Active Alumni May Vote In Forthcoming Election

Students Not Eligible In The Voting

State College alumni may begin voting for officers to head the College's General Alumni Association as soon as they receive ballots, which are printed in the March issue of *The State College News*, monthly alumni magazine, it has been announced by Alumni Secretary H. W. (Pop) Taylor.

Ballots should be clipped from the magazine and mailed to the Alumni Office by May 15 at 4:30 p.m., Taylor said. Only active members are eligible to vote. The votes will be counted and the results certified by three members of the Executive Committee, who are not candidates for re-election. Announcement of the results of the election will be made shortly after May 15, Taylor stated.

A constitutional change authorized voting by mail for the first time last year, thus making it possible for all active members to cast their ballots. Prior to last year, the election was held at the annual meeting of the Alumni Association, and those who were present were the only members who could vote. Under the new setup, a larger portion of the alumni may vote.

Taylor explained that the recent trend has been to transact a bare minimum of business at the annual alumni meeting, allowing more time for fun, fellowship, and the renewing of the old acquaintances. The election usually consumed a considerable part of the annual meeting.

State College now has more than 25,000 former students—more than

5,000 of whom are in the armed services.

The list of candidates, nominated by a committee, follows:

For President: John W. Clark of Franklinville and R. R. Fountain of High Point.

First Vice President: W. H. Rogers, Jr., of Raleigh and Frank Seymour of Goldsboro.

Second Vice President: Amos B. Clement of Oxford and H. C. Kennett of Durham.

Secretary—R. W. Taylor of Raleigh (unopposed).

Treasurer—J. G. Vann of Raleigh (unopposed).

Chairman of the Executive Committee—E. Y. Floyd of Raleigh (unopposed).

For five places on the Executive Committee: R. D. Beam, Raleigh; W. E. Betts, Raleigh; W. G. Broadfoot, Wilmington; P. D. Davis, Durham; John G. H. Geitner, Jr., Hickory; A. H. Harris, Oriental; W. F. Humbert, Leaksville; John F. McNair, Jr., Laurinburg; J. L. Rea, Plymouth; and Glenn M. Swicegood, Kinston.

Athletic Council Member: A. G. Floyd of Raleigh and Rochelle Johnson of Raleigh.

Print Shop Committee: David Clark of Charlotte.

The nominating committee, which was appointed by Alumni President E. Y. Floyd and which met recently to make the nominations, is composed of the following: Roy L. Williamson of Raleigh, chairman; W. Kerr Scott of Raleigh; Carl R. Harris of Durham; Raymond Maxwell of New Bern; and L. L. Ray of Raleigh and Graham.

Faculty Requested To Bring Old Clothes

YMCA Secretary Ed King has offered the full cooperation of his organization in The United National Clothing Collection, sponsored on the campus by the Theta Tau Fraternity. Henry Kaiser, the National Chairman, has designated the month of April for the collection, but the exact date of the campus drive has not been set.

Already the students have been canvassed once this year for old clothes, and the outlook for extensive contributions is not too bright. Mr. King has suggested that the faculty members be urged to clean out the dispensable garments from their wardrobes for the campaign. These clothes will be accepted at the YMCA desk. A personal solicitation will probably be made in the near future.

Many professors have already expressed a desire to make contributions, and many more probably have discarded apparel in their closets. The response from this source will largely determine whether the school campaign makes a creditable record or not.

Miss Coffey Resigns Her Library Position

Christine Coffey, acting head of the circulation department of the D. H. Hill Library at State College, has resigned her position at the College to accept a position on the library staff of the Louisiana State University, it was announced yesterday.

Miss Coffey has been associated with the State College Library since 1935. She first served as head of the Catalog Department, and later became connected with the Circulation Department.

Mrs. Clevenger announced that Mrs. Preston W. Edsall, for the past two years librarian of the State School for the Blind, will succeed Miss Coffey as acting head of the Circulation Department.

Robert M. Lightfoot, Jr., who is assistant field director of the American Red Cross in Australia, is on leave from his position as head of the department.

