

Engineers' Exposition Opens May 5

Textile Open House Was A Great Success

Hundreds of people from all sections of North Carolina toured the School of Textiles at State College Saturday and observed the processes of both natural and synthetic fibers and various other factors relative to the textile industry.

Both fashion-wise women and industrialists streamed through the laboratories and class rooms to attend the colorful features of the school's first "open house" program. More than 200 persons were escorted through the building during the first hour of the event, and hundreds of others continued to visit the school until the show closed at 9 o'clock last Saturday night.

Highly Pleased

William M. Barnhardt of Charlotte, president of the Tompkins Textile Society, one of the sponsoring groups, and W. G. Halstead of Norfolk, Va., a senior in the school and one of the student guides, both said that they were highly pleased with the large attendance.

Guests attending the show saw demonstrations of manufacturing techniques, ranging from those associated with making novelty yarns to full-fashioned hosiery, and toured the new \$700,000 additions to the School of Textiles Building. They also saw thousands of dollars worth of new machinery now in use at the school.

Factory Principles

Motion pictures depicting modern factory principles and showing the varied aspects of the textile industry were shown throughout the day in the new modernist auditorium of the School of Textiles. Guests were presented souvenirs of goods produced in the laboratories of the school.

Bobbie Thompson of Raleigh, a young coed finishing her course in the school this year, wore a plaid dress and blouse made entirely of material produced in the school. She was one of the guides during the day-long program.

Explanations of the processes involved in fabric development and the many other processes to be demonstrated were made by the student guides in non-technical terms.

Guests witnessed operations in the opening and picking room, where the first steps in cotton production are made, and later saw the spinning of yarn. They also saw the manufacturing of crepe yarns, the tinting of yarns, and looms for both plain and fancy weaving.

Wool Processing

Wool processing, ranging from the shearing of a sheep until the finished product rolls off the machine, were shown. There were various kinds of dyeing and bleaching machinery in operation and special displays on printing and packaged dyeing.

Various winding and breaking tests, showing the strength of yarn and the durability of fabrics, were performed. Humidity and temperature recording machines were also demonstrated in the testing department.

A new machine, which knits lace-like curtains and table cloths, was shown in the knitting department along with machines for knitting socks, full-fashioned hosiery, and wash cloths. Machines demonstrating how socks are cut, sewn, and seamed were at work in the knitting department.

Students in charge of displays and demonstrations in the seven departments participating were Clyde Rhyne of Lincolnton, Dick Stevens of Asheville, Max Gilbert of Melvin Hill, George Hughes of Asheville, Ken Jenkins of Asheville, Fred Jones of Morehead City, and George Fox of Randleman.

A student steering committee was in charge of arrangements for the program. Members of the committee were:

William M. Barnhardt of Charlotte, president of the Tompkins Textile Society; Reynolds A. Carnevale of Raleigh, president of the American Association of Textile Chemist and Colorists; Harry M. Dalton of Charlotte, president of Phi Psi; J. Allison Davant of Charlotte, vice-president of Phi Psi; Sanford Gluck of New York, N. Y., a representative of the Greater University Student Council; David E. King of Wilmington, president of Delta Kappa Phi; and Richard N. Norrell of Wheaton, Ill., presi-

dent of Sigma Tau Sigma. Sponsoring organizations were the Tompkins Textile Society, Phi Psi, Delta Kappa Phi, Sigma Tau Sigma, the college chapter of the American Association of Textile Chemists and Colorists, and Kappa Sigma Phi, national professional textile society.

A permanent award of a gold cup to the department adjudged to have the best exhibition was won by the Knitting Department. The award will be on display in the lounge.

Coliseum Formally Dedicated Saturday

The mammoth William Neal Reynolds Coliseum at State College, biggest structure of its kind in the Southern States, was dedicated "to the spirit, culture, science, industry, agriculture, and recreation of North Carolina" in formal exercises at the college Saturday afternoon.

An audience of approximately 7,500 persons—sembled for the presentation of an ice revue in the Coliseum—attended the dedicatory program and honored William Neal Reynolds, Winston-Salem industrialist and philanthropist, for whom the building was named.

Speakers

Speakers appearing during the brief dedicatory rites included Governor Scott; President-elect Gordon Gray of the Consolidated University of North Carolina; Chancellor J. W. Harrelson of State College; James A. Gray of Winston-Salem, chairman of the board of the R. J. Reynolds Tobacco Company; and Controller W. D. Carmichael, Jr., of the Consolidated University.

"I am indeed happy," Governor Scott said, "to be here and to pay tribute to Mr. Will as we all know him."

The Governor continued his remarks by lauding the contribution which Mr. and Mrs. Charles Babcock of Winston-Salem and David Clark of Charlotte made toward the erection of the Coliseum. Mrs. Babcock presented the college with the first donation toward the building's construction, and Clark conceived the idea of building the structure.

Work Praised

He also praised the work of Governors Gardner, Broughton, and Cherry, and Senator Frank Graham in laying the groundwork for North Carolina's present period of prosperity and said that the State is indebted for "the vision and inspiration of those who have gone before us."

Expressing the conviction that North Carolina's "greatest field of usefulness" is ahead, the Governor said that the State is now setting the pace in the South and predicted that it will "some day be the leader of the nation."

William Neal Reynolds was slated to attend the ceremonies but was unable to do so because of illness. Controller Carmichael said that he had to undergo a minor operation.

James A. Gray represented Reynolds on the program and said that through his personal association with Mr. Reynolds during the past 30 years he knew of Mr. Reynolds "great interest in the State College and in its wonderful opportunities for service to North Carolina."

He expressed Mr. Reynolds' appreciation for the honor of having the Coliseum named for him.

"As long as I can remember," Gordon Gray said, "I have known, admired, respected, and loved Mr. William Neal Reynolds."

Gray, who will become president of the Consolidated University later this year, said that he was glad that the building had been named in Mr. Reynolds' honor and thanked Mr. Babcock, David Clark, and Billy Carmichael for their work toward the erection of the structure.

In his first appearance at State College since his election as president of the Greater University, Gray said that each day brought him nearer to his duties at State College and that he was looking forward "to a long affiliation with this great institution."

Chancellor Harrelson introduced Governor Scott, Gordon Gray, and Carmichael. Carmichael presented James A. Gray.

(Continued on Page 6)

Ice Rink Open For Student Use

The ice rink in the Coliseum has been open since the Ice Cycles from 1-5 in the afternoon and from 7-11 at night for those who wished to skate or for spectators.

