AG CLUB ELECTS STUDENT HEADS FOR ANNUAL FAIR

R. R. Bennett Elected President of Annual Ag Fair at Meeting Tuesday Night

PRESIDENT NOT TO HAVE "BARNWARMING" IN CHARGE

Thomas Elected Vice President; Herlock, Secretary; Hinkle, Assistant Secretary; Harris, Treasurer; Weaver, Faculty Adviser; and Smith, Gray and Reitzel, Publicity Men; Students Appointed to Take Charge of Departmental Exhibits

R. R. Bennett was elected president of the annual Ag Fair at the Ag Club meeting Tuesday night. Other officers elected were: C. D. Thomas, vice president; V. C. Herlock, secretary; L. E. Hinkle, assistant secretary; F. V. Harris, treasurer; D. S. Weaver, faculty adviser; W. R. Smith, C. Gay, and J. L. Reitzel, publicity men.

Students who were appointed to take charge of the departmental exhibits were: W. J. Barker, forestry; C. D. Thomas, economics; W. H. Thompson, poultry; S. C. Winchester, agronomy; H. R. Clapp, horticulture; C. Y. Tilson, animal husbandry; and J. P. Longans, vocational agriculture. The departmental heads for the zoology and botany departments have not been appointed yet.

The president of the Ag Fair will not have charge of the "Barnwarming" henceforth. The person who will have charge of the "Barnwarming" will be elected at the next meeting.

L. M. Bowen, editor, and O. P. Owens, business manager of the Agriculturalist will each be presented a key or plaque and a bound volume of the magazine by the Ag Club for their work on the magazine.

MANN NAMED PRESIDENT OF ENGINEERING SOCIETY

Prize Will be Awarded Best Thesis Written by Senior A. S. C. E. Member

Prof. C. L. Mann, head of the Civil Engineering department, was elected president of the North Carolina section of the American Society of Civil Engineers February 9.

Four other State College professors are members of this group. They are: Dr. W. C. Riddick, Prof. Harry Tucker, Prof. W. G. Gelle and Prof. J. S. Whiteaker.

The society has approximately 150 members in North Carolina and was founded in 1852.

A prize of \$25.00 will be given to the senior member of the student chapters of American Society of Civil Engineers at N. C. State, Duke, and Carolina who writes the best thesis on an engineering subject to be selected by the members of the organization.

Ten dollars of this cash prize is to be applied as a membership fee in the Junior organization of this society.

FORMER GRID ACE TALKS AT MILITARY ASSEMBLY

Captain Dan Floyd Cites Many Personal Experiences at Meeting Tuesday

Captain Dan Floyd, executive officer of the Officer's Reserve Corp of Artillery in Raleigh, addressed R. O. T. C. students on the importance of artillery in battle at an assembly in Pullen Hall Tuesday, February 14 in place of the regular drill.

He cited many personal experiences. One incident related that evoked comment from the audience was the feat of dismantling a field piece, packing it on mules, running fifty yards, assembling the piece, and firing the shot, all accomplished in forty-two seconds.

Captain Floyd is a graduate of this institution of the class of 1913. While at State College he played guard on the football team and made the All-time State football team. He also won a position on the All-Southern eleven.

DENSEN TO BE SPEAKER AT ELECTRICAL MEETING

L. A. Densen of the United States Weather Bureau will be the principal speaker at the meeting of the American Institute of Electrical Engineers which will be held Tuesday night, February 21, at 6:45 o'clock. The subject of Densen's talk will be "Thunder Clouds."

"Y" Speaker

CHIH MENG

MENG TO DELIVER TALKS ON CHINA

Descendant of Meng-Tze to Speak at State College February 22 and 23

Chih Meng, of Peking, China, now Associate Director of the China Institute in America, will speak in Pullen Hall Wednesday and Thursday, February 22 and 23, at 7:30 p.m. under the auspices of the State College Y. M. C. A. and International Relations Club.

The subject for one of Meng's lectures will be "The Meaning of What is Happening in China." The subject of the other will probably be "The Manichuan Situation" or "The Future of Christianity in China."

On Thursday, February 23, at 3:30 p.m. the wives of the Board of Directors of the Y. M. C. A. will give a tea in the Y. M. C. A. building in honor of Mrs. Meng, to which the wives of the faculty and ladies connected with the college are invited. Mrs. Meng will make a brief talk on "The Changing Chinese Woman."

Meng has lectured extensively in the United States and Europe. He is a descendant of China's foremost philosopher, Meng-Tze (Mencius) who lived 372-288 B.C. Those who enjoyed hearing Dr. Koo last year will want to hear Mr. Meng.

PENNSYLVANIA CHAPLAIN TO VISIT STATE CAMPUS

Jack Hart Will Speak at Two Mass Meetings and Talk to Smaller Groups

Jack Hart, Chaplain at the University of Pennsylvania, will visit the campus on March 1 to 5. He will be the speaker at one or two mass meetings, but most of his talks will be given in smaller groups. He has expressed his desire to meet the faculty and to talk to the State College athletes on "The Training of an Athlete."

Hart received his A.B. Degree from the University of Pennsylvania in 1911, where he was active in baseball, cricket and soccer. He received his M.A. Degree in economics and sociology and his Ph.D. Degree later from that institution.

Hart is said to be a fluent speaker and is endorsed as such by many educational leaders.

Stranger Fails In Effort To Cash Worthless Check

While the radio in the Students' Supply Store issued a warning regarding him, an unidentified man tried to cash a worthless check.

State College was visited by a check-flasher Tuesday. He came in a Ford sedan, parked the car outside the treasurer's office in Holladay Hall, and proceeded to attempt to cash his worthless check. One of the secretaries was standing by the window, and saw him drive up. She also noticed that his car bore license plates of two states, namely New York and North Carolina.

