

## Two New Dorms Become Reality As Work Begins

Construction of a new chemistry laboratory building, designed to be one of the most modern in the country and costing approximately \$350,000 equipped, will begin the week of September 18, Col. J. W. Harrelson, Dean of Administration, announced this week.

Two new dormitories, important projects in the \$1,400,000 building program now under way on the State campus, are already being constructed between Seventh Dormitory and the Frank Thompson Gym, and plans for two other dormitories to be built to the west of the present site of the dairy barns are being drawn up by Professor Ross Shumaker, head of the Department of Architecture.

A new textile building, costing approximately \$300,000 will be constructed on a site tentatively chosen between the Zoology Building and the railroad tracks on the west side of the campus. Two new dairy barns, costing about \$75,000 will be built on a site between Meredith College and the State Fair grounds.

When the proposed textile building is completed, the old textile building, Tompkins Hall, will be reconducted at a cost of approximately \$50,000 for use in vocational education.

The four new dormitories are expected to be completed by next summer and will provide housing facilities for 710 more students when the 1939-40 term opens. They will be three stories high and of brick construction.

"These dormitories are badly needed," Col. Harrelson said, commenting that he believes two hundred more students would enroll this fall if the proposed dormitories had been completed.

The entire building program was made possible by Federal aid, PWA funds being granted to supplement the money the State has appropriated. The State's share of the expenses will be financed by bonds which will be liquidated by receipts from dormitory room rent.

The chemistry building, which will fill a fast-growing need at State College, is to be four stories high and of brick construction, to harmonize with the architectural style of the other buildings on the agricultural quadrangle. It will be located between Ricks Hall and Delehia Hall.

Four large laboratories and a number of smaller laboratories will be located in the new building. A large lecture room, seating over 300 persons, will have motion picture and sound equipment and specially designed apparatus for use in performing experiments before large groups. The building also will contain ample room for offices, research work, and storage of chemicals.

In addition to the usual plumbing, piping will be installed for distribution of gas, compressed air, distilled water and vacuum. Ventilating fans will take dangerous fumes from the laboratories.

## Construction Swings Into Action on Largest Building Program In Years

Construction of a new chemistry laboratory building, designed to be one of the most modern in the country and costing approximately \$350,000 equipped, will begin the week of September 18, Col. J. W. Harrelson, Dean of Administration, announced this week.

Two new dormitories, important projects in the \$1,400,000 building program now under way on the State campus, are already being constructed between Seventh Dormitory and the Frank Thompson Gym, and plans for two other dormitories to be built to the west of the present site of the dairy barns are being drawn up by Professor Ross Shumaker, head of the Department of Architecture.

A new textile building, costing approximately \$300,000 will be constructed on a site tentatively chosen between the Zoology Building and the railroad tracks on the west side of the campus. Two new dairy barns, costing about \$75,000 will be built on a site between Meredith College and the State Fair grounds.

When the proposed textile building is completed, the old textile building, Tompkins Hall, will be reconducted at a cost of approximately \$50,000 for use in vocational education.

The four new dormitories are expected to be completed by next summer and will provide housing facilities for 710 more students when the 1939-40 term opens. They will be three stories high and of brick construction.

"These dormitories are badly needed," Col. Harrelson said, commenting that he believes two hundred more students would enroll this fall if the proposed dormitories had been completed.

The entire building program was made possible by Federal aid, PWA funds being granted to supplement the money the State has appropriated. The State's share of the expenses will be financed by bonds which will be liquidated by receipts from dormitory room rent.

The chemistry building, which will fill a fast-growing need at State College, is to be four stories high and of brick construction, to harmonize with the architectural style of the other buildings on the agricultural quadrangle. It will be located between Ricks Hall and Delehia Hall.

Four large laboratories and a number of smaller laboratories will be located in the new building. A large lecture room, seating over 300 persons, will have motion picture and sound equipment and specially designed apparatus for use in performing experiments before large groups. The building also will contain ample room for offices, research work, and storage of chemicals.

In addition to the usual plumbing, piping will be installed for distribution of gas, compressed air, distilled water and vacuum. Ventilating fans will take dangerous fumes from the laboratories.

## Increased Grant Aids NYA Program

Over \$38,700 was paid out in salaries last year to 545 students who worked in their spare time on NYA and self-help jobs, said R. L. Stallings, self-help secretary, who predicted that this year even more funds and more jobs would be available for needy students.

The allotment made by the government this year for NYA jobs was increased from last year's \$20,180 to \$23,220, and more funds will be available from the college this year than were available last year, six hundred fifty-one students have already submitted their applications for work this year, and more are expected.

Only 172 students are eligible to earn the \$23,220 NYA allotment made for this year.

The installing of the engineering equipment which is being transferred from Chapel Hill to State College will give many boys a chance to earn extra money and at the same time give them valuable experience through the handling of mechanical equipment. All labor for the installation of the equipment will be taken from the self-help list.

"A great deal more money is earned by the students than we are able to account for," said Stallings, "because many of the boys go out in town and find excellent jobs that we never hear about."

"From the number of applications we have had this year and the financial assistance, students are either becoming more willing to help work their way through school or they are still suffering from the past depression," Stallings said.

## REGIMENTAL HEADS

Shown above, Bill Bailey, right, and Walter Fanning, will assume the posts of colonel and lieutenant-colonel, respectively, of the State College ROTC regiment for the coming year.

## Newly Uniformed Band Ready To Begin Season

New Uniforms and Equipment Secured for State Musicians; Will Attract Wide Attention

The State College Redcoat Band, under the direction of C. D. Kuchinski, is ready to begin the current college year dressed up in brand new uniforms secured with funds contributed during the Raleigh Junior Chamber of Commerce's drive for funds.

Forty-five of the new uniforms have already arrived and, according to Tom Parks, student leader of the organization, funds are available for the purchase of twenty-five additional uniforms. It is hoped that they will be here in time for the State-Davidson football game which is to be held in Charlotte the twenty-fourth of this month.

The newly acquired uniforms follow the color scheme of those worn by members of the State football team. The coats are of a dark red color, trimmed with white, and the trousers are a neutral gray with a red military stripe down the side.

The State Band is noted throughout the State for the colorful performances it has put on during the halves of the home football games. Spectators will have their first glimpse of both the new uniforms and the rejuvenated band at the opening game in Charlotte.

## Wolfpack Game Will Be Feature During Festival

Tangle With Wildcats Will Provide Entertainment to Visitors at Charlotte's Football Festival

The Wolfpack of State College will participate in one of the biggest celebrations held in North Carolina, as they begin their gridiron season with Davidson College in Charlotte next Saturday.

The scene of the festivities will be the city of Charlotte, where the Junior Chamber of Commerce of Charlotte and other civic organizations are sponsoring the Charlotte Football Festival, which will be mounded around the Southern Conference game to be held in the American Legion Memorial Stadium.

The festivities will begin at noon with parades, music, displays, and other events. Featuring in the parades and music will be the 35-piece State College Redcoat band, which will journey to Charlotte not only to participate in the program but to furnish inspiration for the Wolfpack when they tangle with the Wildcats.

With movement quickened into action and with enthusiasm running high, efforts are being made to make the 24th of Sept. the official opening of the football season in the Charlotte sector, as well as to make it the biggest sport day of the year for the Queen City.

A huge portion of the State College student body is expected to attend the first game of "Doc" Newtons schedule, and officials predict the 15,500 seat stadium will be filled to capacity.

