State College Plays Host To Journalists

Engineers' Exposition Will Open Friday, April 29

BY JOE HANCOCK

State College is host this weekend to some 90 student journalists at the annual North Carolina Collegiate Press Convention being held at the Carolina Hotel. Emmett Bringle of State is president of the Association.

The convention got underway yesterday afternoon at one o'clock with the registration of delegates under the supervision of La Verne Harris of Meredith, secretary of the convention. A general meeting followed at 5:30.

A makeup and news clinic were held at 8 p.m. Mr. T. S. Ferree, of the Ferree School of Art, conducted the makeup clinic. He discussed the mechanics of magazine illustrations and layout and also criticized the makeup of member magazines.

Noel Yancey, chief of the local Associated Press bureau led the news clinic discussion. He pointed out the elements of the news story, gave pointers on the approach to news writing, and criticized news stories of member publications.

Today's activities began at 9:30 with a general meeting at the Carolina Hotel. The day's program is as follows:

10-12 noon—Editorial Panel—Led by Robert Thompson of the High Point Enterprise. Panel for Business Managers—Led by J. T. Howard Associates, Raleigh Advertising agency. Sports Panel—Under the direction of Neal Patrick, sports editor of the Raleigh Times. Photography Panel—Supervised by Dr. Bennett of the State College Visual Aids Department and Bugs Baringer of Rocky Mount.

12:30-2 p.m.—Luncheon at State College Grill Room as guest of N. C. State Publications Board.

2-4 p.m.—Short Story Panel—Led by Dr. Lodwick Hartley, head of State College English Department, Randall Jarrell of the Department of Creative Writing at WCUNC, and Mrs. Frances Pallor of Durham, writer for the New Yorker magazine. Yearbook Makeup Panel—Led by Bob Ihrig of Jahn and Ollier, Chicago, world's largest yearbook engraver.

4 p.m.—Delegates who wish may attend Governor Kerr Scott's press conference. The delegates will be allowed to stay after the regular reporters leave to ask the Governor any questions they might have.

Highlight of the day's activities will come from 7 until 9, when a banquet will be given for the delegates at the Carolina Hotel. Due to recent trend toward not having after-dinner speakers at banquets, special entertainment has been substituted for a speaker at this time.

Following the banquet, panels will be held on Yearbook printing and feature writing at 9:30. The printing panel will be led by Joe Hardison of Edwards and Broughton Printing Company and the feature writing panel will be conducted by Jack Riley, Sunday editor of the News and Observer.

The closing session of the convention will be held on Saturday (Continued on Page 3)

Musser Tops Andrews In Close Race For V.P.

The annual campus elections have run their course and all the campaign promises are now in the laps of the winners.

Probably the closest and most hotly-contested race in the elections found Preston Andrews and Charlie Musser running neck and neck down to the finish. Chuck edged Andrews in the final count 1308-1180.

Hank Odom won by a wide margin over Larry McDade for the office of Treasurer, Gil Newton defeated Oscar Williams in the Secretarial race, and Bill Haas won over Gilbert Maxwell for the Editorship of the TECHNICIAN.

Final returns for all offices follow:

For Vice-President of Campus Government

Musser—1308.

Andrews—1180.

For Treasurer of Campus Government

Odom—1499.

McDade—802.

For Secretary of Campus Government

Newton—1384.

Williams—992.

For Editor of The Technician

Haas—1168.

Maxwell—744.

Athletic Council

Senior Representative

Byler—990.

Brock—861.

YMCA Vice-President

Pugh—954.

Hudgins—695.

YMCA Secretary

Furches—843.

Umberger—824.

Alumni Athletic Trophy

McComas—1306.

Musser—644.

Head Cheerleader

Eubanks—1098.

Ham—770.

Faculty Representative

Brown—1188.

Armstrong—615.

IFC President

Bass—191.

Willard—167.

IFC Vice-President

Boney—209.

Brenner—162.

IFC Secretary

Boyles—194.

Fidler—176.

Representatives to Campus Government

School of Textiles

Senior

Jones—167.

Pappas—160.

Junior

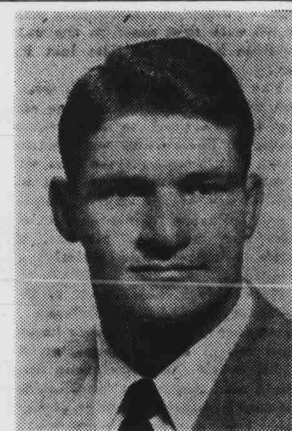

Coble—162.

Sheviak—153.

Sophomore

Margeth—145.

Buttler—143.

Pictured above is Charlie Musser, Athlete and Scholar, who edged Preston Andrews for the Vice-Presidency of the Campus Government in yesterday's campus elections. Musser has been outstanding in football and wrestling for Wolfpack clubs for three years and has maintained a B average at the same time.

School of Engineering

Senior

McQuinn—530.

Proctor—368.

Junior

Perkins—533.

Leggett—311.

Sophomore

Lambert—612.

Farmholt—212.

Edwards—85.

Wise—45.

School of Agriculture

Senior

Smith—242.

Holland—183.

Junior

Beaman—268.

Cousins—136.

Sophomore

Sikes—204.

Coggins—196.

School of Design

Senior

Boney—45.

Leamon—22.

Junior

Miller—43.

George—20.

Sophomore

Washburn—41.

Allred—23.

Plan To Intensify Honor System

Fred Kendall, president of the Campus Government, has announced plans for a project which will expose the points of the Honor System to each student individually. The week of May 1 to 7 has been designated to inaugurate this program.

Meeting with the members of the departmental executive honor committees, Kendall has outlined the plans to intensify the meaning of the Honor System to students individually rather than a mass. Letters from the Campus Government concerning such a program will be sent to all deans, departmental heads, members of the Faculty Council, and heads of student organizations.

Honor Committees will pick students to describe the points of the Honor System in class rooms and at student gatherings.

It is hoped that this program will take the Honor System "off the shelf" and put it into the hands of each State College student.

Rising Seniors Elect Brock As President

At a Junior Class meeting held Tuesday in Pullen Hall, Avery Brock, a student in Industrial Engineering from Mount Olive, was elected to serve as president of the class next year. Brock is the retiring editor of the TECHNICIAN and a member of several honor organizations on the campus.

Warren Cartier of Green Bay, Wisc., was elected from a field of six for the position of vice president. Cartier is a student in Industrial Arts and an outstanding member of State's basketball team as well as a member of Thirty and Three and recipient of this year's outstanding player award.

For secretary, Tommy Wood, of Gastonia and majoring in Textiles, won after a tie vote. Tommy is outstanding in the Textile school and a member of the Textile honor society.

Gene Tatum, of Norfolk, Va., treasurer of the class this year, was elected to retain the position for next year. Gene will be senior manager of the basketball team next year also.

Agromeck Elections

The Publications Board approved only one candidate for the position of editor of the Agromeck, Scott F. Stidham of Fort Smith, Ark. Scott has served on the Agromeck since his transfer to State from a college in Arkansas. For business manager, Beverly Ross of Durham won out over Robert G. Thrower and George Waller. Ross has served three years on the Agromeck and was editor of his high school annual.

Scores of spectacular displays and demonstrations depicting the recent progress of science and technology will be featured during the 17th annual Engineers Exposition next Friday and Saturday, April 29 and 30.

Television, radar, and frequency modulation will share the spotlight along with hundreds of other technological accomplishments. The giant exposition will be formally opened when a jet propulsion engine cuts the ribbon surrounding the entrance to the exhibition.

Thousands of North Carolina high school students, teachers, and other interested persons are expected to attend the event and to observe the extensive programs of education and research now in progress at the college.

Approximately 2,500 students enrolled in the School of Engineering at State College are sponsoring the exposition and are taking a part in preparing the exhibits and demonstrations. The faculty is also lending its support to the undertaking, which has required months of planning and weeks of work.

No Admission Charge

There will be no admission charges to any of the exhibition halls or to any phase of the fair. Objectives of the student show are to outline the functions of engineering in the modern world and to illustrate the work of the School of Engineering, which now occupies a place of leadership among the institutions of technology in the United States.

Following the ribbon cutting, Dr. Clyde A. Erwin, State Superintendent of Public Instruction, will deliver the principal opening address. The queen of the exposition will also be crowned during the opening exercises, which will be held at Memorial Tower on Friday at 12 noon.

