Deferred Students Announced

Ceramic Engineering Department Receives Recognition of Gov't.

Laboratories Are Now Best Equipped in Country; Professor Stone Leads Research

Ever since it was established nearly twenty years ago the Department of Ceramic Engineering of State College has been one of the country's outstanding leaders in ceramic research. This has been recognized by the United States Government, which has become the greatest research organization among the Allied Nations.

Only a few months after Pearl Harbor the Office of Production Research and Development of the War Production Board, after surveying the research facilities of the country, requested Professor R. L. Stone, acting head of the department, to undertake a project of vital importance to the war effort. This project involved the development and processing of high frequency insulation for radio and radar equipment for the Army and Navy. The results obtained in this research were so satisfactory that later another project on refractory cements that would increase the life of furnace linings in power plants and marine boilers was also assigned to Professor Stone.

In these projects Professor Stone is assisted by C. M. Lambe, Jr., instructor in the department.

The Office of Production Research and Development has, to date, appropriated approximately \$20,000 to cover the two projects. The new equipment purchased for the work has made the departmental laboratories the best equipped ceramic laboratories in the country. Much of the new electrical control equipment was designed by Professor Stone.

Officers of the Signal Corps paid a very high compliment to Professor Stone when he was requested to write a bulletin for distribution to those in the Armed Forces working with radio and radar and to the manufacturers of radio and radar equipment. This bulletin is entitled "Ceramic Dielectric and Insulator Materials for Radio and Radar Instruments" and was published as Bulletin No. 25 by the Engineering Experiment Station of State College.

Professor Stone has also been appointed a member of the Advisory Committee on Radio and Radar Resistors of the War Metallurgy Committee of the National Academy of Sciences. This committee is supervising research on resistors, the objective being to improve the present product.

The contract between the Government and State College, covering the radio and radar research, runs to June 30, 1944.

Elected

Col. Blake R. Van Leer, Dean of the Engineering School of State College, was elected president of Georgia Tech Wednesday by the State Board of Regents to succeed Dr. Marion L. Brittain, who resigned after serving as president of Tech since 1922.

Ag Club Officers

OTTO HECHT BEN A. MANN C. G. DAWSON

BEN BRITT J. A. GROSE, JR. S. G. HONEYCUTT

Recently-elected Agricultural Club officers for the winter term are as follows: Otto Hecht, president; Ben Britt, vice-president; Ben Mann, secretary; J. A. Grose, Jr., treasurer; S. G. Honeycutt, program chairman; and C. G. Dawson, reporter.

College Infirmary Now Located In Clark Hall

New Dispensary Is Largest And Most Modern In All Southeastern Non-Medical Colleges

A rather significant but definitely for-the-better change took place on the campus Tuesday when the College Infirmary moved its entire facilities from Carrol Infirmary, home of the dispensary for many years, to Clark Hall in the "Freshman" Quadrangle.

The move had been planned for some time, and was awaiting completion of the new quarters. Clark Hall will give the infirmary much needed space, and, with its new equipment, will enable the staff to provide better and more efficient medical care for both civilian students and Army personnel stationed on the campus.

The modern four-story building, formerly known as Tenth Dormitory, has been completely remodeled for use as the infirmary. On the ground floor, which was not completed until recently, are the doctors' offices, an emergency room, a treatment room, a waiting and records room, an X-ray laboratory, a clinical lab, and the main kitchen. On the second and third floors are the hospital beds, ninety-four in all; also on the second floor is a dentist's office, a completely new addition to the infirmary. The fourth floor, as yet unfurnished, is available for use as a large, and, in case of emergency, an isolation ward.

In addition to the main kitchen on the ground floor, each of the upper floors is equipped with a diet kitchen. Another interesting feature is the fully automatic elevator. (Continued on Page 4)

Sixteen Former ROTC Students Selected For OCS and Air Corps

Fourteen more former advanced ROTC students, who have been stationed on the campus since last September 17 under the supervision of the Army Specialized Training Program, have been selected to attend Officer Candidate School at Fort Benning, Ga., it was announced recently by Col. Douglas N. McMillin, commanding officer of all Army activities at State College.