Bands of State and Davidson colleges will be guests at a dinner given by the Chamber of Commerce, which will also be headquarters for both musical organizations. Also expected to take part in the Charlotte parade are the crack Charlotte Central high and Alexander Graham junior high bands, and the Charlotte Fireman's drum and bugle corps.

## Plans To Form Welfare Group About Finished

Faculty Meets Today To Elect Members; Plans Formulated at Mass Meeting Last Spring

Coming as a direct result of the student body mass meeting which was held at the close of last term in protest to the Faculty Council's rule on the Monday night finals dance, the proposed Student Welfare Committee has been formed to serve as a clearing house for student and faculty recommendations.

The committee consists of eight student and eight faculty members representing each of the various major phases of student life. The function of the body shall be to hear and discuss any matter which affects the life and welfare of the State College community. These matters or problems may be proposed by any student or faculty member or any group or organization of students or faculty. The committee will, in turn, investigate the proposals thoroughly and present that which is practicable directly to the administration for its approval or rejection. In this way the misunderstandings due to the lack of advance information, such as the controversy over the Monday dance, will be eliminated and a closer cooperation between the student body and the faculty will be insured.

The welfare committee will meet once each month, and any matters to be proposed shall be presented in writing to the chairman at least one week in advance of the regularly scheduled meeting.

The student members appointed by the president of the Student Body, Bill Bailey, are: A. H. Salinger, Jimmie Worrell, L. C. Brooks, Steve Saller, W. L. Fanning, J. L. Murray, A. M. Smith, and Bailey.

The eight faculty members will be selected at a meeting of the general faculty to be held this afternoon.

## Registration Figures Top All Previous Records

Welcome . . .

It is indeed a pleasure to the Administration to welcome the new and returning students.

You are entering or returning to the North Carolina State College at the beginning of a significant period in the history of the College. This school year will conclude fifty years of service to North Carolina in the field of technological education. Also, with the opening of the 1938-39 session, begins a large expansion program which will probably amount to \$1,400,000 in value. On October 3, 1938, the College will celebrate its fiftieth anniversary. Our efforts during the current session must in many ways point to this significant occasion.

During recent years the demand for graduates of the North Carolina State College has constantly increased, and in many fields we are unable to meet the demands.

The qualifications by which graduates of technological schools are judged are changing rather rapidly. It is no longer sufficient for a graduate in technology to know his field of pure and applied science. In this era of changing economic and social conditions, it is necessary for the graduate in scientific courses to have a rather general understanding of the social and economic affairs of this great State and Nation.

We wish for you a most profitable and happy year.

J. W. HARRELSON,  
Dean of Administration.

September 13, 1938.

## Final Tabulation Expected to Show Enrollment of 2,200; Not to Close Registration Until September 24.

Registration figures, at the close of the first day of upperclass registration were rapidly approaching the ten-day totals of last year, with 1,209 former students, 145 transfers, 630 freshmen, and a large number of graduate students (figures not available yesterday) already having completed the final steps in their enrollment.

The ten-day totals of last year were: former students, 1,279; transfers, 133; and freshmen, 645.

W. L. May, director of registration, predicted last night that the final tabulation would show an enrollment of between twenty-one and twenty-two hundred students. Last year's record-setting total showed a final registration of 2,099.

The freshman registration, Mayer revealed, would have been considerably greater had there been sufficient dormitory space to house the new men. Many parents, he stated, were unwilling to send their sons to college unless assured that they would have adequate housing and study facilities. (Only 468 first-year men can be accommodated in dormitories.)

On both freshman and upperclass registration days the portion of Hillsboro street in front of the college was cut off from traffic, thus complicating the traffic problem of the registrars and their parents. Several automobiles, it is reported, became lost and had difficulty locating the campus, especially on freshman registration day.

Students will be allowed to register through September 24, and final tabulations will not be complete until that date. Backing Mayer's prediction of larger enrollment this year, however, are the picture totals. More registration-card photographs were taken through Wednesday than had been taken last year at the same time, it was disclosed.

## Bailey Selected Regimental Head For Coming Year

Appointment of Senior Officers Announced by Military Department

The Military Department, with the approval of the Dean of Administration, has assigned promotions to second year advanced course ROTC students and assignments to duty for the current school year, according to information released from that department today.

William McC. Bailey, a senior in the School of Forestry and president of the State Student Body, was appointed Colonel of the entire regiment. This is the first time in the history of the college that one man has held both positions. Walter L. Fanning, a senior in the Textile School, was appointed Lieutenant Colonel and Executive Officer.

Staff Officers

J. A. Worrell received the appointment of Lieutenant Colonel Adjutant. Other men receiving the rank of Major on the regimental staff are: R. L. Wicker, personnel officer; W. V. Matheny, Continued on page 6.

## Greater Univ. Day To Be Gala Event

Preparations Are Underway For Celebration of State's 50th Anniversary

In line with the naming of October 1st as Greater University Day, elaborate preparations have been made to celebrate the event in a fitting manner.

The highlight of the celebration will be the annual traditional football game between the University and State College at Riddick Field on the afternoon of the first. In between the halves of the game the sponsors will be presented with bouquets in a colorful ceremony on the field.

The night before the game there will be a monster rally on State's campus, with songs and cheers to hard to have the rally broadcast, as it was last year. Immediately after the rally there will be a bonfire.

If there are a sufficient number of girls who want to come, a special train will be chartered from Greensboro to carry the WUNC girls to Raleigh. They, and the students from Chapel Hill, will be allowed in on special tickets.

In the evening, after the game, there will be an informal dance at the Frank Thompson Memorial Gymnasium.

## College Adds Ten Prof's To Faculty

Five of Newcomers Transferred From Chapel Hill to Complete Shift of Engineering to State

The students of State College will be benefited by ten new professors and instructors who were added to the faculty during the summer, Col. J. W. Harrelson, dean of administration, has announced. They will begin their work at the start of classes today.

Five of the newcomers have been transferred from the University unit at Chapel Hill, to complete the shift of engineering teachers as planned under the consolidation act designating State College as the State's technological training center. Previously, four members of the Chapel Hill engineering faculty had come to State College.

Involved in the current transfer are the following: F. A. Groseclose, associate professor in mechanical engineering; E. G. Hofer, professor in mechanical engineering; J. E. Lear, professor in electrical engineering; C. N. Sanford, instructor in mechanical engineering; and R. V. Stainback, instructor in electrical engineering.

Equipment of the electrical and mechanical engineering departments at Chapel Hill is being transferred to State, Dean Harrelson reported. He explained that equipment and personnel in the civil and chemical engineering departments are being retained at Chapel Hill as part of the public health and chemistry courses.

Prof. C. A. Flanders, who has been taking advanced work at New York University, will return to the State College chemistry department to replace Prof. W. A. Reid, who will attend the University of Wisconsin to work on his doctorate. Flanders similarly relieved Reid when he was on leave two years ago.

Dan Swaffor, who graduated from Oklahoma A. and M. College last June, has joined the animal husbandry and dairying department. —Continued on page 6.

## Sunday Visits With Greeks Begin Sept. 25

Deferred Rushing Rules To Apply to Freshmen Only; Lefort Gives Details of Plan in Mass Meeting Last Night; Success Depends on Honesty of Fraternities

Freshmen will be allowed to visit fraternity houses for the first time on September 25 decided State College fraternity men last night in a mass meeting attended by nearly 300 Greeks.

