## EDITOR PRESENTS SERVICE AWARDS TO JOURNALISTS

J. Roy Parker, N. C. P. A. President, Presents Keys to Sixteen State Men

## DANIELS DELIVERS TALK PRIOR TO PRESENTATION

Parker Says One of Greatest Awards of Journalism is Meeting Public; Daniels States that College Journalism is Much Like Other Journalism; Frank Jeter Acts as Toastmaster; Banquet Held at Carolina Hotel Wednesday

By EUGENE KNIGHT

Featuring J. Roy Parker, president of the North Carolina Press Association, and Joseph Daniels, Jr., business manager of the *News and Observer*, as speakers, the three major publications at State College held the first annual publication banquet at the Carolina Hotel Wednesday night.

Keys were presented to staff members whose work on the publications had been outstanding by Mr. Parker. In his speech Mr. Daniels stated that college journalism and other journalism were much alike, and that college journalism had advanced along with other journalism during the past thirty years.

"In 1923 the newspapers adopted a code of ethics," stated Mr. Daniels. "In this was brought out the professional practices of papers. Good faith with the reader is the foundation of all kinds of journalism. This means that honesty with the news should be employed. Facts should be presented as facts, and opinions as opinions. It is not the make-up, or the type, or the attractiveness of a paper that gives character to the paper, but rather the policies of the editors in regard to facts and opinions. The place of college journalism will entrench itself into even a more vital place in the future."

In his brief talk Mr. Parker stated that one of the greatest rewards that come to a journalist is his contacts with people on the outside. Another reward he said "was the reward of seeing his job well done."

At the conclusion of his talk he presented the publications keys to staff members of the three publications. Those receiving keys and publication awards were: The *Technician*, Ernie Lassen, editor; John McIntyre, business manager; Eugene Knight, managing editor; Joe Abernethy, news editor; H. B. Hines, feature editor; and Ed Riccardelli, assistant business manager. The *Wataugan*, Dave Morrah, editor; Edgar Lowrance, business manager; W. H. Sullivan, Jr., assistant editor; and Colin Kerr, assistant business manager. The *Agromech*, Albert Couch, editor; Rawlings Poole, business manager; Hubert Todd, assistant editor; and Bill McCullen, assistant business manager.

Short talks by the heads of the publications were given explaining the purposes of their publications. Albert Couch, editor of *The Agromech*, stated, "The *Agromech* of this year will be entirely different from previous editions. The entire book will remain a secret until it is issued to the students."

Rawlings Poole, business manager of *The Agromech*, said that the yearbook this year will be the largest college annual in the South, and will have more individual student pictures than any annual in this section, due to the passage of the petition during the earlier part of the school year that established a uniform picture fee.

Ernie Lassen, editor of *The Technician*, thanked the staff for its co-operation, and stated that "all members of his staff were night owls."

John McIntyre, business manager of *The Technician*, echoed Lassen's statement in thanking his staff for its excellent work during the year.

Dave Morrah, editor of *The Wataugan*, said that his magazine was never late because he never let anyone know when it was coming out.

## MEREDITH GIRLS HOLD VESPERS SERVICE HERE

Members of the Meredith Y. W. A., led by Dixie Lee Hale, president of the Y. W. A., held a vesper service in the Y. M. C. A. auditorium here at State College Sunday afternoon.

Following several selections given by the Meredith quartet, Miss Ruth Tucker spoke on "Value of a Good Name" and the ease of acquiring a bad name.

The service was concluded with selections by "Lib" Lee.

## Presents Keys

J. ROY PARKER  
Keys were presented to staff members of the three major State College publications by the president of the North Carolina Press Association pictured above Wednesday night at a banquet given by the publications in the Carolina Hotel.

## FRESHMEN VOTE TO RETURN CAPS

Unofficial Vote Taken at Class Meet Shows Majority in Favor Of Headgear

The Freshman class at its meeting last Friday voted unofficially, 179-145 that they would be willing to wear the freshman cap the third term if the cap was brought back.

A general discussion was held prior to this vote during which various members of the Freshman class gave their opinion on the wearing of the cap. It seems that there will be a very close vote when the official vote is taken. President Gerlock of the Freshman class conducted the meeting and gave anyone in the class who wished to a chance to speak on the subject.

Some of the reasons given by the freshman for not wearing the cap are as follows: They would increase the hazing to a much greater extent than it is now; they would not bring back the amount of school spirit that the champions of the cap claim; that the caps were abolished one time as a bad institution; and that they would make the 'freshman conspicuous in any kind of trouble where a crowd of people was gathered.

Some of the claims that those who are for the cap make are as follows: They would make the freshman year mean more to the freshman; they would bring back school spirit to some extent; they would help to bind the freshman class together; and they would help to make the upperclassmen acquainted with the freshmen.

At a previous meeting of the class, Dean Cloyd had arranged for several of the leading students on the campus to make talks. Due to an unavoidable accident some of the men who were to speak for the cap were unable to be present and two freshmen were the only ones who spoke for the cap. At the meeting Friday one of the freshmen wanted to know why the class did not get a square deal at the preceding meeting. To this, great applause was given which was soon silenced by Dean Cloyd who told them that this discussion was on the Freshman Cap and not on whether or not they were getting a square deal. He then proceeded to tell them the reason there were not more speakers for the Cap at the last meeting. The meeting ended by a short talk from President Gerlock who said that he was very much in favor of the cap for several reasons, one, because he was so used to seeing in the northern schools. Further discussion on the subject was postponed until the next meeting when the vote on the cap will probably be taken.

## Exam Schedule

The exam schedule is as follows:  
Tuesday and Thursday classes at 10, Friday, March 16 from 9-12; Monday and Wednesday classes at 10, Friday, March 16 from 2-5.  
Tuesday and Thursday classes at 9, Saturday from 9-12; Monday and Wednesday at 9, Saturday from 2-5.  
Tuesday and Thursday at 11, Monday from 9-12; Monday and Wednesday at 11, Monday from 2-5.  
Tuesday and Thursday at 8, Tuesday from 9-12; Monday and Wednesday at 8, Tuesday from 2-5.  
Arranged examinations Wednesday, March 21.

## LEAGER STRESSES ECONOMICS STUDY IN HIGH SCHOOLS

Explains Important Part That Economics Plays in Present Day Problems

## PROF GIVES TALK OVER LOCAL RADIO STATION

Says Poverty, Unemployment, and Unequal Distribution of Income, Among More Important Economics Facing Country; Labor Must Be Expended in All Production; Constantly Increasing Use of Capital Goods in Production

The importance of training high school students in economic thinking was stressed by Prof. M. C. Leager, of the business school, in a radio talk over radio station WPTF Tuesday.

"Economics is the study of man's actions in the ordinary business of life; of man's actions while engaged in making a living," said Professor Leager. The study of economics is a tremendously important one because by far the greatest part of a man's waking time is spent in economic pursuits; in the making of a living. It is important, too, because so many of the problems which confront us today are economic in nature; for example, poverty, unemployment, unequal distribution of income. Because economic problems tend so strongly to tribulation of income. Because economics have been referred to as the "dismal science." However, recent economic thought has been directed toward alleviation of poverty, reduction of unemployment, and the more equitable distribution of the production of the people.

"It is self-evident before consumption can take place, production must be carried on. As the book of Genesis phrases it, 'In the sweat of thy face shalt thou eat bread.' One must work before he may eat. Man is the beginning and the end of production. He plans production. He undertakes the task of producing in order that he may have the means of sustaining life and enjoying it. In fact, production is the result of the cooperative effort of the factors of production; effort carried on under the supervision and direction of man.

**Factors of Production.** "The factors of production," explained Professor Leager, "are most often described as labor, land, capital, and management. Under the heading, land, are found all the natural resources as well as the land itself. Nature supplies all the raw materials which man fabricates into more useful forms. Production is really changing the form of material so that in its new form it can be more useful to man. Thus, the farmer raises a crop of wheat, which in its original form is of no use to human kind. It must be processed, made into flour and into bread, before man can use it. Production may also consist in changing the location of raw materials. As an example, coal is of no use to anyone as long as it rests in the mine. The act of bringing it out and shipping it to every city and home in our land is production because it makes coal usable.

"In all production, some labor must be expended. Nothing yet has been found to take the place of the miner in the production of coal. As an example, the greater portion of our agricultural products is the result of the application of human effort. Labor, then, is the important factor in production. There is a very close relationship between the amount of industrial production and the number of men employed in industry.

