STATE COLLEGE STATION, RALEIGH, N. C., JANUARY 29, 1932

OFFICE: HOLLADAY HALL

LEGION TO GIVE MINSTREL REVUE THURSDAY NIGHT

Midnight Show to Aid Unemployed
of State College to be
At State Theatre

MAJOR MICHAEL PERRY
DIRECTS COMMITTEE-MEN

Four Professors on American Legion Committee to Aid Unemployed; Graduate Students Work On Employment Problems in Conjunction With Major Perry; Theatre Will Open Doors at 11:30 P.M.; Faculty Pledges Support.

The "Minstrel Revue of '32" will be presented again at midnight next Thursday night in the State Theatre under the auspices of the American Legion, Raleigh Post No. 1, and the proceeds are to be turned over to the college to be expended by Dr. E. C. Brooks in the form of salaries for work to be done for the institution by those now unemployed. The move is a part of the Legion's campaign against unemployment which is being directed by a committee of which Major Michael A. Perry, Professor of Industrial Management, is executive secretary.

Four State College professors were added to the committee as technical advisors this week. They are: Dr. G. W. Forster, head of the Agricultural Economics, who will furnish information and advice in regard to the present farm situation on which he is a recognized expert; Dr. R. L. Moon, Professor of Finance, who will give financial advice; E. W. Boshart, Professor of Vocational Education, who will aid in the allocation of work; and M. C. Leager, Professor of Statistics, who will help in the statistical work of the campaign.

Dean B. F. Brown, president of the Lions Club, and Dr. Z. P. Metcalf, president of the Kiwanis Club, have pledged active support of the program for both themselves and the organizations they head. A. A. Jackson and L. C. Yeargin, graduate students who are studying for their master's degree under Major Perry, have been present at the committee meetings and are studying the situation and doing research work for the committee as part of their graduate work. Jackson's thesis is on "Unemployment Relief Programs," and he has complete reports of the relief programs of thirty states under study, in addition to the local campaign. Yeargin, whose thesis is "Industrial Stabilization Plans," is studying the Swope plan of the General Electric Company, the United States Chamber of Commerce plan, the Rochester plan, the Philadelphia plan, and many other relief measures designed for the readjustment of industrial difficulties. The general subject of the seminar is "Present Labor Problems in North Carolina."

Major Perry is making daily addresses over station WPTF in connection with the campaign. In a recent talk Major Perry said, "What we are trying to do is not an impossible task. With support it can and will be done. The success of the efforts of the present campaign will have a profound influence on the movement throughout the entire country."

REGISTRAR MAYER GIVES
REGISTRATION AS 1,654

Engineering School Leads in Enrollment for Winter Term
With 699 Students

A total of 1,654 students have registered in all of the departments of the college to date, according to W. L. Mayer, Registrar. This is about 35 students less than the number which were enrolled at this time last year. This total includes 560 freshmen, 439 sophomores, 258 juniors, 259 seniors, 72 graduate students, 15 irregular students, 14 special students, and 4 candidates for graduate professional degrees.

There are 251 students in the School of Agriculture, 213 in the School of Education, 699 in the Engineering School, 258 in the School of Science and Business, and 123 in the Textile School.

Students number 241 in Business Administration, which is more than any other course. There are several courses with only one student enrolled, and the average number of students enrolled in the average department of the average school is a fraction over 37, all classes of students included.

Aids Unemployed

MAJOR MICHAEL A. PERRY
Professor of Industrial Management at State College will head the American Legion's Unemployment Committee as executive secretary. He arranged a midnight minstrel of college talent for Thursday at the State Theatre.

Rho Dammit Rho

With no rules, ritual, ideals, constitution, dues, officers or obligations, Tau Xi Kappa, local honorary fraternity, last week received a charter from Rho Dammit Rho, national college humor lodge.

Members claim the unique distinction of being the only chapter with a house. It is located at 1204½ Groveland Avenue and was furnished with a total outlay of \$20. Holding of a campus office is a bar to membership. According to Frater Harry "Red" Luther, their only idea is "to keep out of jail."

Plans are that each member shall own a model T Ford. Two have already been purchased. "Suicide No. 1" and "Suicide No. 2."

The roster is: "Jimmie" Wallace, Harry Luther, "Skippy" Williams, "Red" Montgomery, "Scoobie" Etheridge, Myron Rhyme, Alma McCallum, Rupert Singleton, Will Roy, and "Bull" Williams (president).

The members plan a house dance Saturday night with only members attending.

THETA TAU BIDS SEVEN STUDENTS

Professional Engineering Fraternity to Hold Initiation Rites February 3

Seven engineering students of North Carolina State College will be initiated February 3 into the local chapter of Theta Tau, honorary national professional engineering fraternity. The pledges are: L. M. Taylor, sophomore; W. E. Tulluck, junior; T. J. McKenzie, sophomore; Elwood Williams, senior; George Barringer, senior; Joe L. Pleasant, junior; and L. F. Yost, junior.

Student officers of the local chapter are: Henry A. Ricks, president; T. L. Hodges, vice president; F. M. Edwards, secretary; and C. L. Mann, treasurer.

INSTITUTION BUDGETING
PLANNED BY SHEFFIELD

Assistant Director of Extension Estimates Food Needed on State Farms

Charles A. Sheffield, Assistant Director of Extension, has worked out during the past two years budgets that serve as guides for the production of foodstuffs for the inmates and livestock at state institutions.

Budgets have been planned and carried out at the State Prison farms and at the Mills Home at Thomasville with excellent results. The latest budget has been prepared for J. L. Beall, manager of the State Sanatorium farm.

He first worked out in detail the number of laying hens, dairy cows, brood sows, beef cattle and other livestock units needed, based on the human population concerned, and then prepared figures for the acreage and amount of crops which must be grown to feed both the human population and the livestock.

Dean I. O. Schaub, director of extension here, announced that the whole set-up results in an excellent guide by which the farm work of the institution may be planned for the year. As changes need to be made it is easy to do so by means of this new method.

Starving

Two trained nurses and sympathizers all over the United States rush to the aid of a starving alligator, but "Little Setzer" enters his fourth week of endurance without food.

Nurses Sara Rand and Beth Boyette receive alligator diets daily that range from plain meals to bird livers, but the alligator pet refuses food of any sort.

