## TRACK TEAM IS FAST ROUNDING INTO SHAPE

### Probability of Another Championship Team This Year Seems Evident

When Track Coach Taylor issued a call for track candidates about forty responded. As this number far exceeded the number that has responded in late years, those in charge were greatly enthused, and this enthusiasm seemed to be catching, for in a week the total number had more than doubled, and now it is possible to see over ninety men in track uniform either plodding around the track lap after lap, practicing for starts and speed on the straight-away, or following Coach Crowder's advice on the weight and javelin throwing.

Last year we had the use of the one-half mile track at the State Fair Grounds, but as this track is packed hard for motorcycle and horse racing, it resulted in continuous sore ankles for all the dash men. Manager Kinard and Captain Blakeney decided that it would be best to renovate the Riddick Athletic Field, and this has been done with the co-operation of the students and the use of the Agricultural Department's farm tractors.

Last year we were enabled with a small squad of faithful men to go to Carolina and capture the state meet by the small margin of one-third of a point. Carolina was our closest rival, and it will be with her chiefly that we will fight it out for state honors this year. Of the points which we made last year in the state meet we have lost thirty-five through graduation and one man, Captain-elect Kraft, leaving school. The following men with the points they made at the state meet will not be with us this year: Kraft, 10; Albright, 10; Lawrence, 7; Manning, 5; Ernst, 2. Carolina is extremely lucky in that she has retained practically her entire team, only three points out of her total.

Back with us again from last year's team are: Capt. Blakeney, two-mile; Homewood, weights; Park, jumps; Groome, pole vault; Elliot, mile; Corcele, two-mile; Poole, jumps; Brackett, hurdles; Roberts, half-mile; Close, dashes. All these men are showing up well this year, but it is a sure thing that they have not got their places cinched, as there are plenty of good new men right behind them and pulling hard.

Quite a number of old men are with us this year—that is, old men in college, but new men on the track squad. These men who are showing up best are Floyd, Chamberlain, Pearson, Cray, Warren, Beatty, Mc-

## GREAT FUTURE AHEAD N. C. STATE COLLEGE

### Possibilities Limited Only by Its Vision and Support, Declares Expert

"North Carolina State College is bound to be great," said an agricultural expert less than a month ago. This man holds a position in the agricultural world only second to the United States Secretary of Agriculture. He pointed out our wonderful agricultural and industrial wealth, the rapid rise we have had in rank among the states of the Union, the fact that we are rapidly reducing illiteracy, filling our common schools with children and graduating them from high school by the thousands. He mentioned our great push forward in public health and public welfare. He noted the progressive attitude and acts of our 1921 legislature. His final statement was, "Given the vision of your opportunities and tasks and the financial and moral support which your task warrants and your state can afford, you will make history in the next five years."

We asked a man who knows North Carolina and North Carolinians as well as any one on earth, whether there is any reason why the agricultural college of North Carolina should not be as good as any in the United States. This man is one of the great agricultural leaders of the south. He said, No, provided the institution is supported. We asked him if he believed the state was ready to support it. He said, Yes, to the limit of her ability. We asked

## COLLEGIATE PRESS TO HOLD WRITING CONTEST

### Have Your Material in by the 10th of March; Rules Governing the Contest

The attention of the members of The Technician staff, as well as regular contributors, is called to the North Carolina Collegiate Press Association "Writing Contest." The editor is very anxious that as many as will submit writings. The following rules will govern:

1. There shall be two writing contests held each year. One contest shall be held in the field of the college newspaper and the second in the field of the literary magazine.

2. Any member of the staffs of the member publications shall be eligible to enter either of these contests, as will also any regular contributors to a member publication.

(Continued on page 2.)

## HOPEFUL PROSPECTS FOR TENNIS THIS SPRING

### May Schedule Matches; Financial Backing by Athletic Association is Expected

This warm weather is a call to all players, together with a question that arises in everyone's mind: Are we going to have some new fast courts to play on this spring, or will we have to endure the same old rough courts that have been a disgrace for many a year? That is a question that must be answered real soon if we expect to put out a tennis team and compete with other colleges this spring.

If there is any one thing State is proud of, it is her athletic teams. We furnish all the material and equipment necessary to putting out good football, basketball and baseball teams, and recently we have made a remarkable advance in track. But when it comes to spending a comparatively small sum in putting the tennis courts in first-class condition, there has been some opposition in the Athletic Council that has been in the way so far. It appears to the writer that most of our athletic fee is not spent where it will do the most good in physically developing the larger percentage of the students, but is spent more in advertising in which about ten per cent of the students participate. Advertising is all right, and we have to have it, but isn't it an adverse advertisement to be the only college in the state not to put out a tennis team? We are positive that more attention will be attracted, as well as more physical cul-

(Continued on page 7.)

## POULTRY SCIENCE CLUB HOLDS ANNUAL BANQUET

### An Annual Event Which is a Hugh Success; Enjoyed By All Present

The annual banquet and smoker of the State College Poultry Science Club was held Thursday evening, February 16, in the Animal Husbandry building. The building was decorated with pennants, with pine needles forming the background. The various loving cups, trophies and many prize-winning ribbons that the birds from the college poultry plant have won throughout the state and country were on display. The loving cup that the judging team won recently in New York had a conspicuous place on Toastmaster Booker's table.

In addition to the members of the club and all Agricultural sopho-

(Continued on page 8.)

## RENEWED INTEREST IN FOREIGN LANGUAGES

### Two Clubs Have Been Organized by French and Spanish Students

It is very gratifying to see all the evidence of renewed interest in our Modern Language Department as expressed in the organization of the two clubs of French and Spanish students. Let's keep up the good work, not merely to get a "leg," but in order that we may derive real benefit.