**Capital in Production.** Capital is the real factor in production. Men have found that more efficient production can be carried on when they use machinery than when they apply their labor directly to raw materials. Since the realization of this fact by industrialists, there has been a constantly increasing use of capital goods in production. The Industrial Revolution is the name usually given to the great change which was brought about in England by the introduction of machines in the textile factories. The use of machines as a labor saving device is a subject of never-ending debate. The question is whether in fact great numbers of men have been displaced by machines in industry. It is the problem of technological unemployment and it must be solved by comparing the long run with the short run view. It is generally admitted that, in the long run, the introduction of the automobile, the cotton gin, the steam railroad, and

(Please turn to page six)

## I.R.C. Speaker

C. B. HURREY  
The speaker pictured above will speak Monday evening in the Y. M. C. A. He is known as the "ambassador of good-will to fifty nations." He is being brought to State College by the International Relations Club and the Y. M. C. A.

## RELATIONS CLUB TO HEAR HURREY

Well-Known Speaker Will Talk In Y. M. C. A. Monday Evening At 8 O'clock

Charles D. Hurrey, secretary of the Committee on Friendly Relations with Foreign Students, who will visit State College as a guest of the Young Men's Christian Association and the International Relations Club, will speak at the Y. M. C. A. Monday night at eight o'clock on the subject of "Students and International Peace."

Mr. Hurrey who is called the "ambassador of good-will to fifty nations" has traveled extensively in foreign countries and has become acquainted with thousands of foreign students in this country. One of his many duties is to aid foreign students in getting passports and transportation from America to their homes.

During the depression hundreds of foreign students have been stranded in the United States. This committee has, through the cooperation of railroad and steamship companies, gotten them home at minimum rates, and when they had no money he has raised the necessary funds. The committee helped H. Hagopian get back to Egypt and also helped to minimize the charge and secure a passage from Shanghai for the sum of \$120, board and meals on the boat included.

According to the *World Associates*: "Few Americans have had such unique opportunities to ascertain the aspirations and opinions of other peoples. For twenty years Mr. Hurrey has made it his business to know what leaders abroad are saying about America. He knows personally, literally thousands of former students from all lands, who today occupy influential positions among their people."

"For three years Mr. Hurrey made his home in the great South American capital, Buenos Aires, and paid repeated visits to South and Central American countries. He crossed the Andes on mule-back and spent some time among natives of Paraguay and Bolivia. He has met and discussed international affairs with many Latin American presidents and other high officials. He speaks Spanish fluently.

"Among the high peaks of his thrilling experiences abroad are a reception by the president of China in the 'Forbidden Palace' of Peking; conversations with General Aguinaldo in his private library near Manila; glimpses of the Aborigines of Australia and New Zealand, and a motor trip across Tasmania. During the World War he served with the Italian Army and was under fire in Mt. Grappa and in the trench along the Piave River."

Mr. Hurrey has addressed many organizations in this country. He will speak to the Raleigh Rotary Club Monday, at which time the foreign students at State College will be guests. He will also speak to the students at Broughton High School Monday morning. Mr. Hurrey is a graduate of the University of Michigan and has been connected with his present work for about fifteen years.

**Southern Students Meet.** College students from Virginia, Tennessee, and North Carolina will attend the Southern Student Conference in Greensboro March 10 and 11. The principal topic of discussion will be the position of the Southern student in the 1934 crisis.

## CAMPUS LEADERS TO BE SELECTED IN SPRING TERM

Primary Election to be Held on Tuesday, April 10 in the Y. M. C. A.

## FINAL VOTE ON OFFICES TO BE HELD ON APRIL 17

Freshman Class Primaries to be Held in Pullen Hall Friday, April 6; Sophomore Group to Name Candidates at Meeting Wednesday, April 4; Juniors to Name Candidates for Positions On April 4 at 1:30 in Pullen Hall

Candidates for the presidency of the State College student body for 1934-35 and various other major campus officers will be nominated at the primary elections which will be held on Tuesday, April 10, in the Y. M. C. A. It was decided at a meeting of the Student Council Wednesday night in Holladay Hall.

Class primaries will be run by the freshmen on Friday, April 6 at their regular meeting in Pullen Hall. The sophomores will name their candidates for the Student Council and the House of Student Government at a meeting in Pullen Hall on Wednesday, April 4 at 12:00, and the juniors, or the incoming senior class will name their candidates for positions on April 4 at 1:30 in Pullen Hall.

After the popular nominations on April 10, the officers will be elected at the finals on April 17.

The following officers will be voted on: President of the Student Body, Vice President of the Student Body, Secretary and Treasurer of Student Government, President of the Interfraternity Council, Editor and Business Manager of *The Technician*, Editor and Business Manager of *The Wataugan*.

The Student Council voted to install an amplifying outfit in the dining hall at the cost of \$125, to be used for the entertainment of students and for announcements. Barker said Thursday morning that this was an achievement by which the 1934 Student Council will probably be remembered.

Barker said that this year the Council had handed over to the Student Loan Fund \$150, the largest sum which had been contributed for several years. Each year the Student Council has moved to sponsor a dance or a moving picture, funds from which would be used for the Loan Fund. A movie at the State Theater which was shown for this purpose at the beginning of the school year showed no proceeds; but economies which have been undertaken by the present Student Council have made possible the surplus. The Student Loan Fund is handled by a committee of three, Dean of students, E. L. Cloyd; Polk Denmark, secretary of the Alumni Association; and Bill Barker, president of the Student Body. Amounts not to exceed \$50 are loaned to respective students, excluding seniors.

After elections, the new president of the Student Body and a member of the Council appointed by that body will attend a convention of the Southern Federation of Students in Atlanta.

Barker said that the best dormitory president will next term be given a medal as an appreciation of his work. This medal to be called "The Student Government Service Medal." He said that the following points will be considered in judging the man: (1) attendance of the dormitory president at Student Government meetings; (2) the condition of the section of which the student has charge as will be determined by the superintendent of buildings upon inspection of the buildings; (3) participation in intramural sports; (4) miscellaneous—the cooperation shown by the students under the president and what his section has done to better the campus. The different points will be graded thus, respectively: 20, 40, 25, and 15 per cent.

## NEGRO REGIMENT SINGS OVER STATION SATURDAY

Colonel Bruce Magruder has just received an announcement from the headquarters of the 8888 Central Postal Directory located at Fort McPherson, Atlanta, Georgia, that the Glee Club of the 24th Infantry composed of seventy-five voices is scheduled to broadcast a thirty-minute of "spirituals" from radio station WSB at 4:30 p.m., Saturday, March 10.

The twenty-fourth infantry is a colored regiment. Colonel Magruder hopes that this program may prove entertaining to those who especially like negro spirituals.

## STUDENTS BEGIN INTENSIVE WORK ON RELIEF JOBS

One Hundred and Thirty Now Employed on Projects on State College Campus

## SHEPHERD TO COMPLETE ENROLLMENT THIS WEEK

Maximum Number of Students to Be Employed is 148; Government Deposit Expected in Treasury at Any Time; Work Varies From Coal Passing to Biological Experimentation; Shepherd Announces Allotments; Time Records Being Kept

One hundred and thirty students are now working in departments of the college making practically every type of improvement allowable by the Federal Emergency Relief Administration regulations governing the use of \$2,220 which will be delivered to the college every month by the Government beginning March 5 and to continue until June 1.

According to M. L. Shepherd, head of the State College Self-Help Bureau, students will have the privilege of working during the spring vacation, providing that their instructors give them necessary projects on which to work. The average pay which is being given students is thirty cents an hour, with a maximum allowable wage of \$20 per student a month.

The maximum number of students which may be employed at State College under FERA regulations is 148, and Shepherd said last night that eighteen more will be employed before the end of this week to complete the list. He said that the Government has not yet made a deposit in the treasurer's office of the scheduled allotment, but this will be made at any time.

The types of work being done vary from coal passing to "making culture media for the determination of culture characters of the raspberry bacterial blight organism," and from painting laboratory equipment in the Cereamics department with aluminum paint to cutting stencils in the extension division. Col. J. W. Harrelson has asked for assistance in budget studies being undertaken by the General Policies Committee, and four men have been delegated to aid him, while the Agricultural department has been allotted thirty-seven men to carry on work in carrying on experiments in that field, transferring plants and cultivating stock for the proposed arboretum which is in the process of development, tabulations and filing work.

Shepherd said last night that the following allotments have been made to departments for the employment of students: Engineering department, \$75; School of Science and Business, \$45; School of Education, \$13.75; Textiles department, \$15; Dining Hall, \$28.50; Physical Education, \$37.50; Home Economics department, \$3.75; Registrar's office, \$7.50; Library, \$33.75; General Policies Committee, \$15; Self-Help Bureau, \$15; Agricultural department, \$18.75; Alumni office, \$7.50; Military department, \$37.50; Music department, \$7.50; Extension division, \$7.50; Athletics department, \$7.50.

