Think It Over

It really isn't as bad as it seems. In all probability you will eventually be glad it happened. In case you still have no idea of what I am speaking let me explain the somewhat cryptic statements above.

Almost three hundred men will not be able to continue work in their chosen departments next fall. You have undoubtedly read several versions of just why these unprecedented steps were taken and everyone realizes by now that the move was made necessary by a combination of circumstances over which no individual or groups of individuals can wield any control.

There are just too many people wishing to pursue a specialized engineering course. Any effort to accommodate all these men will result in the lowering of the academic standards of the entire School of Engineering. Something had to be done—and done before next fall.

Dean Lampe and his associates have risen to the occasion. The plan they offer, consisting mainly of establishing a quota for each department and selecting men to fill the quota on a basis of scholastic standing, is fair, comprehensive and a blessing in disguise to many rising juniors.

The manner in which the plan was presented left a bad taste in many peoples' mouths. It seemed to carry the implication that anyone who took the Temporary Special Engineering Curriculum was to have some sort of stigma attached to his name. Anyone who thinks that by leaving his department and enrolling in the Special Curriculum he will in any way compromise his future earning power or the intrinsic worth of his degree from State College is mistaken.

Before the plan was presented Dean Lampe contacted many people "in the know" to find out if there was a demand in industry for men with broad and comprehensive engineering training and the replies he received proved that there were myriads of jobs open for men with a Bachelor of Engineering Degree.

Many of the men who are now here training for highly specialized jobs are not fitted for such professions. A person who limps through his department and barely gets his degree in a specialized field should not be turned loose as a fully qualified technician. There are many branches of the engineering field which do not require the highly technical training of a research engineer—and the Temporary Special Engineering Curriculum is designed to furnish a course of study for those who have no inclination or desire to specialize.

All in all, the plan presented by Dean Lampe will serve a two-fold purpose—first, it will relieve the congested laboratory facilities, and second, it will provide an excellent course of study for those who desire a broad engineering background.

Without any knowledge of my status in my department I should like to volunteer to enroll in the Temporary Special Engineering Curriculum beginning next fall.

J. R. F.

Wallace Is Coming

For the past two weeks Raleigh papers have been full of announcements and predictions about the forthcoming appearance of Mr. Henry Agard Wallace in Memorial Auditorium. Mr. Wallace, former vice-president of the United States, has just returned from a self-appointed "alarms" tour of Europe. The self-made Paul Revere has lampooned The Truman Foreign Policy before audiences throughout England and the Continent for the past few weeks. His visit to Raleigh should be marked as a rare opportunity.

ity for enlightenment concerning world political issues of the day. Mr. Wallace is now on the outside looking in; he should know what he is talking about. If we may bar any consideration that he has ulterior motives in mind, we may class Mr. Wallace as a brilliant crusader; a man who, in the face of fierce criticism and condemnation from the party to which he gave so much, still has the vision and courage to fight for what he believes to be the truth.

It is absolutely impossible for anyone at this time to stand up and say that Mr. Wallace is wrong. The succession of miserable failures visited upon our various "peace-making teams" would seem to indicate that perhaps we are handling (or more probably trying to handle) the Russians the wrong way. Mr. Marshall and Mr. Byrnes have come away from the conclaves they visited with less than nothing in the way of a decent, workable plan for the future of Europe and the World. Mr. Wallace's methods might reap no richer harvest, but certainly he should be heard. We think he is right! We are firmly convinced that handling Russia with kid gloves will result in a third and more terrible war. We stand with him in saying that we must face the Soviet Union and convince her once and for all that we will not give one inch on principle—no matter what the cost.

Let us all make an effort to hear Mr. Wallace; it is an opportunity which we seldom get in Raleigh. Let us hear what he has to say with an open mind; weigh his views carefully, and stand firmly on the convictions we may be able to form. It is a question in which we must have a vital interest; the choice will soon be ours, and we are bound to have an intelligent answer to the problem.

June 5th is the date. Memorial Auditorium is the place. Make your plans now.