Mrs. Clevenger praised Miss Coffey for "a very valuable contribution to the library."

Knitting Laboratory Gets Cidega Loom

A Cidega loom, designed to make a varied range of fabrics and textile novelties, has been installed in the knitting laboratory of the State College School of Textiles and will become a part of the School's program of investigating and stimulating interest in the manufacturing of textile specialties in North Carolina and surrounding states.

Dean Malcolm E. Campbell, head of the College's School of Textiles, said yesterday that the new loom is capable of making curtains, bed spreads, tablecloths, bath mats, rugs, pocketbook fabrics, fish nets, sport belts, many types of fringes, and other textile articles.

"All types of fibers, including cotton, rayon, wool, paper, hair, and cellophane can be manufactured into intricate or simple patterns of both wide and narrow margins with the Cidega knitting loom," Dean Campbell said.

Textile manufacturers are invited to inspect the new loom.

Novel Lint Dodgers Ball Will Be Held April 21

Methodist Student Movement Conference

The First District North Carolina Methodist Student Movement Conference will be held here at the College Y.M.C.A. on April 13, 14, and 15. Fifty delegates (mostly girls) will come from North Carolina colleges east and south of Raleigh. Registration will begin at 4:00 on Friday afternoon and the conference will convene at 8:00 that night.

Reverend Forrest Hedden of the Divine St. Methodist Church of Dunn will be the platform speaker. Discussion groups led by Professor W. N. Hicks and Professor J. D. Clark of State College and Miss Mamie Chandler of East Carolina Teachers College will feature the Saturday morning and afternoon sessions. The highlight for Saturday night will be the banquet at the College Cafeteria. The conference will close with a sermon by Mr. Hedden at Fairmont Church in Pullen Hall at 11:00 on Sunday morning.

All Methodist students at State and other Raleigh colleges are urged to attend this conference.

There will be a registration fee of \$1.50 which includes a reservation for the banquet. The number of Raleigh college students who may attend the banquet will be limited and those who make their registration first will have priority. J. O. Taylor or Jimmy Deas will receive your reservations.

Dorothy Lewis of East Carolina Teachers College as president of the First District will preside over

The Tompkins Textile Society is planning to have Freddie Johnson and his Orchestra for its Lint Dodger's Ball on April 21. Both the choice of the orchestra and the date of the ball are tentative.

Definite plans have been made concerning the ball itself. The ball is to be very informal. The dance committee requests that the girls be dressed in print dresses and low-heeled shoes, while the boys are requested to be dressed in old pants, preferably overall pants, and plaid shirts. Saddle shoes, loafers or brogans would also fit the occasion ideally. Each person should use his own ingenuity as to how to dress according to these suggestions.

An unique plan has been made by the dance committee for the bids to the ball. They are to be made of cloth and are woven on a loom. A lovely design has been developed for the bids.

Each textile student is to have four guest bids, and any one desiring to attend the ball should see one of them.

The ball is to be held in the Frank Thompson gymnasium. The gymnasium is to be decorated in the fashion of an old time barn dance. It promises to be one of the most outstanding events of the year.

the conference. Harold Hipps, outgoing president for the State organization and a student at High Point College, will attend the conference. Jimmy Deas of State will succeed Hipps as president for next year. The Wesley Foundation at State College is making the local plans for this conference while the program planning has been done by the Methodist group at East Carolina Teachers College.

Miracle Insecticide Found Safe On Humans

New Insecticide Has Extensive Uses

Dr. Paul A. Neal, chief of the research section of the Division of Industrial Hygiene of the Public Health Service, Federal Security Agency, speaking at a meeting of the National Museum Entomological Society of Washington on November 2, reported that in spite of its inherent toxicity, DDT in the desired insecticidal concentrations in air is of such low order that it will not cause injurious effects in humans.