Little don "Setz" know he has made friends in eight States and, for his health, letters pour in each day.

Ceramic Industries Profit Through College Research

Clays and Shales of North Carolina Investigated as to Commercial Value; First Instance on Record of a Ceramic Department Undertaking Extensive Project on Limited Funds; Stollé and Fabianic Doing Research work

An intensive study of the clays and shales of North Carolina to determine those that would have a commercial value for future needs, the uses to which they could be put and their characteristics was begun by the Department of Ceramic Engineering under the leadership of Prof. A. F. Greaves-Walker about seven years ago.

This was the first instance on record of a department of ceramic engineering undertaking such an extensive project with only limited funds. In other states this work has been done either by the department of conservation and development or the geological surveys.

Much valuable information was obtained and distributed to those interested in the manufacture of ceramic products and development, although during the first five years the work done was of a preliminary nature. It was due to the distribution of this information through the Engineering Experiment Station that the ceramic industries of the state went through the greatest expansion in their history, and were able to export instead of import ceramic products.

About a year and a half ago two teaching fellows, N. H. Stollé and W. L. Fabianic, graduates of the New York State College of Ceramic at Alfred University, and now attached to the ceramic engineering faculty here, undertook to finish the project under the direction of Prof. Greaves-Walker, head of the ceramics department, which is now rapidly nearing completion.

Large samples of materials were first gathered from deposits that preliminary tests showed to have promise, including areas between Durham and Sanford, and Pine Bluff and Madison, containing the Triassic shales; between Thomasville and Monroe containing the Pre-Cambrian shales; between

Asheville and Hendersonville containing the buff burning alluvial clays; the Hendersonville area containing the Brevard schists, and the Hot Springs area containing the Cambrian shales. Samples of many promising alluvial or river bottom clays were also included.

The laboratory work has included the determination of the chemical and mineralogical composition and the physical characteristics, which include shrinkage, temperature-color range, strength, etc. This data will be completed in May and it is anticipated that a bulletin containing this information will be published at that time to be distributed through the State College Engineering Experiment Station. This data will be of inestimable value to the industries of the state and prospective investors, who have lost hundreds of thousands of dollars through improper location of plants and the lack of knowledge of the correct methods of the processing of raw materials.

H. L. Longnecker, a graduate student in the department, is also carrying on a research project of interest to the ceramic industries and architects of North Carolina. He is developing glazes and enamels for the Triassic and Pre-Cambrian shales.

W. C. Bangs, a senior in the department, is undertaking a third project which is certain to produce results which will be of great value to the ceramic industries of the Greensboro-Cherokee section. He is attempting to develop a cheap and simple process of increasing the plasticity of some of the shales of that region that have become hard and lost their plasticity or moldability to a great extent, thereby developing weaknesses in processing that cause high losses in the manufacture of certain products.

SUMMER SCHOOL BEGINS JUNE 13

Building Superintendent Course To be Feature of School Says Dean Browne

The State College summer school, which will offer courses in education, mechanic subjects, business, agriculture, history and English, will open June 13 and end July 22. It was announced by Dean T. E. Browne, director of the School of Education. Regular college credits will be given for the 6 weeks session.

A new feature of the school this year will be a course offered for school building superintendents under the direction of Professor L. L. Vaughan, professor of mechanical engineering. The course will deal with economical use of fuel, care and management of heating system and health factors, including water supply and sewerage disposal. This course will be open to men of the State who have charge of school buildings in the State.

GRANT REPRESENTATIVE TO INTERVIEW SENIORS

Chain Store Personnel Department Sends Carmichael to State On March 7

H. T. Carmichael, of the personnel department of the W. T. Grant Company, chain store operators, will be at State College March 7 to interview seniors seeking jobs with the Grant chain, according to Professor H. A. Richardson, head of the State College Placement Bureau.

Last year the Placement Bureau placed two members of the graduating class as assistant managers of Grant stores. These were K. W. Hoke, who was sent to St. Louis, and E. C. Jackson, who was sent to Fort Wayne, Indiana. Richardson was unable to give The Technician representative an estimate of the number of graduates which the bureau would place this year, as he had no way of telling how many would apply for jobs.

The W. T. Grant Company operates a chain of 402 retail department stores, and is considering the opening of several more. They have a policy of hiring college graduates only and place a number each year.

"Y" Speaker

DR. T. Z. KOO
Vice president of the World's Student Christian Federation, will speak in Pullen Hall tonight at 8 o'clock. Dr. Koo is praised by Rev. E. McNeill Potat as clear and sane interpreter of Chinese questions.

EXPERIMENT MEN GIVEN NEW HOPE

President Brooks Assures Experiment Station Men February and March Pay

The work of the State College Experiment Station will continue during the months of February and March and possibly through the rest of the year, according to Dr. E. C. Brooks.

"Arrangements have been made to carry the agricultural research staff through February and March, and probably through the remainder of the year. This has been accomplished by a reduction in salaries of the research men, by the same percentage as that of all other salaries of the college, by a reallocation of funds, and by discontinuing some of the research projects for the remainder of the year," Dr. Brooks told The Technician Thursday morning.

By this arrangement the tax payers of the state will not only be benefited but the work of the station will continue on the 102 projects that are now under way. Many of these projects have been going on for many years and an interruption would mean the loss of many thousands of dollars to the citizens of the state.

The work of the station is not confined to the needs of the farmers alone, but to the citizens of the urban communities. Cities and towns of the state are recipients of the services of this department, such as research on milk, meat, vegetable, and other food commodities. The fields covered by the department consist of agronomy, animal industry, agricultural economics, botany, horticulture, poultry husbandry, home economics, rural sociology, zoology and entomology.

The funds for the work are furnished jointly by the State and Federal Governments, and it is lack of funds from the state that caused the crisis. At the present time the Federal Government has four additional workers in this state cooperating with the state research workers on special work. If the withdrawal of the state workers is necessitated, the Federal Government will automatically stop its support.

"There are 15 documents ready for publication," according to Dr. R. Y. Winters, director of the State College Experiment Station, "but due to the lack of funds we are unable to send them to press. This means that those who are in need of this information will not be able to obtain it. We have many inquiries for the results of research work on different projects but we do not have the funds for the purchasing of postage stamps."