Woolen vs Frank Thompson

We hear much wailing about the death of "name" bands on our campus and the fact that Carolina and other large schools seem to be able to get the orchestras without too much difficulty. Those few State men who attended the German Club's May Finals at Chapel Hill last weekend will be quick to dispel any such comments as that. The dances in Frank Thompson Gymnasium have without exception been far superior to that affair. The dance floor was too crowded; the acoustics were such that a dozen yards from the stand there might just as well have been no band; and Mr. Spivak spent entirely too much time signing autographs. Don't spend another minute bemoaning our dance set-up—it's the best in this area, by far!

New Curriculum is a Blessing!

Tempers flared at the Tuesday Pullen Hall meeting for the explanation of the proposed Engineering curriculum. Why? Because certain students came to that meeting already prejudiced against the whole idea, and what they got for explanation was rather shoddy and, at best, did not impress upon the assembled group that the change is probably the greatest blessing State College students have received in many years.

Yes, the Engineering School administrators have missed the boat in their efforts to explain and sell the emergency curriculum. They did not build up a pre-sentiment for the change among students; hence their sales efforts have been miscarried by many rising juniors. The weak Pullen Hall explanation, saved only by the talks of Brennecke and Harrelson, did not help matters very much.

Students! Do not be misled by the administrators! The proposed program is the best curriculum ever offered at State College, unless you plan to get pinned up in a laboratory somewhere for the rest of your life. We venture to predict that graduates in the special curriculum will outstrip their contemporaries of the regular courses in advancements in industry. We say this because we know that the "special" student will be getting a sound engineering education as well as increasing tremendously his potential for success in the business world.

Again we say, the new curriculum is a blessing!

Special Edition

Last week Mr. C. E. McIntosh, Assistant Director of the North Carolina College Centers called the TECHNICIAN office and asked that State College give him a hand. The College Centers, located in twelve cities throughout the state and set up to take care of those people who could not enroll in regular schools or universities, are to close next week, and Mr. McIntosh thought it fitting to pay tribute to these Centers for the fine work they have done.

Several members of the staff agreed that to print a special edition of the TECHNICIAN for the College Centers would not only be lending a helping hand to a hard-working group but it would also be valuable publicity for State College. As a consequence the regular issue was cut to four pages and the special issue will come out this week.

Student Proposes New Organization For Veterans

By ROBERT MERRITT

I have just received word from my lobbyist in Washington that he may be able to get my bill passed after all. I have been advocating for some time the inauguration of a GI Bill for the veterans of the next war, so we can all take advantage of it while we're still alive.

Joe (my lobbyist) says that he met with quite a bit of opposition at first, mostly from those backward Senators who didn't believe we would have another war. However it seems that most of them have changed their minds about the prospect of a lasting peace.

Although Joe has been working on this night and day, I think this change came about merely as a result of political pressure from a new organization now active in the middle west and Ohio valley. I understand it was first known as the VFW (Veterans of Future Wars), but was changed to FWV to avoid conflict with an existing organization.

I am amazed at the effectiveness of the FWV in influencing Congress. Probably it is because they are an essentially youthful group, representing the high school and college brackets. On second thought, it is even more amazing that such a juvenile organization should find any response in Congress. Experience shows that our representatives don't generally respect the predicaments of their non-voting constituents.

It's too bad that such an organization hasn't gotten a foothold in this part of the country. State College is indeed fertile ground for that type of movement. There are

at least 3500 students who will be veterans of World War III, if they survive it. It is indeed a shame that only those who are veterans of the last war are provided for under the present GI Bill.

If the FWV spreads to North Carolina, I will be one of the first to sign up. I will also be sure to get my kid brother in. He is only fifteen, but the UN may be able to avert war for three or four more years and he would be just the right age.

A week ago I thought that a GI Bill for future veterans might be just a waste of money, because I believed that the average intelligent American would respond to the cause of world peace and do something about it. I was wrong then, but I am sure now that it would be a good thing; although I won't hold my breath until it's passed by Congress.

What do you think? Or do you? (Ed. Note: Bob's appeal last week to those interested in World Government brought little response. Anyone interested in such an organization should contact Mr. Merritt.)

