State's 54th Anniversary Passes Dunlap Named To Textile Staff | State Opened In 1889; 45 Students Enrolled

Will Head All College Textile Research Jobs

Former Research Director
Of Southern Textile Association
Joins Textile School
Staff

George H. Dunlap, former associate director of research with the Cotton Textile Institute, has been appointed constant and research supervisor for the N. C. State College Textile School, it was announced recently by Dean Malcolm E. Campbell of the college textile education in North Carolina.

Dunlap will serve as a connecting link between the textile school and the North Carolina mills, his principal duty being to aid the manufacturers with their technical problems and to keep the members of the textile school faculty abreast of the latest developments in the industry. He will also be in charge of the various applied research projects being carried on in the school as well as in the several mills.

His addition to the staff of the college was made possible by funds provided by the North Carolina Textile Foundation, Inc., which was recently established by several broadminded textile executives to broaden the scope of higher textile education in North Carolina.

Dunlap is a native of Rock Hill, S. C., where he attended public schools before going to Clemson College, where he received his B.S. degree in textiles. After his graduation from Clemson, he took graduate work at the University of North Carolina, the Massachusetts Institute of Technology, and Pennsylvania State College. He obtained practical manufacturing experience in two South Carolina cotton mills, and spent the next 13 years as a member of the Clemson faculty.

In 1941, Dunlap was appointed research director of the Southern Textile Association, and in this capacity visited hundreds of mills in the South and Southeast. Among

Saturday Marks Close Of Fraternity Rushing

First Year Men Given One
Full Week To Decide On
The Fraternity Of Their
Choice

Saturday marked the close of the 1943 freshman Rush Week for the various State College social fraternities.

For the approximately 400 men who have enrolled here for the first time, the week's events, no doubt, were novel and interesting as well, but for the members of the fraternities whose members have been hard hit by the withdrawals from school to enter the armed services, a lot of hard work and cooperation was involved in trying to select the best men to fit into their particular group.

(Continued on Page 4)

Tau Beta Pi Award

Dr. John W. Cell, right, is the first recipient of the Faculty Award given by the State College chapter of Tau Beta Pi, national honorary engineering and scholarship fraternity, to the faculty member adjudged outstanding in research, authorship and the teaching of engineering students. Dr. Cell is associate professor of mathematics. Presentation was made by

Lt.-Col. Blake R. Van Leer, dean of engineering, now on military leave with the Army. Ben W. Greene of Elizabethtown, Tau Beta Pi president, is shown with the certificate of award. The fraternity, engineering equivalent of Phi Beta Kappa in liberal arts schools, plans to present the Faculty Award annually.

Many Professors Change To Relieve Shortage

State College professors are crossing academic lines to assist in the gigantic task of instructing the hundreds of Army men stationed on the campus for technological training, it was revealed recently by Dr. H. A. Fisher, the college's armed services coordinator.

In addition, the college has enlisted the services of a dozen well-rated high school teachers and several Raleigh women who formerly taught school to help in giving the soldiers and Air Corps cadets the technological training prescribed for them by Uncle Sam.

No member of the faculty had a vacation this summer.

As an example of the faculty's driving desire to cooperate in the Army Specialized Training Program, Dr. Fisher cited the transfer of a number of professors from their usual teaching duties to work in the soldiers' classrooms.

Dr. A. I. Ladu of the English Department switched to mathematics. So did Prof. Lenthall Wyman of the Forestry Division and Prof. C. R. Bramer of Civil Engineering. Prof. W. N. Hicks, head of the Department of Religion and

Ethics, moved into physics, as did Dr. A. M. Fountain of the English Department. Prof. J. T. Hilton of the Textile School now is teaching mechanical drawing, and a number of instructors went from chemistry to physics.

In all, 110 members of State College's faculty are giving instruction to Air Corps cadets and soldiers specially selected for technological training before being assigned to important duties in this highly technical war. The number is more than half of State's regular faculty, which totals 218 exclusive of administrative staff, military department, teaching fellows and student assistants. Forty-five members of the faculty, plus 67 men in Extension and Experiment Station work, have gone into the armed services; six of these were taken from the Department of Mathematics, one of the keystone departments in the training program.

Thirty-two instructors now are teaching mathematics to service men. Physics leads with 46. English, geography, history and physical education have eight instructors apiece working with service men, and chemistry has six.

