## Democratic Congressman To Address Student Body

Progressive Young Statesman to Speak Here on the Challenge of the South

Dr. L. E. Hinkle, Chairman of the Public Lectures Committee, announced today the Democratic Congressman Clyde Ellis from Arkansas, one of the most outstanding and progressive young members of Congress, will deliver an address in Pullen Hall on April 10th, at 8 o'clock.

The young representative from the South has been carrying on the fight for the development of the natural resources of the South and the utilization of southern industries in the national defense battle that has been waging in Congress. He is at the present trying to get the Red River and its tributaries developed through a project similar to the Tennessee Valley Authority program that is now in effect.

The title of the address to be made by Mr. Ellis is "The South's Challenge to You and Me."

At the conclusion of his address the floor will be open for a discussion of the problems and various thoughts that Mr. Ellis has brought out concerning the development of the South. The speaker has stated that he will endeavor to answer as many questions as time will permit and that he is anxious to get the student viewpoint on such pertinent questions.

The Arkansas will address the major portion of our state later on that evening with another discussion that will be broadcast over Station WPTF from 10:30 to 10:45.

## College To Train Naval Reserve Men

Officers To Be Assigned To State College To Study Diesel Engines in Preparation For Active Duty

Fifteen naval reserve officers will be assigned to State College April 1 for special training in diesel engines, Dean Blake R. Van Leer, head of the School of Engineering, announced recently.

The men will study 16 weeks and then the Navy will assign them to duties aboard vessels powered by diesel engines. They will come from the U. S. Naval Reserve Midshipmen's School at Northwestern University.

Only two other schools in the nation—Cornell and Illinois—have been selected definitely to teach the diesel course to naval reserve officers, it is understood at State College.

An inspector for the Navy Department spent two days at State College recently, and departed apparently well pleased with the facilities for teaching diesel engines.

The instruction will be in charge of Prof. R. B. Rice of the Department of Mechanical Engineering. This department is presenting a large number of other courses as part of the national defense training program.

## New Course Offered By Textile School

Federal Government To Bear Expense As Part of Defense Program; High School Education Prerequisite

A course in fabric inspection and testing, offered as part of the program of engineering training for national defense, began at State College on Monday, March 17, with the Federal government paying all expenses except the students' subsistence and textbooks.

Director Edward W. Ruggles of the College Extension Division was notified by the U. S. Office of Education, which is in charge of the engineering defense training program, to make the course available to young men in North Carolina, preferably men with textile training. High school graduation was required.

The college accepted 22 students in the new course, which will last 12 weeks. Director Ruggles said the course offered an exceptional opportunity to textile workers whose employers would like for them to get additional training.

Purpose of the course is to prepare trained men for quartermaster corps, procurement divisions and other organizations purchasing large quantities of fabrics and needing inspectors to see that the fabrics meet specifications. The training also will be useful in the testing laboratories of textile mills.

Lectures on the identification, analysis and testing of textile fibers, yarns and fabrics are being supplemented by laboratory work on various testing machines. The course is being taught in State College's modern Textile School under supervision of Dean Thomas Nelson.

## Chemical Engineers Leaving for Alabama

Sixty Men To Go on Joint Inspection Trip-Convention To Birmingham

Fifty-four members of the senior class in Chemical Engineering will leave the campus Sunday morning on an inspection trip that will cover approximately 2,000 miles over the states of North Carolina, South Carolina, Alabama, Tennessee, and Virginia.

During the trip the seniors will have the opportunity to inspect every type of chemical engineering equipment known and to see them in actual operation in the chemical plants they plan to visit.

First major stop after leaving Raleigh will be Atlanta where the men will be shown over the Coca Cola plant in that city. After leaving Atlanta they will go to Tuscaloosa to attend the annual convention of the Southern regional chapters of the student branch of the American Institute of Chemical Engineers.

After leaving Tuscaloosa the tour will extend to Birmingham where the students will be taken through part of the Republic Steel plant which include the blast furnaces, open hearth furnaces, and rolling mill.

At Gadsden, Ala., the Goodyear Tire and Rubber Company has granted permission for an inspection tour of their plant; and at Chattanooga, Tenn., the men will visit a large contact sulfuric acid plant.

Brevard, N. C., home of the Eusta Paper Company, the only manufacturers of cigarette paper in the United States, will be the next important stop made by the group. At Canton, N. C., the students will visit the Champion Pulp and Paper Company, which produces 1,000 cords of wood a day to produce 500 tons of pulp and paper.

Leaving Canton, the group will go to Kingsport, Tenn., where they will visit a large glass plant; and at Saltville, Va., a large alkali plant will be inspected.

At Roanoke the students will go through the plant of the American Viscose Corporation, largest manufacturer of rayon in the world. If time permits, the large water softening plant of the Norfolk and Western Railway will be visited.

After leaving Roanoke the group will return to Raleigh on Saturday night.

## Max Gardner Wins Technician Contest

Hoyle Adams Takes Second Place, Ward Bushee third, in Editorial Competition

Max Gardner, Jr., with his editorial, "Industry in North Carolina," took first place in the recent editorial contest sponsored jointly by the Technician staff and the English Department. Second place was awarded to Hoyle B. Adams, with Ward Bushee and C. R. McNair taking third and fourth places respectively.

All students taking the freshman course in English were required to write an editorial on a subject of his choice from topics chosen by the members of the English Department. The editorials were graded by the professors teaching the course, and the best few from each section were turned in to the Technician office. There all the editorials were studied and compared by a judging committee made up of members of the English Department and the editorial staff of the Technician. The four best editorials were finally selected, with nine others taking honorable mention.

