the Whistle

—for the Pause that refreshes

When you suffer from large and undiluted doses of your fellows. When the milk of human kindness seems to sour. Blow the whistle for a minute's "time out" on your own account, to pause and refresh yourself.

In other words, go into a huddle with a glass or bottle of refreshing, delicious Coca-Cola. It will make you captain of your soul again, ready to live—or die—for the dear old alma mater.

Entered as second-class matter, February 10, 1920, at the postoffice at Raleigh, North Carolina, under the Act of March 3, 1879.

The little DEVILS beat the frosh Wednesday.

N.C.S.

PROM-enade Saturday will make PROM-inent social history.

N.C.S.

We're glad also, that the Duke man didn't sit on Couch.

N.C.S.

Let's hope our new government will not be a-PAUL-ing.

N.C.S.

We'll bet Garibaldi is "cuttin' up" at the Scabbard and Blade convention.

N.C.S.

Engineers should have an easy time in the "Bridge Tournament."

N.C.S.

Brooks ran down to Pinehurst for the medican convention. We wonder if it was all-WET.

N.C.S.

The R. O. T. C. regiment will MARCH to the "gym" for a DRILL in dancing Friday night.

N.C.S.

Paul is president. Choplin is ex-president. Paul Choplin is ex-president, but Paul is president.

N.C.S.

Duke Chronicle laffed at "Jonnie" Johnson's place for the All-American basketball team. (Duke has "All-Americans," but they're not athletes.)

N.C.S.

The military leaders had a PRIVATE meeting at State. The MAJOR thing promised us was new uniforms. Everyone had a good time in GENERAL and the convention closed with a BANG.

GET THE GIRLS TO GAMES AND THE BOYS WILL COME

Of approximately 2,000 students enrolled here less than 400 attended the State-V. P. I. baseball game on Riddick Field Saturday. We were defeated.

An actor cannot put his all into a play if he is faced with empty seats; an athlete hemmed with bare bleachers has little encouragement to strain to the utmost in hopes of winning the game. A packed house gives the actor confidence of his ability and inspires him to produce a better show. The same is true with athletes. We must have a crowd of interested spectators to get renown athletically. They say that if a school has a winning team it will draw crowds. That is true; but a packed stadium will do wonders toward producing a winning team. Cheering spectators give the men renewed courage, superhuman strength, and victory. Publicity to a great extent governs gate receipts. We can-

not have wide publicity unless we have large crowds, for newspapers allot their space according to attendance.

Here is our idea: Give each student in the three girls' colleges in Raleigh—Peace, St. Mary's, and Meredith—an invitation to attend free of cost all baseball games held on Riddick Field. Later this probably could be extended to embrace other athletic contests. It should be only a minor detail to get the respective administrations to cooperate.

Not once this year has there not been ample seats to accommodate these girls. If we could get the fair maids to attend games, students would turn out 100 per cent stronger. Girls always are a big drawing card. More boys witnessed the high school track meet held here recently than attended the State-V. P. I. game. Why? Because some of the entrants were girls and many of the spectators were females. If we can get the students to attend games they will become interested in athletics and support the teams.

Under our plan no additional cost would be incurred. The girls could be admitted upon showing their registration cards. Think it over, members of the Athletic Council.

JEALOUSY

People who sass policemen are usually haled into court, where they pay for their impertinence; if in court they persist in haggling they are punished still more severely. Schools which take issue with decisions in athletic contests, or any other contests, gain nothing, and are apt to lose much. Once the game is called the die is set and there is no persuasion capable of changing the cast.

We quote in part a so-called news story in The Chronicle, Duke's paper, relative to Johnson being picked by Les Gage on his all-American basketball team:

"Among these names are seen two southern men, and no doubt the reader will have to smile on reading them. Johnson of N. C. State, our neighboring school over in Raleigh, is probably the prize of the entire selection. There are possibly ten or twenty Duke students that can recall that there is such a basketball player at State. Still more humorous is the fact that Mr. Johnson was not picked as first all-state man, and then when College Humor picks him as all-American guard—well, it is very funny. Right here in our own institution is a man who can play rings around the said Johnson, and that is Bill Werber, all-southern guard for the past two years. It is hard to see how anyone could overlook Werber like that."