The layer of ice will have been removed for the Junior-Senior, but will be relayed the following Monday. The same hours will be observed with admission charges of \$75 for those with skates and \$25 for spectators continuing as over the past week.

As yet no definite plans have been made for the continued use of the rink. The public demand for its continuation is to be the deciding factor. If the response proves to be as enthusiastic as at present there is a good chance that the rink will become a permanent fixture. If so, plans already under consideration will be refined and put into operation. These entail the purchase by the Coliseum of several hundred pairs of skates and equipment for rental purposes.

There is also a possibility that an instructor might be engaged if his presence is deemed necessary.

The Coliseum does not have any of its own skates to rent at this time, however, Lewis' received a shipment on Tuesday thereby relieving the shortage somewhat.

Inspection Concluded Of ROTC Regiment

Representatives of the Department of the Army and the Department of the Air Force concluded the annual two-day inspection of the State College ROTC Regiment yesterday.

Final features of the inspection included a survey of the class work being conducted in military science at the college, oral examinations of the 1,300 cadets composing the regiment, and a conference of the inspection team with Chancellor J. W. Harrelson, Col. Samuel A. Gibson, head of the College's Military Department, and other college authorities.

Report Later

Members of the inspection team later will file a report of their findings with the Department of the Army and the Department of the Air Force.

Activities of the ROTC Regiment during the inspection were directed by Colonel Gibson and Cadet Col. Edwin B. Gentry of Greensboro, student regimental commandant.

Freshman Danforth Scholarship

Freshmen in General Agriculture and Agricultural Education are invited to apply for the Freshman Danforth Scholarship, which entitles the winner to attend two weeks of leadership training at Camp Mianawac, Shelby, Michigan. The Scholarship will pay the entire cost for the period in Camp, August 14-27, but the recipient pays the cost of travel.

Applicants must be single, non-veterans, and not over 21 years of age on August 14, 1950. Sanford Eugene Youngs from Lexington, N. C. received the 1949 Freshman Danforth Scholarship.

St. Patricks' Dance To Climax Event

Open Letter

Dean E. L. Cloyd
N. C. State College
Raleigh,
North Carolina
Dear Dean:

I earnestly solicit your help in trying to break up the practice of State College students soliciting rides. We have received quite a few complaints lately, particularly on Hillsboro Street, of the boys standing out in the street soliciting rides. Quoted below is a City Ordinance we have had for several years which is Chapter 5 Street Traffic, Section 54, Pedestrians Soliciting Rides: "No person shall stand in a roadway for the purpose of soliciting a ride from the driver of any private vehicle."

I would appreciate very much if you will take this up with the Student Council or anyone whom you think is the proper authority so that it will be passed on to the students.

Your cooperation in this matter will be greatly appreciated.

Yours very truly,
R. R. Hargrove
Chief of Police

Harrelson to Speak

Chancellor J. W. Harrelson will address the Wesley Foundation at its installation of officers for 1950-51 next Sunday night, April 30th.

The Wesley Foundation is the Methodist student fellowship on the State and Meredith campuses. It meets each Sunday for a fellowship supper at 6:00 p.m. and a worship program at 7:00 p.m. in the Fairmont Fellowship Center corner of Horne Street and Clark Ave. All students are invited.

Scores of spectacular exhibits, depicting recent advances in technology will be featured during the 18th annual Engineers' Exposition at State College on Friday and Saturday, May 5 and 6.

Lewis M. Allen of Raleigh, president of the Engineers' Council at the college, said that 11 departments in the College's School of Engineering are now completing plans for displays in the big show.

The event, sponsored by students in the School of Engineering, is expected to draw thousands of people to Raleigh during the two-day period. Invitations have been extended to high school students throughout the State and to other citizens.

Ramsey to Speak

D. Hiden Ramsey, vice-president and general manager of The Asheville Citizen-Times, will open the exposition with an address on the Holiday Hall lawn Friday morning, May 5, at 10 o'clock. A dress parade staged by the College ROTC Regiment will precede his speech.

The exhibition halls will be opened following the address by Ramsey and will remain open until Friday night at 10 o'clock. The program will be resumed Saturday morning at 10 o'clock. The program will be resumed Saturday morning at 10 o'clock when the exhibition halls will be reopened and will be concluded with the annual St. Patrick's Ball in Frank Thompson Gymnasium Saturday night, May 6, beginning at 8:30 o'clock and continuing until midnight.

No Admission Charges

There will be no admission charges, and the exposition will be open to the public without cost or obligation of any kind.

Guests attending the show will see man-made lightning and will take a look at downtown Raleigh through the use of radar. Other magic names in electronics—television and frequency modulation—also will claim their fair share of attention in demonstrations and displays.

Tar Heels are now investing huge sums on road-building projects. Students planning the exposition have made arrangements to show their guests the principles underlying highway and bridge construction.

Exhibits in the Civil Engineering Department will include a scale model of the Huey Long Bridge across the Mississippi River at New Orleans, La., and a proposed super highway in North Carolina, with its clover-leaf intersections aimed at the elimination of traffic tie-ups. Testing of soils and materials used in bridges and roads also will be shown.

Features

Among the features in the Chemical Engineering Department will be glass blowing, cement making, fluid flow, heat transfer, and liquid air demonstrations.

Atomic energy developments will be depicted in displays and demonstrations in the College's Physics Department, which is now completing plans to offer the first curriculum in nuclear engineering in the United States. Guests visiting this department will see the reaction of a Geiger counter to a radioactive isotope and other nuclear physics equipment in action.

Air conditioning and heat insulating materials, in addition to other technological devices, will be shown in the Mechanical Engineering Department.

Work of Diesel motors in propelling freight and passenger trains and in rolling huge trucks along the highways will be exhibited in the Department of Diesel and Internal Combustion Engines.

Engineering Skills

Coordination of engineering skills—through the use of plant layouts, production control boards, quality control charts, time and motion studies, and psychological testing—will be demonstrated by the Department of Industrial Engineering.

The Geological Engineering Department will show mining operations, various rock formations and geologic materials, and the processing of minerals as its contribution to the show.

Demonstration

Manufacturing of North Carolina raw materials into finished products will be demonstrated in the Ceramic Engineering Department, which will show various ceramic processes such as enameling and the operation of a tunnel kiln.