The fraternity men met to discuss the new deferred rushing rules, which go into effect this fall for the first time; and under the leadership of mechanical engineering instructor Lefort, to clarify the five fall-term rules.

Lefort urged the Greeks to give the new system an honest trial, and stressed the fact that the success of the system depended upon the co-operation and honesty of the fraternities.

The assistant dean took up each of the rules and answered all questions put to him before discussing the next. The only penalty shown in the rules, he stated, was for a freshman refusing an invitation for Sunday visiting.

Every other week-end each fraternity shall have the privilege of inviting freshmen to any social entertainment they care to have. If a freshman should not be invited to a Sunday social function by one of the entertaining fraternities he may visit at the house of a non-entertaining fraternity—but the non-entertaining fraternity cannot request him to do so, nor can he turn down an invitation in order to visit at a non-entertaining fraternity.

The rules are not to apply to upperclassmen or to transfer students who have attended some other college for one year, even though they be classified as a freshman at State, revealed Lefort.

The complete fall term rules are given below:

1. Freshmen shall not be allowed in fraternity houses or on the premises during the six week days, nor shall they be entertained by fraternity upperclassmen during the week days. (To be entertained shall be defined as spending money on freshmen or otherwise.)
2. Freshmen shall be allowed to visit the fraternity houses on Sundays, which shall be known as Fraternity Visiting Days, and they must accept all invitations extended for Sunday visiting. Failure to —Continued on page 6.

## Get Your Copy

As this first issue of the "Technician" goes to press, a complete list of students has not been compiled by the registration office. Therefore, the mailing list of the "Technician" will not be available until next week.

We ask that all members of the Student Body call at the "Technician" office in the Publications Building for their copy of the paper. There will be someone in the office all day Friday.

## 19-38! THE WOLFPACK YEAR?

Is there anything significant about this human calendar? Followers of N. C. State's Wolfpack hope so. Art Rooney, left, ace back of this year's team, and Paul Losier, smashing fullback, were caught in this pose at one of the early season workouts.

## Cheerleaders Out!

All freshmen and sophomores interested in becoming cheerleaders for State College athletic teams are asked to report to C. L. Mosley, head cheerleader, in the gymnasium any afternoon after 4 o'clock. Mosley said that new uniforms and acrobatics would be featured by the cheerleading section this year.

Mosley also added that there would be a pep meeting for the Davidson game next week-end before the team leaves for Charlotte. The date of the meeting will be announced in next week's "Technician."

## Welcome, Freshmen!

By this time you should be thoroughly orientated with the State College community and with the people with whom you will be associated. You are on your way to a college education.

This first year will be the most important year of your entire college career because it is now that you will lay the foundation of your education. If you study diligently and lay a good foundation, your last three years will be easy; if you get off to a poor start, then you may rest assured that you will find the last three years very difficult.

Many of you come from small high schools where you naturally did not receive as good an education as did some of the boys from large cities. You are at a small disadvantage, but your professors realize this and will make every effort in their power to put you on par with the students from better schools. Take advantage of the coaching classes which are held for you. They cost you nothing, and are very beneficial. Your professors will see that you are anxious to get ahead, and they will remember this when the grades are made up.

This is no easy school. For loafers there is little chance. Our courses are hard, but you leave here a well-trained technician and ready for your place in industry.

There are many things to keep you away from your studies, but your primary interest in coming to college is to get an education from books. After you have laid your foundation, there will be plenty of time for outside activities and social life. You are a free man now, away from home ties. Here is your chance to prove yourself.

N. C. STATE

## "We're All For You"

Exactly one week and one day from this date, the State College Wolfpack will begin their football season, one of the biggest and perhaps the hardest that they have tackled in many years.

Thanks to "Doc" Newton and the athletic department, State is no longer playing small time football—they have advanced upward, and advanced far. Their schedule this year is one that will attract nation-wide attention, and they are meeting some of the outstanding teams of the East, including the eastern representative in the Rose Bowl last year.

The success of our venture in the football field this year is partly left up to the students, who are supposed to furnish the spirit and backbone of their athletic representatives. During the past two years there has been a very noticeable and favorable increase in the spirit and cooperation that the students have awarded their athletic teams. If this will continue throughout this year and the remaining years, we predict that the Wolfpack will turn in a successful record at the end of the season.

Keep up that "We're all for you" spirit and watch the results!

N. C. STATE

## We Suggest . . .

Contrary to the usual, the TECHNICIAN wishes to offer a suggestion to all college organizations, fraternities, and even dormitory students.

In order to bring State College before the eyes of the outside supporters, the college has established a full-time News Bureau, located in Ricks Hall and operated by C. A. Upchurch, Jr.

To insure full news coverage of happenings on the campus, and also to assist Mr. Upchurch in gathering all of the news, we suggest that every organization elect or appoint a publicity agent, who shall have as his job the coverage of news in his respective organization.

Upchurch is anxious to cooperate not only with the TECHNICIAN but with every student, and therefore we offer this suggestion to you. Should you carry it out, Upchurch desires to know the name of your publicity agent in order that he can maintain close contact with him.

N. C. STATE

## Let's Hear From You

The TECHNICIAN is strictly a student newspaper, written, edited, and supervised by State College students.

For this reason we want to give every student the opportunity to express any opinion that he may have at any time. This year we are running in the editorial columns of the TECHNICIAN an Open Forum department, in which we will print all students' letters and articles, providing they are signed by the author submitting them.

If there is any matter that you wish to bring to the attention of the other students or wish to express your beliefs on, either bring or mail them to the office of the TECHNICIAN. However, make sure that you sign them, as we cannot print any thing that is unsigned.

## Definitely Up and Coming

There is no doubt in our minds now that State College is definitely expanding, growing into what we expect to be the foremost technological school in the South.

For several years State stood at a standstill as far as a building program was concerned, which made it appear that we were filling the capacity of the "red-headed stepchild."

Now construction is moving forward on two new dormitories, of which we have been in need for many years. Plans and bids have been submitted for the construction of a new chemistry building, and now efforts are being expended to secure appropriations for two additional dormitories in excess to the two which are already being erected.

This year marks the completion of Riddick Stadium field house, which tends to complete the beauty of the stadium, and also affords convenience to visiting teams.

Campus beautification programs have been in effect for some time now, and with the completion last year of the Memorial Tower, they are nearing a complete reality.

Certainly there is enough proof that State College is expanding, not only in a building program to accommodate the students, but in beautification projects which will make our campus a credit to any school.

N. C. STATE

## Freedom and the Open Forum

A popular and, we believe, widely read column in this paper is the "Open Forum" in which we print letters written by students.

THE TECHNICIAN will continue its policy this year of printing, regardless of our own opinions, any letter which is not abusive or indecent in nature on any subject which any student may care to write about. We reserve the right to cut out unessential portions of letters which are too long or to hold over letters should there be insufficient space the week they are sent in.

To the freshmen, since they are not familiar with this feature of their paper, we issue a special invitation to make use of it whenever they feel called upon to express their opinion publicly.

There is no censorship at State College. Any student is privileged to believe in Communism, if he so desires, or Fascism. He may be anti-New Deal or a Rooseveltian from away back. We consider the "Open Forum" a symbol of this freedom of speech and thought, and we again invite you to make use of it.

## YOUR ROVING REPORTER

ARNOLD KROCHMAL

The question: Why did you come to State College?

The place: Freshman Quad-range.

The people: The Class of '42.

Raphael Moss, Agriculture, New York City:

"In selecting a college I looked for tradition, the positions in life that the alumni hold, school spirit, and sports activities. State lived up to all my specifications."

