STATE COLLEGE STATION, RALEIGH, N. C., OCTOBER 13, 1933

OFFICE: 10 HOLLADAY HALL

BOOSTER PARADE WILL BE STAGED TONIGHT AT 6:30

Chamber of Commerce and State College to Stage Parade to Boost Game Tomorrow

PARADE EXPECTED TO AID IN CLOSER RELATIONSHIP

Pep Meeting to be Held on Red Field Prior to Parade; Headed by Musical Organizations, Students Will March Up Fayetteville Street; Several Comedy Features and Large Number of Collegiate "Flivvers" to be in Parade

The Raleigh Junior Chamber of Commerce and State College will stage a "pep" parade tonight as a booster for the State-Florida football game which will be played tomorrow night on Riddick Field, according to Bill Barker, president of the student body, and head of the student committee for the parade.

At 6:30 the College whistle will give the signal for the beginning of the parade. The Drum and Bugle Corps will form at the Bull Hall and march to Watauga Hall, then to Fifth, Sixth, South, Seventh, and 1911 dormitories. All students are to follow the Corps to Red Field, where a short pep meeting will be staged in conjunction with a bonfire sponsored by the Order of 30 and 3. Lloyd Moore, head cheer leader will lead the yell.

The group will then march as a parade with the Drum and Bugle Corps to the Raleigh Memorial Auditorium, where they will meet the State College Band. Headed by the Band, the students will march up Fayetteville Street in a proposed "short parade." There are to be several comedy features in the parade, and "collegiate" Fords will have a large part in it. Raleigh merchants have been asked to feature State College window displays, and prizes will be awarded for the best displays. The merchant with the best exhibit will be given four tickets to the game tomorrow night, and the second best exhibit will be awarded two tickets in the midfield section. Announcement of winners will be made during the game. Polk Denmark, Alumni secretary said that an unknown committee is to be appointed for the awarding of prizes.

The parade is being sponsored by the Junior Chamber of Commerce. Joe Berwanger is head of the committee for the parade. The State College committee is headed by Theodore S. Johnson, professor of Industry; Lieutenant-Colonel Bruce Magruder; Polk Denmark, Alumni Secretary; and Doc Serron, head of the Athletic department.

The launching of the booster program is an effort to bring about closer relationships between the merchants of Raleigh and State College. The buoyant spirit that was so much in evidence at the beginning of the football season has been replaced by a pessimistic attitude on the part of the student body in general. It is hoped that this pessimism which is so prevalent will be offset and a new spirit manifested.

ALUMNI HOLD MEETING IN SOUTH CAROLINA

J. Calhoun Harris Elected President of Newly-formed Chapter in Greenville

A State College Alumni Association was formed at a meeting of Alumni in Greenville, South Carolina, Friday, October 6. This organization will take in the Piedmont section of South Carolina. J. Calhoun Harris of Greenville was elected president; R. A. Hand of Spartanburg was elected vice-president; J. C. Crosby was named secretary-treasurer.

Polk Denmark, secretary of the general State College Alumni Association and J. B. "Sh. ty" Lawrence attended the meeting from Raleigh. David Clark, Malcolm Hunter, and B. J. Hunter were delegates from Charlotte. The meeting was held at the Point-sette Hotel of which Mason Alexander, class of 1917 is manager.

White Spades to Meet
White Spades, inter-fraternity group, will hold a meeting on Wednesday night, October 18th at the Y at 7 o'clock.

Faculty Fair Heads

DEAN L. O. SCHAUB

PROF. R. S. WEAVER

The above faculty members are acting in the capacity of advisers to the Agricultural Fair which the students of the School of Agriculture are holding at the North Carolina State Fair this week. This year marks the eleventh year that the students have had exhibits at the Fair.

New Stadium to Be Used For Grid Game Tomorrow

STATE TO PRINT NEW PUBLICATION

York Elected Editor of New Technical Publication Issued by Engineers' Council

Norman York, senior in electrical engineering was elected editor and Robert Ruffner was named business manager of a technical publication which the Engineers' Council plans to issue soon. They were elected by the Council at a meeting last Friday night in Page Hall.

For the past seven years there has been some discussion of such a journal, but up until last year, there has been no serious thought given the project. The journal will contain technical papers written by students and members of the engineering faculty; results of the research of the experimental laboratories and detailed analytical description of completed projects. The Engineers' Council feels that contributions such as these will make the publication of the journal worthwhile.

The first edition will appear without a name. After the students have read it they will be requested to submit names. The Engineers' Council will give a prize for the one accepted. The magazine will be put out quarterly. It will contain nothing but papers dealing with technical subjects. Each department in the engineering school will have a certain amount of space assigned to it. The presidents of the different societies will be responsible for their contributions.

Only the engineering students will receive copies of the periodical. There will be about 1,000 copies printed. The Council hopes, however, to reach a large number of the alumni engineers through the magazine. One of the greatest uses for it will be to acquaint the large companies with the work of the N. C. State Engineering department. If a paper of this kind can be built up, it will assist in placing graduates from State.

The first edition will be distributed on or near November 15. Anyone who wishes to make a contribution must have it in by the first of November. Contributions are accepted from any engineering student or faculty member.

Radio Rattler

WPTP needed no sound effects Wednesday to broadcast the menacing rattles of the rattlesnake. E. H. Page, head of the ecology exhibit at the Student Fair, had a rattlesnake among his exhibits. Radio announcers asked Page to allow them to broadcast the rattler over the air, to which he consented. The whir of this snake over the air is believed by officials to be the first time that such an event has occurred.

CAMPUS LEADERS ANNOUNCE PLANS FOR HOMECOMING

Annual Homecoming and Dad's Day to be Celebrated Here November 3 and 4

MANY PLANS FORMULATED TO ENTERTAIN VISITORS

Blue Key "Stunt Night" to be Held November 4; Visitors to Make Inspection Trip of Classrooms and Buildings; R. O. T. C. to Stage Parade in Visitors' Honor; All Fraternities Offer Cooperation in Movement

Arrangements for the entertainment of visitors during the annual Homecoming Day and Dad's Day which will be held together this year, on Friday and Saturday, November 3 and 4 were made at a joint meeting of Golden Chain and Blue Key, leadership fraternities, in the office of the Student Council Monday night.

Rawlings Poole, who was appointed to the Radio committee Monday said yesterday that two half-hour radio programs will be given to publicize the event on October 27 and November 4, over WPTP.

Two large banners of welcome will be hung at the Hillsboro street entrances at the east end of the campus during the two days of the joint celebration. A dance will be held on November 4. All fraternity houses have offered their cooperation for the event in keeping "open house," and all fraternities will be decorated in honor of visitors. Posters will be placed about Raleigh announcing the entertainment.

Letters to be forwarded to students' parents will be sent to all students, with programs for the celebration included.

Special novelties and attractions will be given at the North Carolina University-State football game Saturday, November 4 by the two organizations.

Following is the program of events: Friday night, November 4, Blue Key will hold its annual "Stunt Night"; Saturday morning, alumni and dads will make an inspection tour of the classrooms and buildings, and the R. O. T. C. unit will stage a parade in honor of the visitors. Saturday afternoon the guests will attend the football game, and Saturday night a dance will be held.

The committees appointed at the meeting Monday night, by W. P. Kanto, chairman of the joint group are: radio committee, Rawlings Poole; novelties, Phil Stone; printing and correspondence, Bill New; banner and posters, E. J. Lowrance; and arrangements, J. H. Barnhardt.

WHITE SPADES SELECTS NEW OFFICERS FOR YEAR

Inter-fraternity Organization Also Names Committee to Outline Program

The White Spades, social inter-fraternity organization on the campus, met Tuesday night, October 10 for the first meeting of the year. The purpose of this meeting was to elect officers for the coming year. A committee was also appointed to outline a program for the year. This program is to consist of dinner parties, dances, and other social functions.