Platter-Datter

By DAN SECHTIN

Once again Capitol pridefully presents, in package form, "Somebody Loves Me" a series of eight sides featuring the most popular performers on the Capitol roster. Each single or plays a favorite song from the pen of Buddy De Sylva, who for three decades has reigned as one of the most prolific and beloved songwriters and showmen in history. The featured artists in this "Somebody Loves Me" album include Peggy Lee, Andy Russell, the King Cole Trio, Clark Dennis, Johnny Mercer and Martha Tilton (duet), the Pied Pipers, Margaret Whiting, Hal Derwin and the orchestras of Paul Weston and Dave Barbour. The titles of the eight selections include "Somebody Loves Me," "Just a Memory," "You're the Cream in My Coffee," "Together," "If I Had a Talking Picture of You," "April Showers" and "When Day is Done."

Another Capitol release is Stan Kenton and his orchestra giving

Kenton's "Artistry in Jazz" series, the "Machito" etching offering, in out with "Machito." "Machito" reveals the powerful Kenton aggregation in a new groove, rumba rhythm, and is dedicated, in fact, to the band leader of the same name who inspired its creation. These sides comprise the second in order Stan's solo piano, solo trom-

GLEANINGS

This should be our last batch of copy for the current year. We offered this spot to Andy now that he is jobless (in publications, that is), but like Dugan he was above it. The honor of writing a tearful farewell will fall to Mr. Bringle next week. Writing of tears, if you are looking for a waiting pain, you can probably borrow one from the sports editor over at Mr. Duke's College. The scoop from West Durham is that Duke is de-emphasizing athletics. The story goes that said institution has made itself a place among top universities and that paid football teams are no longer necessary. Students in our school of Agriculture will be able to recognize that stuff immediately.

Those of us present at the rising senior class elections were rather shocked when a popular fellow-student rose from his seat and proceeded to toss out a few disparaging remarks about one of the candidates for v.p. Last week we heard that the performance had been repeated. Now, it wouldn't get anybody ahead for us to name the individual, but it might interest him to know that many of his friends are hoping that he will see the light. Such conduct is unbecoming in ANY election at ANY college.

Next year State will enter a new era. At long last the majority group will be in the political drivers seat. This year's council made a magnificent gain when it secured the disciplinary powers. This should prove to all the Thomas' that painfully slow progress is to be preferred to last year's verbal blasts.

Having dispensed with the dribble we might as well get around to what this column was intended to be. The Chem E's bust at the Tar Heel Club was a howling success. We have it straight from one of the pigeons at Winston Hall. The excellent chaperones were very proper and concentrated on bridge. . . . Evidently Joe Beam likes Teiser's taste in women—if the fact that he was seen at Chapel College's German Club dance Saturday with Stan's choice for Friday means anything. . . . The fishing was fine Saturday morning near the Tar Heel Club. Enough said! . . . The industrial engineers had a party a week earlier at the same location, but since most of the couples seem to have been married nothing news-worthy happened. Yes we had a good time, thank you.

AROUND TOWN AND CAMPUS LAST WEEK: One of State's best friends passed the 85 mark in a breeze—best wishes to Uncle Joe. . . . The maintenance department cut away the jungle at the corner of Watauga Drive and University Drive and found why Watauga Hall, of course! . . . Numerous societies staging initiations in order to raise moola for one last fling. . . . Ole Sol continued to take a toll among students and secretaries. . . . Durham finally topped Raleigh in the Carolina League standings (Cy Senter please note).
TERMITE (With the aid of the pigeons)

On the reverse side is "Collaboration" taken at a slower tempo by Kenton, who kicks it off with a concert styled piano solo and leads into an expressive trombone solo by Kai Winding and finally, into a final chorus by full ensemble. The arrangement concludes with a spectacular series of purposeful dissonances. There are no vocals on either side.

Techs in Final Home Game Saturday at Meadow

Pushball Contest Ends In 1-1 Deadlock

There was a mighty column of good North Carolina dust rising to the sky from the track field last Friday afternoon as the Freshmen and Sophomores renewed the annual engagement. Any latecomers, without knowing of the famous pushball contest, could easily tell that mortal combat was taking place on that "field of friendly strife."

After pushing into the blood-thirsty crowd that jammed the stadium, the spectators witnessed unrefreshed Freshmen and softened Sophomores trying with all their might to get that big ball over the line that lay so far away. Overheard was the remark, "A lot of G. I.'s just broke that pledge of 'no more fighting for me.'"

After fuming and fighting for a whole hour, the outcome was disappointing for both sides. The dazed participants all felt that no team could fight so hard and emerge with only a tie, 1-1. "Tis a sad shame," they said as they crawled off the field.