The general attitude towards this course of study is that it is a necessary evil in connection with the R.O. T.C. This is not as it should be. Fellows begrudge having to put out for it. All sorts of arguments are heard. "What good is that stuff going to do me? I never expect to go to Spain or France." "No use in my putting out for that; it will never do me any good."

But, fellows, if you will seriously think about the proposition, you will see that these arguments are mere flimsy excuses. How many of us are there who can say, positively, beyond the shadow of a doubt, that we shall never come in contact, in a business way, with any foreign country? Modern invention and economic progress are knocking down barriers. War-torn Europe is looking to America for aid in its rehabilitation. Vast resources lie untouched in South America, waiting for American punch and pep to develop them.

There is the problem. Can any of us say positively that we shall have no part in its working out? In coming in contact with these nations, how valuable to a man will be a knowledge of another language, of manners, customs and business procedure of other people? How great an advantage will it give him over the man who does not possess that knowledge?

So let's pull together for a greater Modern Language Department. We should have new and more advanced courses, embracing the manners, customs and business procedure; technical and scientific courses, courses of a historical nature, and others. Men should not wait until their junior year to begin their study. The advanced standard, and better preparation of students in high school, will make it possible for them to begin at once.

So, let's remember its importance and forge the department to the front. In Greater State College let's have the greatest Modern Language Department in the United States!

"HON. R. T. P."

## EDITORIAL

Anyway, we stuck it out about as well as the team did.

Let's tuck away our disappointments of the last several weeks and begin to get ourselves tuned up for baseball.

We read with interest an article in The Twig, the Meredith College paper, telling about an electrical cotton picker that has been patented. We are pleased to note that our friends are interested to this extent in things agricultural, and at the same time mechanical. We are wondering if it is our move, now, to publish the latest information and concerning short-cuts in dressmaking.

How would a "regular" curtain look adorning our new stage in Pullen Hall? More and more entertainments will be given there from time to time, and we should have a curtain, one that would cover the whole proscenium opening. Some of you fellows who are trying to decide upon a memorial to be left by your class, think it over. It would improve Pullen Hall one hundred per cent. We might give a minstrel or some other entertainment to raise the money. Any more suggestions?

We are not going to turn our editorial page into a department of criticism; but there are times when we feel that we can best perform our duty by offering some criticism when we find that there is need of such. Our paper is perhaps the best medium by which criticism may be brought before all the students, and we will welcome any such articles, provided they are not the personal kind. Criticism is the corner-stone of improvement, and we are just as ready to receive as to give. The Technician staff needs your criticism, and we are just as sure that there are others who can be profited in the same way. Thus you may account for the general tone of our editorials in this issue.

If there is a weak spot in our system of Student Government it must be in the failure of the students to report any misconduct on the campus. As students we don't seem to realize the responsibility that each one of us has in this respect. This is evidenced by the fact that there is still quite a bit of shooting at times on the campus. It is some one's business to have such a misdemeanor reported to the council, and if it should happen to come under your observation, you are hurting the cause of student government if you do not see that the guilty person is reported. None of us like to do this, but we have taken upon ourselves the responsibility of doing these things, and the arousing of the displeasure of some student should not be a consideration in the least. If you are going to try to get through college without irritating

some student, you are going to come through lacking in some of the finer traits that distinguish the truly courageous and progressive college man.

## ALMOST HERE

What is the next biggest event of the year that is going to occur on State College campus? Another holiday? No. Senior week? No. It is the election of our officers and representatives for the coming year. Our destiny for another year is going to be largely determined by the type of men we choose to serve us in the capacity of directing our college activities. Each one of us can display a keen sense of good judgment in no better way than by supporting the right man for the right place. You can serve your college in no better way than by doing your utmost to see that such a man gets elected.

And the time is not far away. In a few weeks we want to elect the officers of Student Government and The Technician staff, and let them assume their duties before the end of this term, having, of course, the assistance of the present officers. Then there are the class and Agromeck officers, all of whom must represent the finest and most efficient men to be found. Perhaps the most important of all is the president of Student Government. Who is the junior that is going to fill this all-important position, and where are the men capable of occupying the other hardly less important positions? These are the grave questions confronting every student at State at the present time, and we had just as well begin to talk and think about them, so that election will not be upon us and catch us with nothing definite in mind. The results of this election are going to have a far greater direct bearing upon us as students than any state or national election, and we must begin to awaken ourselves to the importance of the coming event. Let's get some discussions, arguments and displays of oratory started around on our campus and put athletics in the background for the time being. Let's get a number of possible candidates lined up and make inquiry as to their relative merits for the various responsibilities.

We wish to offer a suggestion or two as to what may determine a man's qualification for these offices. In no case should popularity be considered unless accompanied by the other qualifications. We feel sure that no one will be guilty of making this mistake. Being an athlete may be a qualification to a certain extent, but may also be a disqualification in that the candidate would not have time to perform his duties. There is no doubt that we have shown a little too much partiality to the athlete in the past, and let's make no such mistake this time. There are three important "don'ts" that we wish to emphasize here, and they are emphatically, don't vote for a man because he is a friend of yours, don't place too much responsibility on one person, and don't allow anyone to influence you against your better judgment.

These are our negative suggestions as to general qualifications, and we are going to have more to say next time concerning a man's personal qualifications. Let's keep this matter constantly before us and make election day as interesting an occasion as a football game with Carolina.

## Collegiate Press to Hold Writing Contest

(Continued from page 1.)

3. All entrants into these contests shall submit their material to their respective literary magazine editor or newspaper editor by March 1st.