The queen will reign over the entire exposition, including the Saint Patrick's Dance in Frank Thompson Gymnasium on Saturday night.

The College's ROTC Regiment, composed of 1,200 cadets, will march in a full-dress parade at the grand opening. There will also be a concert on the carillon bells of Memorial Tower.

Exhibition Opens Friday

The exhibition halls will be open from 12 noon Friday until 10 o'clock Friday night. The doors will open again Saturday morning at 10 o'clock and will remain open until Saturday afternoon at 5 o'clock. The Court of Saint Patrick will convene in Frank Thompson Gymnasium Saturday night at 8:30 and will be followed by the dance.

All of the departments in the School of Engineering have prepared exhibits and demonstrations for the giant show.

Officers of the Engineers Exposition are headed by W. C. (Bill) English of Winston-Salem, president of the Engineers' Council and exposition chairman.

(Continued on Page 3)

Welcome NCCPA Delegates!!!

Mu Beta Psi Contest Winners Announced

The finals of the Mu Beta Psi Campus wide singing contest were held in conjunction with the Blue Key Stunt night finals last Friday night.

Two contestant groups, one dormitory and one fraternity, selected by preliminary contests earlier in the week, competed for final honors during the program.

Syme dormitory, under the direction of Tommy Wood, won the \$15.00 first prize. The group presented the Alma Mater, the "fight" song, and a minstrel show novelty number.

Sigma phi Epsilon, directed by Grover McNair sang the Alma Mater, "Shout State", and a railroad novelty number to win second prize of \$10.00.

Dr. Lillian Wallace of Meredith and Dr. Lodwick Hartley acted as judges.

The contest, which got underway last term, saw a steady growth of interest throughout the campus. Several dormitory and fraternity groups turned out for preliminary contests and proved that State students are not as lacking in originality coupled with musical and dramatic ability as most people think.

Mu Beta Psi hopes to make the contest an annual affair, with larger prizes and increasing interest each year.

Army Inspects Local ROTC Unit

Representatives of the U. S. Department of the Army and the Department of the Air Force yesterday began a two-day inspection of the ROTC Regiment.

The inspection board, headed by Col. Erwin P. Beyer, field artillery, is conducting oral and written examinations of classroom subjects and is observing a wide range of practical demonstrations on modern warfare.

Approximately 1,200 cadets, composing the college regiment, marched in a full-dress parade for the inspecting officers. Later a drill field inspection was held.

A formal report of the board's findings will be submitted later to the Army and Air Force Departments. The regiment received a rating of "superior" last year.

Other members of the inspection board are:

Lt. Colonel Silas W. Hosea, infantry; Major Edward T. Baker, infantry; Lt. Col. John J. Haley, corps of engineers; Lt. Col. J. E. Holiday, ordnance department; Lt. Col. K. M. Ekman, quartermaster corps; Lt. Col. H. A. Vest, signal corps; and Col. James B. Buck, senior Air Force officer.

State College's Department of Military Science and Tactics is headed by Col. Samuel A. Gibson. The student regimental leader is Cadet Col. E. Preston Andrews of Charlotte.

Rigney Appointed Statistics Head

Appointment of Prof. J. A. Rigney, a member of the State College faculty since 1938, as head of the College's Department of Experimental Statistics was announced yesterday by Dr. James H. Hilton, dean of the College's School of Agriculture and and director of the Agricultural Experiment Station.

Professor Rigney, a native of New Mexico, will direct both the academic training and the research work of the department. He has already assumed his duties.

He succeeded Prof. Gertrude M. Cox, who resigned to devote her full-time services as director of the Consolidated University's Institute of Statistics, with headquarters at State College.

The College's Department of Experimental Statistics is one of two such divisions in the United States. The other department is located at Iowa State College.

In his new capacity, Professor Rigney will supervise a faculty of 16 teachers and research specialists and a staff of graduate assistants and 30 clerical workers.

Professor Rigney was educated at New Mexico State College, where he received his B.S. degree in agronomy in 1934; and at Iowa State College, where he earned his M.S. degree in plant breeding in 1935. He has also completed most of his work for a doctor of philosophy degree at Iowa State.

Before joining the N. C. State Agronomy Department faculty in September, 1938, Professor Rigney was a teacher and research worker in West Virginia University's Agronomy Department for two and one-half years. He began teaching experimental statistics at State College in 1941 and has been in that department since that date.

His principal research activity has been centered around the sampling of plant materials for chem-

ical analysis, sampling procedures in soil testing and field plot techniques, with major emphasis on optimum plot sizes in field tests.

He has also experimented with soybeans and was responsible for making the selection of the new Roanoke variety, which is famed for its high production and its non-shattering quality and for its high oil content.

Professor Rigney's professional and honorary affiliations include membership in the Society of the Sigma Xi, Alpha Zeta, the American Society of Agronomy, and the Biometrics Section of the American Statistical Association. He is a member of the Pullen Memorial Baptist Church.

SPE's, Syme Win Blue Key Stunt Night

Displaying a remarkable ability to roll 'em in the aisles, Sigma Phi Epsilon and Syme Dormitory walked off with first place in the finals of Blue Key Stunt Nite last Friday.

The SPE's came through with a skit that had actors on stage suiting their actions to a narrator's dialogue. The results were nothing short of hilarious. Syme won with a real live minstrel show that was reminiscent of the day of Stephen Foster. What with interlocutor, end men and costumed players, the Syme minstrel was strictly authentic.

Honorable mention went to Gold dormitory and Bill Hoffman in particular for his single-handed rendition of a soap opera, an Air Force movie, and numerous other good old American institutions. Another production worthy of merit was the audience participation show on the "Hellzapoppin" theme by the Delta Sigs.

In general, the stunts were all rather good. Syme won a plaque

Plan For Music Week Observance

All members of the various musical organizations are reminded to observe the following rehearsal schedule next week in preparation for special performances during National Music Week (May 1-8):

Glee Club rehearsals Monday, Tuesday and Wednesday 7:00 to 8:00 p.m. in Pullen Hall during next two weeks; performances Thursday, May 5, 1:30 to 1:50 p.m., American Legion Club; Saturday night, May 7, at Peace College (tentative); Sunday afternoon, May 8, Pullen Hall, concert by Glee Club and Orchestra.

Little Symphony Orchestra rehearsal Tuesday night at 8:00 p.m. in Pullen Hall; performance Monday night, May 2, at Needham Broughton High School for Parent-Teachers' Club and students, and a joint concert with the Glee Club in Pullen Hall Sunday afternoon, May 8.

Band—All bandmen not having conflicting classes Monday afternoon, please be on hand for rehearsal 4:00 to 6:00 p.m. Monday as well as Thursday night at 7:00 p.m.

For their efforts, while the SPE's took home a cup as a symbol of victory. Both prizes were given by the Raleigh Merchants Bureau.

Attention!

All Agricultural Education students and former F.F.A. members! The collegiate chapter of F.F.A. at this college needs your help to have a GOOD PICNIC this term. Come to the F.F.A. meeting Thursday, April 28 in 114 Tompkins Hall for further details.

(at which ALL members are expected) in preparation for the concert at Memorial Tower Sunday afternoon, May 1.

PLANNING ANY WEEK- ENDS AT THE BEACH THIS SPRING?

Wrightsville Beach has become a popular week-end resort for college students and we offer ideal accommodations for house parties or any size group. We have 16 apartments and a house with 12 bedrooms so can offer housekeeping facilities or hotel accommodations.

Vetville Elects New Government

The Vetville citizenry went to the polls at the West Campus "Y" Friday, April 8, to elect the following list of officers—

Mayor: E. D. Stevens
Sec. Treas.: Avis Andrews
Pub. Director: Janet Clark
Rec. Director: Mary Westbrook
Athletic Director: Harry McLeod
Fire Marshall: Mickey Gould.
The new Mayor has outlined a

progressive program for possible enactment provided support is forthcoming from the "Let George do it" contingent that is in such overwhelming preponderance in Vetville.

Mayor Stevens will be aided by the following aldermen; listed by wards: Odell Sprinkle (1), Bob Lee (2), Jim Caffrey (3), Bill Muddock (4), Bill Ballard (5), W. S. Burnette (6), Bill Musser (7), and Bill Haas (8).

