NSA Fight Rages; Not Enough Info

By PAUL FOGHT

A clear cut split in the Campus Government developed during Tuesday's opening debate on the question of retaining membership in the National Student Association. The president and the vice president of the Council have taken leading roles in opposing factions. A full hour of discussion found the Council unable to reach a decision and forced to appoint a committee to gather information about NSA.

McCracken Favors

President McCracken opened the discussion with a 25 minute speech in which he presented his personal views and opinions. McCracken restated the achievements of the past national congress of NSA and set forth the present objectives of the organization. These are, he stated: to serve as an information exchange, to act as the representative of the nation's students in dealing with national and international problems, to provide leadership for projects which will benefit the students and to promote the causes of student self government.

In closing he asserted that NSA is primarily a "cultural organization" whose programs he strongly supports.

Motion Made

Immediately following McCracken's speech Bill Herrmann, Textile representative, took the floor and submitted a motion abolishing State's association with the National Student Association.

Herrmann said that he wished "to congratulate Jack for his fine 25 minute filibuster," and then went on to state that his objections to the organization were based on

Another representative who its expense and its failure to make

any concrete contribution to this campus.

In answer to an earlier statement by McCracken in which he announced that the Promotions Committee had been set to work preparing a paper on the activities of NSA, Herrmann replied that no further information should be needed since NSA had been discussed at two previous meetings and had been written up in the Technician.

Brown Opposes

Following Herrmann, Vice President Hal Brown went on record as also opposing NSA on the basis of its political intentions which he claimed were socialistic.

The opponents of NSA were criticised for their stand by Sandy Gluck, ex-officio member of the Council and a former NSA committeeman. He said, "NSA has tremendous possibilities since it is the only national organization representing the students, and the students of this country are one of the largest single groups or classes of people."

Wade Johnson is chairman of the Recreation Committee and has an assistant from each of the dorms. Their program includes improving dormitory games, a bowling league, the presentation of bridge, checkers and golf tournaments, and crafts, dramatic, music, and outing activities as desired.

The Department of Industrial and Rural Recreation appoints students from their department to assist with each of the events. These students in Recreation are specialists in most of the activities, and they lend a hand where it is needed most.

According to Professor Tom Hines, head of the department of Industrial and Rural Recreation,

(Continued on Page 5)

IDC Moves Forward; More Service To Dorms

By MAYNARD SHIELDS

The Inter-Dormitory Council is on the move! This year they have developed a plan whereby they can work in cooperation with the Department of Industrial and Rural Recreation to present an overall program of social and recreational activities to the dorm students at State College.

At the beginning of the school term, the I.D.C. met and appointed two committees, a social committee and a recreation committee. In addition, they voted to ask the Industrial Recreation Department to help in directing activities.

General Program

The Social Committee is headed by Sam Furches, and serving under him are the social directors of the 11 dorms. The general program planned by the social committee for this year includes a special social event for each dormitory each term, alone or in cooperation with other dorms, a free I.D.C. dance for dorm students once each term and the organization of special dancing classes for Freshmen who want to learn to dance.

Wade Johnson is chairman of the Recreation Committee and has an assistant from each of the dorms. Their program includes improving dormitory games, a bowling league, the presentation of bridge, checkers and golf tournaments, and crafts, dramatic, music, and outing activities as desired.

Specialists

The Department of Industrial and Rural Recreation appoints students from their department to assist with each of the events. These students in Recreation are specialists in most of the activities, and they lend a hand where it is needed most.

According to Professor Tom Hines, head of the department of Industrial and Rural Recreation,

New Plans Made For Religion In Life Week

The annual campus religious observance, "Religion in Life Week," will be held the week of November 5 to 12. The schedule as announced by Mr. Edward King, secretary of the "Y," actually begins with a Freshman assembly on Tuesday, October 31.

This meeting will be held at noon in Pullen Hall. The speaker for the event will be Dr. Howard Powell, pastor of the Edenton Street Methodist Church.

An innovation to the observances this year will be a series of assemblies to be held by the individual schools of the College. On November 7 the Ag School will meet in Pullen Hall and the Textile students will assemble in the Textile School Auditorium. Both of these meetings will be held at noon.

On November 9th the Engineering School will assemble in Pullen Hall at 1 o'clock and the School of Education will meet in the Textile Auditorium at noon.

The annual fraternity church service will be held in the West Raleigh Presbyterian Church at 7:30 p.m. on Sunday, November 5th.

