I.F.C. And Engineers Combine Dances

Attractive Livestock Possibilities Cited

Opportunities for North Carolina's livestock development, which for a long time has lagged behind field crop production, are as great as exist in any section of the nation, and State College is attempting to aid in livestock advancement by coordinating its research and educational programs relating to livestock to offer training to the youth of the State of unsurpassed value, declared Prof. James H. Hilton, former assistant chief of Dairy Husbandry at Purdue University and new head of the State College Department of Animal Industry.

Professor Hilton, speaking recently at the opening session of the seventh annual North Carolina veterinary conference which convened at State College, told the veterinarians that the college's research in animal husbandry was going to be concentrated on the problems affecting North Carolina livestock producers. "We won't stop," he said, "until we build as fine a research program as can be developed."

A prosperous livestock industry, Professor Hilton explained, must be based upon proper livestock breeding, good pastures, and a balanced nutritional program.

Professor Hilton praised North Carolina's livestock leaders for formulating "the best livestock health program in the country" and said that many states were using North Carolina work in disease prevention as a pattern.

A panel discussion on heredity and disease was led by Dr. R. E. Comstock of State College; Dr. C. Nash Herndon of the Bowman Gray School of Medicine in Winston-Salem; and Dr. C. H. Bostian of State College.

New Book On Insects By Dr. Clyde F. Smith

A new book, portraying the significant role of a group of tiny insects in the natural control of dangerous aphid pests and describing the life habits of the wasp-like insects, has been written by Dr. Clyde F. Smith, associate entomologist at State College, it was announced yesterday by Dr. Z. P. Metcalf, head of the College's Department of Zoology and Entomology.

The Graduate School of Ohio State University published the book, which has been made available to students and others interested in insect life on a non-profit basis without the payment of royalties. The book is entitled "The Parasitic Wasps of the Subfamily Aphidiinae of North America."

Dr. Smith's volume, consisting principally of a taxonomic study of a group of small insects called Aphidiinae, depicts each of the 76 species, 28 of which are new to science, with detailed descriptions of color, color patterns, and morphological characters of the adults. The book is liberally illustrated with drawings emphasizing and clarifying certain phases of the study.

Entomologists and others interested in the book may obtain copies of it by writing to the Graduate School of Ohio State University at Columbus, Ohio. List price is \$3.50.

Tau Beta Pi Initiates

NELSON M. WHITE, VICTOR B. SHELburne, JR., ALBERT C. SMITH

PETE D. STRUM, GEORGE PARKER, JEROME WAYNE

Six leading students in the State College School of Engineering have recently been initiated into membership of Tau Beta Pi, professional engineering fraternity which recognizes outstanding scholastic achievement and exemplary character and fosters a spirit of liberal culture among its members. Newly initiated members, shown above, are: Nelson M. White, Jr., St. Simon's Island, Ga.; Victor B. Shelburne, Jr., Washington, N. C.; A. C. Smith, Mooresville, N. C.; Pete D. Strum, Raleigh, N. C.; George Parker, Murfreesboro, N. C.; and Jerome Wayne, Bixshoote, Belgium.

Hilton To Head Dept. Of Animal Husbandry

Prof. James H. Hilton, a native North Carolinian and former assistant chief of Dairy Husbandry at Purdue University, has assumed his duties as head of the State College Department of Animal Industry, it was announced yesterday.

Professor Hilton, regarded as one of the top-ranking men in his field in the nation, is a native of Catawba County. The 44-year-old educator spent his freshman year at State College and received his B.S. and M.S. degrees in Animal Husbandry from Iowa State College and the University of Wisconsin, respectively. He attended high school in Newton, N. C.

Hilton succeeds Dr. A. O. Shaw, who resigned his position last summer to accept a job with Coble Dairies in Lexington.

Possessing wide experience in teaching and research work, Professor Hilton has worked as a county agent in Iowa and as an instructor in animal husbandry at Iowa State College. He is a member of Alpha Zeta, honorary agricultural fraternity, Sigma Xi, the American Dairy Science Association, and the American Society of Animal Production.