Last fall, when the safe-breaking and stealing of football game receipts occurred, the suspected thief drove an automobile similar to the one driven by the intended forger. That car carried a California license tag. The secretary immediately thought that the

Red Masquers Club Gives "Donovan Affair" Thursday

David Young, Volene Williams, LeRoy Lumpkin, and H. B. Hines Play Best Parts; Mystery Drama by Owen Davis is One of Most Finished Plays Ever Presented by Red Masquers; Innermost Desires and Deeds of Characters Revealed to Audience; Young Ladies Entertain During Intermission

By FRANK G. WATSON

"The Donovan Affair," presented by the Red Masquers last night, was one of the most finished productions that they have ever presented.

Although all played their parts well, David B. Young, who played the part of John Killian, the inspector; Volene Williams, who played the role of Lydia Rankin; LeRoy Lumpkin, as Peter; her husband, and H. B. Hines, who was the jealous butler and slayer of the two victims, were exceptionally good.

The play was a mystery drama written by Owen Davis, and the plot moved rapidly from one climax to another, with a vein of humor throughout.

This play is generally considered Davis's most successful play in the history of the American theatre. Clever acting was combined with the deep psychological insight that the play affords, to enable the actors to show their excellent acting ability.

One by one the innermost desires and deeds of the characters were revealed to the audience. The crisis that brought to light all the secrets of these people was the murder of Jack Donovan, and the investigation that was

carried on in the attempt to solve the mystery.

There is a terrific tension created by the series of fast moving events that is felt by the audience.

The plot opens with an investigation of the murder of Jack Donovan at a dinner. Twelve people, including the guests and servants, are being held for questioning. Because he knew too much, Horace Carter, played by H. D. Carpenter, was murdered. Evidence pointed strongly against David Rankin, played by J. A. Garner. Peter Rankin shot and seriously wounded Neal Linesey, played by Stephen Codenda.

The mystery was solved by apprehending the butler as he was strangling Mary, to maid, played by Hazel Beacham, because she had secretly married Jack Donovan. His motive was, as he described it, "his great love for her and his hatred for Jack Donovan."

Miss Montague Stallings and Miss Hilda Fuller entertained the audience during intermissions with a piano and saxophone duet. The audience called for encores during both intermissions.

Members of the State College student chapter of the American Society of Mechanical Engineers were guests at a joint meeting of the Eastern Carolina chapter of the A. S. M. E. and the Raleigh Engineers Club, held in the Carolina Hotel, Tuesday night.

W. S. Lee, vice president and general manager of the Duke Power Company and president of the American Engineering Council was special speaker of the evening. He suggested the installation of a North Carolina Engineering Council for the purpose of solving State problems regarding engineering and related subjects and to bring members of State engineering organizations into closer contact. He said, "What we need is more coordination and cooperation among our engineers. An organization of men taken from various fields of engineering within our State is the best means of achieving that purpose."

Lee cited an incident of an engineer being sent from Washington to Charlotte to do some work, the cost of which was only 53 dollars. Traveling expenses alone for the man who was sent were 100 dollars. "This only goes to show how inefficiently jobs are done under the leadership of politicians who pull a few strings and have men sent in from outside our State to take work away from our citizens," said Lee.

The proposed State Council would be separate from any other such organization.

Before attending the meeting in the Carolina Hotel, the student members of the A. S. M. E. met in Page Hall. E. B. Crutchfield described the boat which will be built by Mechanical Engineering students for the Fair parade which will be held Thursday, April 6.

Dave Whitehead told of plans for the engineers' issue of the *Watsonian* to be published in April. He warned students who intended to contribute articles against writing advertisements for their respective departments rather than stories about phases of work done in them.

FROSH HONOR MEN TO BE GIVEN BIDS TO HONOR SOCIETY

Twenty-two Freshmen to be Issued Bids to Phi Eta Sigma At Noon Today

BARHARDT TO GIVE BIDS AT CLOSE OF PROGRAM

Membership to Phi Eta Sigma Based Entirely on Scholarship and Character; Chapter at Present Has Fifteen Active Members, As Only Freshmen and Sophomores Are Eligible for Active Membership; Initiation on March Tenth

Twenty-two freshmen are to receive bids to Phi Eta Sigma, national freshman honorary fraternity, at the freshman assembly in Pullen Hall at noon today. J. H. Barnhardt, president of the local chapter, will issue the bids at the conclusion of the scheduled program.

Barnhardt has recently been elected delegate to the convention of the organization to be held at the University of Wisconsin at Madison on April 14 and 15. W. H. Sullivan is the alternate.

Membership in Phi Eta Sigma is based entirely on scholarship and character. The applicant must have an average of half "A's" and half "B's" for his first term's work, or a similar average for the three terms of his freshman year.

At present the chapter has fifteen active members, as only freshmen and sophomores are eligible for active membership. It has been on the campus for four years.

Plans are being made for the initiation of the candidates on March 10, and for a banquet to be given in their honor following the initiation.

The men who are to receive bids are: W. C. Alken, I. S. Bagwell, W. A. Bain, J. R. Boykin, C. W. Comfort, King Drinkwater, J. D. Dyer, J. T. Patrick, W. H. Pierce, R. W. Seitz, T. S. Tague, John Upchurch, L. B. Webb, W. H. Weston, J. C. Weston, T. L. Hurst, M. A. Wright, A. L. Johnson, H. S. Keck, J. T. Nicholson, H. S. Keck, C. W. Surratt, Jr.

MARKER TO BE PUT HERE BY U. S. GEODETIC SURVEY

Marker Will be Valuable Aid in Civil Department, Says Prof. C. L. Mann

One of the first-order markers of the State-wide triangulation survey being made of North Carolina by the U. S. Coast and Geodetic Survey is to be placed on the campus of N. C. State College.

