## MASQUERS GIVE DONOVAN AFFAIR THURSDAY NIGHT

State College Dramatic Club to  
Present Mystery Drama in  
Pullen Hall

## CRITICS LAUD PRODUCTION AS AUTHOR'S BEST PLAY

Mystery, Intrigue and Humor  
Feature Successful Vehicle of  
College Actors; Thesis of Play is  
That Crisis Will Bring to  
Light Unexpected Characteristics;  
Fountain, Lumpkin, Volene  
Williams, Young and Catherine  
Harding Have Parts

"The Donovan Affair," one of the fastest moving plays ever written, will be presented by the Red Masquers Dramatic Club in Pullen Hall next Thursday evening at 8 p.m.

The play, written by one of the most famous American playwrights, Owen Davis, is generally considered the most successful play of Davis in the history of the American theatre. He has had over 200 plays successfully produced on Broadway, but the "Donovan Affair" was almost universally considered his most exciting play.

The play moves from thrilling climax to another, with mystery and intrigue on all sides. Much humor has been injected into the play by the author. The psychological insight of the production is perhaps the more remarkable than the terrific tension created by the series of events. No play since "Oedipus Rex" has so revealed the inner working of the human mind. It is believed that every person in the audience will recognize a striking likeness to himself in some character on the stage. The thesis of the play is that each of us has some hidden deed or desire which can be brought to light only by an unexpected crisis. "The Donovan Affair" reveals the nature of these hidden motives in a dramatic and unique manner.

## STATE ENGINEER TALKS ON BRIDGE CONSTRUCTION

Craven Describes Bridges Built by  
Highway Commission at Tau  
Beta Pi Meet

The number, cost, and design of bridges which have been built by the State Highway Commission was discussed by W. L. Craven, chief bridge engineer of the Commission at a meeting of Tau Beta Pi scholarship fraternity Wednesday afternoon.

The lecture was supplemented by various photographs of the bridges constructed already and those under completion.

## THREE NOW RECOVERING FROM RECENT OPERATIONS

L. A. Bennett, J. B. Sprinkle, and R. E. Stephenson are confined in the infirmary recovering from appendicitis operations.

Other students confined in the infirmary are: H. L. Canup, M. H. Rhyne, M. G. Elliott, W. E. Hanes, W. J. Vann, A. B. Robinson, George Knuckles, F. B. Kelly, H. Rutledge, F. S. Snowden, F. G. Kinchen, C. Stein, M. D. Wall, D. C. Smith, Jr., S. L. Eisenberg, J. G. Riddick, Allen Nelson, H. M. Jernigan, and W. H. Wesson, Jr.

## Professor Scores Opponents Of Technocratic Findings

Greaves-Walker Says That if Those Who Score Technocracy  
Would Spend as Much Time in Study and Research as  
Scientists Who Developed it Did, They might Have  
Some Basis for Casting Aside the Theories

"Technocracy, What Is It?" was the subject of a talk given by Prof. A. F. Greaves-Walker at a meeting of the State College student branch of the American Ceramic Society last Tuesday night.

Professor Greaves-Walker explained to students that if those who endeavor to break down arguments of Technocrats would spend as much time as this group of scientists in study and research, they might then have some basis for casting aside such statistics and proof as have been forwarded by these men.

Twelve years ago, these men, headed by Howard Scott, who holds the title of Director of Technocracy, became concerned over economic conditions which existed. They were afraid that, if machine production were not curtailed, our present economic order would become much too complex for the human mind to handle.

"It is significant that the section of the recent report of the President's

Committee on Social Trends, which covers mechanizations, practically agrees with Technocracy's picture one hundred per cent," says Greaves-Walker. "If Technocracy has accomplished nothing else it has increased the interest of the people of this country in economics."

"We in the United States have 6.2 per cent of the world's population. At present we are doing one-half of the world's work. It would require fifty times the adult workers now on earth to equal the output of machines by human labor alone."

Some specific examples of the replacement power of the machine were given by Professor Greaves-Walker. "In a new process for producing wrought iron 80 men now turn out four times the tonnage produced by 225 men only a few years ago."

The latest type electric power shovel, carrying a dipper large enough to house a motor car, will excavate as much earth in 24 hours as 15,000 men with shovels can move in 10 hours.

Professor Greaves-Walker spoke of the mortgaging of incomes due to installment buying. He showed the students how industry was artificially kept going at high speed by the "dollar down and a dollar a week" method.

The Technocrats suggest that an energy unit be substituted for gold as a measure of value. The erg, a (Please turn to page two)

## GARRISON SPEAKS TO STATE PROFS AT FRIDAY MEET

Unevenness of Ability of College  
Freshmen Discussed by  
Psychology Prof

## PROFS HOLD DISCUSSION AFTER GARRISON'S TALK

First Meeting of Year Held by  
State College Branch of the  
American Association of University  
Professors in College  
Cafeteria; Garrison Explains  
Series of Psychological Tests  
Given Fresh Entering Various  
Institutions

"Some Educational Problems in Higher Education" was the topic of a talk delivered by Dr. K. C. Garrison at the first meeting of the American Association of University Professors of State College held Friday evening, February 3 in the school library following a dinner at the cafeteria.

The unevenness of the ability of college freshmen, and the difficulties arising from such a situation was the point stressed by Dr. Garrison. In his talk he mentioned several colleges where such a situation was realized, and explained the methods they used to combat it. A series of psychological tests similar to the English placement tests given at State College are taken by the new men. From the results of these tests the authorities are able to determine the ability of each freshman, and place him in a group to take extra work, continue the regular course, or be excused from certain work, as his grades on the quizzes indicate.

Following this talk, a round table discussion was held in which the professors advocated the application of such a system to higher institutions of learning.

Although no new members were taken into the organization, each man present was urged to submit names of men for membership at the next meeting called by the president.