The new department head is author or co-author of 30 scientific articles and experiment station bulletins; assisted in working out undergraduate and graduate livestock programs in teaching and research at Purdue; has 16 years of experience in teaching and research on dairy production; and has officiated as judge of dairy (Continued on Page 4)

Sgt. Joe Winchester Killed In Germany

Sgt. Joe D. Winchester of Summerfield, a former student at State College, was killed in action in Germany on November 30, friends and relatives here were informed yesterday.

Sgt. Winchester, a member of General Patton's Third Army, received his Army training at Fort Benning, Fort Wheeler, and State College. He entered the service in September of 1942 and went overseas last July.

His wife, the former Rebecca Whitner of Stanley, near Charlotte, was notified by the War Department of Sgt. Winchester's death in action, and she sent the message to relatives here yesterday. The War Department notification did not reveal any details.

Sgt. Winchester studied Agricultural Engineering at State College. He enrolled at the College in September of 1940 and withdrew from school on December 13, 1941. He is a son of the late Mr. and Mrs. R. W. Winchester of Summerfield.

A brother, R. B. Winchester, is a member of the staff of the Division of Vocational Agriculture at State College, and C. L. Winchester, another brother, is connected with the Soil Conservation Service at the College. He has three other brothers, who are graduates of State.

Dean Hudson To Play For Set February 9-10

Dr. Singstad Explains Tunnel Construction

Dr. Ole Singstad, chief engineer of the New York City Tunnel Authority and one of America's foremost engineering authorities, delivered an address in the Withers Hall auditorium at State College Thursday night.

Dr. Singstad's lecture, regarded as the principal feature of the college's current lecture series, is sponsored by the Public Lectures Committee and the Society of the Sigma Xi. He discussed various phases of tunnel construction and ventilation.

The speaker will deliver subsequent addresses to the North Carolina Society of Engineers here on Friday and to the North Carolina Section of the American Society of Civil Engineers on Saturday. Dr. G. Wallace Smith of State College, vice president of the college chapter of the Society of the Sigma Xi, is making arrangements for Dr. Singstad's appearances here.

Dr. Singstad's professional and educational affiliations include the positions of lecturer on Foundation Engineering at Harvard University; special lecturer on Soil Mechanics and Foundation Engineering at New York University; member of the Advisory Council of the Department of Civil Engineering at Princeton University.

In a special joint meeting of the Interfraternity and Engineers' Councils Tuesday, plans for a combined set of dances were formulated. Using as a basis the ideas set forth by the committees assigned to plan the dances by both organizations, the combined councils adopted almost unanimously the following plan: The dances will be held the week-end of February 9 and 10 with a semi-formal dance Friday night, an informal tea dance Saturday afternoon, and a formal dance Saturday night. The dance Friday night will be the engineers' main dance with the St. Pat knighting exercises to take place on Saturday afternoon. Black and White Formals will be the theme of the Saturday night affair, in keeping with the time-honored traditions of the Interfraternity Council.

Dean Hudson and his band, one of the most popular organizations of its type in the country, has been signed for the complete set. Featuring definitely distinctive style of rhythm and a highly talented and glamorous vocalist, Frances Colwell, Hudson comes to the campus highly recommended by many college men.

The changes in the plans of both organizations were necessitated, when Hudson wired that he could not meet his contract for the week-end of February third, and when the IFC dance committee was notified that there were no bands available, fitting the budget, for the week-end of February tenth. Hudson's organization is being obtained only by pooling the resources of both organizations for the same week-end.

To equalize the cost so that the fraternity men and the engineers would be assessed approximately the same amount, the Interfraternity Council voted to hold a special meeting to amend its by-laws so that the IFC dues may be reduced from five to three dollars for this term. If the chapters authorize this move, the cost to the fraternity man will be the part of his three dollar IFC dues that is needed to match the Engineers' Council share of the total cost.

At the joint meeting of the two councils several plans concerning guest bids were advanced, but none have yet been approved by the administration. It will be well to remember that neither the engineering or interfraternity fee is used entirely for the dance but goes for numerous other expenditures.