New officers are as follows: Joe Hughes, Kappa Sigma, president; H. E. Benton, Theta Kappa Nu, vice president; Lamar Summey, Sigma Phi Epsilon, secretary-treasurer. The social committee as appointed are: Walter B. Jones, Richard Pendell, and John Rutledge. The retiring officers, two of which are not in school this year are as follows: Mark Boone, president; J. D. Lamm, vice president; and Blain Chapman, secretary-treasurer.

The purpose of this organization is to promote friendship between the social fraternities and State College as a whole. Each year a trophy is given by them to the student making the highest average during the year. The next meeting is to be held Wednesday night, October 15.

RECOVERY ACT HEAD ASKS DR. FRANK GRAHAM'S HELP IN EDUCATIONAL PROGRAM

ONE IBSEN DRAMA PRESENTED HERE

"Ghosts" Given Tuesday Night, But Difficulties Prevent "The Master Builder"

By Eugene Knight

Presenting their interpretation of Henrik Ibsen's "Ghosts," Madame Borgy Hammer and her company gave to State College Tuesday night some of the finest acting that has been seen here in several years.

"The Master Builder," another Ibsen play, was to have been given Wednesday night but due to a sudden illness of the leading man a short time before the play was scheduled, it was called off.

While the audience was not large, it was appreciative, and the company was forced to answer four curtain calls after the play had ended.

Hailed by critics from coast to coast as one of the greatest dramatic actresses today, Madame Hammer gave an exhibition of her skill here that will long be remembered by those present. Her deep emotional portrayal of her part completely captivated the audience, surrounding them in a warmth of feeling felt only in natural life.

While Madame Hammer carried off the acting honors, she was closely followed by Robert Donaldson playing the part of her son, who did some superb acting. The rest of the cast gave splendid portrayals. The plot of "Ghosts" revolved around the love of a mother for her only son. Ibsen brought the conclusion to a powerful, dramatic close, in which the mother is separated from her son, but their great love is unblemished.

PAGET ANNOUNCES CAST FOR "TAILOR-MADE MAN"

Dwight Stokes to Take Leading Part in Next Red Masques Production

The final cast for the new Red Masques play "The Tailor-Made Man" was announced today by Prof. E. H. Paget.

The leading part, John Paul Bart, the tailor-made man, will be played by Dwight Stokes. Playing opposite him, is Miss Mary Hugh McDonald, who takes the part of Tanya Huber, the tailor's daughter; Huber, the tailor, is played by H. D. Carpenter; Dr. Sonntag, Tanya's rejected suitor, H. B. Hines, Jr.; Pomeroy, a valet, Dave Young; Nathan, the giant of his business, Prof. A. M. Bountain; Rawlings, the news reporter, C. A. Ryther; and Peter, an industrious tailor's hand, J. R. Nickon.

Other members of the cast are: Jack Fowler, A. Thurman, George Getz, C. Peele, Charles Stinnett, Paul Cox, E. Gradecki, D. R. Perkins, Carl Stein, R. H. Worthington.

The women on the cast are: Misses Elizabeth Gantt, Lura Penny, Ernestine Holland, Hilda Fuller, Margaret Owen, Sarah Holman, and Francis White.

RADIO ENGINEERS HOLD FIRST MEETING FRIDAY

H. L. Caveness, Director of Roanoke Division, Tells About the Tar Heel Ham

H. L. Caveness, Director of the Roanoke Division of the American Radio Relay League, talked to the Radio Club at its meeting held in its Station room in Winston Hall last Friday night.

Caveness described the Tar Heel Ham and what it comprises. The Tar Heel Ham is a bulletin published each month in the interests of amateur radio. It is relative to all activities in radio circles throughout the state. J. F. Abernethy, president of the club, after welcoming the group explained the purposes and aims of the club for this year. Abernethy expressed his desire that all those interested in radio to become members.

New officers will be elected at the next meeting to be held on Friday, October 13.

Gets Offer

DR. FRANK GRAHAM

President of the Greater University of North Carolina, who has been offered a job with the National Recovery Administration to conduct an educational economic program.

SOPHOMORES HOLD INITIAL MEETING

Dean B. F. Brown, as News Commentator, Explains the National Recovery Act

B. F. Brown, Dean of Business Administration talked to the Sophomore Class at its initial meeting held Wednesday, October 11 in Pullen Hall. Brown explained in detail the aims and purposes of the NRA and the results of the Economic Conference held in London, and other news events.

W. N. Hicks, adviser to the Sophomore Class, enumerated the purposes and aims of the meetings to be held this year by the class. A closer contact with the outside world and among the members of the class will be fostered.

Major C. D. Kutichinski rendered a few violin selections and led the assembly in old time songs. Joe White, a representative of the Student Council asked for the support of the Sophomore Class in the parade to be held by the student body Friday night.

The officers for the Sophomore Class this year are: E. W. Cooper, president; Joe Canady, vice president; and Wilson, secretary-treasurer.

The next meeting of the Sophomore Class will be held on November 1.

STUDENT COUNCIL DROPS FEDERATION MEMBERSHIP

Money Used in Past for Dues and Traveling Expenses to be Saved by Move

The Student Council decided at the meeting to drop its membership in the National Student Federation of America, and thereby save approximately \$200 which has up to this year been spent annually for dues in the organization and the sending of student leaders to conventions held by that organization.

Members of the Council have in past years attended conventions in New Orleans, Toledo, and Atlanta. The expenses for these trips are paid from the Student Activities fund. Dues for membership are \$33 annually. The money which is saved this year will be used in worth while campus improvements.

Misspelled

Prof. J. D. Clark, head of the English department has found spelling words his bungle. At a Lion's Club luncheon held Tuesday at the Sir Walter Hotel, members were given three words to spell, metachrosis, idiosyncrasy, and rehabilitation, and Professor Clark immediately offered to try. He failed on rehabilitation, the first word he tried. Professor Clark dropped out of the contest.

Matter is to Be Taken Up Before Executive Committee of Greater University's Board of Trustees

UNIVERSITY HEAD MAKES NO STATEMENT IN REGARD TO RECOVERY ACT OFFER

General Hugh Johnson, NRA Head Sends Telegram to Governor Ehringhaus Requesting Services of University Head; Ehringhaus Refers Matter to Board of Trustees of University; Graham Would Head Economic Education Bureau; Alumni Association of State College Passes Resolution Requesting that Dr. Graham Do Not Accept

The services of Dr. Frank Graham, president of the Greater University of North Carolina, to direct an educational economic program for the NRA were requested by General Hugh Johnson in a telegram to Governor J. C. B. Ehringhaus Monday.

Governor Ehringhaus replied that he did not have the power to grant Dr. Graham a leave of absence, but that he would place the matter before the executive committee of the University's board of trustees when it meets in Chapel Hill tomorrow.

When interviewed, Dr. Graham declined to discuss the attitude towards the request stating that he had not "had time to think it over and there is nothing that I can say at the present." He is already a member of the NRA advisory council, vice chairman of the Consumers' Council and word from Washington said that he had been appointed to head the economic education bureau.

He has deeply regretted that, owing to a recent illness, he has not been able to do what he considered his part as a member of the National Consumers' Advisory Board.

Dr. Graham has lately been busily engaged in setting up faculty committees in the several units of the consolidated University to make constructive studies of the budgets, curricula, student life and welfare, and educational policies and opportunities of the whole University.

General Johnson, in his telegram to Governor Ehringhaus, described the work for which Dr. Graham is wanted as the most important public relations effort for the future of the whole (NRA) program.

Dr. Graham, who is 47 years of age, has been president of the University of North Carolina since June 10, 1930. When the University at Chapel Hill, State College at Raleigh and North Carolina College for Women at Greensboro were merged into the "Greater University of North Carolina" by the 1931 Legislature, Dr. Graham was chosen as the first president of the consolidated school.

At a meeting of the Executive Committee of the General Alumni Association in Polk Denmark's office Wednesday night the committee expressed its hope that Dr. Graham would not accept this new position as it would take him away from his duties as University head when he was most needed.

The text of the resolution is as follows: "Resolved, That the executive committee of the General Alumni Association of State College expresses hope that President Frank Graham will not accept any appointment that might remove him even temporarily from North Carolina."