4. It shall be the duty of the committee, chosen from the faculty of its institution by the respective publication receiving this material, to select the winner from those submitting material to them, and to submit this winning material to the association secretary before March 15th.

5. The basis of judging shall be: thought, rhetoric, and style.

6. To be considered in the newspaper contest each entrant must submit the following sorts of writing: straight news item, editorial, and human interest story.

7. To be considered in the magazine contest each entrant must submit one of the following sorts of material: short story, sketch, verse. One person may enter all three sorts of material if desired.

8. Material for the final contest shall be in the hands of the general secretary by March 15th. The general secretary shall, within a week, submit this material to the judges in the following manner: The manuscripts shall be numbered (and shall bear no other mark of identification), and each judge shall, without consultation with the others, on the

basis of thought, rhetoric and style, grade each, making no record whatever on the manuscripts. His grades shall be recorded on a separate piece of paper, and returned to the general secretary, and the manuscripts shall be forwarded to the second judge, who shall do likewise, etc., until all three judges shall have passed upon all of the contesting manuscripts.

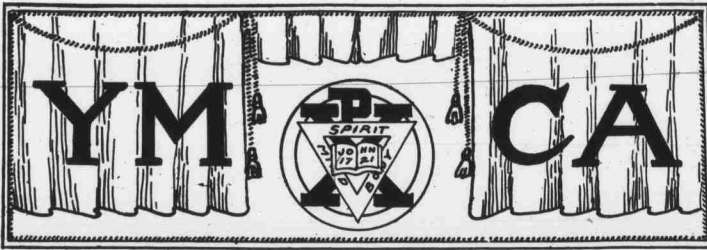

9. The secretary shall then total the grades accorded each newspaper manuscript, and the one having the largest total shall be declared the winner. In the magazine contest in any of the fields the winner shall be the entrant receiving the majority vote for his contribution.

10. The winner of the newspaper contest will receive a full write-up in the newspapers that are members of the association, in addition to the publication of the winning material.

11. The winner of the magazine contest shall receive a full write-up in the literary magazines that are members of the association, in addition to the publication of the winning material.

12. It shall be the duty of the executive committee to see that adequate facts about the winner's life, work and personality are furnished the interested publications, so that they may proceed to give a fair and good write-up.

Bring your writings to The Technician office, put them in the box, or give them to any member of the staff.

## COMING ATTRACTIONS AT "Y"

## Speakers

Early in March Dr. Howell E. Rondthaler, president of Salem College, Winston-Salem, N. C., will visit State College and deliver an address on the "Utilization of the Life, Death and Resurrection of Christ."

On April 13th Sherwood Eddy, said to be the greatest Christian leader in the world, and one of the foremost speakers for college men in America, will address the student body.

## In the Movies

March 9th—Cosmopolitan: "Hui-moresque."

March 16th—Fairbanks: "He Comes Up Smiling."

March 23d—Reid: "What's Your Hurry?"

March 30th—Cosmopolitan: "Inside the Cup."

F. FRIENDSHIP COUNCIL  
GROWING IN INTEREST  
AND IN NUMBERS

The F. F. C. is growing all the time and the meetings are becoming more and more interesting because each member is interested and does his part in the work.

The F. F. C. held a get-together meeting a few Sundays ago. Everyone enjoyed themselves to the fullest extent. A splendid talk on "The Purpose of the F. F. C." was made by Mr. Rogers. In his talk he discussed fully what was expected of every member. Mr. King also made a talk on "The Growth of Christian Religion." Messrs. "Red" Hicks and "Buck" Morris, the best friends of the F. F. C., gave us some good advice. Refreshments were then served. A number of new members were taken in at this meeting.

A committee has been appointed to visit the hospital and do anything they can to help the boys.

We have been discussing lots of interesting subjects at our recent meetings. "Joy to Ourselves," "Conversion," "What Really Happens When a Man Becomes a Christian," and "Education of Personality," are

Mr. Vale spoke to the F. F. C. at its last meeting, giving us some good points and ideas on how to begin the "Hi-Y."

REPORTER.

## YOUR PAST

Character, reputation, honor, satisfaction, capacity, and worth are all dependent on steps of the past. None of these elements of the higher type appear spontaneously in human life.

What you are in heart, what people think you are, how high you stand in your neighbor's estimation, the returns for your time and effort, the joys of life, your ability to serve when your service is needed, and your importance to the community, today, all depends on how you spent

every minute not only of last year, but yesterday. What are you doing now? Your act of this minute will tell its story tomorrow.

Some folks are prone to think that unless you have lived the life of a George Washington or a Jesse James, you have no past. The fact is, position today is merely a result of past yesterdays. In life or its details—athletics, scholarship, moral uprightness, spiritual strength—as surely as there is no possibility for future without present, there is not present without past.

How was yesterday spent? Where are you today? Don't be awe-struck because the past seems great and the future infinite. Simply make up your mind now that TODAY shall always be used as the greatest possible stepping-stone for the higher and happier TOMORROW. W. N. H.

INTERESTING SPEECHES AT  
M. E. SOCIETY BY STUDENTS

The regular meeting of the M. E. Society was called to order by the president Tuesday evening, February 14, 1922.

Two of the student members, Mr. W. F. Graham and Mr. D. B. Vansant, made very interesting and helpful speeches. Mr. Graham spoke on "Superheated Steam in Modern Power Plants," and Mr. Vansant on "Feed Water Systems."

Mr. R. P. Ernst, mechanical engineer for the Carolina Light and Power Company, was scheduled to speak on "Power Plant Operation," but was unable to attend the meeting on account of sickness.

After a short business session the society was adjourned.