Pictured here are the sponsors of the Junior-Senior Dance to be presented in the William Neal Reynolds Coliseum at N. C. State College Saturday night, April 29, from 8:30 until 12 o'clock. It will be the first dance ever held in the mammoth Coliseum and will feature the music of Tony Pastor and his orchestra. The orchestra will also present a concert in Pullen Hall at the college Saturday afternoon from 4 until 6 o'clock. The sponsors, with their escorts listed, are shown here, with a photograph of the Senior Class ring displayed in the center. Top row, left to right: Anna Gosnell of Raleigh with Wells Denyes of Kenosha, Wis., treasurer of the Junior Class; Alice Yates of Raleigh with Scott Eubanks, Jr., of Greensboro, dance committee member; Mary Jo Sharpe of Lexington with Max Sink of Lexington, ring committee member; and Rosella Stanard of Raleigh with Harold K. Strawbridge of Durham, dance committee member. Center row, left to right: Rida Ingram of High Point, a student at Randolph-Macon College, with Buddy Boyles of High Point, president of the Junior Class; and Juliette Fulghum of Raleigh with Ken Winston of Raleigh, dance committee member. Bottom row, left to right: Dena Brown of Winston-Salem, secretary of the Junior Class; Ann Byrd MacArthur of Fayetteville with Charles LeGrand of Hamlet, dance committee member; Dorothy White of Greensboro with Clair Roberts of Greensboro, co-chairman of the dance committee; and Ann Green of Raleigh with Charlie Buie of Biscoe, co-chairman of the dance committee and vice-president of the Junior Class.

A Challenge

By the time this edition is off the press, the elections will be over and a new set of campus leaders will have been chosen.

We would like to take this opportunity to congratulate those of you who have been fortunate enough to win, and to remind you of the great responsibility which is now yours.

At no time in the history of the college have the student leaders had such a great opportunity to help mold the future of the college. With its vast expansion program the campus will become much larger and more inviting to future students. One of your jobs as a leader is to help put campus life on a par with the rest of the college so these students will come in greater numbers.

In recent months relationships between the students and the administration have been improved. Student leaders would do well to continue to fight for these better relationships through such things as the proposed Student-Faculty Day, meetings with the Chancellor, merit rating for faculty, and other means promoting better understanding between these groups.

Now that the Coliseum is available for student use, it would be desirable to have several meetings of the entire student body each year. At these meetings student problems could be discussed, and the ever present disinterest in the student government and campus affairs in general would probably be lessened.

As you can see, we have mentioned only a few things which the new leaders may consider during the coming year. We hope that you will enter your task in earnest, and develop a better State College!

Sooner or Later

Seldom do Technician editorials go beyond campus problems, but the increasing world unrest over Russia's obstinate refusal to agree with any decent proposal is likely to become a campus problem . . .

A campus problem similar to the one we faced in 1940-'41 and the years following.

Three students were unexpectedly accosted with the question in this week's Inquiring Reporter, "What action do you think should be taken against Russia on the recent airplane incident?" All three of these men evidently had done some serious thinking on the question before they were called upon by our busy reporter.

Each man said he felt that some strong action should be taken in the incident. If the near 4,000 students on the State College campus were faced with the same question, we feel that the majority would answer in a like manner.

Something must be done about the diplomatic jumble in which the U.S. is involved. Will we continue to turn the other cheek until the Russians are ready to march? Will we sit by and predict another war just as we did against Germany only ten short years ago and then continue sitting until it is almost too late?

Many a naughty child has been tamed down by a little of the rod applied in a judicial spot. Let's try a little of the same with the Russians now and possibly save millions of LIVES and dollars later!

BH

Sex on the Campus

Very seldom do we plug a magazine or other publication so that sales may be increased, but there is an article in the May Coronet which every college student should read.

In the wartime and postwar boom of lurid sex tales, college campuses have become one of the leading targets of "yellow" journalism. Rapes, sex orgies, murders, and the whole shining gamut has been run by college students for the benefit of slumping sales departments.

State College, with its dirth of coeds, has been bypassed on the smear campaign, but other college campuses across the nation have suffered.

The Coronet editors assigned interviewers to question educators and students on the problem of sex on campuses, and the answers they got should warm the heart of every college student in the nation.

It is a pleasant surprise to find that at least one group of "sane" adults doesn't consider us a bunch of sex-mad hell-raisers.

Officers of Engineering Society

Pictured above are the newly-elected officers of the N. C. State College Chapter of the American Society of Mechanical Engineers, an organization which works toward higher academic standards in the field of mechanical engineering and sponsors a wide range of programs and events for its members. Left to right: Henry C. Quay of Harrisburg, vice-chairman; James P. Ricks of Rocky Mount, chairman; Charles G. Deese of Kannapolis, recording secretary; and William M. Mann of Rocky Mount, treasurer. Arthur G. Johnson of Greensboro, corresponding secretary, was absent when the picture was made.

With The Greeks

By FRANK PERKINS

If you aren't familiar with the expression "having a Ball"—then ask any of the Sigma Chi's and they can let you in on the "know." It seems as though they started Friday of last week and really had a "Ball" from Friday until Sunday. They started with a picnic Friday and many other social events followed, but the climax of their weekend was their 7th Annual Sweetheart Ball. Miss Dora Anne Cooper of Raleigh, sponsored by Billy Beal, was named Sweetheart of Sigma Chi for 1950.

Sigma Chi, the 19th National College Fraternity to be founded, established its constitution on June 28, 1855. Today Sigma Chi consists of 113 active chapters and 120 alumni chapters. The Delta Epsilon chapter at North Carolina State was installed on May 15, 1948 after two years of existence as a local fraternity known as Chi Sigma.

Not to be left out of the social calendar, the members of Tau Kappa Epsilon had a picnic and party at Sunset Lake last Saturday. It has been rumored that it was more of a "party" with the "beverage of moderation" flowing like wine.

The I.F.C. is planning to sponsor another "Greek Week" sometime in the near future. The date and agencies have not as yet been fully completed, but we feel that if it is as inspiring as the one held last year, it is a project in which every Greek should participate. The object of "Greek Week" is to promote more and better spirit between the different fraternities on

the campus. So Greeks, let's turn out and really make this program go over with a bang.

The hours of study are long and the weather is very warm but Greeks just remember after the finals—exams that is, we also have more finals—dances that is. The dance committee has been very fortunate in getting Charlie Ventura to furnish the music.

Student's Wives Club

The Student's Wives Club will meet Tuesday, May 2 at 7:30 p.m. in the West Branch of the YMCA in Vetsville. Bridge and beginners bridge will be played along with bridge and rummy. Prizes will be offered and refreshments served. All veterans' wives are cordially invited.