Time records are being sent to each department. Any funds allotted to respective departments which are not used during the employment week beginning any Monday and ending the following Monday revert to the general allotment fund. Every student who is qualified for FERA employment is being issued a certificate bearing the signature of M. L. Shepherd, Self-Help director, and only students bearing these certificates may be employed in the work. The committee at State College in charge of student employment is: Dean E. L. Cloyd, Prof. T. S. Johnson, and M. L. Shepherd.

Dean Thomas Nelson head of the Textile School, will attend a meeting of the Heads of all the Textile Schools in the United States, in Boston, Massachusetts, March 12 and 13.

A survey has been made of all the Textile Schools in the United States which will be presented at this conference. Men from all parts of the country will be present at this meeting and it is hoped that much will be accomplished that will benefit Textile Engineering in the United States. Dean Nelson says that although the conference will not last long, many things of interest to the Textile world will be discussed.

## DEAN NELSON TO ATTEND TEXTILE MEET IN BOSTON

Whether or not this plan is continued will depend upon how well the students cooperate in the matter of securing their registration cards immediately upon their return. Students who desire to avail themselves of this privilege should go to the Treasurer's Office sometime during examination week, and they will be given cards indicating that they are entitled to register. They should bring these cards to the Registration Office on Wednesday, March 28, and secure their registration cards.

## Registration

The Faculty Council at its meeting on March 6 approved advance registration for students who do not have any changes to make in their rosters for the third term. If their accounts are clear with the Treasurer. However, students who avail themselves of this opportunity must secure their registration cards on Wednesday, March 28.

## PROF ANNOUNCES COURSE CHANGES

Vaughan Releases Proposed Changes in Mechanical Engineering Curriculum

Prof. L. L. Vaughan, head of the Mechanical Engineering department, yesterday announced some of the proposed changes which have been made in the curriculum for that course. The changes have been passed by the faculty of the Engineering department and by the Faculty Council, and will be effective beginning the next school year, if passed by the Greater University Board of Trustees.

An extra credit hour a week has been added to the mathematics courses for the freshmen in Mechanical Engineering. This will make the total hours of mathematics—Algebra, Trigonometry, and Analytical Geometry, 6 hours per week instead of five, as before. Shopwork has been completely withdrawn from the freshman schedule to allow for this change.

Sophomores will be required to take three hours of Calculus for three terms instead of five hours, as before, and physics will be dropped off one hour, leaving four hours a week of physics, for three terms. There will be two hours of metallurgy instead of three, but in place of the shopwork which has ordinarily been given in the freshman year, as a one-point course, three hours will be given in this year.

The junior curriculum will have added an average of two hours. Whereas a total of 17 credit hours of work a week was required during the fall and spring terms, and 19 during the winter term, 20 hours will be required. Accounting and Sociology will be dropped in that year, and three credit hours of Economics for three terms will be given. The courses, Materials of Construction and Strength of Materials have been added to the junior year.

Prof. Vaughan said that should a student feel that he would want to take Accounting, this could be done through the three credit hours of electives which will be allowed each junior.

Six weeks of industrial employment will be required between the junior and senior years.

In the senior year, engineering thermodynamics will be substituted for Gas Engines, a one credit hour course, and one extra hour will be added in Machine Design, to change it from a 2- to a 3-hour course.

A three weeks camp for instruction in surveying has been added to the sophomore year curriculum. Prof. Vaughan said that in addition to giving the students more experience in surveying than was afforded by the 2 credit-hours course heretofore given in the winter term of the junior year, this requirement will offer a better opportunity for students to make up courses which they have failed in summer school during the camp, and three weeks following.

### Sports Views

By BROCK SISELL

With varsity basketball, boxing, wrestling and swimming activities at State closed for the season, one will find after looking over the records that the State teams made a more creditable showing than many people had expected at the beginning of the season. The highlight of the season was the two members of the wrestling team winning championship honors in their weights in the Southern Conference, and the team winning the Big Five championship.

Next in the limelight was the spectacular play of the Red Terror basketball team in winning 11 games and losing only 5—not to forget the thrilling upset of the South Carolina Gamecock team in the Conference tourney for the Gamecocks' first loss in 31 consecutive starts.

The boxing team should come next in recognition. It won three matches, tied one, and lost one—an altogether impressive record even tho it failed for the first time in three years to place a champion in the Southern Conference. But State can be consoled in the fact that it tied Carolina for the Big Five championship.

The swimming team made a credit-

### High Scorers

Joe Sawyer, Washington and Lee's All-Southern forward, scored seven points in his team's victory over Duke in the finals to take the individual scoring championship of the 1934 Southern Conference tournament.

Sawyer's total of 38 points was 12 better than Jim Thompson of Duke. Thompson hit the basket for 10 points and raised his total to 26.

However, Leroy Jay of N. C. State had, next to Sawyer, the best average for the tournament. In the two games he scored 22 points for an average of 11 fumbles a game. Sawyer's average was 12 2/3 points per contest.

The six leaders:

Sawyer, Washington and Lee	38
J. Thompson, Duke	26
Mack, Duke	24
Smith, Washington and Lee	22
Jay, N. C. State	22
Alken, North Carolina	21

able showing regardless of the valiant struggle it had to make because of not being supported by the college athletic department. The final record was 5 wins and 3 losses. The best meet of the season was the win over the Duke tankmen here and probably the most heart-breaking loss was the nosing out of the State team in a return engagement at Duke.

Last but not the least in this review is the impressive record of the State rifle team. Although it still has several engagements scheduled, it has already copped the Big Five title and according to the R. O. T. C. Fourth Corps record it stands fifth in Southern rating in telegraphic matches shot this winter.

The winter season is now history. The only lull in athletic events will be the transition period—exams and spring holidays—and then the balmy days of spring opening up new vistas in a change of sport activity with baseball, track, tennis and golf taking the lead at State. What will State teams do in these sports this season? Only time will tell. Regardless of how many games are won or lost next term, State should be satisfied if its athletes continue its clean play and the high grade of sportsmanship which it has shown in past engagements.

### STATE GOLFERS BEGIN INVASION OF VIRGINIA

The N. C. State golf team will open its season with a trip to Virginia during the Spring holidays. The following teams will be played: Hampden-Sydney, March 22; Washington and Lee, March 23; University of Richmond, March 24.

Besides these matches, thirteen more have been booked for the spring term, of which eight are listed as home matches. Due to the financial aid given the golf team by the student order of 30 and 3, it has been able to make a full schedule this spring for the first time since the organizing of the team several years ago.

Coch Ben Venable will select four men out of the following to make the trip: Fred Newnam, Captain Pat Pastore, Charles Styron, Earl Rion, Bill Berthlein, Fritz Southerland, and Jimmy Poyner.

The Golf team plans to enter the State and Southern Conference golf tournaments this spring. Dates for the tournaments have not been definitely decided on yet, but they will be announced in the near future.

The freshman golf team has scheduled several matches for the spring. Promising members of the team are: Palmer, Scales and Caution.

### HIGH SCHOOLS INSPECTED BY VOCATIONAL STUDENTS

Four students of the Vocational Art Department went on a tour of inspection of Burlington, High Point, and Greensboro high schools last week. The tour was conducted by Professor Boshart.

This inspection tour included the High School of Industrial Arts in Burlington, three junior high schools and one senior high in Greensboro, and the junior and senior high in High Point.

Students who made the trip are E. L. Stinson, A. S. Johnson, Stevenson and Barringer.

## STATE DEFEATED IN SEMI-FINALS

State Quint Loses 28-32 After Defeating Gamecocks in Preliminaries

By HALL MORRISON

N. C. State's Red Terrors were closely defeated by four points by the Washington and Lee Generals in the semi-finals of the Southern Conference Basketball Tournament at the Memorial Auditorium here last Friday night after they had defeated the strong University of South Carolina team the previous night in an upset. The Washington and Lee team, the dark horses of the tournament, showed a classy brand of basketball in their defeat of the State quint by the score of 28-32, and then they went on to win the tournament title by defeating Duke in the finals Saturday night. The State-Washington and Lee game was played before a capacity crowd of 4,500 basketball fans, who crowded into every available space in the Memorial Auditorium.

Sawyer paced the Generals throughout the game and produced a stellar brand of offensive and defensive ball. He led scoring with four field goals and five free throws to tally 13 points for his team. State did not have one outstanding performer in the game, but Leroy Jay and Stuart Flythe

played a fine brand of ball for the Terrors.