The contest was originated by the Technician staff to arouse the interest of the students, especially freshmen, in writing for publications. Dr. Lodwick C. Hartley, head of the English Department, expressed his full accord with the idea, and offered his full support of the English Department in carrying out the project. The professors for whom the editorials were written were pleased with the contest because it brought to light some heretofore unknown talent.

Those editorials receiving honorable mention were originated by Charles Mims, R. H. Reynolds, Walter T. Green, Phil Johnson, Robert Bivens, Herbert Bernstein, Homer S. Tolan, Jr., H. L. Bodner, and Evert Levin.

Because there was so much interest and cooperation with the Technician, it is hoped that the contest can become an annual event.

## CHEMICAL ENGINEERS!

All chemical engineering seniors who plan to take the inspection trip meet Saturday at 12 in room 113 Winston Hall. You are requested to bring your bus fare along.

COMELY COLONEL of State's ROTC Regiment for the big "Army Week End" being held today and tomorrow is Miss Lillian Fowlkes, pictured below. Escorted by Fabe Clements, president of the Officers' Club, Miss Fowlkes assumed command of the regiment today as Honorary Cadet Colonel. She will also be one of the sponsors for the dances tomorrow.

## Bill Friday Will Preside At State-wide Convention

Representatives Leave Today for Meeting of North Carolina Federation of Student Governments

Bill Friday, president of the North Carolina Federation of Student Governments, will leave today to preside over the annual convention of this organization at Greensboro College that will draw representatives from over 16 colleges in the state.

Meeting today and tomorrow, the delegates will discuss the part the student governments and other student organizations can play in cooperating with the Federal government in the national defense program.

Headlining the series of speakers that has been arranged is an address by Mr. Cecil E. Bell, assistant Industrial Engineer of the division of Commerce and Industry of the department of Conservation and Development. He has been appointed by Governor Broughton to be in charge of the location of new industries in North Carolina that concentrate on national defense work. His work brings him into contact with many of the leaders of the largest industries in the United States.

Mr. Fred Weaver, assistant dean of students at the University of North Carolina, will lead a discussion on Friday afternoon before the entire group on present day student government problems.

Paul Lehman, president of the Student Body, Reese Sedberry, junior council member; and Dud Robbins, junior council member, will accompany Friday as the delegates from State.

## Oberlin College Dean To Be Heard-Sunday

Dean Graham To Speak At Pullen Memorial Baptist Church and At "Y"

One of the most prized men the Y.M.C.A. has ever brought to this campus will talk in the "Y" auditorium Sunday at 7:40 p. m. Speaking at that time will be Dean Thomas Wesley Graham of the Oberlin Graduate School of Theology, Oberlin College, Oberlin, Ohio.

Dean Graham comes here under joint auspices of the Y.M.C.A. and Pullen Memorial Baptist Church. He will speak at Pullen Church on the morning at 11 a. m. on "World View," and will relate some of his experiences in Africa. His talk in the Y.M.C.A. in the evening will be on "Called Christian."

A scholar and an excellent speaker, Dean Graham has just returned from a trip through Africa, where he studied the church "on the firing line." Starting in August and returning in January, he also visited several South American countries.

Every student is invited to hear Dean Graham either or both times, and a worthwhile talk is guaranteed.

## Seniors in Textiles Leave for Greenville

Inspection Trip Will Take Them Through Plants Showing Variety of Textile Operations

Approximately 75 juniors and seniors in the textile school will leave on their annual inspection trip Tuesday morning that will carry them through plants that carry on a variety of textile operations.

The group will leave early Tuesday morning and go to Elkin, N. C., to go through the Chatham Blanket Mills as the guests of Mr. Thurman Chatham. They will be shown the many operations in the making of the materials for the army that this company is now doing. They will go to Charlotte to spend the night.

The Carter Traveler Company at Gaston, N. C., has invited the group to go through their plant on Tuesday morning. From the Spindle City they will go to Greenville, S. C., for the opening days of the Southern Textile Exposition that is being staged by the manufacturers of the South.

On Thursday morning the seniors and juniors will go to LaFayette, S. C., to go through the Pringle Manufacturing Company, makers of many fancy fabrics. That afternoon will be spent visiting the Textile School of Clemson College at Clemson, S. C.

The group will go to the Union Bleachery early Friday morning and see processes in finishing textile fabrics.

Messrs. C. A. and Ben Rudisill have extended an invitation to the students to go through their plant in Cherryville, N. C., on Friday afternoon and be dinner guests that evening. Both of these men are graduates of the Textile School at State.

Accompanying the students on this trip will be Prof. T. R. Hart and Prof. J. T. Hilton. Mr. C. A. Upchurch, Jr., of the State College News Bureau will make the trip also to get material for a feature story.

## Phi Eta Sigma Men Attend Convention

New and Old Presidents Attend National Meeting in Dallas, Texas

Max Gardner has recently been elected president of the State College chapter of Phi Eta Sigma, national freshman honorary fraternity. He succeeds William Womack, outgoing president of the society.

The new president and the retiring president will attend the national convention at Dallas April 11-12.

## Military Week-end Dances To Climax Big Celebration

New Defense Courses Scheduled To Begin First of Next Week

April 1 is Starting Date in Many Fields of Engineering

A new series of engineering defense training courses will begin at State College April 1 for high school graduates who are not in college now. Director Edward W. Ruggles of the College Extension Division announced recently.

All expenses of the courses, with the exception of the students' subsistence and textbooks, will be paid by the Federal government through the U. S. Office of Education. Students' expenses will be kept at a minimum.