Sixteen Join AICHE; Members Attend Meet

Sixteen students were initiated into the AICHE chapter at a meeting held April 19. Those who were made members are:

Richard L. Hinson, A. J. L. Moritz; John K. Allen, W. R. Cathcart; Hal Edmisten; Arthur E. Gantt, C. M. Ashley, Charles D. Blake, Lyle W. Wade, Grady Dulin, John F. Hunter, Jr., Edward Dzur, Jack M. Davis, Cliff Foster, Dan W. Bowen, and John C. Umberger.

Five students and one faculty member attended the Southern Regional conference of the American Institute of Chemical Engineers Student Chapters. The conference was held April 10-13 at Auburn Polytechnic Institute, Auburn, Alabama.

The State College delegation consisted of Robert Becker, H. S. Welch, Gordon O. Smith, Alan McGee, Charles A. Plank, and Professor J. F. Seely. Robert Becker was elected vice-president of the conference for the coming year.

Thirteen schools were represented and 14 student papers were read at the conference. A first place was awarded to C. A. Plank for his paper, "Pressure Drop Through Perforated Plates." H. S. Welch was awarded second place for his paper, "Study of a Refractory Petroleum Emulsion."

Record Concerts

The regular Friday night record concert will be held tonight in the Conference Room of the YMCA. The program includes Offenbach's Overture to Orpheus in Hades, Franck's Symphony in D Minor and the Grand Canyon Suite of Ferde Grofe.

Wednesday Deadline For Tucker Tickets

The deadline for tickets to the Tucker Dormitory party will be next Wednesday, April 27, according to Garland Jobe, social chairman in charge of arrangements, and George Hughes, who is in charge of the publicity details.

The party is to be the first annual "Tucker Dormitory Party" and will be held on April 30, Saturday. Around 200 girls from Woman's College in Greensboro have already signed up to attend and more can be signed if more dates are wanted.

The party will consist of a weiner roast at 6:30 in Pullen Park followed by dancing and roller skating at the Park Pavilion from 8 o'clock until . . .

Tickets may be obtained by the students living in Tucker from their representatives on each floor upon payment of their \$1.00 dues.

State College.

The next regular meeting of the organization will be held at 7 P.M. May 4 in room 15 Holladay hall. At that time plans for a forthcoming picnic will be made.

Cadet Officers Elect Leaders

Members of the Cadet Officers' Association elected organization officers for the coming year at last week's meeting.

Gil Newton of Yonkers, N. Y., was elected president of the association, succeeding Harper Thayer. Taking over the vice-presidency is Sanford Gluck of New York, N. Y., relieving Bill Campbell of Winston-Salem. James Connor of Covington, Tenn., replaced Bill Wyatt as treasurer of the organization. Don Anderson of Kenosha, Wisc., was elected to the office of secretary which had been vacated by Conner.

The offices of secretary and sergeant-at-arms will be elected in the fall by incoming members from third-year military students. At that time Anderson will become corresponding secretary. The Association is open to all students in the advanced course ROTC at the college.

Members of the Military Ball committee announced the successful completion of the dance. Vice-president Gluck stated that next year's Military Ball plans to be the best held in the history of the event at

Exposition

(Continued from Page 1)

The executive committee is composed of Chairman English; Lewis M. Allen, Raleigh; James M. Yorke, Jr., Fayetteville; Hugh J. Horne, Roanoke Rapids; O. T. Paul, Washington, N. C.; Maurice W. Lamb, Wilmington, Del.; and Charles A. Plank, Asheville.

Henry A. Corriher, Jr., of Hendersonville is chairman of the high school committee, and Robert T. Lloyd of Asheville is chairman of the publicity committee.

Departmental chairmen are Jonathan I. Thigpen, Avon Park, Fla., chemical engineering; George L. White, Fayetteville, electrical engineering; W. S. Griffith, High Point, mechanical engineering; Harvey O. Hook, Elon College, electrical engineering; Earl W. Anderson, Tarboro, aeronautical engineering; Arthur E. Lucier, New York City, ceramic engineering; Jean G. Sur-

ratt, Charlotte, architectural engineering; Milton Doyle, Lakewood, N. J., industrial engineering; W. H. Powell, Oxford, geological engineering; Robert A. Shaw, Leaksville, civil engineering; and John R. Deal, Newton, general engineering.

Chairman English today urged all interested North Carolinians to attend the exposition and see the many scientific advancements to be shown.

NCCPA

The Last Round-Up . . .

With this edition of THE TECHNICIAN, the editor does as is customary with all college editors about this time—he writes his last editorial. It is a happy time for the editor, for with this issue he gives up his typewriter to the incoming editor, writes his last editorial, and drops back into purely advisory capacity for the remaining two months of school. That life of the average student with plenty of time for everything is near at hand. No more writing stories during the few hours of sleep; no more dreams of haunting hands coming after him because of errors; no more frantic episodes to get stories in and the paper out on time.

Before finishing this editorial, we would like to put forth a few ideas about the publications in general. It has long been known that State College has more student publications than any other college in the state—yet, we had no form of journalism course until a little over a year ago. Of course, some twenty years ago or more a journalism degree could be earned here, but that long ago passed out of the picture. The journalism classes have helped a lot in supplying short stories of interest to the paper. It has helped the other publications to a lesser degree. As we see it, there is a need for journalism on a much larger scale in our English Department. Quite frequently we are told that one main trouble with today's graduates are that they do not know how to express themselves. We would put forth the argument that a student would better learn how to express himself in articles which are of interest to him, whether research, discussion, or news writing, than by some of the methods now used. There is a need for a specialist in journalism, possibly a Ph.D., who can work with each individual publication on make-up of magazine as well as newspaper.

In addition to expanded instruction, there is a need for some way to earn credit on the publications for those positions which are so time consuming. Along with that is a need of credit because publication work does not have a glamour side to it; it is work, period. Therefore, something must be done to attract the capable students. Perhaps extra quality points would do it, or credit for an English course. The publications are suffering from being understaffed.

There was a decided increase this year in the way that many organizations selected good men for reporters to submit any news from their organizations. As a result, THE TECHNICIAN coverage has been a little better. And now is as good a time as any to urge the incoming presidents of the campus organizations to appoint a reporter at his first meeting.

State College is too big for a weekly paper. Nothing less than a semi-weekly should be published. It would mean about twenty-five cents increase in publications fee, but in return there would be fresher news, and a better service to the student body. If the above mentioned needs were fulfilled there would be a paper more deserving of the student body here at State. Under present conditions an editor could put out two good papers a week—by withdrawing from school, or electing co-editors, and by obtaining a staff twice the size of the present staff, which is nearly impossible.

During the past few years, the paper has been steadily improving, with each editor profiting from the mistakes of the editor gone before. We have heard many compliments which help ease the criticisms. We have failed in a good many ways, all of which the new

editor can avoid during his year. The staff has given very good support, without which the editor would have wound up about fifteen years older, his energy spent from over-work.

So now we turn over the position to a new editor, wish him the best of luck, and say thanks to the best staff ever to work on THE TECHNICIAN.

Your ex-editor, AVERY BROCK.

According to *Hoyle*

What Wataugan? . . .

A new editor has just been elected for the Wataugan, and the future of that magazine rests squarely on his shoulders, because next year it will probably either come back to life or pass from the campus scene entirely. Ted Williamson will preside at either a resurrection or a funeral.

The Wataugan is supposed to be State's "humor magazine", and it sometimes is, but there is nothing at all humorous about the way the issues have NOT been appearing. The magazine is scheduled to be published six times during the school year, that is, two issues a term. So far this year we have had a total of two issues, when we should have had four, with another one well on the way. If the magazine were published regularly as it is supposed to be, the expense connected with it would be entirely justified, but there is no point in throwing student funds away on a publication which exists in name only.

Elsewhere on this page is an editorial describing the plight of our publications here at State, and we had thought all year that the Wataugan was just woefully understaffed like the rest of us. But when we saw the crew of men at the Publications Banquet who lined up to receive publications keys for working on the Wataugan, we knew our sympathies had been misplaced. There were enough of them there that night to almost put out a weekly! Admittedly publications work is time-consuming, but so are all other worthwhile activities here; from athletics on down. Students who want to get a lot out of college will put a lot into it; they will make time for extra-curriculars.

We believe that the Publications Board owes it to the students to take some action on the Wataugan situation, and we recommend the following: First, hold up the salary of the editor and business manager whenever the magazine falls one issue behind schedule, and second, put the magazine on probation for two full terms next year to give the new staff a chance to show what they can do, and if there has been no improvement by that time, suspend publication entirely.