It is only natural that Duke should think Werber the best player; we think Johnson is best. That is why we must have impartial judges to select all-American teams. And once the team is picked, no good can be derived by disputing the selection. To take issue on such a matter only lowers the sportsmanship rating of the attacking school, and we all know Duke is not rated too high as sportsmen, anyway.

COMMENTS from other COLLEGES

By R. M. L.

For the past two weeks the editor of this column has been so busy that he has been unable to donate his weekly (no, we didn't mean weakly) contribution to the reading public; so last week he turned it over to the official transom peeper, Mr. Yates. With these remarks we get down to business.

News about prohibition votes in the colleges is always interesting. From the V. P. I. paper we garner this bit of intelligence: "Miss Marjorie Cahill, one of the editors of the Daily Maroon, University of Chicago paper, is going to appear before the House Judiciary Com-

THROUGH THE TRANSON

OUR RIGHT TO CRITICIZE

On Monday your columnist was approached by one of the most outstanding men on the campus and accused of being a chronic knocker, of criticizing everything, tearing down what others build, but never attempting to do anything constructive. The column has been of a decidedly critical nature; we have opposed certain things supported by the college, and our opposition will continue as long as space in this column is permitted. We made a mistake last week—bungled the facts, caused a lot of adverse criticism, but further down you will find an explanation. That mistake, however, will not deter us from other adventures in the field of "muckraking"; on the contrary, it merely sharpens our wits, and makes us give a closer analysis of the facts. As to the right to criticize, to oppose, to tear down, you are referred to the following:

"If there is one thing we love more than another in the United States, it is that every man should have the privilege, un molested, and criticized, to utter the real convictions of his mind. I believe that the weakness of the American character is that there are so few growlers and kickers among us. We have forgotten the very principle of our origin if we have forgotten how to object, how to resist, how to agitate, how to pull down and build up, even to the extent of revolutionary practices, if it be necessary to readjust matters."—Woodrow Wilson.

LITTLE THINGS OF LIFE

Another time-worn theory, that college professors know only about the subjects they teach, was refuted this week when Prof. Goering offered Abernethy a few words of consolation over his political defeat. "You are not ready for life yet, Abernethy," stated the professor. "When you have experienced three disappointments; one in love, one in politics, and one in business, then you are ready for the world."

CHARGES WITHDRAWN—CASE DISMISSED

In this column of last week's paper we criticized the policy exercised by the debate team in the out-of-State debates. All information on which this criticism was based came from the news story released by the debate team. It seems that this information failed to carry the correct import, and therefore any criticism made by this column was unfounded. The impression was left that the expenses of the trip were paid by the college. Such, later information from the same source proved, is not the case. Expenses for four days of the trip were paid by the college, the rest being covered by the individuals. Also, information from the comptroller's office stated that the appropriations allowed by the college (\$600) were for the debate team. Further information reveals that part of this has been used in holding oratorical contests. A review of the above as contrasted with last week's column will convince the reader that a series of mistakes has been made—mistakes for which we are sorry and for which we offer the above explanation.

mittée's prohibition hearing to refute the testimony of Athletic Director Stagg that the University of Chicago is dry.

"Tis fine that V. P. I. doesn't have to argue about such a question; we know that we are dry. This isn't a Ripley column, but believe it or not."

Out the same paper we plucked this: "Announcement has been made of a large university being established at Virginia Beach. Millions of dollars are to be spent in developing the institution. It is to be second to none other educational institution. Work will start sometime soon and the college will be open September 22, 1930. Wealthy New York, Chicago, and Dayton men are the founders of the institution of which Dr. William M. Brown will be president."

If anybody at State knows anything about this new institution, the editor of this column would appreciate his telling him more about it.

"Noah's Ark!"

A program of repairing and renovating started last spring has resulted in campus improvements and is still underway.