State College began special short courses in engineering January 1 as part of the national defense training program for supplying skilled men for government and industrial jobs opening by the thousands. Approximately 250 men from all sections of North Carolina enrolled in the courses, most of which are nearing completion.

Courses proposed for the new schedule starting April 1 include airport design, architectural drafting, chemical testing and inspection, chemistry of powder and explosives, Diesel engines, electrical distribution, engineering drawing, electronics, electronics, fabric testing and inspection, surveying and topography, materials inspection and testing, production engineering and supervision, and spectroscopy in industry.

Upon satisfactory completion of the courses, students will be prepared to take civil service examinations.

Prospective students were urged by Director Ruggles to write to him immediately for a bulletin outlining the proposed courses and other details in connection with the training. About 20 students will be accepted in each of the 13 courses.

A large number of applications already has been received for the course in fabric testing and inspection, which was announced previously. However, further applications will be received by Director Ruggles for use should openings develop in the course or should an extension of the course be approved by the Office of Education.

The courses will last from eight to 20 weeks, with instructors and facilities of the engineering and textile schools being used. Evening courses will be included in the schedule for employed men desiring them.

## VPI Chaplain Speaks Of Great Challenge

States That Our Economic Relations of the Future Depend On What We Do To Aid Future Leaders

Mr. Paul Deering, the chaplain at VPI since the "World War" and recognized as one of the outstanding men in religious work in the United States, spoke last night in the north end of the YMCA to members of the faculty and student body on the vital necessity of providing aid to students in war-torn foreign countries.

Mr. Deering, who was stricken blind at the age of 12 by the accidental discharge of a gun in his face, studied at a school for the blind in Virginia, and later matriculated at William and Mary College. While in college, he made high honors and was extended a bid to Phi Beta Kappa, national honorary fraternity. He is one of the two blind men in Virginia who attended college to attain such an honor.

The speaker said that the drive being put on by the World Student Service Fund is one of the greatest challenges ever placed before this generation of college students. Besides providing much-needed relief for the foreign students working under great stress, the drive will also awaken the students in American colleges to what is taking place in the world today. According to Mr. Deering, we are now on the brink of a dissolving world, and our economic relations of the future depend upon what we do to aid the leaders of tomorrow in other countries.

The same drive is now being made at VPI. Mr. Deering's school, where the students became so enthusiastic over the drive that they rejected a previously-set goal of \$2,000 and voted a new goal of \$3,000 for the school. Not just a few leaders are behind the drive at VPI, but the whole school.

In connection with the same drive here on the State College campus, a moving picture, "China Strikes Back," will be shown tonight at 7:30 in Pullen Hall.

## Spectators' Tickets

The Officers' Club announced today that there are still quite a few spectators' tickets available for the dances tomorrow. These tickets may be obtained at the Agromech office in the Publications Building between 2:00 and 5:00 o'clock.

## State Legislature Grants An Increase In Appropriations

Grant to Be Used For New Positions on Faculty, Promotions, and Apparatus

Both houses of the North Carolina General Assembly just before adjourning passed the recommendations of the Joint Appropriations Committee thus approving an increase of approximately \$185,000 in the appropriation for State College for the next biennium.

Colonel John W. Harrelson, dean of administration, announced that the increase would go, to a large extent, for new positions among the faculty and for promotions and salary increases. The engineering, agricultural, and forestry divisions of the college are to receive additional equipment.

A larger allotment will be made for plant maintenance during the next two years, and the library will be allowed to spend more for new books.

Definite apportionment of the funds has not yet been made, but the new appropriation will not be available until after July 1.

No appropriation was granted for permanent improvements with the exception of \$6,000 for an elevator to be placed in the textile building. This means that without a Federal grant there will be very little chance for any new buildings at State College within the next two or three years.

## State Debate Squad Defeats All Rivals

Brice Ratchford Wins Extemporaneous Speaking Championship; Team Has Won 35 of 37 Debates

State College's crack debate team recently won the southwestern direct clash championship in the Savage Forensic Tournament at Durant, Okla., the College News Service was advised by Prof. Edwin H. Paget, forensics director accompanying the squad.

The North Carolinians defeated debaters representing Southeastern College of Ada, Okla., in the finals of the tournament, which is the largest in the Southwest. Previously, the N. C. State team defeated Southern Methodist, Texas Tech, and Baylor.

Brice Ratchford won the extemporaneous speaking championship in competition with over 100 speakers from southwestern colleges and universities. He is a member of the national direct clash debate championship team.

The State College debate squad appeared in the Savage tournament by invitation.

On the team are Brice Ratchford, Gastonia; David Harris, Newell; and Wilbur Bryant of Wilmington. The State squad, holder of the national championship in direct clash debating, now has won the direct clash title in every sectional tournament held this year at which the direct clash debate has been part of the competition. The team has won 35 of its last 37 debates.

## Fraternity Plans New Music Contest

Fred Waring To Present Trophy To Fraternity Best Singing the School Song Composed By Him

Something new in the way of contests will be originated in a few weeks by the Lambda Chi Alpha fraternity, when they sponsor a singing contest between the different social fraternities here at State College.

Very few of the present State College students know all the traditional school songs that were formerly well-known. This weakness is especially noticeable in the Fall, when only a mild murmur is heard from the western side of the stadium when the band swings into one of the school songs. It is felt that more interest in the school songs and in the school itself will be created by such a contest. A trophy is to be awarded each year to that fraternity able to sing best the State College songs. The name (Continued on Page 4)

First Girl Cadet Colonel in College's History Commands Regiment for the Day

Military men of State College and their dates will crowd the gym tomorrow to hear the music of Tommy Dorsey and his band, playing for the biggest Military Ball in the history of the school.