This marker is designed for the use of the college civil engineering department and, according to Prof. C. L. Mann, head of the department, it will mean a great deal as an aid in familiarizing students with the latest methods of surveying.

Commander C. L. Garner who is in charge of this triangulation survey throughout the United States is a native North Carolinian and a graduate of the State College Engineering School.

PROF. W. G. GEILE TALKS TO CONTRACTORS' CLUB

Prof. W. G. Geile, of the Construction School, explained the idea to be carried out in connection with the Construction School's exhibits in the Engineers' Fair at a meeting of the Associated General Contractors Tuesday night.

He also pointed out the main features of the new Contractors' Personal Institute of America. This organization is being fostered by the Associated General Contractors to give due recognition to construction staffs of its own members, as well as to set standards for general contractors' personnel throughout America.

There will be five classes of membership in this organization: student, junior, associate, full member, and honorary members.

STATE STUDENTS INJURED SUNDAY IN MOTOR CRASH

A. M. Epstein and N. H. Gurley Hurt When Automobile Overturns Near Clayton

EPSTEIN NOW CONFINED IN COLLEGE INFIRMARY

Accident Occurs East of Clayton When Front Tire of Car Blows Out and Car Runs Into Telegraph Pole; Four Other Occupants Receive Injuries; Were on Way From Goldsboro to Smithfield; Taken to Smithfield Hospital

A. M. Epstein, sophomore at State College, is recovering in the infirmary from injuries received when a car in which he was riding with some friends turned over near Clayton Sunday evening. He was taken here from Smithfield Wednesday.

N. H. Gurley, senior at State, was with Epstein, but was not injured. Paul Bazel of Goldsboro was the driver of the car, a Chevrolet coach. With him were five passengers.

The injured, all from Goldsboro, received slight scratches and bruises and an eye injury. He was a junior at State last year. Homer Parker was cut about the face, one of the front tires of the car, a large balloon type, blew out. The car turned over, hitting a telegraph pole.

A lady in a nearby home brought blankets to the boys, while a passing motorist took Frank Parker to Smithfield. Parker had an ambulance sent from there.

ELEVEN SOPHS INITIATED INTO 30 AND 3 SOCIETY

Most Prominent Members of Sophomore Class Taken Into Order Friday Noon

Eleven of the most outstanding members of the sophomore class were initiated into the Order of 30 and 3 at the freshman assembly Friday, February 10, bringing up to its quota the organization.

Each year the society takes in the eleven most prominent men in the sophomore class, but it is only three years old, this marks the first time that the quota has been reached.

The initiates were: Allen Bailey, J. H. Barnhardt, M. H. Gatlin, M. J. Gardner, W. F. Greenwood, John Findlay, D. W. Morrish, John Stanko, J. H. Stevens, W. H. Sullivan, Jr., and J. H. Warren.

WEAVER TALKS ON DOGS AT FORESTRY MEETING

Illustrates Lecture With Colored Slides Showing Different Kinds of Dogs

Prof. D. S. Weaver spoke to the Forestry Club Thursday night, February 9, on "Dogs as Man's Companions." He illustrated his lecture by showing colored slides of the different breeds of dogs.

Weaver pointed out the fact that the dog was the most domesticated animal of man and has been associated with man as far back through history as we can trace. He also stated that dogs have a great economic importance as protectors as well as their importance as pets.

HOUSE TO TALK CHANGES AT WEDNESDAY MEETING

Point System and Student Government Constitution Changes To be Aired

Changes in the Point System and in the constitution of the Student Government will be discussed by the House of Student Government at their meeting on Wednesday night.

A contemplated change in the time of elections for student officers will also be discussed.

The meeting of the House was called last week due to insufficient members being present for a quorum.

Receives Setback

W. H. Browne, professor of Electrical Engineering, believes in absolute accuracy of statements regarding Raleigh.

Lowell Thomas in one of his radio broadcasts commented upon the "sweltering temperature that Raleigh was undergoing," referring to the cold wave that was hovering around this city. The temperature was eighteen degrees. Professor Browne promptly clipped a sprig of a flowering shrub and sent it to the news broadcaster with an accompanying statement that Raleigh always had pleasant weather. However, the very night that Lowell Thomas read the Professor's letter over the radio Raleigh experienced a violent storm and freezing temperature.

BROUGHTON TALKS AT OPEN MEETING

Lawyer Says Present Depression Will Result in Better Business Policies

"The present depression is going to result in the return of business to the principles of common honesty and the doing of business on a merit basis," declared J. M. Broughton, prominent local lawyer and president of the Wake Bar Association, at an open meeting of Delta Sigma Pi, international commerce fraternity, Tuesday night.

"We are going to have a reevaluation of the human element in business with a concern for the welfare of the employees and a regard for the welfare of the entire community, and that new spirit of business will relate itself to the human spirit," Broughton declared.

"The spirit of American business is far more important and more powerful than the thousands of corporations, banks, and factories, and if we abolish greed, selfishness and the desire to dominate, the new spirit of business will not only help us to survive but will also carry us to a higher and finer type of life."

America is going to come out of this depression with some new ideas of business, Broughton declared, pointing out that some of the greatest faults of business in the past has been the old and elementary idea that business must make as much profit as possible.

The desire of corporations to appear powerful and to reach out and dominate, are characteristics of the old order of business that will have to be forgotten in the new order, he declared.

"The new spirit in business will not permit such domination as America has recently witnessed in the case of Samuel Insull and Ivar Kreuger."

MUSICAL CLUB TO GIVE CONCERT SUNDAY AT 3:30

The Lincoln Musical Club composed of thirty-five trained voices, will give a concert in Pullen Hall Sunday afternoon at 3:30 under the direction of James E. Dorsey and under the auspices of the Y. M. C. A.