That may sound harsh, but the performance of the past two years deserves no better. If anyone can return the Wataugan to the position it once occupied, we believe Williamson is the man, and we wish him loads of luck.

Bouquets . . .

Two very fine dances were held this weekend and congratulations are in order to those responsible for their success. President of the junior class Emmett Bringle and all his committeemen deserve much praise for a very fine Junior-Senior, and the PIKA's have our thanks for putting on their annual ball in such fine style. Good dances are the heart of a good collegiate social activities program, and their sponsors should always rest assured that their work is appreciated.

"Make Mine Gabardine"

by

Campus Togs

What makes Gabardine top choice with so many young men year in and year out? These new spring gabardines by Campus Togs give you all the answers. It's the fine, smooth fabric. It's their felled edges and four patch pockets. It's the attractive pastel shades—silver grey, rust, greens, sand, blues, browns. It's the young lines, sleek tailoring. Above all, it's their versatility and wearability. And they're offered at a price which means a man can be well dressed for practically all occasions without buckling his clothes budget.

Regional ASME Meet Held At Birmingham

Fifteen representatives from the State College Student Branch of the American Society of Mechanical Engineers attended a Regional Convention of ASME student branches in Birmingham, Ala., on April 4 and 5. The delegation included fourteen students and Prof. N. W. Connor, honorary chairman of the State College Branch. The delegates left Raleigh on Saturday, and returned the following Wednesday.

Headquarters for the convention were at Birmingham's Thomas Jefferson Hotel. Registration of delegates took place Sunday evening and the convention got into full swing at 9 o'clock Monday morning. Talks on engineering subjects were presented by one student from each of the thirteen colleges in this region which have ASME student branches. The talks could be on any subject and could be illustrated with slides, pictures, and diagrams. They were judged by three prominent practicing engineers who considered presentation as well as subject matter in deciding the order of the winners. The winners of the competition were rewarded for their accomplishments at a banquet on Monday evening. Brady W. Bowers, a State College Senior, won fourth place for his excellent talk, "Photoelasticity, an Important Design Tool."

The feature speaker of the even-

ing was Dr. J. L. Brakefield, manager of New Development and Industrial Department, Birmingham Chamber of Commerce, who spoke on "The New South." An informal dance followed the banquet.

Inspection trips to the Tennessee Coal, Iron, and Railroad Company's Fairfield Steel Plant, and to plants of Birmingham's Cast Iron Pressure Pipe Manufacturers occupied Tuesday morning. Delegates were conducted on extensive tours of these industrial plants. A luncheon, which followed the inspection trips, closed the activities of the convention. At this luncheon it was disclosed that the 1950 convention will be held in Greenville, S. C., and will be jointly sponsored by Clemson Agricultural College and the Greenville Section of ASME.

The following men attended from State College; Herman E. Seibel, Steve Flannagan, Robert T. Lloyd, Oliver G. Barnes, Grady W. Bowers, J. E. Smith, Thomas H. Benton, T. S. Tucker, John Glenn, John G. Moffitt, William B. Thompson, Walter Clark, Max J. Fowler, C. O. Bransford, and Prof. Connor.

Disc-A 'n' Data

BY BOB FREEMAN

"Music Appreciation" is a term that has been kicked around a good deal in the last few years, and it has suffered considerably in the process. The words are apt to remind one of a class back in high school where the teacher played classical records and made the students memorize hundreds of miscellaneous facts as well as idiotic rhymes intended to suggest symphonic themes. It seems strange that in spite of such unsympathetic teaching methods, an ever-increasing number of people are turning to "good" music with aroused curiosity and interest.

In an effort to help satisfy this curiosity and interest—especially as it is exhibited by people in and around the State College campus—several students and instructors have taken it upon themselves to present informal, yet informative sessions of recorded classical music. These programs, which are put on every Friday night in the Con-

ference Room at the Y, are open to anyone who likes music, wants to learn to like music, or just wonders what it's all about.

The wonderful part about these programs, aside from the music itself, is the informality with which they are conducted. The Conference Room has an abundance of comfortable chairs, and there are no restrictions on smoking. The lights are usually turned out, as further aid to relaxation and listening enjoyment. Interesting commentaries on the selections are given by Gray Osborn and Bert Jessup, juniors in the School of Design, both of whom have well-founded backgrounds in music. The programs, which are planned by Bert Sapin of the Social Studies Department, are well-balanced so that all segments of the audience can find items of interest.

When the concerts were first started (in February), the main suppliers of records were interested collectors—chiefly Osborn and the Rev. A. G. Courtney. But recently,

Jimmy Thiem (Thiem's Record Shop) has offered to supply any album on his shelves for the program, which should enable the programs to offer unlimited variety.

The sessions are by no means restricted to State students and faculty members. Citizens of Raleigh, and students at Meredith, Peace, and St. Mary's have all been invited. The originators as well as the sponsors (Dean Anderson of the Basic Division and Dr. Gullette of the Social Studies Department) of this project deserve to be commended highly.

Don't forget: Every Friday night in the Y Conference Room from 7:30 to 9:00. We'll be seeing you there!

Personal

I would like to take this opportunity to thank those who supported me in the campus primary for the office of Student representative to the Athletic Council from the Senior Class.

W. D. MURDOCK.

Illick To Deliver Public Lecture

Friday, April 22, at 8:00 P.M. in Withers Lecture Hall, Dr. Joseph S. Illick of the College of Forestry at Syracuse University, will give a lecture on: "Future Education in Terms of the President's Commission Report on Higher Education."

Dr. Illick is at present Dean of the New York State College of Forestry at Syracuse University. He received his education at Lafayette College, Biltmore Forestry School, the University of Chicago, and the University of Munich. He has held many positions of prominence in connection with his chosen career, including that of the State Forester of Pennsylvania. He has written numerous bulletins and pamphlets on forestry, several hundred articles on trees and forests, and several books covering a wide range of forestry topics with special emphasis on forest administration. He is a fellow of the Society of American Foresters and has membership on the Pack Forestry Foundation Board, the New York State Forest Practice Board, and numerous other similar organizations.

He comes to the campus under the sponsorship of Xi Sigma Pi, Honorary Forestry Fraternity. Students, faculty and public are cordially invited to attend. There are no admission charges.

Three New Engineering Curricula To Be Offered

In cooperation with three fields of industrial activity in the State, the School of Engineering at N. C. State College will offer three new curricula next September to qualified students at the freshman and sophomore level, Dean J. H. Lampe announced here recently.

Furniture manufacturing, building construction, and plumbing and heating contracting organizations have cited the need for this type of training and have endorsed the programs to be offered.

The new curricula, Dean Lampe said, will lead to the degree of Bachelor of Science in Furniture Manufacturing and Management, Construction, and Heating and Air Conditioning.

"Students receiving these degrees," Dean Lampe stated, "will fulfill the great need in North Carolina for men trained with a background of engineering, but yet not requiring the intensive engineering education given to those who are currently enrolled in the School of Engineering."

Under the new program, students will study the regular freshman engineering courses during the first year, but they will be able to transfer to the specialized courses of their choice during their sophomore year.

The furniture manufacturing and management training is to be administered by the College's Industrial Engineering Department. Its purpose is to prepare graduates for both technical and executive positions in the furniture industry.

The curriculum is building construction, to be administered by the Civil Engineering Department, is designed to prepare students for work in the actual construction of modern buildings and to lay foundations for future work as owners, managers, or executives in the construction industry.

The Mechanical Engineering Department will offer the curriculum in heating and air conditioning. The objective of the program is to train young men in this specialized field and prepare them to take positions in the industry in the design, construction, and operation of heating, ventilating, and air conditioning systems as well as the management of such industries. They will also get training as sales representatives of companies manufacturing equipment for the trade.

Discussing the furniture manufacturing and management courses, Prof. D. E. Henderson, head of the Industrial Engineering Department, said:

"We went into the furniture program on the basis of trying to fulfill the need of the North Carolina furniture industry for technically trained graduates."

"The Southern Furniture Manufacturers Association, under the presidency of Henry Foscoe, worked right along with us. This association formed a separate corporation called the Furniture Foundation, Inc., which subscribed finan-

cial aid to help in operating the program."