There are six branch stations or farms located in the various sections of the state. However, the work is not confined to these six stations and the State College station, but is assisted by a number of other smaller stations (Please turn to page four)

Popular Prescription

Onions and soda crackers followed by a chaser of onion-wash have become familiar articles of diet with four prominent residents of the Y. M. C. A.

It all started when Archie Ward came back to school after Christmas suffering with a severe cold and the combination was prescribed as a remedy by some well-meaning friend.

Henry Brock, M. L. Shepherd, and Jim Hardwick acquired the habit from him and added the mouth-wash at the urgent request of other students around the "Y."

NOTED ORIENTAL SPEAKS TONIGHT IN PULLEN HALL

Dr. T. Z. Koo Speaks on "International Mindedness" to Public at 8 o'clock

POTAT LAUDS SPEAKER AS ORIENTAL AUTHORITY

Y. M. C. A. Lecturer is Prominent in World Associations for Peace Promotion; Koo Just Back From China and Manchuria and was Speaker to the Eleventh Quadrennial Convention of the Student Volunteer Movement Held in Buffalo.

Dr. T. Z. Koo, vice president of the World's Student Christian Federation, will speak on "International Mindedness" in Pullen Hall Friday night, January 29, at eight o'clock.

Dr. Koo has just returned to the United States from China and Manchuria. He came to deliver an address at the Eleventh Quadrennial Convention of the Student Volunteer Movement recently held in Buffalo, N. Y. Since his return to this country he has delivered addresses before the New York, Philadelphia, and Chicago Chambers of Commerce.

The speaker is well known for his work with college men. He is a graduate of Saint John's College, which is in Shanghai. His first trip to this country was a successful effort to persuade the executive committee of the World's Student Christian Federation of the urgency of holding a conference in China. Upon its successful completion, he was elected a secretary of this movement. He is now a vice president of Young Men Christian Association of the Federation. He has been a leader of activity and thought among Chinese students for a number of years. At the present time he is National Student Secretary of the Y. M. C. A. He has also served nine years with the administrative department of the Chinese Railway Christian work. As a member of the Chinese National Y. M. C. A. staff, he has worked for eleven years.

In 1925, Dr. Koo was named as a member of the Second Opium Conference called in Switzerland by the League of Nations. Two years later he was invited to go to the United States and Canada to interpret the Chinese situation from the Chinese standpoint. He came with the backing of the Shanghai District Chamber of Commerce, Bankers Association, Cotton Mill Owners Association and forty-five other commercial and industrial bodies.

Dr. Koo's work is not confined to the social sciences. He has done much in the realm of music. He is the author of a collection of Chinese songs and is greatly interested in the music of the western world.

E. McNeill Potat, pastor of the Pullen Baptist Church, and a former missionary to China speaks highly of the speaker. "Of all the Orientals I know," says Mr. Potat, "he gives the clearest and sanest interpretation of the eastern question."

CLOYD ADDRESSES FROTH AT MEET ON JANUARY 22

Dean of Students Discusses Budget Cut and Asks Yearlings For Optimism

Dean E. L. Cloyd, in an address before the freshmen assembly Friday, January 22, in Pullen Hall, told the students that registration was very nearly the same as last year and presented the facts concerning the budget cut and the steps that the college was taking to meet the situation.

In a discussion of scholastic records the Dean stated that there were 38 freshmen, 16 sophomores and 7 juniors who did not pass the required amount of work to stay in school. Fifteen freshmen falling more than 50 per cent of their work were allowed to come back, according to the Dean, and nine freshmen and seven sophomores were allowed to return on probation. He also said that thirteen students entered who had failed to pass the required amount of work to stay in school some time in the past and that nine students were allowed to re-enter when a faculty member promised to sponsor their work.

"We shouldn't get despondent or discouraged," Dean Cloyd said, "but keep up our spirits and go on with our heads up, chests out and enjoy life the best that we can."

SUBSCRIPTION PRICE: \$1.50 Per College Year

TO PAY PAUL

As the sharp scythe of the Budget Bureau cuts off twenty-five employees of the Experimental Agricultural Stations, North Carolina farmers and taxpayers lose thousands of dollars in actual money for unfinished experimentation.

Like growth in agriculture, experimentation is a slow process and tens of years have been spent on many of the projects on North Carolina experiment farms. A sudden cessation of these processes would bring not only loss of fruitful discovery, but loss of years of study and work of the past years and the State of North Carolina would be "robbing Peter to pay Paul."

The work of these experiment stations is primary to every agricultural worker's progress, and with the present low prices of agricultural products, the need of scientific farm operation is felt more than ever before. A single project of the hundreds that will be lost may be of great value to the agricultural industry.

Only last summer, a State College plant pathologist discovered a new type of raspberry and developed it on one of these farms. Agricultural America took notice and Eastern Carolina profited.

North Carolina is still essentially agricultural and the agricultural interests of the commonwealth should be a primary interest to lawmakers and statesmen. The loss of a single experiment will further cripple the agricultural population. To make this class self-supporting, agricultural experts must be maintained.

The Federal Government gives dollar for dollar to the states who operate experiment stations at the present time. North Carolina is not meeting her share of the expense.

The Budget Bureau sharpens its scythe's blade to reap a harvest of agricultural leaders. The harvest is a costly one and ere another blade is made keener, North Carolina taxpayers will groan.

POINT SYSTEM

The need for a point system to limit the major and minor elective offices that can be held by an individual is evidenced every day at State College.

Fifteen or more of the major offices on the campus are held by three seniors, all admitting that they cannot do justice to all their duties. All of them agree that the honors bestowed upon them hamper one or more of the organizations of which they are officials.

On the popular, efficient, and willing student honors are heaped each year, but for these honors the honored must pay—loss of time, loss of respect and inefficiency are brought upon the student by no fault of his.

State College is over-run with key organizations and others that return little to the institution. Many prominent national organizations are listed among these and rate relatively low because of presidents who cannot devote to them the amount of leadership. This condition cannot be remedied without the support of the student body.

The adoption of a point system will make for the betterment of the college, a more active group of organizations, a more intelligent and prominent group of leaders and a more efficient fulfilling of purposes.