They're all Brentwoods and all beauties! Swim trunks in elastic top boxed styles with full built-in supporter—or trimly tailored. And to top off your trunks, Brentwood basque shirts softly knitted of fine combed cotton yarns in smart stripes, novelty knits and all-over effects. Match them up any way you like—but get them both, here, now!

Hudson Belk

Dorm Doings..

Plans to hold the first Inter-Dormitory dance on May 28th have been announced. It is to be an all-out affair and everyone living in a dormitory is invited free of charge. Times for distributing tickets will be announced. Summey Cauble will play for the dance to be held in Frank Thompson Gym. Everyone is encouraged to bring a date, but there will be some unescorted women coming from schools in town.

Cauble to Play

Summey Cauble is also going to play for a dance sponsored jointly by Becton, Welch and Gold Dorn Clubs tonight in the Gym. Floor representatives in these respective dorms have tickets available at 50 cents, and girls will be there from Peace College for those who do not bring dates (or for those who do, for that matter). The trend is away from canned music. Everyone seems to enjoy a band a whole lot more—even if it's only a small band. When we can have live music and women furnished at 60 cents, we know that progress has been made in entertainment.

Tonight is also being used by the boys in Berry for their big affair of the quarter. Sad to say, they have no band—only records—but they do have something else instead: Sunset Lake with plenty of food and, we hope, moonlight.

Canasta Craze

While Berry is threatening to wear out its new ping-pong table, Rufus King reports the Canasta craze has struck Alexander Dorm. They say that it helps one's mathematical ability to play the game. Incidentally, while speaking of games, if your dormitory has room for a ping-pong table or the like, see your Council representatives about getting one installed. Our Athletic Department can arrange to have one made at low cost.

Game Room Popular

Alexander's game room is gaining in popularity since the installation of a coke machine and a plan whereby residents give their old magazines for others to use there.

Turlington and Alexander Dorms are planning another joint dance on or about May 19th. Their dance last quarter was very successful.

The Inquiring Reporter

What action do you think should be taken against Russia on the recent airplane incident?

Marion E. Lettimore, So. Chem. Eng.

I believe that the United States should take a much firmer stance with Russia about this incident. In my opinion, we should inform Russia that they may either apologize for shooting down and make

reparations for the damage or expect an immediate declaration of war. If we allow this incident to go unchallenged, we may expect similar acts of aggression from Russia in the future.

Leo J. Spaunbrook, Jr. Arch. Eng.

How many American men will die at the hands of the Russians? What can we, as a nation, do about it? I believe in military might and a show of that strength. A very strong force of U. S. troops in Germany and a show of those troops will, I believe, hold Russia in her place.

C. S. Jennings, Sr. E.E.

Obviously Russia is trying to see how far the United States can be pushed before we push back. Past actions on the part of Russia certainly lead to this conclusion. The U. S. should firmly demand

an apology and war with Russia, let it be war. If Russia wants war, it would be better for us to give them war today than to saddle future generations with the problem of fighting Russia.

Competition To Be Keen For Jobs In Engineering

Engineering is the Nation's third largest profession and one of the fastest growing according to a study made by the United States Department of Labor's Bureau of Labor Statistics. Great numbers of engineering jobs will be available over the next decade owing to the expected-substantial growth in employment and to the thousands of openings which arise each year because of deaths, retirements, and other losses from the profession.

In the next couple of years, however, new engineering graduates are likely to meet sharply increasing competition for employment. Many members of the record-breaking class of 1949-50 and of the somewhat smaller classes expected in the next year or two may be unable to find professional engineering positions immediately, although their training should help them get administrative, sales, or other technical positions.

Prospects Looking Up
Students who will graduate from engineering school after the next few years—those who are now at the beginning of their professional training or still in high school—are likely to have better employment prospects. By the time they leave school competition for engineering positions should be much reduced, unless many graduates of the next few years who do not get engineering employment immediately, continue to seek such work.

Even in the next few years, the employment situation will vary among the different branches of the profession. In all branches, there is likely to be a continuing demand for men with special abilities or training in such work as research and design. In the past, even in times of depressed industrial activity the engineer who was at or near the top in ability had little trouble in obtaining or keeping a job.

Engineering graduates of the next few years who are unable to get engineering jobs may adjust to the situation in several ways. Some will find that their engineering education has helped to qualify them for administrative, sales, or other technical jobs. Others may remain in school and obtain post-graduate degrees in engineering to improve their chances for employment. Still others may take additional training of other types, built upon the foundation of their engineering education, to help them find employment in other occupations.

QUALITY CLEANERS

Dry Cleaning
One Day Service

1303 Hillsboro St.
Phone 3-6131

employment in non-engineering occupations will find that their opportunities are improved by the growing belief on the part of employers that engineering education is a good background for many non-engineering jobs. On the other hand their chances of finding other employment will be limited by intensified competition for entrance jobs in many fields over the next few years, resulting from the post-war boom in college enrollments.

College freshmen and those who plan to enter engineering school in the future would be well advised to get the best possible training. The minimum educational requirements are being raised gradually and the proportion of engineers with advanced degrees, though small, is increasing. The would-be engineer should endeavor to get the best possible record of achievement in his studies and to broaden his training as much as possible. Furthermore, many employers emphasize the extra-curricular college record of prospective employees.

Junior Danforth Fellowship

Juniors in the School of Agriculture and in Agricultural Education are invited to apply for the Junior Danforth Fellowship for 1950. This Fellowship is offered jointly by the Ralston Purina Company and the Danforth Foundation. It provides funds for the payment of all expenses, including travel, for a stay of two weeks, from July 30 through August 13, in St. Louis, Missouri, and for two weeks, from August 14 through August 27, at the Leadership Training Camp of the American Foundation, Camp Minwacas, Shelby, Michigan.

Applicants must be single, non-veterans, and not over 23 years of age by August 14, 1950. George Wesley King from Clinton, N. C. received the 1949 Junior Danforth Fellowship. For further information and application blanks, call at Room 109-C, Patterson Hall. All applications must be in by May 1, 1950.

Recreation Society Meets Here

The Student Division of the North Carolina Recreation Society held its first annual meeting at State College last week and heard a wide range of discussions on organized recreation.

A delegation of 37 members, including nine University of North Carolina students, seven Woman's College students, and 21 State College students, attended the gathering.

C. N. Carroll, recreation director of the State Hospital in Raleigh, and Jimmy Chambers, recreation director of the Valdese Community Center, spoke on the morning program.