The students, who were juniors at State College last March when they were called to active duty, returned to the College in September and have been taking training here since that time. The group received 17 weeks of basic training at the infantry replacement centers at various military posts in the South.

In addition to the number going to Fort Benning, two former ROTC students at State have been transferred to the Air Corps for pilot training and will report at Nashville, Tenn., within a few days. They are Bruce S. Betts of Atlanta, Ga., and Charles H. Mims, Jr., of Raleigh.

The new assignments bring to 77 the total number of the former juniors selected for OCS and pilot training.

Students who will leave for Fort Benning within the next week are: James T. Abrams, Macclesfield; Murry Abrams, Far Rockaway, N. Y.; James P. Bowles, Midden. (Continued on Page 4)

Fifty-six Chosen To Fill New Deferment Quota

Thanks!

Contributions amounting to \$338.79 were donated by the students here to the Infantile Paralysis Campaign. The campaign was not publicized here on the campus; the response, however, greatly exceeded that expected.

This money will aid a most worthy cause . . . a cause that means so much to so many unfortunate children. For them, a new outlook on life; for you, the satisfaction of having displayed the spirit that symbolizes America.

THE STUDENT GOVERNMENT.

Col. Harrelson Speaks To Freshmen Monday

Contrary to current rumors, "The Army Specialized Training Program is not on its way out," declared Col. J. W. Harrelson, dean of administration of State College and deputy chief of the A.S.T.P. with the Fourth Service Command in Atlanta, in an address to the Freshman Class Monday.

Col. Harrelson, making his first talk to the class, stated that the Army needed 75,000 trained engineers annually, but that the technical schools were furnishing only 15,000 to 16,000 each year. The ASTP was conceived as a means of training the additional numbers of engineers, he pointed out. Approximately 65 per cent of the ASTP enrollees are receiving engineering instruction, while about 30 per cent are taking training in medicine and allied fields, and around 5 per cent are studying financing and miscellaneous subjects, Col. Harrelson explained.

Pointing out the values of a technological education, Col. Harrelson. (Continued on Page 4)

State Students Attend Methodist Conference

Seven State College students attended the annual North Carolina Methodist Student Conference as representatives of the State College YMCA and of Fairmont Methodist Church, whose services are held in Pullen Hall on the campus. The conference this year was held February 11-13 at High Point College in High Point, and consisted of a series of meetings with speakers and discussion-group meetings.

Dr. W. A. Smart, professor of Biblical Theology at Emory University, was the principal speaker at the conference, the theme being *Students and the Pioneering Church—Now and After the War*. The delegates, about 200 in all, were from every college in North Carolina, white, colored, and Indian.

State students present at the conference were: Riley Rowe, Bill Clark, Ed Cole, William Letherman, A. Wilson Smith, Oscar Whitescarver, and Pete Strum.

Students Having Highest Scholastic Averages Chosen To Fill Initial Tentative Quota

In accordance with the new regulations as set forth in the recent bulletin (No. 33-6) issued by the National Selective Service System, fifty-six students in aeronautical, chemical, civil, electrical, and mechanical engineering have been selected, on a scholastic basis, to fill the quota set by the national System for this institution.

Of the students applying for these educational deferments, the following forty-four have been selected, because of their possession of the highest scholastic averages, for general deferment in accordance with the rules recently adopted by the Faculty Council: Joe H. Berrier, John D. Boone, Grover C. Burohette, Jr., Spottswood B. Burwell, Edgar Riley Cole, Walter Horton Corwin, Roger C. Dickinson, Richard H. Duncan, James R. Edwards, Gilbert M. Farrior, Thomas F. Faulkner, John W. Fouts, S. Louis Furches, Jr., Frank R. Geluso, Joseph G. Goldston, Jr., William T. Harkey, James S. Hepler, Myatt B. Johnson, Daniel M. Matusow, Warren T. Milloway, Hugh C. Murrill, William M. Nicholson, Seymour I. Olanoff, Buford W. Penland, Herbert Vernon Poe, Roger B. Poole, Marshall E. Propst, Jr., C. J. Rich, Jr., Julian L. Robinson, E. Riley Rowe, Henry H. Sherrill, Jr., Albert C. Smith, Harry C. Snavely, Peter D. Strum, Charles Wm. Teague, Homer S. Tolan, Jr., Edwin F. Troy, William E. Wade, Jr., George B. Whitfield, Bainbridge T. Williams, Jr., James C. Wilson, Jr., Floyd C. Witten, David M. Wood, Jr., and Robert A. Zachary, Jr.