A point system will force to the front more leaders and this fact alone is worth consideration. To make a better State College, the point system must be an integral part of student government.

Commendable is the action of Phi Epsilon, co-ed society, which voted to aid the Blue Key leadership fraternity in securing equipment for Pullen Hall. An organization which leaves accomplishments on its records is worthy of recognition and a name on the State College campus.

ADVERTISING AT ITS BEST

With the vote of the Engineers' Council to entertain a delegate from each of North Carolina's high schools, the Engineers' Fair this year will go down in engineering history of the college as the greatest and most progressive yet.

As consolidation approaches, economic advertising of this calibre is highly worth while. High schools will send their best scholars and they will see N. C. State's best in engineering achievement.

The question has been raised as to the economic value of the Engineers' Fair. The faculty can look with pride on the Council's move to acquaint the public schools of the State with the functions of State College engineering departments.

No greater advertisement will yield as great a return in good will and productive results. Pamphlets cannot describe the intricate and interesting process exhibited at this fair; no representative from the college can do justice to the magnitude of this annual fair.

The Engineers' Fair is of inestimable value to the college as a huge showroom for the display of mechanical achievement and equipment used in the teaching of the course. The bringing of a select high school senior to the college campus to witness the Fair will give the student a graphic picture of engineering at its best in North Carolina.

Sister engineering institutions are losing no time in using all means possible to swell their engineering student population. That the Engineers' Council takes the lead in its own self-preservation is indicative of its interest in the institution.

The engineering faculty can profitably lend a hand in this student undertaking and look toward similar plans to swell their departmental populations. Consolidation approaches.

In fairness to prospective students, in fairness to North Carolina, the engineers are fair in their efforts to bring greater enrollment. As projects, exhibits and equipment tell of State College's engineering possibilities and desirabilities, the prospective student sees and judges for himself the best opportunities for preparedness and graduate employment. The Engineers' Fair is constructive.

MAY HIS TRIBE INCREASE

The patriotism of peace is far greater than that of war. Peace time reconnoitering has been started by the American Legion in favor of education. State College considering the future, is fortunate in securing the cooperation of this powerful organization during this crisis facing education.

Unlike those war-time patriots who sold liberty bonds to buy munitions, these peace-time patriots vote peace and service in a battle against unemployment, led by a State College professor—Major Michael A. Perry, head of Industrial Management in the School of Science and Business.

Unselfish in his service, far-seeing into the future, unremunerated for his labors, his addition to the State College faculty will bring inestimable good will and tangible worth to the institution through his work in the American Legion as Executive Secretary of the Unemployment Committee of the organization.

The guns of depression are bombarding North Carolina State College and Major Perry leads a force to combat the army of unemployed which has been swelled at State College. Laying his trenches on the campus and recruiting State College students, this leader will fire the first shot in favor of his institution—presenting the "Minstrel Revue of '32" at the State Theater in a Thursday midnight show. Proceeds will go entirely to the President of the college to be used as salaries for the unemployed.

A wholesome sign among a cloud of gloom is the interest State College professors are taking in civic and business projects. Major Perry is not alone as a valuable contact man for this institution—among the faculty there are speakers, advisers, club presidents, industrial officials, men who do more than they are paid for and repay the college more than it gives. This type of man is valuable to the institution and establishes confidence among the students—confidence in the professor that promotes collegiate pride and assurance that the faculty is serving to further their institution, whose development means added prestige for the graduate.

State College faculty is employed in that work which benefits themselves, their students, their college, and North Carolina.

FACULTY AND STUDENT

The Student Council will send letters to the faculty this week soliciting their cooperation and suggestions as to how student government may be bettered at the institution.

The thinking and progressive professors of the campus will rally to this opportunity to be of service to the student body. The Council has gone so far as to plan a special meeting to be held jointly between the councilmen and faculty men.

There is a growing feeling among the faculty and student government that the student rule is not at its best and that reform is necessary. President Romeo LeFort is launching a progressive program for the Council and the success that it may achieve depends upon the entire college population.

The honor system is especially talked of, and its real worth at the present is questionable. This question will be placed before the student body for acceptance or probably faculty rule entirely.

Student government does not only require the cooperation of the student body, but the faculty—their suggestions for improvement will be welcomed.

The college library will buy no more books this year. The college will bring no speakers to the campus this year. The depression is on.

THROUGH THE TRANSON

Life Runs Smoothly

At just about this time every year college life at this allegedly state-supported institution lapses into an apathetic state of hopeless boredom, thus leaving your enterprising columnist with almost nothing to do. Such a condition leaves no alternative; I must cast a yearning and wistful eye over the hallowed past and conjure up dreams and images of a more active day.

Near the first of every year a blithe spirit of happy—and thus morose—optimism prevails, suffusing the bright faces of the merry lads with flashing smiles and untroubled brows. At such a time, your columnist always fills his space to the last line.

The student organizations (bless their little hearts!) can then be depended upon to devise some scheme way of making other people happy, i.e., making other people like themselves. Such innocent little activities always present so much of the ludicrous that many a hearty laugh can be extracted at their expense. At present, however, the merry lads seem to have suspended activities altogether. No public spirited schemes—with the exception of the Blue Key's spirited and meritorious campaign to equip Pullen Hall with curtains—have made themselves apparent. Life runs dully and sluggishly through a channel of insufferable uniformity.

One Turbulent Little Stream

Particularly this year a spirit of boredom has pervaded the campus, the extent and quickness of which has rarely been surpassed. And I attribute this unusual cessation of activity to the departure of Milton Abernethy, an old friend of mine who did much to brighten up dreary days of the past three years. Maybe 'tis well that he's gone, though. His influence, I fear, was a bit upsetting to the local habits.

Taken in small doses, and with a Babbitt-like caution and decorum, the Abernethy spirit kept the campus in a continual bustle of mental activity—a wholesome state of affairs that contributed much toward provoking an occasional thought from the campus leaders. He openly denied the boastful claim that they had an excellent college and laughed while they tried to prove it. He instigated darkly that they didn't have quite so much sense as they assumed. And they achieved a sickly grin and made a mental note to "get him" when the opportunity presented itself. Their celebration, they were sure, was an excellent quality and not to be attacked by such anti-social and destructive individuals.