No Serious Job Shortage For Engineers; Less Men Entering Field Of Study

An acute shortage of graduate engineers will be experienced by the nation's industries during the next five years, Dean J. H. Lampe of the School of Engineering predicted today.

Dean Lampe pointed out that there probably will be more than two jobs for every student graduating from engineering schools of the country unless there is a drastic change in our present economic situation. At the present time, he said, enrollments in engineering schools have dropped below prewar levels with no indication that the number will increase in the near future.

Shortage Already Felt

"At State College," Dean Lampe declared, "the shortage already can be felt in that we are receiving more requests for men than we can fill."

During normal times, industry absorbs a minimum of 20,000 young engineers each year, Dean Lampe asserted, and including military

needs, over 30,000 new men are needed each year. Current enrollment figures show, he said, that there is a decreasing rate in the number of engineers graduating; and by 1954 there will be only 9,000 engineers receiving diplomas.

The engineering dean reported that the average needs of industry will be far above the minimum requirement of 20,000 men a year. During the past year, he emphasized, 50,000 June graduates were absorbed by industry. With the increasing need for technically trained men, Dean Lampe added, a drop

Attention Ceramic Engineers

There will be a meeting of the American Ceramic Society Wednesday night, November 8, at 7:00 p.m. It is requested that all Ceramic Engineering students be there. The meeting will be held in Quonset 9.

Profs And Students In Heroic Rescue Aid

By CHARLES HAMILTON and PAUL FOGHT

The Raleigh Police Department, according to a report from Dean Wood, has congratulated the State College students and faculty members who aided in handling the traffic accident at the intersection of Hillsboro and Enterprise streets early Thursday afternoon.

These students and instructors were instrumental in assisting the injured driver of one of the vehicles and in directing traffic at the scene of the accident until the authorities were able to take charge.

Collision

The accident occurred at 1:40 p.m. when a truck loaded with heavy lumber crashed into the rear of a semi-trailer truck moving west across the intersection after having stopped for the traffic light near Primrose Hall, home of the Geology Department.

The cab of the rear truck was demolished and the driver pinned behind the wheel when the heavy load was thrown forward by the impact of the collision.

Instructor Calls

The police received the call at 1:43 p.m. This call was made by Warren Steele, an instructor in the Geology Department, and an eye witness to the crash.

At the moment of the collision Steele was driving east on Hillsboro Street and was crossing the intersection when the wreck occurred.

After calling the police Steele and Glenn McKinley, also an instructor in the Geology Department, directed traffic past the scene.

Steele Interviewed

In an interview with a TECHNICIAN reporter Steele criticised the actions of the law enforcement officers. He stated that the ambulance arrived ten minutes before the first police officers appeared.

He also said that the first officer on the scene seemed to make no effort to control the gathering crowd or the traffic. "The officer just milled around in the crowd while dozens of people stood within touching distance of the cab in which the injured man was trapped.

"Gasoline was spilled on the street and many of the bystanders were smoking, creating the additional hazard of fire." This was the statement of the first man on the scene at the accident.

Keiger Hero

Witnesses reported that the efforts to remove the injured man from the truck were directed not by police, but by Boone A. Keiger, a senior in civil engineering.

W. R. Parks, of the School of Engineering, said, "Keiger should receive a medal for his initiative in taking charge of the rescue operation, a job which I think the police should have done."

At first efforts were made to hack through the cab with a meat cleaver brought from a nearby eating place. An attempt was also made to open the cab with a wrecking bar furnished by L. B. Phillips, manager of the college print shop.

The seriously injured driver was removed successfully after the two trucks were pulled apart, giving the rescuers room in which to work.

Driver Conscious

The driver was conscious during the entire 45 minutes that he was trapped. Efforts were made to obtain a doctor to administer a hypodermic to ease his suffering, but none could be reached. W. J. Melchior, a State student, and Emma Jean Minshew made over ten calls but were unable to find a physician willing to make the emergency call. The driver was not given a hypodermic until he reached St. Agnes Hospital.

Phi Kappa Tau Wins Scholarship Cup

According to information released by the office of the Dean of Students, Phi Kappa Tau fraternity is the winner of the Interfraternity Council's Scholarship Cup, awarded annually to the fraternity on campus having the highest scholastic average for the previous year.

The numerical average for the Phi Taus for the year was 80.94, as compared with the all-men's average on the campus. Competition for the cup has been very keen for a number of years, and this year's winner provides a name on the cup for the first time. The cup has been held for the past three years by the neighboring Alpha Gamma Rho fraternity.