BAND ENTERTAINED  
BY BAND SPONSORReception Given in Their Honor  
at Zebulon is Delightful  
Affair

The members of the State College band were delightfully entertained at a reception given by Miss Thyra Cahoon, band sponsor, at Zebulon, N. C., February 18. The reception was held in the American Legion Hall of that city. The hall was decorated with red and white streamers, the color scheme of State College being carried out in a clever manner. The bandmen were greeted on their arrival by Miss Cahoon, Chief Musician Taylor, and thirty-odd young ladies who aided Miss Cahoon in entertaining the musicians. Delicious punch was served the guests, after which various valentine games were played. Later in the evening a delicious chicken salad course was served.

Dancing was enjoyed by several of the young couples, music being furnished by "The Rollickers" of

State College. Those composing the orchestra were "Syncopating" Baker, piano; "Two-string" Brown, banjo; "Half-note" Norris, clarinet; Freshman "Blue-note" Stanley, saxophone; "Legs" Barmettler, violin; "Variation" Prince, trumpet, and "High-Tide" Willis, drums.

Messrs. Taylor and Prince rendered several cornet duets together. They made quite a hit and had to play several encores in order to satisfy the crowd.

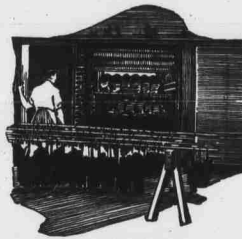

The reception was the best of its kind that has ever been given in honor or the band. Everyone enjoyed a pleasant evening, thanks to Miss Cahoon and her lady friends. Before departing, the bandmen

collected in a body and with Chief Musician Taylor as cheer leader, gave several yells in honor of Zebulon, Miss Cahoon, and the girls of Zebulon.

Those that attended the reception were Professors Price and Hall, Musicians Carl Taylor, Prince, Worthington, Blum, Frank Baker, "Pip" Harris, "High-tide" Willis, "Steve" Stephenson, Ed Barr, "Tea-hound" Harrill, "Legs" Barmettler, "Spek" Starr, Bonny Norris, Bennett, "Freshman" Stanley, Bill Armstrong, Brown, and Mike Breen.

E. O. B., Reporter.

A girl in your arms is worth two on the telephone.

## What Is Water Japan?

JAPAN—not the country but a metal-coating varnish—and your morning bottle of milk. Totally unlike, yet associated!

Ordinary japan consists of a tough, rubbery, tar-like "base" and a highly inflammable "solvent." The solvent dilutes the base so that the metal may be coated with it easily. The presence of the solvent involves considerable fire risk, especially in the baking oven.

Milk is a watery fluid containing suspended particles of butter fat, so small that one needs the ultra-microscope to detect them. An insoluble substance held permanently in suspension in a liquid in this manner is in "colloidal suspension."

The principle of colloidal suspension as demonstrated in milk was applied by the Research Laboratories of the General Electric Company to develop Water Japan. In this compound the particles of japan base are colloiddally suspended in water. The fire risk vanishes.

So the analysis of milk has pointed the way to a safe japan. Again Nature serves industry.

Connected with the common things around us are many principles which may be applied to the uses of industry with revolutionary results. As Hamlet said, "There are more things in Heaven and earth, Horatio, than are dreamt of in your philosophy."

## EXCHANGES

## HOW ARE YOU EDUCATED?

A University of Chicago professor says you are educated in the best sense of the word if you can say "Yes" to these questions:

Has your education given you sympathy with all good causes and made you espouse them?

Has it made you a brother to the weak?

Have you learned how to make friends and keep them?

Do you know how to be a friend yourself?

Can you look an honest man or pure woman in the eye?

Do you see anything to love in a little child?

Will a lonely dog follow you in the street?

Can you be high-minded and happy in life's meanest drudgeries?

Do you think washing dishes and hoeing corn just as compatible with high thinking as piano playing or golf?

Are you good for anything yourself? Can you be happy alone?

Can you look out on the world and see anything but dollars and cents?

Can you look into a mud puddle and see a clear sky?

Can you see anything in a mud puddle but mud?

Can you look into the sky at night and see beyond the stars?—The College Mason.

## TEN WAYS TO KILL AN ORGANIZATION

1. Don't go to the meetings.
  2. If you do, go late.
  3. If the weather doesn't suit you, don't think of going.
  4. If you attend, find fault with the work of the officers and members.
  5. Never accept office, as it is easier to criticize than to do things.
  6. Get sore if you are not appointed on a committee, but if you are, do not attend committee meetings.
  7. If asked by the chairman to give your opinion on some matter, tell him you have nothing to say. After the meeting tell everyone how things should have been done.
  8. Do nothing more than is absolutely necessary, but when members use their ability to help matters along, howl that the institution is run by a clique.
  9. Hold back your dues, or don't pay at all.
  10. Don't bother about getting new members. "Let George do it."
- Carnation of Delta Sigma Phi (The College Mason).

## MY FATHER

Three boys were bragging about their fathers. One said, "My father writes a few verses on a piece of paper and then takes it to a man who gives him fifty dollars for it."

The other two didn't think much of that. Tommy said, "But my father draws a few lines on a piece of paper and takes the picture to a man who gives him a hundred dollars for it."

Billy was still skeptical. He said, "That's nothing. My father writes

down a few notes on a scrap of paper and then on Sunday he gets up in the church and preaches a sermon from that paper and it takes six men to gather in the money."—College Mason.

## C.E. SOCIETY APPLIES FOR CHAPTER OF AMERICAN SOCIETY CIVIL ENGINEERS

The Civil Engineering Society has not since its organization been connected with either a national or a state society. This has, however, been the object of much discussion in the past, but not until the last meeting, when it was unanimously carried, has there ever been a sufficient number of votes to put the thing across.