Then, just as he was hitting his stride, he conceived the unhappy idea of resorting to statistical proof. Never a lad to think things over calmly, he hastily published proof that a great number of students, despite the honor system, were cheating. And thus he involved himself in a tangle that resulted, either directly or indirectly, in his expulsion. He made the fatal mistake of attacking the most sensitive and most vulnerable spot in the enemies' armor, and he lacked sufficient reserves to press his advantage.

I sometimes wish he were here now.

Pathological Note

This aimless Open Forum discussion between a freshman and upperclassman tends to prove the assertion of one wise old man, who said that college boys were college boys and that class lines were indicative only of the time one had spent in college.

Weekly Definition

A college graduate may be defined as a person who had an opportunity to begin his education.

PAULSON MAKES TALK TO LANGUAGE SOCIETY

The life and works of Titian, one of the greatest painters of his time, were discussed by Professor J. E. Paulson at the regular semi-monthly meeting of Los Hidaigos, national language fraternity.

"Titian painted all his life and his works will probably run over a thousand, as new pictures are found every year. He painted chiefly for royalty and was a wealthy man. He was respected by all and was known as an excellent host."

Prof. Paulson explained the fine points of several of Titian's paintings by means of his own water color sketches and drawings.

An Expensive Harvest

DELTA SIGMA PI HEARS HARDWICK

"Relationship of Christianity to Business Problems" is Subject of Talk

James T. Hardwick, leader of student discussion groups, last Friday night spoke in an open meeting before Delta Sigma Pi, international commerce fraternity, on "The Relationship of Christianity to Economic Problems."

Tracing the battle of religious and political freedom, Mr. Hardwick pointed out that the next great battle was that of achieving freedom in the industrial field.

Hardwick spoke briefly of his recent visit through the coal sections of Harlan County, Kentucky. He attributed part of the deplorable conditions there to the fact that the coal operators were cutting one another's throats. If such conditions are to be remedied, he suggested government ownership of the coal mines on somewhat the same basis as the civil service.

"If the state owes the child an education," Hardwick declared, "it also owes it means by which physical sustenance may be assured. He further pointed out that, in dealing with any economic problem the international situation must be taken into consideration."

Hardwick suggested several things that students might do in order to better conditions in this connection. "First," he said, "the student should

know all he could about economic problems. Also, there is great need for education among the workers as well as intelligent leadership. We must acquire a knowledge of the serious conditions as they exist today and then learn how to share the conditions in the way that will do the most good."

Touching on the educational system, Mr. Hardwick declared that it was not connected vitally enough with the needs of humanity today.

The meeting was then thrown open for a general discussion of the problems raised by the speaker.

First State Radio

In 1912 Polk Denmark, Alumni Secretary, then a student in Chemical Engineering at State College, and Professor William Hamde Brown, Jr., head of the Department of Electrical Engineering, contrived the first radio receiving set ever made on the campus.

FRIENDSHIP COUNCILMEN HOLD MEET IN Y. M. C. A.

The Freshman Friendship Council held its weekly meeting last night at 8:30 in the "Y" Auditorium with 60 members present.

The Council was divided into four discussion groups under the leadership of Professor Clark, Ed. King, M. L. Shepherd and H. Y. Brock.

STATE-DUKE MEET TONIGHT IN RING FOR SECOND CARD

Largest Crowd to Attend Sporting Event Anticipated Here For Feature Fight

FRESHMAN TO FIGHT AS OPENING EVENT

Red Espey Matched in Feature Battle of Evening Against Hyatt; Is Seeking Eighth Straight Win; Charles Cobb Released From Hospital and Due to Fight in Unlimited Class.

The largest crowd to attend a sport event at State College this winter is anticipated tonight, when the boxing teams of State and Duke University meet in the Frank Thompson gymnasium. Freshmen teams of the two schools are booked to appear before the main variety bouts, starting at 7 o'clock.

It was announced yesterday that Marshall Hyatt would fight in the 125-pound class in the place of Bill Peritt against Miller of Duke. Coach Elms said that Peritt would not be able to make the weight.

Athletic officials at State are making arrangements to seat 4,000 people. Bleacher seats for 2,500 or more will be arranged around the ring and extra chairs will be placed in the indoor race track, which serves as a balcony in the gym.

Three thousand people viewed the two schools when they fought here for the first time last winter. Duke took four of the seven bouts in return match, after having given State a 6-1 triumph at Duke earlier in the season.

The matches will probably bring William "Red" Espey, State's co-captain, and Dan Hyatt of Duke together for the third time. Espey, fighting in the 175-pound class, defeated Hyatt in four rounds in their Durham meeting.

The smoke you like... is the smoke she likes for you!

"I like to see a man smoke a pipe!"

You've heard your own girl say it, perhaps. You're sure to hear it wherever girls get together.

They puff away at our cigarettes. But they like to see us have a go at the "strong silent man's smoke"—a companionable, time-proven pipe.

There is something satisfying about a pipe. It's a slow, reflective, hard-thinking smoke or a calm, relaxing, restful smoke.

The hunter's smoke, the fisherman's smoke, the engineer's smoke—a man's smoke, through and through.

And pipe smokers who know their fine tobacco tell you there's no blend quite like the fine selected burleys of Edgeworth—the favorite tobacco in 42 out of 50 leading colleges.

Dorothy Edgeworth. Perhaps you will like it as well as most men seem to.

Edgeworth is at your dealer's. Or send for free sample if you wish. Address Larus & Bro. Co., 105 S. 22d Street, Richmond, Va.

EDGEWORTH SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its natural flavor enhanced by Edgeworth's distinctive and exclusive darkening process. Buy Edgeworth anywhere in two forms—Edgeworth Ready-Rolled and Edgeworth Plug Slice. All sizes, 25¢ per package to \$1.50 per pound humidifier tin.

SPRING FOOTBALL TO BEGIN MONDAY

Fresh to Form Majority Members of Squad as Old Members Are Busy

Candidates for spring football will report Monday afternoon to Head Coach "Clipper" Smith. It was announced from athletic headquarters today.

It was not definitely stated how long the spring grid rehearsals would be held, but it is thought the Wolfpack practices would last into March.

The majority of the squad will be composed of the rising freshman teams, as some of the past season's lads are working with Coach Sermon on the hardwood. Only four members of this year's team will be lost by graduation.

