

PARALYSIS WAR GIVEN SUPPORT BY STATE BOYS OVER \$100 COLLECTED

Student Council Originates Project to Help Fight Infantile Paralysis; Each Student Gives Dime for Cause; Many Organizations Make Honor Roll With 100 Per Cent Contributions; To Be Come Annual Affair

The "March of Dimes" was brought to a successful close on Tuesday afternoon, with a total of \$100.55 being raised during the campaign.

Conceived and directed by the members of the Student Government, the "March of Dimes" constituted State College's part in the nation-wide drive against infantile paralysis which is sponsored each year by the President of the United States.

Over a period of five days, beginning last Friday, every member of the Student Body was given a chance to contribute. The response to the appeal was gratifying in that several groups contributed one hundred per cent.

Debaters Depart For Appalachian

The State College Forensic Squad left yesterday for Boone, North Carolina, where they will compete against approximately 150 speakers representing 25 colleges from seven Southern states in the Appalachian Mountain Tournament to be held today and tomorrow.

Apha Sigma Certain For These Gentlemen

Seven Boys Gather Large Number of Votes Which Practically Insures Them a Favorable Position When Alpha Sigma Sigma Meets To Take in New Pledges; Fraternity Both Honorable and Ancient; Members Must Meet Strict Requirements

In the waning hours of the night, if you are near the Publications Building, you might get a fleeting glimpse of boys slipping from tree to tree, getting closer and closer to the Agromeck office where they can cast their votes to help elect their less-popular school mates into the ancient and honorable fraternity of Alpha Sigma Sigma, the internationally-known fraternity which is representative of a portion of the anatomy of the lowly donkey.

And topping the list in the number of votes received is the Communist whose name might possibly be found in the column "Gleanings." In fact, the aforementioned student already has polled four times enough votes to assure him a place of honorable mention. He certainly will not be an "also ran."

A couple of the fraternity "Greeks" have been pushing each other for third place. One lives in a fraternity house pretty close to town and was all-campus in football. The other is from a large North Carolina city and is connected with the so-called humor magazine.

This summary takes care of the boys who polled votes in a big way, but the ballot is being run again this week, by request of Jimmy Catlin, editor of the Agromeck, so that he can have definite proof of a man's eligibility. These men must pass a rigid entrance examination before they can be admitted into the brotherhood. But the whole thing is in fun, boys.

Agriculturist Gains Favorable Criticism

The N. C. State Agriculturist, which features many articles of interest to students of agriculture, appeared last Tuesday.

Ag Club Contract Given For Keys

At the meeting of the Ag. Club Wednesday night the key committee submitted a report on price quotations made by different companies which wished to supply the Ag. Club keys.

Newton Interviewed In Sports Broadcast

"Doc" Newton was interviewed by J. B. Clark, sports commentator, on the "Sports Broadcast" station WPTF last Friday night.

Oddities

"Cheating is due to an unlikable professor, or a poor, uninteresting lecture, or an instructor who gives extremely difficult examinations on points unstressed in class.—South Carolina Gamecock."

At Northwestern University the humor magazine was barred from distribution until two pages of pictures showing coeds under the showers and in their baths had been taken out.

A quiet room with lights turned low;
A soft touch on my shoulder;
A warm breath on my cheek;
A little face against my own—
Who let that darn cat in?
—Exchange.

Definition: Hoover was our greatest engineer; he ditched, drained, and dammed the United States for four years.—North Texas State.

Prof. Warren T. Powell, head of student counseling at Boston University, has prepared the following study habit hints. They include:

1. Work under pressure; set a deadline inside of which work must be accomplished.
2. Make yourself rise above petty distractions; when they come, accept them, then go back to your studying without losing your stride.
3. Assume that you are liable for

an account of all that you are studying.
4. Maintain an alert questioning attitude and criticize all that you read.
5. Develop habits of positive attack on your studies. Interest seldom comes before effort is made in that subject.
6. Feel an interest in your improvement.
7. Avoid and control emotional disturbances and fatigue.
8. Plan proper length and distribution of study periods, one- to two-hour units for easy or varied work; and thirty minutes with two- or three-minute rest periods in between for unfamiliar or difficult work.

The coeds of Alabama University are hurling charges of stinginess at the men students. They recently learned that the mop-up sale more food and drink in the night than at any other time. Therefore, the fairer sex have come to the conclusion that the fellows take the girls home first and then buy something to eat.

Dr. Jay Jones, instructor in English at the University of Texas, got even with some "bright boys" in class. Before Dr. Jones came to class, one of the students wrote on the board, "Dr. Jones will not meet classes Wednesday." By the time he arrived, another student had applied the eraser, to leave, "Dr. Jones will not meet his classes Wednesday." Not to be outdone, Dr. Jones erased one more letter.