Pullen Hall, popularly known as "Noah's Ark," has been repainted and plastered at an approximate cost of \$1,500.

Patterson Hall has been rewired at an approximate cost of \$1,000. Officials said that before the rewiring it was not safe to leave the current on at night because of danger of fire from short-circuiting.

Work started last spring on 1911 Dormitory is expected to be completed by next September, at an approximate cost of \$85,000. The program calls for an almost complete renovation of the interior of the building.

Don't Let Him Sting You

Musical Organization Convenes At Davidson

Mu Beta Psi, national musical fraternity, held its annual convention at Davidson College, April 25-26.

The convention was opened Friday night by the members of the Davidson Beta chapter with a banquet, followed by a concert by the Davidson College Glee Club. Following the concert three new men were initiated into the Beta chapter.

All business of the fraternity was discharged Saturday at a meeting of the delegates from other institutions. The executive secretary announced that he had received petitions from six different institutions for the establishment of new chapters. Action on the petitions was postponed until the meeting next fall, due to the fact the summer vacation was nearing.

Mu Beta Psi was founded at North Carolina State in 1925. It became

national in April of 1929, when the Davidson chapter was installed.

At the recent convention new national officers were elected to succeed those retiring. They were Paul Fry, of Davidson, president; Ralph Beard, of State, vice-president; John Ransour, of Davidson, inner guard; and Bob Smith, of State, outer guard.

H. W. Horney, of State and executive secretary, announced his resignation, which was accepted, and the office was immediately refilled by the election of H. Schachtman, of State. The election to the above office is for life.

American Ceramic Soc. Selects New Officials For Ensuing Period

The Student Branch of the American Ceramic Society held its annual election of officers last Tuesday with the result that the following students

will guide the destinies of the organization through the year 1930-31:

President, E. A. Meents, '31, Kankakee, Ill.; vice-president, E. G. Couch, Jr., '31, Darlington, S. C.; secretary-treasurer, F. N. Surrency, '31, Ayden, N. C.

E. A. Meents and W. C. Bangs, '32, Hendersonville, were elected to represent the department on the Engineers' Council of 1931.

Plans were made for the annual weiner roast of the society, which will be held sometime in May.

Young man (discussing careers): I'm going to be a surgeon. Second Y. M.: Not for me. Too much inside work.

She: How do you know that's a telephone over there? He: I said 'hello' and didn't get an answer.

"Do you use toothpaste?" "No, none of my teeth are loose."

Light is the first of painters. —EMERSON

BUILDINGS in Which You Take Pride

ON THE CAMPUS, where class buildings and memorial structures are so often distinguished by their noble form, flood-lighting equipment serves to prolong the enjoyment of their beauty and to enhance pride in the institution. » » Such an application is made for the new 165-foot campanile at South Dakota State—magnificent gift of an alumnus. Electrically operated chimes sound the hours and are heard in concerts. At night, shafts of

Drawing of the Coughlin Campanile at South Dakota State College, Brookings, S. D. Perkins and McWayne, architects

light from General Electric floodlighting projectors effect a picture of superb beauty done in the school colors and white. From the air, the tower is identified by the beam from a G-E airway beacon surmounting the floodlighted dome. » » Thus, G-E equipment plays its part in promoting progress and fine appreciation. Back of every G-E product is an organization in which college-trained men are largely responsible for the planning, production, and distribution.

GENERAL ELECTRIC GENERAL ELECTRIC COMPANY, SCHENECTADY, NEW YORK

INDUSTRIAL ENGINEERS TO OFFER NEW COURSES

Demand of Industry Forces State College To Expand Engineering Curricula

A new curriculum in Industrial Engineering, available for the first time next September, is announced by the School of Engineering at State College. The demand for engineering graduates to go into industries has increased enormously, and for several years, it is stated, there has been an exceptional demand for graduates in Industrial Engineering.

State College for some time has had a curriculum in Industrial Management, with which Industrial Engineering is not expected to compete or conflict. On the other hand, according to college officials, it is hoped that the two curricula will mutually stimulate each other.