The dances tomorrow afternoon and night will climax State's big "Army Week-End," scheduled to start today with a dress parade by the entire ROTC regiment in honor of the sponsors for the dances. Commanding the State regiment for the day will be Honorary Cadet Colonel Lillian Fowlkes of Birmingham, Ala., and Sweetbriar College. Miss Fowlkes will be escorted by Fabe Clements, president of the Officers' Club. This will be the first time in the college's history that the regiment has been commanded by a young lady.

The festivities will be continued tonight by a banquet given by Upsilon Sigma Alpha, honorary military fraternity. The banquet will be addressed by Adjutant General J. Van B. Metts. Members of Scabbard and Blade will give a luncheon tomorrow afternoon at 2 o'clock in the Hotel Sir Walter, in honor of their dates.

Dances Tomorrow  
The most interesting part of the celebration to most State students, the dances, will get under way tomorrow afternoon at 4 o'clock with a tea-dance which will last 'till 6. The big ball tomorrow night will begin at 8:30 and continue until 12. The tea-dance will be broadcast over the NBC Southern Network from 5 to 5:30.

The dances are being sponsored by the newly-formed Officers' Club, which was vital in the job of obtaining Dorsey and his band for the week-end. The club boasts 100 per cent membership of all the officers in the ROTC regiment, and is the largest organization on the campus.

In preparation for the dances, about 300 bids were offered for sale to basic military students, and the entire block was sold in a few minutes over an hour. Just before the dancing holidays, the Military Department announced that several hundred spectators bids would be offered for sale, with the stipulation that the holders of these tickets wear informal attire to the dance. President Clements announced recently that quite a few of the bids were "kept" in tune to those who wished to hear the band.

Dorsey's Band Tops  
According to statistics, Tommy Dorsey and his band are definitely the holders of the "No. 1 spot" among America's dance orchestras. Since the band acquired Marie McDonald (the model for Dale Arden in the Flash Gordon comic strip, incidentally) as feminine vocalist to sing with the famous "Pied Pipers," the records featuring this group have been best-sellers all over the country. Dorsey organized his vocal group to keep in tune with the modern trend of popular music, and their first top-notch record, "I'll Never Smile Again," walked off with honors in the summer and fall sessions, and the new "Starburst" is following the same path. More to be expected in the Dorsey record of "Oh! Look At Me Now" is rated as the most popular of the present season.

With petite Connie Haynes doing the feminine solos and Frank Sinatra carrying the male parts, the band holds the best line-up of vocalists in the country.

PIKA To Entertain  
Following the evening dance, Tommy Dorsey and his band will be guests of the Pi Kappa Alpha fraternity. An informal breakfast is planned, and the fraternity will maintain open house during that time.

Sponsors for the dance set, with their escorts are: Miss Lillian Fowlkes of Birmingham, Ala., with Fabe M. Clements, president of the Officers' Club; Miss Alice Wall of Wake Forest with W. E. Carter, vice president; Miss Lesbia Graham of Elkin with LeGrans Johnson, treasurer; Miss Anne Wells of Oxford with Hugh Cameron, secretary; Miss Marguerite Gambrell of Charlotte with Jack Huckabee, sergeant-at-arms; Miss Virginia McEae of Rockingham with Richard E. Brannon, chairman of the dance committee; Miss Dorothy McCracken of Raleigh with Wayland J. Reams of Apex; Miss Helen Tapia of Mobile, Ala., with Negus Knowlton, dance committeeman; and Miss Mary White of Edenton with Charles H. Wheatley, dance committeeman.

## BOOK EXCHANGE

The student book exchange on the first floor of the publications building is now open for business. Students with textbooks and other books are urged to bring them at once so that the exchange can satisfy the demand for second-hand books more efficiently.

## Freshman Editorials

### Industry In North Carolina

The industry of North Carolina needs more skilled labor and its own plants for manufacturing machine tools and machines. The skilled labor must come from vocational schools supported by the State. At the present time a small amount of vocational work is being done at State College under the name of "Defense Work." This type of training should be greatly expanded to supply the industries of North Carolina with skilled labor. If the present industrial needs are satisfied, they would bring the State the greatest industrial era it has ever known. The lack of these necessities is the reason why North Carolina is not getting its share of national defense contracts.

North Carolina is industrially off-balance. The manufacturing plants are confined too much to textiles, furniture, and tobacco. Our industry must lay aside some of the common items of manufacture and turn to newer fields. That cannot be accomplished without new machines and new tools to make the machines.

North Carolina needs trade schools for boys who do not want to go to college or who have not enough money to go, and for those who are naturally skillful with their hands. This State is short in skilled labor, machine tools, and precision machines. In Connecticut, one of the greatest industrial states in America, the mills and plants are rich with defense contracts. Why? Because the great trade schools of Hartford, established by the State, are turning out skillful workers to handle the machinery in those massive New England factories. Then what is the answer to our problem? Our State must establish trade schools. Governor Broughton has advocated the establishment of trade schools and vocational schools throughout the State. The industrial leaders should help Governor Broughton in every possible way. To help establish trade schools would be to help industry. To help industry is to help North Carolina.

Seven industrial states in the East now hold the bulk of defense contracts. Industrial contracts mean more camps. After a war is over camps and cantonments are greatly reduced or disappear. Therefore, we need defense, not industrial contracts; however, the new camps in Eastern Carolina are going to be a great benefit to the farmers of that section and to North Carolina.

Next year 37,000 planes will be manufactured. Ten thousand tanks will roll off the assembly line. Not one of them will be made in North Carolina. Ammunition of all kinds, guns of every variety, military instruments, shirts, tents, uniforms—all are being manufactured somewhere. Industries in the Philadelphia area alone hold \$1,400,000,000 in defense contracts. These factories have the machinery and the skilled labor to run the machines.

