STEPS ARE TAKEN AGAINST CHEATING BY GOLDEN CHAIN

Senior Honorary Society Pledges Support to Council for Student Honor System

OTHER ORGANIZATIONS ASKED TO COOPERATE

Members Plan to Personally Dis- courage Cheating and Challenge Campus Groups to Support Movement; Belief That Honor is Part of Education is Expressed in Resolution; Unanimous Ap- proval Expressed for Movement

Golden Chain, senior honorary society, decided Thursday night to support the honor system individually and collectively and to challenge other campus organizations to take the same stand, particularly during the third term examinations.

Although every student is nominally pledged to carry out student laws, the group felt that action on the part of a representative body would discourage cheating. Members will personally discourage cheating and will solicit similar action by all groups on the campus.

The official statement of the move is as follows: "Believing that the building of a strong character is one of the most vital parts of a college student's education and that the honor system is endeavoring to foster such character, we, the members of Golden Chain, pledge our loyal support in every way to Student Government. We challenge every other organization to support the Honor System."

Approval of the step was unanimous, and members expressed themselves as unwilling to let the matter rest as a mere statement, but to personally see that the spirit of the resolution was carried out.

HAMILTON MAKES TALK ABOUT WAR DEBTS TOPIC

Speaker to Sophomore "Y" Cab- inet Tells of Problems Facing Country Today

A. W. Hamilton of Charlotte spoke at the Sophomore Cabinet meeting Thursday night on "The Present Economic Crisis and Foreign Debt."

"Our present economic crisis today is due," he said, "not to the actual fighting of the World War but to the profligating of a few thousand men made in the gigantic struggle. These men who amassed huge fortunes have since the war inflated the world markets with their money until the crash came in 1929. They were ready for the crash and lost but little, but the country as a whole was ruined."

Since our crash in 1929, foreigners have been selling America bonds and stocks and collecting gold from our country. This drain was stopped by President Roosevelt last Monday.

The last great problem that will have to be considered is the education of our youth, and some way must be brought about to take care of our homeless boys and girls roaming through our cities.

"Interest may be slashed, salaries may be cut, but do not deprive our young people today their only home and salvation in the form of schools," stated Hamilton in closing.

Hamilton is American born but educated in England. He served in the British army during the World War, and has lectured in many institutions here and abroad.

LEAZER SOCIETY ELECTS BUTLER TO PRESIDENCY

Group Chooses Forbes, Batts, Pierce to Fill Other Offices for Spring Term

W. G. Butler, as president, heads the list of new officers elected for the third term by the Leazar Literary Society at their meeting held Wednesday evening, March 8. F. G. Forbes, vice president; R. L. Batts, secretary; and W. H. Pierce, treasurer, were the other men placed in office.

Plans were discussed for a series of debates on topics to be given during the spring term.

COUNCIL MAKES PLANS FOR ENGINEERS' FAIR

The State College Engineers Council made detailed plans for the Engineers' Fair and Parade to be held April 6, 7, 8, at a meeting held in Page Hall Thursday night.

Education Costs at State Much Lower Than Average

Survey by Self-help Bureau Reveals That State Students Pay Thirty Per Cent Less Than at Other Schools; Average Cost is \$450 Per Year; North Carolina Residents Pay More Than in Many States

The average student at N. C. State College pays thirty per cent less for a year of schooling than does the student at a representative group of Northern and Middle Western agricultural and engineering colleges, a survey recently made by the State College Self-help Bureau shows.

The same study shows the cost of a year of schooling at State College is less than half the average for twenty-five universities and liberal arts colleges in the same sections of the country.

This survey, involving forty-one representative educational institutions in Northern and Middle Western states, was made for the purpose of comparing the system of aiding needy students in finding employment with that at other schools.

Questionnaires were sent nearly every college and university in these sections and the comparative figures of "scholarship" cost are based on replies furnished by registrars at the institutions. Southern schools were not included in the survey.

The average cost was computed to include tuition, fees, laundry, room and board and incidental expenses. At State College this proved to be \$450

a school year, and at the other technical and agricultural colleges the average was \$580. The average at the twenty-five universities and liberal arts colleges was \$722.

A comparison of tuition costs at State College with fifteen other state-supported institutions revealed that North Carolina charges its own residents quite a bit more than the average of these Northern and Western states. The average tuition for these schools was \$55, while the tuition at State College is \$80. Approximately half of the state-supported institutions charged no tuition to residents of their own state.

However, in the costs of board and room and other individual items of expense State College showed up especially favorably. The figure of \$23 a month for room and board at State College was considerably less than that at practically every one of the other institutions included in the survey. It has long been the policy of the administration at State College to offer living facilities, laundry, etc., to students at absolute cost and it is this type of expense that brings the cost of a scholastic year at State College to such a low figure.

DEBATING TEAM TO ENTER MEET

State Defeated by Asbury Tues- day With Return Meet Sched- uled for April 3

State College's debaters will give a demonstration of their new system of debating at the annual Tri-State Forensic Tournament to be held this week-end in Salisbury, E. H. Paget, director of forensics, announced today.

Since this new style of "direct clash" debating was originated by Professor Paget and perfected with the aid of members of the team last year, it has attracted nationwide attention. On two previous occasions the State College team has been invited to give exhibitions before meetings of the National Association of Teachers of Speech in Los Angeles, Cal., in December, and in Tulsa, Okla., last year at the annual tournament of Phi Kappa Delta, national debate society.

Members of the team will also compete in the debate tournament and the extemporaneous speaking and after-dinner speaking contests. Those who compose the debate squad are: Lonnie M. Knott, Jr., of Wendell; Frank Busbee, of Raleigh; Horace Cotton, of Red Springs; and W. E. Braswell, of Greensboro.

The local squad was defeated by Asbury College, of Kentucky, at a meet held in Pullen Hall Tuesday evening, March 7.

On April 3 the State debaters will visit the Kentucky school for a return match. The meet between these two teams brought together schools that have a high record in intercollegiate competition. State having won more than 80 per cent of its dual debates during the last three years, and the Kentuckians having defeated many outstanding teams in the country during the same period.

Preparing For Camp

Fifty-five juniors in the military department of State College are being inoculated against typhoid fever.