## EXHIBIT JUDGES CHOSEN BY ENGINEERS COUNCIL

Dot Bennett's Orchestra to Play  
For Brawl to be Given  
Saturday, April 8

Judges were selected for individual exhibits, and Dot Bennett's Orchestra was chosen for the Grand Brawl at a meeting of the Engineers Council held for the discussion of the Engineers' Fair to be held April 6, 7, 8.

Sixty high school students will be invited to attend the Fair as guests of the Council. An alumnus from each town from which a high school student will be represented will be asked to select a boy to attend.

The committees for the Fair made reports on their work, and heads of the various engineering departments discussed the exhibits to be presented by their members.

## MANN DESCRIBES VALUE OF SURVEYING MARKERS

The work of the U. S. Coast and Geodetic Survey in covering the state with a system of permanent concrete markers so accurately placed that surveys can be made at any time and relocated hundreds of years later will be of inestimable value to property owners of the state, according to C. L. Mann, professor of civil engineering at State College.

## BROUGHTON TO LECTURE TO COMMERCE SOCIETY

"New Spirit in Business" is the subject of a talk to be delivered by J. M. Broughton, recently elected president of the local bar association, at an open meeting sponsored by Delta Sigma Pi, business fraternity, Tuesday evening at 7:30 in Peele Hall.

Broughton has made this same talk in Delaware, and it should be of unusual interest in that it deals with a topic of current interest.

## B. F. Brown Says America To Join League of Nations

Dean Brown, in Talk to Sophomores, Prophesies United States  
Will Join League of Nations if Japan Withdraws; Bernstein Says Technocracy Latest Fear of Unemployment  
Caused by Use of Machines; Price Gives Music

By J. W. LAMBERSON

Dean B. F. Brown predicted at the monthly meeting of the sophomore class Wednesday that the United States would join the League of Nations within two years after Japan's withdrawal, if Japan should do so.

Features of the assembly other than Dean Brown's world events was a program of music by "Daddy" Price's Glee Club, and a talk on technocracy by Dr. E. M. Bernstein, professor of economics.

Dr. Bernstein pointed out that unemployment because of the use of machinery is not a new thing, but records are in existence of laws made hundreds of years ago to prohibit the use of machinery for fear of putting men out of employment. He stated that charts indicated that most of the men who were formerly employed in factories are still there, but the decrease in workers has been women who were working there.

He described the workings of the "energy certificates" that has been proposed under the technocrats' scheme. "Technocracy is just the latest fear of unemployment caused by machinery," stated Bernstein.

Dean Brown in his address on world events talked first of the Lame Duck amendment, and of Senator Norris, who has been very active in getting his bill passed and arousing interest in

Muscle Shoals. Senator Norris is in favor of public ownership and operation, but power interests have prevented action on this development, and it has lain idle since the close of the World War.

The granting of the Philippines freedom by Congress over the President's veto was the next topic discussed. The islanders must make a constitution, which must be passed by our President, and then accepted by them. The United States, however, demands favorable trade relations.

Dean Brown made his prophesy concerning the United States entering the League of Nations in his discussion of Japan's threat to leave the League, and said that it would be a necessity on the part of the United States because of political and economic reasons.

Japan's most recent action has been to pass through the great China wall into China proper, which, with the operations at Shanghai last year, is the first time that there has been any military movement into China proper. Japan has threatened to resign from the League of Nations if the Lytton report of Japan's operations in the Orient is accepted. Even if they do resign they are obligated to the League for a two-year period after their resignation, since the League is supposed to receive a two years' notice from any member resigning.

## DEBATERS MEET CAMPBELL TEAM

Speakers to Argue War Debts  
Question Saturday Evening in  
Pullen Hall

State College debaters will clash with the Campbell College debate team in a dual meet Saturday evening. This will mark the fourth consecutive year that the two colleges have engaged in practice debates.

The subject of the debate is "Resolved, That the inter-allied war debts should be cancelled." Two debate teams of each college will participate in the affair. The State College affirmative team will be composed of: W. E. Braswell, Horace Cotton, and L. M. Knott. The negative team is to be composed of Arthur Rogers, Frank Busbee, and L. M. Knott.

On Wednesday, February 15, the debate team will meet Emory University of Atlanta here. The debate will be held late in the afternoon to avoid conflict with the dress rehearsal of the "Donovan Affair." The debate will be on the cancellation of war debts. The Campbell College team will meet the State team in a return engagement on Saturday, February 18 at Bule's Creek.

## FROSH TO OFFER VIEWS ON STUDENT GOVERNMENT

Freshmen English Students to  
Write Themes on Improving  
Student Government

Possible improvements in student government and the honor system on State College campus as suggested by freshmen in this institution was the chief topic of discussion at the meeting of the Student Council Wednesday evening, February 8.

Several freshmen English groups have been assigned themes on this subject, and it was decided to request the professors to submit the best themes to the council. The members of the council will consider the ideas before them, and act as they see fit.

Plans for a smoker to be given to the faculty, and for shortening the election period to three weeks were among the minor topics discussed.

## ENGINEERS CLUB MEETS WITH RALEIGH A. S. M. E.

The Raleigh Engineers' Club will hold a meeting Tuesday night, February 14, sponsored by the Raleigh section of the American Society of Mechanical Engineers.

W. S. Lee, president of the W. S. Lee Engineering Co. of Charlotte, will be the principal speaker. Lee is prominently connected with the Duke Power Co. Supper will be served at 6:30. Members of the State College student chapter of the American Society of Mechanical Engineers have been invited to attend the meeting.

## JOHNSON SPEAKS ON "Y" TRAINING

Industrial Professor Stresses  
Need of Y. M. C. A. Training  
in Colleges

Dr. T. S. Johnson, professor of Industry, spoke in the Y. M. C. A. auditorium Wednesday night, February 8, on "The Y's Part in Training for Life."

"Training," stated Dr. Johnson, "is composed of three elements which are: A thorough knowledge of things, which is data and information on the subject; processes and methods, which include the known means of accomplishing a task; and a reasonable amount of personal technique. Our training means nothing if we do not apply it to the uses of man, for all of processes are of man, by man, and for man."