North Carolina must develop the raw material of its own youth. The State must develop skill. Our factories must produce more varied articles. If these needs are satisfied by 1944, North Carolina will be ready to share in more defense contracts. — MAX GARDNER, JR.

### Campus Speedway

Reckless driving seems to have become an increasingly popular sport on the State College campus, and with this the case, walking has become increasingly dangerous. Everywhere one turns, students are piling into cars and rushing up and down our roads in such a great hurry that the courtesy due to others, and the existence of certain traffic rules are two conditions which are entirely ignored.

What is the cause of this disgraceful situation? If the time limit between classes is so short that drivers must turn our roads into speedways, then students on foot certainly never could get to class on time. Obviously, there exists no real reason for such a state of affairs. It is simply a case of lack of consideration and carelessness, two evils which are probably harder to correct than almost any others.

Since no one can be in such a very great hurry here; since our roads were not built for speed; and since the practice of fast driving on the campus not only endangers the driver's life and property but that of others also, we should make a

sincere effort to correct this habit.

A careful driver at State College will be a careful driver elsewhere, and once having learned to respect the rights of others, he will never forget the lesson; and indeed it may prove invaluable. The general public opinion is that college men, on the whole, are intelligent men. We can further this high opinion, which we are sure is a correct one, by being good drivers. It is obvious that a good driver is also an intelligent driver.  
HOYLE B. ADAMS.

### Why Study?

"To attain success in the fierce warfare of modern business, one must have pluck, self-confidence, red-blooded vitality, and a knowledge of men and things, rather than 'book-learning' and abstract scholarship. In fact, the students who make the highest grades are not so apt to win promotion and success in later life as their wiser schoolmates who refuse to spend more time in study than is necessary to make reasonably fair grades, and are thereby enabled to participate more vigorously in the social and athletic activities of the campus."

This is one of the greatest fallacies in the thinking of college men today. It is based on unsound facts put together in such a way as to seem to be the truth.

But the danger of this fallacy is far reaching. It brands the hard workers as unimportant and pitiful. Because the normal student does not like to be thought of this way, he is apt to be more self-indulgent and even to accept the theory that the boy who leads his class is headed for failure in after life.

The fact is that those boys who outstrip their schoolmates in college again outstrip them in later life. This is a truth proved by Dr. Paul Van Dyke in the study he made of the graduates of different colleges. Out of the 2,229 graduates of Harvard, only 75 won highest distinction in scholarship honors. Out of the 59 of these living in 1911, 27 were listed in "Who's Who"—about one in two.

At Yale, out of 2,132 graduates, 102 were first honor men and of 80 of these living in 1911, 30 were listed in "Who's Who." These results are about the same for most colleges and universities.

Dr. Van Dyke went on to find that the man who graduates with high scholastic honors, instead of being unfitted for success by his extra "book-learning," is about seven times as likely to become a distinguished man as the "all-round men" in the same graduating class. As compared with the average college student, his chances are twenty to one.

Today, it is the man who knows who leads.

WARD H. BUSHEE.

### The College Laundry

The following question has often come to mind upon opening a bundle of laundry: "What kind of equipment is used in the laundry?" No doubt, the same question has arisen in many other cases when, upon inspection, the owner found that one of his newest shirts had a button cracked, a nice new color design in brown on the collar, or possibly a torn place along the front.

In several of the engineering schools here on the campus, there is a course in Strength of Materials. We often wonder if all the "lab" work for the above mentioned course is not carried on in our so-called laundry. Without an inspection of the equipment, I should describe it as follows: The washing machine could be none other than a concrete mixer, and the ironer is probably a big red-hot roller such as one sees packing new roads. The bleaching process, which is used when washing socks, is no doubt the pride of the chemistry department.

The dry-cleaning department must not go unmentioned. It is really the "latest thing." A men's fashion magazine should be able to get a story from our campus on the latest style in men's trousers which the laundry has so kindly bestowed upon us free of any extra charge. What! You have not noticed those sporty green tweeds with two and sometimes three creases? Oh, yes. You must go in sometime and meet the personnel... a frown and a grumble for every customer.

Such is our laundry at present. In September, we are to have a new laundry. It is our sincere wish that along with a change in buildings, there will be a complete change in the type of service offered.  
C. R. McNAIR.

## OPEN FORUM

To the Editor:

I would like to take this opportunity to publicly thank Dr. L. C. Hartley and his associates in the English Department for the fine cooperation that the staff members of The Technician received from them in connection with the Editorial Contest sponsored by the paper.

The quality of the work turned over to us spoke well of the teaching ability of the staff as well as the ability of the students.

The work of the winners of the contest is displayed in this week's Technician, and we think that Dr. Hartley may well be proud of the achievement of his department.

Sincerely,  
ANGUS RAY, Managing Editor.

## SENIOR OF THE WEEK

By REBECC SEBERRY

### FABUS CLEMENTS

Fabius Monroe "Fabe" Clements, business manager of the Agromeck and president of the Officers' Club, was born in Greensboro, N. C.

"Fabe" attended elementary and high school in Greensboro, and while in high school he was awarded a monogram in football, track, and for services as a cheer-leader. After graduation from high school, he attended McCollie Preparatory School for one year, and here he continued his football, track, and cheerleading. He was also awarded scholastic honors, and was selected as the most popular boy in his class.