Bill Seyter, Mechanical Engineering, Union City, N. J.:

"I came to State to better myself mentally, morally and physically, and to prepare myself to earn a living when I graduate. Everyone is friendly at State, and the phrase, 'Southern hospitality,' certainly holds true here."

L. H. Parcell, Aeronautical Engineering, Petersburg, Va.:

"The reason I came to State is because it offers the best course in my vocation. Every man I have met who is a State alumnus is of the finest type. My father is also a State man. I also believe the R. O. T. C. unit here is a very fine one."

Harry Muller, Forestry, Aberdeen, Maryland:

"I looked for a college that turned out men who are 'tops' in my field. Wherever I inquired I was almost invariably told that N. C. State had a superior course in forestry and a faculty that few colleges could equal. So I came here."

Jack McAuley, Electrical Engineering, Mt. Gilead, N. C.:

"State was my choice because I knew it to be a good engineering school, and because I thought I'd like college life here."

William Earl Seltz, Mechanical Engineering, Newton, N. C.:

"I came to State because I had heard that State had an excellent engineering school, and I knew that I could get a good education fairly cheap."

Ben Herold, Textiles, New York City:

"An alumnus of State, who is the assistant manager of one of the largest textile houses in New York City, was largely responsible for my choice of State. Besides that, State is the only high-rated textile school in the country which grants a degree."

Frank Vance, Electrical Engineering, Winston-Salem, N. C.:

"My reasons for choosing State are: It is a State institution, it is very reasonable in rates high in an engineering school. My brother is a State graduate."

## Announcements

There will be an important meeting of The Watsonian staff Tuesday night at 8 o'clock. All freshmen and upperclassmen interested are invited to attend.

There will be an important meeting of Kappa Phi Kappa Monday evening, September 19, at 8 o'clock. All present members please be present.—Bob Lainof, President.

Candidates for varsity and freshman tennis teams are called for a joint meeting upstairs in the YMCA building at 4 o'clock Friday afternoon, September 23.

There will be a meeting of Phi Eta Sigma on Tuesday evening at 7:00 p.m. in the YMCA. All active members are urged to be present.

There will be a meeting of the editorial and business staffs of the Southern Engineer at 7 o'clock, Friday, September 16, in the publications building. All those students interested in joining these staffs are invited to attend.

## HERE and THERE

By HAL BYRD

HI STUDENTS! Well when I say students, I mean those fellows who are here at N. C. State with that old vim, vigor, vitality, and spirit that upholds the name and reputation of a college for MEN—

By the way, this is just another one of those columns that seem to let on to the unusual happenings on and around the campus. Well, here goes . . .

Fellows it isn't spring yet so watch that moon.

Who was the young, handsome professor and the beautiful young lady who was seen sitting on the nice little bench in the Capitol Square one night recently?—Both of them were very interested in the moon and his name is Sam Watson and I'll let you guess the rest.

The above statement is a warning to the so called FRESH freshmen . . .

Well, (deep subject) I guess some of the fellows are very glad to be back to their Alma Mater again.....But there is one fellow that I have seen around these parts for the last two years.....His name is Wallace Riddick and a high SPIRITED fellow, especially at dances and the like.....So if you feel a wallop in the back as though a vehicle of some type had hit you just turn around and you'll find this fellow with a groggy look up on his mug.

You can't get around it fellows, some of these freshmen still want to know who Professor Staff is..... They'll soon learn, just watch them.

As I casually turned the pages of the hand-book the other day I saw that the one and only Edgar Britt had made the headlines. He's the new Editor of the Watsonian.....Just watch him fellows and he'll show you something new in the lines of clean literature this year.....Do you know him.....

By the way, do you know Warren Spear? Well he's the fellow who's madly in love with this Baby and is she trotting him along.....Hold that line Spear.

The Freshmen 'have already started their education here at school.....Some of them even learned to endorse a check down at the gym on registration day.

It is understood that "Smitty" Smith, the Globe Trotter, has come back to school as a reformed young gentleman.....Maybe the Raleigh girls will fall for his new line this year.....

Have you heard Key Scales and his Collegians?.....Report to the New Armory Friday night and you'll get a load of this stuff they call swing.....and the little apple too.....He's really smooth.

## GLEANINGS

By THE STAFF

With the current school year still a mere youngster only a day or two old, things have already begun to hum with mid-year activity on the State campus. . . . It seems as though we've been here two months instead of two days. . . . Upperclassmen strolling disadventurously around with that high and mighty air which the freshmen try so hard to imitate, but only succeed in looking more like yearlings than ever. . . . Professors, bless their souls, getting right into the spirit of things with assignments and full hour lectures on the first few days of classes. . . . King Football once again occupying his lofty perch uppermost in the mind of every State supporter.

Speaking about the 1938 edition of Delectable Doc Newton's Wolf-pack, just between you and me, it looks as though we've really got something this year. . . . Those in the know aren't exactly coming forward with any out and out predictions, but there is an underlying feeling of confidence and belief in the power and spirit displayed by Rooney, Sabolyk, Fry, Retter and the rest of the griddon huskies, despite the grueling schedule they will face this year. . . . Nevertheless, we'll know more about that after the game with Davidson next Saturday. . . . According to one of the better-known college publicity directors, if Hitler and some of the rest of the cat-throats expect to get any publicity, they had better get the next World War started before the football season begins.

You candid camera sends passed up some swell material if you didn't get down to freshman registration last Friday. . . . The first year men were the victims of some of the funniest good-natured ribbing this reporter has seen in years. . . . During the physical examination downstairs, the upperclassmen had one foot push a Coca-Cola bottle all the way around the pool with his nose while crawling on all-fours. . . . Some of the unfortunates gave exhibitions of trucking and the Big Apple, while others came through with some of the tenderer renditions of such classics as the "Flat Foot Floogie," and "Hill-Yo Silver" you ever heard. . . . All in good, clean fun, of course!

It seems that the first day of April isn't the only day that professors can be fooled. . . . I ran across one of the old grads the other day, and in the course of a conversation about college and its little-known facts, he gleefully related to me how he had managed to attend nearly four years of classes without ever being called upon to recite. . . . He said that the main thing to do was to get off to a good start.

"I started right out in the beginning," he said, "and pretended that I stuttered badly. To avoid any unnecessary embarrassment, some of my professors ever called on me to answer any oral questions, I called it the 'proof-proofing plan' because it protected me from professors just as moth-proofing protects clothes." . . . Now, all we have to do is to figure out a way of hood-winkings them out of written quizzes and life will be worthwhile.

A trip down to Seventh Dorm reveals that we have an ex-sailor and an ex-soldier rooming together on the third floor. The ex-sailor, Walter Hurn, is, quite paradoxically, studying forestry. He and the ex-soldier saw service in Hawaii at the same time, though they didn't know each other. . . . Perhaps that old bromide about it being a small world holds true after all.

Little-known Facts About Well-known People: They say that the Meredith "angels" have voted Ben Rudisill their most faithful visitor. . . . The little man can be found out there any morning, noon, or night. . . . Walter Fanning has quit buying meal tickets since he began courting the daughter of the S. and W.'s owner. . . . It seems that Dick Payne was unexpectedly detained in Rocky Mount and couldn't get here until two days after registration. . . . Is it another romance in the Alumni Office or are Bill Bailey's numerous visits strictly business? . . . If you don't believe that State has been making rapid progress, ask Jimmie Hubbard. . . . He was here when the College was founded. . . . Pete Brinno and the one and only are Mr. and Mrs. now. . . . ditto Ken Sains and his heartiest.