Carroll emphasized that, while the recreational program at the State Hospital has advanced tremendously in the past few years, the outstanding problem facing his office is lack of trained personnel. He feels the problem is an acute one in every mental hospital in the South. In a talk slanted at giving student delegates an inside look at

industrial recreation, Chambers noted that the well-rounded rather than the specialized worker rises to the top in the recreational field. To the new man on a recreation job, Chambers particularly advised on attitude of expressing the desire to help rather than that of grabbing the reins in conducting a program.

After luncheon in the college cafeteria, James S. Stevens, assistant director of the State Recreation Commission, addressed the group on "Statewide Activities." Virginia Gregory, field representative of the commission, followed him with a talk on "Recreation in Towns and Villages."

Prof. Thomas I. Hines, head of the Department of Industrial and Rural Recreation at State College, presided over the luncheon program and assisted with arrangements for the meeting.

Convention

For the first time, State College is being represented at the annual Student Union Convention. Gerald Erdahl, director of State's embryo Student Union, and Jack McCormick, chairman of the student union planning committee, are the representatives from State.

Representatives of about eighty colleges and universities throughout the country will be represented at the convention. These meetings are held annually in order to keep the personnel connected with student unions up to date on new developments and trends in student union management. The representatives from State College hope to gain much valuable information to aid them in the organization of our own student union.

Eighteen Freshmen Initiated Into Phi Eta Sigma Fraternity

Eighteen members of the freshman class were inducted into Phi Eta Sigma, the freshman scholarship fraternity at a formal initiation ceremony held in the Faculty Club Room of the Y.M.C.A., April 19th.

Following the impressive ceremony at which the initiates were awarded their keys, the group of old and new members adjourned to the Woman's Club Building for an initiation banquet. Following the meal President Jack McCormick introduced Mr. Roy S. Braden, City Manager of Raleigh, who spoke on the meaning of honor and the duties and responsibilities of being an honor student and citizen.

New Members

The new members of Phi Eta Sigma are:
D. A. Adams, Charlotte; H. R. Boyette, Hamlet; J. D. Brooks, Washington, D. C.; A. T. Cifuentes, Cuba; J. O. Davis, Raleigh; W. E. Dungan, Raleigh; T. W. Holmsen, Flemington, N. J.; E. C. Horbelt, Maplewood, N. J.; T. L. Jacobs, Greensboro; F. B. Jones, Hendersonville; D. S. Matheson, Greensboro; S. H. Minter, Bryson, N. C.; R. J. Orlate, Columbia, S. C.; R. E. Pitts, Burlington; J. P. Smith, Paducah, Ky.; J. F. Sprinkle, Raleigh; M. R. Thurman, High Point; B. L. Watson, Rural Hall.

The new members represent about 2% of the total freshman class. Membership in this fraternity is quite an honor and is open to those freshmen who have scholastic average of 2.5. That is, they must have made half A's and half B's during the fall term. A new group will become eligible after this term based upon an average of half A's and half B's for the whole year.

Chi Epsilon

State College Chapter of Chi Epsilon, national civil engineering honorary fraternity entertained at an informal banquet at the Tar Heel Club Friday, April 21, with a dance following the banquet. Entertainment was provided by the new members.

Selection for membership in Chi Epsilon is based on scholarship, character, practicality, and sociability. This fraternity now boasts 34 active chapters in the major engineering schools throughout the country. The new

members are: Linzy Elwood Boyles, Jr. of High Point, N. C.; David Harding Baxter of Springdale, Pa.; Charley J. Frazelle of Richlands, N. C.; Rudy Lee Griffin of Greensboro, N. C.; Joseph E. Hardee of Enfield, N. C.; Albert Malcolm Lyster of Newton, N. C.; Leon Ronald Simon of New Kensington, Pa.; and Robert Weldon Smith of Hamlet, N. C.

As part of their pledge duties, these men completed the survey of Camp Durant, Boy Scout camp, 10 miles north of Raleigh which had been started by their spring project.

Capt. Paul Buskey, Middlebury, '38
Air Intelligence, U.S. Air Force

An excellent student at Middlebury College, Vermont, Paul found time to win the coveted All Sports Trophy in his senior year. He graduated in June, 1938.

He then joined a coated paper mill firm as research and control man. Pearl Harbor changed all that—Paul went to Maxwell Field to begin Aviation Cadet training.

An outstanding Cadet, 2nd Lt. Paul Buskey was held over as an instructor after graduation. Then he was assigned as a pilot in the Air Transport Command.

His big plane education was topped with 23 missions over the far-famed "Hump," flying C-54 transports. After V-J Day, he stayed on in the Far East until March of 1946—specializing in Air Intelligence.

Back home, after accepting a Regular Air Force Commission, Captain Buskey went to Air Tactical school, was there rated an outstanding student, and was assigned to Command and Staff school.

Today, Captain Buskey is an Air Intelligence Officer on MATS Headquarters Staff at Andrews Air Force Base near Washington, D. C. He looks forward to a rewarding future in the U. S. Air Force.

If you are single, between the ages of 20 and 24½, with at least two years of college, consider the many career opportunities as a pilot or navigator in the U. S. Air Force. Procurement Teams are visiting many colleges and universities to explain these career opportunities. Watch for them. You may also get full details of your nearest Air Force Base or U. S. Army and U. S. Air Force Recruiting Station, or by writing to the Chief of Staff, U. S. Air Force, Air Aviation Cadet Branch, Washington 25, D. C.

U. S. AIR FORCE
ONLY THE BEST CAN BE AVIATION CADETS!

A Photo Finish

Tyler Wadsworth is shown above as he breaks the tape in the 440 in the recent dual meet with Duke. Wadsworth's winning time in the quarter mile was an excellent 50.4 seconds. Grisson of Duke was second, and Reeves of Duke was third. (Photo by J. R. Patterson)

Davidson And Duke Next For Wolfpack

Baseballers Take Lead In Southern Conference

State's Wolfpack, leaders in the Big Four and also southern division of the Southern Conference as of Monday's game, paused and proudly surveyed its 5-1 Big Four record as the halfway mark Friday brought a lull in baseball activities.

A lone defeat by Wake Forest, that balanced by last Saturday's 3-1 win over the Deacons, and two victories each over Duke and Carolina throws a spotlight on the State team as second-half Big Four play gets under way next week.

The State nine by virtue of its strong pitching and timely hitting has undertaken the task of knocking Wake Forest from its perennial perch atop Big Four standings. Its first-up disposal of the Deacons in the last tussle indicates the fervor of the Wolfpack attack.