The inoculations are required before entering Fort McPherson, in Aniston, Alabama. Three typhoid inoculations and a smaller vaccination will be made on each student.

Band Makes Trip

The concert band, under the direction of "Daddy" Price, left Saturday afternoon for Garner, N. C., where they will play for the dedication ceremonies of the new gymnasium. A barbecue was given for the visiting musicians.

Recovering

L. A. Bennett, junior in Chemical Engineering, is recovering from burns received Tuesday during an experiment in the organic chemistry laboratory.

Bennett was distilling alcohol and ether over an open flame when the liquid spilled on his hands and caught fire. The flames spread to his face and neck when he attempted to extinguish them.

Summer School Head

T. E. BROWNE

Director of the State College Summer School, who announces that it will open June 19 this year. Browne is also Dean of the School of Education.

SENIORS PROPOSE LATE EXERCISES

Class in Favor of Twilight Com- mencement at Twilight on Riddick Field

The senior class voted Monday to petition the Faculty Council to have this year's commencement exercises held at twilight on Riddick Field.

The class decided on exercises at twilight in order to eliminate the possibility of the extreme heat that marred last year's exercises, which were held during the hottest part of the day. Much discomfort was caused all those attending.

The petition will be submitted to Dean E. L. Cloyd Tuesday.

Marshals for the commencement exercises were appointed at the meeting. Junior marshals selected were: W. E. Braswell, chief marshal, R. S. Poole, Joe Dixon, and E. J. Lowrance. Sophomore marshals are J. H. Barnhardt and J. K. Stephens. The freshman marshal is H. W. Webb.

PROF DISCUSSES ORCHID CULTURE

Candidates for Editor and Busi- ness Manager of Agriculturist Named at Meet

Prof. G. O. Randall of the Horticulture Department made a talk on "The Modern Way of Growing Orchids" at the Ag Club meeting Tuesday night.

"The orchid which is the most unusual, the most valuable, and the most interesting of commercially grown flowers is a tropical plant" said Randall, and found growing wild in the East Indies, tropics of South America, Central America, Mexico, and several other tropical countries.

"Until recent years practically all of the orchids grown in the United States were imported. The adult plants were gathered in the tropics and sent to this country where the commercial orchid growers grew them and brought them into flowers under glass."

"The orchid seed is one of the smallest, if not the smallest, of plant seeds. It is about 1/100 of an inch in length and about 1/300 of an inch in diameter. By the old method only a few plants (Please turn to page four)

Dean Brown Offers Opinion On National Banking Crisis

By J. W. LAMBERSON

Dean B. F. Brown made his regular review of world events at the sophomore assembly Wednesday at noon.

Dean Brown stated that he hoped that as a result of the present banking crisis action would be taken as follows: To greatly strengthen our Postal Savings Bank System and make it more useful and effective for public use; all banks that were not members of the Federal Reserve System would be forced into it; and to give depositors protection for their deposited money.

Dean Brown in the beginning of his address reviewed Roosevelt's inaugu-

ration as the thirty-second President of the United States, and also the attempted assassination which was made on his life in Miami, which resulted in the death of Mayor Cermak of Chicago and the wounding of three other bystanders. His would-be assassin, Giuseppe Zangara, was given eighty years in prison, and who will now be tried for the killing of Mayor Cermak.

Roosevelt broke all past records on his cabinet sworn in the same afternoon that he was inaugurated, and the next day called a special meeting to consider the banking situation. (Please turn to page four)

SUMMER COURSES WILL BE OFFERED AT REDUCED COST

Special Group of Courses for Principals and Teachers to Be Featured

COOPERATION INSTITUTE TO HOLD MEETING HERE

Summer School Begins June 17 and Ends July 28, Announces Director T. E. Browne; Securing Of Cooperation Institute Meet Here Regarded as Important Since This Marks First Time That Institute Has Convened in Raleigh

Summer School, featuring this year a special group of courses for teachers and school principals, will be held for a period of six weeks beginning June 19 and ending July 28 according to Dean T. E. Browne, Director.

In connection with the regular courses for college students, teachers and school principals, there will be held this summer at State College the annual American Institute of Co-operation. This is a national organization of leaders in agriculture and agricultural economics devoted to a scientific study of co-operative enterprises.

Securing the 1933 annual meeting of the Institute for State College is looked on here as a great achievement for the College and the city of Raleigh as it will mark the first time the Institute has ever convened in the South.

Costs of the Summer School have been reduced to a practical minimum this year so that a greater number of teachers and others interested in attending the session and hearing the nationally prominent speakers who will attend the Institute may take advantage of the opportunity.

Some of the special courses offered this summer will be taken from the following subjects: elementary school administration and supervision; character education; modern tendencies in curriculum construction and revision; extra-curricular activities; and principles of co-operation and their application to modern farm problems.

The first announcement of the 1933 State College Summer School has been mailed out to the teachers of the State, calling attention to the special features of the school. This is largely a picture of the folder, giving campus views and pictures of the State Capitol and the Memorial Auditorium.

In addition to the open letter to the teachers of the State the preliminary announcement calls attention to the opportunities offered by State College Summer School, and lists certain new courses to be offered. Because of the meeting at the college during the summer of the American Institute of Co-operation special attention will be given to courses related to co-operation, distribution, money and credit, etc.

One page of the folder is devoted to a brief description of the places of interest in the Capital City, especially those which should appeal to public school teachers.

EXPERIMENT MEN ISSUE NEW POULTRY BULLETIN

"Grazing Crops for Poultry," Bulletin 282 of the North Carolina Experiment Station is a publication now available to poultry growers of the state.

The new publication was prepared by Roy S. Dearstyne, head of the poultry department, and P. H. Kime, of the agronomy department. It lists crops which may be grown in succession for feeding poultry and shows the place of these crops in the ration of the growing and laying bird. Crops which may be used in winter as well as those which are available in spring and summer are given. Methods of planting and seeding are described.

The authors say that grazing crops are essential in profitable poultry production and give the results of experimental work conducted at the State College poultry plant.

CHEMICAL FRAT ELECTS WILLIAMS AS NEW HEAD

C. A. Williams of Wilmington was elected alchemist of Gamma Sigma Epsilon, honorary chemical fraternity, at a meeting of the society Wednesday evening.