Studies conducted at the Industrial Hygiene Research Laboratory of the National Institute of Health in Bethesda, Md., showed that DDT in concentrations up to 10 per cent in inert powders, for dusting clothes, as in the extermination of lice, offers no serious health consequences, he said. The use of a one per cent DDT deobase mist mixture had no toxic effect on rabbits, and it should be safe to use as a fly spray, he added. In a clinical and laboratory study of three men who had had several months of continuous occupational exposure to DDT in its various forms as an insecticide, an evaluation of results failed to indicate any definite toxic effects from exposure to DDT, Dr. Neal explained.

Dr. Neal disclosed that inhalation studies of the toxicity and potential dangers of aerosols, dusting powders and mists containing

DDT had been made at the Industrial Hygiene Laboratory on mice, rats, guinea pigs, dogs, monkeys and human beings. These experiments revealed a marked difference in the susceptibility of different animal species to DDT. Mice were more susceptible than rats; guinea pigs and rabbits, with monkeys and dogs, most resistant. Only when relatively large doses were ingested or absorbed through the skin did toxic reactions set in, such as tremors, "jumpiness" as in strychnine poisoning, convulsions with death, fatty degeneration of the liver and kidneys or changes in the nerve structure.

In experiments with dogs, daily insufflation of 100 milligrams of pure DDT per kilogram of the weight of the animal caused definite signs of poisoning in only one out of the three animals tested, after a period of 18 days, he said.

Although this study deals only with the appraisal of the potential dangers of DDT when inhaled as an aerosol, dust, or mist, Dr. Neal pointed out that massive doses either by mouth or by skin absorption will cause toxic reactions. Heavy contamination of foods should be avoided. Dr. Neal concluded that despite the inherent toxicity, the use of DDT in one to five per cent solutions in 10 per cent cyclohexanone with 85 to 95 per cent Freon, as aerosol, should offer no serious health hazards when used as an insecticide.

Bill Thomas Elected President Of AICHE

W. R. Monroe Speaks To A.I.Ch.E. Tuesday

Bill Thomas, Junior in Chemical Engineering from Weldon, N. C., was elected President of the State College Student Chapter of the American Institute of Chemical Engineers Tuesday night. G. C. Fuller, another Junior from Gastonia, was elected Vice President and other officers were: Jimmy Deas, Junior from Canton, Secretary; Stuart Wood, Sophomore from Fayetteville, Treasurer; and Edgar A. Orr, Sophomore from Rocky Mount, Reporter.

Following the elections, W. R. Winchester, a Junior from Monroe, made a very interesting and educational talk on "Making Telescopes." Winchester explained the complete process from the buying of the \$5.00 kit to looking at the stars the first night you finish the 'scope. The kit contains among other things, two 6 inch "pieces of glass" which are to become the mirror of your reflecting telescope.

Through a laborious process of grinding with various grades of caborundum over a period of weeks the glass becomes slightly convex, after which polishing of the disk begins. After this, testing to determine whether or not the correct focal length and whether or not a spherically shaped mirror has been attained is done. Following this,

the silvering or aluminizing takes place. This is done by commercial companies for a fee of around \$2.50. Actually then, the mirror can be made at home for \$7.50 while those purchased, cost around \$50, Winchester continued. The type of glass used is very important since the change of temperature at night can effect a change of curvature amounting in some cases to 25 per cent. Plate glass or Pyrex is used he said, because of their low co-efficients of expansion. Among other advantages of the reflector type of telescope such as Winchester constructed are the absence of chromatic aberration and the low upkeep. The mirrors require silvering or aluminizing about every five years, but this is their chief expense.

Following Winchester's talk, Bill Thomas appointed the initiation committee: W. R. Winchester, chairman; George Parker and Ed Lynch. Edgar Orr appointed J. C. Huffman and H. J. Huffman for his publicity committee.

Dr. E. E. Randolph, faculty advisor, gave the chapter news of departing graduates of last term, and stressed the fact that all of them were entering well-paying jobs of responsibility.

By popular request and a vote from the members, "Pappy" Winchester sang "Sunday, Monday, Always," and the meeting adjourned, amid applause.

RACIALISM AND NATIONALISM

The U. S. has been described as fortunate in having several minorities, for instance Negroes, Jews, Asiatics, etc., resulting in harsh mistreatment for none. That is so, but extreme pride of race and nation is still a big problem in America. It deserves consideration from every citizen.