Pitching has been the long suit in Wolfpack play thus far. Three of the last four Big Four games have seen State twirlers go the route. Bob Smith with a 2-0 record and Lunford Lewis with a 3-0 mark have built leading won-lost records. Irvin Page has a split in four games. Page has been throwing stronger with every game and should rack up a better average by season's end.

In spite of its record Wolfpack hitting has yet to reach the heights expected by Coach Vic Sorrell. The Pack has come from behind several times to win only to find itself out-hit by its opponents. If the hitters once consistently meet the ball, the State mentor figures his nine will be hard to beat in the Conference closing drive.

Heavy Hitters Bill Smith, slick-fielding first baseman, has welded the heavy stick in State contests to date. Charlie Westbrook, rightfielder, and Bill Fowler, free-wheeling centerfielder, have garnered a majority of the remaining Wolfpack knocks.

The Wolfpack enjoys a rest until Thursday, May 4, when Davidson's Wildcats come to Raleigh for a Southern Conference engagement. The Wolfpack took its only contest with the Wildcats in a 14-11 slugfest at Davidson.

Duke The Duke Blue Devils, without a Big Four win until last Saturday's victory over Carolina, will be hosts to the State nine in Durham Friday, May 6.

Before these Big Four games, however, Coach Sorrell's charges travel to Laurenburg Saturday for a contest with a McColl, S. C. semi-pro club. The game is being promoted by Curt Ramsey, former Wolfpack hurling ace, for the benefit of underprivileged children.

DORMITORY INTRAMURALS

By NEILL POSEY

\$3,600 has been appropriated for intramural use next year.

Thank God—thank Gene Jeffords, newly elected Inter-Dormitory President, Wiley Gouge, Chairman of the Intramural Athletic Board, Ned Wood, Assistant Dean of Students and all the committee for the Allocation of Student Activity Fee.

Even before Jeffords was elected President of the I.D.C., Intramural Athletic Board members and interested students had asked him to spearhead the drive to obtain the appropriation. Jeffords responded, got the appropriation in record time with the help of Gouge and Wood.

Information

Gouge through Mr. J. F. Miller supplied Jeffords with all the information that he needed when the two appeared before the committee. Under Gouge's capable direction the board has been highly successful as judged by its most severe critic J. F. Miller, Director of Intramurals.

So strongly did Wood speak up for the appropriation that a new corner at the meeting would have adjudged him to be a student instead of a dean except for Wood's more mature appearance. Wood's stand may be a result of Chancellor Harrelson's recent letter to faculty members urging them to show the student that State College is interested in him.

However, Wood has always been for the students. Most of the time we, the students, gripe about the times when student and faculty do

not harmonize. This is one pertinent example showing that the college is interested in the student.

Argument

Arguments used by Jeffords, Gouge and Wood in asking for the appropriation over other activities were: that the Student Activity Fee is to be spent for the students; that intramurals touches more students, both fraternity and dormitory, than any other activity on the campus; that J. F. Miller has done an excellent job of administering last year's \$3,000 appropriation and that the students showed that they wanted the intramural program evidenced by them voting Mr. J. F. Miller as the man who had done the most for athletics at N. C. State College.

The hard hitting Technician Staff softball squad defeated the State College Print Shop team in a practice tilt last Tuesday afternoon. Lefty Joe Hancock went the distance for the Technician. Mike Grasso and L. B. Phillips pitched for the Print Shop. Bob Phelps hit for the circuit in the game's only home run driving in 2 runs ahead of him.

Track Prelims

Since the dormitory track prelims was moved from May 5 to May 8, league officials have noticed that this date conflicts with dormitory regularly scheduled horse-shoes. The track prelims will be held May 8. However, some provision will be made about the horsehoe games occurring on the

Wolfpack Takes Win Over Deacons; Tar Heels

State College's vastly improved baseballers took undisputed possession of first place in both the Big Four and Southern Conferences Monday with 9-5 win over Carolina.

The Wolfpack, which had been held to two hits for eight innings, broke loose in the last of the ninth to score six runs. In this inning, nine men took a trip to the plate.

Big Inning

The big inning began when John Norrell was safe on Sneezy Senter's third boot of the afternoon. Pinch-hitter Bill Martin dropped a soft line single back of first. Paul Dinan then singled to center to load the bases and Charlie Westbrook, State's right fielder, shot a hot streamer into right field to score two runs. Bill Fowler followed Westbrook's blow with a double to left, and at this point Pitcher Bill McGinn, who had tossed three-hit ball until the disastrous ninth, was yanked in favor of Lotes Holmes.

Holmes also suffered from the Wolfpack assault by yielding a two-run double to Bill Smith and a long outfield fly by Bill Wilhelm which scored one run. Ned Council and Don Cheek grounded out to end the slaughter.

The winning pitcher for the Wolfpack was Bernie Bean, who was the second relief hurler of the afternoon for the locals. Lundford Lewis started, was relieved by Irv Page, who in turn was relieved by Bean. Lefty Bill McGinn was the loser.

Win Over Deacons

Over at Wake Forest last Saturday afternoon, the Pack gave the Deacons their second licking in 16 games, setting them back 3 to 1. Sophomore Bob Smith, who began to weaken in the later innings, went the route for the Wolfpack. He had a shut-out until the ninth inning when Charlie Teague lashed a double to deep left, took third on a bad throw-in by Don Cheek, and scored on a long fly by Gene Hooks.

Wolfpack Scoring

The Wolfpack scored all of its runs in the lucky seventh. First baseman Bill Smith and catcher Bill Wilhelm started the inning off with walks. Don Cheek's sacrifice advanced both runners and Ned Council sent a slow roller to third and Smith beat Gene Hooks' throw home for the first State run.

With Wilhelm on third and Council on first, Shortstop Roland Brinson sent a slow roller past first. Wilhelm crossed the plate followed by Council when right fielder Livick booted the ball into the crowd along the right field line.

Some five minutes and a few hundred heated words later, Council was ordered back to third base by Umpires Stallings and Veasey, who sweated out a genuine rhabarb brought on by disagreement over ground rules applicable to the play.

Council did score, however, two batters later when Paul Dinan sent a long fly to centerfield. State, at that point, had two hits, three runs—and the ball game.

SPORTS PERSONALITIES

By JIM TWYFORD

The teams of Robert S. Dobbins, Athletic Director of Becton, have been winning championships ever since he took the job.

Currently his football team is a strong contender for the dormitory football championship. That championship would mean that for the first time in dormitory league history a team has copped the triple crown—that of winning the championship in touch football, basketball and softball.