The twelve with the next highest scholastic average have been selected for temporary deferment in accordance with the rules recently adopted by the Faculty Council. (This action, however, is pending the approval of the War Manpower Commission.)

The 12 are: Jesse G. Camp, Jr., George W. Coble, Daniel L. Gross, Richard K. Jarrell, Stanley S. Katz, Kenneth P. Lapeyre, William J. McCoy, Jr., Arnold S. Marks, George E. Martin, Thomas M. Mayfield, George B. Stevens, and Harry G. Taylor, Jr.

Under the new regulations, each college offering instruction in any of certain curricula will be assigned a quota by the national System which will limit the number of students that can be granted educational deferments at that institution; these quotas are based on national totals of students requesting such deferments.

Class Rings

It seems probable that the Congress will increase the tax on rings. If such action is taken, the new tax will probably go into effect before our ring order can be delivered, but I nevertheless think it would be wise for those who want 1945 class rings to order them as soon as possible.

What Do You Think?

Col. Harrelson, in his talk to the Freshman Class Monday, made mention of the fact that State College athletic teams have long gone under the name of the "Wolfpack," a title of questionable appropriateness for the representatives of our school. He further urged the Freshmen, now the majority group on the campus, to be the ones to "shake off" the name and replace it with a more fitting appellation.

This would definitely be a case of tradition-breaking; after all, though, it is only a very narrow-minded person that will not favor breaking a tradition, even though it be one of very long standing, if it is not a completely worthy and desirable one.

At any rate, the issue is one to be decided by the students themselves, providing, of course, that they give weight to the feelings of interested alumni.

Let's hear some opinions. . . .

GLEANINGS

HISTORY REPEATS: Last year the editor of The Technician asked us to write "Gleanings," more or less as a joke, and more or less as a joke we took him up and proceeded to turn out a column comparable to any that a good editor would bury deep in a wastepaper basket. However, the editorial staff this year decided they wanted more punishment, so we take our trustworthy linotype machine in hand and continue our groping for words to fill space.

DOOM OF THE JAPS: We were delighted last week to learn that Colonel Arthur Rogers was in Raleigh for a brief visit, this writer being a good friend of the Colonel, having known him way back in high school days. Colonel Rogers has done a great job in sending Japs to permanently visit their so-called ancestors. No doubt the Japs have much fear of the well known insignia, skull and crossbones, emblem of the "Jolly Rogers." We wish the Colonel all the luck in the world and are eagerly awaiting newspaper reports telling of further exploits by him and his gallant men. With men like these taking command of the situation in Jap territory, we know that it won't be long until the yellow dogs of the rising sun will regret their brutality towards our men—their prisoners of war.

THOUGHTS WHILE STROLLING: Looking at all the uniforms around, wouldn't it be nice if there was a female branch of the armed services here on the campus, huh, wolves? . . . We hope that when the softball season rolls around some of the intramural games will be played on 1911 Field so that us lazy Hillsboro Streeters can take in a few games without the cross-country run over to Freshman Field. . . . Wonder how it will look to see 2,500 civilian students here again? . . . Also wonder which will look the dearest after the war—Hitler or Tojo! . . . How does the business office ever keep up with their work with all the accounts they handle, pay checks, income tax deductions, etc.? Smooth working organization. . . . Seemed good to hear that Col. Harrelson was back for a few days.

BRAVERY: A few weeks ago one of the staff members known as "Termite," "Mostly Termite," "Termite et al.," and numerous other names, engaged in a bit of writing to correct certain conditions on the campus. Rumor hath it that Termite was approached by Party No. 2 and after some hot words the "insect" was challenged to a duel. Party No. 2 gave Termite his choice of swords or pistols. Never let it be said that our hero fails to rise to the occasion. He accepted the challenge and gleefully shouted, "You take the swords and I'll take the pistols." (The end.)