A chapter of the American Society of Civil Engineers will bring many advantages in the way of lit-

erature and speakers that we have in the past been unable to obtain. Our society has, by the hard work of its members, made a fine record, and merits this distinction. We already have about fifty active members, but if this charter is obtained there will, no doubt, be many other applications for admission.

Another matter of great interest was brought up at the last meeting. Mr. G. B. Cherry called our attention to the fact that there is a possibility of getting a cement-testing laboratory in our department. This, we understand, is to be a state laboratory, but we will be greatly benefited should the committee see fit to establish it here.

In spite of the fact that there was much business before the society, a very interesting program was rendered. Several problems which are of vital importance to the engineer of today were discussed.

## AGRICULTURAL CLUB NOTES

Since the excitement and joys of the reception have passed (but not forgotten) the boys have settled down to real work. Indications point to the most successful term this spring. In past years it has been the custom for a large number of the boys to fall out of the work as soon as the spring months appear. We are glad to see that this is not the case this time. There can be no other reason for this but for the splendid work of the program committee, and the boys who are willing and anxious to "put out" and they are. If you expect the meeting to begin promptly at 6:30, and be full of pep and really worth your time, just be there at the time and you will not be disappointed.

## NEGLECTED FORMS OF ATHELETICS

### Attention to Boxing, Wrestling, and Tennis

Soccer has come to stay—at least we hope so, because it affords another type of student an opportunity to do his bit in putting old N. C. State on the International Athletic Map.

There should be a form of sport for every general type of student in school. It is unfair to the less brawny type to let him go through four years of college life, never to experience the feeling that only the athlete has in knowing that he had been wholly or partly responsible for the success of his team.

This feeling is much a part of the training of men for life as any part of the college curriculum. It instills in him a confidence which is absolutely essential in the development of young manhood. It is true that we have here at State College a form of athletics for every size of man, provided the candidate has been trained to a fair degree of proficiency before entering college. There are scores of men entering State every fall who have either been denied this thorough training, which is particularly essential to those who aspire to a berth on the basketball or baseball teams, or have not the natural ability in any of the sports, but could probably develop into vascity material in some other sport, as boxing, wrestling or tennis.

Along with the development of the Agricultural and Engineering departments should come the expansion of the Athletic Association. No longer is it necessary to invade Harvard, Yale, or any of the other larger universities to find boxing, wrestling or tennis teams all supported by the athletic association.

All western and norther schools of any appreciable size have for a number of years put out intercollegiate wrestling, boxing and tennis teams. In the majority of these institutions boxing and wrestling have been classed among the major sports. Why shouldn't they? In no sport is the coordination of the mind, muscle and eye more highly developed than in boxing.

Even in our southland these sports are working their way into the athletic associations of all progressive schools. Davidson, Carolina, Trinity, Washington and Lee, and the University of Virginia have for several years put out intercollegiate wrestling teams. Boxing has also been successfully introduced into these schools.

At the state tennis meet held at Trinity last year every college was represented with the exception of State College.

Fellows, let's get the boxing, wrestling and tennis spirit started. We have men who could, in each sport, bring home the bacon from any meet, provided they are given the encouragement and backing of the student body and the Athletic Association.

D. T. M., '23.

## STATE TOSSERS DROP CLOSE GAME TO BAPTISTS

### Held Them to Tie in First Half; Johnson and Homewood Back in Line-up

Showing that they still held that old fighting spirit which is characteristic of all State College teams, the Red and White quintet forced Wake Forest to exert all her strength to come out on the big end of a 25-to-22 score.

With "Red" Johnson and Sammy Homewood back in line-up, the team showed new life, putting up a game replete with thrills and close guarding. Wake Forest took an early lead, but old State soon found herself and by a burst of speed knotted the count at 13 all at the end of the first half.

The second half started with State immediately taking the lead. Captain Park was making good his chances from the foul line and caging two from near the center of the floor. On the other hand, Captain Carlyle seemed to be contented with one goal from the floor and missed chance after chance at the free ones. Groome played in his regular style, getting the tip-off almost at will and playing all over the floor. He also chalked up two field goals to his credit. Heckman was the outstanding player for the Baptists.

The line-up:

State	Position	Wake Forest
Johnson	R.F.	Stringfield
Leiper	L.F.	Green
Groome	C.	Carlyle
Park	R.G.	Heckman
Homewood	L.G.	Hough

### Track Team is Fast Rounding Into Shape

(Continued from page 1.)

Laughlin. Floyd, who is out for the weights, bids fair to be another "Jimmy" McDougal.

Among the new men who have reported is a lot of likely material, but there are a few who have seemed to stand out above the rest. These men are Randolph, Clark, Goodwin, Scott, Curlee, Brittain and Barmittler. Randolph has attracted particular attention and seems to be quite as good a track man as he demonstrated he is a football man when he played against us last fall.

Now, fellows, any of you men who are out for track and do not find your name mentioned above, don't be discouraged. It doesn't matter what this paper says about you, it's up to you to prove to your coach and captain that you are better than those mentioned above, so just buckle down and prove it. None of the men in charge are prejudiced, neither your captain, manager or coaches; but it is a sure fact that the best men men will represent this college in the meets, and you are the one to prove that that best man is yourself.

The efforts of all track coaches in the State of North Carolina are now turned to preparing their men for the indoor track meet that comes off on March 10th in Durham. This big meet, which is open to all colleges,

"That's a hell of a note," said the money as he sneezed into the saxophone.—Scalper.

high schools, preparatory schools, elementary schools, Y. M. C. A. and military units, is probably the biggest event of its kind every placed in this state. The meet will be held in the Star Brick Warehouse, which encloses a track with eight laps to the mile. The meet will include such events as the 50-yard dash, 50-yard

hurdles, 440-yard run, 880-yard run, one-mile run, running high jump, 12-pound shot-put, standing broad jump, and one-mile relay (each man to run 440 yards).