His No. 1 Becton team has piled up so many intramural points that it is almost assured first place in the final dormitory league standings for this year even without an additional point coming in from a championship softball team.

In his first year as athletic director, his teams have won first place in touch football, basketball and boxing. The volleyball team also placed fourth in the final standings in that department. Bobby is starting his second year of directing this spring, and he thinks that he can add another first place with his football team.

Gastonia Product

Bobby went to high school in Gastonia and graduated in the spring of 1947. He played football and basketball while there. However, one of the best games he played was as a member of the 1946 Shrine Bowl team.

Bobby came to State in '47. He is now a Junior in Civil Engineering. Immediately after he entered State, he joined in on all of the intramural sports. He made the all-dormitory touch football team his first year. Last fall as a playing manager, he made the All-Campus team. Besides his job as athletic director, Bobby is also Vice-President of Becton Dormitory Club.

Bobby attributes his success as athletic director to the congenial feeling among his Becton friends. He says that the boys want to play and that he does not have to hunt for players when Becton has a game. He failed to mention his excellent work in bringing about this situation.

High Hurdle Action

The shot above shows some of the fast action in the 120 yard high hurdles event against Duke. Chuck Chambers of State, second from the right, took second in the event which was won by Reeves of Duke. The Blue Devils won the meet, 80-46. (Photo by Dick Wooten)

Cindermen Lose To Duke, 80-46

State College's varsity and freshman tracksters suffered defeat in their dual meets with the Duke Blue Devils Saturday afternoon, the varsity losing by 80-46, the frosh, 98-33.

The local cindermen placed second and thirds in every event except the pole vault, but were able to capture but three firsts in bowing to the powerful Blue Devils. The Wolfpack placed winners in the mile, two mile, and the 440.

State Leaders

Tyler Wadsworth, Dave Dubow, and Chuck Chambers were the leaders for Coach Fitzgibbons' crew. Wadsworth took first place in the 440 with an excellent time of 50.1 seconds, and came back later to place second in the 220. Dubow, State's middle distance veteran, won first place in the mile run and placed second in the 880. Chuck Chambers held down the

hurdles events by taking seconds in both the 120 high and the 220 low hurdles. He also placed third in the 100 yard dash. Another leader for the local tracksters was Dusty Dostanko, who placed second and third respectively in the 80 and 100.

Henry Poss of Duke scored first places in the 100-yard dash, 220-yard dash and the broad jump to lead the scoring with 15 points. Jim Reeves marked up first places for the Blue Devils in the 220-yard low hurdles and the 120-yard high hurdles and added a third spot in the 440-yard dash for a total of 11 points.

The only record of the afternoon was set in the freshman two-mile run when Clyde Garrison of High Point established a new State College track mark with a time of 10 minutes and 09.5 seconds. Garrison clipped 12 seconds off the old

time of 10:21.5 set in 1921 at the West Raleigh school.

Best Time

One of the best times of the afternoon was the 9.6 second time turned in by Poss in the 100-yard dash. It equaled the State track record held by H. M. (Red) Lewis, Duke track coach, who holds the Southern Conference mark which was set during Lewis' undergraduate days at Duke in 1935. The time yesterday, however, could not be recognized as officially equaling the Southern Conference record because of the wind conditions on the track.

FRATERNITY INTRAMURALS

By PETER KOCH

The frat softballers played their third games last week, and only Sigma Chi and TKE are undefeated as of April 22nd. Sigma Chi kept up their winning ways with a 13-8 victory over Lambda Chi. Johnson walloped a homer for the winners. TKE, sparked by the pitching and hitting of Lumley, shut out KA 5-0. Lumley gave up only one hit, and got two for himself. SAM and Delta Sig are tied for leadership in Section 1. SAM and Sigma Pi staged a real slug-ging match, and the Sammy's came out on top 11-10. Each team scored 7 runs in the 3rd, and 8 in the 4th. Delta Sig scored 10 runs in the first two innings to win easily over FKA 10-4. SFF walloped SAE in a Section 2 contest 19-1. Kappa Sig and Pi Kappa Phi (Continued on page 6)

Mail Service Changes

In accordance with Orders of the Postmaster General, it becomes necessary to restrict the delivery of mail to dormitories on the North Carolina State College Campus to one delivery per day, beginning immediately.

Also, orders have been issued discontinuing directory service for all ordinary mail other than perishable matter, special delivery, registered, insured and C.O.D. mail. Therefore, it is important that all mail bear a complete address—for example, mail addressed to a college dormitory should bear:

- Name of student
- Name of dormitory
- Box number
- State College Station
- Raleigh, N. C.

This will insure delivery of such mail without directory service and will prevent it being returned to the sender because of inadequate address. All correspondents should be advised to supply the complete address on all mail addressed for delivery on the College Campus.

It will probably be necessary to make some changes in the collection service on the College Campus but these changes will not be put into effect until after discussion of the matter with students representing campus groups.

D. Stoton Insee
Postmaster

Former Textile Professor Dies In Australia

Dr. Frederick T. Peirce, for several years director of research in the School of Textiles at State College, died at his home in Sydney, Australia, on Tuesday, April 11, college authorities were notified.

Dr. Peirce joined the State College staff in the spring of 1945 and remained on the faculty until the fall of 1948 when he resigned because of illness. Following his resignation, he returned to his home in Australia, his native country.

With Testing Department

Prior to accepting the appointment at the college, he served for 24 years as head of the testing department of the Shirley Institute of England, the world's largest and oldest textile research organization.

As a student, he specialized in mathematics and physics at Sydney University and later received his Doctor of Science degree from that University on the thesis, "The Structure and Elastic Properties of the Cotton Hair."

For two years he undertook post-graduate research on X-ray crystallography, under Sir William

Bragg, at University College, London, where he also lectured in physics. He was a fellow of the Institute of Physics, the Textile Institute, and the Royal Society of Arts.

He was a veteran of the Australian Army during World I and was responsible during World War II for the development of a number of outstanding textile products, including cotton fire hose and the well-known "Shirley cloth" for raincoats used by both the British and U. S. Armies.

Author

He was the author of about 40 significant textile publications dealing with various research accomplishments and wrote more than 10,000 special reports and confidential memoirs to the British textile mills, government departments, and users of textiles.

In his capacity at State College, Dr. Peirce developed and directed the program of fundamental and applied research in the School of Textiles, with particular emphasis on new fabric development. He also lectured to students in fiber properties, textile testing, and mechanical fabric design, both at the graduate and undergraduate levels.

