No. 16

RED AND WHITE TRIUMPH OVER BLACK AND GOLD.

State College decisively defeated Wake Forest on Thanksgiving Day by the score of 49 to 7 in the fourteenth annual football game between the two rival institutions. The game was a hard fought one from start to finish, Wake Forest playing a better grade of ball than she has played this year.

Promptly at 3:00 o'clock the referee blew his whistle and the great game was on. During the first quarter the ball se-sawed down the field. State threatened to score during the first few minutes of play, but Wake Forest held on their two-yard line and State lost the ball on downs. Wake Forest then kicked. The ball was advanced to Wake Forest's 25-yard line, where Gurley went over the line for a touchdown. Faucette kicked coal. The score stood at the end of the quarter: State, 7; Wake Forest, 0.

The second quarter opened with a rush. Before many minutes of play had elapsed State had added another 7 points to her score, and before the quarter was over she had scored another touchdown. Faucette made one touchdown from a rush, Gurley made the other from a forward pass. Faucette kicked goal in each case. At the end of quarter the score stood: State, 21; Wake Forest, 0.

The third quarter contained the thrills of the day. Three touchdowns were made in this quarter by Pierson, Gurley, and Faucette. The long run of the game came during this period, when "Runt" Faucette caught one of Wake Forest's punts on his 10-yard line and raced 90 yards for a touchdown. Floyd ran good interference for "Runt" on this play. Faucette kicked goal in each case. At the end of the quarter the score was 42 to 0 in favor of State.

Wake Forest played her best during the last period. With the help of penalties she scored a touchdown, but not before State had made another tally; Faucette catching a punt on Wake Forest's 30-yard line and racing for a touchdown.

During the last few minutes of play Wake Forest played brilliantly and succeeded in scoring a touchdown. The last few minutes of the game was played in semi-darkness. The game ended with the score standing: N. C. State, 49; Wake Forest, 7.

Every man that played for State played a wonderful game. Wearn and
(Continued on page 6.)

THE RELATION BETWEEN THE TRACTOR AND THE EDUCATIONAL IN- STITUTIONS

During the past few years both the agricultural colleges and manufacturers of tractors have begun to realize the value of co-operation. Both are serving the same class of people, the agriculturists, and each has something that is of value to the other. The college is in a position to demonstrate the different tractors to students, who in turn pass on their knowledge to those at home so that a manufacturer with a tractor at a college knows that his product is talking for itself much more effectively than he ever could through catalogues and magazines. That the tractor companies are glad to have their tractors used at the colleges for instructional purposes is evidenced by the fact that they so willingly loan them out for that purpose.

That this spirit of co-operation has grown up speaks well for the progressiveness of the manufacturers and the fairness which those in charge of the work at the college have shown by refraining from discrimination. On the face of the matter it would seem to be difficult for an instructor to keep from allowing natural prejudices from cropping out, but it is actually being done by teaching the students what is best from a theoretical point of view, letting them apply the theories of mechanics and gas engine principles to the tractors they study and allowing them to form their own judgment in the matter. Those at home place a great deal of confidence in the judgment of the son at college, and he is often the one who decides which tractor his father buys. That this comparison of tractors by the students is good for the industry as a whole is scarcely debatable. It assures the manufacturer of a good tractor a wider and better method of reaching the farmer, while the low class machines that might have good sales based on persuasive selling talks cannot stand before the tests and criticism of trained men. The producers of high grade tractors should welcome such a condition.

There are three ways in which the tractor manufacturers and the colleges have co-operated: (a) by the various companies loaning tractors to the colleges to be used for instructional purposes; (b) by demonstration at the
(Continued on Page 3)

NEW EQUIPMENT WORTH \$10,000 SUPPLIED STATE COLLEGE

Power farming is now not only most important for agricultural progress in the State, but its proper use is one of the most effective ways to meet the shortage of farm labor. Since the farmer, comprising about one-fifth the population of the world, is required to feed not only himself, but the other fourth-fifths as well, it devolves upon him to use such means and methods as will enable him to meet the demands the world makes upon him.