Other officers elected were: Edna Mae Halverson of Raleigh, recorder; Catherine Williams of Raleigh, visor; and L. A. Bennett of Garysburg, sergeant-at-arms. These new officers will be installed at the next meeting of the fraternity.

BROOKS TO CALL MEET TO DISCUSS HOLIDAY CHANGE

Wrong Institution

Three men drove up at the main entrance of the college yesterday and parked. With evident amusement they viewed the Third Battalion dressed in their gaudy blue "fatigues," awaiting orders. "Say buddy," they asked John Hunter, "could you tell us where the epileptic ward is?" "The what?" replied Hunter. "The epileptic ward. Isn't this Dix Hill?" "Not that I know," answered Hunter. "Others had heard the stranger's query, and from all sides the cadets introduced themselves as King Henry, Napoleon, Washington, Lincoln and other notables of history.

DONOR GRATIFIED WITH "Y'S" WORK

John D. Rockefeller Thanked by Local Officers for Building Contribution

John D. Rockefeller, in a letter addressed to E. S. King, expressed himself as gratified with reports of the work of the local Y. M. C. A., which he advanced twenty years ago by a \$20,000 donation on the present building which the "Y" occupies.

Dean E. L. Cloyd, H. E. Satterfield, chairman of the building committee, and members of the Y. M. C. A. staff sent him a letter of appreciation recently upon the anniversary of the twentieth year in the new building.

The letter follows: "Dear Mr. King: I am in receipt of your letter of February 23d, enclosing letters from Mr. Cloyd, dean of student; Mr. Satterfield, chairman of the building committee, and the members of the cabinet, in appreciation of the gift of the Young Men's Christian Association Building at the North Carolina State College some twenty years ago.

I am exceedingly gratified to have these favorable reports of the work accomplished by the Association during these years, and deeply appreciate your kind thoughtfulness in sending me these satisfying letters.

Be assured of my gratitude and of my kindest regards and every best wish for each and every one who has had a part in this great and good work. Fraternal yours, (Signed) John D. Rockefeller.

In his letter to Rockefeller Dean Cloyd said: "Aside from the splendid work of the young men who make up the personnel of the organization, this building which was made possible through your gift has served for years as the center of student life on the campus, and has filled a place which no other building could have filled."

Howard E. Satterfield, chairman of the building committee, wrote: "The good that we have seen and can now see going on all the time, because of your liberality, is very marked, but the results which we cannot tabulate and will never be able to see in full are much greater."

In behalf of the Y. M. C. A. Cabinet, Ralph Cummings, president of the "Y," W. E. Braswell, secretary, and E. S. King, general secretary, wrote: "Today the Y. M. C. A. has an indispensable place on the campus. The building affords a meeting place for the literary societies of the campus, the International Relations Club, the Y. M. C. A. Cabinet, an office for campus publications and as a center of recreation for the students of N. C. State College."

Turkeys

Two turkeys were found strolling in the hall on the third floor of South Dormitory Friday morning.

Residents surmised that a practical joker was responsible for their presence. A freshman threw the fowls out of the window to see whether they could fly or not. They could.

University Cancels Spring Vac- ation on Account of Bank Holiday Crisis

CLOYD SAYS SENTIMENT NOT STRONG FOR MOVE

Treasurer Suspends Cashing Stu- dent Checks Until Holiday is Over; Checks Will be Held and Cashed Later; Sophomore Class Votes Against Suspension; Ad- ministration Has Been Consider- ing Matter; No advantage Seen By Many

In regard to the abolishing of spring holidays because of any effect on students of the national banking holiday, Dr. E. C. Brooks, president, said Wednesday, "There has been no meeting relative to the matter, but a meeting of the faculty will probably be called next week, at which time there will be a discussion of proposals."

Much discussion has arisen on the State College campus due to the postponement of the spring recess at Chapel Hill, and the advancement of the Carolina registration date from March 20 to March 13. It was thought that State College might follow the example of the University.

Holidays are scheduled March 22-27. Dean Cloyd said that the administrative officials have been discussing the continuation of classes through the days set aside for vacation, and according to all signs, the spring vacation will be carried out regardless of any effect the banking holidays and their subsequent influence may have on the students. He says, "We have discussed it among ourselves and we can see no advantage in calling off spring holidays. Those students who have been granted extension of credit until the third term would probably have to go home anyway, should they not be able to pay. As far as traveling expenses are concerned, many students bum home, so a lack of traveling money should not deter them from going home. At a meeting of the sophomore class in Pullen Hall Wednesday, a standing vote was taken, and only 50 voted against vacation. There are about 400 members in the sophomore class. This is a good indication of the general feeling of the student body."

A. F. Bowen, treasurer, said that for the present the best that could be done was expressed in a bulletin issued by his department, which reads as follows: "Due to the bank holiday proclaimed until Friday and to withdrawal restrictions invoked by banks in this state and in banks throughout the nation, this office will be unable to pay out any money or to cash any checks until the bank holiday is over and bank restrictions are removed. Checks will be accepted as usual in payment of accounts."

If check is in excess of the amount of the account, a memorandum will be given for the balance. The receipt will be cashed when and if your check is collected."

The bank holiday was prolonged indefinitely Thursday by President Roosevelt.

BOARD OF PUBLICATIONS WILL DISCUSS NOMINEES

Prospective Technician, Wataugan and Agromeck Heads Will Be Reviewed

The College Publications Board will meet tonight at the home of F. H. Jeter, chairman, to discuss nominations for editors and business managers of THE TECHNICIAN, Wataugan and Agromeck for next year. A final vote will probably be taken at a later meeting.

Other of the eight members of the board are W. L. Mayer, financial adviser and the present editors and business managers of the three campus publications.

Prospective editors and business managers must obtain the board's sanction on the basis of their fulfillment of eligibility rules, and must also comply with the rules of the Point System. Nominees will compete in the campus primary elections, tentatively set for April 10, and the two highest for each office will run in the finale approximately one week later.

JUST A GOOD THING

Last night Golden Chain expressed their personal and group support of the honor system. If it is just another resolution, nothing will ever come of it except the fact that several seniors, who are in a position to know a great deal about the campus, favor the honor system.