While we ridicule Hitler for claiming his troops to be supermen, British tars swagger through our seaports with recklessness and conceit gained from kicking natives around in His Majesty's far flung bastions. American soldiers don't think the world holds their equal, and we wouldn't have them think otherwise. Most of us class the Japanese with vermin and hesitate to give them human status, yet they boastfully trace their civilization through centuries of glory. It has been said that in every man who shows a streak of genius can be traced Jewish blood.

Racial prejudice in America and especially in our Southland is becoming a very explosive issue. This newspaper admits the almost unsolvable complexity of the problem but, in line with recent discussions, supports the right of one group to live socially apart from another and to individually make economic distinctions towards that end. Complete political freedom for the Negroes is a just demand. Possibly with a little encouragement they can build their own capitalistic organizations, as have our other races.

Whatever qualities can be attributed to a race as a whole or regardless of a superior race, society cannot afford to base a system of oppression or privilege on blood lines. Every race is made up of individuals from one end of the scale to the other. For all practical purposes, what can be said about one race can be said about another, excepting physical characteristics. Without recognition based upon individual merits, mankind loses the advantage of a great store of talents.

Some races have shown no considerable initiative in cooperatively organizing on modern political lines to develop their resources. Liberia, Ethiopia, and some of the smaller western counties are examples where independent governments have failed to develop properly. Such peoples should and probably

GLEANINGS

This stereotyped corner wonders what there is in the production of beer, besides alcohol, that is essential to the war effort. It certainly is getting awfully hard to get nowadays. Last Tuesday night the mob journeying about from parlor to parlor was beginning to attain monstrous proportions in its quest for that marvelous beverage. (We finally found some New England Ale.)

Bill "Flash" English, better known as "Rubber-Heart" (his heart being easily punctured by the fairer sex) has finally decided that his "throb" Sally ain't so many. "She just don't cooperate anymore" according to him. . . . The Sig Eps are really getting "eager" these days: the house was literally full of "les femmes d'amour" last Saturday at noon. Guess those boys just can't wait (for night, that is).

It seems that Bob Freeman has become so bored (or is that the best word for it?) with the State boys spying on him and his date that he has begun to take his wonderful one, Clara Lee, to Winston-Salem for the weekends. Wonder what he has been doing that he doesn't want anyone to know about? However, it also seems that his trouble was all in vain this past weekend; somehow or other there happened to be one of our dear State boys near Bob's home about two o'clock Sunday night. This unidentified onlooker is of the opinion that Freeman really has what it takes (that's what Rosie told the butcher, too). Bob is taking Animal Husbandry, and on Sunday afternoon he took his girl out to the Clonidike Dairy. The old boy is really breaking Clara Lee in. Guess he's trying to get her adjusted to the COWS!

And speaking of cows, one of our flock wants to know what the correct procedure is when a date wants to play pool, and he does mean the table variety. Should he take her up on it, the pool? It might prove to be an interesting diversion. For more complete details we refer him to Hicks, the lovelorn editor.

Recent reports have reaffirmed the well known fact that "Wake Woods" boys can't hold a candle to members of the good old WOLFPACK. It seems that three local gals asked their "Wood" dates to wait for them while they went into the PiKA house for a moment last Monday night. The "Woodsmen" were still waiting in the car in the wee hours of the morning. Guess the girls must have been having more fun inside with "our boys."

Tuesday night of last week "Parker Face" Latham was seen around town with one of the nefarious women of Raleigh. We were surprised to say the least, Bob. . . . Jimmy Deas was on the go last Saturday night and was making the round of the frat houses. It seems that he was looking for Virginia Dare. Ummmm, Virginia Dare; that name sounds familiar. Wonder if he ever found what he was looking for? Any bets? . . . Second floor Bagwell is turning into the beauty parlor of State College. Any stude interested in having his hair peroxidized need only to drop over and look up Littlefield. . . . The "Britt Express" seems to have gotten off the track and landed on third floor Bagwell. Kluttz seems to have been released from Dix Hill and has taken up his old room on first floor. . . . And Cecil Connel has some polka-dot pants that he is awfully proud of. The certainly do look good on Gibbs (we hear).