According to Professor Henderson, plans are nearly completed for the announcement in a short time of the name of the man who has been selected to fill the James T. Ryan Professorship. This professorship was established by the Furniture Foundation in honor of James T. Ryan, executive director of the Southern Furniture Manufacturers Association. The man chosen for this professorship will head the new program.

Continuing his remarks, Henderson stated:

"I want to emphasize two things about this program. First of all, the program will not attempt to turn out graduates skilled in machine operations. That is not our intent at all. We want to turn our graduates who have a background in wood-working equipment as well as the physical and mechanical properties of wood and wood assemblies and who have an overall grasp of manufacturing and management problems in the furniture industry."

"The second point is that we do not look on the curricula as only an instructional program. We hope, in addition, to be of some practical help to the furniture manufacturing industry in the way of short courses and conferences."

"We certainly owe thanks to the furniture group for their great help and assistance. It was largely through the help of Henry Foscoe and this group that this program was made possible."

Prof. C. R. Bramer, acting head of the College's Civil Engineering Department, said that the building construction curriculum is "set up as a program of study that will integrate engineering, administration, job management, labor relations, and construction methods and practice into a single unified curriculum to serve the State's construction industry."

Both the national organization and the Carolina Branch of Associated General Contractors have shown "a great deal of interest in this program and have extended their help in discussing the course requirements and other details of the work," Bramer stated.

"The construction program" Bramer said, "is aimed at a general preparation for a career in any phase of construction. We hope to

prepare for highway, bridge, waterway, and sewage construction. We must keep the distinction in mind, however, that the curriculum will give a Bachelor of Science degree in construction. It is not professional engineering."

"Construction is a big field that has been neglected by the colleges all over the country. The A.G.C. has been carrying on a tremendous campaign for several years to get the colleges to recognize construction as a big enough industry to warrant courses of study. We are happy to be able to cooperate with the organization and appreciate the assistance it has given us to serve the construction industry of the State."

Explaining the heating and air conditioning curriculum, Prof. K. P. Hanson, head of the Mechanical Engineering Department, asserted that the program has three main objectives.

"The first," he stated, "is to educate the student technically so that he can lay out and design heating and air conditioning systems."

"The second objective is to train the students in the fundamental principles of business operations and management as applied to this field, so that he may operate a heating and air conditioning firm either for himself or for others."

"Our third objective is to train students in the fundamental of salesmanship so that he may enter a sales position in heating and air conditioning equipment."

Professor Hanson said that the program was laid out to train men specifically in these fields in order "that we can reach these three objectives and at the same time broaden their education through studies in the humanities."

Broadcast

The Meredith College choir will broadcast its last program in the current series at 10:30 p.m. next Wednesday over Radio Station WPTF.

Pi Tau Sigma Honors Two Profs in Magazine

Two members of the Mechanical Engineering Department were honored recently by the national mechanical engineering fraternity, Pi Tau Sigma. Professor Karl P. Hanson, head of the M.E. department, and Walter E. Selkinghaus, associate professor of mechanical engineering, were made honorary members of Pi Tau Sigma and recognized in the national fraternity magazine, *The Condenser*, in its April issue.

Prof. Hanson was born in Wisconsin on June 2, 1905. He was graduated from the University of Wisconsin with a BSME in 1928. Later, he did further work at Johns Hopkins University and Columbia University and, in 1946, received his MME from the University of Michigan.

Upon graduation from the University of Wisconsin, he was a consulting engineer in heating and ventilating. He then went to Johns Hopkins University as an instructor and later became an Assistant Professor there. His summer work included special jobs with the Pennsylvania Water and Power Company and with Consolidated Gas, Electric Light, and Power Company. He then transferred to the University of Connecticut as an Associate Professor, later becoming a full professor and head of the Mechanical Engineering Department there. In 1947 he came to North Carolina State College as Professor and head of the Mechanical Engineering Department.

Prof. Hanson is a member of ASME, SAE, ASEE, and the Society of Sigma Xi. He holds a professional license in Mechanical Engineering in Maryland.

Professor Hanson was initiated as an honorary member of the Pi Alpha Chapter at State College in

October, 1947.

Prof. Selkinghaus was born in New York City on September 11, 1911. He was graduated from Newark College of Engineering with a BSME in 1933 and received his MME in 1940 from North Carolina State College.

His first job was that of Assistant Operating Engineering at Memorial Hospital in New York City. From there he joined the Crucible Steel Corporation as a metallurgist and then served as Test Engineer at Wright Aeronautical Corporation. During the latter part of the war, he was Project Engineer in charge of pure research for the

Titeflex Metal Hose Company.

Professor Selkinghaus has also served as an Instructor in the Mechanical Engineering Department at the Newark College of Engineering and at North Carolina State College where he helped set up the war time Diesel School. Since his return to North Carolina he has been made an Associate Professor of Mechanical Engineering. His work in remodeling and bringing the Mechanical Engineering Laboratory at North Carolina State College up to date has been outstanding.

He is a member of ASME and AKPI social fraternity. His professional engineering licenses include those for New York and New Jersey. Prof. Selkinghaus was initiated as an honorary member of the Pi Alpha Chapter here in November, 1948.

I.E. Professor Has Article Published

"Today colleges and universities are going all out to extend their 'classrooms' from the campus into the economic, industrial and cultural life of their various states and the nation." Prof. D. E. Henderson, head of the Department of Industrial Engineering, stated in an article published in the April issue of the *Furniture South* magazine.

In the article, entitled "Furniture Training in the College," Prof. Henderson asserted that "the Engineering School at N. C. State College is hard at work and has met with some success in developing new programs for the special needs of its students, both on-campus and off-campus."

The article emphasizes the Fur-

niture Manufacturing and Management program, to be available in September to students at the freshman and sophomore level. The department head pointed out that the development of this new program is a good example of the cooperation possible between industry and education.

The purpose of the Furniture Manufacturing and Management program, according to Prof. Henderson, is to "prepare graduates for technical positions in industry . . . and to emphasize the application of engineering to furniture manufacturing."

Prof. Henderson points out that the program will be boosted by a modern shop-laboratory now in the making. He asserts that in such a laboratory, practice and theory can be combined.

Armed Services Accepts Three Seniors

Three Advanced Course ROTC students who have been designated as Distinguished Military Students and who will complete ROTC courses upon graduation from college in June 1949 have been accepted as second Lieutenants in the Regular Armed Services, according to notice just received from Washington, D. C. The three students are: Charles Edmund McCrary, 1907 Glenwood Avenue, Raleigh, N. C.; Benton Kirk Partin, Route 2, Chadbourn, N. C.; and Ralph Kendall Younger, 702 Wicker Street, Burlington, N.C. Mr. McCrary will be commissioned a second Lieutenant of Infantry, U. S. Army, Mr. Partin a second Lieutenant of Air Forces, and Mr. Younger a second Lieutenant of the Signal Corps, U. S. Army. Commissions will be effective upon graduation of students from college in June.

Let's Take A Preview Trip Through The 1949 Engineers' Exposition

Have you ever seen a ball bearing bounce numerous times and finally go through a hole only a fraction larger than the diameter of the ball itself? If you haven't, this one of the many exhibits you can see at the 1949 Engineers' Exposition. This display will be exhibited in Page Hall as part of the mechanical engineering exposition.

The Exposition will open at noon, Friday, April 29, with the crowning ceremonies of the Queen of the Engineers' Exposition and an address by Dr. Clyde A. Erwin. A jet propulsion motor will cut the ribbon surrounding the Exposition entrance, and the Exposition will be officially opened.

Let me take you on a mythical Cook's tour of the exhibits. We will only stop for the main attraction at each department—but please remember, the things mentioned here are just the appetizers.

The first stop on our tour will be the Geological Engineers' exhibit. Here you will see a prehistoric landscape with foliage and animals. There will also be fossils indexed according to the various geologic periods on display.

Have you ever seen liquid air? Well, on our next stop, the Chemical Engineering Department will give you demonstrations of liquid air. This air is the air in your room which has been compressed and cooled to a temperature so cold that it liquifies and looks and behaves the same as water. The temperature to which it must be cooled is colder than 400 degrees below zero. At this temperature many strange things happen to materials when they are treated and kept in liquid air. Ordinary solder which you can buy at any hardware store can be used to make a very strong rigid spring. Mercury, which is used in the common thermometers, can be used to make hammer heads. Iron if immersed in liquid air, can be made to burn, and likewise the cigarettes which you smoke can be used as a flare.