For the above reason an educational campaign has been put on by the Agricultural Engineering Department of the State College for the betterment of the farmers at large in the use of farm machinery and power farming. In co-operation with machinery and tractor manufacturers about \$10,000 worth of machinery has just recently been placed at the college for use by students in the Agricultural Engineering Department. It is the most modern and useful for cultivation, tilling, seeding and plowing. A complete line of equipment for breaking and preparing the land for cultivation, such as gas tractors, plows and harrows has been received. Seeding machinery such as the drills, corn and cotton planters, and small garden planters have been donated. For building up and maintaining the fertility of the soil the lime spreader, the manure spreader and other types of fertilizer distributors are necessary for use and are available for use by agricultural students. In the laboratory is a very good assortment of engines, ranging from one to four cylinders, which are available for work with students and which can be used for running wood saws, grist mills, ensilage cutters, grindstones, pumps and other machinery around the farm that calls for small horse power. The Department of Agricultural Engineering has, too, recently been provided with equipment, through the generous co-operation of manufacturers, so that it can show how to equip the home with modern conveniences such as lighting plants, water systems, heating systems, electric washers, churns, and other conveniences and necessities.

Power farming, and the improved methods which go with it, is evidently the means by which the farmer of today will be enabled to attain the greatest success possible.

"PINE NEEDLES"

Poetical Love.

Oh! Fairy queen, my dear little girl
You are so sweet and true,
My heart's a throbbing, my head's
awhirl
For I'm in love with you.

Honey, dear, you're the world to me,
Without you life is bare;
I long for the day when I'll be free
Your joys and sorrows to share.

When in your presence so fair, so
sweet
I feel that Heaven is near,
How I'm longing for our lips to meet,
Come, let me kiss you dear.

Ah! love of mine, just one sweet kiss
Would not be out of place
And surely darling 'twould not be
amiss
You in my arms to embrace.

'Twould thrill my soul to touch our
lips,
In sweet communion here;
'Twould be sweeter dear, than the nec-
tar sipped
By the butter-fly flitting about in
the air.

I long for you my sweetest one,
You're the idol of my life.
I'll be the happiest man under the sun,
If you'll only be my dear little wife.

"The frost is on the pumpkin, and the
corn is in shock,"
The ice is on the river, and my over-
coat 's in hock.

Real Spirit.

A coward can smile when there's
naught to fear,
When nothing his progress bars.
But it takes a man to stand up and
cheer
While some other fellow stars.
It isn't victory, after all,
But the fight that a brother makes;
The man who, driven against the wall,
Still stands up erect and takes
The blows of fate with his head held
high
Bleeding, and bruised and pale,
Is the man who'll win in the by-and-
by,
For he isn't afraid to fail.
It's the bumps you get, and the jolts
you get,
And the shocks that your courage
stands;
The hours of sorrow and vain regret,
The prize that escapes your hands,
That test your mettle and prove your
worth;
It isn't the blows that you deal,
But the blows you take on the good
old earth
That shows if your stuff is real.

—Selected.

PUT HIM ON!

If a fellow clad in khaki,
Olive drab, or sailor blue,
Walks in and asks to see the Boss,
And the Boss, of course is you;
If a fellow clad in khaki,
Olive drab, or sailor blue,
Walks in and asks you for a job,
What are you going to do?
—Put him on!

He's the fellow, please remember,
When the Hun knocked at our door,
To whom you prayer with fervor:
"Keep the German from our shore!"
He's the fellow—oh, remember,
Who knee deep in mud and gore,
Gave your prayer a happy answer,
Made your heartstone safe once
more;
—Put him on.

When he marched away you cheered
him;
Have you cheered him coming back?
Have you given him a welcome,
Since he laid down gun and pack?
Have you thrown his deeds in discard?
Put his record on the rack?
It is you who'll be a slacker
To the boy who didn't slack?
Put him on!

If a fellow clad in khaki,
Olive drab, or sailor blue
Walks in and asks you for a job,
What are you going to do?
Yes, of course, it seems a problem,
May mean sacrifice for you;
But—remember Chateau-Thierry;
He's been sacrificing, too;
Put him on!

The Relation Between The Tractor And The Educational Institutions

(Continued from Page 1)

colleges during farmer's conferences and similar assemblies; and (c) by tractor performance contests held at the colleges and judged by the professors.