(Continued on Page 4)

PROPERTY OFFICER

ROY L. WILLIAMSON

Roy L. Williamson, pictured above, former commissioner of public works for Raleigh, recently assumed his duties as property officer of N. C. State College. He resigned his position with the City of Raleigh to accept the State College position. Williamson first became associated with the city government as city engineer on July 1, 1925, a position he held until May of 1935 when he was appointed director of utilities. He served in that capacity until February 1, 1938, when he was appointed commissioner of public works to fill an unexpired term. He has been elected to the public works post continuously since his appointment. Williamson was graduated from State College in 1917.

EXTENSION SERVICE

A survey of the approximately 11,000 registrations for correspondence courses at State College during the past ten years shows that 72 per cent of the students completed the courses for which they registered, it was announced yesterday by Director Edward W. Ruggles of the State College Extension Division.

Courses offered by the division include agriculture, architecture, education, economics, English, geology, history, mathematics, political science, engineering, modern languages, psychology, sociology, and zoology.

Humanism

Throughout the nation colleges and universities annually hold a Religion and Life program. The purpose of such undertakings is to help students form a mature conception of Christianity and a realization of its value to any group or individual. Religion is one of the favorite topics of dormitory bull sessions, and a chance to discuss the subject frankly with an ordained minister was a distinct pleasure, especially to the younger men.

The YMCA was fortunate in being able to procure the services of a very popular group of speakers. Dr. Sherwood Eddy and Rev. "Scotty" Cowan are famous men and constantly sought by many schools. Mr. Cowan shows a high regard for State College by coming here, because he has turned down all other requests in order to be with his wife who is ill.

The attendance record at these meetings was not fully satisfactory, but it is partially explained with the many other duties and activities of last week. YMCA Secretary Ed King states, that in years before, as many as 99 per cent of the student body have attended these speeches. Reports from the informal discussions held in the dormitories and fraternities indicate that they were a great success. Many have expressed a desire to have more like them.

Although the attendance was a small disappointment, Mr. King was obviously pleased with the splendid cooperation received from the student leaders, college administration, and the faculty and musicians from the three Raleigh girls' schools. Inviting representatives from these glamorous institutions is always a "sure fire" attraction. Finding dinner escorts for them is an unusually soft job.

A pertinent observation on this attempt to humanize embryo engineers was made by Mr. Kendall Weisiger who spoke here last term. He said, "Engineers need, above all, to be men of culture, as well as of cold calculation; men of personality, as well as men of cool intelligence; men of human touch, as well as of standard practice; men who can think of their handiwork in terms of the ultimate human values that it is designed to create." If there is a summarizing message from this series of lectures, I think Mr. Weisiger has well expressed it.

GLEANINGS

Oh me, oh my! Another week has passed and am I glad. Between the changing dates of the "Brawl" and the uncertain date of Midwinters, all foresighted fellows (in which your esteemed author is definitely included) have been in quite a stew trying to keep their dates (feminine) straight. As a result of the consolidation of the Brawl and Midwinters, it looks as though there may be quite a few lovelies who stand to be disappointed at the loss of a dance week-end. . . . Orchids to "Sneaky" Sasser for his diligent but futile efforts to secure Dean Hudson for the 3rd. Anyhoo, "The Dean" will be here the 10th week-end. . . . And orchids to Kay, too, or should we say orange blossoms to Kay. Maybe it is a surprise to some and again maybe it isn't. We know. . . .

The ALT's still haven't ceased their eager-beaverish activities of last week. They've practically rejuvenated their house with curtains, goldfish, etc., and it really does look fine. Some of the other houses on the campus could stand a little of the same.

The PKA's had a good old-fashioned "quiet" party, last week-end. At least they're keeping quiet about it. Wonder what went on? No guess is necessary.

H.A.'s! H.A.'s! Calling all H.A.'s! The time is here. The ballots are here. Be certain to tell all your "friends" to vote for you in order that you might attain membership in this "distinkwished" organization. From all reports, the politicking is becoming hot and heavy already, so "Hurry, hurry!"

Perhaps this isn't in order for this column, but here's a letter from Bob Boyce that I think many State College people will be interested in:

England, Jan. 3, 1945.