This is interesting, but we had better be moving on to the next stop, which is the Industrial Engineers' exhibit. Here we see the production of a motorcycle traced through all its stages. The psychological approach for hiring employees; the process of planning the motorcycle; the production control; the safety devices; and the final inspection of the motorcycle will all be demonstrated by the students in this department. We will then pick up some refreshments in their electric kitchen and move on to the Ceramic Department.

At this exhibit, we see casting in action. Prepared slips will be poured into plaster molds of vases, mugs, ash trays, etc. The castings will be removed from the molds a few minutes after excess slip is poured out of each. A standing exhibit representing the steps that are taken to produce the end product will be on display.

Our next visit will be at the supersonic wind tunnel in the Aeronautical Engineering Department. This tunnel was constructed by the students of this department to study the action of air at supersonic speeds as it passes over an air

foil. By the use of an arc lamp and two lenses, you can see the shock waves produced. The supersonic tunnel will give speeds up to twice that of sound.

We go upstairs in the same building and see the miniature gas and steam engines, which are part of the Mechanical Engineers' exhibit. This display will include the drawings, the patterns, the rough castings, and the finished product. These engines were made by students of this department, and they will demonstrate all the models. Instruments will be available to test the speed of the engines.

Across the street, we will see how the Civil Engineering students are trying to solve one of the traffic hazards near Raleigh. The traffic tie-up at Western Boulevard and U. S. Highway No. 1 is being solved by a dual-lane two-level interchange. The scale models of present intersection and the proposed interchange will be of interest to all people who travel this road.

Our visit to the Electrical Engineering department is next. Here we will see the exhibit of parallel operation of alternators which will show the method used by your power company to supply you with electric power. There will be two machines operating either singly or together to feed a common load so that the load receives power regardless of which one of the machines is running. The load will be transferred from one machine to another with no interruption to service.

Our next stop—well, you've seen diesel engines pulling long lines of railroad box cars weighing tons, driving the crack express and passenger trains, and rolling huge trucks along the highways. Now is your opportunity to get a close

look at these engines and have their operation explained to you. The students of the Diesel School will be glad to give you this information.

Our last stop will be at the local radio station—WVWP. During the Exposition, WVWP will show how remote broadcasts are put "on the Air" as well as many other operations of campus broadcast stations. The studios of WVWP are 201 and 202 Owen Hall.

Now you've had the appetizer—hope to see you at the Exposition either Friday or Saturday and at the Dance of Saint Patrick Saturday night.

Enrollment Still Contains Many Vets

According to the latest release from Registrar W. L. Mayer, there is a total of 4,913 students enrolled for the spring term. Breakdown of the total shows a total of 4,862 men and 51 women. Included in these totals are 3,240 veterans, 4 auditors, 17 special (non classified), 14 graduates (non classified), and 6 others non classified.

Included in the release were totals for all three terms of different individuals who have registered at any time this academic year. The totals are, first, all three terms, and second, the spring term: Agriculture 1,179 and 1005; Design 354 and 239; Education 426 and 373; Engineering 2,638 and 2,343; and Textiles 984 and 912.

During the year a total of 4,210 former students returned, 945 new Freshmen entered and 510 students transferred to State College.

Changes Made In Skirt Commencement

There have been a few changes made in the plans for the petticoat commencement that is being sponsored by the Campus Government.

In view of the fact that there will be a large graduating class and since the former two day ceremony has been consolidated into one day, time will not permit the wives to personally receive the diploma.

A very satisfactory arrangement has been made whereby the diploma for the wife will be placed in the tube along with her husband's degree. The tube, with both awards, will be presented to the husband.

Plans are being made to make it possible for the wives of the graduating seniors to be seated in

an area adjacent to the graduating class.

The presentation of the diplomas by the Campus Government as mentioned above will not cause the degree presentation to be drawn out for a greater length of time than necessary. It is hoped that the plan meets with the approval of all concerned.

\$700 DOWN buys 27 foot Zimmer trailer and added complete, standard bathroom. Ideal location for State College student—just off Hillsboro Street. I will finance with no interest. See anytime G-2 Trailwood. Immediate occupancy.

HOME FOR SALE—101 Danallen Dr. behind Textile Bldg. For occupancy this June. Living room, dining room, 2 bedrooms, bath with shower, kitchen. Automatic hot water. Furnished or unfurnished. Telephone 9627.

Sporting Around

By HAAS

This will probably close out my column on the sports page. With just a word of thanks I leave the sports staff and move into the next room to the Editor-in-Chief's desk. I wish to express my sincerest appreciation to everyone of you who supported me for the new job. I have enjoyed handling your sports page, and I know I will enjoy heading your TECHNICIAN. Thanks again.

If we hadn't been hooking rides out to old Devereux Meadow since 1946 to see the Wolfpack base-knockers do their stuff, we wouldn't have recognized the place as State's home grounds for that State-Wake Forest affair last Monday.

It is a pretty big smear on the followers of the team when there are more people standing for that "7th Inning Stretch" at the top half of the frame than there are in the bottom half.

We happened to be standing at the gate passing out campaign propaganda when the crowds were coming in and were amazed at the number of Wake Forest students that flowed through the turnstile.

Evidently the folks that run that so-called strict Baptist school realized that the annual Easter Monday game with State College was worth letting the students out of classes to see.

It's too bad that the administration couldn't break down once a year and make a decent, friendly administration-student gesture. We don't ask for an afternoon off every time there is a ball game, but just once on Easter Monday when we have a contest with the toughest team in the league.

Team Greatly Improved

Despite the fact that there were twice as many Wake Forest students on hand as there were Statemen, the Pack diamond crew really went to work on the Deacons and gave the powerful Demons a real fight down to the last out in the ninth.

General opinion among the sports rehashers around the campus is that the game Monday was the best State has played in many a season.

Both teams were displaying professional talent in the fielding department, and Ernie Johnson and hook-armed Moe Bauer turned in splendid pitching assignments.

Ironically enough, Bauer was yanked in the ninth, and Johnson was hit for two very solid round-trippers with two out in the ninth to wind up what had been a tight pitcher's duel all the way.

It was really heart-warming to look over at the score board and see all those goose eggs up there when we had expected to see State lose by at least four tallies.

McComas and Fowler Backbone of Team

Jack McComas has moved around from left field to third to short in the course of the season and has played good ball at all three positions, to say nothing of his clubbing the horsehide consistently.

Jack gave the much-publicized Hoch of Wake Forest an even-money race for top honors in the short stop position last Monday. McComas made several very difficult catches and recoveries for the Pack and kept the Deac hurlers sweating when he came to bat. The Deacs elected to pass Mac all afternoon until the last of the ninth when he socked away a long fly to center.

Bill Fowler, converted this season to the backstop position, has been the mainstay of the faltering Pack. Bill's cool decisions and powerful arm have kept the Staters out of a lot of tight spots. His catching ability and his batting power make him a good team man.

With as much improvement from the rest of the club as there has been in Fowler and McComas, we will have the winning team that State should have.

A little more help in the tossing division is due from Bob Smith, a sophomore hurler who has already made a name with the Pack pitchers. Another man who has the potentialities of a good moundsman is Irvin Page, a J. V. graduate who almost didn't make it on the varsity this year, but one who should have been out there tossing 'em over from the beginning.

Soccer Game Saturday

Don't forget that exhibition Soccer game that the State team is putting on with Carolina in Chapel Hill tomorrow. Eric DeGroat is coaching the soccer team and is expecting a win over the Conference champs from Chapel Hill. The soccer team has been recently organized and accepted as an intercollegiate sport by the college.

The addition of soccer is another of the excellent moves made by Athletic Director Roy Clogston in the direction of top-notch athletics at N. C. State.

Gibson Leads State To Golf Win At Duke

Charlie Gibson came within one stroke of equalling the course record as he fired a four-under-par 66 today at Hope Valley to lead the State Wolfpack golfers to a 15 to 12 victory over Duke.

The triumph was the first ever scored by the Wolfpack over the Duke linksmen at their home course.

Gibson had to be good to win.

Matched against Duke's Art Wall, the State pace-setter dropped a 25-foot putt on the 18th to beat Wall, 1 up. Wall carded a 67.

Gibson and Robert Turnbull of State and Wall and Bailey Glenn of Duke posted identical best-ball scores of 64.