Prof. Seegers asked one of his "wide awake" history students what a train was the other day. The unsuspecting and rather stupid reply came back: "It's a choo-choo"
"Nuff stuff. . . ."
—STAFF.

will welcome outside aid if it is extended with propriety. The great nations that supply this help are entitled to a favorable commerce, but the exploitation of the past is unjust and a cause of much of the world's discord.

In the short history of the new world, America has become a juggernaut of power, capable of standing this whole hemisphere on its head. The intoxication of extreme nationalism in this country will spill our great reservoir of international good will, and further unbalance the world's social equilibrium.

(A letter recently published on the editorial page of the Raleigh Times attacks with fury the caste system fostered on college campuses. This writer was probably excited over the failure of one of her children to be accepted by a college organization, but there is some need for students to be broader minded in their social preferences.)

Chat by Pat

It seems like all the dorms are just flashing with news I can't find out personally. I just love to stick my nose in other people's business.

A certain co-ed is definitely at a loss as to what to do. There is an ASTP on the campus that keeps asking for a lecture or demonstration on the birds, the bees, and the flowers. I would like to witness that demonstration. She says he's adorable and has a precious "innocent" face. That's the type to watch out for. They know more than a poor "innocent" gal could suspect.

Last Wednesday night was a good example of war time conditions. A gal was chasing all the men at the Y, and she also shot pool. What's this campus coming to.

The fairer sex seemed rather conservative this year. Their hats, shoes, and everything else were rather on the "ahem" side, but at that I think they looked right nice. All I have to say is I wish I had all the dough that went into the posies that decorated the chicks—a life of luxury I want. Right now I want to go to "shoot a game of pool"—Well, I'll be d--- I got over there and Teenie Nelson and B. J. Hicks were mopping the floor. That was a sight. They just wanted to shoot a game of pool and look what happened. That "Y" bunch is a rough, rare crowd. And to top that, you should have heard the vocals they rendered as they strolled back across the fair campus at ten p.m. I'm sending their applications in to the State Hospital.

I'm out—

PAT.

The Technician needs several more students to fill vacancies on the editorial staff. Any person who likes to write and would like to help, please report at the meeting Tuesday or see the editor in Room 108 Watauga Dormitory.

Speaking of Operations!

An invasion fleet of several hundred warships uses some 48,000 telephones—from 1,500 on a battleship to 10 on a motor torpedo boat. That's as many as are used by most cities of 160,000!

Our fighting men are using telephones, wire, switchboards, and other communications equipment in huge quantities. And Western Electric workers, peacetime suppliers to the Bell System, are busy meeting those needs.

That is why there are not enough home telephones right now. But we are looking forward to the day when the Bell System can again provide telephone service to anyone, anywhere, at any time:

BELL TELEPHONE SYSTEM

"Service to the Nation in Peace and War"

Red Terrors Meet Carolina Tomorrow

Dillon's Dallyings

Here and there: John McMillian, who coached South Carolina's basketball team this past year, has been appointed head football coach at USC for the ensuing year. McMillian succeeds "Doc" Newton. "Doc" is now head football coach and athletic director at Guilford College. He is already making plans for next year's football season. A game with Catawba has already been scheduled and Davidson will probably be played if the Wildcats field a team. . . . Add N. C. Pre-Flight to the 1945 Wake Forest football schedule. The Cloud-busters and Deacons will clash the night of October 13 at Greensboro. . . . It is rumored that Wake Forest refused an offer to play Northwestern University on the gridiron

next fall because of the great distance to Illinois.

Coach Tom Hines' track team will have an intrasquad meet on the local track tomorrow afternoon at 2:00. The opening meet is scheduled next Saturday against the University of Virginia at Charlottesville, Va.