It was reported that the squad would be divided into four possible groups, a little later, and a regular game schedule worked out for the griders. At present, the squad will be held and limited to limbering-up exercises and fundamentals.

ANNOUNCE REPORT FOR RELAY TEAM

Captain Floyd Reported First of Week For State's Only Track Event

Candidates for N. C. State's relay track team reported for work last Monday afternoon. Captain James "Two" Floyd of Salisbury, who will head the squad, said that work for the present would consist chiefly of gym training.

Men reported for the team other than Capt. Floyd included: Herbert Lynch, E. A. Bridges, Robert Sheets, E. H. Corpeing and C. G. Royer.

State will be represented in track this spring only by its relay team. Six dual meets have been canceled to cut down on expenses. The relay team will be entered in the two state meets at Chapel Hill, indoor and outdoor, and the Southern Conference meet at Birmingham, Alabama, May 13 and 14.

OK RIDGE BOXERS WIN FROM STATE FROSH, 52

The N. C. State freshman boxing team lost its initial meet of the season last Saturday night when the Oak Ridge Military fighters captured a lively card, five bouts to two. The fight was held at Oak Ridge.

The only two State boxers to win were Dunaway and Fabri, fighting in the 145 and 160-pound class, respectively, but three of the other fights went an extra round.

The summary: 115 pounds—Gersack, Oak Ridge, won over Bilsoly, decision.

125 pounds—Procuty, Oak Ridge, won over Sauls, decision, extra round.

135 pounds—Wilton, Oak Ridge, won over Pyle, by a technical knockout in third round.

145 pounds—Dunaway, State, won from Stockton, decision.

160 pounds—Fabri, State, won over Shoup, decision.

175 pounds—Hill, of Oak Ridge, won over Stevens, decision.

Unlimited—Hurt, Oak Ridge, won over Daugherty, decision, extra round.

Summary of Matches: 115 pounds—Morris (F), defeated Evans (V), 2:18 minutes time advantage.

125 pounds—White (V), defeated Williams (F), 1:17 minutes.

135 pounds—Bell (F), defeated Basemore (V), 3:10 minutes time advantage.

145 pounds—Fortune (F), defeated Jones (V), 3:10 minutes time advantage.

155 pounds—Cooper (V), threw Bernhardt (F), 50 seconds.

165 pounds—Cooper (V), threw Furr (F), 4:58 minutes.

175 pounds—Clevenger (V), threw Briggs (F), 3:20 minutes.

Unlimited—Fry (V), threw Stanko (F), 2:07 minutes.

TERRORS TO LEAVE ON FIVE DAY TRIP

Sermon's Quint Meets Teams in Virginia for Play on Foreign Courts

The varsity and freshman basketball teams of N. C. State College wound up their scheduled activities for this week last Tuesday, when the Carolina Tar Heels were defeated, and will remain idle until Monday night of next week.

The Red Terrors leave Monday morning with Coach Ray R. Sermon for a four-day invasion of four Virginia schools. Monday night they play V. M. I. and Tuesday night meet Washington and Lee. Both of the games will be played in Lexington. Wednesday night, Sermon moves his team to Charlottesville to play the University of Virginia and on Thursday night plays V. P. I. a return engagement at Blacksburg.

Gobblers Lose: State defeated V. P. I. 33-15 when they played here this winter. The Terrors have not played the other teams this year.

In defeating Carolina Tuesday night State uncovered a new combination that will probably see considerable action on the road trip. The new team is: Sam Gurnea, center; Claude Morgan and Jimmy Brown, forwards; Allen Nelms and Capt. Bud Rose, guards.

Kelms, filling in for Gilbert Clark, injured, was the ace of the Carolina game. He was extremely fast and proved to be an all-right guard. Morgan was shifted to forward in place of Ralph Johnson, who has been unable to find the basket this winter. Johnson was one of State's high scorers last fall. Gurnea took over Morgan's center post.

Sermon is not expected to use Clark on the road trip, although he will go along. The player is still suffering from an injury received in the Wake Forest game last week.

Varsity Matmen Win Over Frosh Veterans Win Five Falls and Lose in Three Time Advantage Decisions

The varsity wrestling team defeated the freshmen team 25-9 in a pre-season meet Friday in the basement of the Y. M. C. A., winning five falls and losing three matches on time advantages.

Cooper featured for the varsity, winning in two weights on falls, one victory coming in fifty seconds.

The real feature of the day, however, was a family affair between Clarence Cone and Romeo LePort, who posed as a freshman. Romeo won a fall after a thrilling battle of one-minute with a tooth held on the left ear and a right to the stomach.

Summary of Matches: 115 pounds—Morris (F), defeated Evans (V), 2:18 minutes time advantage.

125 pounds—White (V), defeated Williams (F), 1:17 minutes.

135 pounds—Bell (F), defeated Basemore (V), 3:10 minutes time advantage.

145 pounds—Fortune (F), defeated Jones (V), 3:10 minutes time advantage.

155 pounds—Cooper (V), threw Bernhardt (F), 50 seconds.

165 pounds—Cooper (V), threw Furr (F), 4:58 minutes.

175 pounds—Clevenger (V), threw Briggs (F), 3:20 minutes.

Unlimited—Fry (V), threw Stanko (F), 2:07 minutes.

and Red won handily in three rounds when they met in Raleigh last season. Espey has been awarded seven straight wins, with his latest victory, a four-round decision over Elsen of V. P. I. In his fight recently with Washington and Lee, Hyatt scored a technical knockout over his opponent in the second round.

Change Hardly Likely: Should Hyatt be moved up to the unlimited class, he will fight Charlie Cobb and Espey will take on Capt. Bolick.

Cobb was registered in the College infirmary during the first part of the week with a severe cold but was released Wednesday night. There is but little doubt that he will not fight tonight, and Cobb has shown wonderful improvement since the V. P. I. battle here recently. Young Cobb has increased his speed and is developing a mighty right hand punch.

State Boxers Who Meet Duke

Pictured here are N. C. State's varsity boxers and coach who face Duke University tonight in the Frank Thompson gymnasium. The varsity bouts begin at 8:30, following a meeting of the freshmen teams at 7:30 o'clock.