Play between the Generals and the Terrors was fast and furious throughout the entire contest, but the Generals turned the tide in the last few minutes of the second half to thrill the audience and gain a place in the finals. The score was tied twice during the first half and each team had the lead twice. State led by a 16-11 margin when time was called at the half.

But after State made another field goal in the opening minutes of the second half, Washington and Lee scored ten points before State could make another tally. State regained the lead however, and with four

minutes to play, the score was 27-23 in the Terror's favor. However the Generals made another spurt and scored nine points to two for State. Jay made a free throw for the final score of the game, but the game ended with the Generals ahead 32-28.

### Band Concert

Gratified with the increasing interest in the occasional programs presented by the band, orchestra, and glee club, the band will present another concert Sunday afternoon at 4:30 in Pullen Hall.

Sunday's program combines the merits of musical worthiness, education and entertainment, and Major

## CODE OFFICIALS HEAR DR. GRAHAM

Says Consumers Will Not Pay Excessive Profits Based on Padded Costs

Dr. Frank P. Graham, president of the University of North Carolina, and vice chairman of the National Consumers' Advisory Board, made a decided hit with his speech at the opening session of the NRA conference held in Washington, D. C., this past week.

The code authorities of the National Recovery Administration were warned that the nation's consumers are "everlastingly unwilling to pay for the excessive profits based on padded costs and dishonest prices wearing a social cloak over their economic hypocrisy."

Graham stated that "the NRA must not mean a more powerful manipulation of the unorganized consumers in the interests of the organized producers." He announced that the board will present a dozen major proposals for the protection of the consumer later in the week.

"The talk of free competition, in either the old competitive society or in the later industrialized and more corporate society protecting the consumer leaves the people cold. They turned away from that talk in a dark time to the NRA with its proposals not for the free competition dominated and degraded by unrepresentative and the unscrupulous chislers but with its proposals for fair competition based on a minimum wage and maximum hours as the bottom conditions of a decent life to which fair-minded business men can subscribe without having their throats cut."

"If recovery," Graham continued, "means merely the recovery of the old false prosperity then recovery is but the prelude to a crash, vaster and more terrible. With a fairer deal to the farmers, decent wages, hours, and conditions for the workers and more security in the work and homes of the people, what an economically productive, socially balanced America, and spiritually beautiful America, our people can plan and try to build in our time."

Dr. Graham's remarks came on the heels of a recent study made public only over the protest of Recovery Administrator Hugh S. Johnson, in which the board found a threat to consumer interest in the NRA program. His speech was regarded as an indication that the consumers body means business in its attempt to gain recognition within the recovery administration.

## PHI KAPPA PHI MEMBERS TO RECEIVE FELLOWSHIPS

The local chapter of Phi Kappa Phi, honorary scholarship society, announces through its president, Professor A. F. Greaves-Walker, that two fellowships paying \$500 each are available to student members of the society who are interested in pursuing graduate work in any American university next year.

The rules governing the award and application blanks may be obtained from Dr. Karl C. Garrison, secretary of the chapter.

Applications must be in the hands of Dr. Garrison by March 10.

Professor Greaves-Walker is desirous of having any student member of the State College Chapter who is interested call on Dr. Garrison at once.

## ELECTRICAL PROFESSOR EXPLAINS VACUUM TUBES

K. B. Glenn, professor of electrical engineering, gave a talk on the performances of vacuum tubes at the meeting of the American Institute of Electrical Engineers Tuesday night, March 6.

J. F. Abernethy, student of electrical engineering, talked to the group on the subject "How a Power-Supply Works." "Red" Troxler rendered a few selections on his guitar.

Norman York, chairman of the society, discussed the plans made by the society for the Engineers' Fair and is urging that all the members cooperate in making the Fair a success.

## D. M. WHITT IS ELECTED PRESIDENT OF AG CLUB

The following men were elected as officers for the Spring term at the last AG Club meeting: D. M. Whitt, president; J. D. Leaden, vice president; G. R. McCall, secretary; C. L. Davis, treasurer; and Charles Matthews, reporter.

## Class Rings

Orders for class rings will be taken Thursday, March 15, in the Y. M. C. A. from 7:45 a.m. to 6 p.m.

All juniors and also seniors who did not secure rings last year are urged to have their measurement taken at this time. There will be a \$3 deposit at the measurement, the remainder to be paid at the time of delivery. The names of eligible juniors will be posted on the bulletin board. Those whose names are not on the list are asked to see Claud Farrow, president of the junior class.

## ALUMNI MONOGRAM MEN TO FORM ORGANIZATION About 400 Expected to Join Club To Foster Better Feeling Among Athletes

Alumni monogram athletes of N. C. State College will gather here tomorrow for the organization of a general monogram Association. Buch Buchanan, president of the student Monogram Club at State, announced this week.

Members of the Monogram Club have been at work for several days laying plans for the organization of such a club which is expected to include a membership of nearly 400. Buchanan says the purpose of the organization will be to foster a better feeling among alumni monogram men and student athletes.

Buchanan says letters urging their attendance have been sent to more than 400 former State College athletes in all branches of sports and that many favorable replies have already been received.

The organization meeting Saturday will be held at noon and in the afternoon former athletes will join with student athletes on Freshman Field where they will watch Coach Hunk Anderson send his football candidates through the final winter grid scrimmage.

"If recovery," Graham continued, "means merely the recovery of the old false prosperity then recovery is but the prelude to a crash, vaster and more terrible. With a fairer deal to the farmers, decent wages, hours, and conditions for the workers and more security in the work and homes of the people, what an economically productive, socially balanced America, and spiritually beautiful America, our people can plan and try to build in our time."

According to Buchanan a nominal fee will be charged for membership in the General Monogram Club and this money will be turned into a student loan fund.

Dr. A. J. Wilson, head of the chemistry department at State and one of the greatest halfbacks in the school's history, is directing the organization plans.

## PROF. DIXON TO OFFER COURSE IN ELECTRONICS Course Pertains to Operation of Different Types of Vacuum Tubes

A. A. Dixon, professor of physics, has announced that beginning next term he will teach a three-hour course in Electronics.

Heretofore no such course has been available to the students and it is hoped that students interested in such a course will take advantage of it the spring term.

The course will be taught at the noon hour and a laboratory to be held on Thursday afternoon if possible.

Electronics pertains to the operation of various types of vacuum tubes, and the uses and characteristics of each type. This course should appeal especially to electrical students.

Professor Dixon is now completing work on the arrangement of the course and the various experiments he hopes to perform in the laboratory.

At present there is not enough equipment in the physics department to fulfill the requirements of the course, but it is understood that equipment will be ordered in the near future.

Those who might be interested in the Electronics course are being advised to confer with Professor Dixon.

## OLSEN ADDRESSES CIVIL ENGINEERS

Consulting Engineer Gives Things He Would Do If Again a College Student

Giving the things that he would pay particular attention to if he were again in college, W. C. Olsen, consulting engineer, spoke to members of the student chapter of the American Society of Civil Engineers Tuesday night.

His remarks were based upon twenty years' experience as a consulting engineer.

A few of the suggestions that he offered to the student were the training and practice of being able to get up before a group of men and talk intelligently on engineering subjects. He cited several instances when it becomes necessary to persuade an audience of city officials in the adoption of some municipal enterprise. Another aspect mentioned was the complexity of modern Engineering and the necessity of an engineer to have a practical knowledge of all phases of engineering. The point was stressed that no engineer could divorce himself from all engineering fields except that of his own, an example of which was the construction of a water supply plant. The specifications for the construction of such a project must include every phase of the engineering field. One particular point Olsen mentioned in regard to the student engineer when applying for positions was their failure in having been educated along both the theoretical and practical lines. He offered the suggestion that the student, if possible, correlate his practical work along with his theoretical training.

After his talk a short business session was held. Progress in the way of a float and exhibits for the forthcoming Fair was reported, and plans were laid for the entire Student Chapter to attend a convention of the state chapter of the A. S. C. E. to be held at Pinehurst the latter part of April.

## Announcements

All editors and business managers of the three major publications will please meet with me in the Dean of Students office at 4 p.m. Tuesday, C. R. LeFort.

The Sophomore Assembly meets next Wednesday, March 14, at twelve o'clock in Pullen Hall.

The radio club will meet tonight at 7 o'clock.  
Joe Abernethy, President.

## Check Absences

Students may see their absence records in the office of Dean E. L. Cloyd in Holladay Hall any time during examinations next week. The last day to see the records will be March 21.