The idea of placing a tractor with each of the principal agricultural colleges is being recognized more and more by progressive manufacturers as one of the cheapest and best ways to get their tractors directly before the people. A college is naturally in no way bound to push the sale of a tractor that has been loaned to it and if the instructors are judicious, a number of different tractors may be accepted without incurring the displeasure of rival companies. The writer cannot over emphasize the mutually advantageous results of adopting this plan.

At least once a year a farmers' conference, or a meeting of similar nature, is held at each of the agricultural colleges, and it is there that another opportunity for co-operation presents itself. The presence of a number of tractors with a representative from each company is indispensable to the complete success of such a gathering. Unlike the former case, both the demonstrators and the tractors come into direct contact with possible purchasers. No one will dispute the fact that it has a decided advantage over any other form of publicity.

The holding of performance contests at the college has the advantage of stimulating interest among both farmers and manufacturers, but it has the overwhelming disadvantage of giving all of the weight of resultant publicity to the winner. Moreover it is a difficult matter for the judges of such a contest to satisfy all of the competitors. The writer knows of one such contest that resulted in not a little bitter feeling, and is convinced that such contests, if held at all, should not be under the auspices of a college. It must always be kept in mind that the first duty of a college is to serve the people and that any publicity that tractors may gain through a college must be in the regular line of educational work and not ostensibly an advertising campaign.

There is yet one other matter which brings the colleges and the tractor manufacturers together, tractor testing. Of course each company can and does make its own tests, but some of the more progressive companies are now requesting each of the State colleges to run a test for them. Whoever originated this idea must have a keen insight into present conditions and deserves a great deal of credit, for

it is based on good psychology. He must have sensed the change that is taking place in the farmer's mind concerning colleges and college training and has made use of this fact that the farmers are placing increasing confidence in their State Agricultural College and will give more weight to a test performed there than to one held by an unknown company in a far city with no one to question the truth of the results. That is the reason why the colleges are continually receiving requests to make tractor tests, and it presents a problem that ought to be solved immediately and a worthy precedent set.

New A. R. O. Cow for State College Herd; North Carolina Becoming Dairy State

(By F. M. Haig, N. C. State College.)

On October 12, 1920, Carolina's Nina No. 350095, a pure-bred Jersey cow, in the State College herd, completed her advanced registry test by producing 413 pounds butterfat (equivalent to 495 pounds of butter) and 8048.7 pounds of milk (equivalent to 935 gallons milk).

In October, 1919, Prof. R. H. Ruffner, who succeeded Mr. T. C. Reed, as head of the Department of Animal Husbandry at State College, adopted the constructive policy of placing each cow on official test immediately upon freshening. As a consequence there are now 22 cows on test, all of which are making very satisfactory records. In fact in several instances cows which heretofore had no records whatever, are producing from 500 to 700 pounds butterfat. There are three cows that will probably be awarded gold medals by the American Jersey Cattle Club of New York. To receive this award it is necessary for a Jersey cow to produce, in 365 consecutive days, 700 pounds or more of butterfat. When we reflect that at present there is only one gold medal cow having completed her record in the State, we are impressed that the producing of 700 pounds of butterfat is no common occurrence.

This record making at State College is carried on with the sole purpose that dairymen throughout North Carolina will compete and try to surpass these records. In this way the herd will be of the greatest help to the State.

From a study of recent statistics it is very evident that North Carolina is making rapid progress in the development of the dairy industry. This seems to be the easiest solution applied by the Southern farmer to the present farming situation. With the low prices of cotton and tobacco prevailing it is essential that the Southern farmer turn his attention more to diversified farming than he has in the past. Now, if farmers in Wisconsin,

where there is only a three-months' growing period, are so successful with the dairy business, how much more favorable it would be with the Southern farmer, where there is a growing season of practically twelve months; lower cost of labor; less expensive buildings, and numerous other advantages found nowhere except in the South.

So if you have a few grades or scrubs why not substitute a few pure-breds and become a breeder of dairy cattle? It costs no more to feed or care for a pure-bred than it does for a scrub, or grade, and the pure-bred generally produces two or three times the milk and butter as does the scrub.

OUR SERBIAN FELLOW-STUDENTS

Two years ago, more or less, the students of N. C. State College decided to place themselves in a class with the distinguished few. This action was entirely voluntary on the part of every student then in college. It was not in any sense forced upon us.