If other organizations take up the idea, some nearer approach may be made to a desirable state which has been proved to be attainable.

The honor system is merely an affirmation that all the people can get along better with honesty, a fundamental basis of most of society's institutions. In spite of sophomoric criticism, the system could work much better. Time will make it work, and the time can be shortened by any efforts to arouse the proper degree of public opinion about campus dishonesty.

Incapable faculty members hold back progress towards a better honor code and some attention could be given to this angle with illuminating results.

If any steps forward can be made, they will not be in vain. Improvement is cumulative because freshmen always adopt the upperclassmen's attitude—not the printed statements, but the frank opinions of the "bull sessions."

Last year witnessed a forward step when several individual classes, under the leadership of a few students, made it known that they would not tolerate any cheating on the examination. It worked, and it is just this sort of action that Golden Chain hopes to inspire both directly and indirectly.

The honor system is really practical, and was conceived to make campus life more convenient and wholesome. There would be a distinct practical advantage in being free from worry about your property, and being able to take courses which are not devised to make it hard for students to cheat.

If students can attack the problem in the light of establishing something practically better, instead of attempting to promote a hopeless ideal, then in time the code will be a reality, with public opinion against the unsocial members who violate it.

A SUCCESSFUL EVENT

Due to the cooperation of State College students, the Eighth Annual High School Basketball Tournament staged last week was a marked success.

Approximately 600 visiting athletes and 400 fans spent from one to three days on the campus, the athletes being lodged and entertained by students in the dormitories. That the students were particularly interested in the tournament is evidenced by the fact that all the high school athletes were provided quarters in the dormitories. Twelve fraternities offering lodging to the visiting teams were not called upon to provide quarters, since all the boys had been taken care of in the dormitories.

Many of those participating in the tournament are college material. When some of them are deciding which institution they are to attend, they naturally will give a great deal of thought to State College on account of the courtesies extended them here during the tournament.

Much of the success of the tournament is the result of the efforts of J. F. Miller, director of physical education, who had entire charge of the affair. It is through Mr. Miller that the tournament is brought to State College each year and his thorough preparation makes the opportunity for a successful event. —E. S. K.

Within the next few days, administrators will meet to decide whether State College will dispense with spring holidays in view of the present national banking crisis.

It is a question solely up to college authorities, who may be expected to decide on this and any other plan of action which will enable the college to weather the storm without undue interruption and prevent the necessity of any student being forced to leave college.

MORE SWIMMING

As the days grow warmer and winter sports end, the suggestion comes that athletic authorities arrange to make the college swimming pool in Frank Thompson Gymnasium available to the student body during the whole day and the evening.

At present use of the pool is restricted to the late afternoon hours, principally because of the cost of employing an expert swimmer to watch out for the safety of the bathers.

Greater use of the unusually good swimming facilities offered by the pool is desirable, and it is thought that the cost of a life-guard would be small in comparison with the opportunities for healthy recreation for many students who would enjoy a dip any time during the day or evening. Some may be unable to take advantage of the present open hours, but could swim at other times.

At any rate it seems that a trial period for the idea, suitably publicized, would be worth while.

THE COLLEGE INQUISITION

College Greek-letter social fraternities will soon begin to lay plans for their annual Hell Week atrocities. No one knows why, except that it has been done for a long time and upperclassmen feel that they must deal out somewhat the same as they received.

The absurd difference between the ideals of a fraternity ritual and the sadism of the brothers is amusing. National organizations have realized this, but in spite of opposition from this source and others college men continue to make asses of themselves for one week.

It is a strange process. Hell Week will wane in a particular chapter until some year an ingenious Joe College increases the punishment. The next year the freshmen victims are bound to surpass their own sufferings and the process is cumulative for two or three years. Then the practice slows down to complete the cycle.

Leaving aside mental perversion, the only reason to justify Hell Week is for discipline's sake. Certainly discipline could be instilled in better ways.

Only the shock of a hazing death or serious injury ever seems to diminish the zest of fraternities for the practice. Such an occurrence would be a terrible thing, but the fraternity does not think of the possibility even though hardly a year goes by without a report of some such unfortunate incident. State College is probably no worse than other schools in the severity of its Hell Weeks, but the infirmary houses many pledges on the morning after a night's climax of the week's inhumanities.

The frenzy is now already under way, but immediately after this year's programs the House of Student Government or the Interfraternity Council could well consider legislation to end Hell Week. The college and the fraternity would be on a better plane if it was known that this outworn pastime is no more.

College Opinions

A MEDIUM FOR TECHNICAL EXPRESSION

The appearance of *The Carolina Engineer*, the professional journal of the school of engineering, is a significant forward step in campus journalism. Edited and directed by the students of the engineering school themselves and devoted exclusively to presenting the news and activities of this technical division of the University, the *Engineer* fills an important place in campus journalism.

Says Editor G. W. Gorham in the lead editorial in the March number of his publication "... Engineers must of necessity be men who can express their ideas in a logical and concise manner both in writing and in speech. The engineer who can prepare his ideas for the technical press has an advantage over other men in his field, which can be measured directly in terms of dollars, as well as in terms of personal satisfaction."

Thus does the *Engineer* explain that it, as other campus publications, is a journalistic laboratory, utilized in this case to express the ideas and opinions of a technical group. But unlike other of the campus publications, the *Carolina Engineer* is able to furnish members of the school backing it with news and information limited matter how comprehensive, could perform such a duty on the University campus. No other journal could, for reasons of scarcity of space, devote its columns to learned discussions of technical matters or the activities of technical societies.

But the *Engineer* will find its chief service to the campus in performing as a medium for expression of the engineers of tomorrow. Few college campuses are able to offer their technical students ample opportunity for literary expression in the field of their chosen work. This advantage thus places the University engineering student head and shoulders above his competitor who has been trained in another institution. The successful man, regardless of his chosen line of endeavor, must be able to express himself both in speech and in writing. In this the *Carolina Engineer* fills a long looked for position—*Daily Tar Heel*.

OXFORD PACIFISM

A fortnight ago members of the Oxford Union voted nearly two to one in favor of a proposition stating that "under no circumstances" would they "fight for King and Country."