Highest individual average in the fraternity at the present time is held by William Boyd of Henderson. Boyd's average is 2.33.

The local chapter of Phi Kappa Tau has attained national recognition by its scholarship record, due to its comparative standing in its national fraternity structure, and due to the records and publicity of the Scholarship Committee of the National Interfraternity Conference.

Junior-Senior Heads Class Meet Business

Ed. Note: As a service to the student body in general and to the Junior Class specifically, THE TECHNICIAN will print the minutes of each class meeting.

The meeting of the Junior Class of N. C. State College was called to order in Pullen Hall at 12:15 on October 26, 1950 by President Ray Lofin.

A treasurer's report was given by Joe Stall. The class now has \$533.39 in the treasury with approximately \$10.00 in unpaid bills, or a final total of (approximately) \$523.39.

A motion was made that we as the Junior Class of N. C. State College sponsor the Junior-Senior Dance for the school year 1950-51. The motion was seconded and passed.

A motion was made that we have a sponsor's page in THE AGRO-MECK for the Junior Class and that \$40 be allotted for the expense of this page. The motion was seconded and passed.

Then a motion was made that the sponsor for the Junior Class be chosen by the president, as has been the policy in the past. The motion was seconded and passed.

Vice President Hank Smith gave a report on the poll conducted for the Juniors during registration. The report was as follows:

- (1) Have the dance in the coliseum, if possible. Majority voted yes.
- (2) Have the Saturday afternoon concert in the coliseum. Majority voted yes.
- (3) Allow students free admittance to concert but charge invited general public. Majority voted yes.
- (4) Have informal dance with local band on Friday night. Majority voted yes.
- (5) Top three favorite bands for Saturday night dance were: Ralph Flanagan, Sammy Kaye, and Harry James.

The meeting was then adjourned. Respectfully submitted, George B. Pruden, Secretary.

The mining industry in Canada's third largest primary industry from the standpoint of gross value of products, agriculture being first and forestry second. Canada today leads the world in the production of nickel, asbestos and platinum, and is the second largest producer of gold, zinc, cobalt and aluminum.

Theta Tau Initiates

Theta Tau recently initiated several engineering students into the folds. From left to right, seated, are: Charles M. Shaw, E.E.; Elisha Craig, M.E.; Jack McCormick, M.E.; George Freeman, C.E.; James Ricks, M.E.

Standing, left to right: Guy Knowles, Geological Engineering; Vernon Muse, M.E.; Tomas Fite, C.E.; and Jerry Leggett, C.E.

Theta Tau is a professional engineering fraternity.

Sigma Tau Sigma

Sigma Tau Sigma, Textile Scholarship Fraternity has revised its requirements for membership. These revisions will affect seniors only.

Beginning this year seniors will be required to have an 82.5 average to be eligible for membership. After this year this will be raised to 85. This step was taken to further emphasize scholarship in the School of Textiles.

All students are required to be in the School of Textiles for one year in order to be eligible. This year seniors will be initiated in the fall term and the juniors in the winter term. A banquet for all members will be held in the winter term.

Officers of the organization are Mort Pudnos, President; Joe Signoret, Vice President; George Fox, Secretary; and Ken Gottlieb, Treasurer.

Engineers Note!

All engineering students will meet with their advisors Tuesday, November 7, at 12 noon. Contact your departmental bulletin board for meeting place. BE THERE!

RANDOLPH'S REALLY GETTING THE BUSINESS SINCE HE STARTED USING VITALIS!

You'll be busy with the babes, too—if you use your head—and "Live-Action" Vitalis care. Give your topknot that famous "60-Second Workout." 50 seconds' scalp massage (feel the difference!) . . . 10 seconds to comb (and will the gals see the difference!) You'll look neat and natural. Bye-bye loose, flaky dandruff and dryness, too. So make it your business to get Vitalis soon—at drug store or barber shop.

"LIVE-ACTION" VITALIS and the "60-Second Workout"

A PRODUCT OF BRISTOL-MYERS

Limey Linthead Makes Only 12 Bucks A Week

A proposal that the United States Chamber of Commerce and the National Association of Manufacturers appoint a joint committee "to study the voting system of the United Nations" was advanced in an address by Herbert H. Schell of New York City, president of Sidney Blumenthal and Company, in an address in the School of Textiles at N. C. State College last week.

Schell, whose speech was the second feature of the "B. B. Gossett Lecture Series" in the State College School of Textiles, said that he will submit the proposal at a meeting of the American Tariff League.