**EXPERIMENTAL THEATRE
TO BE TRIED AT STATE**
Professor E. H. Paget announced yesterday that try-outs for the play given by the Experimental Theatre will be held Monday and Tuesday afternoons between 4 and 6 o'clock.

At the present the group is working on an extemporaneous play called "The Voice" and a number of other novel and interesting things. Anyone interested in the project is invited to try-out.

Clark Announces Results Of Placement Examinations

William Cheshire of Fayetteville Makes Highest Score on English Test

ENGINEERING FRESHMEN MAKE HIGHEST AVERAGE

Tests Given Each Year to Determine Degree of Preparation Had by Students

By J. W. LANBESON

Prof. J. D. Clark, head of the English department yesterday announced the results of the freshmen placement tests given on registration day, the general average of the tests compared favorably with the average of a year ago.

The standing of schools according to the averages made by their students are: School of Engineering first with an average of 37.61 per cent; School of Science and Business, 36.09; Textile School, 33.72; School of Education, 31.30; and the Agricultural School, 29.67.

William Cheshire of Fayetteville, made the highest score of 94.

For the second consecutive year the out of state students made the second highest average of any group.

The average age for the freshmen taking the test was 18.9 years, which was a slight increase over the age of those taking the test last year.

The test prepared by Iowa State University, is given each year to determine the degree of preparation that the students have had prior to their entering college, and their rating is used as a guide in placing them in the course of study that they need most.

The test consists of four parts, spelling, punctuation, grammar, and diction. With the exception of the women, the greatest weakness of the students was in their grammar and they were strongest in diction.

Students making the highest scores in the tabulation compiled by Professor J. D. Clark, head of the English Department and his associates by schools, are as follows:

School of Education: Joel T. Lee, Benson, 72.5; Alex Regdon, Homestead, Pa., 61.5; Charles Hayes, Haddonfield, N. J., 59; and Edward Snyder, Hightstown, N. J., 56.

School of Science and Business: William L. Bynum, Raleigh, 85; Leon Sarin, New Bedford, Mass., 75; Allan Thurman, Southern Pines, 73; and James Stephenson, Raleigh, 71.

Textile School: Alex McArthur, Bennettsville, S. C., 72; William Atrial, Charlotte, 67; Robert McCoy, Durham, 66; and T. E. Sebrrell, Alexandria, Va., 63.

School of Engineering: William Cheshire, Fayetteville, 94; R. H. Morrison, Charlotte, 92; Harry Shatzer, Charlotte, 82; and Fred Hoehler, New Brighton, N. Y., 81.

School of Agriculture: William Poe, Raleigh, 85; Jack Klaver, New York City, 71; F. L. Woodard, Hayesville, 60.5; and M. H. Byerly, High Point, 54.

Vocational Department Wins Frist Prize at State Fair

The Vocational Agriculture department of State College was awarded first prize, a large silver loving cup, for the best exhibit entered in the student division at the State Fair.

The exhibit of the department shows a contrast between "Ideal Farming" and "Poor Farming." Leading into the "Ideal Farm" is a road marked with a sign, "To Prosperity," showing Franklin D. Roosevelt holding a rope appropriately called "The New Deal." At the other end of this rope are two farmers being pulled up, aided by stepping stones which are being laid by teachers in the department. These stones are entitled: "Good Seed," "Livestock," "Business Methods," "Cooperation," and various other phases of farming. From a model high school men are walking and carrying these stepping stones which are labeled: "Better Seed," "Cooperative Business Methods," "Livestock," "Greater Yield Per Acre," "Farm Organization," and "Correct Fertilizer."

The Animal Husbandry department was awarded second prize for a home tanning exhibit showing furs and leathers tanned by a simple home method, together with chemicals to be used for it.

The Agronomy department won third prize. Its exhibit emphasizes "Be sure your crop gets the right treatment." Five crops used in the exhibit: peanuts for the purpose of illustrating the need of the plant for lime for yield and gypsum well-sifted pods; soy beans showing the need of that plant for lime and that correct fertilizer analysis was necessary for good yields.

The Agricultural Economics exhibit shows the benefits in crop reduction toward raising crops prices. Another sign indicates the purchasing power of the farmer's dollar, showing that at present it is far below par.

The Horticultural department exhibits a map of North Carolina giving a picture of each crop grown in the State at the section where it is most widely found. The sign reads: "The South can and should grow enough seed Irish potatoes, cabbage, apples, onions, pecans, tomatoes and other horticultural crops to supply her own markets. Approximately \$500,000 leaves the state annually for seed Irish potatoes alone!"

The poultry departmental exhibit gives a ladder of poultry success, showing steps necessary for getting the best results out of poultry.

The Forestry school exhibit gives a map of the State showing the location of Civilian Conservation Camps, while the main exhibit was a model of one of these camps.

The Botany department carries out red and white State College colors and gave a cartoon illustrating the effect of dusts, fungicides and sprays on bacteria, smuts and rotting of plants.

The Zoology department displayed enemies of the farmer and his friends, illustrated by beetles and insects on one hand and quail, snakes, and fur-bearing animals on the other, hand. The feature of this exhibit was a live rattlesnake.

INFORMATION SENT ON RHODES EXAMS

State Secretary Says Engineering and Ag Students Have Equal Chance With Others

Dr. T. P. Harrison, professor of English, representing the Rhodes Scholarship Committee, announced yesterday that he had received a letter from Prof. F. K. Mitchell, the state secretary of the Rhodes Scholarship Committee, stating that there will be no discrimination against engineering and agriculture students in awarding Rhodes Scholarships.

With Professor Mitchell's permission the letter is quoted in full.

Dear Dr. Harrison:

I am very sorry that Rhodes candidates from State should have got the impression that there is discrimination against men intending to read engineering or agriculture at Oxford. Since I was not on the committee last year, I can not say how such an impression arose, but I can assure you that my own position this year (as long as I remain secretary or a member of the committee) is that all candidates shall have equal consideration in respect to their prospective courses of study as in other matters.

Any committee is always faced with the necessity of sometimes advising a candidate that in view of his own individual career two or three years at Oxford seems uneconomic.

mean, of course, in preparation for his own business; I can not imagine a stay at Oxford to be unprofitable to any serious student in his own life. For example, I have been forced, from time to time, to tell a man who was very anxious to get into a law practice within three years after graduation from college that two years at Oxford would probably delay him at least one year in his aim.

It is some such connection as this that I can imagine a prospective student of engineering or agriculture being advised of discrimination; and this sort of thing may come up in connection with any subject.

My knowledge of the engineering and agriculture courses at Oxford is that the former is slated under natural science; one takes engineering science as his course for the degree.

I believe that engineering is very well taught there. On the other hand, I think that agriculture, under the head of rural economy, is only a diploma subject, not a degree one. And I am not sure that it is a well organized subject there. It is, however, prove a very useful training to a student who meant to go into agriculture pretty thoroughly to have this foreign experience with it.

My personal knowledge of the situation is likely to be antiquated, I am afraid. However, I do wish to assure you that all candidates from State will have all the consideration that I can gain for them. And I thank you very much for writing to me so frankly.

Yours ever sincerely,
Frank K. Mitchell.

Mr. Clark said that he hoped to be able to return here next week and present "The Master Builder."

The Master Builder, Ibsen's play which was to have been presented by Madame Borgy Hammer, famous Norwegian actress, and her troupe of players Wednesday night was called off at 8:20 Wednesday night because The Master Builder Bram Nossen, failed to appear.

The desk clerk at the Raleigh Hotel said yesterday that Nossen, who was staying there while in Raleigh, departed Wednesday afternoon between 4:00 and 5:00 o'clock. There has been no trace of him since.

Fifteen minutes after curtain time, Secretary E. S. King of the College Y. M. C. A., sponsoring the appearance of the Borgy Hammer Company, announced that due to sudden and serious illness of the leading man, the company would be unable to fulfill its contract.