Dear Dean Cloyd,

Greetings from England. Realizing how much Christmas meant to me, the army provided me with a C-47 and special living quarters in the United Kingdom. In addition it practically destroyed my appetite for ages to come by placing before me (on the 25th) nearly half a "gobbler."

To change from the "abstract to the terrible," I am now recovering from a shoulder injury received in Germany. Treatment here has been good. Recovery is quick, and I believe, complete.

Can't help but think once in a while about School and my "bid for higher learning." Normal times again will find many of us back in school trying to capture the things we missed because of turbulent conditions or trying to recapture things lost through nonsense.

Best wishes for the New Year! Give my respects to Miss Cox, Mrs. McDonald and Dean Dade.

Respectfully,

BOB BOYCE..

It sorta makes you stop to think what we, or they, really are fighting for.

And so till next week we'll say "Oh me."

Signed,

STAFF.

Pratt & Whitney Fellows

The orchid of this week goes to our latest pin(ed)-up girl, none other than Kay, who is sporting a Sigma Pi pin. The mere mention of "Merchant Marine" sends her off into pink clouds of daydreams. Best wishes from all of us, Kay. Also in the same Hinsdale 'dorm' is a Sigma Chi pin-up who is rejoicing over the latest pictures from the wilds of Georgia. Kathi, the third occupant, hasn't any connection with a 'sigma,' but she reports that the Marine Corps has enough "standard deviation" for her.

We're glad to have Margaret back with us after a few days sick leave. An official communique from Wake Forest said, "Three bruised ribs, need time for recuperation." She fell over a chair . . . she says.

That 'Heaven-scent' aroma (courtesy of Helena Rubinstein) of the P & W's these days results from a Christmas present of one of the Fellows. No longer do we have 'Tabu' clashing with 'Mais Oui'—which, according to an Air Corps Lieutenant, presents a very ticklish situation, especially if on the right ear is a dash of one perfume and on the left is a dab of the other—or vice versa. Guess it depends on which ear he is talking into.

Piggy banks and their consequent accumulation of pennies have taken an up-swing in popularity. What the outcome will be, we don't know, but everything from a week-end in New York to tomorrow's car fare is the anticipated result. We're very patient, you know. . . . "US" Inc.

SHARPS and FLATS

By HOWIE KADEN

A new record released last week is "Ac-Cent-Tchu-Ate the Positive" and "There's A Fellow Waiting In Poughkeepsie," featuring that successful combination of Bing Crosby and the Andrews Sisters. Bing's new Paramount picture, "Here Come the Waves," gives us both sides. The first side is a catchy, swingy tune that is almost double talk. Bing gives out in a slow Southern accent while the Andrews Sisters insert some really good boogie woogie. The song seems to say "Don't be Mr. In-Between," be positive or you'll get in trouble. Vic Schoen gives the singing team a marvelous accompaniment. "There's A Fellow Waiting In Poughkeepsie" tells the story of a WAVE who has a man in half a dozen cities waiting 'til her ship comes in—and—of a Gob in much the same boat. The sailor, of course, picks his friends from among the different women's services.

Les Brown and the boys have released a new disc. It is "Robin Hood" and "Sleigh Rides in July." Les does a commendable bit of work on this sweet and hot disc. "Sleigh Ride in July" is as smooth a ballad as I have heard in some time and probably will reach the top of the popularity ladder in short order. A spot of sweet and solid sax work by Les, himself, preludes a smooth vocal by Gordon Drake. The Brown treatment of "Robin Hood on the reverse side is a gem, full of rare rhythmic effects guaranteed to make you one of his numerous fans; that is, if you aren't one already.

The Wind Blows and so does YEHUDI

Once upon a time, many long years ago, one H. C. W. . . . , popular young Virginian about the campus, was seen strolling through the campus mulling to himself . . . 'tis rumoured that these are his words . . . quote . . . "Nelson White was at the Sigma Chi supper party last Monday . . . Nelson White . . ." Could it be that our young friend from above the real Mason-Dixon Line is JEALOUS . . . yep, could be! ! ! !