An audience of approximately 500 persons heard Schell's address which dealt mainly with international political and economic issues. He was introduced by Dean Malcolm E. Campbell of the State College School of Textiles.

Schell said that he considers the United Nations to be "the great hope of the world" but declared that "a thorough study" of the UN voting procedures should be made.

The UN, he stated, "needs an awful lot of help, sympathy, and understanding" and merits the support of all freedom-loving peoples. Its "obvious weakness," the New York textile industrialist said, is the lack of a police force, which is necessary for any international or local governmental authority.

Foreign Wages

Schell reviewed the political issues in England and other European Countries, Russia, South America, and the United States and made a comparison of wages paid to textile weavers in the United States and in England.

The English weaver, he said, makes \$12.15 for a 45-hour week while the same workman in the United States makes \$65.21.

Southern Engineer

The November issue of the SOUTHERN ENGINEER is now in the print shop and will be distributed the latter part of next week, reports Editor Charlie LeGrand.

A new system of distribution is being studied whereby every issue will be picked up at each student's department. Further details will be announced in next week's TECHNICIAN.

The cover will be the same design every issue with only the color changing. The cover for this issue will be red.

"Comedy of Errors" Set for Pullen Stage

Robert Porterfield's famed Barter Theatre of Virginia will present its gala costume production "The Comedy of Errors" by William Shakespeare in Pullen Hall at State College on Saturday night, November 18, at 8 o'clock.

Dr. L. E. Hinkle, head of the College's Public Lectures Committee, announced today that the play will be presented as one of a series of winter entertainments at State College. There will be no admission

charges, and the program will be open to the public.

Elaborate Costuming

This spectacular production features the most elaborate costuming to be used by the Barter Theatre this season. The gay comedy is written with a light-hearted spirit of fun and the players make the most of its Elizabethan revelries.

Director Margaret Perry and Woodrow Romoff spent more than a month selecting the music for the

show. Although it is short in comparison with other Shakespearean productions, "The Comedy of Errors" has forty music cues and five dances including a maypole caper.

Prose Script

The comedy is a merry confusion of shipwreck and mistaken identities and will be carried out in a Greek motif along lines similar to Barter's "Twelfth Night" and "Much Ado About Nothing" of past seasons. The Barter players is the only troupe that writes its script out in prose instead of verse so that the lines come evenly and clearly.

All of the properties, scenery and costumes for "The Comedy of Errors" are new. Beautiful fabrics in nylon and taffeta from Burlington Mills have gone into the costumes. A series of platforms which can be changed quickly and easily to give varied effects, together with handsome Elizabethan properties will compose the sets.

Educators Meet

Dean J. Bryant Kirkland of the School of Education at State College yesterday opened a three-day research conference for Southern educators in Atlanta, Ga.

Dean Kirkland is conducting the conference in his capacity as chairman of the Regional Committee on Research in Agricultural Education. Representatives from each of the Southern states are attending the gathering.

Chief purpose of the conference is to formulate plans for regional participation in a nation-wide research study on the education of farm veterans.

The malleable nickel produced in the United States is used principally for radio, television and for anodes in plating.

Campus Interviews on Cigarette Tests

Number 5...THE GNU

"I gnu the answers...but I wasn't talking!"

The debating team couldn't make much use of this non-talkative baby...but one look at his "literary leanings" tells you that tests don't buffalo him. 'Specially those tricky cigarette tests! As a smoker, you probably know, too, that one puff or one sniff—or a mere one-inhale comparison can't prove very much about a cigarette!

Why not make the sensible test—the 30-Day Camel Mildness Test. You judge Camel mildness and flavor in your own "T-Zone" (T for Throat, T for Taste) ...for 30 days. Yes, test Camels as a steady smoke and you'll see why...

More People Smoke Camels than any other cigarette!

Committee Colossal

We suggest that the Board of Trustees, the Faculty Council and the Council of Campus Government cooperate in forming a committee to investigate investigating committees which should be investigating various projects.

The past year has seen a number of vital projects sink into the murky depths of committees, never to rise again.

The desire of over 3,000 students for improved conditions in the gym was thwarted when the trustees turned thumbs down. Presumably the problem is now under investigation by a committee of some sort. The members of this committee, whoever they may be, should remember that a few of the 3,000 dissatisfied students are still wondering what happened to their demands.

The College Union now appears to be bogged down again. This vital project has been held up in various committees for well over a year. Right now it is the State Budget Bureau that won't budge.