N. L. Suggs Heads R. O. T. C. Battalion

Other Officers Appointed By
Military Department; Only
One Battalion This Year

N. L. Suggs, sophomore in general engineering from Pinetops, N. C., has been appointed Lt. Col. and commanding officer of the State College R.O.T.C. for the coming year. Suggs is a sophomore in General Engineering and hails from Pinetops, N. C.

Appointed to serve with Cadet Col. Suggs on the battalion staff are: Fred L. Page, major; W. F. Perry, captain adjutant; Dick Kennison, captain, intelligence officer; "Buddy" Ivie, captain, operations. The company commanders appointed are: A company, T. F. Faulkner; B company, Ray Goodrich; C company, Gilbert Farrier; and D company, Bob Patterson.

Those who are serving as second in command of the various companies are: A company, H. S. Welsh; B company, Marshall Rich; C company, S. H. Cann; and D company, M. F. Mearns, all first lieutenants.

The military regiment this year is composed of one battalion, having four full companies.

No Celebration Held In Honor of College Anniversary Because Of Important Work Going On

State College was 54 years old last Sunday, but due to the work that is going on here in behalf of the war effort, everyone was too busy to do anything about it.

For the first time in many years, no anniversary celebration was held. In previous years, all classes have been excused when the day of the celebration came on a school day, so that all students could attend the festivities. Last year, Governor J. Melville Broughton and Graham H. Anthony, noted Connecticut industrialist, were the principal speakers.

The college opened its doors to the first students here on October 3, 1889, and about 45 students enrolled. Its faculty had eight members, including the president, Col. Alexander Q. Holladay, and there was one building.

At the time this nation was drawn into the present world conflict, the student body numbered over 2,500, there were 275 members of the faculty, and the campus had 45 modern buildings.

The civilian enrollment now numbers approximately 1,000, several hundred more than college officials expected. Augmented by the many Army, Navy, and Army Air Corps students receiving specialized training, the total enrollment of the college is greater than at any previous time.

Over ten thousand non-college men have been trained within the past three years for technical work in the war production effort of the country, and the classes are still going on. The college training Naval Ensigns in the technical aspects of Diesel Engineering. A new building to house the new Diesel engines lab. is now being built on the campus at a cost of approximately \$1,000,000.

Col. Lampke Joins College History Dept.

Former Commandant of
College Military Activities
Joins Faculty To Teach
European History

Lt.-Col. Louis J. Lampke, recently retired after many years of service in the army, which included the command post at State College, has joined the college faculty to teach European history, it was announced recently by Dr. J. W. Patton, head of the Department of History.

Prior to his retirement last month, Col. Lampke was posted at the State College Military Department for 14 months. While here he commanded all military activities on the campus, including the Army Specialized Training Units stationed here. He entered the Army as a captain in 1917, and served overseas for 18½ months in the first World War with the 80th and 82nd Divisions.

Entered as second-class matter, February 10, 1920, at the post office at Raleigh, North Carolina, under the Act of March 3, 1879.

Your Privilege

In the past, several students have worked up enough courage to express their views on various subjects to the student body through the medium of this newspaper. We of the staff this year would like very much for the practice of printing "Letters to the Editor" to be continued.

Previously, the students have written on varied topics, many of which were really worth presenting to the student body, but almost invariably, they either refused to accept the responsibility of presenting the material to the other students, or would not take the credit for these opinions. Naturally, the editor cannot print these letters without knowing who sent them.

You can write on any subject you desire, but be sure to sign the letter. If you should like for the letter to be published without your name appearing, add a post script to this effect and your wishes will be respected.

The important thing is to write the letter. If there is something on the campus that you do not like, or if there is something on the campus that impresses you, particularly you men who are here for the first time, take this means to express your opinions. If you have a public compliment to pay or comments interesting to the student body, send your letter to The Technician.

GLEANINGS

Here we are again, after a comparatively peaceful week-end, struggling 'mongst the conglomeration of people, old papers, and copy that ordinarily resides in the home ("was never like this") of THE TECHNICIAN, striving to scrape together a few "gleanings" that might be of interest. The office is almost overrun with the voluminous staff of *The Dodo*, the other campus weekly, published by the Air Corps Cadets, which boasts of several feminine writers. How they do it, I can't figure. After all, what've they got that we ain't, etc., etc.