Red Espey and H. E. Karig are co-captains of the State team. Espey has never been defeated in collegiate boxing and will meet Don Hyatt in the feature bout of the night.

Karig and Hull are the only seniors on the State team. Espey, Charlie Cobb and Tom McGhee are juniors and Peritt and Garner are sophomores. In a recent match with V. P. I. all of these boxers won except Cobb, who lost to Capt. Stark in the unlimited division.

Red Terrors Move Into Tie For Second Place As Heels Fall 18-19 In Big Contest

Allen Nelms and Jimmy Brown Lead State to Victory in Tuesday's Battle Here

STATE MAKES COMEBACK IN LAST PERIOD TO WIN

Captain Bud Rose Plays; Clark Forced to Remain Out Due to Injury; Morgan, Taken From Game Towards End on Account Ankle Injury; Estimated Crowd Of 3,000 See State Win Exciting And Thrilling Game.

McCuehen and Weathers were the best for Carolina.

Captain Bud Rose, State, played the entire game, but was severely handicapped with an injured knee. Gilbert Clark, rated as one of the best guards in the State, watched the game from the players' bench, where he was kept by Doc Sermon, due to a knee injury also.

The game was slow to open and very conservative ball was played by both teams. There was little shooting and that carelessly done, with the contest becoming rough in spots. Carolina took the first half with a decided score and game, the board reading 14 to 8 for the visitors.

Needs Polishing: State's offensive was rough and ragged, with a little smoothing needed in order for her players to materialize during the first period, while the Tar Heels' machine clicked fairly well.

In starting the second half, State proceeded with a comeback which not only pulled herself up from more than a doubled score, but also to the big end of the final score.

It took the Carolina lads exactly eight minutes to cage the first basket, after the half opened, while the Terrors had proceeded to take a one point lead. Hines was good for a basket, the only floor shot of the second half.

Weathers and Alexander were given a free shot later on in the game, to bring the total Carolina scoring of the last half to four points.

With six minutes to play, and the score tied, Morgan was hurt. Johnson replaced him at forward and passed to Gurnea for the big boy to cage the basket that kept State ahead.

The N. C. State varsity basketball team was defeated by the strong Duke University five last Saturday night in Durham by a 28 to 18 score. The State freshman cagers won the opening event by taking a 20 to 20 verdict from the Duke Imps.

The win for Duke placed her at the top of the Big Five League.

Captain Rose and Clark saw little service in the contest, both being on the injured list at that time, and whose injuries were considered a handicap to the Terrors.

Allen Nelms, hero in the Duke game last week, duplicated his play with a wonderful exhibition of real basketball talent, but had to share the coveted position with Jimmy Brown. Young Brown, along with Nelms, were all over the floor with the ball and repeatedly kept the Carolina offense from a perfect click.

However, the remaining members on the quint were just as important in the win as were Nelms and Brown. Claude Morgan was top scorer for the night with seven points; three Carolina basketballers tied for second place, with Weathers, Hines and Captain Alexander a total of five each. Dave

Continuance Of Wrestling Assured At Athletic Meet

Monograms and Numerals to be Awarded But No Money to Be Appropriated

SMITHWICK TO CAPTAIN THIS YEAR'S GRAPPLERS

Red Hicks to Tutor Varsity Matmen, With Joe Moore Coach of Freshmen; Captain Has Impressive Mat Record; Nineteen Yearlings Report, Including Three All-State High School Champions; Men Outfit Selves.

The Athletic Council at State College has retracted its decision to do away with wrestling at State and announced that both freshman and varsity wrestling would be conducted this winter, but that no money would be appropriated to the sport.

Early last fall the Council decided to cut wrestling off the sport card in order to reduce expenses. Upon requests of the coaches, Red Hicks and Joe Moore, and some of the wrestlers, the Council decided to give them permission to carry on a light schedule. No new uniforms or other equipment will be issued by the athletic department, but monograms will be awarded the varsity and numerals to the freshmen.

The varsity team, of which Red Hicks is coach, will be led this winter by S. D. Smithwick of Blounts Creek. Smithwick is one of the best 145-pound wrestlers ever developed at State. In his two years as a varsity grappler and one as a freshman, he has never been pinned. He lost one bout on a time decision.

Other men seeking varsity berths are: W. T. Becton, L. L. Cole, James Cooper, Robert Evans, Donald Fry, E. B. Kidd, G. D. Newcomb, C. W. Strickland, J. D. Swain and J. G. White.

Nineteen men have reported to Joe Moore for the yearling team, including three State high school champions. The State title holders are: Hiram Bell, 135 pounds, Greensboro; J. R. Fortune, 125 pounds, Durham, and Barney Barnhardt, 155 pounds, Salisbury. The other men are: D. W. Morrah, Greensboro, and H. H. Latham, Washington, N. C., 115 pounds; G. C. Stallings, Raleigh, and R. J. Griffin, Wilmington, 125 pounds; L. B. Williams, Kinston; W. H. McCallen, Faison, and J. U. King, Wilmington, 135 pounds; Oscar Irgens, Atlantic City; N. J. R. W. Stephens, Jr., Apex, and C. C. Williams, Canton, 145 pounds; C. A. Croom, Bolton, and Sherman Briggs, Jarvisburg, 160; and W. L. Southern, Winston-Salem, 175 pounds.

Other men seeking varsity berths are: W. T. Becton, L. L. Cole, James Cooper, Robert Evans, Donald Fry, E. B. Kidd, G. D. Newcomb, C. W. Strickland, J. D. Swain and J. G. White.

Theta Kappa Nu

The North Carolina State College chapter of the Theta Kappa Nu Fraternity was host to a large group of guests at a buffet supper, served at their fraternity residence on Hillsboro Street, January 23, following the final dance of the midwinter.

A delightful course was served to the guests and members of the chapter, the house being appropriately decorated for the occasion.

Among those present were: Miss Nellie Pat Kafer and G. F. Dunkhead; Miss Elizabeth Dunn of Raleigh and J. D. Lamm; Miss Margaret Smathers of Greensboro and Kermit Austin; Miss Mary Helen Keller of Raleigh and H. E. Benton; Miss Irene Little and J. R. Melkie; Miss Rosa Nottingham and R. C. Bagby; and Miss Mildred Carlton of Franklin, Va., and Henry Brooks.