Besides being the largest freshman class in the College's history, this year's crop of first-year men are the nattiest dressers. . . . Ask Don Buckingham how he came about the title of "Madame." . . . Perhaps the authorities should move the College to Cary to make life rapid progress, ask Jimmie Hubbard. . . . He was here when the College was founded. . . . Pete Brinno and the one and only are Mr. and Mrs. now. . . . ditto Ken Sains and his heartiest.

How do they expect us to get any work done with all those beautiful girls working on the campus? . . . According to Ed Britt, there definitely will be a "Watagan" out before Christmas. . . . Will miracles never cease to happen? . . . By STEPHEN SAILER.

They're smooth and don't scratch — There is a large selection of

### Survey Reveals Startling Facts About Freshmen

Freshmen Say They Want To Know How to Study in Survey Conducted by "Y"

Studies are the primary interest of freshmen at State College, and next come parties at Meredith, St. Mary's and Peace.

Race relations, the New Deal, tenant farming and religion do not rank among the first 20 interests of the new collegians, a survey conducted by the College YMCA revealed today.

Personality development ranked third, and in fourth place was the selection of college friendships.

Communism and Fascism ranked near the bottom, barely entering the list above Southern economics, which appeared the least interesting topic in the poll's top 20.

A total of 184 first year men want to know what they expect college to do for them, and

giving their pick from 29 suggestions offered by "Y" President

### Attention!

All members of the freshman class and all upperclassmen interested in newspaper work and wishing to join either the editorial or business staff of The Technician, are invited to attend a meeting in The Technician office at the publications building on Monday night, September 19, at 7 o'clock.

H. R. McSwain, 410 freshmen indicated they had rather hear, most of all, about how to study. Next highest ranking was the question of socializing with students in the three girls' schools here, about which 318 freshmen want instructions.

Personality development ranked third, and in fourth place was the selection of college friendships.

Communism and Fascism ranked near the bottom, barely entering the list above Southern economics, which appeared the least interesting topic in the poll's top 20.

A total of 184 first year men want to know what they expect college to do for them, and

giving their pick from 29 suggestions offered by "Y" President

182 are interested in joining social fraternities. Etiquette intrigues 147, and 148 want coaching on "How To Act On a Date."

Scholarship and intellectual development interested 104, and 118 freshmen said they would like to hear discussions dealing with the topic "What is An Education?"

Discussion is desired by 143 new men on the question "Is Campus Popularity Worth Seeking?" Campus figures considered authorities on the various topics will be asked to lead the weekly discussion programs for the freshmen, who will be urged to unburden themselves on the subjects under consideration.

### Successful Artist Drops Past Career To Take Ceramics

The freshman class of State will have a unique, rather unusual member this year. He is 35 year-old Charlie Capehart, an already successful artist, who has laid down his career at present to become enrolled in the Ceramic Engineering Department.

Seventeen years ago Capehart left the University of North Carolina, where he had been registered in the School of Electrical Engineering. Now, with students half his age, he has decided to begin his college career again, sacrificing at present his work as a modeler of clay models, topographical studies, and creator of unique designs in clay.

During the period that has elapsed from his first period of registration in college, he has followed many vocations, including trouping with stock companies, designing and constructing theatrical properties and scenery, and finally winding up as a successful designer of clay models.

Capehart did not wait for the regular fall session of school to begin his work in the field of ceramics. This summer he attended summer school courses in the ceramics department, and spent all of his spare time enlarging his knowledge in this field.

After making a special trip to Raleigh to talk over the matter with Prof. Greaves-Walker, head of the ceramics department, he decided that he had made the correct decision to return to school and work toward a degree.

"I began to feel that in order to be a successful industrial designer, I needed more thorough technical training," said Capehart. "I am particularly interested in the field of ceramics. Through my contacts with engineers, and by reading articles in magazines, newspapers, and technical publications, I learned that I could pursue that training to the best advantage right here at State College, in my home state."

### Textile School Praised

Praise for the North Carolina State Textile School as "one of the best" is contained in the current issue of Photo News, illustrated trade publication issued by the Crompton and Knowles Loom Works of Worcester, Mass.

"Certainly it has no superior in the modernity of its equipment," says the item, which is accompanied by a photograph showing Dean Thomas Nelson supervising a group of students working on a line of new looms.

### HONORED

### Alfred University Confers Degree On Greaves-Walker

The honorary degree of Doctor of Science was conferred on Professor A. F. Greaves-Walker, above, head of the Department of Ceramic Engineering, at the 98th commencement of Alfred University on June 21 last. A unit of Alfred University is the New York State College of Ceramics, the world's largest ceramic school. The degree was conferred "in recognition of outstanding service as scientist, engineer, organizer, teacher and educational and industrial executive in the field of ceramics."

Dr. Greaves-Walker is a past

president of the American Ceramic Society, the Canadian Ceramic Society, Keramos, the national professional ceramic engineering society and is this year serving as president of The Institute of Ceramic Engineers. Dr. Greaves-Walker is the only person to have held the presidencies of every ceramic engineering and technical society on the continent.

On the campus Dr. Greaves-Walker is a member of Tau Beta Pi, Phi Kappa Phi, Phi Beta Kappa, Golden Chain, Keramos and the Order of St. Patrick.

### Kappa Phi Kappa

At a meeting of Kappa Phi Kappa, honorary educational fraternity, held at the close of school last year, new officers for this year were elected. These were: Bob Lanfio, president; E. E. Durham, vice-president; Eugene Starnes, treasurer; and N. E. Vinson, secretary.

There will be a meeting of the fraternity on Monday evening, at 7 o'clock at the D. H. Hill library. Many of the members graduated last year, but the remaining members are starting a wide program. All freshmen in education, agriculture, and industrial schools are invited to attend. Dr. Garrison, whose talks to the fraternity last year were greatly enjoyed, will be the guest speaker at the meeting Monday. Prof. Boshart will also appear on the program, which will be both entertaining and of educational value to all.

### Oddities

The following note appeared on the front page of the Washington Square Bulletin of New York University:

"Beauty for Hire  
"Any male interested in going to the Freshman Prom who has no girl, come to the 'Bulletin' office. Five (5) beautiful blondes are available. Hips 36, waist 26, bust 35, 5 ft. 8 in. in height. Absolutely free. Limited time only."

Wallflowers at the University of Tennessee don't know whether to be sad or happy.

Dancing taught "in 10 easy lessons," is the latest activity of the physical education department. BUT the instructor has made it

clear that those who "have no rhythm, no spirit of the dance, and those who just can't be taught to dance," are barred from entering the class.

So it seems that if you're a Tennessee student and a wallflower because you have a hard time with your dancing, the last

place you want to go is to the university's dancing class—where only those having natural grace are welcome.

Silence is part of the eternal. All things that are true and lasting have been taught to men's hearts in the silence.

### Pack Impressive In Night Battle With Reserves

Brilliant Array of Backs and Linemen Pass in Review for Students and Alumni; Sabolyk Scores Three Times

Followers of the fortunes of State's football team were treated to a preview of this year's team when they witnessed a game between the varsity and the combined B team and freshman team under arc lights in Riddick Stadium last Wednesday night.

The varsity uncorked a dazzling display of reverses and spinners to completely befuddle their opponents. When the smoke of battle had cleared away, the varsity had run up the score to 56 while holding their opponents scoreless.