"Tossin Tommy" Teaubaut (the name comes from intramural football, naturally) "shore is mad at that thar George fella." It seems that Tossin Tom, aided and abetted by "Farmer" Gene House (George in disguise) almost murdered the guy. What with the ghosts . . . must have been "sperrits," also in disguise . . . that lovely bout almost came to a fatal end. It all happened when Tom decided that his high school boxing days were definitely not over . . . so he proceeded to challenge George to a bout for the championship. To make a short story even shorter, "Teabiscuit" ended it all by falling asleep on the training table while his managers, Hasty and McNeill, frantically but futilely tried to rouse their slumbering "hero." Nuff said.

Nelson, we mean the red-headed one, but definitely is most peeved . . . nothing unusual for her but when she agrees with a bunch of Meredith gals . . . that is really news. (Some drip is asking, over our shoulder, since when is this a newspaper . . . so what). Anyway, she denies any and all happenings at No. 10 Enterprise . . . again we say, "SO WHAT."

That cute Elsie Smith, one of the latest additions to the many Ag Hill gals . . . Ricks Hall, in fact . . . just doesn't understand how some of the men around this place tick. We can't say that we do either, but take a lovely tip from us and don't try . . . many a fair maiden before you has tried and failed . . . look what happened to them. To end this dribble . . . filling more space, as usual, we would say to all good engineers, lint-dodgers, and future farmers . . . quote again . . . "For the best corn in the state, see Rudy Pate. We can assure you that it is not the solid variety . . . we know about the punning . . . but we let the spirit world take care of itself."

AMEN.

Ballot for ALPHA SIGMA SIGMA

(Vote for three)

1.
2.
3.

All ballots must be cast by 6:00 p.m. Tuesday, February 6

Clip the above ballot, affix the names of the three students whom you think are most deserving of the supreme honor of membership in the Ancient and Honorable Society of Alpha Sigma Sigma, and drop in the ballot box on the door of THE TECHNICIAN offices, Rooms 10 and 11, Tompkins Hall, between the hours of 8:00 A.M. and 6:00 P.M. Monday through Friday. The ballot will be reprinted in next week's issue of THE TECHNICIAN to allow everyone equal opportunity to stuff the ballot box. The same name may not appear more than once on a ballot, however. All votes must be turned in by 6:00 P.M. Tuesday, February 6; the results will be announced in THE TECHNICIAN on Friday, February 9th.

Dillon's Dallyings

Friday night basketball games have proven most disastrous for the Red Terrors this season. With an exception of the Seymour Johnson Field loss on January 3, State has won all of its ball games since Christmas except those played on Friday night. N. C. Pre-Flight defeated the Terrors three Friday nights ago, 51-34. Two Friday nights ago, Catawba upset State 35-31, and last Friday night, William & Mary handed the Terrors their first conference defeat, 33-28. Tonight, Coach Jay's boys will be out to break that "Friday night jinx" when they tangle with Carolina at Chapel Hill. Odds are very much in favor of a White Phantom victory, but the much improved Terrors may pull an upset. If State has its usual Friday night lull, the Phantoms will walk away with an easy victory, but if our boys can hit the basket as they have during

the other nights of the week, Carolina had better watch out.

Coach Tom Hines should be praised for his fine work in the State athletic department. With a bunch of "raw recruits," he developed a cross-country team which made a fine showing in intercollegiate competition. Hines is coaching track this term.

The Southeastern Conference schools are consistently grabbing prize football players from this section of the country. Fred Grant, star of the Wake Forest '43 football team, was lured away by the University of Alabama. It is rumored that Charlie Gabriel, ace wingback on Catawba's '44 team, is being made some astounding offers by Auburn officials.

Coach Peahead Walker of Wake Forest is having difficulty in finding opponents for his '45 football team. Walker stated, "the strong

(Continued on Page 4)

INTRAMURAL

By BUDDY BINGENHEIMER

In the dorm league S. Welch bested their S. Wat. opponents to the score of 16-11. At the half time, S. Wat. was in the lead by 7-6, but the S. Welch quint came bounding back to outscore the Wataugas. For the winners Edger-ton racked up 8 points while Farmer tallied 6 markers. This game gives S. Wat. team a .500 average with one win and one loss.