"To accomplish your purpose in life you must learn the technique of organizing and directing men," stated Johnson, "and you must be able to appraise the value of things to mankind." A technique of self-control is another essential component of our characters.

According to Dr. Johnson, we can develop our technique of true human relations, knowledge, and self control by following the guidance and teachings of the Master.

"The institution on the campus which is behind the teachings of Christ is the Y. M. C. A.," stated Johnson, "and under its guidance we can develop desirable techniques of our own."

## Gets Appointment

Charlie Fisher, junior in the aeronautical department of State College, has received an appointment to the Flying Cadets. He is assigned to Randolph Field, and will report there in July.

## It Snowed

The Forestry Jamboree was called on account of snow.

T. C. Croker, president of the Forestry Club, and Walton E. Smith, manager of the jamboree, journeyed to the Hill Forest, twenty miles north of Durham, last Friday afternoon to make preparations for the big jamboree to be held the next day. When they emerged from their tent the next morning, two inches of snow lay upon the forest. They decided to hold the event later.

## BUDGET ACTION EXPECTED SOON FROM COMMITTEE

Dr. E. C. Brooks Makes Statement  
Relative to Proposed  
University Funds

## BUDGET MISUNDERSTOOD ACCORDING TO PRESIDENT

Entirely New Budget Will be Made;  
Finance Committee Now Working  
With Appropriations Committee  
to Consider Funds for  
Greater University When Report  
Is Made; Recommendations Not  
To be Accepted as Final

Action on the budget for the Greater University of North Carolina depends now on the Finance Committee's report to the Assembly, with developments expected within the week.

Dr. E. C. Brooks says, "The budget is by no means final, and it will probably be put aside and a new one planned."

"There has been a good deal of misunderstanding regarding the assigning of appropriations and the meanings of recent suggestions brought before us concerning appropriations."

Dr. Brooks explained that there are two committees which handle the finances and the appropriations from these finances. The two heads of the Finance Committee are chosen from the House and Senate, respectively, as are the two chairmen for the Appropriations Committee. When the old Legislature went out, the committee which suggested appropriations was replaced by a new one. The suggestions made by that committee were then brought up and discussed. Their recommendations have not been accepted as final, however.

A new budget committee has been appointed. The chairmen are as follows: Finance, Senate, G. Rankin; Appropriations, Senate, Heyden Clement; Finance, House, R. A. Doughton; Appropriations, House, Harris Newman.

It is likely that an entirely new budget will be assigned the University after the Finance Committee has made its final report, and the Appropriations committee has examined it and made its decision.

## TUCKER WRITES BULLETIN ON AUTOMOBILE WRECKS

Civil Professor Publishes Bulletin  
As Part of State College  
Record

A new bulletin entitled "Motor Vehicle Accidents in North Carolina," has been published as an issue of the State College Record, and distributed to seniors in Highway Engineering by Harry Tucker, Professor of Highway Engineering and Director of the Engineering Experiment Station at State College.

The bulletin contains a great number of tables and other data pertaining to the causes, results, and aftermaths of accidents, and also details regarding makes, types, and models of automobiles, age, sex, and occupations of drivers, types of roads upon which accidents occur, and a chapter treating upon general methods of prevention of accidents, together with suggestions on how to decrease the number of casualties. The bulletin also gives the North Carolina Traffic Laws, and a Prevention Program.

The bulletin is the direct result of several years of extensive study on the part of the author, who is a recognized authority on highways, streets, traffic, and motor vehicle accidents.

## SALEM AND GAY SPEAK TO LITERARY SOCIETY

Connie Gay and J. R. Salem gave talks to the Leazar Literary society Friday night, February 3.

Salem's talk was on "Religion and Education in Syria," and Gay's talk concerned "Believe it or not" statements.

The program committee is planning to obtain some prominent faculty member to address the society at a meeting on February 10.

## A FORWARD GROUP

One of the most auspicious events of the present college year is the recent founding of a local chapter of the American Association of University Professors. With over 8,000 members in 342 colleges, this powerful and forward organization exerts more good influence in higher education than any other group connected with the American college. It has the opportunity because its membership, highly trained and qualified, know at first-hand the problems to be faced and are in a position to carry through the association's plans.

The Association endeavors to facilitate co-operation between teachers in colleges, promote the interests of higher education and research, and in general to increase the usefulness and advance the standards and ideals of the profession.

Particularly noteworthy work of the national organization in progress now are the reports on academic freedom, professor's tenure of office, and methods of increasing the intellectual interest of undergraduates.

Of more importance to State College, however, are the things which the local chapter can accomplish. One of the purposes of the local chapter is defined by the organization as being "to discuss current local questions of educational method, or of professional obligation and privilege in a freer, more informal and more thorough way than is usually possible in faculty meetings."

Already the local teachers have started with enthusiasm discussion on maladjustments and vocational guidance for undergraduates. With a wide range of expert knowledge within the group, they will probably arrive at some recommendations for attacking a situation which State College now faces, and which is well worthy of the attention of professors and administrators.

## MATTER OF INTEREST

Out of a flood of comment after THE TECHNICIAN editorial charging that the Y. M. C. A. was not rendering service commensurate with the money it spends comes a revelation from faculty members which seems to be worth the consideration of the student body.

On the Y. M. C. A. budget of funds received and expended from the college community appears an item "retirement fund." This budget includes the \$600.00 appropriation from the student activity fund, student and faculty contributions and is entirely separate from the appropriation that the college makes and the sum expended by the college for the salaries of the three regularly employed members of the Y. M. C. A. staff.

This "retirement fund" item for 1932-33 is \$150.00. In years past it was more and in years to come will be less. It is a personal fund for Mr. E. S. King, secretary of the Y. M. C. A. The yearly payment goes to an insurance company to create a fund for him upon his retirement from the service of the college.

If the college saw fit to pay for a retirement fund of this nature, then a student newspaper would never hear about it. In that event, it would merely be a case of discrimination, for no professor or college official has such a fund accumulating for his old age.