A lady came here and informed us that there were two young Serbian men who were very desirous of receiving an education in this country. She also told us that a few had already been placed in other large institutions of learning over the United States. We are among the few who were giving this high privilege—in no other way is it possible to so thoroughly instill the principles of our government and its freedom in the hearts and minds of the foreign-born. We can in this way teach them to be the highest type of citizenry. However, it does not stop with them, but goes on and on creating in the hearts of other aliens who come to our shores, the worthy desire to be a real American in speech, habit, actions and patriot-

ism. The more of these men we educate in our schools and colleges the better will our government be in the future; for it is education that will lead them away from anarchy and bolshevism.

Fellows, it costs something to provide for the needs of these men. Practically all of their college expenses are cared for by other means than student contributions. This leaves board and clothes to be provided by the students. You all know what their board for one year will amount to, and you can estimate the amount spent on clothes. There are about nine hundred men enrolled in college now. If every man would make a contribution of just one dollar, the expenses of these men would be amply provided for. Practically every man in State College could, without any inconvenience to himself, donate one dollar. Most of us spend this amount and more in one trip downtown, and we don't even know where it goes either. These two Serbian men are among the most deserving in college. Think of what it will mean to have the honor of having assisted them to complete their course here. Those of you who have classes with them know that there are no brighter men in this institution than these two.

Less than one hundred men have contributed this year. IN WHICH CLASS ARE YOU? See Morrow or Lane.

THE COLLEGE DINING HALL

Some of us seem to fail to recognize the extent of the inclination to imitate in the human race. If we only stopped occasionally to consider the probable effect of our actions on the actions of others we would, in many cases, act differently.

Most of us seem to have the idea that the only way to get a freshman, or a member of any other class for that matter, to behave himself is to threaten and bull-doze. This very seldom has the desired effect; usually it has just the opposite tendency. How much better it would be if we could only influence by example rather than by promise of future punishment.

Most of the seniors dining in the mess hall are only too ready to condemn any unusual amount of noise, clinking of glasses, throwing of bread, and the like, during meals, if the perpetrator of these acts be an underclassman. Many disapprove it regardless of the class rating of the man who creates the disturbance. The throwing of bread and bits of food has become noticeable of late in certain sections of the hall. Of course all this is done in a spirit of fun, but such a spirit should be out of place in a dining hall. You who have been guilty of this sort of thing might reflect for a moment and consider the effect of throwing bread in your mother's dining room at home. There

is not a man of us who would be guilty of doing such a thing.

Everybody knows that the man whom the bread hits does not suffer any excruciating pain, unless he is unfortunate enough to keep his eyes in line with some stray shot. The whole thing in a nutshell, fellows, is this: We get into the habit of misbehaving in the mess hall, and when strangers come in, as they frequently do, they get a very wrong impression of us; they consider this a true exhibition of what we are. Give a dog a bad name and you all know how it will stick to him.

Many seniors have recently been observed engaging in this delightful pastime. When seniors persist in doing such things what chance is there to prevent juniors, sophomores and freshmen doing them also. Seniors, let's get together on all such things and show the underclassmen the proper road.

Students of the college, both former and present, especially those in agriculture, will be interested in a two-weeks short course in practical agriculture that is to be offered at the college January 20th to February 3, 1921. There are a large number of farmers in different sections of this State from which our students come who could be sufficiently interested in this work, that is being offered by the college, to come up to take it. All students could be of great service to the college by interesting some of their friends back home in this course. This course will be of an intensely practical nature and will include the more important things that the farmer should know in fruit growing, vegetable growing, field crop production, farm management, farm dairying, livestock judging, recognition and effective treatment of crop diseases and insects, soil management, diseases of livestock, poultry and farm implements. There should be a large number of farmers to come up to the college for this work. It should add greatly to the efficiency of all those who take it.

S. E. Wilson (to his girl): "What sticks closer to a man than a friend?"
 She (to his surprise): "His B. V. D's."

THE FRED B. SMITH CAMPAIGN

Are you a Christian? The challenge rings true and is to you. And you, a college man, one of the selected few, are demanded to answer this challenge. To the average college man who is the man who has religion? It is he who lives it in his every-day life. The man we meet in class, on the campus, he with the good smile for everyone, the man who really does the Golden Rule and is inspired with the spirit of service.

We are going to have the chance to get the Christian spirit from a Christian man, not a preacher, but one of the industrial world, a speaker among speakers.