State's ability to kick for the point after touchdown was woeful to behold, as Tony Di Yesso and Bob Sabolyk scored the Wolfpack's only conversions, while seven other efforts went to naught.

From last Wednesday's exhibition, it seems that the Red Team will depend mainly on line play and razzle-dazzle to subdue the enemy.

Scoring started when Art Rooney got away for a 61-yard run after Andy Pavalovsky had plunged over the line for three yards in the first play of the game. Rooney came through again and scored standing up after an end run.

Bobby Sabolyk added to the debacle by running 30 yards with a 35-yard pass Di Yesso threw after he had received the ball from Fehley on a reverse.

At this time it was discovered that the Techlets were using a ten-man team, and were minus one halfback. The error was soon remedied, and the massacre continued.

On the next play Fehley, who was trapped behind the line with the ball, shoved the pigskin to Di Yesso who gave the spectators a hearty laugh by running around behind the line like a pedestrian dodging.

State's only score on a pass caught by an end came when Wally Thompson scored on Feh-

### WOLVES GETTING READY TO HOWL

Courtesy of The Raleigh Times.

Seen here is the Number One backfield and the first string center of the 1938 edition of the Wolfpack. All five of these players are listed as juniors in football. Left to right: Bobby Sabolyk, wingback; Ken Sands, blocking back; Andy Pavalovsky, fullback, and Art Rooney, quarterback. In the foreground is Bill Retter, center. Sabolyk is a reserve of last season and helped Rooney with the passing. Sands is one of the outstanding blockers of the Conference and was listed on the all-American check last fall. Rooney is a triple-threat tall back who performs sensationally as a passer, runner and punter. Bill Retter, under-study to Captain Lou Mark last year, will be starting his first season as a regular.

ley's pass. Di Yesso then converted.

The prettiest piece of blocking of the night was offered when Rooney took out the fresh safety man, leaving the way clear for Ken Sands to score on a 30-yard run.

Bobby Sabolyk carried the mail for State and scored on a 30-yard run after a reverse from Rooney.

At this point the B team took over the yearlings' difficult job, and managed to stem the tide a little.

The first tally against the Suicide Squad came when Bobby Sabolyk lugged the ball into pay dirt after Pavalovsky ran 20 yards.

Fehley scrambled over tackle for another score, and scoring

closed with Paul "Low-gear" Lozier diving through the line.

The outstanding varsity men were Art Rooney, Andy Pavalovsky, Pat Fehley, Paul Lozier, Ken Sands, Don Traylor, Tony Di Yesso, Hal Stroup, Fred Gardner, Mickey Sullivan, Warren Wooden, Buddy Fry, Steve Acai, Fred Mastrolia, J. B. Thompson, Bunny Hines, Ed Coon and Wade Brown.

Wade Brown is a soph player, who has been converted from tackle to end. The big boy shows great promise, and was the only one to block a kick during the game.

Before the commencement of hostilities, Col. Harrelson made a brief address to the assembled spectators, and was followed by President Parker of the Wake County alumni, and Dan Paul, General Alumni Secretary.

After the speeches, Wade Isaac, sports publicity man, introduced each player personally to the crowd.

### Waller Calls Frosh Gridmen

Under the able tutelage of Nig Waller and Bull Regdon, the 1938 version of the frosh football team is going through hard workouts in preparation for a tough schedule.

To date 76 uniforms have been issued to aspirants for positions on the Techlets.

The yearlings have been drilling every afternoon, devoting most of their time to line plays and punting practice.

Below is the freshmen schedule. The Clemson game is to be played for the benefit of the Charlotte News and the Charlotte Observer's Milk Fund.

Belmont Abbey—Oct. 14, here. UNC—Oct. 21, High Point. Duke—Nov. 5, there. Wake Forest—Nov. 11, here. Clemson—Nov. 19, Charlotte.

### Varsity Moves Into New Home

State College's field house, reposing majestically at the south end of Riddick Stadium, has been completed and is seeing its first year of service.

This season it is being used to house the members of State's Wolfpack, as all but three members of the varsity are living there. Part of the freshmen team is also staying in the field house, which will provide dressing rooms and showers for visiting teams.

The field house was begun two years ago, and has been built at a cost of \$30,000. These funds were secured through a WPA grant.

Not only does the field house serve in the capacity of providing rooms for the football team and dressing rooms for the visitors, but it bids out an ugly railroad embankment which for years had been a sore spot to an otherwise beautiful stadium. Now a massive cement structure and high fences blot out this offending sight.

### Ceramic Seniors End Inspection Trip

Seniors of the department of ceramic engineering returned this week from an annual inspection tour which covered four states and the District of Columbia.

The trip, which lasted two weeks, included inspection of ceramic plants in Baltimore, Md., the National Bureau of Standards in Washington, mines and ceramic plants in Virginia, Tennessee, and North Carolina, and the government operation in the TVA area.

Accompanied by Prof. R. L. Stone, students on the tour were W. C. Cress, W. H. Ellis, J. C. Haynes, J. A. Hedgepeth, C. M. Lamb, J. D. Langdon, Frank F. Sabol, J. P. Sawyer, Jr., W. A. Scholes, and B. S. Tucker.

by ARNOLD KROCHMAL

"This year's intramural program will be bigger and better than ever before," says Professor Johnny Miller, head of the Physical Education department and guiding light of the intramural sports program here at State.

Judging from last year's contests, we can hardly see how the program could be bettered, but Mr. Miller is a man of his word so we are sure he will not go back on us.

State's intramural program is undoubtedly the best in the South, and ranks high among the leaders of the nation. The value of this program is easily evident, as it is impossible for all students to participate in varsity athletics.

The large majority of us have to spend most of our free time with

our school books—consequently we can not spare the necessary time for practice which membership on a varsity team entails. Realizing this, Professor Miller instituted intramurals so as to keep our physical development on par with our mental growth.

From a small beginning this sports program has grown to magnificent proportions. Last year the following sports were offered: football, basketball, baseball, swimming, tennis, volleyball, track and field events, boxing and wrestling.

As in past years there will be 2 leagues—the dormitory league and the fraternity league. The members of these two leagues compete among themselves for top honors. Last year's dormitory winner was the third floor of 7th dormitory,

while the PIKAs led the fraternity league.

To the winners of championships in such individual sports as boxing and wrestling go individual medals, while the leaders in team sports are awarded cups.

At the conclusion of each sport's season, an All-Campus team is chosen, and All-Dormitory and All-Fraternity teams are picked, with each man receiving an award.

The men who pick the "All" teams are the referees, the team captains and Mr. Miller.

The standings of the different teams are decided on the basis of

### Camp Praises Rising Wolfpack In Grid Annual

"Our 'Doc' Newton has had about enough time to reorganize the works at North Carolina State, and the so-called Wolfpack may be doing some victory haying before season's end. Last fall's showing was merely a sample of what has been accomplished," said Edwin Camp in his recent preview on N. C. State football in the Football Annual.

Quoting Camp, Doc has some first class men to build with and it's just a matter of moments until he gets the combination. Art Rooney broke in last year as a clever tailback. Andy Pavalovsky dived as a mighty blocker and Ken Sands showed up well as a fullback. Ed Coon is a powerful tackle, likely to win all-conference honors, and Bill Retter measures up to the eminent ability of his predecessor, Louie Marks, at center.