The curriculum in Industrial Engineering provides a broad rather than a specialized education in engineering by requiring courses fundamental to engineering, as in other engineering curricula, and basic courses in several branches of engineering, together with comprehensive study of selected industries, and courses in social science. The emphasis will be placed upon the production of products and services by manufacturing and operating companies, upon processes, machinery, and operations, and in particular upon the mastery of power production and of machinery.

The new curriculum will offer a number of options to be very carefully decided on the basis of the definite vocational aim of the student. For the time being, Professor H. B. Shaw, director of the Engineering Experiment Station, will be advisor in charge of the new course.

The National Survey of Engineering Education found that there is a progressive trend of graduates in engineering to managerial duties and responsibilities, very large numbers of them becoming owners and executives, while the proportion of them remaining in strictly technical work decreases.

The report declares: "The data show a healthy progress through technical work toward the responsibilities of management, and also indicate that engineering education fits graduates for the responsibilities of the direction of American industry."

1911 DORMITORY GETTING RENOVATION THIS SPRING

Patterson and Pullen Halls Are Also Receiving Much-Needed Improvements

1911 Dormitory, one of the largest on the campus, is in the process of a complete renovation this spring. Work started in the spring of 1929 will be completed next September at an approximate cost of \$85,000. The separation of the different sections is being removed by running the hallways straight through the building; water is being provided in each room at an enormous plumbing cost, and the barn-like effect which 1911 possessed before will be dispelled by snow-white plaster in the interior of the rooms and hallways.

This work on 1911 is only part of the improvements being made on the buildings of the campus. Pullen Hall, sometimes spoken of by the literal-minded collegians as "Noah's Ark," is changing its old and musty exterior for a cream-colored white. At a cost of nearly \$1,500 all the outside woodwork and masonry are being transformed as the spring progresses. Repair work on the interior of the building in the way of new plastering has also resulted in a more up-to-date and habitable building.

Patterson Hall, oldest of the Agriculture buildings, is being given its share in improvements effected on the campus buildings. For many years the defective wiring of this building has made it a veritable fire trap. With \$1,000 expended for new wiring, another building on the campus is brought more up to the standards enjoyed by other and newer buildings.

COLLEGE STUDENTS TOLD HOW TO BLAST STUMPS

Use of Dynamite In Clearing Land Is Very Simple Procedure

Blasting stumps with dynamite is a very simple operation. It may be interesting to jot down here the procedure which is usually followed in handling a stumping job.

When it has been determined that a stump shall be removed by this method, the blaster first "sizes up" the stump, finding out whether it is solid or rotten, green or old. In addition to this, he must examine the soil to determine its condition—for example, whether it is clay or sand, wet or dry. When these factors have been determined, a point is chosen between two roots where a hole can be sunk with its bottom directly under the holding parts of the stump. Obviously, if the main bulk of the roots are on one side, the hole will be placed there. Generally speaking, it is placed directly under the center of the stump.

This hole may be made by an auger, a driving bar and hammer, or it may be dug with a spoon. The blaster then guesses the amount of dynamite which will be necessary to remove the stump, for regardless of experience, if the conditions are not definitely known, it is impossible to determine beforehand the exact required amount.

Now let us suppose the blaster feels that five sticks will do the job—that the hole is a dry one, that is, that there is no moisture in the soil. He will first slit four cartridges and tamp them well into the hole with a wooden tamping stick. If the ground is wet, he would obviously not slit the cartridges. The fifth cartridge he will prime with a cap and fuse or with an electric blasting cap and place last in the hole. Holding this cartridge firmly in place with a stick, he will throw in several handfuls of dirt and tamp them lightly. He will then fill up the remainder of the hole with earth—tamping it as solidly as the surrounding soil. After this has been done the shot will be fired and the blaster will return to investigate the results. If the charge was placed too deep, a large crater will be left. If it was too shallow, broken roots will remain in the hole. If the charge was insufficient, the stump will be split and not thrown out. If the charge is over-loaded, the stump and the surrounding territory will be "gone to the woods."