However, this money comes directly from the student body, although it is safe to say that no more than a few students know anything about it. Faculty members, heavy contributors to the Y. M. C. A., think it is unjust. THE TECHNICIAN is of the opinion that the student body at large should know a little more about where part of the enormous amount of the Y. M. C. A.'s financial support goes.

Invariably several State College sophomores sneak out near the end of each one of their class programs—the most interesting which any class has yet been able to plan.

Maybe students become so conditioned to dull meetings, speeches and lectures that they become uncomfortable and unhappy when something interesting occurs.

### A RECOMMENDATION

Today's Raleigh News and Observer suggests a reorganization of state department functions which would consolidate North Carolina agricultural work under the supervision of State College to effect economy and increased usefulness for this service which the state renders.

The editorial says that: "The next step the General Assembly should take, in the interest of economy and efficiency is to transfer everything now in the Agricultural Department, except the regulatory duties imposed on the Commissioner of Agriculture, to the State College of Agriculture and Engineering branch of the University of North Carolina."

"There ought to be one State Agricultural center in North Carolina. Today we have two. If any person wishes to know anything about agriculture in North Carolina, he is uncertain whether to go to the Agricultural College or the Agricultural Department. The Federal funds in the interest of agriculture and kindred matters are almost all administered at the College of Agriculture and Engineering. The farm demonstration work, supported by State and Federal funds, and like activities are under the direction of the college authorities. It has a great technical faculty and is the authority on nearly all matters relating to agriculture, having a large farm of 412 acres on which agricultural and horticultural experiments are made and students are trained in practical agriculture. It also conducts research and experimental work on a large scale. It issues extension and experimental publications for distribution to farmers."

"The Agricultural Department has direction, not to mention regulatory work, of the chemical analyses of fertilizer and other analyses, the carrying on of six test farms from Washington and Pender counties on the east to Buncombe County on the west. It issues bulletins of live interest on agricultural topics and has other duties. In some of these there is duplication in the operation of the college and the department."

"There is genuine need of one, and only one, official Agricultural Authority in North Carolina just as it has been decided to have one and only one Department of Justice in North Carolina. And that Authority (except the regulatory work) should be in the college. It now has direct touch with every county in the state and it is to its leaders that the farmers look for guidance in nearly all matters looking to improvement and progress in agriculture. As a matter of fact, the county agents could do many things now done by extra employees if all such work (except regulatory) is put under the Agricultural College branch."

"In South Carolina, Clemson, the agricultural college, though not located at the State Capital, does much of the work done in North Carolina by the Agricultural Department. Nearly one hundred thousand dollars of the money received from fertilizers, etc., goes into Clemson College's general agricultural fund and helps to train youthful farmers. The same sum, only in larger amount, could be used in the North Carolina College of Agriculture and Engineering branch of the State University. This would save over \$100,000 annually from the sum requested for the support of the college from the general fund."

## TOURNAMENT ARRANGEMENTS

Two weeks hence the Southern Conference basketball tournament will be held in Raleigh, and State College will be host to a large group of athletes and students during this major sporting event.

The securing of the event makes it the duty of athletic officials and the student body at large to cooperate to make the affair a success. Any plans and arrangements to facilitate the necessary work and make visitors welcome will be a credit to the college.

State College and Raleigh hope that this first tournament will result in making the city the permanent location for this desirable event.

After rumors that the Watauga was going to move into Holladay Hall comes the announcement that the space is not available and the publication will have to wait.

Surely some provision for this relocation can be made. It is highly desirable that student publications should be housed in modern offices together, where they can cooperate in this phase of student activity.

## College Opinions

### WISEACRES

When college men wear pegtop trousers, rented tallies, grew mustaches, courted ladies, put on winter underwear after the football season closed—in those days reading was common. Some rational collegians actually visited the Main Library in their spare time to read.

They missed the real entertainment. While sitting in a well-lighted, properly heated room and gazing enraptured at a book they were wasting time. Their sons and daughters prefer to lounge in a coffee shop, sipping weak colas, inhaling cigarette fumes, making foolish conversation. Evolution is a marvelous thing.

We seldom see a college student spend his vacant afternoons in the library unless he is compelled to do so. This is a fine thing, for college students should not pass up opportunities to talk and attend downtown movies. When they do invade the library it is as the sentenced man trudges into his penitentiary, forced to do so much time before they may be free. Modern youths recognize values.

Let us compare the collegiate attendance at afternoon movies any day in the week with the meager crowd found in the libraries. We repeat: college students have finally come to their senses. What fun could one possibly find in reading a book at the library? We're asking you, but we know the answer.—The Daily Nebraskan.

## Announcements

Leazar Literary Society will meet on Friday, February 10, at 6:30 p.m. J. R. Salem, President.

There will be a meeting of the State student chapter of the American Society of Mechanical Engineers Tuesday evening at 6 o'clock. E. J. Gravelly, Chairman.

There will be a meeting of the Ag Club in Patterson Hall Tuesday night, February 14. The officers of the Students' Ag Fair will be elected at this time, and it is especially urged that all members be present. R. A. Wood, Pres.

A representative of the John C. Winston Company will be in the Y. M. C. A. cabinet room until 4:30 p.m. today to confer with those who wish summer employment.

Gamma Sigma Epsilon meets at 6:45 p.m., Wednesday, February 15. All members please be present.

The Old Dominion Club will meet in the Y. M. C. A. Thursday, February 16, at 6:45. All members are asked to be present, for important business will be discussed.

## PROFESSOR SCORES OPPONENTS OF TECHNOCRATIC FINDINGS

(Continued from page one) measure of work, and the calorie, a measure of heat, are the energy units which could be established as values. They are definite and unchangeable, unlike the gold value of our medium of exchange.