Manager Laurence Clarke said that he felt Mr. Nossen's ailment was of a nervous origin, and that he hoped he would be able to return to the cast for the scheduled appearance at Duke University tonight, but that he had wired New York and expected a substitute to join the company immediately.

Scenery and stage equipment are being held by E. S. King, secretary of the Y. M. C. A., who was in charge of the performance, and an engagement at Duke last night was cancelled.

The plays, "Ghosts," which was given Tuesday night and "The Master Builder" were to have been presented by the troupe throughout the South, to the Pacific Coast. Monday afternoon and evening the plays were given at Wake Forest. After leaving State College, they were to have gone to Duke, the University of North Carolina, Queen's, Winthrop, and Spartanburg.

Since none in the cast had made up in preparation for the play, before Nossen was announced missing, it has been said by some in charge of the play that Nossen's departure was known to the cast early last evening.

Play Will Be Held

King announced last night that Nossen has been replaced by Curtis Cook, a graduate of Shakespearean actor, and that "The Master Builder" will return to State College around October 23.

Bram Nossen's stage career has been unusually varied. He played opposite Mrs. Fiske in "Mrs. Bumpstead Leigh," with Lenore Ulric in "Noma," with Frank Meglin in "Abraham Lincoln," Edward Norton in "Beggars on Horseback," and with Dorothy Gish in "The Queen's Husband." He played in "The Desert Song" for 47 weeks. His most recent successes were in J. B. Priestly's "Dangerous Corner" at the Fulton Theatre and in "The Dark Hours" at the New Amsterdam Theatre.

The cancellation here last night was particularly disappointing in view of the fact that Miss Marion Tatum of Raleigh, a graduate of the Carolina Playmakers, was a member of the cast.

Mr. Clarke said that he hoped to be able to return here next week and present "The Master Builder."

Bram Nossen's stage career has been unusually varied. He played opposite Mrs. Fiske in "Mrs. Bumpstead Leigh," with Lenore Ulric in "Noma," with Frank Meglin in "Abraham Lincoln," Edward Norton in "Beggars on Horseback," and with Dorothy Gish in "The Queen's Husband." He played in "The Desert Song" for 47 weeks. His most recent successes were in J. B. Priestly's "Dangerous Corner" at the Fulton Theatre and in "The Dark Hours" at the New Amsterdam Theatre.

The cancellation here last night was particularly disappointing in view of the fact that Miss Marion Tatum of Raleigh, a graduate of the Carolina Playmakers, was a member of the cast.

Mr. Clarke said that he hoped to be able to return here next week and present "The Master Builder."

The Master Builder, Ibsen's play which was to have been presented by Madame Borgy Hammer, famous Norwegian actress, and her troupe of players Wednesday night was called off at 8:20 Wednesday night because The Master Builder Bram Nossen, failed to appear.

The desk clerk at the Raleigh Hotel said yesterday that Nossen, who was staying there while in Raleigh, departed Wednesday afternoon between 4:00 and 5:00 o'clock. There has been no trace of him since.

Fifteen minutes after curtain time, Secretary E. S. King of the College Y. M. C. A., sponsoring the appearance of the Borgy Hammer Company, announced that due to sudden and serious illness of the leading man, the company would be unable to fulfill its contract.

Manager Laurence Clarke said that he felt Mr. Nossen's ailment was of a nervous origin, and that he hoped he would be able to return to the cast for the scheduled appearance at Duke University tonight, but that he had wired New York and expected a substitute to join the company immediately.

Scenery and stage equipment are being held by E. S. King, secretary of the Y. M. C. A., who was in charge of the performance, and an engagement at Duke last night was cancelled.

The plays, "Ghosts," which was given Tuesday night and "The Master Builder" were to have been presented by the troupe throughout the South, to the Pacific Coast. Monday afternoon and evening the plays were given at Wake Forest. After leaving State College, they were to have gone to Duke, the University of North Carolina, Queen's, Winthrop, and Spartanburg.

Since none in the cast had made up in preparation for the play, before Nossen was announced missing, it has been said by some in charge of the play that Nossen's departure was known to the cast early last evening.

Engineering Faculty Makes Scientific Investigations

Professors Fountain and Tucker Assist in Testing Materials for Stadium; Professor Greaves-Walker Continues Articles for "Ceramic Age"; Professor Geile Elected President of North Carolina Building Congress

Faculty members of the State College Engineering school carried on scientific investigations during the summer, some of the results of which will soon appear in the form of papers in magazine and scientific journals.

H. B. Shaw, Professor of Industrial Engineering and James Fontaine, assistant in the Engineering Experiment Station, investigated the effects of grades on the cost of highway transportation, a discussion of their findings has been published in the Proceedings of the Highway Research Board.

Professor Fontaine and Harry Tucker, Director of the Engineering Experiment Station assisted in the testing of materials used in the construction of the new College Stadium.

Dr. J. L. Stuckey, Head of the Department of Geology, had a bulletin published by the Engineering Experiment Station on "Occurrence and Physical Properties of North Carolina Marbles." The Station is also preparing to issue another bulletin on "The Occurrence, Properties, and Uses of Commercial Clays and Shales of North Carolina," by Professors A. F. Greaves-Walker, Head of the Ceramic Department, and N. H. Stote, and W. L. Fabianic, research assistants.

Professor Greaves-Walker continued the page which he conducts in "Ceramic Age," and with the assistance of George A. Willis, has been making a study of North Carolina Feldspar to determine if the feldspathic rocks of Western North Carolina would produce a material that could replace English Cornwall stone. The results so far show that the feldspar of North Carolina has physical properties equal in every respect to those of the English Cornwall stone.

Professor Tucker of the Highway Engineering Department, published a number of newspaper and magazine articles during the summer and was appointed a member of the Highway Safety Committee of the Carolina Motor Club of North and South Carolina.

W. C. Geile, professor of Construction Engineering, was elected president of the North Carolina Builders Congress in July and addressed the Association of General Contractors of America at their annual convention at Wrightsville Beach during the same month.

J. S. Whitner, Associate Professor of Sanitary Engineering, attended Summer School at State College and received his Master of Science Degree in Civil Engineering; he also attended the American Water Works Association convention in Chicago.

Professor C. L. Mann, Head of the Department of Civil Engineering, as Secretary of the Wake County Re-employment Committee, has assisted in the organization of relief work in Wake County and in cooperation with the United States Coast and Geodetic

Survey and the North Carolina Highway Commission, has been instrumental in the organization of direct relief projects for unemployed engineers.

Professor J. B. Paulson of the Department of Architectural Engineering, continued his studies of the authorship of certain famous paintings during the summer and the results of his researches will be published soon in Art and Archaeology.

Professors L. M. Keever and R. R. Brown in the Electrical Engineering Department have conducted important investigations on electrically welded joints.

Professor K. B. Glenn also of the Electrical Engineering Department finished his investigation on "Electrical Grounds" which will be published shortly in the form of a thesis for the Master of Science degree.

Professor L. L. Vaughn, head of the department of Mechanical Engineering, had charge of the short course for white school janitors at State College and for colored janitors at the Negro A. and T. College in Greensboro.

Professor John M. Foster, head of the department of Aeronautics, prepared an index of technical articles appearing in current publications for the use of students taking courses in Aeronautical Engineering.

Professor R. P. Kolb spent the summer at Cornell University assisting in preparing the manuscripts for a series of textbooks on Heat-Power Engineering.

Dr. E. E. Randolph, head of the department of Chemical Engineering, spent a portion of the summer visiting chemical industrial plants in North Carolina, Virginia, and Tennessee and was also engaged in writing a "Manual of Chemical Engineering Practice," which is now ready for publication.

Professor C. S. Grove of the Chemical Engineering Department, was located with the Bethlehem Steel Company in New York engaged in special work under the direction of the Massachusetts Institute of Technology, a part of the required work for his Doctor's Degree.

Jack Coffey is Manager of Varsity Football

Jack Coffey of Lenoir is the head manager for the 1933 varsity football team. His assistants are Romulus Stephens and W. L. L. Dixon, junior managers; and three sophomore managers W. R. Moore, Bill Dorsey, and McDaniels.