We are going to have with us Fred B. Smith. He is a business man of one of America's largest corporations. He comes to us with the message that business can be and must be Christianized. He is a man of world interest and has a program of Christian ethics. His theory of a man's religion is that of personal religion, because persons compose society and society can be no better than its components.

If you do not hear him you will miss a great speaker of the type of Moody, Mott, Wanamaker and Theodore Roosevelt.

We had a great meeting last year, and this year we are provided to carry on our motto of "A Greater State College" to an end. Shall we fail or shall we get the vision and in our beginning get a foundation on the solid rock of Christianity?

A big week with a big program. Don't miss it!

Professor in Chemistry Class—"In what three States are matter found?"

Freshman G. H. B.—"Sir, I'm not sure, but I think it's in North Carolina, Virginia, and North Dakota."

Professor—"Attention! I want to show Loftin's work to the class. He made this entire block-joint out of his head and has one sq. ft. of board left."

An extract from Freshman Chandler's first letter-home:

"Dear Pa:

"Please send me a pair of shoes, as everybody wears them up here."

Red And White Triumph Over Black And Gold

(Continued from Page 1)

Laurence on ends played wonderful ball; Captain Weathers and Ripple at tackles played the brand of ball that is seldom seen; Floyd and Pasour at guards were all that could be desired, while Everhart at center fully justified his claim to all-State center.

The backfield shone in all their brilliance. Johnson was handicapped by being crippled but played a good game nevertheless. Pierson played a good game, both offensive and defensive. State's super - dreadnaught, Gufley, playing his last game for his alma mater, played the best game of his career. He was a tower of strength on the defensive and in running forward passes. For the four seasons that "Dick" Gurley has played for State he has made a name for himself in football history. He will always be remembered as one of the best backfield men that ever fought for the Red and White. Faucette shone in all his glory. It is so natural for "Runt" to star that nothing else is expected. His broken field running could not be duplicated. His throwing of passes was wonderfully accurate. To top the list he finished the season with not a single failure credited to him in kicking goal after touchdown. In fact his work was so good that his teammates have elected him to head the '21 eleven. Here's to you, "Runt," may you have great success with your team and make the South Atlantic championship your goal and never stop trying until the goal line has been crossed.

FINIS.

HARD TO FIGURE

Stage Manager: My dear, I wish you would wear a different gown in the second act.

Rit Ravenyelp: But that is the latest style, and I paid two hundred dollars for it.

Stage Manager: That may be true, but when your husband says: "Woman you are hiding something from me," the audience can't figure out what he means.

News Notes

Dr. B. W. Wells will give a paper entitled "The Evolution of Zoocecidia" before the Botanical Society of America at the coming Christmas convention of the American association for the advancement of science. He will also address the Entomological Society of American on "The Role of Insects in Gall Evolution."

WANTED TO KNOW

Who was the green Freshman who left a two pound box of Nunnaly's at Meredith parlor last Saturday night?"

POULTRY DEPARTMENT OF N. C. STATE COLLEGE

The Great North Carolina State Fair found the poultry department of State College on the job as usual. The annual egg show was conducted by this department. Over one hundred entries were made. There were also many educational exhibits.

The bird show was very good. More than 2,000 birds were on exhibition.

A very beautiful trophy cup was won by N. C. State. This cup was won on a Golden Wyandotte hen. This bird was hatched by the poultry department of this college in 1919. This hen will be sent to Madison Square Garden Show this winter. We are expecting "old soldier" to bring back the cup.

OW-00000-00-00-0-0-OH!

(By T. R. T., '21)

Inside of me frolic the pains of colic
I ate some of that mess hall pie,
I can't feel sunny for love or money
I fear I am going to die.

In my tummy there're feelings funny
I'm beginning to feel prophetic,
That Bull and Soup did give me the
croup

Indeed my condition is pathetic.

AGRICULTURAL ENGINEERING DEPARTMENT

Just what is the nature of this work may be asked. This is very clearly expressed by Herbert P. Shuts.

"The agriculture engineer's job is to educate farmers, present and prospective, to be better farmers, to increase production, to have larger shares of the conveniences and comforts of life and to make better counties."

This department may be referred to as being quite new at State College. It was introduced into the agricultural "side of the hill" last year. Very little work was accomplished, owing to lack of equipment of all kinds.