There are exceptions to almost everything, including the above-mentioned peaceful week-end—in this case there were several, all of them being, strangely enough (or is it!) Sigma Pi's. It is going around that they enjoyed quite a reunion celebration upon the return of several old brothers, said celebration no doubt being led by the redoubtable Gustavus. Just don't ask how we found out—Diekie Fowler might not want the particulars to be known!

Just for our own information, has anyone been able to find one Thomas Bernard Pratt without "that sartin' look," or to talk to him for more than two minutes without his bringing out his wallet and exhibiting that little card engraved "Mr. and Mrs.?" If so, we'd sure like to know about it. Strange, what these W. C. girls can do to some guys. And just think, only a few weeks ago he was studying to be a Bachelor in Chemical Engineering! Yes, I know that sort of humor is straight from the cornfield, but I just can't help it—it just has to come out every so often.

And just what is that strange power exerted over the fairer sex by Hank "Lover" Jaworski that makes them go to no end of trouble just to come into possession of a mere handkerchief of the aforementioned shiek? I guess it's just another case of the old "some got it—some ain't," with Hank definitely in possession.

Snapshots from here 'n there: Cliff Edwards explaining that "a fellow has to say good-bye" on the late Meredith bus last Sunday night. John Armstrong leaving Smedes Sunday afternoon with one girl and coming back with another one. Bob Phillips loudly and bravely announcing to the world (including the professor) his own private opinion of his "cohort-in-crime," Percy Moore, in Electro the other day. The outburst was said to have been brought on by certain poetical aspirations of Percy, directed toward Bob, and, incidentally, said to have been little poetical gems—though not exactly reproducible here.

Undoubtedly suffering from warped and twisted minds, the rest of the staff, poor souls, have just decided that I need not make this column any longer, so I guess I'll have to bow to their wishes and see ya' later.

BRV

AMERICAN HEROES

BY LEFF

The invasion of Sicily was beginning. We needed a bridgehead at Gela. Twice we drove the Germans from the town. Twice they thrust us back to the beaches. General Patton leaped into the surf to take personal command of the desperate struggle. The Germans were forced back. Fresh troops swept landward. The bridgehead was ours. It's everybody's day. General and Private alike press the attack, oblivious to danger. At home all alike must back that attack with extra Third War Loan Bonds.

HAPPY BIRTHDAY

The true spirit of State College was shown last week when the 54th anniversary of the college passed almost unobserved. Everyone was so busy contributing their little bit to the war effort that there was no time for celebration.

The campus now is in full war time swing. Not only are the government war training and management courses continuing, along with the various courses in engineering drafting and inspection, but the khaki and O. D. of the boys of Uncle Sam is very much in evidence.

All things being considered, State College has made a sizeable contribution to the wars that have been fought by this great country. Not only has she given men and women the best technical training available, but the boys have written their names in bold type on the pages of history by their feats of bravery and heroism. The names of many are written on the bronze plaque in Memorial Tower, and many will be added at the conclusion of the present world conflict, but these will not have died in vain. This time, the lasting peace will be sealed.

When State College passed the ripe old age of 54 last Sunday, many of her boys were fighting and dying for the principles that have always been taught here and will continue to be taught here in the years to come. Therefore, it might not be exactly proper to say "Happy Birthday," but here goes, more in a traditional spirit than a literal translation—

Happy Birthday, State College! We know you'll have many more in the happier years that are forthcoming.

FIRST PERSON PLURAL

We have just finished talking to the editor of The Technician about the possibility of running an incidental weekly column called, "First Person Plural." We have the job with one restriction. "No taking cracks at fraternities." We assume the non-Greek lettered students along with the faculty will have to bear the brunt of being verbally blasted to perdition.

From our office we dropped in to see our advisor about switching our English elective to Appreciation of Fine Arts. We know a very likeable girl who is studying Fine Arts and the thought of being able to sit down and talk logically about etchings with her caused our sway from Professor Staff's English Literature. As all friendly advisors will, ours lit his pipe and leaned way back in his swinging chair to contemplate the matter. With a puff of Grainger that clouded our view the utterance, "You know it's not an easy course." Knowing it to be a crap we answered solemnly, "Yes, we know." In retaliation, he said, "There's a new professor in charge of the course and I understand some students flunked during the summer term." We settled quickly for a marriage course and suggested that in the future Appreciation of Fine Arts be catalogued under Depreciation of Fine Electives.