During his sophomore year, he was selected for membership by Phi Psi and by Theta and Phi. He was a member of the Sophomore Dance Committee, made scholastic honors, and began work on the business staff of the Agromeck. During his junior year, "Fabe" really began to take his place among the campus leaders. He was assistant business manager of the Agromeck, a member of the Junior Dance Committee, a member of the Student-Faculty Day Committee, and president of the North Carolina Collegiate Press Association. He was initiated into Golden Chain, Blue Key, Scabbard and Blade, Sigma Tau Sigma, and Upsilon Sigma Alpha. He also served as foreman of the dyeing department in the Textile Style Show that year.

This year "Fabe" is business manager of the Agromeck, chairman of the Pledge Dance Committee, and chairman of the Textile Dance Committee. "Fabe" has done, and is doing, a wonderful job as president of the newly organized Officers' Club. His outstanding leadership is greatly responsible for the success already had by the Officers' Club in its infancy. Aside from taking part in practically all of the extra-curricula activities and maintaining a scholastic average of 87, he has taken an active part in the Pi Kappa Alpha social fraternity. He has represented his fraternity on the Interfraternity Council for four consecutive years.

## TENNIS RACKET

Restraining

It's "gut" to be good... or else. Restraining done here in this great store is always superior. Why? Because true values prevail in each case. The finest materials—gut or silk. And the very best in workmanship are put into each job. Student prices are lower than ever before... All stringing guaranteed. Service available on six-hour basis.

PRICES  
1.50 to 9.00

Masterful stringing by Mr. Thomas Cole, one of South's leading stringers. All work done on our new "PRECISION-CRAFT" championship machine.

## GLEANINGS

"Good evening, ladies and gentlemen. We're speaking to you from Frank Thompson Gymnasium on the campus of North Carolina State College where the sentimental gentlemen of swing, Tommy Dorsey and his orchestra, are playing for the Military Ball."

The day all State College and a goodly portion of North Carolina's pretty maidens have been anticipating for months is at hand. Our congratulations to the man of the week, Fabe Clements, for his work in bringing the country's No. 1 band leader down to the campus for the No. 1 dance of the year.

Crowding out the pleasant memories of a vacation at home, still lingering furtively in our minds, spring brings thoughts of the coming fraternity dances, week-end beach trips, hay rides, picnics, and, oh... those 25 hours we have to have to graduate.

"In the spring a young man's fancy" ... with an eye to bettering their romance service to North Carolina's lucky girls, Adam LaSonga Saller and Ears of PIKA Sutfenfeld have printed a number of post cards bearing the following notation... "Congratulations, Miss X; you have dated a member of the firm of Saller and Sutfenfeld. Any suggestions for the betterment of our service will be appreciated." Are you showing a profit, boys?

A few puzzlers we'd like to know the answers to... the lipstick on the driver's seat of Steve Saller's new automobile... Nelson Strawbridge's loss of interest in Durham when we thought he was doing so well... Peter Pop's nightly hours-long telephone conversations... Angus Ray's antipathy for blue diamond rings.

We'll wager that Frank Jenkins' first stop after stepping down from the commencement platform with his diploma will be for a marriage license... perhaps that explains the Pride of the E. E. School's frequent week-end visits to Charlotte.

Seen about the campus... Howard Bell squiring around his attractive little girl from Cleveland, Ohio... Henry Rowe, Bill Friday, and all, flitting around in their newly-acquired, jointly-owned automobile... Leigh Wilson returning to the campus with his Raleigh beauty whom he had taken home to meet the folks.

With the advent of spring, campus politicians and would-be candidates for the various positions to be vacated this June are shining up the old apple and talking about passing out big black stogies. The publications offices are a hotbed of political intrigue as rumors of the formation of a campus party are circulating the campus.

Warning to all college girls: In this Buttonless age we must be careful about our Zippearance.

Rumors are rife around the campus concerning a band for the Engineers' Brawl. Larry Clinton was all but on a contract, according to reliable sources, when certain of our faculty decided that a band of his caliber was too expensive and squelched the whole thing. Latest reports are that Mal Hallett may furnish the music for the dance.

Billy Moore has quite a case on a little Baltimore lass and is bemoaning the fact now that Baltimore is so far away. What are you planning to do when you go to Milwaukee, Billy?

A philosophical gem from the Furman Hornet to end this column:

This old world in which we live

Is pretty hard to beat;

We get a thorn with every rose,

But ain't the roses sweet?

BRUCE HALSTED.

CLEANING AND PRESSING SERVICE

BUT it's plenty important! In the telephone business, not just one, but thousands of important items of equipment must be distributed throughout the country when and where needed.

Seeing to it that everything used in the Bell System is always on hand has long been the responsibility of Western Electric. So has making the equipment and buying the material, as well as distributing them throughout the nation.

Western Electric thus plays its part in enabling you to reach your party quickly and at low cost, whenever you telephone.

Western Electric  
is back of your Bell Telephone service

## Now Dorsey Doesn't Have To Worry

Just before I began this Angling I received the latest communique from the athletic high command. Tommy Dorsey, the sentimental gentleman of swing, and the Officers' Club may smooth their ruffled hair, for Coach Herman Hickman, professor of the cinder track, has announced that he is starting the State-Catawba track meet at 1 o'clock Saturday.

He said he didn't feel that it was fair to Dorsey to take away the crowd from the tea dances, so he moved the meet up so as to give Dorsey and Orchestra a fair chance. You see, Hickman is a pretty decent fellow after all.

Saturday's meet will be a test for the track team under Coach Hickman, who is serving his first season as head coach, having succeeded Dr. R. R. Sermon.

### Baseball vs. Scholarship

The climax of the winter term didn't help the baseball situation at State nary a bit.