Noting these evident results, it is a very simple matter to determine how the rest of the stumps shall be shot and approximately the exact loads which it will be necessary to use.

With extremely large stumps it is sometimes preferable to distribute charges under various points of the root structure, shooting them simultaneously by the electric method. The advantages of this method are that less dynamite will be used and a shallower hole will result. Its disadvantages are that it will be necessary to make more holes in which to load the charges and that there will be an additional expenditure necessary for additional electric blasting caps.

"Dad, what does it mean here by diplomatic phraseology?"
"My son, if you tell a girl that time stands still while you gaze into her eyes, that's diplomacy. But if you tell her that her face would stop a clock you're in for it."

SERVICE • COMFORT • VALUE

State College Alumnus Assigned to U.S. Govt. Agriculture Position

Another of the State College alumni has been assigned to a position with the United States Department of Agriculture. H. H. Wooten, who was graduated with a B.S. degree in Agricultural Economics in 1928 and received his M.S. degree in the same department in 1929, will go west to Arkansas and Louisiana to work as an associate agricultural economist for the U. S. D. A. He will be located there for a year or two, after which he will be located in Washington, D. C.

Mr. Wooten will be engaged in appraising the value of property in the previous named states, which is to be taken over by the Government and put on its flood relief program.

The experience that Mr. Wooten has had with the problems of economics is something that has helped prepare him for this position. He worked with the U. S. Tariff Commission for many months, dealing with the problem of determining the cost of production of certain agricultural products. For a while he was located in Washington, D. C. He also traveled over the entire United States and spent several months in Mexico. Mr. Wooten was also employed by the North Carolina Tax Commission for a while.

During the past year he has assisted the regular employees of the Department of Agricultural Economics here at the college in teaching and research work. During his short work in economics he has prepared a bulletin on the Credit Cost on cropper-operated farms. This bulletin endeavors to find out how much money the cropper pays out on interest and the general problem of agricultural finance.

Safety Device Invented To Check 'Plane Motor

The stroblow, a compact portable device small enough to fit in an ordinary suitcase, was demonstrated for the first time at the Bettis Airport, Pittsburgh, Pa. The feat that was performed recently enabled the spectators to read the markings more than 1,900 revolutions per minute. By means of this apparatus the propeller quivers and cracks as well as the engine valve action are visible to the naked eye. Because of the importance of checking the plane before taking

off and making sure that the propeller and engine are in perfect condition. It is probable that the stroblow will be added as part of the required inspection before flight.

The stroblow, invented and developed by D. D. Knowles, L. R. Be material and is credited with basic patents covering both.

Ceramic engineers have been working for years on this problem, but it remained to an N. C. State graduate to solve it. Development of this material will allow architects to design buildings 150 stories high without increasing the weight of steel over the amount used in the Woolworth Building.

P. E. Trevathan, B.S. '28 (Cer. E.), has recently been promoted to the operating executive staff at the Templeton, Pa., plant of the Harbison-Walker Refractories Company, the world's largest manufacturers of re-

fractory products. Mr. Trevathan's chief reports that he is one of the outstanding young engineers of their large organization.

N. C. State Graduates Discover New Process In Building Material

Prof. A. F. Greaves-Walker reports the following good news about two young ceramic engineers:

D. B. Hall, Cer. E. '28, junior research engineer for the Hollow Tile Manufacturers' Association, has developed a building material which is as strong as Haydite concrete and weighs but 32 to 35 pounds per cubic foot. He has also perfected the mechanical equipment for producing the tiles, and W. E. Bahles, of the Research Laboratories of the Westing-

house Company, makes moving objects appear motionless by means of flickering lights regulated to flash at intervals corresponding to the speed of the moving object.

Because of its compactness it may easily be taken to the moving object which the engineers wish to observe. The advantage, therefore, that the stroblow has over previous instruments is its ability to be used on the job instead of trying to duplicate the same conditions in the laboratory. Its many uses are making the stroblow extremely valuable.