While the quality of State manpower is A-1, quantity is still a big drawback. At least eight new skillful gridmen are needed, but the 1937 frosh unfortunately were no ball of fire.

Camp picked N. C. State along with Richmond and South Carolina to be riding the dark horses about to gallop to glory.

a point system. A set number of points are awarded for entrance of a team or contestant, and more points are given for winning a game or match.

So, captains and managers, get your teams organized, and lets go to town.

Comments

by ART RAYMOND

Welcome back to State. Upperclassman or freshman, we are glad to see you. In writing this column, I will try to give you the straight dope mixed in with a few personal opinions which I know will always agree with yours. I am open at any time for criticism. Just drop in or write a letter and tell me where I'm wrong. I'll appreciate it.

Once more we follow the scintillating course of football's super men and football's crack teams. Plunging, swiftness, twisting, darting, a lone runner eludes the vortex of tacklers and blazes into the open, curving down the striped field with a burst of mercury-tipped speed. From thousands of tense, hoarse throats swells the old familiar roar of "Touchdown!" Football season with all its splendor, ballyhoo, and heartbreaks.

State has just about recovered from the very unenviable war which ensued after the departure of Hank Anderson. Squad spirit is soaring and hopes run high for the steady improvement. Last year State believed in Doc Newton and his staff. His gentle, kindly feeling for his boys and the institution he represented started State on a new football path. This year, with the prevailing spirit, this column is predicting a victory bay for the Wolfpack before the season's end.

From a win and loss standpoint State is an unknown quantity. In the words of "Doleful Doc," "we'll be worse than best and still better than worst." With all shoulders behind the wheel, Wolfpack coaches, players, and the Student Body, we'll see a scrappy team that will make a good accounting of itself. Watching Little Art Rooney scamper 60 yards for a touchdown and Paul "Low-gear" Losier take a 80-yard jaunt with a pass at scrimmage last week... a gang of swell backs headed by Sabolyk, Traylor and Pat Fehley. Coon, Retter and "Buddy" Fry leading the line... bring that spirit out and come out to a few of these practices.

My hat is off to the tireless efforts of the Raleigh Junior Chamber of Commerce's State College committee which has done a grand job in the last year in publicizing State through many media throughout the country. Newspapers and radio stations have joined in to help the project along. The main object—to make State College the South's greatest institution of its kind—is gradually being approached. Let's take a crack at a few of these warm-up games this Saturday.

# Wolfpack Sharpens Claws For Tough Season

## Gridders Off Form; Newton Anxious As Opener Nears

### Rooney, Pavalosky Sabolyk Form Spearhead of Attack in Backfield; Fry and Coon Impressive as Tackles

Declaring his N. C. State Wolfpack to be three weeks from playing form and with a game two weeks away, Coach Williams "Doc" Newton has quickened the training pace for his squad of huskies, who are anxiously eyeing the Davidson game in Charlotte the night of September 24.

Hard scrimmages during the past week have shown that the Wolfpack has many things to accomplish before they meet the Wildcats in the feature attraction of the Charlotte Football Festival. Newton indicated from yesterday's drill that he may alternate two teams. The fact that Newton will no longer scrimmage the first two clubs indicated that he would again experiment with the twin team idea.

As State held the last of its two-day sessions Doc was still looking for a combination at the end position. He continued to experiment and had the elongated sophomore Wallace Thompson teamed up with Mickey Sullivan on the first eleven. Charlie Smart and John Tatum teamed up on the other team. Fred Gardner and Phil Avery are being groomed while Monte Crawford is still unable to report due to recent attack of malaria. The end positions have been the largest of Newton's worries.

Art Rooney, Andy Pavalosky, Bobby Sabolyk and Paul Losier teamed up in one backfield, with Pat Fehley, Don Traylor, Tony Davidson over Orlan. V. M. I. over Eton. Clemson over Presbyterian. V. P. I. over Emory and Henry. South Carolina over Erskine. See you next week.

### INJURIES

Lady Luck frowned on the 'Pack last Monday when Halfback Dick East received a broken ankle in scrimmage which will probably keep him out of action this season.

East had been counted on by Doc Newton to be one of the backfield mainstays in this year's grid wars.

Other men who have received injuries are Babe Retter, Ted Johnson and Monte Crawford. However, these men will be in shape for the Davidson tilt.

Yeso, and Ken Sands in the other. Rooney and Pavalosky looked good as ball carriers on the No. 1 team while Sabolyk and DiYeso were impressive on the other squad. Newton would make no comment concerning the two teams other than to say the team sporting Lozier, DiYeso, Sabolyk, and Traylor surprised him on the offense. State will have in George Fry and Ed Coon two of the best tackles in the South this year. Fry has already proved a powerhouse while all Ed Coon needs is a little offensive polish. There are several good understudies in J. B. Thompson and Ralph Burt.

Plenty of material is on hand for the guard posts. Warren Woodson, Steve Acal, Binnie Hines, Fred Mastrolia, John Savini, and Bill Matheny all saw plenty of action last year.

At center Bill Retter is showing up well and from all indications will be the starting center. Stroup and Carter have also shown up good in the early drills.

Art "Cyclone" Rooney, the brilliant sophomore of 1937, is showing up good in the early workouts. Ken Sands looks good in his defensive and blocking duties. Andy Pavalosky is adding greatly to the effectiveness of the offense while Pat Fehley is being developed into a triple threat sophomore performer and understudy of Rooney. From all indications and preseason dope the Wolfpack will definitely be a better team this year than last. The Wolfpack may prove to be the prize package of the Southern Conference race this fall.

### This Week's Wolf...

Pictured here is George "Buddy" Fry, 200-pound State College tackle. "Buddy" was born in Oak Hill, West Virginia, 22 years ago. He grew up there and later moved to Princeton, West Virginia, where he attended high school. He played two years of football there before he graduated. George's brother, D. K. Fry, graduated from State in '28 and saw to it that "Buddy" picked his own Alma Mater for a place to get his final step toward an education.

George enrolled here in the Textile School in 1934. He played freshmen football his first year, but was inactive during the fall of his second year. This year he is playing a fine brand of ball on the varsity.

He is a member of Phi Psi, honorary textile fraternity, and a member of the Monogram Club.

### Few Changes Made in Gridiron Rules

Two new changes will be introduced on the collegiate gridirons this fall which will do a good deal to change the game.

The changes are reasonably simple, and likewise their evident results. The first moves the ball fifteen yards in from the sidelines instead of ten yards as in the past. The other permits three unrestricted forward passes over the goal line instead of one as was the custom.

Moving the ball in fifteen yards will force the defensive team to balance their defense. Previously, it was tough to gain on the outside to the short side as the defensive team put all their weight on the side opposite the short side.

The other change which relaxes restrictions on the number of passes over the goal line will most likely prove a stimulus to the offense.

In the past, as soon as a team threw one incomplete pass, the defense moved up in a group because

### TALKING IT OVER

Seen here is N. C. State's backfield coach, Dr. Bob Warren, center, as he talked to two of his veteran backs in an early season workout. Art Rooney, left, is State's triple-threat hope for the 1938 season. Kenneth Sands, right, is the Wolfpack's stellar blocking back.

they knew that the other team would not throw another pass and risk incompleteness and loss of the ball.

This old type of defense just about smothered the running attack as it was directed at an eleven-man line. Such tactics will

be impossible this year, and the defense backfield will have to stay on an back, fearful of a second and even a third pass.