It is the same old story. Scholaristic deficiencies have made three of the promising baseballers ineligible for competition this season. The worst blow was dealt when Curtis Ramsey, hefty Crumpler, West Virginia, pitcher and star tackle on the Wolfpack football team, found it necessary to drop by the wayside.

The other two are Joe and Jim Mills. Joe and Jim, do everything alike. They were born at the same time, look alike, play basketball alike, dress alike, and now to prove they are definitely twins they have, shall we say, finked alike.

But a little thing like failures cannot stop Doc Newton and his boys. You know how Doc does it. If he doesn't have baseball players he'll look around in the student body and make a few.

Instead of bemoaning his woes, Doc has gone to work with what is left and, from what we saw on registration day, the 1941 baseball team is nothing to be sneezed at.

The first thing a baseball fan wants to know is what kind of pitchers we have, so we'll start there.

The hurlers look pretty fair. There's Ray Hardee, a sophomore right-hander, who was a star of the Tobacco State semi-pro league last summer, to head the list. Web Grouten, also a sophomore, is another right-hander to be reckoned with. Dave Woods probably will be on the pitching club, but as for confirmation of this fact, there has been none.

We haven't finished the pitching staff yet. Ray Smith, senior right-hander, who is slated to hit his stride this season, is probably the most seasoned veteran on the staff. Peanut (Rock) Doak, junior southpaw, is little but loud and he may fool a lot of people, especially baseball players in the Big Five this season. To round out the moundmen is Norm Wiggin, big sophomore right-hander.

Pat Fehey, co-captain of last season's Wolfpack, is about the most versatile athlete we chanced upon. Pat started his baseball career as a catcher but was moved to second last season when the need became great. Now the good-natured Irishman is going to fill the gap at first base left by the graduation of Captain Cadet Harris.

In practice last week Doc lined up two teams that would make a good starting nine in any man's league. On one side of the ledger was Thirdbaseman Bill Morrison, Shortstop Jack (Rabbit) Singer, Secondbaseman J. R. Sugg, Firstbaseman Pat Fehey, Leftfielder Wade Brown, Centerfielder Len Constant, Rightfielder Peanut Doak, Catcher Tom Turner, and Pitcher Web Grouten.

On the other side were Thirdbaseman Sonny Gilbert, Shortstop Pinky Glass, Secondbaseman Jim Carney, Firstbaseman Carroll Martin, Leftfielder Don Nixon, Centerfielder Hal Goldstein, Rightfielder Jardine Gibson, Catcher Bill Fleming and Pitcher Norm Wiggin.

At the time Pitcher Ray Hardee and Chick Doak, Jr., ace catcher, were smoothing the kinks in their arms. They are the pair that will bear the brunt of the 1941 attack.

Maybe by next week things will have settled enough that a pretty fair picture can be seen of what is to come. But until that time, I'll be angling at you.

## Physical Education

In attempting to make the gym classes more interesting for the students, Professor Miller has added several new events for the spring term in Physical Education. Sophomores will have a choice of electing either soft-ball, archery or

badminton. Freshmen may select either swimming or volley-ball. A wider variety of events will make for smaller classes and should be of advantage to both the instructors and students. A one-credit elective course, P. E. 303, a course in first aid, will be taught by Professor Winkler on Wednesdays, 4-6.

## 1941 Track Team Makes Season Debut Saturday At 1 P.M.

### Trackmen Open Under New Coach; Meet Not To Conflict With Dorsey Dance

North Carolina State's 1941 track team, under its new coach, Herman Hickman, will make its season debut Saturday afternoon at 1 o'clock, opposing Catawba College on the State track.

The meet has been set at 1 o'clock purposely in order not to conflict with the afternoon tea dance of the Officers' Club featuring Tommy Dorsey.

Little is known of this year's track team and few are the veterans on the team.

Ike Hanff, pole vaulter deluxe, and Miller Vann Johnson probably will bear the brunt of the attack of the cindermen. Sam Welch and Jimmy McDougall are the returning hurdlers, and Dick Watts and Dick East will do the dashes.

Deverieux Joslin, Raleigh youth, will join with MacDougall to do the high jumping. Bill Windley is No. 1 javelin thrower.

What these lads will be able to do in the cinder oval is still a mystery. The public is invited to help solve the mystery Saturday afternoon. The curtain will rise at 1 o'clock.

## Mural Musings

All-Campus selections for the Intramural Basketball schedule that was completed at the end of last term give the dormitories three positions, and the fraternities two positions.

Davidson, Upper Wat.; Martin, 2nd "A"; Joslin, Sigma Nu; Constant, Ninth Dormitory; and Santore of Delta Sig, comprise the All-Campus Basketball team.

This makes the second year that Joslin has been selected on the All-Campus Basketball team.

In the All-Fraternity selection, Sigma Nu placed two players on the first team. A. K. P., Delta Sig and P. K. A. each placed one man. A. L. T. put two men on the second team. Delta Sig, S. P. E. and PIKA won one place each.

### Fraternity Summaries:

First Team: Gordon, A.K.P.; McKay, Sigma Nu; Joslin, Sigma Nu; Santore, Delta Sig; C. Doak, P.K.A.  
Second team: Richardson, A.L.T.; Daughlin, A.L.T.; Leer, Delta Sig.

## Springfield-State Game Called; Cornell Plays Here Mon., 3:30

### Weatherman Halts Thursday Game

#### Cornell Big Reds Oppose State Here Monday On Freshman Field

Rain blocked the State-Springfield baseball game yesterday on Freshman field. Intermittent showers kept the teams guessing for some over an hour, but finally Umpire Rube Brannon, Jr., let it be known that the game had been called.