"Taking into consideration that America with 6.2 per cent of the world's population has in 150 years developed sufficient power to do half of the world's work. It does not seem unreasonable to expect that the same intelligence can take the ideas advanced, together with other proposals for "curing" the ills from which we are now suffering and have suffered before, and develop from them a better system than the one under which we are now operating, for it must be admitted there is something radically wrong with any system which permits starvation and suffering in the midst of plenty."

### Protests

According to a recent release, the Woman's International League has issued a small sticker to be pasted on the income tax returns as a form of protest against the fact that even though the budget of the Federal Government for 1932 had a deficit of many millions, over 60 per cent of the total revenue was appropriated for two departments alone; namely, the army and navy. This stamp serves as a notification to the government that the taxpayer is aware of the injustice of such appropriations and would like to see it remedied.

### All Knew Him

A questionnaire for the identification of 50 famous Americans was recently given to a class in government at the University of Oklahoma. Al Capone's name was the only one correctly identified by all students.

## How To Avoid BONERS

MONOTONY IS THE CUSTOM OF HAVING ONLY ONE WIFE

HEAVEN have pity on the poor lad! He also thinks a parapet is a tropical bird.

But where there's life there's hope. If somebody will introduce Bill Boner to a good pipe and good tobacco, perhaps he'll improve. You see, a pipe helps a man concentrate, think right. And be sure you fill his pipe with Edgeworth Smoking Tobacco. As you know, Edgeworth has proved to be the favorite smoke at 42 out of 64 leading colleges.

Ah! There's a smoke for you! Notice how that blend of fine old burleys helps you think out a difficult problem. See how cobwebs fly from a tired brain on its fragrant wisps of curling blue smoke!

Edgeworth is available everywhere

## Wooden soldiers in the war against decay

To conquer the forces of decay which attack telephone poles, scientists of Bell Telephone Laboratories carry on a relentless campaign.

They study many kinds of wood, test many preservatives. They isolate wood destroying fungi and insects—study them in the laboratory—search for a practical means of combating their attack. They have set out armies of stub poles in Mississippi, Colorado and New Jersey where altitude, climate and soil vary widely. At regular intervals they inspect these poles to learn which woods and preservatives are best.

Such scientific thoroughness is one reason why Bell System plant becomes more efficient each year. And why telephone service is so dependable.

IN DEFEAT OF DAVIDSON**

Terrors Lose to Wake Forest in  
Memorial Auditorium Battle  
Monday Night

The varsity basketball team won over the Davidson Wildcats, 39-16, last night. The first half was a close struggle but the Terrors pulled well in front in the second period. The game was played at Charlotte. The win places State in third place.

Monday night the Demon Deacons from Wake Forest handed State a 25-19 licking.

The Wake Forest defense throttled the powerful Clark threats with the exception of Clark, who scored 12 of the nineteen points made by his team.

### TERRORS MEET GAMECOCKS

The Red Terrors face the South Carolina Gamecocks tonight in Columbia in one of the most important Southern Conference titles carded for the week. This game will have an important bearing on the final loop leadership before the tournament in the Raleigh Memorial Auditorium on February 24 and 25.

Although the Gamecocks did not meet a Conference foe last week they met and defeated Kentucky, undefeated leader of the Southeastern loop. The win stamped the South Carolinians as one of the most formidable foes in the Conference.

Line-ups:

Davidson	Davidson Scores	G.	FT.	TP.

## BOXERS ENGAGE V. P. I. TOMORROW

Fighters Leave to Meet Virginia  
Ringmen After Winning First  
Match of Season

The varsity boxers will travel to Virginia tomorrow to meet the V. P. I. ringmen before engaging Georgia, Feb. 18, at home, in the final match of the season.

In the South Carolina battle, Red Stephens received a cut over the left eye and may not fight for State. Hall will be on hand to fight in his stead. Marshall Rhyme, 135-pounder, still has an infected eye that will keep him idle. His place will be filled by Joe Sauls, who steps up from the 125-pound class. The men who will see action are: 115, Billsoly; 125, Nease; 135, Sauls; 145, Capt. Garner; 155, Dunaway; 165, Fabri; 175, Hull; Unlimited, Hall or Stephens.

**South Carolina Match**  
The varsity boxers won their first match of the season by defeating the University of South Carolina pugilists 4½-3½ in the college gym Saturday, February 4, before a crowd of 3,000 fans.

Coach Bill Beatty's other fighters, the freshmen, continued their winning ways by whipping the Oak Ridge leather pushers 5½-2½ as a preliminary to the varsity.

WHAT DO WE MEAN  
WHEN WE SAY:  
"Revealing You?"  
THE DONOVAN AFFAIR  
8 P.M. Thursday, February 16  
PULLEN HALL

### Boxing Tonight

The semi-finals of the campus boxing tournament for dormitory clubs and fraternities will be held in the gym tonight at 7 p.m.

Nine matches are carded for this evening's entertainment. The preliminaries last week were attended by over 300 fans. Those who will swing gloves tonight are: Dorn: 115, Mease vs. Miller; 135, Tuttle vs. Troutman; 165, Kleia vs. Tlien. Frat: 125, Campbell vs. Spratt; 135, Wright vs. White and Brewer vs. Payer; 145, Sykes vs. Benton; 155, Purder vs. Caldwell; and 175, Edmundson vs. McCulley.

The finals of the boxing tournament will be held on Tuesday, February 21, at 8 p.m. There will be sixteen matches, one in each of the weights both for the dormitory clubs and fraternities.

The semi-finals of the fraternity basketball and handball tournaments will be held on Tuesday, February 14, while the dormitory semi-finals will battle it out on Wednesday, February 15.

## SWIMMERS MEET WASHINGTON-LEE

Match is Scheduled for 3:30  
Saturday Afternoon in Gymnasium Pool

The State College swimmers who last week defeated the William and Mary College tankmen by the score of 37-29 will meet the Washington and Lee swimmers on Saturday afternoon at 3:30 in the college pool.

The State relay team, undefeated this season, will be the feature of the afternoon.

Immediately following the match a polo game will be held between the two schools.