Tonight we intend getting the jump on our marriage course by wandering around Meredith-way. This is what the book might term as the practical application of Marriage 606. To us it's nothing more than a marriage lab, which should be a required subject on every college campus. Last week we browsed around Meredith and were pleasantly surprised. The crop is fine this year and no hunting license is needed. Round trip tickets are \$1.10 and believe us the investment is worth while.

Sentimental reasons caused us to visit the library the other night, and we found that she's still working behind the desk. After a short chat we glanced through some back issues, renewing our acquaintance with Carl Sickerott, Jim Hobbs, Don Barksdale, Jim Morgan, and many others. We evacuated the basement with a light heart and heavy eyelids. On our way to the reading room for a little shut-eye, we noticed that unlike previous years the N. C. S. library is going to be a poor place for picking up dates. There wasn't a girl in sight. Around term-paper time our coeds may do a little research work, thus causing the 982 students to be more library conscious. First, however, something must be done about the seating facilities in the reading room. What, no cushions?

ARNOLD BROTMAN.

Have a "Coke" = Come, be blessed and be happy

"Coke" = Coca-Cola

It's natural for popular names to acquire friendly abbreviations. That's why you hear Coca-Cola called "Coke".

— the global high-sign

© 1943 The C.C. Co.

BOTTLED UNDER AUTHORITY OF THE COCA-COLA COMPANY BY THE CAPITAL COCA-COLA BOTTLING COMPANY, Inc. Dist. 3-1179 Raleigh, N. C.

... from Idaho to Iceland

Have a "Coke", says the American soldier in Iceland, and in three words he has made a friend. It works in Reykjavik as it does in Rochester. Round the globe Coca-Cola stands for the peace that refreshes—has become the ice-breaker between kindly-minded strangers.

State Plays Camp Davis Tomorrow

Fowler's Fancies

We're all looking forward to the opening of the intramural sports program for this year. Real competition is expected between the various organizations. The program, now in the process of being mapped out, is designed to provide supervised athletics for the men who wouldn't ordinarily have a chance to participate in competitive sports. The plans can materialize only if you boys cooperate fully, so each one of you make up your mind to make your team the champ of the campus.

Well, it looks like we lost one last Saturday night despite the fighting spirit that each man on the team displayed. The boys were in there really scrapping all the way.

LOOK FOR ORANGE COLOR FRONT

NOTICE

It won't be long before complete plans for the intramural program will be mapped out. The organizations which are going to participate should begin to get a little practice.

Every student should cooperate fully with his athletic manager and help to make the program a success.

Complete plans and schedules will appear on this page as soon as they are made available to us.

At the meeting held in Mr. Miller's office last night, it was decided that the teams playing in the intramural football program this year would be composed of nine men instead of the usual eleven. No other details were immediately available.

Tomorrow we take on the Fighting AA's from Camp Davis. The Davis squad is studded with the names of former collegiate stars and they will be plenty tough to crack, but we're looking forward to a good scrap.

Eddie Teague, an ex-Wolfpack star, is playing bangup ball for our neighbors over on the Hill. It seems funny to see the name of Teague appearing on the Chapel College squad because only last year Eddie was playing against them.

A note of happiness is the returning of two more ex-State stars, Joe Suniewick and Taylor Moser, to the campus. Although they can't play for the varsity, it is still nice to have them around again.

See you next week.

Clemson Tigers Hand State First Loss In Charlotte Last Week

Turner Scores Lone Touchdown for State in Second Quarter

By DON SAPP

Led by triple threat Marion "Butch" Butler, the Clemson Tigers came up with a 19-7 win over the Wolfpack in Charlotte last Saturday night. Over 7,000 fans turned out to see the evenly played game.

The Tigers made the first dent in the scoring column in the opening quarter. Butler dropped back and threw a 45-yard touchdown pass to right end Freeman. The try for the extra point was too low.

Paced by Howard Turner, the Rocky Mount "Rocket," the fighting Wolfpack came roaring back in the second quarter to take the lead. State opened its drive from Clemson's 43 by picking up seven yards in two plays. Then Turner fired a 20-yard pass to Buck Sutton to put the ball on the enemy's 15. On the next play, Turner slipped through tackle for the touchdown. Sutton's conversion was good and State held a 7-6 advantage.

Later, left tackle Gainer broke through to block Jim Booker's punt in the end zone. Guard Simpson made the most of the break by falling over the goal for a Tiger touchdown. Clemson led by 12-7 at half-time.