Dean Cloyd wishes that all students check up on their records to see that no mistakes have been made. He also asks that professors with reports to make on back absences hand them in before exams.

Since changes were made in restrictions on class cuts, it is necessary that students keep close check on their absences.

## ALUMNI DISCUSS PLANS TO REJUVENATE CHAPTERS

The first meeting of the Alumni Council was held last Saturday morning. Representatives from Charlotte, Greensboro, Durham, Atlanta, and many other chapters were present.

The purpose of this meeting was to create ways of rejuvenating the chapters. To bring this about it was suggested that the name of the organization be changed to State College Guild-County Club. It was thought that by doing this there would be more interest created among the non-graduates.

President W. A. Sullivan was requested to appoint a special committee to handle definite matters and to make recommendations to general alumni at commencement.

These actions may result in a complete revamping of the chapter.

## Promotes Better Gardens

Gratifying results have been obtained from the work of the State College horticultural extension service in promoting better gardens and orchards, according to E. B. Morrow, extension horticulturist for the eastern half of the state.

## MILITARY DANCE WILL BE LARGER

Annual Ball Given by Military Department to be Held in Gymnasium April 13

A larger and more elaborate military ball than has ever before been held at State College is being planned for April 13 by students taking R. O. T. C. and A. Committee met Tuesday in Holladay Hall to hear Bill Barker report on plans that are in progress for the dance. Fifteen committees will be appointed from among the military students to take charge of the affair. Young ladies from all over the state will be present, and students from nearby military schools will be invited to attend.

Barker, who is president of the State College student body, and Lieutenant-Colonel on the student staff of the regiment, is chairman of the central dance committee.

Sub-committees will be taken from each of the three battalions comprising the regiment. The following are some committees that will be named: Publicity Committee, Chaparrone Committee, Reception Committee, Decorations Committee, Lighting Effects Committee, Entertainments Committee, Figure Committee.

Col. D. L. Bohannon has written to several large military schools including West Point, asking for suggestions as to a suitable figure to be gone through by the soldiers and their ladies, and one will be worked up which it is expected will not be rivaled by any given by military students.

## W. R. BUCHANAN EMPLOYED BY LOCAL POWER COMPANY

W. R. Buchanan, graduate in the 1933 class in Electrical Engineering, has recently been employed by the

Carolina Power and Light Company. Buchanan is to assist in making an inventory. This makes a total of nine State College graduates in Electrical Engineering that are working with this company.

## WAKE FOREST FIRES

An interesting example of trying to do something and getting nowhere is the efforts of the Wake Forest police in trying to find the pyromaniac who has been going about burning up Wake Forest property and leading bloodhounds and insurance investigators a merry chase through dormitories and the surrounding countryside. The adventures of those searching for the one guilty of arson sounds much like a Sherlock Holmes story except for the fact that Holmes' stories were usually planned in such a way as to make the climactic apprehension of the criminal a seemingly simple matter.

The bloodhounds would leave little doubt in anyone's mind that the criminal was either a student or not a student. In either case, he could have strolled about the dormitory, leaving his trail for the bloodhounds to follow to every room in the building. Evidently the bloodhounds could not smell or by other means know his personality.

Events such as have occurred at Wake Forest always bring about rumors which, whether credulous or not, are interesting. While we were browsing about the Wake Forest college campus last Sunday we met a student who was seemingly not averse to speaking openly to strangers and divulging what he said was a secret among some students. This student, when asked, said that it was a "funny thing, but the two students being questioned that day by the police were not the same ones who were suspected by the students." He stated that the one suspected by the students, on the morning of the fire which was discovered in Hunter dormitory had borrowed some matches from a fellow student, and when the fire was discovered had appeared fully dressed. The student to whom we spoke said then that the police knew nothing of the suspicions.

Meanwhile the fire-bug has had an enjoyable time, and the insurance company has begun to build a new Wake Forest College.

## RETROSPECTION

The 1933-34 Student Council formally closed its regime Wednesday night, and was then told that Student Government this year was able to donate \$150 to the Student Loan Fund, the largest in many a year. This was made possible through economization and the saving of other routine expenditures which have in the past left very little to the Loan Fund out of the Student Activities Fees. Those handling the matters of economy are indeed worthy of praise for this.

Bill Barker, president of Student Government, should be praised for his efforts at reducing expenditures in foregoing many of the pleasures which have in the past been open to heads of the student body. He has been more concerned during the past year in working for the students than for his own good, as so many will when given opportunities open to a man in a major office such as his is. It was largely due to his leadership that an amplifying system will be installed in the college dining hall, for the entertainment of students as well as a means of drawing men to the hall.

Whereas last year, approximately \$550 was spent in sending two men to a student convention in New Orleans, the Council this year did away with the trip. Barker would have attended this meeting, but he worked as hard as any member of the Council toward taking away the privilege. His unselfish efforts should be commended highly.

The student body of State College wishes to extend its heartiest welcome to the high school students that are living with it for these few days.

When approximately five hundred students suddenly find themselves on a strange battleground together with over 1,400 others, mostly strangers, it often happens that the strangeness of something new and entirely different is a little too much even for the best mixers. However, here's our hand and our hospitality; and we hope you high school boys will take them in the spirit they're given.

Make yourselves at home, fellows, and enjoy your stay. There are no strangers on the State College campus.

## COMPULSORY READING

A move toward the cultivation of the reading habit by students at the University of the South, at Sewanee, Tennessee, was recently begun by the faculty there, when the group decided that as a part of the comprehensive examinations that students must take before being given degrees, an examination on twenty books would be required. Here is an example that might well be followed by all colleges, especially technical, where graduates leave with minds crammed with formulae, but with little knowledge of the potential powers in the printed page.

Several weeks ago an editorial appeared in this column advocating that students use the State College library, for at a technical school such as ours the advantages of good reading matter are seldom realized, and it is for the benefit of the undergraduate to pay some attention to his culture along with the practical and theoretical phases of technology. A cartoon accompanied the editorial. It was not long before THE TECHNICIAN received a letter from an employee of the library who evidently had seen the cartoon and had not read the editorial, explaining that there were no cobwebs on the library door, as the cartoon might have led some to believe, and attacking our viewpoint, as he saw it, and at the same time corroborating our attitude. Here is a man who must be among books, but who has not yet adopted a habit of examining more closely a printed page to find the explanation of its contents. From his statements, his association with books had done him very little good as yet, showing that the environment does not necessarily determine the "reading habits" of a student. The only way of bringing the benefits of reading before a technical college student seems to be by force, as the instructors at the Sewanee university are doing.

An editorial in the *Sewanee Purple*, student publication of that school, states that the idea has met with much favorable comment from the student body. The editorial continues:

The majority of the students find that their regular lessons and the large amount of outside activities keep them from a habit of reading books other than those which are required by their professors. Even students who were in the habit of reading extensively before entering college find that the many interests at Sewanee deprive them of the necessary time for leisurely reading of the books in which they have become particularly interested. Many students do not read the newspapers at all, finding themselves ignorant of the news events of the world.

Ten books of the list are to be prescribed by the faculty for the individual student, while he will be permitted to choose any other ten from the list of one hundred. The designation of some required reading in this connection will insure the reading of at least ten books in the field in which the student is concentrating. The others will be left to the taste of the individual, and his choice will indicate his particular interests.

Many of the seniors who will receive degrees in June have criticized themselves recently because of the fact that they have not had or taken the time to cultivate a habit of reading. Several of these men have started now, during their fourth year in college, realizing that they would have benefited a great deal more if they had begun in their first year.

Changes which are being made today in the general world set-up will mean much from the educational standpoint. Changing world conditions are an education in themselves, and the better read a man can be while in college on present social problems and their improvements and the reconstruction era of the present, the higher will be the plane from which he can travel upon graduating.

The reading of 20 books from a suggested list made out by the faculty in the English department might also be made compulsory for graduation at State College as a method of furthering the use of library facilities as well as advancing the cause for paralleling culture with a technical education.

## A NEW LIGHT

A general clean-up of the campus has suddenly begun. Frenzied efforts at securing aid for arranging files, moving cabinets, mimeographing, and countless other forms of work are bringing to light new activity on the part of students—all made possible through Federal Emergency Relief Administration money to be paid out to needy students in such a manner as to take away the blues from the most downhearted.

A bright light of energy has been switched on, and at the button is the United States Government supported by the taxpayer, its rays throwing invigorating power toward a brighter outlook compensating for any heat losses which may be suffered through discrepant misuse of some funds.