In their victory over William and Mary the State tankmen took five out of seven frats. The summary of their meet follows:

160 yd. relay: Won by State (Moorman, Shepherd, Dinkelspiel, Carter). Time 1:23.  
Diving: (1) Casey (W. & M.), (3) Meade (W. & M.), (3) Shinn (State).  
40 yd. dash: (1) Shepherd (State).  
(2) Fickinger (W. & M.), (3) Dinkelspiel (State). Time 19.8 seconds.  
100 yd. dash: (1) Carter (State), (2) Shepherd (State), (3) Fickinger (W. & M.). Time 1:01.  
200 yd. breast stroke: (1) Casey (W. & M.), (2) Eidness (W. & M.), (3) Peiffer (State). Time 3.9.  
150 yd. back stroke: (1) Whitmarsh (State), (2) Ogden (W. & M.), (3) Horton (W. & M.). Time 1:57.  
220 yd. dash: (1) Moorman (State), (2) Stonebanks (State), (3) Bragen (W. & M.). Time 2:43.

### N. S. F. A. Broadcasts

February 27, 2 to 2:15 p.m., over Columbia Broadcasting Company network. Walter Hulihan, president of the University of Delaware will speak.

In March (definite date to be announced later), Chinese students will talk on "China Looks at the New Japan."

### Star Forward

FRANK PARTEl

Another sophomore who made good on the varsity. He is Frank Partel of State College's Red Terrors. Partel's play is one of the principal reasons why the Terrors won four consecutive games last week against Southern Conference foes in Virginia. Although alternating with a teammate at one of the forward positions, Partel accounted for 27 points against Old Dominion teams.

### WRESTLERS WILL TACKLE V. M. I. SATURDAY NIGHT

Matmen Defeat Virginia Poly in  
Blacksburg Saturday, February 4, 21-13

Tomorrow night the varsity wrestlers travel up to Virginia to engage V. M. I. at Lexington.

Last Saturday the matmen defeated V. P. I. at Blacksburg, 21-13, by scoring three falls and two decisions. The men winning their matches were: Morrah, 118; Bell, 135; McLaurin, 155; Barnhardt, 165; and Croom, 175.

There is a move on foot to have the Davidson meet here instead of at the Davidson school.

## Southern Teams to Clash In Raleigh February 24-27

First Meet of Reorganized Conference to Have Eight Teams;  
Sermon Announces List of Officials; State Now Third  
With Gamecocks Leading on Lone Victory;  
Duke Holds Second With Six Wins

The Southern Conference basketball tournament will be held in the Raleigh Memorial Auditorium for the first time on February 24-27 with eight teams competing.

The first eight teams in the final standing will battle it out for the championship. The University of Georgia who last year defeated the University of North Carolina for the championship is not a member of this year's revised conference.

The teams in the revised conference are North Carolina State, Duke University, University of North Carolina, Washington and Lee, Virginia Polytechnic Institute, University of Virginia, Virginia Military Institute, University of Maryland, University of South Carolina and Clemson College.

Dr. Ray R. Sermon, chairman of the committee, said that two of the three officials for the tournament had been selected. They are Paul Minton, Baltimore sports editor, and Proctor of

Richmond, Va. The third official will probably be picked from Bun Hackney, Carolina; Gerard, athletic instructor at Duke, and Knight of the Durham Y. M. C. A.

Scorers for the tournament will be Bob Hayes, formerly of Missouri; and Ted Sadler of Raleigh.

At the present the University of South Carolina is leading the Southern Conference standing with one victory and no losses. Duke is second with six victories and one loss, losing to the University of Maryland. State is a close third with five victories and two losses.

Although State has yet to meet three more Southern Conference foes they are practically sure of being invited to play in the championship tournament in the Memorial Auditorium. Their remaining Conference games are with the University of South Carolina, Duke University, and the University of North Carolina.

## FIFTY REPORTING FOR GRID DRILLS

Spring Practice Now in Third  
Week; Developing Center is  
Present Problem

Spring football practice under Coach "Clipper" Smith and Frank Reese has entered into its third week with over fifty candidates daily limbering up and learning fundamentals.

Head Coach Smith plans to run the drills on the early part of the third term. Smith's biggest and most important task this winter is developing a center to replace Red Espey, receiver of honorable mention for All-American, who is graduating this spring.

Included in the list who have already reported are Capt. Edgar Cumiskey, Roscoe Roy, Allen Bailey, Bo Bohanan, Robert McAdams, Phil Kinken, and Don Wilson, backs; Raymond Redding, end; Clifton Daugherty, Paul Troshkin,

and Rudy Seitz, tackles; John Stanko, Mat Matlock, and Buck Buchanan, guards.

Ray Rex and Bob McQuage, backs, and Kenneth Stephenson, and, other eligible monogram players, are busy with indoor sports and will not be able to report for at least two weeks.

Freshmen who made numerals last fall, and who reported are: Ends, Russell Nicholson, J. M. Brown, R. S. Davis and W. J. Vann; tackles, M. S. Sprull, Charlie Stott and Carl Roseller;

guards, J. W. Brown, Seaman Hudson and Jack Fortune; centers, Sam Sabol and E. W. Cooper; backs, J. W. Dusty, P. P. Davis, Norman Raines, J. D. Moore, A. R. Gattis, Nat Margolla.

There are a number of freshmen not listed who are busy with indoor sports.

Reserves of last fall's varsity team who reported are: Ends, Arnold Peterson, A. S. Knowles and C. A. Provin; tackles, Carl Issacs and Luther Wood; guards, Barnes Worth, Carl Bernhardt, W. C. Furr and H. A. Silver; centers, Leon Thompson and Willie Hammerick; backs, John Johnson, Jack Fabri, reserve guard, is busy with boxing.

### Tournament

Students will canvass the dormitories next week in order to find lodging for over 600 high school boys who will visit the State College campus on March 2, 3, and 4.

For the eighth consecutive year State College will conduct its annual high school basketball tournament in the college gym.