In the third quarter, the Tigers

(Continued on Page 4)

Wolfpack Seeks Win After Loss Last Week

Soldiers Will Field Strong Team of Ex-College Stars; No Admission Charged

Fans in the Camp Davis area will be treated to a free football game between State College and the Fighting AA's at the camp field tomorrow.

It has been announced that the game would be open to the public and no admission would be charged. It was also said that plans had been made to handle a crowd in excess of 20,000.

Cosch Doc Newton had the Wolfpack hard at work ironing out the kinks which showed up in the game last week. Newton has been dividing his practice into offensive and defensive drills. Special attention was placed on punner and kicker protection. Cosch Newton reported his team in good shape and that he would have his best combination on the field.

Last week the Fighting AA's handed the Charleston Coast Guard team a 25-0 thrashing. They have been drilling heavily this week in preparation for the State invasion. Maj. Henry Johnson, the Camp Davis coach reported that he expected his full squad of 45 to be ready at starting time.

Star halfback Jerry Biscaglia, who was out of the lineup last week because of injuries, is expected to be in top trim for the coming game.

Because of the setback handed them by the Clemson Tigers last week the Wolfpack will be fighting harder than ever. Buck Sutton and Elbert Cooke will be depended upon heavily to carry the mail for State.

The Probable State Lineup:

LE	Swartzberg
LT	Johnson
LG	Rattelage
C	Philman
RG	Gaeta
RT	Zick
RE	Pearce
QB	Booker
LH	Turner
RH	Cooke
FB	Mauro

NOTICE

All fraternities wishing to have articles concerning their activities printed in The Technician, have the copy in the office in Tompkins Hall, room 10, by 6 o'clock Tuesday of each week.

drows into Wolfpack territory, but were stymied by a determined defense. However, in the next period Butler put on a one-man show. Carrying the ball on nearly every play, he went over from one, after sparking a 65-yard march.

The statistics gave the scrapping State eleven an advantage. Turner and Novick were outstanding for the Pack while Butler supplied the Tiger roar. Incidentally, Butler joined the army this week—a week too late!

Degrees Awarded 35 After Summer School

Thirty-five students completed in June their work for the bachelor's degrees at State College, it was announced recently by Registrar W. L. Mayer following a tabulation of grades in the recently-ended summer session.

Two students, Ernest F. Hubbard of Manners and Francis E. McVay of Peace Dale, R. I., completed work on the master's degree, Hubbard in agricultural education and McVay in agricultural economics.

No degrees will be granted until June, Registrar Mayer said. Meantime, students needing certification will be given a statement showing they have completed the required work. The bachelor's list is expected to be increased by a few students who have work to complete by correspondence.

List of candidates for the bachelor's degree:

Aeronautical engineering: Edward Andrew Adams, Raleigh, and William Whitehead Avera, Rocky Mount.

Textile management: James A. Allen, Raleigh.

Architectural engineering: Robert A. Atkinson, Jr., Winston-Salem.

Industrial engineering: Don Barksdale, Bluefield, W. Va.; George T. Dixon, Elm City; Jesse W. Ethridge, Greensboro; and William B. Noyes, Marion.

Mechanical engineering: Charles B. Brane, Lucama; Thomas L. Briggs, Jr., Raleigh; Leo T. Brinson, Jr., Arapahoe; and William McC. Neale, Jr., Greensboro.

Textile manufacturing: Robert R. Doak, Raleigh.

Vegetable gardening: Ervin T. Bullard, Central Valley, N. Y.

Chemical engineering: Raul Carvalho, Swannanoa; Albert E. Gibson, Greenville; Hartwell L. Graham, Jr., Goldsboro; Richard E. Gross, Asheville; John L. Hall, Cary; Stanley H. Patten, Lenoir; John N. Rennie, Whitakers; and Henry R. Jobe, Burlington.

Farm marketing and farm finance: Eustice O. Coor, Jr., Selma.

Ceramic engineering: Emory H. Cressman, Jr., Swannanoa; and Edward L. Woodall, Jr., Smithfield.

Electrical engineering: William Thomas Dickinson, Wilson; and William D. Van Arsdale, East Orange, N. J.

Textile weaving and designing: Mary Elizabeth Goforth, Charlotte.

Agricultural chemistry: Henry F. Grady, Seven Springs.