The 2nd Bagwell quint defeated their 3rd floor opponents by the slim margin of 15-13. For the 2nd floor boys, Branscombe led the list with 7 markers. For the top floor combination, Wilson and White led the scoring with 4 points apiece.

In the second game of the night, 1st Bagwell defeated their Welch adversaries rather handily by the score of 21-10. For the Bagwellians, Stillwell was high man with 8 points while Teague was top man for the losers with 4 points.

In the night's other game Berry defeated the 4th Dorm squad to the tune 20-13. At the end of two periods of play the boys from Berry were ahead 13-9. For the victors Poitras scored 10 points while Hardesty tallied 7 markers for the losers.

In the fraternity bracket, the Lambda Chi's rolled over the ALT's to the tune of 30-7. Daniels proved to be the big gun for the winners with 15 points. For the ALT's, Nackos was top man with 3 points. From the first of the game there was no doubt as to the outcome. At the halftime the Lambda Chi's were out in front by a score of 18-3. In the second half the winners' attack was slowed down by the scrappy ALT's.

In the most exciting game so far this season, the Sigma Pi's defeated the SPE's by the slim margin of 18-16. In the first half the SPE's appeared to be running away with the game for they had a 12-7 lead at the half time. However, the Sig Pi's came bounding back to prove that they were not

Terrors Beat Seymour Johnson And Maryland

out of the game and by the three-quarters mark had tied the score at 14-14. In an exciting fourth period the Sig Pi's scored 4 points while the losers scored only 2. For the Sig Pi's Moss was the outstanding player with 5 points while Perry was top for the losers with 8 tallies.

In the lowest scoring game of the season the Sigma Alpha Mu's defeated the Sigma Chi's by a modest score of 9-2. The first half resulted in a sum of only three points which were on the SAM side of the book. After mid-time both sides got "hot" with the SAM's scoring 6 points and the Sig Chi's 2.

The Sigma Pi's came through with the top end of a 29-17 score. During the first half the PiKA's made a poor showing and were trailing by a score of 17-3.

It was not until the latter part of the second half that the PiKA's began to score. Ernest was connecting with the basket and was high scorer for the losers with a total of 10 points.

(Continued on Page 4)

We're living in 1969, electrically. Electrical manufacturers report that the war has advanced technical knowledge by at least a quarter-century.

The electronic photolight—or high-speed flash unit—gives a flash less than 4/1,000,000 of a second in duration, compared with the ordinary bulb's several thousandths of a second.

There are 10,000 lamp sockets on a battleship, 800 on a submarine and 50 on a PT-boat. They range from ¼-watt (for instrument lighting and surgical uses) to 2,100 watts in searchlights.

Lose To Old Liners In Conference Game

The Red Terrors gained revenge last week for an earlier defeat when they beat Seymour Johnson Field of Goldsboro, 48-35. The Thunderbolts had previous whipped State by a score of 39-23.

With Stan Kohler, Charlie Richkus, and Joe Davis pacing the attack, the Terrors took the lead midway in the first half and from there coasted on to an easy victory. The team displayed the best form of the season in this game.

The Terrors took an early lead at 4-0, but four goals in succession by the soldiers put them behind at 8-4. State tied the game at 8-8 but again fell behind at 13-8. With 8 minutes remaining in the first half the Terrors pulled ahead 14-13 and never lost the lead again. During the remainder of the period State scored 13 points while holding their opponents to only two points. The half ended with State on the top side of a 27-15 score.

The Terrors had no trouble at all in the second half and the game ended at 48-35.

Swartzberg, due to an ankle injury, was out except for just a few minutes. The entire State squad got to play, whereas the starting line-up for Seymour Johnson went the entire route.

William and Mary handed a favored Red Terror team its first conference defeat of the season by a score of 33-28 at Williamsburg, Va. The Indians got off to an early lead and held it for the entire game. They held a 17-15 advantage at the midpoint of the game. State pulled up in the closing minutes of the game but William and Mary froze the ball long enough to make their 5-point lead safe.