It is well that those of the younger generation who were "down and out" as far as money matters go but who still retained a spark of the necessary zeal to take them through part of their college days on practically nothing have at last been recognized as necessary links in the chain of civilization and are now being given opportunities such as have perhaps never before been open to others of their age. Here is a chance to get good clean cash without bowing and scraping, but through channels which offer a student at the same time an education into the elements of his chosen vocation through the practical work open to him.

At the same time, the sluggishness which had arisen during the standstill of occupation is slowly giving way, and with increased activity we are watching a nation arise and plan.

The Publications Board is drawing up a new constitution which will be constructed from ones used by like boards of other colleges throughout the United States. State's publications will have firmer ground to stand on after some final rulings are set up as to the powers of their board which have heretofore been questionable.

It is necessary that the board be able to pass judgment on conflicting publications, and this can only be done when the scope of its powers can be definitely established.

## HERE AND THERE

By G. W. FORD

Well, it's here at last . . . good old spring time with all of its birds, bees, flowers, and furs. Remember that song that went, "When you see the weaker sex wearing furs around their necks, then you know that Spring is here." When all other signs fail, the above rule is a sure way to detect the arrival of Spring. But there are other signs too by which one can tell that Old Man Winter has packed up and left for the North Pole. Take 1911 Dormitory for instance . . . within three minutes after the arrival of the first robin on the campus, the boys up there start moving their beds out on the balcony. Yowsuh, it's a beautiful season to be glad in.

For the past two weeks the Juniors in R. O. T. C. have been taking the inoculations for typhoid fever preparatory to leaving for the summer camp. All of this means just so many sore arms . . . arms too sore for them to raise. Imagine what a fix they'd be in if things were run the same in college as they were in the elementary school.

Holladay Hall, besides having a flock of stairways, now has an elevator. It has been in use for a week or so. They don't carry passengers on it yet, they just raise and lower "The General's Car" with it at present.

P. B. Raiford says that if the fellow who stole his slide rule will come around he'll give him the case to keep it in.

Rumor has it that Howard Strickland was found sleeping in the library when they opened it the other morning at 8 o'clock.

One of our fair co-eds must be practicing for some track team or something . . . every time that I see her she's going up Hillboro Street on the loop.

They tell me that Bill McCullen has turned his thoughts to Meredith of late. Well, that's just one more case of . . . what shall I call it? Whatever it is, he has it bad and his friends are worried about him.

Banks Young, Mildred Pittman, and Jimmy Geddie are seen quite often strolling together. Are they all "just pals" or is there a third party in the procession? You know, it just struck me that the word together may be taken apart and part of the above sentence could be written "strolling to get her."

Bill Sullivan, Dave Morah, and Colin Kerr made dates with Meredith girls to take them to our first annual Publications Banquet. They were well satisfied with their choices until they found that Miss Biggers, Dean of Students at Meredith, would accompany the girls.

And now that I mentioned the Banquet, let me tell you about it. First of all, it was different. In the common, every day banquet, the Master of Ceremonies usually tells a string

## Suggested Readings

Each week a new list of books will be published as an aid to the student in selecting suitable reading matter. In this list will be included works of the foremost American and foreign authors.—Ed. Note.

*Savagery to Civilization*, Fay-Cooper Cole.

*The Universe Unfolding*, R. H. Baker. *Telling the World*, G. O. Squire. *Animal Life and Social Growth*, W. C. Allen.

*Sparks from the Electrode*, C. L. Mantell.

*Insects—Man's Chief Competitors*, W. F. Flint and C. L. Metcalf.

*The Queen of the Sciences*, E. T. Bell.

*Frontiers of Medicine*, Morris Fishbein.

*Adjustment and Mastery*, R. S. Woodworth.

## Summer School Bulletin

"The summer school bulletin giving full details relative to courses to be offered, and names of instructors is in course of preparation," says Prof. T. E. Browne who will be in charge of the N. C. State College summer school. This bulletin should be ready for distribution by the latter part of March.

## AERONAUTICAL GRADUATE MOVED TO KELLY FIELD

Glenn C. Nye, graduate of the 1933 class in Aeronautical Engineering, has recently been promoted to Kelly Field, Texas.

Nye went from here to Randolph Field in July where he showed up very well in a class of 154. Out of this class 65 were promoted to Kelly Field. Nye is to join the bombing squad there.

## Forty-Eight Teams Entered In High Cage Tourney Here

Class B Teams Start Meet Yesterday, With Class A Teams Opening Today

**THOMPSON GYM IS SCENE OF ANNUAL TOURNAMENT**  
About 500 High School Players Will Take Part in Elimination Series

By HALL MORRISON

N. C. State's Ninth Invitational Basketball tournament opened yesterday afternoon at the gym with thirty-two first round games played in the Class B, rural high school class. The Class A teams, from city schools of the state will start their first round games this morning at nine o'clock.

Second round games in both Class A and Class B will be played this afternoon, and third round class B games will be played tonight. According to the schedule planned by Johnny Miller, who is directing the tournament, all semi-finals games will be played tomorrow morning, with final games in both classes played tomorrow night.

Four dozen teams, consisting of approximately 500 players will take part in the tournament this year. These teams were chosen by their records from a field of approximately 100 applicants. According to Miller, teams entered this year have on the average much better records than the 1933 entries.

Defending their last year's championships will be Jonesboro, winner in the class B title in 1933, and Spencer, winner of the victory over their class A opponents. Other strong teams entered are: In class B, Dover, winner of a five county tournament; Arapahoe, winner of Pamlico County title and the Aurora tourney; Paw Creek, undefeated in 21 games; Salsburg, winner of Sampson County title; Nashville, winner of Nash County title; Erwin, winner of four county tournament and District 4 Class B champions; Nahant, Wayne County champion. In Class A, Raleigh and Lexington, Raleigh being runner up in the Eastern Class A state title race, and Lexington being undefeated this year.

The boys playing on the teams are being quartered in the dormitories and fraternity houses, many of the boys doubling up to take care of the influx of visitors. Many of the participants make fine material for State's quints. Sam Womble, star on State's freshman basketball team this year, played on the championship Jonesboro team this year.

Games played yesterday, all of which were between class B teams, were: Yesterday afternoon: Lattimore vs. Woodland, Micro vs. Dover, Lafayette vs. Brodgen, Mingo vs. Nahant, Candor vs. Lucama, Apex vs. Rose Hill, Nashville vs. Pilot, and Paw Creek vs. Williamston. Last night: Jonesboro vs. Bethany, Green Hope vs. Number 3 school of Shelby, Wake Forest vs. Epsom, New London vs. Arapahoe, Spring Hope vs. Smith's, Garner vs. Braxton, Erwin vs. Barnardville, and Salsburg vs. Cleveland.

This morning in Class A, the following games will be played: Bessemer vs. Lincolnton, North Wilkesboro vs. Lexington, Canton vs. Mohave, Roxboro vs. Spencer, Wilson vs. Roanoke Rapids, Fayetteville vs. Vanceboro, North Carolina School for Deaf vs. Oxford-Orphanage, and Freemont vs. Raleigh.

Two games are being played simultaneously during the course of the tournament except for the final games. They will be played on the main court of the gym.

Bob Warren, State freshman football and basketball coach will have charge of all officials, and will be assisted by "Chick" Doak, varsity baseball coach. Varsity basketball men of this year's team will serve as officials in the tournament games.

A minimum charge of 50 cents is being made for the complete series of games. However, students who do not wish to attend all the games can purchase a game ticket. The charge is being made to defray the expenses of the tournament only.

Tennis Begins Soon

The State tennis team, coached by Professor Hugh Lefler and R. W. Green, will begin practice as soon as the tennis courts have been conditioned. It is expected that regular practice will begin shortly. Students interested in trying out for the team are asked to get in touch with the coaches.

### Directs Tourney

JOHN F. MILLER

Director of physical education at State who will be in charge of N. C. State's ninth annual high school invitational basketball tourney opening here this week-end. Miller has been in charge of the tourney since its beginning in 1925.

## STATE TO ENTER S. C. TRACK MEET

Varsity Men Entered in Meet at Carolina Are Fallon, Whitley, Lloyd, Zori

State College will enter four varsity men and two freshmen in the Southern Conference indoor track meet which will take place at Carolina this week-end. Preliminaries will be run off at 1:30 in the afternoon, and finals at seven o'clock.

Heading the list is Milan Zori, in the shot put. Other varsity men are Jimmy Fallon, two mile; John Whitley, mile; and Sheldon Lloyd, half mile. Freshmen entered are Walter Machado and Frank Curry.