RUSHING

(Continued from Page 1)

Rush week began with two days set aside as "visiting days." These days were set aside for the new men to visit the various fraternity houses and make dates for the entertainment which was to come. The fraternity men really began their entertainment Monday of last week with dances, smokers, parties, "feeds" taking the spotlight.

The rushing period closed Saturday night at midnight, and all this week has been set aside as the traditional "Silent period," during which time the prospective pledges are given one full week to decide upon the fraternity of their choice. Bids were mailed to the freshmen Tuesday afternoon, and the men have the remainder of this week to turn in their replies to Dean Clloyd's office.

Several years ago, the State College Interfraternity Council inaugurated delayed rushing, a system whereby fraternities did no rushing until the beginning of the second term. However, it was decided to return to the old plan of having rush week the first week of the fall term, immediately after registration had been completed.

Forestry: Morris Green, New York City.

Agricultural education: William P. A. Jobe, Rutherfordton; and George M. Thomas, Jr., Cameron.

Civil engineering: James F. Kelly, Rowland.

Wildlife conservation and management: William M. Lewis, Faison.

General Engineering, Henry J. Stockard, Jr., Raleigh.

REGISTRATION CARDS

The registration cards for regular students are now ready, and the students may get them between the hours of 8:30 and 4:30 in the college registrar's office. These cards must be presented for admission to the Wake Forest football game next Saturday.

This does not include the ex-juniors in military who have recently returned to school with the A.S.T.P. An announcement concerning them will be issued soon.

DUNLAP

(Continued from Page 1)

the research projects which he completed and which received wide publicity in the industry was a study of cotton card speeds, which helped many mills to increase their production to meet war requirements.

Since last December, and until he joined the N. C. State faculty, Dunlap has been in the research division of the Cotton Textile Institute, with his headquarters in South Carolina.

His wife, also a native of South Carolina, and their three children are expected to move to Raleigh soon.

NOTICE

Anyone interested in writing either sports or news for The Technician, come by The Technician office in the basement of Tompkins Hall, room 10.

New Redcoat Band Officers Are Named

At a recent meeting of the band the following officers were elected for the present year: President, Leigh Traylor, Norlina, N. C.; vice-president, Jim Wilson, Gastonia, N. C.; secretary, S. B. Burnell, Henderson, N. C.

Even though the band is smaller than in the past and composed mostly of freshmen, the spirit is high and a snappy outfit is shaping up.

Major Kutschinski urges that all members, and other students interested in joining the band, be present at the practices Saturday at 12:30 p.m. and at 6:30 Wednesday evening.

"I'VE SCUTTLED MY PEN TROUBLES WITH PARKER QUINK! THE SOLV-X IN IT PROTECTS METAL AND RUBBER. THAT'S VITAL NOW WHEN PENS AND REPAIR PARTS ARE SO TERRIBLY SCARCE"

Shortage of pens is increasing!

To keep your pen writing... use Quink with solv-x!

"PROTECT your pen, or you may have to do without!" says Uncle Sam.

Government rulings have radically cut production of all fountain pens—especially first-choice brands. Repair parts, too, are dwindling.

Now is the time to switch to protective Parker Quink. Smooth-writing, brilliant. It's the only ink with solv-x.

Solv-x stops most pen troubles before they start. It prevents metal corrosion and the wrecking of rubber caused by high-acid inks. Solv-x ends clogging and gumming... cleans your pen as it writes! Parker Quink with solv-x is ideal for steel pens, too! The Parker Pen Company, Janesville, Wisconsin, and Toronto, Canada.

FOR V... MAIL "Micro-film Black." Parker Quink in "Micro film Black" photographs perfectly! It is jet-black—ideal for every use. Quink comes in 7 permanent colors: Micro-film Black, Blue-Black, Royal Blue, Green, Violet, Brown, Red. 2 washable colors: Black, Blue. Family size, 2 1/2. Other sizes, 1 1/2 and 1/2.

MAKE YOUR DOLLARS FRONT—BUY WAR BONDS NOW!

PARKER Quink

THE ONLY INK CONTAINING SOLV-X

SOLV-X in every bottle of Quink... protects pens in 5 ways!

1. Protects rubber... lengthens the life of sac or diaphragm.
2. Dissolves sediment and gum left by other inks. Cleans your pen as it writes.
3. Prevents clogging of feed.
4. Safeguards base metal parts...
5. Assures quick starting and even flow at all times.