### State Grads Make Good On Gridiron

Many Former Grid Stars Come Through in Pro Football; Some Turn to Coaching

Many of State's former gridiron stars have joined the pro ranks and are doing all right for themselves. Some have taken coaching jobs and some are making a name for themselves in the business world.

Eddie "Little Buzzer" Berlinaki has been released from his contract with the Brooklyn Dodgers so that he can coach at Bloomfield, N. J. high school. Eddie starred at Bloomfield before coming to State. Big Jess Tatum and Connie Mac Berry are playing Pro football with the Chicago Cardinals this year.

Pete Kuzma has quit coaching to take a fling at pro ball with the Brooklyn Dodgers and is reported doing very well. Louie Mark is also under contract to the same club and is going like a house afire.

Mac Cars is adding to his laurels with the Pittsburg Pirates of the pro league.

Steve Sabol, State's candidate for All American honors in '36 in the Marines and is making a swell record for himself.

Ray Rex is a successful coach in Portsmouth, Va. Rex was All State fullback in 1936.

Dick Thompson is now coaching at Piedmont Jr. High in Charlotte, N. C. His team was city champions there last year and he hopes to repeat.

Alex "Bull" Regdon is freshman line coach and varsity boxing coach here at State and has proved himself an able mentor.

### Room Shortage To Be Remedied By New Buildings

The age-old problem comes to the front again. This year, as has been the case for the past several years, the school is faced with the problem of room shortage for its ever increasing number of students.

Last year the room shortage reached such an acute position that a PWA grant for the building of new dormitories was secured, and construction has already begun. It is expected to have these finished by the beginning of school next year, and this will take a burden off the shoulders of T. T. Wellons, superintendent of buildings.

In talking with Mr. Wellons, we find that they have somewhat relieved the congested condition this year by placing three students in a portion of rooms which were previously occupied by two boys. However, Wellons said that they still have students on the waiting list, and that there were a large number of them staying off the campus in private homes. Members of the football team have been given rooms in the recently finished field house, which will also serve as a dressing room for visiting teams.

Wellons also stated that the YMCA had been busy hunting rooms off the campus for students, and that it would be impossible for him to say exactly how many names were on the waiting list at the "Y."

When the new dorms are completed, not only will the congested

### DANIELS HALL

For the first time since it was built 12 years ago, the State College physics-electrical building will possess a permanent name. The building has been named Daniels Hall in honor of Josephus Daniels, ambassador to Mexico and a staunch friend of the College. Ambassador Daniels is pictured in the inset.

tion of three in a room be relieved, but you will be able to see a look of relief in the eyes of college officials connected with this department.

### LISTENING IN

by JOE MICHAEL

Bob Crosby, youngest of the yodeling Crosby clan has been building himself a grand following, with his sweet swing the latest rage in New York. . . . Judy Garland, the school boys' latest crush, is clicking with a series of personal appearances for Loew houses. . . . Mike Reilly, the man who wasn't content with the damage he wrought with "Music Goes 'Round," has increased destruction with his other song, tagged "Oooh Boom Boom."

... Dedication of swing—epilepsy in rag time. . . . The smart-set collegians are raving over the smooth, satin symphony of Blonnie Bobby Parks in one of Gotham's smartest spots. . . . Jane Withers, screen meanie, does a take-off on Bobby Breen that will lay them in the aisles on her personal appearance tour.

As you all know, Eddy Duchin has deserted the East for Hollywood's famous Coconut Grove, but it is the opinion of many radio pluggers that it is Eddy's ambition to be your next screen smash. . . . Could you say that a gold digger is a squaw that likes to go places and sue things? Oh hum. . . . The Horace Heidt Saturday night sessions from the floor of the Billmore sure did bring in the younger set during the summer. . . . Swingomaniac Benny Goodman, disregarding the loss of top-notch drummer Gene Krupa, is still giving the jitterbugs their money's worth of killer-dillers. . . . The average age of the members of Blue Barron's Orchestra is only 20. The youngest member of the band, who plays that whining trumpet, is only 18 years old; while another member of the band plays pop to the rest because he has reached the ripe age of 24.

There will be more about the Barron later. . . . Hot Lips Henry Bussie drew the town's elite to his New York premiere thrilling to "When Day Is Done" in the Bussie manner. . . . Big criticism of the new Krupa outfit is too much of the skin-beating. The band is top-notch, but maestro Krupa he has them behind him. Vocalist Irene Days, a looker, is strictly big time. Outfit set for the top with a little revision and less Krupa. . . . Reed Sisters, swingy crooners, registering big with Olsen and Johnson crew in Baltimore. . . . Hats off, Wingy Manone for his pepped up trumpet and his leather lunged recording of "Flat Foot Floogie." If any of you fellows have passed the summer with out hearing about Floogie, invite me up next summer.

### Program of 'Y' To Be Outlined

Many Interesting Speakers Will Visit Campus

The State College YMCA cabinet will travel to Hill Forest Sunday for an outing, during which a program for the year will be whipped into shape.

Under the auspices of the "Y," the students at State will have the opportunity of hearing many well-known lecturers speak on topics in which the students indicate they are interested.

Among the speakers scheduled for this term are Ted Mercer, who will be on the campus for a week in October, holding his informal discussions, and Mrs. Mildred Inskip Morgan, who will be here in November to speak on family relations and personal adjustments.

Dr. Sherwood Eddy, author, lecturer, and world traveler, will be here in January to give talks on the political situation in Europe at present.

Sunday Visits With Greeks Begin September 25

(Continued from page 1) accept the invitation without a legitimate excuse shall prohibit a freshman from pledging to a fraternity for the remainder of the school year.

3. All fraternities must turn in to the Secretary of the Interfraternity Council by closing hours Monday of each week a list of freshmen whom they invited.

4. These Sunday entertainments shall be so regulated that a fraternity shall not have a social on two successive Sundays, but they shall be so arranged that all fraternities shall have an equal number of Sundays.

5. Fraternity men shall not be debarred from the Dormitories during the week days, but if a visit is made for friendly purposes, fraternity talk will not be permitted.

The co-eds of North Texas State Teachers College wear all-cotton clothes for one week to honor King Cotton. During this time silks and such are absolutely taboo.

### Bailey Selected Regimental Head for Coming Year

### College Students Improve In Health

Students Securing Aid for Minor Ailments Before They Develop Into Serious Trouble

In a review of the work of the State College infirmary for the past nine months, Miss Ida Trollinger, head nurse of the infirmary, said that they had noticed considerable improvement in the general health of State College students last year.

Miss Trollinger attributed the improvement to a large number of first-aid treatments, indicating that the students are securing attention for minor troubles before they develop into serious ailments.

A total of 23,174 visits by patients were made to the infirmary during the past school year. A large majority received only first-aid treatment for minor troubles.

"Although some of our 1,005 bed patients were rather ill," reported Miss Trollinger, "we had

no cases of dangerous illness. We had 12 operations for appendicitis and one pneumonia case. Most of the other bed patients were treated for colds.

"The fact that the students are coming to the infirmary for first-aid before they really get sick is responsible for making their general health much better."

College Adds Ten Professors To Faculty

(Continued from page 1) ment as instructor. Two new instructors, W. Kenneth Cameron

and Gerald Langford, will join the English department. Cameron comes from New Haven, Conn., where he tutored and lectured in the Yale Graduate School last year. Langford has been instructor in English at the University of Kentucky for two years. The staff of the mechanical engineering department will be enlarged by the addition of R. H. Cope, who comes from Pennsylvania State College, where he has been an instructor.