The summary:

Charlie Gibson (S) defeated Art Wall, 2 1-2; 1-2; Robert Turnbull (S) defeated Bailey Glenn, 2-1; best ball State 1 1-2, Duke 1 1-2.

Louis McLennan (D) halved with Morris Brackett, 1 1-2; 1-2; Frank Hanes (D) halved with Robert Isenhour, 1 1-2; 1 1-2; best ball Duke 1 1-2, State 1 1-2.

George Preisinger (S) defeated Taylor Reer, 2-1; Jim Brewer (D) defeated John Wood, 2-1; best ball Duke 11-2, State 1 1-2.

BY CHARLIE LEGRAND

Initiating a new era in State College athletics, the track squad held the first outdoor night track meet ever presented in these parts and probably the first in the history of the Southern Conference.

The meet, which was witnessed by over 700 spectators, was a huge success.

The Wolfpack, led by Joe Davis, who personally accounted for 13 points, easily turned back the South Carolina Gamecocks by a score of 86-40. Making a clean sweep of the middle and long distance races, the State men finished one, two, three in the 440 and 880 yard runs and one, two in the mile trot.

As a final climax, Hunter, Vernon, and Davenport joined hands and trotted across the finish line of the two mile run yards ahead of the nearest Gamecock.

Davis, who contributed 13 points to the State cause, won the broad jump, the low hurdles, and placed second in the javelin throw. Hunter won the mile and tied for the two mile run for a total of 8 points, which was the number amassed by Sanford who tied with Pickett for the high jump crown and also finished second and third respectively in the 440 and 220 yard runs.

Led by Dostanko, Byler, and McLeod, with 6, 6, and 5 points, State looked strong in the field events winning four out of six first places and five for six in the second spot. The shining light for the Gamecocks was McKenzie, a big boy who won both the 100 and 220 yard dashes, nosing out State's Herb Goldberg both times.

100 yard dash—McKenzie (SC), Goldberg (S), Curran (S), time 10 seconds.

220 yard dash—McKenzie (SC), Goldberg (S), Sanford (S), time 22 seconds.

440 yard dash—Orrman (S), Sanford (S), Shaarup (S), time 53.8 seconds.

880 yard dash—Ward (S), Rasbury (S), Orrman (S), time 2:09.

1 mile—Hunter (S), Davenport (S), Marshall (SC), time 4:49.4.

2 mile—Hunter (S), Vernon (S), Davenport (S), tied for first, time 11:10.

120 high hurdles—C. McGill (SC), White (S), Sexton (S), time 16.1.

220 low hurdles—Davis (S), Teneick (S), C. McGill (SC), time 25.9.

Shot put—Dostanko (S), Byler (S), Wilson (SC), 44 ft., 10 in.

Javelin—Buck (S), Davis (S), Wilson (SC), 166 ft., 6 in.

Broad jump—Davis (S), C. McGill (SC), Buck (SC), 20 ft., 10 3/4 in.

High jump—Sanford (S), Pickett (S), tied for first, distance 6 feet. C. McGill (SC), C. McGill (SC), tied for third.

Pole vault—Badger (SC), Blue (S), Pickett (SC), 12 feet.

Night Football Sessions Begin

Since Monday night of this somewhat political week and for two weeks from that date, the lights of Riddick Stadium were, and will be glaring down at a bruising bunch of pigskin haulers under the direction of Beattie Feathers and company.

These hustling gentlement have looked surprisingly well during these get together sessions; and "get together" is putting it mildly. Hard body blocking and intensive line work has been the main topic of the coaching staff.

Big "Pisone" Costa and a young sophomore named Schwartz have been breaking into the opposing backfield, while on defense numerous times, and the rest of the linemen have been charging like Apache's with their heads up and cleats moving.

In the backfield another sophomore Paul Dinan has been chugging like "choo-choo," while "prof" Eveland has looked very good. Oden Smith still has retained the ole kicking form and if the squad keeps up the good work State's opponents and State's student body are going to be the recipients of a Pleasant surprise come September—and another school year.

Practice Track Meet Here Saturday

N. C. State will play host to U.N.C. tomorrow at a practice cinder meet. The event will start at one o'clock. Carolina's Bill Albans (dash man) and Sam McGill (miler) will be here to work out with some of State's stars.

This is definitely not an official meet, but if you are interested in track the boys will put on a good show.

Preacher Pre-Flight Converts Wolfpack, 3 to 1

Mural Memos

BY PAUL HODUL

Clay covered Red Diamond and rock-infested Frosh Field felt the sting of base-knocks, errors, balks, etc. as softball stole the spotlight for another week of intramural activities.

Many of the teams showed possibilities of becoming finalists. Among the dormitories, 2nd Turlington and 2nd Becton displayed quite a bit of atomic power. Second Turlington, led by the heavy sticks of Lewis, Pippinger, and Parker, outlasted 2nd Bagwell by a score of 11-9.

Second Becton, although weak in the pitching department revealed a good fielding and hitting team. Waddell, Sessions, O'Quinn, and Richardson led them to a 9-7 victory over 3rd Alexander.

Watauga presented a potent left-fielder in Higgins, who blasted three bingles and received a walk while guiding his team to a 12-9 win over 3rd Becton. Gloss of West Haven got 3 for 3 as his team won easily 12-2 against Basement Syme.

Snipes of Welch pitched good ball while his teammates routed 1st Turlington 11-1. First Owen and Berry imitated the New York Giants pitching staff as 1st Owen won out by a 10-9 count. Third Syme defeated 2nd Owen in a close one 7-5.

Gold bounced 3rd Turlington to defeat by the tune of 8-6. Bones William Jenkins White, manager and long-ball hitter of the Off-Campus aggregation, welcomed a forfeit from YMCA as he lost a meal ticket pitcher, Charlie Harrell.

Among the fraternities, softball action was limited. Only three games were played. Kappa Sig defeated Sigma Nu 7-4 behind the loaded bat of McKenzie. Ladd, Charleston, and Rice of Sigma Chi combined their batting eyes to pound out a 5-1 triumph over PET. A homerun exploded by H. Jackson and clever fielding by Joe Linville helped TKE shutout PKT 8-0.

Here Are Some Reminders

1. Managers let your softball players know that they must see Mr. Doak right away if they are interested in trying out for the Big-4 Field Day softball team.

2. Batons will be used in the 440 relay. Better start practicing, because those things are wicked to pass if you aren't used to them.

Dr. Combs will be at the Infirmary 5:15 to 5:45 on April 27 and 29 preceding our Boxing Perlims of May 3 and 4. This service will save both students and Dr. Combs much time in getting O.K.

BY JACK BOWERS

Before an Easter Monday crowd of 3,000 at Devereux Meadow, a first rate pitcher's duel between State's Ernie Johnson and Wake Forest's Moe Bauer was broken up by successive home runs off the bats of Paul Livick and Gene Hooks in the ninth inning giving the Deacons a 3-1 victory over the Pack. Livick's circuit blow, with one mate aboard, and Hooks', with no one on base, accounted for all of the Baptist's runs.

Up until the fateful ninth, Johnson had allowed only four hits and Bauer one. Bauer's bid for a no-hitter was spoiled in the seventh by Catcher Bill Fowler's two-base wallop into deep centerfield.

Shortstop Jack McComas turned in a brilliant performance for State as he handled nine assists without an error. Several of the stops came on drives labeled as hits.

In the last half of the ninth inning trailing by a 3-0 count, the State nine put up their last stand threat. Bauer lost his control completely and issued free passes to Bill Fowler, Don Cheek, and Buck Livingston. Harry Nicholas, the ace of the Wake Forest staff, came in to put out the fire. However, State saved itself of a shutout when one of Nicholas' pitches eluded Catcher Russ Batchelor and Fowler scored from third.

The Pack, playing exceptionally well in the field, showed that they will be hard to beat as the season progresses if their hitting improves.

This loss to the Deacons gave the State nine a 1-1 record in Big Four play.

Yearling Squad Drops Opener To Duke

BY BOB CURRAN

The baby Wolfpack baseball team opened its season Monday afternoon at Duke Park by bowing to the Blue Imps 10 to 3.

Coach Dave Baxter's yearlings took a one run lead in the top half of the eighth inning, after trailing all the way, but this lead was short-lived. The Duke frosh put together eight runs in the bottom of the eighth on some timely hitting and bad fielding by State to sew the ball game up.