Intramurals—

(Continued from page 5)

same day. Dormitory athletic directors must remember to bring their track entries to the gym Tuesday, May 2 at 7:00 p.m. No entries will be allowed after that date.

No. 2 Becton and Sigma Nu will play at some near date to decide which team will represent State at the Big Four Sport's Day. The two teams pictures appear in this issue of THE TECHNICIAN.

Eliminations

Remember May 2, 7:00 p.m. at the gym interested men will meet to arrange eliminations to decide who will represent State at the meet. Any State student is eligible to try out for football, horseshoes, table tennis and tennis.

Since Bill Griffin graduated last quarter No. 2 Burlington has been slipping. She lost a softball game to weak No. 1 Owen, was eliminated from tennis by No. 1 Bagwell and was eliminated from horseshoes by Berry. This quarter she may lose her hold on second place in total intramural points.

No. 2 Becton has reached the semifinals in tennis without playing a game. Her opponents have forfeited to her each time. However, in the semifinals she meets Welch, a team which has a long list of no forfeits.

Speaking of tennis, many of the players and some of the managers do not know of the first six game rule. This is a special rule and was added to shorten matches. The rule says that if a team wins six games, a tie will be played. Team getting six games first is winner.

Frat—

(Continued from Page 4)

head Section 3. Each team has a 2-1 record. Kappa Sig scored 2 runs in the top of the 5th to edge the Pi Kappas 7-6. It was PKP's first loss. PKT squeezed by Sigma Nu 7-6 in the other game in this section. Hinshaw of AGR wallpopped a home run in the last of the 6th to break up a 4-4 tie and give the "Ag" men a 5-4 decision over PEP.

Big 4 Sports Day will be held here at State May 18th at 2 o'clock. There will be a meeting of all those interested on Tuesday night May 2nd at the gym at 7 o'clock.

Softball May 2nd:

- SAM vs. Delta Sig
- SAE vs. Lambda Chi
- Kappa Sig vs. PKT
- PEP vs. TKE

Softball May 5th:

- PKP vs. PKT
- AGR vs. TKE

Horseshoes May 1st:

- PKP vs. Delta Sig
- Sig Pi vs. Lambda Chi
- Sig Chi vs. SPE
- PKT vs. Sig Nu

Coliseum—

(Continued from page 1)

In lauding William Neal Reynolds and his work toward the development of North Carolina, Carmichael said that "it is appropriate that the Coliseum be named for him," declaring that no man in the State is more deserving of this recognition. After his tribute to the Winston-Salem citizen, Carmichael turned to the Governor and said:

"I would be a poor Chesterfieldian, Governor Scott, if I did not say that it was a Lucky Strike for North Carolina when Reynolds hit on Camels."

Carmichael also praised David Clark for conceiving the idea of building the Coliseum and said that Clark enlisted his (Carmichael's) aid in presenting the matter to Mr. and Mrs. Babcock. Mrs. Babcock, he reported, decided to make a donation for the structure providing her uncle, William Neal Reynolds, approved it. Mr. Reynolds heartily endorsed the move, and the building was started with the late Governor Broughton's decision to provide State aid and with WPA help.

In a statement made in the program distributed during the dedicatory exercises, Carmichael reported yesterday that Mr. and Mrs. Babcock made an additional gift of \$52,000 for the Coliseum's ice rink.

In opening the program, Chancellor Harrelson, who presided over the exercises, said that yesterday was "a good day for the State College" and thanked the persons and groups responsible for the Coliseum's construction.

Listed on an "honor roll" of those who helped build the 12,000-seat Coliseum and included in the dedicatory program are the following names:

Mr. and Mrs. Charles Babcock, William Neal Reynolds, J. Melville Broughton, R. Gregg Cherry, W. Kerr Scott, Frank P. Graham, John W. Harrelson, J. Graves Vann, Ross Shumaker, Theodore S. Johnson, Robert G. Dayton, David S. Coltrane, L. D. Moore, Frank Turner, E. B. Vick, Wilmer Z. Betts, W. H. Hitchcock, and David Clark.

Also published in the program was this statement by Chancellor Harrelson: "The name of Reynolds is inseparably interwoven into the agricultural and industrial life of North Carolina."

"The trustees in honoring William Neal Reynolds, by naming one of the most important buildings in this state for him, also honor State College."

State Students Help In WSSF Drive

State College students and faculty members have contributed \$1,980.67 to the World Student Service Fund for the relief and rehabilitation of personnel in colleges and universities in foreign lands.

Announcement of the college's donation to the WSSF was made here yesterday by Louis W. Hine of Winston-Salem, secretary-treasurer of the drive, who said that the final check covering the entire contribution has been mailed for distribution abroad.

Funds contributed, he said, will be used on the basis of need and without regard for color or creed. Donations made by faculty members, he stated, will be spent for books to be used by teachers in the colleges and universities of war-torn countries.

The faculty donated \$662 while the students gave \$1,368.67.

Sigma Chi's Select Annual Sweetheart

Week-end social activities found Sigma Chi's Delta Epsilon Chapter in full swing. Friday night, a picnic supper was served to Sigma and dates at Crabtree Creek, followed by group singing around the open fire and dancing.

Climax of the week-end festivities came on Saturday night, when the Seventh Annual Sweetheart Banquet and Ball were staged at the Hotel Sir Walter. At the banquet, Prof. W. N. Hicks pronounced the invocation. Wink Kirkman was emcee, and the featured speaker was Gardner B. Allen of Jacksonville, Florida. Mr. Allen is Grand Praetor of the Georgia-Florida Province of Sigma Chi. Miss Dora Anne Cooper of Raleigh, a student at Duke University, was named Sweetheart of Sigma Chi and was presented with a loving cup and two-dozen white roses by Emmett Bringle, president of the State College Chapter. Dancing to the music of Jimmy Perkins and his Orchestra followed the banquet.

Lewis State College

"SEA LEGS"—The man who takes his tailoring neat takes to Jantzen's Sea Legs... an all-around action trunk sporting double front pleats, zip fly, contrasting brass-buckled belt, and mighty smart side piping. Two things every college man should know!

1. This is a **Coology Major**. Takes life for granite. An earthy type with rocks in his head. Thinks nitrates are cheaper than day rates. Wouldn't be caught ossified without a "Manhattan" shirt.

2. This is a "Manhattan" Range—widespread collar with French cuffs. Does something for your natural contours. That narrow "Manhattan" tie is a pretty smart specimen, too.