The duties of the manager are to line off the field, take care of all equipment, and be of general use to the football team and coaches.

The reward for being a manager is a school monogram which is only awarded to a manager who has worked four years on the managerial staff of a varsity team. W. L. Dixon will have completed three years of work with the football team this season. Next year he will be eligible to run against Romulus Stephens for head manager of the football team.

The freshman managers have as their head Bill Barker, Burlington, N. C. He is ably assisted by Edward Grodecki, Ellis Frady, Charles Tatum, and L. D. Nelson.

POWERFUL DRAMA SHOWS AT STATE

</

AG GROUP HEARS ADAMS TUESDAY

Winner of William H. Danforth Fellowship Award Speaks at Club Meeting

W. E. Adams, winner of the William H. Danforth Fellowship and business manager of the *Agriculturist*, spoke at the "Ag" Club meeting held Tuesday night.

Adams, a senior in Agriculture, told of the nature of these fellowships and of his experiences while attending the courses during his four-week course this summer. He stated that the fellowships are given by Mr. William H. Danforth, president of the Purina Feed Mills, and the American Youth Foundation Camp, to one junior in agriculture in the twenty-nine largest agricultural schools in the United States and one in Ontario, Canada.

The purpose of the fellowship was to give the student a broader view in his field and to teach him essential fundamentals of life that are not included in an agriculture course. Amounts allotted to the fellowships at the various schools vary, depending upon the distance of the school from St. Louis, where the mills are located. State was allotted \$103; this amount defrays the expense incurred in making the trip. The Dean of the school refers juniors in the agriculture school to a committee of three faculty members, which in turn picks three, one of whom they recommend, and refer these names to the company. From these three the mills choose one to represent the school.

In his talk Adams gave the schedule followed by the delegates. "The first week," he said, "was spent in studying the work carried on at the Purina Experimental Feed Farm where the various feed formulas are tested by actual experiment before being put before the public. The second week is spent at the mills, in St. Louis, where courses are given in general salesmanship. Following this the students leave for a two weeks stay at the American Youth Foundation camp, in Michigan. Here the mornings are devoted to classes in Ethics and Attitude, Achievement Analysis, and the Four Fold Life; the afternoons are devoted to sports and social activities." A fellowship will be offered to freshmen next year, but this will only include a two weeks stay in the Michigan camp.

Final plans for the annual "Barn-warming" were presented to the club by Chairman C. D. Thomas and H. E. York of the publicity committee. The affair will be held tonight, October 13, from 8:30 to 12, in the Frank Thompson Gymnasium. The Gym will be decorated in a rustic fashion in pines this year. No paper and straw will be used because of the condemnation of the building this fall. As in previous years, the girls will dress in gingham and the boys in overalls. This year dancing will be interspersed by a program of stunts and novelties, and refreshments will be served. Eddie Poole's orchestra will furnish the music.

It was decided to issue no bids to students outside of the Agricultural School. Agricultural alumni will be admitted free. An invitation will be extended to the 4-H Club members who are attending the State Fair on that day.

PUBLICATIONS MEMBERS TALK IN CHAPEL FRIDAY

Poole Tells of Benefits to be Gained From Work on Campus Publications

Brief talks on school publications by R. S. Poole, Business Manager of the *Agromech*; W. P. Kanto, member of the should Publications Board; and J. E. McIntyre, Business Manager of the *Technician* featured the Freshman Assembly last Friday.

R. S. Poole spoke on the *Agromech*, State College's annual and the *Wataugan*, the monthly humorous literary magazine. He stated that three things could be gained by working on these publications: first, from a pecuniary standpoint; second, from a literary standpoint; and third, from the business training in handling a Business Managership.

An explanation of the workings of the student Publications Board was given by W. P. Kanto. He described its origin, its duties and emphasized the work that it had accomplished during its short career.

The Business Manager of the *Technician*, J. E. McIntyre told of work on the newspaper mainly concerning the advertising end and asked all students to buy from the stores advertised in the paper as it helped them as well as the paper.

During the assembly Dean Cloyd requested the urgent need that students have on file their correct name and address, to be published in the directory which will go to press in the next few weeks.

Lost and Found

LOST:

1 brown leather case with zipper flap. Contained 1 Chemistry textbook, 1 Engineering Drawing text, and complete drawing outfit.
1 bunch of keys. Probably lost in Gym. Reward offered by owner.
1 plain nickel vanity case. Lost in Holladay Hall.

Anyone finding these articles will please bring them to the main office of the "Y."

FOUND:

1 notebook belonging to Miguel Estera.
3 overseas caps.
1 fountain pen, mottled gray and purple.
1 fountain pen, mottled green and black.
2 keys to an Eagle lock. No serial numbers.
1 key to a Corbin lock. Serial No. 60530.
Part of a cafeteria meal ticket.
The owners of these articles will please call for them at the main office of the "Y."

ALPHA ZETA DISCUSSES TECHNICAL PUBLICATION

Doctor Harrison Tells Group of Benefits Possible From Scientific Journal

Alpha Zeta, agricultural honor society met Monday at 7:00, in Polk Hall.

Dr. T. P. Harrison, professor in the English department spoke on the benefits of a technical journal on the State College campus, and discussed with the students the possibility of having such a journal on the campus. The group discussed a tentative smoker which will be held for freshmen Monday night, at 7:00 in Polk Hall.

The president of Alpha Zeta is Darnelle Whitt; and Arthur Hoffman is scribe of the organization.

FORESTRY CLUB TO HOLD RODEO

Annual Student Competition to be Held at Watts Hill Demonstration Forest

The annual "Rodeo" of the Forestry Club will be held at the Watts Hill Demonstration School forest. It was decided at the Forestry Club meeting Thursday.

The affair, held for the first time last year, was such a success that it was adopted as an annual function of the club. The "Rodeo" consists of a number of games and stunts in which the various forestry classes enter teams. The class winning the highest number of points scored in competition receives a cake and has its name engraved on a plaque which is kept for that year. The event will be an all day affair, games being held in the morning and afternoon and campfire stunts to be held at night. Last year the junior class won the event.

Events will fall in four classes: Trees, fires, field and track, and camp fire. Under trees will be height estimation, diameter estimation, climbing, sawing, chopping, identification, and log riding; under fires, fire building and smoke chasing; under field and track, which are to be run in field boots, are running broad jump, doubles, horseshoe pitching, standing broad jump, 50-yard dash, rock put with a 20-pound rock, rock throw for distance and accuracy; and under camp fire, tobacco chewing for accuracy and distance, the biggest liar, the best quartet, cracker eating, and pancake cooking, to be judged for form and results.

Following the last stunt, initiations will be held for both upperclassmen and freshmen into the Forestry Club. Those serving on the initiation committee are S. K. Hudson, W. E. Boykin, and B. H. Corpening.

Announcements

Any student who desires his picture in the annual and has not signed the Uniform Picture Fee Petition by Friday, October 20 will be charged \$6. Only about one hundred more signatures are necessary for the petition to be successful. A copy can be found in the College infirmary, or in the Dean of Students Office.

Bus. Mgr. Agromech.
Professor Ralph Shumaker, head of the School of Architecture extends an invitation to all State College students interested in stamp collecting to attend the meeting of the Raleigh Stamp Club Tuesday at 7:00 at 120 1/2 Fayetteville Street.

Gamma Sigma Epsilon will meet Monday night at 8:30 in the Chemistry building.

C. A. WILLIAMS, President.
There will be an important meeting of the Order of 30 and 3 Tuesday evening at 7:30.

LOCKE WEBB, President.
The Blue Key and Golden Chain joint committee will meet in the Student Government office tonight at 6:30.

W. F. KANTO, Chairman.
All freshmen in the School of Agriculture are invited to a smoker to be given in Room 208, Polk Hall, Monday night at 7:00 o'clock.