We close with this parting thought: How in the deuce has the staff been able to produce their editions of The Technician without having the suspended-for-the-duration campus (humor?) publication, *The Wataugan*, to pick on?

LINOTYPE OPERATOR.

SHARPS and FLATS

By HOWARD KADEN

Many lovers of the classics have claimed that I have disregarded them. Therefore, I shall try my best to make it up to them today. Judging from the myriad of classical albums that are being sold at the present, it appears that the symphonies have not lost any popularity. On the contrary, they are steadily gaining favor in the eyes of the music lovers.

Have you heard the "Romeo and Juliet Overture" by Tchaikowsky? It is one of his most beautiful works. It was written around Shakespeare's drama of "Romeo and Juliet," and in the music you can feel the stirring parts in it. The duel between Romeo and Montague is depicted by very fast music, gradually increasing in crescendo until it reaches the climax. After the climax it slowly gets softer until the strains of the main theme enter. The popular song of a few seasons ago, "Our Love," was taken from this melody. It is one of the most beautiful tunes that I have ever heard.

To adequately discuss the music of Tchaikowsky would take days, so I shall not attempt it. There is another fine symphony by him that I would recommend to you, however. It is the "1812 Overture." Tchaikowsky was born in 1840, but he was deeply interested in the history of Napoleon's fatal March into Russia. This symphony is dedicated to that. It is highly deep and very moving. Every so often the strains of "La Marseilles," the French national anthem, appear. There are several interpretations of this by different orchestras. Each one is equally good.

From all the reports I've received, the Black and Whites were a great success. Unfortunately, I was not able to attend the dance Saturday night, but everybody has been telling me of the swell music supplied by Bob Strong and his Orchestra.

An old record I dug up today was "Jazz-me Blues," by the Bob Crosby Bobcats. The personnel of the band is as follows: Jess Stacey, piano; Billy Butterfield, trumpet; Warren Smith, trombone; Eddie Miller, tenor sax; Irv Fazola, clarinet; Nappy Lamare, guitar; Bob Haggart, bass; Ray Bauduc, drums. This number is terrific. Bob Crosby has had with him at one time or another some of the jazz "greats." They play in the true true style of Chicago jazz, although Crosby usually prefers the old New Orleans or Dixieland style. When the average person hears jazz, he immediately turns up his nose and calls it "corn." He does not stop to analyze it, but if he did, I'm sure his opinion would be changed. There is a big difference between jazz and swing (although I'm sure Leonard Feather does not agree). In swing music, the individual musician does not have any opportunity to express his own ideas, whereas in jazz, the music is all his own. The true jazzmen find it hard to play in a large band. Let us take as an example Bix Beiderbecke, one of the "immortals." In the 1920's he went with Paul Whiteman, but was not able to stay with him. The music was not what he felt in him, and therefore he was not happy. The next time you hear jazz, don't turn the dial. I'm sure you'll enjoy it.

SCHEDULE OF FINAL EXAMINATIONS FOR WINTER TERM 1943-44

Classes Having a Recitation On:	Will Take Examinations On:
Tuesday at 8 o'clock	Monday, March 6—9 to 12 o'clock
Monday at 10 o'clock	Monday, March 6—2 to 5 o'clock
Monday at 3 o'clock	Tuesday, March 7—9 to 12 o'clock
Monday at 11 o'clock	Tuesday, March 7—2 to 5 o'clock
Tuesday at 9 o'clock	Wednesday, March 8—9 to 12 o'clock
Monday at 2 o'clock	Wednesday, March 8—2 to 5 o'clock
Monday at 8 o'clock	Thursday, March 9—9 to 12 o'clock
Tuesday at 11 o'clock	Thursday, March 9—2 to 5 o'clock
12 o'clock classes	Friday, March 10—9 to 12 o'clock
Tuesday at 10 o'clock	Friday, March 10—2 to 5 o'clock
Monday at 9 o'clock	Saturday, March 11—9 to 12 o'clock
Arranged examinations	Saturday, March 11—2 to 5 o'clock

- Examinations will begin Monday morning, March 6, at 9 o'clock.
- No examinations will be scheduled or held by any member of the faculty before Monday morning, March 6 (afternoon physical education classes excepted).
- Examinations will be held only between the hours indicated.
- The examinations will be held in the rooms where the classes recite.
- Courses having both recitation and laboratory hours should use the class hours for determining when the examination will be given.
- Arranged examinations are for those examinations not provided for elsewhere in this schedule. All scheduled classes shall take their examinations at the hours indicated.
- Final examinations must be given in all courses. Any exceptions must be approved by the Dean or Director of instruction.
- All examinations will be given in accordance with this schedule.