Such a statement of complete pacifism from a group of representative college students on this side of the Atlantic would be quite impossible for two reasons. First, American students, even those who think, have not so enthusiastically championed the cause of labor as European undergraduates have done. (It cannot be denied that war is the most vicious means by which capital exploits labor.) We still have the notion, as Paul Blanchard said, that a college degree will place us above the laboring class; hence, labor problems are not our problems.

In the second place, American students have not felt the devastating effects of war as have the Oxford Union members. The surprising feature of the flare at Oxford is not 275 students in the Union declared against war, but that such a furor was raised about it in a country that lost in the past war a million of its youth as well as its economic stability.

Notwithstanding the prodigious activity of the Tulane Socialist Club, it is a fact that American students are relatively irresponsible to the vital implications of major social issues. Will it take a war that robs us of our best blood and substance to awaken us?—*Tulane Hullabaloo*.

HERE AND THERE

By P. G. SEWELL

During this annual lull in campus activities, between the end of the basketball season and the beginning of exams, many students find that time hangs heavy on their hands. My first advice would be to prepare yourself for your exams, but in case you consider yourself in readiness may I suggest an amusing way to waste a little time.

Take down your pipe or your old Virginia Cheroot, as the case may be, and light her up. Let your imagination run wild, so to speak, and call to mind all the graduating seniors that you possibly can. Now take each one separately and try to guess or surmise where he will be and what he will be doing this time next year. Of course you will have to wait a year to see the outcome in reality but you can see that it will be well worth your time by looking at last year's graduates. If this aspect does not appeal to you, then think of the time you have gained. You are not only ahead of yourself, you have even extracted a precious year from Father Time's supply.

I did a little accidental eavesdropping the other day. The conversation that I "overheard" was between a visitor to the campus and a State freshman. The inquisitive stranger had implored the somewhat surprised freshman to enlighten him as to the kind of coeds that attend State. The freshman shifted his position slightly and told the gentleman that the coeds were hotter than coal.

As I withdrew from hearing I wondered how the above conversation would look on paper, and here it is: Inquisitive Visitor: "Young man, just what kind of girls attend this college?" Ambitious Young Man (freshman): "Well! They are hotter than coal."

In reading a publication of a Northern school the other day I ran across an article written by a student who claimed that all the facts he gave were based on observations that he had made. The title of the manuscript was "College Professors."

While scanning the contents I ran across the following: "Some professors would make good, but other professors would make good wood."

An exchange issue of the *Parley Voo*, a periodical published at Converse College, in Spartanburg, revealed the fact that, either in lieu of something else to print, or that in printing they endeavor to print the most interesting things to the students, they run a column weekly that gives you the program and station over which the best orchestras on the air can be heard that week.

I for one would endorse such a movement at State College, and I don't feel that I would be alone in my endorsement. I am not in favor of this adoption simply because I have nothing more to do, but because it seems to be impossible for me to sit in my room at night without hearing at least three radios and if we all had a program we would have a better idea of what orchestra we are listening to from next door or below.

The readers of *THE TECHNICIAN* were last week informed that three insane men spent a few days in Seventh Dormitory. Well! To them, I guess it was news, and it deserved to be put on the front page. The readers of this column may consider themselves informed this week that the article was not new, for on request I can supply the name of quite a few crazy people who have been in Seventh Dormitory all year.

I have not heard when the campus elections are to be held but I will wager that they will be in the near future for you can already see the "extra" smile that the candidates are besting on all they meet. There are some few, however, that have shown enough good judgment to work for the office to which they aspire all year and on these few the nearness of

As the Bankers Take a Rest

the primaries has not caused such a pronounced change.

May I assume the role of a fatherly adviser and tell those that are new at this "game," that it is not always the man with the firmest grip, or the man with the friendliest smile, who will make the best man for the office.

I notice that Cliff Croom is rushing the season a bit by sporting a "cauliflower ear." Although, I must admit, it is not the most becoming flower he could wear, he should be given credit, for there are many on this campus that would have a swelling in the cerebral region instead of the ear if they were placed in his position.

A game that might prove most interesting to those like myself who

have never had the pleasure of writing checks when in need of money is to sit down and write a few. After you have acquired what seems to be a comfortable sum, in checks, go out and do as you please with them. Give them away, make bets with them and if you find a real sucker—pay debts with him. The catch in the whole scheme is that they are as good as anybody's checks in Raleigh. Even if you don't have a cent in the bank you are as well off as the man who has one hundred dollars, for neither one of you can get it.

If this condition continues I am afraid that a new word will make its

entrance into the profane words in the English language. That word is "BANKS."

How To Avoid BONERS

A MAYOR IS A FEMALE HORSE

AND you haven't heard the half of it! The other day Bill Boner said the Sphinx were a tribe of people living in Egypt!

Won't some kind friend tell him what to do before it's too late? What he needs is a good pipe and good tobacco. Of course, the right tobacco is necessary—but that's easy. A recent investigation showed Edgeworth to be the favorite smoking tobacco at 42 out of 54 leading colleges.

And here's why: Edgeworth isn't just another smoking tobacco. It's an individual blend of fine old burleys. And you'll know that difference with the first cool puff of Edgeworth.

Want proof before you buy? Then write for a free sample packet. Ad-

EDGEWORTH SMOKING TOBACCO

Coal... silk stockings... meat —and the telephone

Keenly aware of the problems of business, large and small, Bell System commercial men are constantly devising special telephone plans to custom-fit service to the user's needs.

For example, a plan they worked out for a coal distributor helped him to contact 50% more dealers. A manufacturer, using a telephone selling plan, sold 700 dozen pairs of hosiery through one Long Distance call. A great meat packer handles complex sales and distribution problems efficiently with the aid of planned Long Distance and private wire services.

Systematic telephone plans are helping many users to build business—cut costs—handle collections—unify nationwide organizations—increase profits. And Bell System men are seeking still other ways to make the telephone more useful.