Last Monday afternoon, Easter Monday, State had a baseball game scheduled with Pre-Flight. The game was cancelled because of rain. Before the war, Easter Monday was a baseball holiday so far as State and Wake Forest were concerned. Every year, on this particular day, the baseball teams of the two Wake County schools would clash here in Raleigh. Thousands of sports fans would turn out for the game each year. The tilt was, perhaps, the main baseball spectacle held between college nines in this section. We'll be mighty glad when the day comes that State and Wake Forest can resume their annual Easter Monday classic.

Intramural Schedule

Tennis

- April 9—
N. Gold vs. S. Gold—Ct. 1
1st Bagwell vs. 3rd Bagwell—Ct. 2
- April 10—
SAM vs. Sigma Chi—Ct. 1
Sigma Pi vs. SPE—Ct. 2
- April 11—
S. Welch vs. S. Watauga—Ct. 1
2nd Bagwell vs. 4th—Ct. 2
- April 12—
ALT vs. Delta Sig—Ct. 1
Sigma Pi vs. PiKA—Ct. 2

INTRAMURALS

In one of the first games of the current term the Sigma Pi's overran the ALT's by taking the game by the score of 11-1. The game took place on Red Diamond. On the same afternoon the Sig Ep's defeated the PiKA's on Freshman Field to the tune of 5-0.

In a most thrilling game, N. Watauga nosed out the S. Welch team by the score of 13-11. When the Wataugas came to bat in the 5th inning, the score was tied at 11-11 but during that frame Bingham connected for the first home run of the season with one mate aboard. This proved to be the winning margin, and the game ended without any more scoring.

The dorms brought in the tennis season when 4th Dorm trounced the 1st Bagwell team by the score of 6-0, 6-0. On the other court, S. Welch overshadowed the N. Gold pair. Powell controlled Edgerton by the count of 6-3, and Kennedy of S. Welch bested Parker 6-4. In the doubles Kennedy and Edgerton combined to beat Parker and Powell by the score of 6-3.

The Sigma Alpha Mu's completely outclassed the PiKA's in two singles sets by the score of 6-1 and 6-0.

In the future when turning in the results of tennis games to the gym please turn in complete information such as who played and how the score turned out.

Softball

- April 9—
PiKA vs. SAM—FF
ALT vs. SPE—RD
- April 10—
N. Watauga vs. 1st Bagwell—RD
N. Gold vs. S. Watauga—FF
- April 11—

Delta Sig vs. Sigma Chi—RD
- April 12—
S. Welch vs. 1st Bagwell—RD
S. Watauga vs. 2nd Bagwell—FF.

There will be a meeting of the Beaux Arts Society Tuesday, April 10 at 7:30 p.m. The meeting will be held in Room 307 of Daniels Hall. Associate Professor Baumgarten of the architectural department will deliver a lecture on "Interior Decorating."

Ration League Tilt To Be Played At Hill

State will play its second Ration League game tomorrow afternoon at Chapel Hill with Coach Bunn Hearn's Carolina Tar Heels.

This will be the initial league contest for the Chapel Hill boys, although they had a practice game with a pro outfit at Sanford last Wednesday. Coach Feathers' Terrors met Pre-Flight last Wednesday and Cherry Point a week ago.

Poitras or Riggan will get the starting nod for State, while Andrews or Forrest will start on the mound for Carolina.

The contest will be played on Emerson Field starting at 3:00. Next Wednesday, State will return to Chapel Hill for a second meet-

ing with North Carolina Pre-Flight.

Last Friday afternoon, the State Red Terrors overcame an eight-run deficit to outscore the Cherry-Point Marines, 11-9.

Jimmy Wilson, the winning pitcher, led State's four mounds-men in holding Cherry Point to five scattered hits. Wilson allowed two walks and no hits in his three inning turn of duty, throttling Cherry Point's heavy hitters in the last two frames.

Paul Gibson and Wilson, with three hits apiece, were the big guns in the State attack. Windgard, with two for three was the outstanding hitter for the Marines.

HELPING OTHERS TO HELP THEMSELVES

• One of the factors that has prevented the farm income in the Carolinas from rising to its proper level in comparison with income of other groups, has been that farmers have always purchased their feed, seed, fertilizers and other farm supplies at retail prices, and then sold their farm produce at wholesale prices.