State will make another attempt at opening its season next Monday, playing Cornell University on Freshman Field at 3:30.

Barring interference of the weather, North Carolina State's baseball team will open its 1941 season Monday afternoon at 3:30 playing Cornell University's Big Red on Freshman Field.

The game will open a southern invasion for the Big Red of the Ivy League. The Cornell boys oppose State, Wake Forest, North Carolina, Duke, Georgetown, and Navy on successive days.

Ray Hardee, big righthander who was cheated out of his chance to make his varsity debut by the weatherman last Thursday will probably get the starting assignment on the mound for the Techs.

Coach Mose Quinn has a Cornell team made up largely of veterans, lacking only in the pitching department. The Big Red team, built largely around eight lettermen, is defending champion of the Eastern Intercollegiate League.

Veterans comprising the Reds are Walt Sickles and Leo Hamalian, pitchers; Co-captain Bud Finerman, catcher; Co-captain Walt Scholl, Bob Ochs, and Ronnie Stillman, infielders; Al Kelley, outfielder, and Mike Ruddy, who has caught and played the outfield and is now trying his hand at pitching.

State's lineup probably will read like this: Bill Morrison, 3b; Jack Singer, ss; Jim Carney, 2b; Pat Fehey, 1b; Chick Doak, c; Wade Brown, lf; Len Constant, cf; Peanut Doak, rf; and Hardee, p.

The Cornell lineup probably will be Finerman, c; Kirk Hershey, 1b; Ochs, 2b; Stillman, ss; Scholl, 3b; Kelley, Walt Matsuzsak, and Bill Andrews in the outfield. Sickles is the probable starting hurler.

### COACH R. W. (PeeWee) Green grins from ear to ear when he talks tennis or economics. The personable professor who tutors the tennis team is looking forward to an improved record for this season. If you are interested in seeing one of his pupils, take a gander over a few columns at the conscientious lad swinging the tennis racket.

### Three's a Crowd

Wade Ison, the sporty director of the sports publicity bureau, became the proud papa of a 6 3/4-pound baby girl Wednesday.

The arrival of the newcomer brought the total of little Isons to three. Preceding Wednesday's arrival were a son, Wade, III, and a daughter, Tirzah. Jake Wade, Charlotte Observer sports editor, announced the arrival with these words, "There won't be a new halfback at State." It was a girl.

## Tech Tennis Team Makes 1941 Debut With 8-1 Defeat

### State Netmen Win Only One Match In Drooping Decision to Colgate; Winston Victorious

State tennis team lost their first match of the season last Tuesday to Colgate, 8-1.

Elliot Winston was the only State player to win his match. Winston defeated Frich of Colgate, 6-1, 6-6, 6-1.

Summary: Bowler defeated Baker, 6-0, 6-4. Reid defeated Katterman, 8-6, 6-4.

Andrews defeated Owens, 10-8, 6-2.

Adams defeated Pruitt, 6-3, 6-1. Martin defeated Light, 6-0, 6-1. Winston defeated Frich, 6-1, 6-6, 6-1.

In the doubles, Bowler and Andrews of Colgate defeated Owens and Pruitt of State, 5-7, 6-3, 6-2. Winston and Shoffner of State lost the second doubles match to Reid and Adams of Colgate, 13-11, 6-3. Frich and Merrill of Colgate defeated Baker and Paljetter of State in the final doubles match, 6-4, 6-1.

## INTRAMURALS

### Dormitory Summaries:

First team: Dagrauff, 1st 7th. Davidson, Upper Wat. Martin, 2nd "A". Isenhour, Upper South.

Second team: Mahone, 9th. Owens, 2nd "A". Sloan, 2nd 8th. Young, Upper Wat.

Rodrigues, Upper Wat. Upper Wat. defeated 2nd "A" in the basketball tournament to win the Intramural Dormitory championship.

In the fraternity division, Delta Sig won over Sigma Nu to take first place in the Intramural fraternity league.

A. K. Pi. and 6th dormitory were the winners in the handball contest.

Soft-ball, tennis and track will make up the Intramural program for the spring term. All managers are advised to contact Mr. Miller so as to avoid confusion on dates of games.

Red Diamond and 1911 field have been reserved for the soft-ball games, and courts number 3 and 6 have been assigned to the intramural tennis players. Official soft-ball rules will be observed and players are requested not to wear metal cleats on their shoes.

OF RALEIGH

The Largest Sporting Goods Store in the South

ANNOUNCEMENTS

There will be a meeting of the General Engineering Society Tuesday, April 1, at 7:00 p.m. in room 223 in the C. E. Building.

ED LUKE, President.  
MARTY PARCEL, Editor.

SENTIMENTAL GENTLEMAN Tommy Dorsey, the Pied Pipers, Connie Haynes, and Frank Sinatra will all be on hand Saturday afternoon to start the annual Military Ball rolling. Music lovers are looking forward to a real occasion with Dorsey and his famous band playing both afternoon and night.

FRATERNITY PLANS

(Continued from Page 1) of the fraternity that wins the contest will be engraved on the trophy and the trophy will be kept by that fraternity until the following year. A trophy will also be presented this year by Fred Waring to that fraternity which can best sing his new State College school song,

campus early last Fall. This contest, however, will be nation-wide, and will be held in 25 of the major colleges in the country. The various fraternal groups on each campus will compete, each singing the official school song composed by Waring, and the winning group will receive the trophy permanently.

A senior life saving course will be started Monday night at 7:30 in the college swimming pool. FRANK WEAVER  
There will be an important meeting of The Watsonian editorial staff in the Publications Building office Monday night, March 31. J. S. LAWS, Editor.