With it one may observe the amount of slip of a moving belt on a pulley, the vibration of meshed gears in factory machines, or even the movement of valves in gasoline engines. The only requirement for its operation is sufficient darkness to make the flickering lights visible on the moving object.

"Love like ours can never die."
MUTTERED MARMADUKE, Thickly.

"You'd be surprised," replied the sprightly Sophia. "With a rasping voice like yours, love is likely to fly out of the window and land on the back of its neck. What our love needs is insurance."
"What insurance?" he wondered.
"The insurance of OLD GOLDS, boy friend. Throat-ease and tender tones caused by the mellow, mild, heart-leaf tobacco; vocal cords that act without a struggle; no tickle, scratch or scrape. OLD GOLD yourself, Marmie, and we shall be inseparable. There's not a bark in a billion."

John H. McKinnon Represents State In Oratory Contest

J. H. McKinnon, senior in business administration, will represent State College in the preliminaries of the annual Intercollegiate International Oratorical Contest on the Constitution.

The State preliminaries for the contest will be held May 2, at Davidson College. The following institutions will be represented in the contest: N. C. State College, Duke University, University of North Carolina, Wake Forest, Davidson, Asheville Normal, Catawba, Guilford, Lenoir-Rhyne, and High Point College.

The institution placing first in this contest will send its representative to the regional contest, which will be held in the latter part of May. The place and date of the contest have not been definitely decided upon to date. Last year the regional contest was held in the auditorium of Asheville Normal College at Asheville, N. C. The winner of the Regional Contest will enter the national contest, which will be held June 15, in Los Angeles, Cal. His expenses, including traveling, board, and incidentals, will be paid by the Government.

State College in the past few years has established a very credible record in this contest. H. J. Oberholzer, representing State College in the contest in 1927, won out in the State and regional contests and placed first in the national contest in Los Angeles. Last year Lee Mercer won out in the State and regional contests and placed sixth in the national contest in Los Angeles. The fact that State College has sent two men in the last three years to the finals in Los Angeles clearly shows the superior position she now holds in Intercollegiate Forensics.

Lee Mercer will represent State College in the State Intercollegiate Oratorical contest which will be held at Duke University on April 25.

THEATRE PARTY

Mr. Ernest S. McCarn was honorary guest of Mr. Gwyn J. Stimson at a theatre party Wednesday afternoon at the State Theatre between the hours of 2 and 4 p. m. Those attending were Mr. Ernest S. McCarn and Mr. Gwyn J. Stimson.

He: Hey, there's no swimming allowed here.

She: Why didn't you tell me before I got undressed?

He: Well, there's no law against that.

LEADING LADY

MISS DOROTHY MAE ALLEN
of Richmond, Va.,

who will assist Milton Vipond in leading the junior figure at the Junior-Senior Prom, the first ever held at State College.

ANNOUNCEMENTS

Seniors

may get their invitations to the Junior-Senior Prom by presenting their registration card at the Y. M. C. A. desk any time today or Saturday, or see Milton Vipond at 203 First Dormitory.

Juniors

will have a class meeting next Wednesday, May 7, at 1:30 p. m., at the Y. M. C. A. Nominations of officers of senior class will be made at this meeting and voted on Friday. Everybody come!

Additional Orders

will be taken for senior invitations on Monday and Tuesday, May 5 and 6, at the "Y." from 12 noon to 2 p. m.

LOST-AND-FOUND BUREAU

FOUND: A slicker, glasses, fountain pen, keys, books, and gloves.

LOST: Fountain pen, calculus book, notebook, coat, and keys.

If you have lost or found any article, please come by the Lost-and-Found Bureau, located in Room 3, Y. M. C. A.; open 1:15 to 1:45 p. m., and 8:45 to 9:15 on Saturday morning.

Alpha Kappa Pi Places State College Chapter

With the installation of XI Chapter at North Carolina State College the Alpha Kappa Pi, social fraternity, established its first chapter in North Carolina.