Lincoln University's musical club ranks high among the negro colleges.

College Library Receives Valuable Book Collection

The State College library has recently given an excellent private engineering library of more than 1,000 volumes by the widow of the late Col. J. L. Ludlow of Winston-Salem. Col. Ludlow was generally recognized as the dean of consulting engineers in North Carolina.

According to Frank Capps, librarian at State College, who has just completed an inventory of the collection, the monetary value of the collection is considerable, while its value to the Engineering School of the college cannot be estimated. A special book-plate is being engraved for the collection, which will occupy special shelves in the library.

Included in the collection are files of "Transactions of the American Society of Civil Engineers," "Reports and Papers of the American Public Health Association," and "Transactions of the

PRUNING THE ATHLETIC BRANCH

In this day of necessity for economy, no one seems to be giving serious thought to reducing student expenditures to a modern depression scale. It does not seem likely that prosperity will arrive with a rush, and it behooves thinking student leaders to consider pruning where possible, especially when a dollar today is worth about two of the kind in use four years ago.

A study of means to reduce student fees and disbursements was suggested to Blue Key recently. These campus leaders could undertake no more public-spirited service than to conduct such a survey. The present offers a most opportune time.

Casting up the accounts of the theoretical average student reveals that there are many places where no reduction could be made. One of these is in the general college tuition fee of \$80.00 for North Carolina students and \$125.00 for out-of-state students. At any rate, this fee will not likely be increased. Dr. Brooks recently said that it had reached the point of diminishing returns.

Room and board both on and off the campus, laundry, incidentals are without the province of student group action, and competition is assuring the most for the money in these departments.

However, there are places where pruning can be done. One of these which sticks out like a sore thumb is the enormous athletic fee of \$15.00 per year.

Eight regular coaches carry on the direction of athletic teams. Several other college employees work either full time or part time in this branch of college activity. With the expensive maintenance charges for sport, it seems that the student body is paying a lot for a rather dubious return. Maybe it is all-important that State College teams be honored with such expensive attention, but many are beginning to doubt whether, after all, the college should not be a place for the development of the mind rather than an arena for over-publicized athletic struggles. Even if it is admitted that the athletic complex exists so strongly that the extensive sport program is necessary, it seems that the Wolf-pack or the Terrors are not so very much superior because of the extra money spent on them. State College has no staggering record of successes in athletic competition and there are doubts as to whether many winning games are produced by the surplus money spent.

The athletic department made its concession to the depression by curtailing minor sports. Nothing was ever spent on intramural athletics. Thus the big sports continue to absorb the athletic funds with no reduction in the total which the student body must pay. The student body gets no benefit except the privilege of viewing the football and basketball heroes in action and around the campus. Minor sports and intramurals—the opportunities for students to enjoy exercise—suffer with no funds while the student still pays the same enormous sum for continuance of an antiquated idea that winning teams in the big sports help the college.

Athletics cost as much as before the depression, while prices of everything else have tumbled. The \$15.00 athletic fee is the equivalent of about \$30.00 four years ago.

The best way to effect economy is to cut where cuts will not hurt. There are many other places where this can be done, but no other fee could be reduced with such positive good for everybody concerned.

FRESHMAN VIEWPOINTS

Freshman English themes on the subject "Possible Improvements in Student Government" reveal unusually interesting viewpoints upon this campus topic. Student government officers are to be commended for the suggestion that the first-year men present their opinions through this channel. Freshmen have gained something through thinking about the subject and student government officers can learn a great deal from the composite opinion of the first-year men.

With a refreshing vision very different from senior cynicism, these freshmen see possibilities for improvement as time goes along. They place the blame for failures, particularly in regard to the honor system, with the uninterested majority, the unsocial minority, shortcomings of student government officers and the wrong attitude of many faculty members. All these factors are responsible for student government's imperfections, and there is hope that all these groups will improve with time and progressive student action. The principal thing is that these first-year men see hope for betterment.

In a group of themes from an "A" English section upon the questions "The Greatest Sham in Civilization" and "The Greatest Sham at State College" even more penetrating criticisms were written. The unusual choice of topics called forth the best of efforts. Athletics and the honor system led the campus shams; politics and religion were in the majority as the shams of civilization.

A glimpse at these rather different papers reveals that the weekly theme grind might become more enjoyable and more valuable if English professors encourage original composition upon significant subjects. "My First Week at State College," "The Most Exciting Day of My Life," and other similar inane topics could well be discarded. When college students think, it is just as well to let them think about some of the problems which college is supposed to help them face more intelligently.

It is a sad commentary to make, but there is entirely too little original thinking on the campus. Organizations stifle and channel student thought in an interminable rote of politics, programs and solicited lectures until these means become the ends of their existence.

Any stimulation towards expression through themes, publications and genuine discussions serves to liberalize and broaden technical influences, making students more aware of other important problems on the campus and elsewhere.

FUTURE PROSPECTS

Mr. Kendall Weisiger, assistant to the president of the Southern Bell Telephone Company, sends a message to graduates of Southern Colleges, advising them what to do when they finish college with practically no prospects for a job. Ironically enough, in "good times" he employed several State College graduates on behalf of his company.

He views the situation with no false optimism, realizing that few graduates of colleges will get jobs this year or in the next few years. State College is no exception, although perhaps a bit more fortunate in that there is a small demand for some of the types of training given.

Briefly, his general recommendations are for graduates to keep up courage, do anything they can to earn a little money, join with fellow students in any enterprise they can evolve, help the less fortunate, keep in good physical condition, take interest in ways to right the social order, and travel if possible.