Forty Candidates Turn Out For Varsity Baseball Club

Coach Doak Will Build Team Around Twelve Monogram Men of 1932 Club

TECH SCHEDULE CALLS FOR FIFTEEN CONTESTS

Shortstop Only Position Not Filled by Monogram Man; Brown Goes to Camp of St. Louis Cardinals; Seven of Last Year's Team Lost by Graduation; Doak Predicts Good Season Ahead; Club to Play Eight Home Games

About forty candidates have reported to Coach C. G. Doak for this spring's edition of North Carolina State College's varsity baseball team.

The Tech schedule shows 15 games, seven with out-of-state teams and eight with state clubs. The schedule is as follows:

- April 29, Washington and Lee at Raleigh.
- April 30, V. P. L. at Blacksburg, Va.
- April 11, Washington and Lee at Lexington, Va.
- April 12, V. M. L. at Lexington, Va.
- April 13, Virginia at Charlottesville, Va.
- April 15, V. P. L. at Raleigh.
- April 17, Wake Forest at Raleigh—(Easter Monday).
- April 20, V. M. L. at Raleigh.
- April 22, Duke at Durham.
- April 26, Davidson at Raleigh.
- April 29, Duke at Raleigh.
- May 2, U. of N. Carolina at Chapel Hill.
- May 13, Wake Forest at Wake Forest.
- May 15, Davidson at Davidson.
- May 20, U. of N. Carolina at Raleigh.

Coach Chick Doak will build his team around twelve monogram men of the 1932 club. Every position on the team is represented by this even dozen of players except that of shortstop and first base. The shortstop position was to be filled by Jimmy Brown, now the property of the St. Louis Cardinals of the National League. The first base job was left vacant upon the graduation of Captain Outen Gerock last spring.

"Snoozy" Morris, a Raleigh boy, will captain the team this year. He played short, second, and third last spring, but Coach Doak says he will be used as a hurler this spring. Rudy Seltz, veteran, will assist Morris with the pitching duties.

Other lettermen back are: Fuller and Farris, catchers; McQuigg, first base and outfielder; Wood, second base; Roach and Griffin, third base; Duke, Nelms, Jeffrey, and Avera, outfielders.

Reserves of previous teams are: Caution, first base; Leagans, second base; Marchese short; Dave and Cooper, pitchers; and Brewer, outfield.

Sophomore stars of last year's yearling team fighting for positions are: Lynn, Cox, and Rodwell, pitchers; McKinney, catcher; Bailey, first; Lambeth, short; Johnston, third; Oakden and Smith, outfielders.

Another prominent candidate for this year's team is Tom Hearne, third baseman. Hearne played minor league baseball last season and was not able to try for the varsity.

Coach Doak lost seven men from last year's squad. Those lost were Capt. Gerock, first; Wilkie, Ebey, and Brown, shortstops; Miller, catcher; Lanning and McLawhorn, pitchers.

The squad seems to be going along fairly well and Coach Doak predicts a good season ahead if the pitchers come through.

Due to the unsatisfactory shape which the diamond is in, the Doakmen are limiting their practice to batting. Fielding practice will start next week.

GETS CUP

Carroll Owens, star forward and center of the Mars Hill basketball team, was presented a small trophy cup for being the most valuable member to his team during the playing of North Carolina State's eighth invitational high school basketball tournament at the college last week. Mars Hill was defeated by Jonesboro in the finals of Class B.

Scrimmages

The first of a number of football scrimmages scheduled for State's gridirers this spring will be held Saturday afternoon of this week.

Coach John P. "Clipper" Smith said the scrimmage would be short as the men have only been in training for a week. Following Saturday's work, drills will be discontinued for a week so that the players might devote their time to term examinations next week.

FRESHMEN START BASEBALL WORK

Frosh Schedule Eight Games With Possibilities of Four Or Five Additions

A large number of candidates turned out for the freshman baseball team, and more are expected after the term examinations when the men who are at present engaging in spring football practice report.

From this squad of over sixty players, Coach Bob Warren will pick a team which will have a hard schedule before it. There are eight games scheduled with perhaps four or five more being added later.

The schedule: April 18, E. C. T. C. (tentative); April 22, Wake Forest, away; April 27, Carolina, away; May 3, Duke, away; May 6, Davidson, home; May 9, Carolina, home; May 18, Wake Forest, home; May 25, Duke, home.

The pitchers and catchers have been working out daily during the last week. The catchers include: S. Z. Seago, S. B. Holoman, Jim Statom, and Jack Fortune, while the pitchers are: Stuart Flythe, E. W. Cooper, E. W. Wilson, O. R. Freeman, and W. C. Brown.

Varsity and freshman track will be run on a small scale this year. No schedule has been arranged as yet.

Walk on Grass

When signs recently appeared on the campus of Washington and Jefferson College in Washington, Pa., saying "Please Walk on the Grass," students were inclined to put it down as the work of some wag. But Dr. Ralph C. Hutchinson, president of the college, revealed this week that the signs really mean what they say. "The campus belongs to the students," he said, "so why shouldn't they walk on the grass? I want to walk on it myself. I am more interested in the students than I am in the grass."

Teams Make Good Showing In Winter Term Contests

By ED RICCARDELLI

As the sport parade goes marching on it may be interesting to look over the records of the teams which represented State College during the past winter season. With three state championships and two southern titles tucked under their belts, the season can be labeled one of the most successful in years.

With only four monogram men returning for the hardword game, Coach Doc Sermon produced a team which accounted for eleven victories and seven losses. By winning four and losing four the Terrors placed third in the Big Five race. The most outstanding game of the season was their 42-23 win over Duke, state champions. Their six victories and four losses in Southern Conference competition gave them fifth place in the revised loop. The high light of this competition was the five victory sweep over Virginia schools.

With the backing of the Junior Chamber of Commerce, Dr. R. R. Sermon brought the Annual Southern Conference Basketball Tournament to Raleigh for the first time. The big turnout and favorable comments proved the Memorial Auditorium to be an ideal site for the coming tourneys. For the second consecutive year the Red Terrors were eliminated in the first round by a one point margin. Washington and Lee upset pre-tourney hope by taking a 35-34 win from the Techs. Last year Auburn defeated State, 34-33.

Immediately after the final game, Gilbert Clark was named All-Southern guard. Clark will deserve the honor. He was recently elected captain of the 1933 club.