Special Notice Regarding Seniors—All seniors who have sufficient work scheduled on their winter term roster, and who are otherwise qualified for graduation in March, are exempt from final examinations in all courses in which they have averaged "B" or better.

Approved, Faculty Council.

APPROVED, FACULTY COUNCIL.

W. L. MAYER,
Director of Registration.

Have a "Coke" = A thousand miles is not too far to come

... or being friendly with a Chinese cadet

Chinese flyers here in America for training have found that so simple a phrase as *Have a "Coke"* speaks friendship in any tongue. East, west, north, south, Coca-Cola stands for the pause that refreshes, — has become the happy bond between people of good will.

"Coke" = Coca-Cola
It's natural for popular names to acquire friendly abbreviations. That's why you hear Coca-Cola called "Coke".

Pi Kappa Phi Takes Swim Meet

Fowler's Fancies

(DON SAPP PINCH-HITTING FOR DICK FOWLER)

Odds and Ends:

Fred Swartzberg has been playing his best brand of basketball since the two-week layoff due to measles. . . . Bill Carpenter was co-captain of his Waco, Texas high school five. His team went to the finals in the state championship playoffs last year. . . . The most points scored by any one Red Terror in one game is 13. Both Turner and Carpenter have turned the trick. . . . Thanks to the fine playing of ex-Terror Bernie Mock, Carolina is leading the conference. . . . Good ball-handling in the Davidson game was mainly responsible for the Terrors' upset victory.

Coach Doc Newton may be retained as head football coach with a one or two year contract. Since Newton arrived here, school and team spirit has been united and

strong. Another important item is that the athletic department is today in a sound financial status. The last two statements were not true seven years ago.

Jake Wade, Jack Horner, and E. V. Mitchell, three of the top sports writers of this state, think that Coach Newton should be kept as football mentor. Each of these writers have said much about the present situation.

Reports have it that many high school stars will be wearing the Wolfpack moleskins next fall. They'll come from all sections above and below the Mason-Dixon line. A new club is being planned to interest high school athletes in State College. The club has the backing of the athletic department.

This school should really go to town in athletics after the war. If fifty per cent of all athletes eligible for more intercollegiate competition returns, State will be well supplied in talent for all sports.

Jaworski	14
Jackson	11
Dawson	7
Edwards	2
Sakas	1

These totals are for fourteen games.

State Drops Loop Tilt To Duke Blue Devils

Devils Forced To Rally In Second Half To Overcome Determined Red Terrors

State College staged a scoring rally in the second half of their contest with Duke University last Saturday night and caused the mighty Blue Devils some moments of fright.

The game got off to a slow start because of the wonderful defensive playing of the Terrors. Turner gave State an early lead by sinking a side shot after only thirty seconds of the first half were gone. Swartzberg followed with a crisp to put the Terrors out in the lead 4-0.

The Blue Devils then tightened down and ran up a 13-6 lead with minutes gone. At this point the Duke second team trotted on the hardwood and State began to catch up.

At half-time the Blue Devils were leading by only two points as the score was 18-16.

Early in the second half the State boys once again went into the lead but couldn't hold it. Wright, Harner and Balitsaris began to click and Duke slowly crept away from the tiring Terrors. When the final whistle blew the Blue Devils were out in the lead 53-32.

State showed much improvement in their defense and this is what enabled them to give the Durham squad such a scare. Almond, Dawson and Swartzberg all played brilliant defensive ball for the Terrors. Saturday's game marked the end of the season for the Blue Devils although it is likely that they will participate in the Southern Conference Tournament which will be held in Raleigh the latter part of this month.

State College has won two of their games so far this season.

Intramural Results

The mighty A.L.T.'s are still the team to watch in the fraternity bracket of the intramural basketball playoff. They have taken all of their games so far and they have only one contest left on their schedule.