Beginning Monday and continuing through the week, there will be rifle instruction and range firing on the outdoor, small bore range south of Freshman Field. All upperclassmen and freshmen interested in trying out for the rifle team should report at least one afternoon during the week.

Capt. Venable.
Insignia of rank for cadet officers has arrived and can be obtained at Captain Venable's office this afternoon, and Saturday morning. Thereafter they may be obtained at the armory. Prices are: Lieutenants, 50 cents; captains, 75 cents; majors, 35 cents; lieutenant-colonels, 70 cents; and colonels, one dollar.

PAGET ANNOUNCES DEBATE TRY-OUTS

Try-outs for Places on State College Debate Team to be Held Next Week

Try-outs for places on the debating team will be held next week from 4 to 6 o'clock any day except Wednesday and Saturday, Prof. E. H. Paget, Coach of Forensics at State College, announced Wednesday.

The tentative wording of the debate question is as follows: "Resolved that the powers of the president of the United States should be substantially increased as a permanent policy, especially those given by the NRA and the right to institute controlled inflation of the currency."

All students expecting to try out for the team should report to Professor Paget as soon as possible, in order that they may receive data on the question in time to prepare a five-minute speech. There is a bibliography for the question at the desk in the library.

There are twelve or fifteen places open on the varsity squad and eight or ten on the freshman squad. Co-eds are eligible to try out. No previous experience is necessary.

There is a vital need of more debaters in order to maintain State's excellent record. This record includes: one all time debating championship, two national championships, three South Atlantic, three Tri State, eight State, and seven Southern titles in Forensics in the past four years.

The team this year is seriously disabled by the loss of Lonnie M. Knott, all-time champion, and William E. Braswell, well known speaker and debater.

On the other hand, the team is supported by Cotton, Frank Busbee, and Dwight Stokes who are all experienced and promising debaters. Stokes is returning to State after a year's absence.

Fencing Club meets 1:30 Monday. W. E. BRASWELL.

Mother-Tongue
Senor Alfredo Barrera Vasquez, native of Yucatan and a direct descendant of the ancient Mayans, has joined the staff of the Middle American Research Department at Tulane University, which for some years now have delved into the lore and culture of his ancestors. Senor Barrera Vasquez, who comes to the Tulane department from the University of Mexico, where he was a professor of Mayan language, spoke the tongue of this ancient people long before he learned any other language.

FOR MORE ENFORCEMENT

Student Government at State College has in the past failed in its express purpose. The honor system has not been enforced, hazing still occupies much of a freshman's time during the first few weeks of school, the enforcement of "quiet hour" in dormitories and fraternities has long ago passed into obscurity, and students have totally failed to cooperate with their own government in carrying out laws set up by it.

The efficiency of the honor system has declined, and at present it is so low that many classrooms have turned into coöperative courses, in the absence of a professor. When a student is accused of cheating and brought before the Student Council for trial, the case often becomes a situation of accused against the accuser, for the faculty is powerless where the honor system is concerned.

At the close of school last year a senior in the school of agriculture who had through his four years in college been making high honor grades on his work was brought before the Student Council for cheating. He was convicted, and it was decided that he would be given a "C" average on his work and forced to return and attend school for another year in order to receive his diploma. However, before commencement he was given permission to graduate, and the matter was considered forgotten. By pardoning this student, the way was left open for others to receive like treatment, and the purpose of the Honor System received a drawback.

Before, when a student was expelled from school, his name was always withheld if possible from his fellow students. This did not permit a vivid example to be placed before others which might dissuade them from like acts later.

There has been much discussion among executives in State College of doing away with Student Government completely and going back to the old method of complete faculty supervision. This would probably be the quickest and surest manner of upholding a student's honor and carrying out such rules as might be set up by the Faculty Council, but there is no reason why, with proper cooperation among members of the student body, such a move should be made.

From the very beginning of the fall term, the Student Council has shown its willingness to coöperate with any projects given them. They have given underclassmen various insights into the functioning of Student Government on the campus; they have told freshmen of the nature and purpose of the Creed, and freshmen have signed these creeds immediately after listening to these talks, while their meaning was still fresh in mind. In the past freshmen were given them to sign and it was done in the same manner that many signed their names in books bought during the first few days of school—without any knowledge as to their contents—to be learned by a process of absorption as was the functioning of the honor system when an occasional student was expelled from the college.

There is now no excuse for infringements of the rules set up in the Constitution. Members of Student Government should begin enforcing the constitution down to its finest points, regardless of adverse feeling among what will surely be a small minority of students. It should be carried out to such an extent as to definitely put before anyone considering replacing Student Government by faculty control the fact that students can enforce their own laws.

The completion of the east stadium marks the clearing of another obstacle and a step farther in the building up of State College. An application for a new loan toward the completion of the proposed north wall and the walkway to Hillsboro street is now on file in Washington. If luck is with us we shall have our horseshoe soon.

LET'S GET TOGETHER

In an effort to recapture some of the old time spirit that has strangely fled from the campus this year, a giant parade has been planned to arouse interest in the coming State-Florida game.

The parade is being sponsored by the Raleigh Junior Chamber of Commerce, and to make it a success the backing of the entire student body is needed. It is the desire of the Junior Chamber of Commerce, not only to arouse interest in the football game, but also to bring about a larger degree of coöperation between the students of State College and the merchants of Raleigh.

This move by the Raleigh trade body is commendable, as it is one of the first attempts to bring about a condition that is now sadly deficient. There has been no real relationship between the community and the State College student, the students seemingly preferring to remain as a separate and outside group. This is probably the paramount purpose of the celebration.

The other purpose of the affair is to impart in the student body at least some degree of the lagging school spirit. At the beginning of the year it became evident that the student body was not supporting the school as it should, and as the year wore on this trend became more and more noticeable. Now, just before one of the biggest games of the season the ebb has fallen to a new low. In order to rectify this glaring lack of spirit, it has become necessary to offer artificial means of resuscitation. If this fails in its effort, only an act of Providence can restore it.

In past years when such parades have been held, there have been, and to relate, occasions on which students have become rowdy and trouble resulted. It is sincerely hoped that the students in the parade tonight will conduct themselves in a gentlemanly manner and cause no trouble. Citizens of this city do not mind a certain amount of noise, when it is orderly, but when it gets out of bounds they begin to object, and rightly so. The parade can be conducted in an orderly manner if the students would take others into consideration at the time and conduct themselves in such a manner as to become a credit to State College and not a nuisance.—E. S. K.

MASTER BUILDER DISAPPEARS

A dramatic ending to a series of two plays was presented last night when, fifteen minutes after curtain time, the leading man in "The Master Builder" failed to appear and the play was called off. The irony of the affair, it seems, was the fact that Bram Nossen checked out of his hotel apparently giving no notice to anyone in the cast of the fact that he was leaving at 4 o'clock Wednesday afternoon, and it was not until 8:20 that he "had suddenly been stricken by a nervous illness" and the play would have to be "postponed."

When Nossen left Tuesday night, he was the only one among the actors who carried any clothing, and Wednesday night while the actors were supposedly preparing to give the play, none had put on any make-up. His sudden illness was evidently not a surprise to everyone.

Credit should be given E. S. King, Professors J. D. Clark, and A. I. Ladu in sponsoring the bringing of Madame Borgny Hammer and her cast to Raleigh. They were responsible for bringing to Raleigh citizens, acting which has been unsurpassed for years by any such group here, and if any condemnations are to be made regarding the "postponement" of "The Master Builder," it is hoped that it will be directed at the right source.

The need for a scientific publication bearing strictly on technical subjects and having as its object the instruction of students rather than pecuniary benefit has long been felt on the campus as an expression of what State College is—a technical college. The move made by the Engineers' Council to issue such a paper will, if given the right support bear fruit in the future and thrive on a more technically-minded student body.

College Opinions

THE NEW AND THE OLD

The Greek conception of a university was a place in which many eager young men gathered about a renowned scholar, sat at his feet, and drank in the wisdom which poured from his lips, refreshing, stimulating and enriching themselves by contact with a great personality. And though the University system has been much complicated since that day, the same idea is, to a certain extent, still prevalent. Modern students go to Harvard to hear Baker, to Columbia to hear Dewey, and anywhere else to hear anybody of particular excellence in his own field.