Despite the heated competition, there was only one casualty reported. Some unlucky lad sustained a broken arm. Surely the class of his patronage can spare enough from its treasury to reward this noble lad for gallant contribution.

The 1947 pushball contest, the first since 1943, was initiated by Blue Key, National Honor Fraternity. Much credit for the renewal of this noted campus event

Intramurals

By W. S. BULL

Softball
During this past week in softball, 3rd Turlington moved closer to pay dirt by defeating 1st Syme by a score of 10-4. On the same day 2nd Syme licked Welch down 9-4. The winner of the game between 3rd Turlington and 1st Syme will move into the quarter finals to play 2nd Becton on field No. 1 May 26.

Of the teams that play in the parallel bracket, basement Syme defeated 3rd Syme 14-5. They have one more game to decide who will meet 1st Becton May 26. The winner of this game will meet College View, undefeated so far, to decide who will go into the finals. On field No. 1 on the 26th will meet 2nd Turlington the same day to decide who will go into the finals.

Other games that were played last week are as follows:
Sigma Chi 18—Pi Kappa Phi 10.
Delta Sig 13—Sigma Phi 10.
Sigma Alpha Mu 6—Sigma Nu 5.

Volleyball
Welch dorm and College View tussled this week to decide who will play North Watauga. The winner of this game will meet 3rd Bagwell in the semi-finals May 26. Gold and South Watauga meet to decide who will go against 2nd Syme, and the winner of this game will decide the team that will meet

should go to Mike Andrews, Dave Michal, Pinky Dunn, John Boyter, Taylor Moser, and Bill Moser.

By DICK JONES

Vic Sorrell's torrid Techs tee off against the baseball aggregation from Carolina on Saturday afternoon in the final home game for State. The game will be played at Devereaux Meadows at three thirty. It is urged that the student body turn out for this important contest in appreciation for the fine showing that the team has made this year. It is probable, if not likely, that the Techs will clinch the Big Four crown or at least tie for it.

By edging Carolina 5-4 in eleven innings at Chapel Hill last Wednesday the Terrors need only an even break in the two remaining games to clinch a tie for the crown. By taking both games the crown will remain at State College unchanged for the second straight year. Last season the Wolves won out by trouncing the Duke Blue Devils in the final game of the year. As Duke has completed her regular season's play and has disbanded there will be no chance for a playoff in case of a tie.

In the game at Chapel Hill Wednesday Big Crump Ramsey and

1st Becton May 26 for the other semi-final game. The finals will be held in the gym at 8 p.m. on May 28.

Sigma Nu and Kappa Alpha offered the most colorful competition during the past week. Sigma Nu took the first game 15-10 and Kappa Alpha annexed the second game 15-8. The third game provided more excitement and ran into an overtime period. The final score of that game was 17-15 in favor of the KAs.

Other scores for the week are as follows:
Delta Sigma Phi 2, Sigma Alpha Nu 1.
Gold 2, Trailwood 0.
Alpha Gamma Rho 2, Pi Kappa Phi 0.
Sigma Chi 2, Sigma Pi 0.

Vinny DiLorenzo, ace Tar Heel southpaw, locked in a tight pitchers' duel, but DiLorenzo's wildness helped the Techs roll to their second straight win over Carolina. Big Curt drove in State's first two runs with a sharp single in the first inning after DiLorenzo had walked three men. Carolina came back to go ahead at 3-2, but the Terrors knotted the count again in the eighth. The regular game ended in a 3-3 deadlock and it wasn't until the eleventh stanza that State iced the game. Stanton got a blooper double into right field and Charlie Richkus drove a hot liner off Pappy Hamilton's glove at third for a single. After Ramsey fanned ever-faithful Willie Evans slashed a clean single to right scoring Stanton. Pinkie Gardner then drove another sharp single to left tallying Richkus, and that was the ball game. Carolina managed to mark

once in their half of the eleventh, but the Crumpler knuckled down to notch his eleventh triumph in Big Four play in two years against a lone defeat. Wee Willie Evans led the hitters with three for six.