Mr. Miller is planning to lodge at least one or two visitors in every room on the campus so that he can be entertained by a State College student.

Letters have already been sent to leading organizations on the campus seeking their cooperation on this matter.

The tournament has 48 teams entered.

# People know it..

"Chesterfields Satisfy"

WHEN smokers keep buying the same cigarette day after day... it's a pretty good sign that they're getting what they want... mildness, better taste—a smoke that's always the same.

So we're going right on making Chesterfields just as we always have... selecting choice, ripe tobaccos... ageing them... blending and cross-blending them... making them into cigarettes in the most scientific ways that are known.

As long as we do these things we know that smokers will continue to say, "They Satisfy". For that's what people are saying about Chesterfields.

If you smoke, why not find out about them? A package or two will tell you the whole story.

THEY'RE MILDER—  
THEY TASTE BETTER

# GREAVES-WALKER TO ATTEND MEET

### National President of Keramos to Leave Monday for Pittsburgh Convention

Prof. A. F. Greaves-Walker, head of the Ceramic Engineering department of State College will go to Pittsburgh Monday to preside at the annual meeting of Keramos fraternity, national ceramic professional society. He was elected president last year.

Greaves-Walker will also attend the annual convention of the American Ceramic Society, of which he is past president. Both meetings will be held from February 12 to 18.

Heretofore the entire Senior class in ceramic engineering has attended the sessions, but this year, Professor Greaves-Walker will make the trip alone.

The highlights of the American Ceramic Society meetings are expected to be a lecture by Dr. E. W. Washburn, "The Phase Rule in Ceramics," and a talk by Dr. Phillips Thomas on "Electrons at Work and Play."

Dr. Winters said the idea had been advanced that the farms must be entirely self-supporting. This is impossible, he points out, because of the kind of work done on them. From two-thirds to three-fourths of the cultivated land on the farms is divided into several hundred small plots ranging from one-tenth to one-fourth of an acre. Each of these small plots must be handled separately. The rows must be of the same length; the plants the same distance apart; each row must have exactly the same kind and amount of cultivation and the results from each row must be harvested separately and weighed separately.

Sometimes the treatment given to a crop will hurt it or even destroy it but these facts must be known as well as the profitable or paying treatments, said the director. He also pointed out that the livestock treatment required the weighing of all food, care

# Winters Describes Farms Where Research Men Work

### Six Experiment Stations Are Field Laboratories For Scientific Studies

### STATE DIRECTOR WARNS AGAINST CURTAILMENT Opinion is That Value of Results Justifies Money Spent in Farm Upkeep

The six branch experiment stations upon which research workers at State College conduct tests are not demonstration farms but are field laboratories where careful scientific work must be conducted. The farms require permanent equipment of fences, buildings and field plots and must have careful and painstaking supervision or the work done upon them is of little value, declares Dr. R. Y. Winters, director of the North Carolina Experiment Station.

"These six farms belong to the State Department of Agriculture but we conduct much of our field tests upon them," said the director. "It would be a grave error to abolish them and thus deprive the experiment station of its sole means of studying problems relating to the definite areas in which the farms are located."

Dr. Winters said the idea had been advanced that the farms must be entirely self-supporting. This is impossible, he points out, because of the kind of work done on them. From two-thirds to three-fourths of the cultivated land on the farms is divided into several hundred small plots ranging from one-tenth to one-fourth of an acre. Each of these small plots must be handled separately. The rows must be of the same length; the plants the same distance apart; each row must have exactly the same kind and amount of cultivation and the results from each row must be harvested separately and weighed separately.

Sometimes the treatment given to a crop will hurt it or even destroy it but these facts must be known as well as the profitable or paying treatments, said the director. He also pointed out that the livestock treatment required the weighing of all food, care

ful breeding, the keeping of records and sometimes the purchase of different feedstuffs not grown on the farm so that complete tests might be made.

As to the value of the work done, Dr. Winters believes it has paid its way both in cash and educational facts. Practical questions answered about the tobacco crop for instance have been worth over two million dollars annually, to say nothing of the definite value from the control of insects and diseases affecting all crops. It would be unwise, he thinks, to discontinue the studies being made in the control of the various pests affecting North Carolina crops and animals. He also points to the steady increase in the quality of dairy cattle, the new interest in beef cattle and sheep, and the better feeding of hogs so that they are not penalized on the commercial markets.

Dr. Winters says the more progressive farmers of North Carolina will not look with favor on the curtailing of agricultural research work because in it is based all the forward progress in farming in this state.

The elation of engineers on the day the great Atlantic cable crossing was completed has nothing on the pride with which sound technicians mention their "long distance" marine recording accomplished for "Fast Life," the motorboat racing story at Catalina Island, and which will play at the Palace Theatre Thursday, Friday and Saturday. "Love Thy Neighbor," comedy, and Sound News completes the program.

Capitol Theatre  
"Two Against the World," which brings the glamorous Constance Bennett to local audiences again at Capitol Theatre Monday and Tuesday is said to be the most sumptuously dressed and dramatically satisfying of all the pictures in which she has been starred.

Present  
Wrestlers will be given a little shower this morning when they leave for Lexington to engage V. M. L.

They didn't have any shoes, so the Order of 30 and 8 bought them twelve pairs of much-needed wrestling footwear.

RIFLE TEAM WINS TWO LOSSES THREE MATCHES

State rifle men shot seven matches during the past week, winning from University of Wyoming and Mississippi State, and losing to South Dakota State, New York Military Academy, and University of Iowa. The other two schools, New Mexico Agricultural and Mechanical, and Creighton University, have not been heard from.

### Palace Theatre

ZaSu Pitts comes to the Palace Theatre on Monday, Tuesday and Wednesday, in "They Just Had to Get Married," the comedy in which she is co-starred with the equally mournful Slim Summerville. Their supporting cast in this hilarious picture, which was directed by Edward Ludwig, includes Roland Young, Verree Teasdale and Fifi D'Orsay.