Many of the games played so far have been one-sided contests, but there have been some exciting and close tilts.

PIKA topped the Pi Kappa Phi five 20-10 last week to give them their first victory in two tries. The high scorer for the night was Barrow, who turned in a fine performance.

Paced by Gupton, the Sigma Pi's turned back a determined S.P.E. five by a 21-18 count. Coach Paulus of the Sigma Pi five stated that his team was looking forward to capturing the crown.

The S.P.E.'s came back strong in their next game to run roughshod over the Sigma Chi outfit 13-4. Patterson took scoring honors for the victors.

Sparked by Janette, the PiKA five took the Delta Sig crew into camp by a count of 33-3.

In the next game the Sigma Nu's were bested by S.A.M. 34-16. Olanoff was the high scorer for the evening.

A.L.T. rode on to top Lambda Chi by a count of 36-4. There was some mix-up about the time of this contest and the regular Lambda Chi five was not on hand to meet the A.L.T. squad.

In the dorm bracket things seem to be a little more even. Fourth took Fifth into camp by a count of 21-20 in an exciting contest. Mangum was top man in the scoring.

North Watauga dropped their tilt with Sixth dorm by 22-14. Dickson was high scorer.

In the next game Sixth dropped to Fifth 9-16. The scoring was evenly distributed among the victors.

Fourth lost to South Watauga (Continued on Page 4)

Laughlin Takes Two First Places To Cop High Scoring Honors

Sigma Pi Takes Second Place With 19 Points; Eight Frats Participate

Eight fraternities sent teams down to the gymnasium last Tuesday night to participate in the annual fraternity swimming meet. There was a whole team from each of the organizations in nearly every event.

Mr. Miller, director of intramurals noted that the turn out was as great as that of pre-war days. He expressed thanks to the various organizations for showing such fine spirit not only in this event but in the intramural schedule as a whole.

Promptly at eight o'clock the events began to get under way, and they ran smoothly all the way through the meet.

Pi Kappa Phi came through the winner as they amassed a total of 26 points. Sigma Pi was second with 19 and S.P.E. was third with 14 while PiKA took fourth with 12.

Laughlin was the star of the meet as he captured two first places to account for 10 of the winner's 26 points. Laughlin took top honors in both 25 and 100-yard free styles.

The events were: 25-yard Freestyle: Laughlin, Pi Kappa Phi; Gorter, Pi Kappa Phi; Moore, Lambda Chi Alpha; Antin, S.A.M.

50-yard Backstroke: Britt, Pi Kappa Phi; Lyerley, Sigma Pi; Peavey, Sigma Pi; Bryant, S.P.E. Time: 37.6.

Distance Plunge: Lee, Pi Kappa Phi; Little and Lamb, Lambda Chi and S.P.E. (tie); Holmes, Sigma Chi. Distance: 44 feet.

100-yard Freestyle: Laughlin, Pi Kappa Phi; Moore and Ector, Lambda Chi and Sigma Pi (tie); Britt, Pi Kappa Phi. Time: 1.09.

Diving: Bryant, S.P.E.; Morrison and Perry, Sigma Pi and S.P.E. (tie); Lyerly, Sigma Pi. Best score: 63.

Underwater Swim: Brady, Pi KA; Monroe, Sigma Pi; Tharrington, PiKA; Olanoff, S.A.M. Distance: 165 ft.

100-yard Relay: Pi Kappa Phi; Sigma Pi; S.P.E.; A.L.T. Time: 55.6.

Other scores were: Lambda Chi, 7; Sigma Alpha Mu, 2; Alpha Lambda Tau, 2; Sigma Chi, 1.

INTRAMURALS

(Continued from Page 3)

13-15. The game was thrilling throughout. Morris took the honors.

South Watauga went ahead to beat North Watauga 27-16. Page was top man in the scoring bracket.

Fourth and Sixth fought it out in a thrilling contest but Sixth came out on top 13-10. Hunt was high scorer.

North Watauga dropped another when they lost to Fourth 22-16. Mangum nosed out the others in the scoring.