The meet is given under the auspices of the University of North Carolina, Trinity College, and the Durham Y. M. C. A.

## KAMPUS SAYINGS

During the recent snowstorm Freshman "Fatz" Beaver was going to the postoffice with Mike Breen. They passed the Electrical building where Captain Cox's aerial lay on the ground. "Look out, Mike, don't touch that wire, it's live," said Fatz. "How do you know it's live?" asked Mike. "Because I just saw it move," was the reply.

Who won the war? Why, Jordan, of course. If you doubt it, he'll show you his medals.

## We'll Say So, Too

A little lovin' now and then is cherished by all college men.

Frank Clarke was confined to his room a few hours last week with the boll weevil blues.

The latest campus question is, "How long do we get for Easter?"

From the way the freshmen departed from the mess-hall during the recent snows, we feel that we shall have some more good material for a championship track team this spring.

The latest addition to the faculty is Mr. Hahn, who went to Washington recently on a business trip. He told the guards at the Knickerbocker Theatre ruins that he was a professor in Physics at N. C. State College and was allowed to enter the scene of devastation. Mr. Hahn brought back a sample of the roof and substituted for Professor Heck at a lecture of the class recently. Of the forty-odd students in the room, eight were awake and taking notes at the end of the lecture.

The State College Sewing Circle will meet with Miss Runt "Shorty" Deal at the regular meeting Monday afternoon. All four members are requested to be on time.

## Something Unusual

"Pip" Harris flunked Physics last month.

Onlooker: "Bull! Bull!"

Major Watt Powell (turning quickly): "Were you speaking to me?"

Senior, replying to a question, remarked: "Lord only knows, I don't."

The Professor returned: "Lord will get the credit, then; you won't."

Speck Starr: "Will you ride?"

Senior: "No, thanks; I'm in a hurry."

Little Bobbie Burns  
Sat on a stone—  
Little Bobbie Burns.

Little Bobbie Burns  
Didn't go to heaven—  
Little Bobbie Burns.

—Ex.

Professor: "Can you explain what is meant by the Diet of Worms?"

Student: "Yes, sir. Sphagetti."

## R.O.T.C. TEAMS MAY BE AWARDED SWEATERS

## White Wins First Place in Match With Corpening Second

The Military Department announces the winners in the Small-bore Rifle Match No. 5. C. M. White captured first place by a wide margin and wins a blue arm stripe for his uniform. A. J. Corpening was second and D. D. Overton third.

In the match with Davidson, White duplicated the feat by being high gun of the State team.

The shooting trophies and prizes were awarded at a regimental review, Friday, February 24th.

There has been much talk of awarding a sweater with special R.O.T.C. insignia to members of the rifle team, R.O.T.C. track team, and the band. Due to a limited amount of funds, the conditions of qualification will be necessarily difficult, but if the sample is any indication they will be worth going after.

It is probable that the insignia will be a United States shield with the letters R.O.T.C. and N.C.S. in the blue field and a suitable insignia of the team superimposed upon the red and white stripes. For the band, a lyre; for the rifle team, crossed rifles or target, and for the track team the winged foot. We certainly hope Colonel Gregory can make a "go" of it.

## STATE DEFEATS DAVIDSON IN FIRST GALLERY MATCH

In the first match of the season the State rifle team eliminated Davidson in the Fourth Corps Area championship competition. White, Yarboro and Vance were high guns for State. In Davidson's line-up Long and McRainey were best.

Scores	
N. C. State	Davidson
Lemmond ..... 83	Long ..... 95
Culbreath ..... 83	McRainey ..... 94
Vance ..... 92	Fraser ..... 92
Moody ..... 82	Bitzer ..... 91
Kennette ..... 90	Gudger ..... 91
White ..... 94	Miller ..... 86
Cherry ..... 91	McIlwaine ..... 82
Overton ..... 85	Roberts ..... 79
Yarboro ..... 93	Gibson ..... 58
Corpening ..... 87	Ramsey ..... 80

880 854

The State teams were somewhat surprised at the sudden change of the course, and for that reason the scores were not up to State's standard, but good enough in this event to win.

The firing is done on the N. R. A. targets, which have a very small bullseye, hence the scores are not so high as last year. A ninety on this target is excellent shooting any day.

## THE R.O.T.C. WILL HOLD A FIELD DAY SOON

1. An R.O.T.C. Field Day is scheduled to be held on a date in the near future, to be announced later, which will consist of the following events:

- Basball throwing for distance.
- 100-yard dash.
- 220-yard dash.
- 440-yard dash.
- Broad jump.
- Shot put.
- Hand grenade throwing.
- Relay race, one-half mile.
- Equipment race—rifle, belt, hat, coat, breeches, leggins, shoes.
- Javelin throw.
- Discus throw.
- Potato race, with 2" x 4".
- Spiral leggins race.

One man from each company in all events except relay race—four men in it.

2. (a) Baseball men of regular team not allowed to participate in baseball throwing.

(b) Members of track team not allowed to participate in (b), (c) and (d).

(c) Track rules govern events.

(d) A four-foot circle, 25 yards distance, three throws per man, for hand grenade throwing.

(e) Leggins in (m) must be issue; rolled up, tape inside at start; winner, neatest and quickest put on.

(f) In (l), potatoes to be of uniform size, to be rolled along the ground with 2" x 4" x 6".

3. Points: First place, 5 points; second, 3 points; third, 2 points; fourth, 1 point.

Field judges to render final decisions.