Chaperones for the evening were: Mr. and Mrs. Charles E. Plybor and Mrs. A. B. Watson.

Midwinter Dances

The annual midwinter dances at State College were held in the Frank Thompson Gymnasium, January 22 and 23.

The gymnasium was ingeniously decorated with red and white streamers, the many fraternity emblems and banners serving to complete the festive air of the dances. The set comprised three dances; two formal night dances and an afternoon tea dance.

Members of the Interfraternity Council, sponsors of the dances, engaged in a figure Saturday night. The figure was led by Tom Mott, president of the council, and Miss Tish Mason of Raleigh. He was assisted by E. W. Fress, vice president of the council, and Miss Carolyn Mann, also of Raleigh.

Music was provided by Jelly Leftwich and his University Club Orchestra.

S. P. E. House Party

Members and pledges of the N. C. Beta Chapter of the Sigma Phi Epsilon Fraternity were hosts at a delightful house party, given in honor of their guests of the annual midwinter dances, January 22 and 23, at their residence on Chamberlain Street.

Guests attending the house party were: Miss Margaret Kimbrell of Charlotte, Miss Mildred Wheeler of Greensboro, Miss Anne Rose Lisk of Charlotte, Miss Kappy Roberson of Durham, Miss Dorothy Hines of Greensboro, Miss Ruth Burton of Greensboro, Miss Elizabeth Boykin of Charlotte, Miss Helen Mills of Greensboro, Miss Casey Ingram of High Point, Miss Margaret McCabe of Greensboro, Miss Hazel Brannon of Rockingham, Miss Annie Starr Burch of Greensboro, Miss Taylor of Durham, Miss Frances Anderson of Lynchburg, Miss Tish Mason, Miss Eliza Briggs of Raleigh, and Miss Gwendolyn Crowder of Raleigh.

Mrs. Mason of Raleigh was chaperone during the house party.

Faculty Dance

Members of the faculty at North Carolina State College will be entertained at an informal dance in the Frank Thompson Gymnasium, February 1.

This dance is the second of a series given in honor of the faculty annually by the Blue Key Fraternity.

Music for the occasion will be furnished by "Daddy" Price and his well known College Jazz Orchestra.

R. R., Jr., Arrives

Mr. and Mrs. R. R. Fountain of Norfolk, Va., announce the arrival of a son, R. R., Jr., on January 25. Mr. Fountain is a graduate of State College and edited The Technician while at the institution.

which are specializing on various phases of the work. There are three branch stations located in the coastal plain, three in the Piedmont region and one in the mountain region. It is through the work of these stations that the department is able to serve the people by working under local conditions.

At the present time the Budget Committee is working with the Governor in hopes of saving the work of the station and finding a way to carry on the work in the future.

MRS. McKIMMON'S STORY PUBLISHED IN ENGLAND

Article by Assistant Extension Director Appears in London Publication

An article written by Mrs. Jane S. McKimmon, assistant director of extension, telling of the activities of Home Demonstration Club women in North Carolina, appeared in a recent volume of "What Country Women of the World Are Doing," a publication issued in London, England.

The Liaison Committee of Rural Women's and Homemakers' Organization of the World sponsors the publication.

Discuss Point System

The North Carolina State College Student Council last night appointed a committee to present plans for a proposed point system.

Other committees named by President Romeo LePort were, on smoking in the gymnasium and a committee to plan a cake race.

Fred Jones was elected to represent the body at the Mid-West Student Conference to be held in Tennessee.

CANADIAN WILL ADDRESS COLLEGIANS ON WHISKEY

Ben H. Spence, Canadian journalist, writer, speaker, and investigator of the liquor problem in both America and Europe, will speak under the auspices of the Y. M. C. A. in the "y" auditorium on Wednesday night, February 4.

Spence will describe the conditions in Canada as they were before prohibition, during prohibition, and as they are now with the government controlling liquor sales.

The lecture will be open to the public.

ELECTRICAL ENGINEERS HEAR STUDENT PAPERS

The State College Chapter of the American Institute of Electrical Engineers heard student papers by K. L. Ponzer, C. M. Smith, D. A. Worsley and J. R. Salem at the meeting of the organization Wednesday night, January 27. Plans for the electrical department's part in the coming Engineers' Fair were also discussed.

Ponzer's paper was on the theory and application of the neon tube. Smith's paper took up several of the newest developments in the growing use of the photo-electric cell. Salem spoke on electrical engineering in his native country, Syria.

Discussion of the fair included plans for the students to explain to visitors the practical application of the devices and exhibits which the department will have on display.

RING COMMITTEE NAMED BY JUNIOR CLASS HEAD

The junior class will make plans for the purchase of the class rings at a meeting to be called on some day next week, announces Brian Chapman, president of the class.

The committee in charge of the rings this year is: W. P. Hanks, chairman, Louis H. Wilson and M. G. Elliott. The contract for the rings, according to the committee's plans, will be awarded to the company which makes the best offer to the class. The various offers will be discussed and the contract let at the meeting.

"I know my LUCKIES"

LOVER'S LANE
At 14 Lola was pounding the ivories in an honky-tonk house. Then came the "broke"—and her weekly Good News jumped from \$45 to \$450. Ouch! She's a racketeer . . . formerly women's tennis champion of the Southwest. Her last picture, "EX-BAD BOY," was universally acclaimed. Lola Lane has smoked LUCKIES for two years . . . Her signed statement has no purse-strings attached to it. And so we have good reason to say, "Much obliged, Lola."

"I know my LUCKIES—my throat told me the first time I smoked one how kind they are. And it's been LUCKIES ever since. LUCKIES are the only cigarettes I can smoke before singing that do not give me a sore throat. Your improved Cellophane wrapper is great, too. That easy opening tab is a stroke of genius."

Lola Lane

"It's toasted"

Your Throat Protection—against Irritation—against cough
And Moisture-Proof Cellophane Keeps that "Toasted" Flavor Ever Fresh

TUNE IN ON LUCKY STRIKE—60 modern minutes with the world's finest dance orchestras and Walter Winchell, whose gossip of today becomes the news of tomorrow, every Tuesday, Thursday and Saturday evening over N. B. C. networks.