Of particular interest is his suggestion to graduates of technical schools. He advises to seize whatever opportunity they have to "acquire that valuable introduction to liberal fields that open the way towards development of the cultural side of their lives." The engineering graduate could well attend some liberal arts college, according to Mr. Weisiger, and widen his vision by knowledge of social sciences and the outlets for his interest that he found no time for in a technical course.

He also advises those who can go into the teaching profession to do so, as an opportunity for service and best use of their education at the present time.

It is truly unfortunate that college educates young men for a purpose, and conditions prevent the use of their training at present. The consolation is that they have a long time to live, and their education will be valuable to them even if they find no immediate use for it now or never. Many happy and successful men have gone into vocations far removed from their college specialized training. College graduates must merely make the best of a bad business, and hope that everything will come out for the best.

COMMENCEMENT PLANS

Commencement, the most important ceremony of the college year, comes up for discussion again as it seems that different plans from those of last year must be made. It is questionable whether it will be wise to hold the event again in the blazing mid-day sun to the discomfort of all present.

It may be possible to arrange to have it outdoors again late in the afternoon or at night. A new possibility is the use of the new Memorial Auditorium.

At any rate, the senior class should arrange to get information about the possibilities to assure that commencement will be arranged in the best possible way.

Foiled

Psychology tests made by Prof. Joe E. Moore point to the conclusion that you can't tell who a man is from his picture.

This was illustrated by Professor Moore in a series of identification tests held by him in his general psychology classes.

The test consisted of four pictures without identification marks from which the students were to classify their occupations.

The pictures were of Lewis L. Laws, warden at Sing Sing Prison; Walter Lippman, editorial writer; Sinclair Lewis, novelist; H. L. Mencken, critic.

"The psychology class failed miserably at placing some of America's foremost men," stated Professor Moore.

When the test was given to Prof. J. L. Clark of the English department, he stated that the picture of H. L. Mencken was Al Capone. Some of the ratings given these men by the class are:

Lewis L. Laws was named by some as a banker, a politician, a statesman, doctor, factory worker, and an aviator.

Walter Lippman was picked by some as being a lawyer, gangster, plumber, governor, preacher and musician.

Sinclair Lewis chosen as a carpenter, murderer, explorer, gangster, radio announcer, insurance agent and astronomer.

H. L. Mencken was labeled as a butcher, beer baron, mill worker, gambler, detective, traveling salesman, gangster and bootlegger.

Machine Grades

Already a device has been patented by an Ohio State University professor, which automatically corrects certain types of examinations and calculates their scores. This is the last straw. If we're to be graded by a machine-monster, let's demand a mechanical instructor, too.

Popular Profs

This year's annual at the University of Kentucky will contain pictures of the ten most popular professors instead of the ten most popular ladies, as has been the custom heretofore.

Lost and Found

LOST—Handbook of Composition, by Wooley and Scott; green Sheaffer fountain pen; military cap, size 7 1/2. Belonging to F. E. Rideout. College Algebra with name G. A. Fisher inside. Belonging to W. R. Mann. Kinematics book. Belonging to Sam Heyerman. Black overcoat with belted back; one brown fur-lined glove. Brown wallet containing registration

card, driver's license, insurance card, and A. A. A. card. Belonging to William G. Ryon.

Economic Geography, by Whitbuh and French. Belonging to Jack Walsh. Brown leather zipper case with fountain pen; marked Helen C. Belonging to W. L. Mayer.

FOUND—Military cap, size 7 1/2. Brown suede jacket, belonging to M. D. Wall. Information concerning these articles may be had at the main office of the Y. M. C. A.

STUDENTS' CRUISES

Magazine subscription scholarship workers and crew managers write immediately for very best student scholarship offers of leading publishers. Can be worked there now. Permanent positions if experienced, also summer crews for U. S. and foreign territory. For full details write—The Collegiate Scholarship Institute—219 Republic Building, Miami, Fla.

How To Avoid BONERS

AN INCUBATOR IS SOMETHING YOU BURN RUBBISH IN

TSK! TSK! Isn't it too bad! Bill Boner thinks a blizzard is something you find inside a fowl!

Why doesn't somebody give him a good pipe and some tobacco? For a pipe helps a man to think straight. Of course, it's got to be the right tobacco. But any college man can guide him in that. A recent investigation showed Edgeworth to be the favorite smoking tobacco at 42 out of 54 leading colleges.

Which is only natural—for in all tobaccodom there's no blend like the mixture of fine old burleys found in Edgeworth. In that difference there's a new smoking satisfaction, a new comfort, for the man who likes to

think and dream with a pipe between his teeth.

Buy Edgeworth anywhere in two forms — Edgeworth Ready-Rubbed and Edgeworth Plug Slice. All sizes — 15¢ pocket package to pound humidifier tin. If you'd like to try before you buy, write for a free sample packet. Address

A Light Beam TALKS

FROM the flickering light of a neon tube on the skyline of New York City, a speech was sent to the S. S. Presidents Hoover, 3000 feet away. The small neon tube changed the electric impulses from a microphone into light waves, which were directed to the ship in a narrow beam. A photoelectric tube in the center of a receiving mirror on the ship changed the light impulses back into sound, and the speech was heard on board.

The use of light that can be heard, and of sound that can be seen, has many applications. It can be used for speech communication, it can serve in fog to guide aircraft on their course and into port, and it can be used for radio and television broadcasting.

The development of future forms of transmission, whether in sound or light waves, will largely be the responsibility of college-trained General Electric engineers. To-day, these men are planning, producing, and testing electric equipment which will help to maintain General Electric's leadership in its field.

GENERAL ELECTRIC

Stage Set For Meeting Of Southern Teams Here

Raleigh Memorial Auditorium to Be Scene of Battles: February 24, 25, and 27

STATE STUDENTS TO BE CHARGED REGULAR PRICE

Dr. Ray R. Sermon Announces That Seating Arrangements For 4,000 Planned

The Twelfth Annual Southern Conference Basketball Tournament will be played this winter on one of the finest and newest basketball courts in the South.