In one important respect has the old idea of the university been altered. There is no longer opportunity for personal contact with the teacher. The classes of the best professors are too popular, too overcrowded to enable personal contact between professor and student. And so it would appear that the only personal touch between student and professor lies in that part of the professor's particular personal philosophy or personality which he reveals.

And nearly every course offered in this college or any other must be humanized to make it endurable. From the simplest to the most complicated textbooks, ordinary human examples are used to illustrate the points the author wishes to make. And in a lecture, which is, after all, only as formal as the professor wishes to make it, how much more natural it is that as a teacher he should use a human example, and that one with which he is most familiar—himself—to put over his ideas.

And if the personality of the man is at all interesting, it is the man who will be remembered long after the course and all that pertains to it have been forgotten. It is for this reason that comments to the effect that Koch's courses in Shakespeare are really only courses in Koch seem, to use a specific example, a little unreasonable. When the professor, lecturing on the subject of himself, interferences with and replaces the important material in the course, it is up to the student to decide whether or not he is sufficiently interested in the man to take, not a course under him, but in him.

At any rate, let us think twice before we criticize a man for giving life and interest to a course in his own way.—The Daily Tar Heel.

HERE AND THERE

By G. W. FORD

It seems that a long time ago men thought that the world was flat. Then came a long line of scientists, scholars, and adventurers who took it upon themselves to prove to mankind that the world was really round. Funny how things change . . . after a look at this State Fair I'm beginning to think the world is flat . . . in one sense of the word at least. Well, wait until the Blue Eagle starts hatching her eggs . . . there may not be chicken served at every table but we'll at least have ham and eggs. And while we're on this NRA did you ever stop to think just why the president had all the employers joining this movement to sign the Blanket Code? Here's how I figure it: he wanted to keep a lot of poor fellows from being left out in the cold this winter.

The Grid-O-Graph which has been run in Pullen Hall during our two last out of town games seems to be gaining popularity . . . in fact, some people get more out of seeing the Grid-O-Graph than they do out of attending a game. You see, they could sit at a game and not know who was carrying the ball half of the time or what the penalty was for, but the Grid-O-Graph explains all of this. Romeo Lefort and his crew of students are giving us their services gratis. It's up to the rest of us to get behind this and make it a success.

The play, The Master Builder, had to be called off last Wednesday because the leading man was suffering from nervous prostration. There are two ways to diagnose his ailment: first, he may have become too wrapped up in the part he played in the story. Ghosts, the night before. On the other hand, if he was wrapped up in the financial part of it, the size of the audience may have turned the trick. . . . Had Primo Carnera been present, he could have held the whole crowd in the palm of his hand.

We received an unsigned statement in our mail box the other day to the effect that the students of the second floor of 1817 Dormitory wish to counter a story printed in our first issue. The story to which they refer is that in which O. A. Wallace, Jr., is said to have used a Coca-Cola bottle for defense in an encounter with Bob Edwards. They say that no Coca-Cola bottle was used in the brawl but they don't deny the fact that a brawl took place. The truth of the matter is he used a paddle . . . it reminds me of that old joke that ended with, "That was no lady, it was my wife."

This Malcolm Howell of Hendersonville is a model-making boy for sure. His model of the Yankee Clipper, a Pan American passenger airplane, is an exact copy in every detail. It is on exhibition in Professor Boshart's office. I'll bet that a lot of fellows would like to be able to make a model or two . . . not necessarily airplane models, there are other kinds.

So far this year the spirit around here is about as low as a woman's ankles . . . tonight we make our big bid to revive that old State College spirit. The whole affair, to be successful, must have the coöperation of each and every student. Let's all turn out and make it go over. If we show the boys how much we're for them, they're sure to capture that 'gator on Saturday.

Our Own Minute Drama

Now I'll give you a play to make up for the one that we lost. My scene is a woodland glade . . . no, this is a different story, stick with me . . . The hunter, wearing a Sherlock Holmes hat and a streamer white muscane . . . beaver . . . is smoking a pipe and holding a tin of well known tobacco in his hand. The rabbit, with three wrinkles on his nose, sits on his hind legs and sniffs at the smoke from the hunter's pipe. The rabbit speaks:

"Did you say ten cents?"
"Yes, ten cents."
"Sucker."

Princeton Questionnaire

Two hundred and ninety-eight of the class of 1937 came to Princeton for an education, 176 because of the University's name and reputation and 70 for contacts and social advantages, according to the Princetonian's annual questionnaire to the freshman class. Many indicated several reasons in answering this question. A few made their choice because of the campus and nearness to home, and several frankly stated that they had come to last for four years. Phi Beta Kappa keys were preferred to varsity letters by 339 to 166. Various opinions were given on the qualifications of an ideal girl. All one freshman demanded was a girl who could "hold her liquor" and was "not too high hat." Another would not be satisfied without a girl named Mary, 5 feet 6½ inches tall and an undergraduate at Vassar.

"Rachel"

The observatory at Mills College has a telescope named "Rachel."

A Dream Fulfilled

ELECTRICAL ENGINEERS HEAR JOHNSON TUESDAY

The Electrical School of State College Has Largest Membership in South

Theodore S. Johnson, professor of Electrical Engineering at its initial meeting held Tuesday night. Johnson talked on the qualities of a good engineer and why he should participate in all activities that concern his profession.

Norman M. York, president of the society, welcomed the electrical students and expressed his desire that they continue to attend the society's meetings.

W. H. Browne, professor of Electrical Engineering, gave several reasons why a student should become a member of the American Institute of Electrical Engineers, and the benefits that could be derived from such a society.

R. S. Fouraker, associate professor of Electrical Engineering, presented a brief history of the society which was formed in 1884. Fouraker pointed out that the Electrical School of State College has had the largest membership of any other college or university in the fourth district which comprises the states of North and South Carolina, Georgia, Alabama, Mississippi, Florida, Kentucky, Virginia, and Louisiana. The total membership of all the societies amounted to 17,695 in 1931.

The Students Activities Conference this year will be held at State College if possible. On November 1 a meeting will be held at the University of North Carolina.

York selected the following men to serve on the Membership Committee: G. W. Schumtz, chairman; C. N. Rogers, D. S. Barnes, J. T. Freeman. Heretofore no freshmen in the Electrical School were allowed to become members of the society, but beginning this year they will be allowed to join.

The men appointed to serve on the Program Committee are: J. F. Abernethy, chairman; W. B. Powell, and A. M. Epstein.

The next meeting of the Society will be held on October 24 at 6:45 p.m.

Big Games This Season, Ranks
As One of Leading Conference
Eleven

Saturday will be a big day for State
College when the University of Florida
Alligators clash with State's Wolf-
pack at 8:00 p.m. The occasion will
be especially outstanding since the
game will officially open up the new
\$40,000 stadium on Riddick Field.
The Alligators will attempt to make
the occasion auspicious too by their
determination to get revenge for the
17-6 defeat by State last year.

Advance ticket sales indicate that
a record breaking crowd will attend
the night game. Athletics officials
say that every available seat will be
taken which accounts for more than
12,000 and that temporary bleachers
will be erected at the ends of the
field for those who are unable to take
seats in the new concrete stands on
the east side of the field and in the
old stands on the west side.

WOLFLETS DEFEAT E. C. T. C. GRIDDERS

Three Full Freshmen Teams Get
Into Game for State College
Friday Afternoon

State College Wolflets took the Teach-
ers from Eastern Carolina College for
an 18 to 0 ride last Friday afternoon
on Riddick field. Although this was
the initial appearance of the frosh this
season, the State frosh gave a splendid
performance.

Coach Bob Warren put in three teams
during the game, trying out even the
lowliest scrubs. The three teams piled
up ten first downs to three for their
opponents.