Zori, State's 79 inch star athlete, will represent State in the shot put rather than Ray Rex. Coach Sermon said Rex had been unable to do any practice work with the shot this winter and that he was not in shape to compete.

Zori is best known for his accomplishments with the discus, but he can also push the 16-pound shot better than 40 feet. In practice throws last year as a freshman, Zori threw the discus as far as 165 feet. This year he expects to reach 170 feet and is already training for the Southern Conference outdoor track meet.

"Red" Lewis, graduate student, is working out with these boys, as there is no regular coach. Last year, Lewis held the Southern Conference record for the mile.

Lewis said that Frank Curry, a freshman cross-country man last fall, had a good chance of winning the freshman three-quarter mile event, if he kept doing as well as he had during practice.

### WINTER SEASON CLOSES FOR INTRAMURAL SPORTS

Pi Kappa Alpha Wins Both Basketball and Handball Crowns in Frat Section

This week brought to a close the term's intramural activities in basketball and handball. In the fraternity section, the Pi Kappa Alphas won both the basketball and the handball championship. The Sigma Nus won the second place in basketball.

In the dormitory league, the championship game has not been decided as yet, but it will be decided soon by a game between the third floor seventh and the second 1911. The dormitory clubs are still several games back in intramural handball.

In the Independent League, the Demolay team won the handball championship, and the Forestry Club, the basketball championship.

Several hotly contested basketball games were played between the Pi Kappa Alphas, the Sigma Nus, and the Alpha Lambda Taus to decide the fraternity intramural winner. The Pi Kappa Alphas defeated the A. L. T.'s 14-9, and the Sigma Nus 8-5 to win the championship. Then the Sigma Nus defeated the A. L. T.'s 13-12.

## STUDENTS ENGAGE IN BOXING FINALS

Sixteen Bouts to be Staged in Thompson Gym Tuesday to Decide Winners

Sixteen final bouts in intramural boxing will be decided in the gymnasium next Tuesday night at seven-thirty o'clock. Eight of the bouts will be between fraternity representatives, and the other eight between dormitory men. According to Johnny Miller, who will have charge of the bouts, an admission charge of ten cents will be charged to see the bouts.

An unusual record was made in the intramural boxing this year when thirteen of the sixteen fraternities had representatives who got to the semi-finals in the battles.

Feature bouts of the evening will be those between Hanna, Sigma Pi, and Underhill, Delta Sig. In the 125 pound class; Howell and Bass in the 145 pound class, and Fox and Eaton in the unlimited class.

Men who will fight in each weight, and the organization they represent follow: In the 115 pound class: Leonard Nelson, of Washington, (A. L. T.) vs. Henry Latham, of Washington, (Delta Sigma Phi). Myron Rhyme, of Kings Mountain, (2nd 1911) vs. J. R. Chapman, of Dover, (1st 1911). In the 125 pound class: J. W. Hanna, of Hickory, (Sigma Pi) vs. W. H. Underhill, of Wendell, (Delta Sigma Phi). Fred Ramsey, of Lincolnton, (1st 1911) vs. Flore T. Sarrocco, of Newark, N. J. (1st South). In the 135 pound class: Joe Canady, of Wilmington, (Sigma Phi Epsilon) vs. Parley Scates, of Raleigh, (Pi Kappa Alpha). M. M. Tuttle, of Monroe, (2nd 1911) vs. Joe Griffin, of Centerville, (3rd South). In the 145 pound class: Frank Edmondson, of Charlotte, (Sigma Nu) vs. T. M. Hearn, of Albemarle, (Pi Kappa Phi). Ike Howell, of Charlotte, (2nd South) vs. B. L. Bass, of Scotland Neck, (Fifth Dorm). In the 155 pound class: J. R. Edwards, of High Point, (Pi Kappa Alpha) vs. Edmund Jones, of Goldsboro, (A. L. T.). Sheldon Lloyd, of Charlotte, (2nd 1911) vs. J. H. Westbrook, of Wilmington, (3rd 7th). In the 165 pound class: T. L. Ware, of Mt. Holly, (Sigma Nu) vs. W. K. Caldwell, of Dillon, S. C. (Delta Sigma Phi). Gates, 2nd 1911) vs. W. B. Wagon, of Nunda, N. Y. (3rd 7th). In the 175 pound class:

## Big Five Champions

Pictured here are North Carolina's Big Five wrestling champs—the matmen of N. C. State College. State also won third place in the Southern Conference meet last week. Dave Morrah of Greensboro and Charlie Nolen of Stoneville won first places in the tourney, and Colin Kerr of Lawrence, Mass. won a second place.

Front row, left to right: Dave Morrah, 115; Colin Kerr, 125; Charlie Nolen, 135; Capt. James McLaurin, 145; Carl Bernhardt, 155. Second row: K. J. Krach, 145; Craig Furr, 165; Horace Buckner, 175; E. W. Cooper, heavy-weight. Back row: Clifton Croom, 175 pound wrestler who was hurt during the season and lost to the squad for the year; R. G. Hodgkin, 135; Coach W. N. Hicks, and Frank Doggett, manager.

### WINTER FOOTBALL DRILLS WILL CLOSE TOMORROW

The final intrasquad game of the winter football drills will be held tomorrow at 2:30 p.m. on Freshman Field.

Winter drills have been going on since January. Coach Hunk Anderson has been making a practice of holding squad games on Wednesday and Saturday during the season.

On Wednesday, the Red jersey team again won an intrasquad game over the Green Jerseys. The score was 24-6.

### RIFLE TEAM TO ENGAGE DAVIDSON HERE TUESDAY

Match Will Settle Rifle Championship of North Carolina Colleges

The State rifle team will shoot a shoulder to shoulder match with the Davidson College team here Tuesday, March 13. The match will be held on the indoor range in the Thompson gymnasium.

State and Davidson have the only collegiate rifle teams in the state. The match Tuesday will settle the state championship. In a previous match with Davidson this season, State won by a close margin of points.

During the past week the State rifle men have shot a number of telegraphic matches. In these matches State defeated Dayton University, Washington University and Creighton University but lost by close scores to the University of California, Cornell and University of Nebraska. The rifle team will continue to shoot telegraphic matches every week-end.

Captain B. W. Venable, R. O. T. C. instructor, is coaching the team.

## MATMEN PLACE TWO CHAMPIONS

State Team Scores 17 Points to Take Third Place in Conference Tourney

N. C. State's wrestling team, with 17 points, won third place in the third annual Southern Conference meet held at Blacksburg, Virginia, on March 2 and 3. There was the largest entry group in the history of the Conference. Six colleges and universities were represented. They were Washington and Lee, V. M. I., V. P. I., N. C. State, U. of North Carolina, and Duke.

To State matmen gained Conference championships in their weight class. They were Dave Morrah of Greensboro in the 115 pound class, and Charlie Nolen of Stoneville in the 135 pound weight. Nolen is a senior, and Morrah, a junior. Colin Kerr, Lawrence, Mass., in the 125 pound class, lost a close decision to receive second place.

Every man on the State team received either a first, second, or third place except Craig Furr. Furr sustained a severe injury in the knee, and was forced to forfeit to a man he could easily have beaten. Captain Jimmy McLaurin was off form in losing a close decision to a man he had beaten previously.

Dave Morrah defeated W. and L.'s previously undefeated Frank Crew in the semifinals for his largest match. Charlie Nolen was victorious over two of the strongest men in the Conference for the 135 pound title.

State entered a seven man team in the tournament. Matmen from State were: Dave Morrah, Colin Kerr, Charlie Nolen, Captain Jim McLaurin, Carl Bernhardt, Craig Furr, and E. W. Cooper.

The 1934 season has been one of the most successful in the history of wrestling at State. The team has been defeated by only one team, W. and L. They gained victories over Carolina, V. M. I., V. P. I., and Duke (forfeit), and won the North Carolina Big Five championship for the second consecutive year.

Charlie Nolen and Jim McLaurin will be the only men on the team who will be lost by graduation this spring.

ty of California, Cornell and University of Nebraska. The rifle team will continue to shoot telegraphic matches every week-end.

Captain B. W. Venable, R. O. T. C. instructor, is coaching the team.

## DIAMOND DRILLS BEGIN WEDNESDAY

Thirty-six Players Report to Coach "Chick" Doak for 1934 State Nine

Spring baseball drills got underway at N. C. State College Wednesday when 36 players reported to Coach Chick Doak for the first drill.

Among those reporting were Bob McQuage and Curtis Roach, co-captains of this year's team. McQuage plays first and Roach third.