This year things are different. One may draw from the following an idea of the interest which is being taken in the course. Last year sixteen men elected agricultural engineering, this year thirty-three of the thirty-five members which composed the senior class only, elected this course. What is going to keep this department from being still more popular next year, with equipment of every description coming in every week? There are also several rehabilitation and short-course men taking advantage of this course.

Ten thousand dollars worth of new equipment has just come in. This equipment consists of lighting plants, water plants, tractors, and all the equipment necessary for the farm.

Agricultural engineering also includes farm buildings, which is a most important subject. College.

Patience is not only a virtue, but it pays.—Forbes Magazine (N. Y.)

THOMPSON Shoe Co.

THE BOYS' STORE

Fellows, for honest-to-goodness shoes, come to us.

We guarantee to sell them cheaper.

See our samples at the College Court Pharmacy.

When you want a place to loaf make this store your headquarters.

17 East Martin St.

To the Wake Forest Football Team.

(Franklin Times.)

We know not where your trouble lies,
And do not mean to criticise,
But it makes us blush with shame
Because you never win a game.

With this blown up porker's skin
Once more we hear you failed to win
With aching hearts we broke the news
The Manager now has the blues.

Three cheers for Mr. Rabenhorst
He starred, although the game was lost
We searched our column for the score
And found this star but nothing more.

None us would dare debar
The glory of a shining star
But scorers say they do not count
So we lost a small amount.

We have been behind your back
But yells don't make up what you lack
We have made the welkin ring
Which so far hasn't meant a thing.

Make them pay your (quarter back)
And try the stick-the sphere-the sack
In cutting corners of the plate
Saxe Barnes at least was up-to-date.

Slow speed on the heel and sole
No one yet has kicked a goal
You always make our feathers fall
Fooling with the pig-skin ball.

You should quit or buy a frame
Which would throw to you a game
The star of Mr. Rabenhorst
Won't re-emburse amounts we lost.

On Friday night, November 26th, the Alpha Gamma Rho Fraternity gave their annual Thanksgiving dance at Pullen Hall. The old auditorium was hardly recognizable with the improvements and attractive decorations. Green and old gold crepe paper formed a trellis which hung from the balcony railing; streamers also attached to the balcony were draped and caught at each window and above the front door. Banners of other fraternities were interspersed with those of Alpha Gamma Rho. At the front of the stage was a large A. G. R. pin which shone beautifully with the color scheme of lights behind it.

As the guests arrived they were cordially greeted at the door by Messrs. Hamilton, Holmes, and Adams, who were the special leaders, and to whom great credit is due for setting up the high standard of the dance.

Punch was served by Mesdames Riddick and Metcalf, from two large punch bowls which were embanked with ferns upon a large table at the left of the stage.

Music was furnished by the famous Myer-Davis Dance Quintette. The dancing stopped at 12 o'clock, and although there has been no drinking or

auto riding during intermission, it was unanimously agreed that this was one of the best dances ever held in Pullen Hall. It is to be hoped that such occasions may be repeated at State College and elsewhere over the State.

Among the chaperones were Dr. and Mrs. Riddick, Prof. and Mrs. Metcalf, Mr. and Mrs. Strong, and Dr. Kaupp.

THE GIRL

"A little dab o' powder, a little dab o' paint,
Makes a girlie look like, what she ain't."

THE BOY

A little bit o' soap, A little bit o' water,
Makes a boy look like, what he oughter.

Please lend me a dollar my brother,
A dollar is all it will cost,
I had money before the election,
But I bet on the wrong man and lost.

If I had a dollar old fellow,
I would surely lend it to you,
But all I had was up on the election,
And I was a Democrat, too.

STATE COLLEGE AND THE HIGH SCHOOL GRADUATE.

Everything is at present in a most unstable condition due, most people say, to the reaction after the great war. Plans are very uncertain things just now; nobody is able to say with any degree of accuracy just what the next year will bring forth. This, of course, does not hold as to political prognostications, at least not in the opinions of the politicians. The Republican politician is sure that the country is on the eve of its greatest prosperity, since his party holds the reins; on the other hand the Democrat is absolutely positive that nothing but ruin can come to us. These at least are the ideas one gets from reading the Republican and Democratic newspapers.