Raleigh, the capital city of North Carolina, will play host to the tournament this year and has turned over to it, its new Memorial Auditorium where the games will be played, beginning with the first round games on Friday, February 24 and continuing until the final game on Monday night, the 27th.

Dr. Sermon says 3,500 seats will be available for spectators and that every seat will give an excellent view of the court. Five hundred additional seats can be erected if necessary.

Season tickets for the tournament are on sale in the treasurer's office only. They can be bought for three dollars and entitles one to see all seven tournament games, two Friday afternoon, two Friday night, two Saturday night, and the championship game on Monday night.

All afternoon games will start at 3:00 p.m. and all night games will start at 8:00 p.m.

Individual tickets to the mezzanine are reserved for one dollar for afternoon or night. These tickets are limited to 30% a performance. They may be bought at the Treasurer's office, Sir Walter Hotel, Wake Drug Store, and at Brantley's Drug Store.

Individual tickets to the sideline bleachers, which will be placed on the stage and under the balcony, may be bought for 75 cents for afternoon or night. The right, left, and rear balcony seats may be purchased for fifty cents.

State College students will be admitted as regular fans. Their registration cards will not be honored. By arriving early, students can secure good seats for fifty cents.

In an experiment, H. H. Hutchinson, of the Treasurer's office, says he could see as good, if not better, from the rear balcony seats as he could from the bleacher seats.

The basketball court in the auditorium is made of hard maple. Only three games have been played on it this winter. The court is 90 feet long and 50 feet wide.

Dr. Ray R. Sermon, chairman of the tournament basketball committee, said of the court recently following the State College-Wake Forest games which was played there: "It is one of the finest courts I've ever seen and will give teams participating in the tournament opportunity to display speed and team work."

One of the important features of the court are the baskets and backboards. The baskets are made of steel and are

Champs

Both varsity and freshmen matmen won State championships last night by defeating Duke teams in Durham. The varsity won, 15 1/2 to 14 1/2 and the freshmen took the Duke yearlings into camp, 29-5.

TERRORS TO PLAY DAVIDSON TONIGHT

Game in Gym Tonight and Return Battle With Carolina End 1933 Season

The State College basketball team will round up its 1933 season with the last two games when they meet Davidson Wildcats tonight in the college gym and Carolina on Monday night, also in the college gym.

In a previous game with the Wildcats the Terrors defeated them by a 29-15 score. In a previous game with Carolina the Tar Heels scored a close win over the State boys.

State's win over Duke and Wake Forest makes them a strong contender for Southern Conference honors, which will be decided next week.

In three games last week the Terrors won two and lost one. They lost to the University of South Carolina 49-25, defeated Duke 40-28, and won over Wake Forest 25-22.

FRESHMAN BASKETEERS WIN OVER WAKE FOREST

The freshman basketball team gained a 33-23 victory over the Deaclets of Wake Forest last night in the college gym. The Little Terrors had a 19-8 margin for first half play and then ran it up to 25-8 before the Baby Deacons got going again.

Stuart Flythe and Joe Hockfield led the State team with fourteen and seven points, respectively.

Tuesday night at Durham, the Techlets lost, a close game to the Duke yearlings, 28-27.

Tonight they play Davidson here, and Monday Carolina is met at home. The frosh have beaten both teams in previous games.

securely bound to the backboard which are in turn anchored to the gallery, preventing any chance of the ball being thrown out of line when it hits the backboard on account of a loose hoop or a shaky backboard.

Lighting effects are also exceptionally good. The lights hang from the ceiling and are high above the court, but give sufficient illumination any where on the floor.

STATE PUGILISTS TO MEET GEORGIA

Match With Georgia Bulldogs Will Mark Finis of Current Boxing Season

ENTIRE TEAM TO ENTER CONFERENCE TOURNAMENT

Southern Conference Meet to be Held in Charlottesville February 23-25

By ED RICCARDELLI State College's varsity boxing team under the tutorage of Coach Bill Beatty, will engage in their last match of the season Saturday night at 8 o'clock when they sling gloves against the University of Georgia Bulldogs in the Frank Thompson Gymnasium.

Coach Beatty is planning to take the whole team to the Southern Conference tournament at Charlottesville, Virginia, on February 23, 24 and 25. Captain Charlie Garner, welterweight champion, will be on hand to defend his title. Other State men to be feared in this tournament are Bill Dunaway, Jack Fabri, Turner Bilsisoly, Allen Nease, and "Red" Stephens.

Bill Dunaway, 155 pound class artist, has the best record ever made by a college sophomore pugilist, as thus far he is undefeated in college circles. As a freshman last year he won all of his bouts by the knockout route. This year, only one man, Captain Pound of Washington and Lee, has been able to last the full route, three rounds. He has four straight knockouts to his credit so far as a varsity pug.

Jack Fabri, untutored in boxing before coming here, is one of the best fighters ever to represent State in the 165 pound division. Jack won all of his fights as a freshman last year and as a varsity man this year his victories number three, one a technical knockout over Ershler, Duke football star. He has lost two hard-fought bouts this year, one to South Carolina's 165 pounder and one to V. P. I. Turner Bilsisoly and Allen Nease, State's two fighting midgets, have lost

Clever Sophomore Pugs

TURNER BILISOLY

ALLAN NEASE

The above sophomores, in their first year as varsity pugs, have turned in some good work so far, each having lost but one match. Bilsisoly fights in the 115 pound class and Nease in the 125 pound division. Both should give their Georgia opponents plenty of trouble Saturday night, since each packs a mean right, and displays good footwork and all-around cleverness.

only one fight this year. Both pack a mean right, along with good footwork and all-around cleverness.