The management of the State Theatre announces that America's greatest black-face comedian, Colonel Jack George, R. K. C. Vaudeville star, has been booked for an engagement beginning with a midnight show on Sunday night and continuing through Monday. Colonel George is in a fast and rollicking revue with a college flavor known as Campus Cut-Ups, and his company of talented and youthful artists will offer one of the snappiest presentations yet shown in Raleigh.

The vaudeville on Monday, Tuesday and Wednesday will be shown at 3:30, 7:00 and 9:15, and in addition to the regular photoplay program, the feature picture being Warren William in "Employee's Entrance," with Loreta Young, Alice White and Wallace Ford. The story deals with the ruthlessness of the manager of a large department store and all of the action takes place within this one location.

LITTLE TERRORS DEFEAT WILMINGTON HIGH TEAM

The freshman basketball team beat Wilmington High last night 40-16 in the college gym. The Techies had previously beaten them 56-23. Flythe was high scorer with 16 points.

Next week the Little Terrors will make their bid for the Big Five championship by engaging three conference members. Tuesday the Techies will go to Durham to try to gain revenge from Duke, who handed them their only defeat of the season. Wednesday they play Wake Forest, and Friday Davidson is met. Both games are at home.

Players who will see action are: Forwards, Aycock, Sherrill, Harris, Pratt; centers, Flythe, Zori; guards, Hockfield, Womble, Guzas, Williams.

"Unashamed," sensational drama of the modern age, in which mystery is dressed in the cloak of today's city life, marks a new phase of the manysidedness of Bayard Veiller, famous author of "The Trial of Mary Dugan" and "The Thirteenth Chair." The picture, written directly for the screen by the noted stage playwright, and showing at the Capitol Theatre Wednesday, provides thrills that are all the more intense because of their ultra-modern aspect.

## Alpha Kappa Pi

The Xi chapter of Alpha Kappa Pi Fraternity entertained Saturday evening at an informal house dance at their residence on Ferndell Lane.

The chaperones for the occasion were Dean and Mrs. E. L. Cloyd and Mr. and Mrs. C. N. Rackliffe.

The young ladies present with their escorts were: Misses Carolyn Rackliffe, Lillian Covington, Mary Reed, Rita Colwell, Mary Marshall Biggs, Hazel Beacham, Anne McDermott, Ophelia Hamilton, Mable Wrenn, Hilda Fuller, Mrs. Edward Galba, Clyde Walker, Velma Wingate, Martha Lane Bradley, Josephine Clark, Elizabeth Colwell, and Mildred Pittman.

Others who were present as guests were: Misses Agnes Covington, Eloise Furr, Dorothy Stevens, Katherine Mason, Ruth McCullen, Helen Handy, Frances Handy, and Laura Gill.

Light refreshments were served during the evening.

## Alpha Lambda Tau

A novel and delightful "Scotch" party was enjoyed Wednesday night by members and pledges of Alpha Lambda Tau and their guests at Dr. J. R. Rogers' cabin, several miles north of Raleigh.

On arrival at the cabin, each couple was issued \$100 in stage money with which to buy all refreshments and favors at the party. A short treasure hunt and other games were also enjoyed.

At eleven o'clock, the crowd adjourned to the Fraternity home on Hillsboro Street, where dancing was enjoyed and prizes awarded. Agnes Blanchard and Fred Newcomb won the prize for the treasure hunt, and Mary Louise Stevenson and Charles Foy won the prize for accumulating the most stage money.

Young ladies attending were: Alice Whitted, Janet Tucker, Eleanor Layfield, Elizabeth Layfield, Frances Windley, Agnes Blanchard, Margaret Kelly, Louise Bridges, Mildred Womble, Marian Womble, Dot Dent, Margaret Brown, Mary Nell Cummins, Catherine Mason, Pat Moore, Catherine Bogue, Mary Louise Stevenson, Nell Joslin, Louise Kennedy, Margaret Underwood and Dot Furr. Chaperones were Mr. and Mrs. Fitz Davis and Mrs. Cummings. Prof. Alvin M. Fountain also attended.

## Faculty Dance

The second faculty dance of the year will be held in the Frank Thompson Gymnasium Wednesday, February 22. The affair is sponsored by Mu Beta Psi, music fraternity.

Students Supply Store  
"On the Campus"

ILLUSION:  
The stage is all set for target practice. The magician lifts his bow and aims an arrow at the bull's-eye. His lovely assistant then steps in front of the target and he shoots the arrow—apparently through her—and it fixes itself in the very center of the bull's-eye! And she smiles through it all while the audience gasps.

EXPLANATION:  
The arrow which the marksman "shoots through" his assistant simply folds up into the crossbow! The arrow which is actually embedded in the target is shot by the girl herself from a belt concealed under her dress. She releases a little spring, the arrow unfolds, and shoots straight into the bull's-eye! It is all done in a flash! So quickly the eye cannot detect the girl's movements! To heighten the impression that the arrow has gone right through, the girl releases a ribbon from the front of her dress—the continuation, apparently, of the ribbon attached to the arrow in the target.

It's fun to be fooled —  
...it's more fun to KNOW

Like to see through tricks? Then let's look at another... the *illusion* in cigarette advertising called "Cigarettes and Your Throat."

The audience is told that by certain magic processes tobacco can be made as soothing as cough medicine.

EXPLANATION: The easiest cigarette on your throat is the cigarette that is made from the choicest ripe tobaccos. Cheap, raw tobaccos are, as you would naturally expect, harsh in their effects upon the throat.

If you have to consider your throat, the quality of the tobacco in your cigarette is important.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Camels are as non-irritating as a cigarette can be because Camels use choice, ripe, tobaccos.

And because of the matchless blending of these costlier tobaccos Camels have a rich bouquet and aroma... a cool, delicious flavor.

Keep the air-tight, welded Humidor Pack on your Camels... to assure yourself and your companions a fresh, cool smoke.

# CAMELS

NO TRICKS  
...JUST COSTLIER TOBACCOS  
IN A MATCHLESS BLEND