Stan Magdziak was the high scorer of the game with 14 points, while Howard Turner led the Terrors with 10 points.

Marching to their fourth conference win, the Red Terrors defeated Maryland for the second time this season, 57-42. State made a very good showing the first half and netted 28 to their opponent's 17 points.

Turner, Kohler, and Richkus with 15, 13 and 10 points respectively. (Continued on Page 4)

Society Of Engineers Holds Annual Meeting

The 27th annual meeting of the North Carolina Society of Engineers convened Friday and will continue through Saturday at the Sir Walter.

Registration began in the Sir Walter lobby Friday morning at 9. A meeting of the Board of Directors was held at 9:30, and the opening session of the meeting convened at 10:30.

Acting Dean L. L. Vaughan of the State College of Engineering, delivered the address of welcome. President E. D. Burchard of Raleigh, is presiding, and will deliver a short address.

Other speakers on the first day's program include Dr. Ole Singstad, chief engineer of the New York City Tunnel Authority; H. E. Dilts of Washington, D. C., deputy commissioner of the Public Roads Administration; and A. C. Horrocks of Akron, Ohio, executive of the Goodyear Tire and Rubber Co.

Thomas P. Pendleton, chief topographic engineer of the United States Geological Survey in Washington, will be the principal speaker on the Saturday program. Meetings of the four founder societies, consisting of the American Society of Mechanical Engineers, the American Society of Electrical Engineers, the American Society of Chemical Engineers, and the American Society of Civil Engineers, are scheduled for Saturday morning.

Lost: Jeweled Sigma Nu fraternity pin lost somewhere in the gym. Finder please return to Gene House, 2412 Hillsboro, for reward.

DANCE

(Continued from Page 1)
More complete plans for the set will be formulated by the combined dance committees in the very near future. Co-chairmen Bill Boney and C. A. Dillon expect to have the best set of dances seen on this campus since the "Dorsey set" of years gone by.

BEAUX ARTS

In a meeting on Tuesday night, Beaux Arts Society, an organization of Architectural Students, Prof. J. D. Paulson gave a lecture on colors first from the scientific view and then from the artistic view. The lecture ended with a discussion of the psychological and practical applications of the colors. J. F. Briggs presided over the meeting which was held in the Architectural Department.

ANIMAL HUSBANDRY

(Continued from Page 1)
cattle at some of the nation's leading dairy shows.

Professor Hilton is best known for his work on the nutritive value of soybeans and the vitamin A needs of dairy cattle. He won first place in the judging of beef cattle as a member of Iowa State College's Inter-national Livestock Judging Team in 1922. He is the only student in the history of Iowa State to become a member of all four of its livestock judging teams.

The million-volt industrial X-ray tube must be operated by remote control from behind a two-foot wall for the safety of the operator.

TERRORS

(Continued from Page 3)
tively led the State attack while the Old Liners were paced by their flash forward, Flynn, who scored 24 points.
The Terrors had little trouble coasting to victory during the last period and the game ended at 57-42.

NOTICE

There will be a meeting of the I. Ae. S. Tuesday, Jan. 30, 1945. Initiation will be held. All members and candidates be sure and attend.

INTRAMURAL

(Continued from Page 3)
Correction: The score between the PiKA's and the Delta Sig's was 16-10 instead of 16-1 as was given in last week's paper.

DILLON

(Continued from Page 3)
teams are afraid we'll upset them, and the weaker ones won't play us." The Deac's schedule includes games with State, Duke, Carolina, and South Carolina. Walker is trying to schedule either Alabama or Auburn. Georgia, who lost to the Baptists 14-7 last fall, probably won't renew their contract with Wake Forest. Speaking of Wake Forest, the basketball team over there is the worst to represent the Baptist school in years. The boys have lost decisive tilts to Duke, Fort Bragg, and North Carolina. They play State here February 2 in the next home game for the Terrors.

Prof. Robert B. Rice, executive officer of the Department of Mechanical Engineering and director of Diesel Engineering at State College, delivered the main address at a meeting of the Diesel manufacturers of Wisconsin in Milwaukee, Wis., last Friday.