Regardless of the above no harm can result from making plans this year, and it is not too early to begin, toward a greater enrollment at State College next fall. The many high schools over the State will graduate hundreds of young men next spring. A large percentage of these same boys will enter college next fall. As the only technical college in the State we should attract more of these men by far than any other college in the State. We have here the greatest variety of courses, and while our buildings and equipment are not all that could be desired, nevertheless we are as well provided for as any other institution in North Carolina. Furthermore, the prospects are good for more and better dormitories, laboratories, and equipment in the very near future. There are on foot many needed reforms that can have but one result: the making of a better, more efficient, and more serviceable State College. We have every reason to expect the majority of this year's high school graduates who go to college to enroll here next fall. There remains yet one thing to be done, besides carrying out our program here on the campus. We must all remember to give our college all the good advertising possible during the holidays.

When we go home Christmas we should lose no opportunity to favorably impress everyone with the courses of study here, and all the advantages a technical institution has over a non-technical. Especially is it necessary to "talk it up" among the boys in and about your home town. Let them know thoroughly the advantages to them in coming to N. C. State. Let's have fully sixty per cent of the boys in the State who go to college enter N. C. State next September.

Wanted: the following information—"Who plays a higher card at Peace Institute than O. K. Holmes?" Any night of the week is visitors' night for him. Why is this so?

LINCOLN COUNTY CLUB

The Lincoln County Club, which was organized this year by the boys from Lincoln county, is indeed proving to be a success. There has been a number of boys here from Lincoln county every year, but this is the first real club that has been formed. The club has an enrollment of thirteen members, and each one is taking an interest in it, and intend to make it a success.

One of the principle objects of the club is to advertise State College and let every boy at home know that we want him at State College when he finishes high school. This is one of the best advertising schemes the college can have, and the success of N. C. State College depends largely upon the efforts that we, as students, put forth in encouraging boys from our home town to come to college.

The Lincoln County Club has subscribed for the Technician, and is sending it to the high school at home. This one little act will show that we are interested in them and wants every high school graduate to make up his mind and go to college.

Our club does not only exist for business, but the social side is also a part of our life. A "feed" was pulled off last week and every member was present at the appointed hour. With cold drinks, club sandwiches, fruits, cigars and cigarettes, the "feed" was enjoyed by all. What every member wants to know is, when is the next "feed."

A job and joy go together these days.

STATE COLLEGE ONE OF FAVORED FEW.

Each year it is the custom of the Young Men's Christian Association to bring in one of the strongest speakers that can be secured for a special series of addresses. Last year these addresses were delivered by Dr. W. D. Weatherford, of Nashville, Tenn. Both students and faculty came out en masse to hear these addresses.

This year the addresses will be delivered by Mr. Fred B. Smith, of New York City. December 8th, 9th, and 10th are the dates set for these addresses. Only two colleges in the South have had the good fortune of securing the services of Mr. Smith: North Carolina State College and Clemson College.

Mr. Smith is a different type of man from any who have visited State College in this capacity. He is not a minister, neither is he Y. M. C. A. secretary or paid religious worker of any kind. He is a Christian business man and is connected with the Johns Manville Company, which is one of the largest concerns in the United States, handling roofing and building materials.

As a speaker for men, Mr. Smith is ranked by those who know him in a class with William Jennings Bryan and Raymond Robins. He has spoken to men in most of the cities of the United States, and during the "Men

and Religion Movement" campaign, he and Raymond Robins made a trip around the world and conducted evangelistic service in the important cities en route.

The visit of Fred B. Smith to State College will be one of the important events of the year. An effort is being made to have Pullen Hall put in readiness for the occasion. There can be no more fitting dedication of the chapel than to have it used first for this series of addresses. The band, the orchestra, and the glee club, all three of which so willingly furnished music for Dr. Weatherford's addresses, will be asked to take a part in the program again this year. Plans are being carefully worked out in detail so nothing which can contribute to the occasion will be left undone. The attendance last year was at least 75 per cent of the student body. This year it should be 100 per cent.

Maybe in the year two thousand,
 Maybe in the year two-ten,
 Maybe in the next generation,
 Maybe we'll win it then.
 Maybe when these old Freshmen,
 Have long been at their rest,
 Maybe they'll win it then,
 That Freshman football quest.