There were six other monogram men of last year's team reporting. They were: Woody Lambeth, shortstop; Willie Lynn, pitcher; Bob Smith, second base; Allen Bailey, first base; Hal Farris, catcher; and Johnnie Johnson, third base.

Ray Rex and Venice Farrar, football stars, were also among those on hand. Rex is an outfielder and as a freshman two years ago was one of the best hitters on the team. He will divide his time this week between football drills and baseball. Grid drills end Saturday and then Ray will devote his afternoons to baseball and track.

Farrar is a pitcher and according to Coach Doak, is a good prospect.

Neither Farrar nor Rex could take part in baseball last spring due to late off-season football drills. Both of the men are fullbacks in football, Farrar having been switched from tackle to full during the winter drills.

Leroy Jay and Stuart Flythe, two stars of the State's basketball team, were also among those reporting. Jay plays first and Flythe is a pitcher. Flythe made quite a record as a freshman hurler last spring.

Seven reserves of the 1933 team were also on hand yesterday. They were: Hyman Dave, James Cooper, David Rodwell, Kirkman, pitchers; Rupert Cox, Willie Oakden, outfielders; and F. H. McKinney, catcher.

New men reporting were: Charles Jennette, Elmer Spence, J. K. Bannerman, E. F. Coats, Carl Bernhardt, Glenn Goodwin, Ethan Robbins, J. E. Czel, Tom Kerr, Wilfred Ballance, O. R. Freeman, Dorus Williams, Chub Womble, Carl Wynn, Billy Creel and Charles Riley.

**JANGLED NERVES**

**ARE YOU A  
Phone Booth  
Artist?**

## Those penciled scrawls are a sign of jangled nerves

If you're the stolid, phlegmatic sort of person who doesn't feel things very deeply, you'll probably never have to worry about nerves. But if you're high-strung, alive, sensitive—watch out. See whether you scribble things on bits of paper, bite your nails, jump at unexpected noises—they're signs of jangled nerves. So be careful. Get enough sleep—fresh air—recreation. And make Camels your cigarette. For Camel's costlier tobaccos never jangle your nerves—no matter how steadily you smoke.

### COSTLIER TOBACCOS

Camels are made from finer, MORE EXPENSIVE TOBACCOS than any other popular brand of cigarettes!

Rawlings Poole—Telephone 1440

### Post-Banquet Dance

Staff members of the three major publications at State College and their dates were entertained at a dance sponsored by Rawlings Poole and John McIntyre in the ballroom of the Carolina Hotel following a banquet given by the Publications Board Wednesday night.

The music was furnished by a complete amplifying system with the latest popular recording being played. Dancing was enjoyed by everyone until 11:30.

Staff members and their dates were: Miss Fannie Bella Bray with Ernie Lassen; Miss Melba Chambliss with John McIntyre; Miss Lillian Covington with Eugene Knight; Miss Velma Wingate with H. B. Hines; Miss Martha Metcalfe with Brock Sissell; Miss Elizabeth Layfield with Joe Abernethy; Miss Foy Allen with Charlie Turlington; Miss Mary Smedes Poyner with Hall Morrison; Miss Rosalie Hay with J. D. Pendleton; Miss Mary Lily Cromartie with Fred Gore; Miss Dorothy Didenhover with C. A. Ryther; Miss Dorothy Hodgins with Dave Morrah; Miss Majorie Wilson with Bill Sullivan; Miss Margaret Brewer with Edgar Lowrance; Miss Margaret Tyson with Colin Kerr; Miss Maury Louise Parker with Larry Martin; Miss Katherine Harris with Aaron Epstein;

Miss Doris Lineberry with Carter Williams; Miss Clyde Cotner with N. B. Dozier; Miss Garnett Elghine with Albert Couch; Miss Frances Thompson with Hubert Todd; Miss Sarah Snipes with Walter Greenwood; Miss Gwendolyn Crowder with H. S. Keck; Miss Macon Crowder with J. R. Doosenback; Miss Catherine Noel with L. N. Brown; Miss Ella Mae Noel with Norman York; Miss Elizabeth Mason with "Buck" Buchanan; Miss Elizabeth Wade with Rawlings Poole; Miss Elizabeth Parks with Jim Barnhardt; Miss Margaret Kelly with T. M. Jenkins and Ed Riccardelli; Bill McCullen, Charles Matthews, and G. W. Ford. Other guests present were: Mr. and Mrs. J. Roy Parker, Mr. and Mrs. Frank Jeter, and Mr. and Mrs. W. L. Mayer.

### Sophomore Party

Sophomores from State College and Wake Forest College were entertained Saturday night at an informal party by the sophomore class of Meredith College at that institution.

Entertainment for the evening was furnished by members of the freshman class.

Music for the occasion was furnished by Eddie Poole and his orchestra.

Ices with mints, nuts, and cakes were served.

### LEAGER STRESSES ECONOMICS STUDY IN HIGH SCHOOLS

(Continued from page one)

Other labor saving devices has resulted in the creation of employment in excess of what was displaced. But, the long run is hard to visualize and hard to connect with one's self. It is the short run in which the individual is interested. Ask any musician, telegrapher, bookkeeper, loom tender, and he will tell you in no uncertain manner that employment is largely caused by automatic, labor saving machinery. It must be clearly understood, however, that great depressions like the present one are not caused by technological unemployment.

Professor Leager explained how division of labor is a natural outgrowth of the tendency towards efficiency, stating that specialization increases the efficiency of a man by allowing him to learn more and more about his work and acquire facility in performing it.

### National Income

"The amount of wealth added to the nation by its productive processes is called its national income," said Professor Leager. "The addition of wealth is the outcome of the cooperation of the factors of production under the supervision of business men. The factors which produced the national income must be rewarded, and this is accomplished by dividing or distributing the national income among the factors which have contributed to its production. The share which goes to laborers is called wages, and that which goes to owners of the natural resources is called rent, that which goes to the owners of the capital goods is called interest, and the reward to the business man, the manager, is called profits.

"The greatest economic problems of our times are fundamentally problems connected with the distribution of the national income," continued Professor Leager. "Poverty, the greatest scourge of the human race, is caused by the low remuneration of laborers and farmers. Another cause of poverty is the recurrent unemployment during depressions, without doubt an outgrowth of our profit motive economy. The question of the business cycle is too large to be discussed here, but it may be said that during the course of a depression, laborers and farmers suffer more than any other classes. Poverty is also caused by other factors interrupting income, such as death of the head of the family, sickness and accident; not necessarily economic in nature but essentially economic in their effects."

Professor Leager concluded his speech by saying, "While teaching economic principles to our boys and girls let us train them to approach the problems with cool heads and warm hearts. We must have understanding sympathy with the unfortunate victims of economic changes. We must not forget that in the short run these changes often work hardships on individuals and we must help them in adjusting themselves to changing conditions."

### STATE FORENSICS TEAM ENTERS DEBATE TOURNEY

The State College Debate team left yesterday for Greensboro where they will defend the championship in the Tri-State Tournament today and tomorrow. The tournament will include contestants from twenty colleges including junior colleges. This year State expects to continue its brilliant record in forensics and debating.

The debate team consists of Horace Cotton and Dwight Stokes who will defend the affirmative and Frank Busbee and R. L. Battis who will defend the negative side.

Saturday night the North Carolina College for Women Dramatic Club will sponsor a group of extemporaneous and impromptu plays to be produced by the Experimental Theater group from State College.

### EDITOR PRESENTS SERVICE AWARDS TO JOURNALISTS

(Continued from page one)

of The Watsogan, gave the purposes of the magazine. Much of the success of the banquet was due to Frank H. Jeter, director of

the State College News Bureau and chairman of the Publications Board, for his introductions of the various speakers. Much amusement was created among the crowd by these introductions.

Those in charge of the banquet arrangements were Rawlings Poole, John

McIntyre, and W. L. Mayer.

The desire was expressed that these banquets would become annual affairs. About 35 staff members and their dates were in attendance.

Following the banquet, a dance sponsored by John McIntyre and Rawlings Poole was held in the hotel ballroom.

## New Tennis Rackets

*Why* — Men and women say They Satisfy

FOR SOMETHING to "satisfy" you, means that it pleases you—that it's what you want. This applies to cigarettes or anything.

A cigarette has to taste right—not raw or too sweet. For a cigarette to "satisfy" it has to be mild—not strong, not harsh.

You can prove for yourself whether a cigarette is milder—whether a cigarette tastes better.

And it's because smokers can prove these things about Chesterfield that so many men and women say they satisfy. Try them.

**Chesterfield**

the cigarette that's MILD — the cigarette that TASTES BETTER