In a tight defensive game Fifth finally nosed out South Watauga 6-4. The game was slow throughout as the final score will indicate. Horne took the scoring honors for the evening.

That brings the results up to date as of the week of February 7-11. It has been the policy of THE TECHNICIAN in the past to keep the results up to date week by week, but because of the limited space this has been impossible. Every effort will be made to publish the results as soon as possible and the sports staff asks the students to be patient.

HARRELSON

(Continued from Page 1)

relson said, "You have a great opportunity and a great future—unequaled in other fields of study. You must utilize your time to the fullest extent. You are inheriting a fine tradition at this school."

The educator and military leader cited with pride the brave exploits of alumni of State College who are relentlessly fighting the enemy throughout the world and pointed out the heroic record of Col. Arthur H. Rogers as an example of unselfish service and patriotism.

"State College is second to none

in its class in the Southeast or the entire nation, and the institution furnishes fine training for ideal citizenship in war and peace," Dean Harrelson averred.

Col. Harrelson lauded Governor Broughton's support of the College. He said that the Governor had rendered a great service to the school in obtaining the Diesel Engineering School and the indoor stadium, and in enlarging the agricultural, engineering, and textile schools of the College.

Col. Harrelson left Wednesday morning after a brief visit on the campus. Although here primarily on ASTP business, he attended a number of College council and directors meetings Monday and Tuesday.

Notice

Attention all Chemical Engineering students! Grab a gal and come to the dance at the Woman's Club February 26. Get your ticket from Dr. Randolph's secretary. There will be a meeting of all Chemical Engineering students Tuesday at 7:00.

Students in both groups of the newly-announced Deferred List should come to the Registration Office on Friday or Saturday (office closes 12:30 noon on Saturday) to furnish additional information needed and to receive instructions.

W. L. MAYER,
Director of Registration.

INFIRMARY

(Continued from Page 1)

tor, which is large enough to accommodate stretcher cases. New X-ray equipment is expected very soon.

The Infirmary staff, headed by Dr. A. C. Campbell, will remain the same. Assisting Dr. Campbell will be Captain Kleinman, Medical Officer for the Air Corps; Captain Wilson, Dental Officer; and Miss Ida Trollinger, Head Nurse. The staff also includes Mrs. C. C. Brooks, Night Supervisor; Miss Ila Mae Crump, Miss Bess Spearman, Miss Sara Tiddy, and Mrs. G. S. Stockstill, nurses; Miss Olivia Buddin, technician; Mrs. Margaret Gray, record clerk for the ASTP; and an Air Corps clerk. Three Medical Corps men will assist the nursing staff.

Alpha Sigma Sigma

—A.K. CHAPTER—

COLORS—Old brown and yellow

FLOWER—Stinkweed

The national honor fraternity of Alpha Sigma Sigma is composed of "standing out" men who have fulfilled all requirements for membership. Its members are all thought of as being closely related to the anatomy of a horse and by association with them to a limited degree, you will understand how this feeling came about. They come from the upper crust of the student body and if you don't think they are pretty d— good, then just ask them. They always stand ready to

do a fellow-student a favor providing the fellow-student has a gun in one hand and a knife in the other. Members are selected each year by a campus-wide election. Those fellows who make the organization two years in a row are truly "rare" cases and deserve particular attention from somebody. The boys who amass the most votes in this race for a very unpopular honor are granted the rank of officers in order of the number of votes received.

End of an Enemy

In a split second this enemy plane will be blasted from the skies by a shell from one of our anti-aircraft guns on the ground.

How can a gun hit a plane going 300 miles an hour 20,000 feet up... when it takes the shell 15 seconds to get up there and in that time the plane has gone more than a mile? Besides, the shell curves in its flight. Wind blows it. Gravity pulls on it. Even the weather affects its velocity.

The answer is the Gun Director—an electrical brain which aims the guns. Swiftly it plots the plane's height and course. Instantly it solves the complex mathematical problem, continuously matching the curved path of the shell to that of the plane so the two will meet. It even times the fuse to explode the shell at the exact instant.

The electrical Gun Director has greatly increased the deadliness of anti-aircraft gunfire. In its development at Bell Telephone Laboratories and its production at Western Electric, college trained men and women have played important parts.