4. Points won by individuals will be credited to company standing for the year.

5. Officials: Field judges, Mr. S. L. Homewood and Mr. T. N. Park. Judges at finish, Mr. W. W. Blakey and Mr. T. K. Roberts.

Starter, Dr. C. C. Taylor.

Timer, Mr. H. J. Kinard.

Athletic officer, Capt. N. L. Simmonds.

Athletic representatives, first sergeant of each company.

## A CALL OF LIFE

There are hermit souls upon the earth  
Who live within themselves.  
Their only thought of gold to gain,  
Matters not from whence it came.  
Their hearts are filled with hope of fame,  
And dreams of selfishness.  
Madly they rush on to a coveted goal,  
Unheeding humanity's cry.

A false aim in life he seeks,  
Who thinks riches the thing  
For which each mortal here below  
Should lay down everything.  
He only follows a luring mirage  
Into the desert sands,  
And then learns the truth too late,  
For life has past beyond.

I long to live this life as one  
Who aims to help mankind,  
To serve each day as best I can—  
A real friend of man.  
'Tis better to do one kindly deed,  
Be it ever so small,  
Than reach the highest notch of fame,  
On mangled forms of men.

He leaves this a richer earth  
By lending a helping hand,  
To lift a fallen comrade from  
The depths of sucking quicksand;  
Whose only thought—the good he can do—  
Ever failing to consider himself,  
Has lived his life as God would have,  
And justified his birth.

The shrill, keen voice of Life I hear,  
Calling red-blooded men  
To live their lives as one who trusts  
His God and fellowmen.  
To ever scorn the wrong, the foul,  
And glory in the right.  
Plunge forward with a vim today,  
And meet this mighty call!

"BILL BEE."

## FRESHMAN, SLIDE THAT PIE

I often growl about the zip,  
Or cuss the cream of wheat,  
And often when my tea I sip,  
I say it isn't sweet.  
But there is yet another thing  
That always gets my eye,  
And that's to see the waiters bring  
A great big juicy pie.

They say that I am hard to please.  
Perhaps I am. But wait—  
You never heard a snarl or wheeze  
If pie is on my plate.  
Before I even reach my seat  
I heave a gladsome sigh,  
And all the while my meal I eat  
I think of naught but pie.

When out at last I furtive creep,  
Along with all the rest,  
One pie my pockets safely keep—  
Another 'neath my vest.  
I never tried to dope it out,  
Or find the reason why,  
But of one thing there is no doubt,  
I sure do love my pie!

ZIPPY MACK, '23.

Tee: "Don't you think that girl  
over there dresses beautifully?"  
Hee: "Can't say; there's a tree be-  
tween our houses."—Chaparral.

## THE SECRET

Oh, yes, you've listened full many a day  
To the sayings of men untold;  
And you've dreamed the dreams that they have,  
And seen those dreams grow cold.  
You've seen the shame and the mockery  
Of a world of fawning sham;  
Till it makes your heart grow weary,  
And your soul break through with a damn.

Well, now's the time to show you're prime,  
And make those dreams come true;  
For all the sham and the mockery  
Can let the sun shine through.  
So, don't live down in a valley,  
But live on the hilltop sublime;  
Just help the other fellow,  
Cast his troubles all behind.

Don't think hard of your brother,  
He's yours to mar or mould;  
Just go and tell him you'll help him,  
Perhaps he's never been told.  
Perhaps he's hoping and waiting,  
The words of faith to hear;  
You're the man to save him,  
The man to make it clear.

Of course your troubles are many.  
Oh, God! they can't be small.  
But you can stand if you will to,  
The loss, the scourge, and the gall.  
So step right in now to begin,  
You won't be downed by your fall;  
Just help the other fellow,  
And he'll help you, after all.

There's something magic in service,  
It always pulls you through;  
And soon the other fellow  
Begins to believe in you.  
And then your eyes are opened,  
And the scales begin to fall;  
You'll find the world has spoken,  
It's a good world, after all.

There're fellows all around you,  
Whose souls are darkened by sin;  
They're in the fix that you were,  
Their hearts and yours are some kin.

And you're the man that can help them,  
And lift them out of the brawl;  
If you give them your best in service,  
They'll cease to wallow and crawl.

You find your life to lose it.  
Perhaps that may sound queer;  
But this old world will prove it,  
And it isn't so dark and drear.  
So don't let trials fool you,  
Nor worry weight you down;  
Just give of your best to others,  
And yours will be the crown.

"TERNOOO."

E. E. SOCIETY HOLDS  
FEED AND SMOKER

The Electrical Engineering Society gave a very delightful feed and smoker combined in the Engineering building Monday night, February 20.

Preliminary to the serving of the refreshments, Mr. W. O. Powell outlined to the society the plans of the electrical show to be given in April. He pointed out the many new and attractive features which would be added to the show this year.

Following this, Mr. D. L. Connor presided as toastmaster, to which capacity he was well fitted. While

refreshments were being served, different members were called upon to give a short and humorous talk on master. Miss Lucille Thomson, our co-ed., instead of being presented with smokes, was presented with a very large stick of candy.

With everyone having enjoyed a very delightful time the members left with the wish that a similar event might be given again in the near future.

Poor old Vance  
Tore his pants  
Down at Meredith.  
To his room  
He did zoom,  
From Meredith.  
Now at home  
He does roam,  
Far from Meredith.  
With his needle  
He can fiddle  
For dear Meredith.  
Soon he'll be  
Under that tree,  
Down at Meredith.  
No more snow  
Will he throw,  
'Round old Meredith.  
For his friends no longer tote  
A very handy overcoat  
To our Meredith.