Lewis pitched effective ball till the disastrous eighth, when he was replaced by "Good Sam" Welch, who finished up for the Pack.

The Duke hurling was divided between Ward, Joyce, and Davis who limited the baby Pack to four

Pack To Meet Heels Sat., Deacs Thursday

BY PAT DOWNEY

This week the State varsity sluggers are in a position to dump the appallart of the Southern Conference in true State College style.

Vic's boys will face that crew from Chapel Hill tomorrow at De-

hits. The Freshmen take on Carolina Freshmen tomorrow afternoon at Chapel Hill in their next game.

creux Meadows, and next Thursday they go up against the Wake Forest powerhouse on the Deacons' home field. UNC and the Deacs are still on top of the heap in the Southern Conference race.

State will be the underdog in both of these contests, but as everyone knows these pre-game forecasts don't mean a thing in the Big Four. So don't be surprised if the Pack dumps them both. They very nearly did it to the Deacs last week, and they are raring to go after losing that close one.

Game time tomorrow is 3:30, and there will be plenty of action from that time until the final man is out.

HE HAS BUILT A BRAND NEW CITY

The "telephone man" is mighty busy these days!

Since the war, among many other things, he has built or enlarged 2,800 buildings . . . scores of them large enough to fit into the skyline of a modern metropolis.

These buildings are more than brick, mortar and telephone equipment. They are jobs for thousands of men and women . . . more and better telephone service for millions of people . . . more business for the towns and cities in which they are located.

But most important of all, they are an indication of the Bell System's earnest efforts to keep up with the nation's ever growing needs for communications service.

OPEN FORUM

Dear Editor:

I know you don't like anonymous letters, but, for obvious reasons, I can't sign my name.

I am a Raleigh girl who has an opportunity to meet many State boys. I have dated quite a few of them, and find them to be quite nice, but here's my gripe:

Not one in ten uses ordinary good grammar. It embarrasses me to introduce a fellow to my family and friends and have him murder the King's English with every sentence he speaks. It's almost as though it's a reflection on me.

The funny thing about it is that these fellows can use the big words correctly, and get completely snarled up on simple verbs. Here are a few of the mistakes I have heard lately:

I weren't—(or he, she)

I knowed

I seen

I could have went

I heard

He done

He come (for past tense)

What kind of impression will these fellows make when they go for an interview about a job?

I sincerely wish there were something I could do to help these boys improve their grammar, but I haven't the nerve to mention it. I'd hate to hurt someone's feelings. I am wondering if I can reach a few of them through the TECHNICIAN.

ONE OF THE GIRLS.

An Open Letter To State College

Dear Editor:

I came to State College in September of 1947 as a married student. Two weeks after enrollment I bought a two-room house located at 146 Trailwood. In March of 1948 our first child was born. I put my name on the housing list in Mr. T. S. Johnson's office, who is in charge of housing for quarters in Vetville. I was told that I would be eligible for an apartment in Vetville when my name appeared at the top of the list, and if I declined the offer, my name would be stricken from the list.

Mr. William Rhyne, formerly of 182 Trailwood and now living at 13-E Vetville, was enrolled at State College before I was. During the month of March, 1949, Mr. and Mrs. Rhyne had their first child and soon afterward obtained a place in Vetville. On Saturday, April 9, in Withers Hall, Mr. Rhyne told me he put his name on the list "only a few months ago." On 26th of January, 1949, Mr. Rhyne had filled out a form called, "Application for Eligibility and Entitlement to Occupancy in Vetville."

Although I had had my name on the list since the early part of last year, I wasn't given one of these forms to fill out until March, 1949. Rule (3) on the application form reads: "Priorities will date from the date of application." If an official list is made and those on the list are given the understanding that they will receive quarters in Vetville, does the application form have priority over those on the waiting list? Should Mr. Johnson allow a person who has never been on the list to fill out a form before someone who has been on it for a long time?

On April 10, 1949, Mr. Marvin Poovey, formerly of 150 Trailwood and now living at 27-B Vetville told me he was not on the housing list last July when he had requested quarters in Vetville. Mr. Poovey further said that he did not have his name on the list but filled out the application form one day and received quarters the following day.

Last fall I rode over to Mr. Johnson's office with an acquaintance of mine. When this man returned to the car he intimated that an exchange of favors had taken place.

In a few weeks this person moved into a two-bedroom apartment in Vetville. Although this student does not have any children, he was given a two-bedroom apartment which are supposedly reserved for those couples with children—and he was not even on the waiting list!

Mr. Roy Thurmond told me a few days ago he, too, was not on the waiting list when he received his apartment last fall. Mr. Thurmond said he put his name on the list in 1946 and when he inquired about quarters last year, his name could not be found on any list. Mr. Johnson merely took his word for being on the list and awarded him with a two-bedroom apartment at 26-F Vetville. Mr. and Mrs. Thurmond do not have any children.

In the above cases I have talked to these people personally. There are many similar cases which can be exposed if necessary.

Getting living quarters for married students at State College is a serious matter for those in need of them. To allow this office to dis-

charge its duties in such a manner is a reflection upon the administration and the school.

I suggest that this matter be brought to the attention of Chancellor Harrelson for investigation. The allotment of State College living quarters should be assigned to fair and responsible personnel.

ARTHUR H. BOYER

Forestry Club Notice

To Whom It May Concern: Why don't you students support your club! Attendance has been very poor no matter how much the programs are publicized. If you have not been attending because you don't like the programs, how about letting Art Millen know what you do want. The Forestry Club is for your benefit, both educational and recreational and we would be only too happy to oblige your whims. But we can't engage good speakers if, when they are here, they must talk to a half-empty room. We want good programs for you but last Tuesday's had to be abridged because only the "old faithfuls" were there.

Come! Come! Let's see some

Dormitory Rooms, Summer And Fall

1. Applications for dormitory rooms for present dormitory residents should be made according to the schedule posted in each dormitory.

2. Off-campus students may apply as follows:

a. Summer Term—beginning April 25th. Room rent will be \$16 and is to be paid in the Business Office, Holladay Hall, beginning May 23rd. Rooms not paid for by May 31st will be reassigned. Keys are required to be turned in at the end of the term.

b. Fall Term—beginning May 30th. Room rent is to be paid in the Business Office NOT LATER THAN JULY 15th or room assignment will be cancelled. Refund of room rent will be made provided room assignment is cancelled NOT LATER THAN SEPTEMBER 15th.

new faces at Tuesday's meeting when our own Steve Boyce will show a movie and slides on Canada geese.

Sigma Alpha Mu Elections Are Held

Al Hausman, retiring Prior of Sigma Alpha Mu fraternity, recently announced the results of the fraternity elections held last week. Norman Concoo will take over the job of Prior, Sanford Gluck will be Recorder, and Irwin Binder is the new Exchequer. In addition, Herbert Brenner has been elected Junior I.F.C. Representative, and Herbert Goldberg will be the new Historian.

Members of Sigma Alpha Mu are in the midst of redecorating their new home at 304 East Park Drive, and their present plan is to have an "open house" during the week-end of the Spring Formals. This will be in the nature of a housewarming, and all fraternities on campus will be invited.

Win a POSTGRADUATE COURSE IN AVIATION

PLUS AN IMPORTANT \$4000-A-YEAR ASSIGNMENT

INTERVIEWING TEAM COMING SOON!

Few opportunities open to college upperclassmen can match this one! Here's a chance to get both flying and executive experience with the world's leader in Aviation—the U. S. Air Force:

If you can qualify, you join a select group of college men for 52 weeks Aviation Cadet-Pilot Training—with pay:

When you complete the course, you get your wings and a commission in the Air Force Reserve : : : up to \$336 a month pay : : : a vitally important 3-year assignment as pilot with a crack Air Force squadron:

A special interviewing team will be on campus to tell you more about it and to give preliminary qualifying examinations. Stop in after class and talk it over with the pilots themselves:

If you wish, you may sign up now and finish your schooling before starting your training.

HERE ARE THE REQUIREMENTS:

You must be a male citizen, between 20 and 26½ years old, physically sound, and have at least two years of college (or be able to pass the equivalent examination administered by the interviewing team). Both single and married men may now apply.

HERE'S WHERE TO GO FOR DETAILS:

PLACE: YMCA

DATE: Monday and Tuesday, April 25 and 26