Joe Saul, who as a 125 pounder was making rapid progress, has stepped from that class to the 135 pound class to replace Marshall Rhyme, who is out for the rest of the season because of eye trouble. He has lost all of his fights as a lightweight, but shows signs of being a good fighter for next year's varsity.

Joe Hull, 175 pounder and "Red" Stephens, unlimited, have met with little success. Hull has lost all of his fights except the one with South Carolina, in which he earned a draw. Stephens, who won most of his fights as a freshman last year, cannot seem to get started. He has won one fight and that by a technical knockout in the first round. He has lost two fights thus far. He was unable to make the trip to Virginia because of an injured eye received in his bout with South Carolina's unlimited pug. His place was well replaced by "Bull" Hall, monogram man of the 1932 club, who has been serving as a second this year. The State College pugilists fought a 4-4 tie with the Virginia Polytechnic Institute fighters Saturday, February 11 at Blacksburg, Va.

GENERALS LICK STATE IN SWIMMING CONTEST

Washington and Lee Defeats State Tankmen After Coming From Behind

By taking first and second places in the final event, Washington and Lee defeated State 37-29 last Saturday. Johnny Shinn, diving star, gave a beautiful exhibition to win handily from his competitors. In winning the hundred yard dash, Dinkelspiel was the only other State man to win a first place.

The State swimmers will meet Duke Saturday afternoon at 3:30. The State relay team, composed of Shepherd, Dinkelspiel, Moorman, and Carter, have not lost a race in two years.

STATE RIFLE TEAMS WIN THREE POSTAL MATCHES

State rifle teams won three postal matches and dropped three last week. Engagements were won from University of Washington varsity and the University of Washington R. O. T. C., and LaFayette College. The matches dropped were to Oklahoma State College varsity, Montana State College,

and Washington and Lee. Washington and Lee freshmen team forfeited their match to the State frosh rifle team.

Tobacco to smoke right

has to be a different kind of tobacco from that used in cigarettes... and it has to be made by an entirely different process...

OUT in Kentucky, where they have pretty women, fast horses, and blue grass, there grows a tobacco called White Burley. It doesn't grow anywhere else in the world. There is a type of this White Burley that is best suited for pipe smoking. It is neither too thick nor too thin. It is not light and chaffy; at the same time, it is not rank or strong. "U. S. Type 31" is the government classification for White Burley.

Since no other pipe tobacco has yet been found which seems to equal White Burley, this is what we use in making Granger Rough Cut. Next, we use the Wellman Method, a famous 1870 method of making pipe tobacco, to give Granger its fine flavor and fragrance. Then, too, Granger is "Rough Cut"—just like they used to "whittle" their tobacco off a plug with a jack-knife. It smokes cool, lasts longer and never gums a pipe. And finally, we want to sell Granger for 10 cents. Good tobacco—right process—cut right. So we put Granger in a sensible soft foil pouch instead of an expensive package, knowing that a man can't smoke the package. Granger has not been on sale very long, but it has grown to be a popular smoke. Folks seem to like it.

GEOLOGISTS WRITE PAPER ON BARITE

Article to be Read at Annual Meeting of Mining and Metallurgical Engineers

A paper which has been written by Prof. J. L. Stuckey, head of the Geology department at State College, and Harry T. Davis, Curator of Geology at the North Carolina State Museum, on "Barite Deposits in North Carolina," will be presented at the annual meeting of the American Institute of Mining and Metallurgical Engineers, in New York, February 20.

Barite, or barium sulfate, as it is known by chemists, is extensively used as a filler for paint, paper, cloth and linoleum.

The paper is an account of the origin, occurrence, and distribution of barite. A few of the outstanding points in the article are as follows: "Deposits of barite are known to occur in three localities in North Carolina, two of which—the Hot Springs and Kings Mountain—contain material of economic value. The third locality is three and one-half miles southeast of Hillsboro, Orange County, a short distance west of the highway leading from Hillsboro to Chapel Hill.

Definite figures indicate a total production of 300,000 tons of barite in North Carolina. With the depression of 1920 the industry began to decline and production practically ceased in 1928.

North Carolina deposits of barite are found in irregular veins and lenses in crystalline rocks.

Where barite occurs as a gangue in metalliferous deposits there seems to be agreement as to its magmatic origin. Likewise residual barite has doubtless been concentrated by weathering—whatever its original source. (Magma is a hot, slowly moving mass of minerals usually of volcanic origin.) North Carolina barite veins were formed by magmatic solution."

SOCIETY

Faculty Dance

The faculty of N. C. State College will be the guests of honor at a dance given for them by Mu Beta Psi, campus musical fraternity, Wednesday, February 22 in the Frank Thompson Gymnasium.

For the past several years this fraternity has honored the faculty of the college once each term of the school year and the affair next week will be the winter term dance. The organization entertained the faculty during the fall term and will do so again this spring.

Children of the faculty members have been invited to attend the dance. This is the first time that invitations have been extended to the children of faculty members to attend the dance with their parents.

Beta Sigma Alpha

The Beta Sigma Alpha Fraternity of State College entertained Friday evening, February 10, from 9 until 12, at a private dance at their home on Hillsboro Street.

A novelty feature constituted the first part of the evening program. The members of the fraternity awaited the guests at the door and sought dances as they arrived.

At the conclusion of this feature the guests and members were served a supper prepared by Mrs. W. R. Wingate and Mrs. M. T. Jordan.

Young ladies present were: Misses Velma Wingate, Ruth Pender, Lillian Covington, Betsy Senter, Frances Fleming, Jessamine Bland, Rosa Hendrix, Mary Belle McMurray, Mary Lou Piland, Ophelia Hamilton, Louise Pike, Bernice Goodwin, Jennie Sumner, and Helen Handy.