Metcalfe, the Marquette University Negro and American sprint champion, particularly seemed to have lots to spare as he breezed to his second victory over the sole Japanese survivor, Yoshiga, a gallant little fellow who churned up the cinder dust with a big handkerchief around his head.—N. Y. Daily News.
Gallant! He must be crazy.

At the Theatres
STATE
"Honey Child" is coming to town! There is perhaps no Southern girl on the stage more versatile and more successful than Clara Hazel, "the little lady from South Carolina," who has become as familiar as Bob Hope's partner in the Ripping Rhythm Review on Sunday nights.
Besides her activities in radio, she is leading lady in "Brother Rat," the George Abbott comedy of life in a Southern military school, which comes to the State Theatre on Wednesday night, February 16, and she writes a column called "New York Notes," featured in 15 Southern newspapers.
For many months Miss Hazel was in the New York "Brother Rat" Company, and when Mr. Abbott, the producer, decided to send the troupe on the road, Miss Hazel went with it. A substitute cast is continuing the run in New York.
"But what about the radio program?" asked Bob Hope when he heard of the tour.
"Don't you worry about that," replied "Honey Child." And smilingly she told him that she'd be glad to double back to New York each Sunday night until Mr. Hope went to Hollywood for a movie he will make. When Mr. Hope returns, Miss Hazel will also resume her place on the program.
"I don't know where I'd find a better part than I have in 'Brother Rat,'" Miss Hazel admits. "I do the part of a Virginia girl who attends the dances at the Virginia Military Institute. I guess I ought to know something about that, because I've been going with V.M.I. boys all my life." She is an alumna of Queen's College in Charlotte, N. C., and a member of the Chi Omega sorority.
Miss Hazel also comes naturally

Engineers Enter 'The Glass Age'

Commenting yesterday on his recent statement that this generation of engineers is now entering "The Glass Age," Prof. A. F. Greaves-Walker, head of the ceramics department, said that glass can create a "wonderland." Some of the things made of glass, Greaves-Walker says, are women's dresses, hats, stockings, bathing suits, residences, factory and office buildings, wall partitions and roofs, dinner ware, office furniture, sanitary ware, venetian blinds, curtains, draperies, insulating material, picture frames, glass trim, glass screws and bolts.

Glass is even being used to make railroad coaches and automobile bodies. During recent months a streamlined train, the coaches of which are constructed principally of glass, has been touring Great Britain.

"Ordinary plate glass is now tempered exactly as is steel except that it is chilled in air. Such glass is not only more flexible than steel of the same thickness, but will stand terrific shock and compression, as well as withstand heat to such an extent that it is used as windows in industrial furnaces and is now being used in oven doors in gas and electric ranges." He says in many factory buildings and warehouse glass block panels take the form of belts around the buildings, and in many cases eliminating entirely the use of windows.

Dr. Harlow Addresses Leadership Assembly

Dr. Ralph Harlow, professor of religion and social ethics at Smith College, spoke on the subject, "Leadership" to an assembly of most of the undergraduate leaders on the campus at a luncheon meeting in the YMCA Saturday.

The meeting, which was held at one o'clock in the north end of the Y, was attended by members of Blue Key, Golden Chain, Student Council, representatives from fraternities and the YMCA executive committee.

This was one of a series of talks by Dr. Harlow, who was on the State campus from Friday, January 28, through February 1.

"Radio Advertising"

Richard Mason, manager of radio station WPTF, will speak Tuesday evening, February 8, at 7 o'clock, on "Radio Advertising."

The talk, which is to be given in room 103 Peete Hall, is to be sponsored by Delta Sigma Pi, honorary business fraternity. According to J. S. Fulgum, Jr., president of the organization, "This is the third in a series of meetings conducted by Delta Sigma Pi. Every one is invited to attend."

McNatt To Discuss Economic Problems

Dr. Emmett B. McNatt, assistant professor of economics, will address an assembly in the YMCA next Wednesday night at seven o'clock on the subject, "Economic Problems of the Present Day."

His lecture will be illustrated with lantern slides which have been obtained by the YMCA along with other slides dealing with international problems, health problems, cooperative farming, and racial problems. The other slides will be shown to illustrate other lectures which are part of the program of the YMCA for this year.

Dr. McNatt's lecture will be in the form of a discussion, and students may question the speaker at any time during the program.

Alpha Gamma Rho

An open dance was given last Saturday night in honor of the members. The dance committee was composed of Roy Westerfield, Louis Fletcher, and Ed Yako.
Mrs. R. L. Martin and Major and

Mrs. Kenneth G. Athaus

chaperoned. Refreshments were served at intermission.
All Methodist students and others are cordially invited to attend the college Sunday school class of the Fairmont Methodist Church. The class meets at ten o'clock in Pullen Hall. Fred Dixon is teacher.