Boxing

Next in the limelight came boxing, which was organized only a few years ago. Coached by Bill Beatty for the first time, the pugilists have made an impressive record, losing only one match and placing third in the Southern Conference tournament. Captain Charlie Garner lost his welterweight crown to Tom Fishbourne of Virginia in a fight which critics say the decision could have gone either way. The newly elected captain of the 1934 club, Bill Dunaway, lived up to expectations by kayoing his way to the 155 pound championship. Dunaway won all of his fights as a collegiate boxer and will soon leave for New York, where he will try to annex the 145 pound national title.

Baseball Mentor

COACH "CHICK" DOAK

The grand old man who starts his twelfth year as coach of baseball at State College. Doak coached the freshman team in his first two years here, but since then he has tutored the varsity squad. His team of the past have rated high in this section. Mr. Charlie has sent quite a few Techs to the Big Leagues.

year in tutoring the freshmen pugs this season.

The rifle team with Lieut. Venable as coach, is coming along with a record which we are rightfully proud of.

High Champs

Winners of the eighth invitational high school basketball tournament conducted by N. C. State College this past week were Trenton, class A, and Jonesboro, class B.

More than 100 schools sought admission to the tournament, but only 48 teams were selected—32 class B for rural schools and 16 class A for special charter schools.

SWIMMING TEAM TO ENTER MEET

State Tankmen to Enter State Meet at Duke University Saturday Afternoon

The varsity swimmers will be entered in the state meet at Duke Saturday at 3:00 p.m. In the Southern Conference tourney last week in Charlottesville, Va., they placed fourth.

The State relay team which is entered has been undefeated in two seasons. There are nine events, with the following men entered:

- Relay—Carter, Moorman, Dinkelspiel, and Shepherd.
- Breast Stroke—Peiffer.
- Back Stroke—Whitmarsh, Bagby.
- Diving—Shinn, Poyner.
- 50-yard Free Style—Dinkelspiel, Shepherd.
- 100-yard Free Style—Carter, Dinkelspiel.
- 220-yard Free Style—Stonebanks, Moorman, Shepherd, Whitmarsh.
- 440-yard Free Style—Stonebanks, Moorman, Whitmarsh.
- Medley Relay—Bagby, Peiffer, Carter.

GIRL DISAPPEARS IN THIN AIR

ILLUSION:

The Oriental girl reclines on a sheet of plate glass supported by two slaves. The magician waves a white sheet in front of the pretty maiden... pronounces a few magic words... Presto! She has disappeared in thin air.

EXPLANATION:

"Disappearing" acts are among the most popular in the repertory of the magician. Dogs, horses, girls, whole rooms disappear—whisked into wings, dropped through trapdoors, hidden by mirrors. But this "disappearance" is a bit different. One of the "slaves" is a hollow dummy. When the magician holds up the sheet the little lady disappears completely—into the convenient figure of the dummy.

IT'S FUN TO BE FOOLED ... IT'S MORE FUN TO KNOW

There is also a trick of cigarette advertising, whereby a few magic words are used to create the illusion of "Coolness." EXPLANATION: Coolness is determined by the speed of burning. Fresh cigarettes, retaining their full moisture, burn more slowly... smoke cooler. Parched, dry cigarettes burn fast. They taste hot. This makes the method of wrapping very important.

Improperly wrapped cigarettes begin to dry out as soon as packed.

Camels are cooler because they come in the famous Humidor Pack of welded, three-ply, MOISTURE-PROOF cellophane... and because they contain better tobaccos.

A cigarette that is fresh, full of natural moisture, and blended from choice, ripe tobaccos tastes cooler than one that is harsh and acrid. For coolness, choose a fresh cigarette, made from costlier tobaccos.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Try Camels... give your taste a chance to sense the difference. You'll appreciate it!

NO TRICKS .. JUST COSTLIER TOBACCOS

Beta Sigma Alpha

Members and pledges of Beta Sigma Alpha fraternity entertained at a house dance Saturday evening, March 4, at their home on Hillsboro Street.

Guests of the fraternity were: Misses Louise Pike, Hazel Beacham, Rose Hendrix, Betsy Senter, Clyde Cotner, Bee Cotner, Anne Robertson, Velma Wingate, Corine Gant, Jennie Senter, Ruth Pender, Frances Fleming, Elizabeth Mills, Grace Hubbard, Ethel Fuller, Alice Lee Pearce, Elizabeth Colwell, Sarah Mareburn and Mary Belle McMurray.

Chaperones of the occasion were Mr. and Mrs. W. R. Wingate and Mr. and Mrs. M. T. Jordan.

Alpha Gamma Rho

The Alpha Gamma Rho fraternity of State College entertained at a house dance Friday evening, March 3, at their home on Woodburn Road.

Prof. J. C. Ferguson and Romeo LeFort were chaperones of the occasion.

The young ladies attending were: Dorothy Dent, Bernice Goodwin, Frances Elgime, Mary Frances Croom, Lillian Covington, Julia Weathers, Mary Helen Stewart, Virginia Crockett, Athelene Thomas, Mary Bell McMurray, Lucy Mae Perry, Elizabeth Colwell, Ruth McCullers, Grace Hubbard, Mary Bell Asher, Virginia Williams, Hazel Beacham, Florence Frazelle, Elizabeth Maynard, and Helen Frazele.

Grange Dance

The Grange dance and bridge party will be held in the Grange Hall and Alpha Zeta room in Polk Hall Friday, March 10, from 8:00 to 11:00 o'clock. It was previously announced that this social function would be held Thursday night.

All State College Grangers and Alpha Zeta members will attend.

Announcements

Rings previously ordered will be delivered, and new orders will be taken in the "Y" March 30.

There will be a junior class meeting at 12 o'clock Wednesday, March 15, in Pullen Hall.

There will be a meeting of the State College Radio Engineers Club tonight at 7 o'clock.

J. T. Abernethy, President

There will be a meeting of Tompkins Textile Society Tuesday night at 8:45. Prof. T. S. Johnson will speak.

J. M. King, President.

The Old Dominion Club has postponed its dance which was to be held Saturday night to a future date.

Stanley Clevenger, Pres.