• More than 40,000 farmers in the two Carolinas have found a solution to this problem through membership in the Farmers Cooperative Exchange—a farmer-owned and farmer-controlled manufacturing, purchasing, and marketing organization geared to the needs of modern farm operations.

• Through the "FCX" these farmers are now purchasing highest quality feed, seed and fertilizer at considerable savings, and are finding a better outlet in marketing much of their farm produce.

Date For Meeting Of Textile Group Moved

Meetings of the Industrial Fiber Society and the Textile Research Institute will be held at the State College School of Textiles on Friday and Saturday, April 13-14, instead of next Friday and Saturday as was indicated in a previous announcement.

The Industrial Fiber Society, composed of leading physicists and chemical technologists, will meet on Friday, April 13, and a regional meeting of the Textile Research Institute will convene on Saturday, April 14.

Those persons from distant points will be admitted to the meetings by invitation only in compliance with rulings from the Office of Defense Transportation. Invitations have already been issued by the Industrial Fiber Society and the Textile Research Institute.

Phi Psi Initiates Seven New Members

Seven top-ranking students have been initiated into the membership of the State College Chapter of Phi Psi, largest textile fraternity in the world.

The new members are: Dwight L. Waynick, Greensboro; Jorge G. Nadjar, Santiago, Chile; Bill E. Gupton, High Point; William B. Heyward, Charlotte; Graham M. Byrum, Edenton; Travis Martin, Walkertown; and Armond A. Poitras, New Bedford, Mass.

Notices

There will be an assembly of the whole student body in Pullen Hall Wednesday, April 11, at 12 o'clock.

All students, freshmen, sophomores, juniors and seniors, have been assigned seats on the main floor of Pullen Hall.

These assignments are posted on the Blue Key Bulletin Board. Every student is expected to look up his seat assignment in advance of the meeting on April 11th and be present.

Attendance at this meeting and at all future assemblies will be checked and absences charged.

J. W. HARRELSON,
Chancellor.

All organizations planning a dance or other social function during the spring term must file their requests at once.

The Social Functions Committee will meet not later than Saturday, April 14, to prepare the calendar of social functions for the spring term.

F. M. HAIG, Chairman.

Enrollment Summary

Final figures on the Spring Term enrollment, as announced by W. L. Mayer, Dean of Registration, reveal a total of 556. This figure includes 359 freshmen, 73 sophomores, 67 juniors, 27 seniors, and 30 graduate students. The Engineering School leads with a total of 343, followed by 100 in Agriculture, 82 in Textiles, and 31 in Teacher Education.

A summary for the whole year shows a total of 956.

Dr. Rous Delivers Lecture On Cancer

"Cancer is the most singular of biological phenomena and among the most dismaying, even to the scientist," declared Dr. Peyton Rous of the Rockefeller Institute, a noted authority on cancer, in an address at State College last night.

Dr. Rous, speaking to a meeting of the State College Chapter of the

Society of the Sigma Xi, outlined the work and progress of the Research Division of the Rockefeller Institute in preventing and combating cancer. He was introduced by Dr. Ralph W. Cummings, president of the college chapter of Sigma Xi. Dr. L. E. Hinkle, chairman of the State College Public Lectures Committee, made announcements about future lectures at the college.

"The scientist," Dr. Rous concluded, "sees in cancer a host of vivid questions, chief among them

how tissue cells come to flout the laws of organization and to destroy the very body of which they are a part."

Música Maestro... Have a Coke

(MAKE WITH THE MUSIC)

...or the cue to making friends in Cuba

At fiesta time the gay little isle of Cuba is a mighty cosmopolitan corner of the globe—where the familiar American greeting *Have a Coke* is just as happily understood as their own native *Salud*. From Hanover to Havana, the pause that refreshes with friendly Coca-Cola has become a symbol of the good-neighbor spirit.

"Coke" = Coca-Cola
You naturally hear Coca-Cola called by its friendly abbreviation "Coke". Both mean the quality product of The Coca-Cola Company.