The chaperones for the dance were: Mr. and Mrs. W. R. Wingate and Mr. and Mrs. M. T. Jordan.

Alpha Chi Beta

The Alpha Chi Beta fraternity of State College entertained members and friends at an informal party Saturday evening at the Carolina Pines.

Among those present were: Misses Sadye Harris, Ann Mildred Powell, Barbara Moore, Edith Peacock, Margaret Owens, Claudia Dowell, Virginia Puckett, Edna McLean, Virginia Phelps, Billie Conyers, Mary Marshall Briggs, Martha Rogers. Chaperones for the occasion were Mr. and Mrs. W. P. Hedrick.

Delta Sigma Phi

Delta Sigma Phi fraternity will entertain at a tea d'ansant at its home on Hillsboro Street this afternoon from 4 to 6.

Wake Theatre

Dr. W. H. Belmont will lecture on "Planning Passion," true facts about sex, at the Wake Theatre Monday, Tuesday, and Wednesday. The lectures will be for men only and will take place at 7 and 9 o'clock at night.

"Chandu the Magician," featuring Edmund Lowe in the leading role, will be shown at the Wake Theatre Thursday and Friday. A Mickey Mouse cartoon, Sound News and a Bosco cartoon will complete the program.

"Cowboy Governor," starring Hoot Gibson, will be seen at the Wake Theatre Saturday. A Roscoe Ates comedy and another chapter of "Last of the Mohicans" will also be added to the program.

Palace Theatre
What happens when a charming young lady detective sets out to use her feminine wiles to ensnare a suave gentleman crook, is the central theme of "Dangerously Yours," new production which will play at the Palace Theatre Monday and Tuesday.

One of the laugh-getting episodes in "Uptown New York," the new feature at the Palace Theatre Wednesday and Thursday in which Jack Oakie essays for the first time a more serious role than he has yet appeared in, concerns a wrestling match to which Eddie (Jack Oakie) takes his girl friend, Pat (Shirley Grey).

Three youthful stars will make their film debut in featured roles Saturday in Zane Grey's picturesque story of the modern great Southwest, "The Mysterious Rider," which will play at the Palace Theatre.

Capitol Theatre
Much conjecture, and much fictional plotting, has followed the murder in

1918 of Princess Anastasia, daughter of the Russian Czar. Or was she murdered? Is she still alive? These are the questions which produce the stories.

One of those stories, cleverly combined with a series of memoirs explaining the methods of the French Surete, will be on the screen at the Capitol Theatre Monday and Tuesday. It is the production of "Secrets of the French Police," in which Gwill Andre, Frank Morgan, John Warburton, and others are featured.

Tallulah Bankhead and Robert Montgomery make their first appearance together as co-stars of "Faithless," a film which comes Wednesday to the Capitol Theatre screen.

It is an ultra-modern story, dealing frankly with an important problem of the hour, and thus is a most appropriate vehicle for the sophisticated personalities of its stars.

"Jewel Robbery," which co-stars William Powell and Kay Francis under the Warner Brothers' banner, is the first picture in which both of these stellar names have been linked to-

WANT A PHILCO

RADIO FREE? See Students Supply Store "Ad" on Page 2

gether in about three years. It is the fifth picture, however, in which Powell and Miss Francis have appeared together.

State Theatre
An announcement that will be received with a great deal of enthusiasm is that of the engagement for one day only, Monday, February 20, at the State Theatre of Rudy Vallee and his famous orchestra, The Connecticut Yankees.

Rudy and his Connecticut Yankees will play four performances Monday and their program is in addition to the regular picture program. The feature picture for Monday only is Nancy Carroll in "Child of Manhattan," with John Boles.

You've heard Kate Smith sing! You know what that voice of hers can do

A NEW SLANT ON SNAP BRIMS. A NEW BRIM WIDTH \$2.95. Huneycutt, Inc. "COLLEGE OUTFITTERS"

Rabbits and Radishes Babies and Bouquets Carrots and Cabbages all from an EMPTY TUB!

ILLUSION:

Right before your very eyes the man of magic draws rabbits, vegetables, flowers, fruits—even babies—all from an empty tub! What an astonishing fellow he is!

EXPLANATION:

The assorted rabbits, babies, carrots, cabbages, ribbons and other magical "props" are not created by magic. The tub has a false bottom that is conveniently displaced, and numberless wonderful things spring to life in the magician's nimble fingers. They do literally "spring" because they are made to compress into the bottom of the tub, taking their natural shape as the magician lifts them out.

Sources: "Tricks and Illusions" by Will Golden, E. P. Dutton & Co.

IT'S FUN TO BE FOOLED ...IT'S MORE FUN TO KNOW

Tricks are legitimate on the stage but not in business. Here's one that has been used in cigarette advertising...the illusion that blending is everything in a cigarette.

EXPLANATION: Blending is important...but it makes a lot of difference what is blended. Inferior tobaccos can be blended to cover up their humble origin. But your taste soon detects the trick.

The proper use of blending is to bring

out the full "round" flavor of mild, high-grade tobaccos. It's the costliness of the tobaccos, as well as the blending, that counts.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Hundreds of thousands of dollars have been spent by others in the attempt to discover just how Camels are blended. The blend is important.

But all the while Camel spends millions more for choice tobaccos...to insure your enjoyment.

Light up a Camel. Relax, while the delicate blue smoke floats about you. Enjoy to the full the pleasure that comes from costlier tobaccos.

Keep Camels always handy...in the air-tight, welded Humidor Pack.

Copyright, 1932, E. J. Reynolds Tobacco Company

CAMELS

NO TRICKS ..JUST COSTLIER TOBACCOS IN A MATCHLESS BLEND