Great Future Ahead  
N. C. State College

(Continued from page 1.)

him if the financial ability of the state is not greater than some other states whose agricultural and engineering colleges have more buildings, better laboratories, a better library, and a more highly paid teaching staff. He said, Yes.

If North Carolina is great, she is great agriculturally and industrially. If she is ever going to be great, it will be because she has nurtured and developed her agriculture and her industries. North Carolina State College of Agriculture and Engineering belongs to the people of North Carolina. Its sole mission in the world is to train citizens of North Carolina for leadership in agriculture and industry. If God will give those of us who work from the inside of the institution the vision of our task and opportunities and the people of North Carolina will give us the financial and moral support, we, altogether, will fulfill the prophecy of the one who said that the lack of these two things alone would keep us from being a great institution.—Rural Life.

Hopeful Prospects for  
Tennis This Spring

(Continued from page 1.)

ture developed, for the same expenditure in tennis than in any other branch of athletics on the campus. If the members of the council realized the benefits of the game and at the same time realized how it has been neglected here, there is no doubt but that something could and would be done.

Although tennis is not counted a major sport, it is fast becoming one of the most popular sports in the country. Next to swimming, it is acknowledged to be the finest exercise there is to develop a balanced phy-

sique. They have a battery of fourteen fine courts at Carolina, and the Wake Forest Athletic Association built four new courts last year. If we have four courts put into good shape this year it will fill the demand for some time and be a great asset to the students.

So, let's everyone have their racquets restrung and be ready for a tournament as soon as possible. No doubt we can select a team from the winners that is capable of representing us in some matches with other colleges.

### Poultry Science Club Holds Annual Banquet

(Continued from page 1.)

mores, honored guests at the banquet included Major W. A. Graham, state commissioner of agriculture; Dr. W. C. Riddick, Dean C. B. Williams, Capt. N. L. Simmons, Dr. C. C. Taylor, Dr. L. F. Williams, Dr. F. A. Wolf, Dr. B. F. Kaupp, Dr. T. P. Harrison, Prof. Z. P. Metcalf, Dr. B. W. Kilgore, Prof. R. H. Ruffner, Tal Stafford, J. E. Ivey, C. Rutledge, C. C. Eddy, D. H. Hall and L. H. Harris. G. L. Booker, president of the club, acted as toastmaster.

Milk-fed fried chicken, fattened, killed and prepared for the skillet by students in the Poultry Department, and the gay and festive "hen fruit," in varying stages of dress and undress, were the chief items on the bill of fare. Potato chips, cream gravy, and buttered rolls added greatly to the repast. Block ice cream, cake and coffee followed as a chaser, after which smokes were passed around.

The hundred-odd guests ate chicken until they had "fowl" stomachs, as Mr. Stafford puts it.

After the feast, Toastmaster Booker gave a short talk in behalf of the club. Then followed several after-dinner speeches by the guests, each speaker being wittily introduced by Mr. Booker. All species of the "chicken" were treated informally in the remarks of the orators of the evening, but although the speeches were in a happy vein, some attempt was made to leave a serious thought with the students. Several of the speakers pointed out that more poultry must be raised on North Carolina farms as a resort to the coming of the boll weevil. The speakers stressed the poultry industry as one of the means of making North Carolina's rural population economically independent when the boll weevil finally covers all of the cotton-growing sections of the state.

The feature address of the evening, however, was made by C. M. Fry, a member of the Sophomore Class. Mr. Fry held his audience spellbound as he gave his impressions and experiences in "poultry raising." It seemed as if he did all his raising along about midnight.

Dr. Kaupp, head of the Poultry Department and a recent delegate to the International Poultry Exposition in Europe, closed the meeting with a brief summary of the work of the Poultry Department, referring in the course of his remarks to the brilliant record made by the State College poultry judging team in the nationwide poultry judging contest held last month at Madison Square Garden, New York City. The team won the cup offered for utility judging, and W. F. (Bill) Armstrong, a senior, was awarded a medal as one of

the highest men in individual scoring.

The banquet this year was declared by some of the "old-timers" to be the best ever. Everyone enjoyed a pleasant evening, and all are looking forward to next year's chicken feed.

### WANT ADS

WANTED, by Geo. Parker—to know who owns the campus since Kraft left.

FOR SALE—Exam. riding slips. See R. M. Stikeleather.

WANTED—One horse and buggy. W. C. Mock.

IF YOU WANT to know anything and everything about anything and everything, see Charlie Barber.

WANTED, to locate—a free air station. See Bob Keys and Sol Homewood.

FOR SALE—2,000 pint bottles, cheap. See R. D. Van Sisk.

WANTED, a new girl—anyone will probably do. See I. L. Langley.

WANTED, to know what the girls at Meredith think of the boll weevil.

WANTED, by Co-ed Ferguson—Some one to say he is cute.

WANTED—All your last year's notes. "Red" Kearns.

WANTED—Something for love sickness. "Speck" Starr.

WANTED—Some one to go on class for me so I can sleep. "Bottles" Barr.

WANTED—A girl who don't like to go to picture shows, who detests the idea of going in a drug store, and one that prefers to stay at home all the time. (A Broke School Boy.)

WANTED—To know what has brought "Simon" Taylor into society so quick. (One trip too many to Zebulon.)

WANTED—To know where the bathhouse is. Freshman Maxwell.

WANTED—To know the Pullman fare from Cary. Ask "Sloppy" Pasour.

WANTED—Something crazy for The Technician. See Me.

WANTED—You to know that your girl appreciates a nice bunch of flowers occasionally. Place your orders with "George" Bradshaw and be assured of quality and service. Adv.

Gas attacks are still popular in college.

A chair for one is holding two, It could not hold another; But suddenly it holds but one, You think it broke? No, mother.