The chapter was installed by the degree team of Eta Chapter of Presbyterian College, Clinton, S. C., under the direction of Delta Province Chief Johnson.

The following officers were installed: President, A. E. Bennett, Asbury Park, N. J.; Vice-President, J. E. Collins, North Arlington, N. J.; Secretary, J. W. Sawyer, Pembroke; Treasurer, F. D. Whitehead, Greensboro; Chaplain, L. C. Holman, East Orange, N. J.; Historian, H. E. Karig, Livingston, N. J.; Sentinel, E. S. Beran, Washington, D. C.

After the installation, XI Chapter entertained at a banquet at the Mary Ellen Tea Room. Besides the members of XI Chapter the following guests were present: Brothers McQueen, Beckham, Bennett, Whitsett, all of Eta Chapter, Clinton, S. C.; Prof. W. N. Hicks, Dean E. L. Cloyd, and Province Chief Johnson.

State College Y. M. C. A. Sends Representatives To Training Conference

A. D. Stuart, vice-president of the State College Y. M. C. A., was president of the 1930 State Student Officers' Training Conference, which was held at Guilford College last Saturday, Sunday, and Monday. Representing State College with Stuart were E. S. King, Harvey Whitley, Leroy Clark, C. N. Gross, W. D. Stephenson, Robert Gatlin, and W. B. Callihan, forming the largest delegation from any one "Y."

The 1931 conference will be held at E. C. T. C. and will have as officers, Archie W. McLean, nephew of ex-Governor McLean and a student at Davidson, as president; for vice-president, Miss Louise Melville, of Guilford College; treasurer, Harry Finch, of Carolina, and secretary, Miss Hannah Turnage, of E. C. T. C.

Mrs. Clancy, your child is badly spoilt.

Gwan wid yez.
Well, if you don't believe me, come and see what the steam-roller just did to him.

BROOKS AMONG SPEAKERS MEDICAL SOCIETY MEET

Six Hundred Medical Doctors Attend the Pinehurst Convention

Among the prominent speakers at the seventy-seventh annual convention of the North Carolina Medical Society held in Pinehurst this week was Dr. E. C. Brooks, president of this institution, who delivered an address on "Health and Higher Education."

The convention was attended by 600 of the leading medical doctors of North Carolina. Dr. L. A. Crowell of Lincolnton presided at the convention, as he was the retiring president of the association. J. G. Murphy of Wilmington was elected president for the ensuing year.

Dr. Brooks' remarks concerned the relationship of health to higher education with health, especially with reference to what higher education can do for health rather than what health can do for education.

At State College, he said, a study is being made that may eventually prove of great value to doctors and health officials. Already it has indicated that modern athletic training is too severe for the immature student. The effect that it has on the mature student after he leaves the college is being studied and will be over a period of years.

A number of speeches were delivered, including medical authorities and others from this State and other states.

Self-Help Men Enjoy Fresh-Air Convention

"Fireman, save my marshmallow!" was the cry heard over the Lassiter Mill section of Wake County Saturday evening, when a member of the Self-Help Club threw a dozen or more wax cups in the fire, which flashed up almost like powder. The fifty-five members of the club were sitting in a circle around a large bed of red charcoals consuming food galore, when the containers were released. Suddenly the flames licked out to singe whiskers, hair, knickers, overalls, and a few dress suits were also scorched.

This is an annual affair of the club and the meeting was primarily for the election of officers for the ensuing

year. In addition to the election, however, each member helped himself to weiners, various kinds of cake, lemonade, marshmallows, and smokes.

H. T. (Mutt) Cryder, from Stony Point, was selected to pilot the club

during 1931. Luther Stone, of Nashville, will be vice-president. Joe Kelly, of Shelby, will do the recording, and C. G. Lawrence, from Hiddente, was elected to act as treasurer.

The work of the retiring historian,

Melvin McKenzie, will be continued by Harvey Whitley, of Washington.

"Do you like to go out with chorus girls?"
"Yes, the coarser, the better."