If State can take Carolina to the cleaners in at least one more game, in all probability they will be chosen as one of the three teams in District Eight of the NCAA to participate in the District playoffs at Charlotte the 11, 12, and 13 of June. Alabama and Clemson are the other two probable selections for the district. If the Techs manage to make this tournament, it will mark the third post season bid that a State College team has received this year, being in addition to the 'Gator Bowl' contest for the football team and the National Invitational Basketball Meet for the basketball squad. That's going some in anybody's league.

Political Statements

(EDS. NOTE: The following statements were received from men who participated in last week's election. The TECHNICIAN would like to invite similar statements from others who were candidates in the elections.)

To the Editors:

I would like to take this opportunity to offer my congratulations to Jennings Teal on his recent election to the Presidency of the Student Council.

To my supporters I wish to express my sincere thanks for their assistance in my behalf. I offer Mr. Teal my wholehearted support, and I will do my part to make his administration a successful one.

Sincerely,
Harold Stinson

Fellow Students:

Very few of the offices won by Student Government officers and our council were attained without a raging battle all of the way. This opposition shows the great spirit and interest that the students are capable of presenting their government.

I join the other officers in saying that we sincerely appreciate the interest that you have shown in your government and the support that you have given us in the elections. With your continued support, we shall be able to carry out the desires of the Student Body—to make the coming school year, '47 and '48, one of the more successful of all years in our long history.

BOB McNEILL
Jr., General Engineering

To the Student Body:

I am unable to express fully my appreciation to you, the Student Body, for the honor bestowed upon me by your electing me to head your Student Government. I will work diligently toward making the council a body truly representative of you and your wishes. In keeping with this idea, at various times during the coming year, students not on the council will be invited to attend our meetings and to express their opinions on questions before the council. I want to assure each of you that I, or any other member of the council, will be glad to cooperate with you and help you in any matter at all possible. The council this year has done a great job. The thanks of the entire Student Body should go to them with a hearty "pat on the back" for a

job well done. No small part of the accomplishments and successes we have had here at State this year has been due to their efforts.

Next year we can make great strides. I hope that we will be able to improve the cut system; I hope that we will be able to make our honor system a working system; I hope that we will be able to stimulate more interest in student activities; and I hope to see something settled in reference to the problem of a fraternity row. It is to these ideals that I pledge myself and ask for your support and cooperation.

Thank you,
JENNINGS TEAL

CERAMIC GRADUATES

How's Your Torso?

Black pique makes an exciting new fabric for your summer evening dress. Shown above as pictured in the May issue of Junior Bazaar is a strapless evening gown with a tight bodice, very full skirt and long torso look. Over it the model is wearing a fitted midriff jacket of white pique with a small, round collar, lantern sleeves and white ivory buttons. Young American deb dress; Lillian Abbott jacket.

ANY STUDENT moving from two or three room apartment notify Carl Galloway, Room 117 Alexander.

FOR SALE: Double breasted tuxedo. Size 38. Phone 5288.

When you graduate, you will have one of the finest opportunities to learn to fly ever offered young men in peacetime.

The Army Air Forces' Aviation Cadet Training Program gives you that chance. It cannot be duplicated anywhere at any price. Leader in new things for aviation—in jet and rocket propulsion, far-ranging heavy aircraft, improved navigation facilities, and many other of the latest developments in a fast-moving field—the AAF can help you begin a brilliant future.

The Air Forces have reopened Aviation Cadet training to qualified civilians 18 to 26½ years of age. Men selected for training as pilots under the terms of the program must be single and have had at least two years of college education, or the equivalent, in an accredited institution. Upon successful completion of the course, graduates will be commissioned Second Lieutenants, Army of the United States, and assigned to flying duty with the Army Air Forces.

Reactivation of the Aviation Cadet program is typical of the AAF's continuing effort to provide selected young men every opportunity to earn advancement. Cadets who win their wings as today's pilots will be the same kind of men who, in wartime, built and manned the world's mightiest air arm.

Make your plans now to get in at the start! By applying immediately after graduation, you can take your qualifying examinations and enter the July 1st class, or—if you want a summer vacation—you can take your examinations now and be ready to enter the class beginning October 15th. Further information is available at AAF Bases, U. S. Army Recruiting Stations, local Civil Air Patrol headquarters, or by writing to the Commanding General, Army Air Forces, Washington 25, D. C.