Attend Convention

Bill Hayes and Van Shuping attended a North Carolina Student Volunteer Movement in Greensboro Friday, Saturday and Sunday, March 3, 4, 5. Delegates from all schools of North Carolina also attended.

Hart Leaves

Jack Hart concluded his stay on the State College campus last Sunday. He preached at the United Church Sunday night.

He addressed the freshmen at their assembly last Friday. Saturday he attended a Y. M. C. A. supper, and Sunday morning he preached a sermon at the Christ Church.

DEAN BROWN OFFERS OPINION ON NATIONAL BANKING CRISIS

(Continued from page one)

The results of this hurried meeting was to declare a banking holiday for the nation for four days. He also called a special session of Congress to meet yesterday.

Dean Brown then presented some of the contributing causes of the present banking troubles of the nation. The Reconstruction Finance Corporation was formed to aid in bolstering the public confidence but instead was the cause of still further loss of confidence in the banks. The Corporation was supposed to loan only to institutions in good financial condition, but as soon as it was known that a bank had availed itself of a loan from this source, the public became suspicious of that bank and began to make heavy withdrawals.

The second act that cost the loss of much public confidence was the investigation of the Senate into the affairs of Mitchell, official of the National City Bank of New York City. Mitchell admitted drawing of a bonus of over a million dollars per year in addition to his regular salary of twenty-five thousand dollars a year for the three years, 1927 to 1929, inclusive. He also admitted to what since 1929 would be an evasion of the income tax by selling his bank stock to members of his family at a loss and buying it back after he had filed his income taxes at the same price, so as to show a loss in his income and lower the taxes that he would have to pay.

Dean Brown then compared the United States with Canada, which in the past three years has had no bank failures, while the United States has had over five thousand. Great Britain has had but two, and in both cases the depositors received all of their money.

In closing, Dean Brown quoted Senator McAdoo, former United States Secretary of the Treasury, who said, "The credit structure of the United States is a disgraceful failure, our entire banking system does credit to a collection of imbeciles."

The music for the assembly was furnished by Daddy Price's boys in the form of a "Little German Band."

W. F. Greenwood, chairman of the

dance committee, presented a plan to the class concerning a sophomore prom. He had worked out a system by which the sophomore prom could be held the same week-end of the junior-senior prom and these together would constitute a set. The dance would be held on the Friday night of the same week-end and a united sophomore-junior dance at a tea dance Saturday afternoon of that week-end.

The class voted its approval of this plan, and also it approved by voted of an admission price of seventy-five cents, which would also give those attending two bids to be given out to students other than sophomores. The matter of the dance being formal or informal will be taken up at a later date.

Garner Wins Radio

L. O. Garner was the winner of the radio offered by the Students' Supply Store in a recent contest.

Two drawings were made before the student body was found among those present there Saturday afternoon. Had Prof. C. S. Groves been present he would have won the radio, since his number was the first one drawn.

PROFESSOR DISCUSSES ORCHID CULTURE

(Continued from page one)

were obtained from thousands of seeds planted.

"Through experiments conducted in Europe it was found that the roots of all orchid plants in the wild state were found to be infected with a fungus similar to that causing an important disease of plants. It was thought by the European investigators that this fungus was essential to the growth of the plant.

"Dr. L. Knudson of Cornell University conceived the idea that the orchid fungus might be helpful only to the extent of making plant nutrients available in larger quantities for the orchid to use, and that if proper quantities of plant nutrients were provided, the orchid would have no need for the fungus. Dr. Knudson proved that if plants were placed in a medium containing all the necessary plant nutrients and a small percentage of Sucrose sugar that a larger percentage of the seeds will germinate as compared with the very small percentage of germination when the old method was used. This new method of propagating orchids has revolutionized the orchid growing industry.

"North Carolinians should take pride

in the fact that they have one modern range of greenhouses devoted to the culture of orchids according to the up-to-date methods," said Randall. This range of greenhouses is between Southern Pines and Pinehurst and is known as the Carolina Orchid Growers. The originator of this nursery is Judge William A. Way.

Agriculturist Nominees

The editor and business manager of the Agriculturist will be elected at a special business meeting of the club next week. The nominees for editor are D. M. Whitt, C. D. Thomas, and W. R. Smith. The nominees for busi-

ness manager are Olaf Wakefield, E. R. Daniels, and W. E. Adams. These men were not voted upon at the last meeting because they had not been passed upon by the faculty.

V. C. Herlocker resigned as Secretary of the Ag Fair and was elected vice president.

W. J. Parker was elected secretary to succeed Herlocker.

The present officers of the Ag Fair are as follows: president, R. R. Bennett; vice president, V. C. Herlocker, secretary, W. J. Barker; vice secretary, C. F. Henkel; and treasurer, F. V. Harris.

Don't you get Pipe Hungry

once in a while?

©1933 LIGGETT & MYERS TOBACCO CO. TEN CENTS

The Granger pouch keeps the tobacco fresh

"MAYBE it's back to Nature. Maybe it's something else. I don't know just what it is, but somehow or other I've just got to slip out in the woods and sit down on a log. I always take the old pipe along. Thinking somehow seems easier when you are smoking a pipe. I can fill up my pipe with Granger, and somehow just seem to see things clearer than at any other time."

"Don't know what it is about Granger, but it must be made for pipes—real pipe tobacco."

"Somehow, there's a flavor and aroma about Granger I never found in any other tobacco. When I pack my old pipe tight and good with these big Granger flakes, it's about the coolest smoke I ever enjoyed. It makes me downright pipe hungry every time I look at the package."

Some years ago we made a painstaking,

scientific study to find out, if we could, the kind of tobacco best suited for pipes.

Down in the Blue Grass regions of Kentucky, we found a tobacco called White Burley. There is a grade of this tobacco between the kind used for chewing and the varieties suitable for cigarettes that is best suited for pipes. This tobacco is used in Granger.

This tobacco is prepared by a method worked out many years ago by Mr. J. N.

Wellman. It gives Granger a fragrance and mellowness that pipe smokers like, and makes it burn to a clean, dry ash. Granger never gums a pipe.

Granger has not been on sale very long, but it has come to be popular, and there is this much about it: We have yet to know of a man who started smoking it, who didn't keep on. Folks seem to like it.

Liggett & Myers Tobacco Co.