The second backfield combination,
composed of Hayden, quarterback; Chil-
son, right half; Blanchard, left half,
and Brown, fullback, looked best, with
Chilson making all the noise. Chilson
broke loose several times for long gains,
once stepping thirty-five yards on an
off-tackle play, only to be run out of
bounds on the two yard line.

Hayden and Blanchard were the fire-
works in the Techlets' passing attack,
attempting six passes and completing
three for a gain of 75 yards. Cara,
end, was on the receiving end of a pass
good for fifteen yards.

Morgan, E. C. T. C. fullback, gave the
Wolflets their biggest worries with his
smashing drives that gained most of
the E. C. T. C. yardage.

Cara, frosh end, and Goode, tackle,
were the line stars for the Wolflets,
while Kapelle and Cox were the stal-
warts of the E. C. T. C. line.

The line-up:

State	Position	E. C. T. C.
Conrad	Left End	Ridenhour
Goode	Left Tackle	Summerville
Jenkins	Left Guard	H. Brown
Smothers	Center	Cox
Regdon	Right Guard	T. Brown
McIntyre	Right Tackle	Johnson
Thompson	Right End	Kapelle
Roy	Quarterback	Rogerson
Scanlon	Left Half	Puckett
Tatum	Right Half	Tolar
Bugg	Fullback	Morgan

State scoring: Touchdowns: Blanchard, Tatum, Chilson. Substitutions: State: ends, Cara, Bannerman, Campbell, Hein; guards, Gabe, Chiemiego, Jenkins, Regdon, Kirschner, Matys, Clark; tackles, Kubisa, Clava, Snyder, Istvann, centers, Schlossberg, Pollnaky, Spitalink; quarterbacks, Barb, Hayden, Jaskwich, Rynecka; halfbacks, Boyea, Blanchard, Chilson, Fox, Goode, Gershowitz, McLaughlin, Rivrebark; fullbacks, Brown, Delphin, Mass, Reinsch, Westcot. E. C. T. C.: halfback, Noble; ends, Waldrop, Eason; fullback, Morgan; tackle, Speight.

Florida Lugger

CHARLIE STOLZ

Flashy Florida fullback, is one of the main springs in the Alligator organization. He will be seen in action here Saturday.

CLEMSON SCORES WIN OVER STATE

Wolfpack, Favored to Lick Tigers,
Outrushed and Outplayed
During Contest

A highly improved Clemson College
football team sprang one of the great-
est upsets in Southern Conference
ranks when they defeated the favored
State College Wolfpack 9 to 0 on
Clemson field.

State, picked to win by several
touchdowns, could never get a strong
attack under way and were out-
charged and outplayed at every turn
until the last five minutes of the
game by the scrappy Tigers.

The Tigers, rushing at great speed
in the first half, broke through for
a touchdown and a safety in the sec-

GRID ENTHUSIAST TO GIVE TROPHY

William P. Jacobs Offers Award
for Best Lineman in South-
ern Conference

William P. Jacobs of Clinton, South
Carolina has offered a trophy for the
best interference man in the Southern
Conference, to be awarded by the con-
ference authorities. Jacobs is num-
bered among the real gridiron en-
thusiasts of the South and his object
is to give some public recognition to
one of the most important phases of
football—the linemen.

Coaches and scouts will select the
man, under the plan announced Tues-
day night by President C. P. Miles,
president of the Southern conference
and athletic director of Virginia
Polytechnic Institute. The plan was
recommended by Richmond sports
writers at the request of the conference
executive committee.

Each coach and each scout at the
10 Southern conference schools will be
asked to vote for a first, second and
third choice for the honor. First choice
will count five votes; second choice
three and third choice one point. The
player receiving the largest total would
receive the ward.

The votes will be turned in at the
end of the season to President Miles,
who will announce the result. The
time and place for awarding the trophy
has not been announced. A special
committee to handle the details is ex-
pected to be named at an early date.

FOOTBALL SCHEDULE State plays Florida at Raleigh (night game).

Carolina plays Georgia at Chapel
Hill.

Duke plays Tennessee at Dur-
ham.

Maryland plays Tulane at New
Orleans.

Virginia plays Columbia at New
York.

V. M. I. plays Davidson at
Davidson.

V. P. I. plays William and Mary
at Richmond.

Washington and Lee plays Yale
at New Haven.

Wake Forest-Richmond Uni-
versity game cancelled.

Standings

Team	W.	L.	T.	Pct.
Duke	1	0	0	1.000
Carolina	1	0	0	1.000
State	0	0	0	.000
Wake Forest	0	0	0	.000
Davidson	0	0	0	.000

Big Five Scores Last Week
N. C. State, 0; Clemson, 9.
Duke, 22; Wake Forest, 6.
Carolina, 13; Vanderbilt, 20.
Davidson, 28; Wofford, 13.

SWIMMING TEAM BEGINS PRACTICE

Thirty-five Candidates Report for
Fall Practice With Coach
Joe Moore

Prospects look good for a fine
swimming team this fall judging from
the 35 hopeful candidates which re-
ported for the first time to Coach
Moore Monday evening. Students who
wish to try out for the swimming
team and have not reported yet can
still come out any time next week
said Coach Moore Wednesday evening.
Practices are being held every after-
noon at 4:30 p.m.

"There is a plentiful supply of ex-
cellent material for the swimming
team," said Coach Moore. "If all the
candidates keep up the fine spirit
which has been shown thus far, we
should pile up a good record this win-
ter. Tentative plans and negotiations
(Please turn to page six)

Power

LEO BILINSKI

This formidable 196 pound tackle of
the Alligators, Leo Bilinski, is ex-
pected by Coach Dutch Stanly of
Florida to wreak havoc with the State
line Saturday.

Touch Football Introduces Fall Intramural Competition

The intramural sports program,
under the direction of Johnny Miller,
got under way Wednesday afternoon
when the Pi Kappa Alphas defeated
the Pi Kappa Phis in fraternity foot-
ball, and the 2nd floor 1911 dormitory
winning their football game in the
Dormitory group. In the horseshoe
competition, the Delta Sigma Phis set
down the Kappa Sigmas and the 1st
floor 1911 licked their opponent.
"Besides these teams playing Wed-
nesday afternoon, there were ten other
teams practicing on the campus," said
Johnny Miller Thursday. "I would not
be surprised if there were not more
than 125 players on the fields Wednes-
day afternoon participating in the
intramurals activities. The students
seem very much enthusiastic about the
Program this fall and the cooperation
among the groups has been splendid."
More interest has been shown in
horseshoes than any previous year,
Miller said that if the interest in the
game continued to rise he would see
that more horseshoes and pegs would
be gotten. The horseshoe courts are
located at present between the
gymnasium and the 7th Dormitory.
Intramural engagements for the
coming week are as follows: Theta
Phi vs. Sigma Phi Epsilon, October 16,
playing football on Red Field. Kappa
Alpha vs. Alpha Lambda Tau, October
17, playing football on Frosh field.
Alpha Kappa Pi vs. Alpha Gamma Rho,
October 18, playing football on Red
field. Y. M. C. A. vs. 3rd floor 7th,
October 16, playing football on Frosh
field. 4th dormitory vs. 2nd Watauga,
October 17, playing football on Red
field. 3rd South vs. 2nd South,
October 19, playing football on Frosh
field. Theta Phi vs. Lambda Chi
Alpha, October 16, playing horseshoes.
Sigma Pi vs. Alpha Lambda Tau,
October 17, playing horseshoes. Kappa
Sigmas vs. Sigma Phi Epsilon,
October 18, playing horseshoes.

Tell me
something..

what makes
a cigarette
taste better

WHAT makes anything taste
better? It's what is in it
that makes a thing taste better.

CHESTERFIELDS taste better be-
cause we buy ripe tobaccos. These
ripe tobaccos are aged two and a
half years—thirty months. During
this time the tobaccos improve—
just like wine improves by ageing.

CHESTERFIELDS taste better be-
cause they have the right kind of
home-grown tobaccos and Turkish
Tobaccos "welded together."

We hope this answers your
question.