We feel that the formation of a committee on committees would be quite in keeping with the times. We could be right in there with the Congressional committees and sub-committees and the UN commissions, sub-commissions, sections, and sub-sections. If it couldn't do anything about getting the committees to work it could at least make us forget that they existed in the first place.

PRF.

Too Much Or Too Little?

A sorrowful, pleading little lady is making the rounds of State College fraternities and, presumably, the dormitories getting a petition signed.

The little lady says she is Mrs. Hair, mother of Raymond Hair, who was recently convicted in the death of a buddy in Wake Forest.

Mrs. Hair feels that the sentence given her son was unfair and is attempting, by petition, to get it mitigated.

We don't know that a million names on a petition could change the court sentence, but we don't feel that State College students should sign their names to such a petition.

It is heartbreaking to hear Mrs. Hair's plea, but it is very easy to look at the other side of the picture and wonder what sort of plea Mrs. Coble might be making at the same time.

Listen to Mrs. Hair's plea if you must, but think seriously before you decide to place your name on the petition to let him off easier.

A Shame and Disgrace

This week's discussion on NSA should cause the members of Campus Government to hang their heads in shame and disgrace. If, after two weeks of objective discussion, they have not assimilated enough information on NSA to have formed an intelligent opinion, they do not have enough interest in their campus to warrant their continued membership in the Council.

That these representatives of student interest have not bothered to listen to the reports of the NSA delegates or read any of the material on the organization is a disgrace. It appears that no business of any greater magnitude than the replacement of classroom pencil sharpeners can be transacted until NSA has been disposed of.

We shall continue to oppose NSA; its background of failure and faltering policy seem to preclude any future success; however, in order to carry on the pertinent business of the campus, it seems necessary to set the question of NSA aside for the moment. It seems that the members of Campus Government will need to study the problem for at least six weeks. During this period we suggest that President McCracken make every effort to form a committee of students willing to promote the activities of NSA.

If McCracken can not find at least five people on the campus who are interested in NSA there is absolutely no point in trying to extend its activities to the whole of our 4,000 man student body.

PRF.

Freshman Elections

It's a good feeling to advocate some sort of change and receive word that notice has been taken of the plea.

Last week, THE TECHNICIAN asked for earlier elections of Freshman officers. The following is a letter from Dean Ned Wood, with excerpts of the letter he sent to Jack McCracken, Campus Government President:

Dear Bill:

Enclosed is a letter forwarded to the President of the Student Government concerning Freshman Class elections.

I should like to take this opportunity to congratulate you and your staff on the splendid work you are doing on THE TECHNICIAN. I have heard many favorable comments on the terms of the broad outlook your staff is following. . . .

Sincerely yours,
W. Ned Wood,
Assistant Dean of Students.

And from the letter to McCracken:

" . . . I notice THE TECHNICIAN dated October 27 carried an editorial on Freshman elections. . . . The Dean of Students concurs with the writer in that earlier elections would be a definite asset to the Freshman Class. It is our opinion that the election should be held some time between Thanksgiving and Christmas holidays, preferably immediately after Thanksgiving."

It is indeed heartening to see that some of the effort expended by TECHNICIAN staff members is worthwhile.

Now that the need of earlier elections is admitted, when will the mechanics of such an election be set up?

We hope to be able to congratulate the new Freshman Class officers no later than a week after Turkey Day!

CLOTHING CO.

IDC On Move

(Continued from Page 1) the assistance that the Recreation students are giving not only helps the committees present the program, but it also gives them a chance to do practical work in their chosen field.

J. J. Stewart of the Student Personnel Office agrees that thus far the dormitory program has been a success, and he says that it should be even better in the future.

Student Surveys

At present, the two committees are conducting two surveys. The Social Committee is working on one survey to determine the number of Freshmen who want to take danc-

ing lessons under a professional instructor. Another survey by the Recreation Committee and the Recreation Department concerns the selection of activities for students. They are distributing forms to each dorm student to find out which activities interest them most.

Thanks to the cooperation of the I.D.C. and the Recreation Department, the dormitory students at State College will have a wide and interesting program of activities during the coming months.

Rhodium plate has been found useful for electrical contacts where low pressure rubbing contacts are involved.

How Did You Do On Those Tests? Freshmen Placement Scores Available

Remember those rough tests you took the first few days you were here? Do you wonder what kind of score you made on them? Would you like to know your score.

New students asked during Orientation Week whether they could learn the results of the tests they were taking. These scores are now available at the Student Personnel Office, 105 Peele Hall. A student calling at the office will be given his scores and an explanation of their meaning.

The English, mathematics and chemistry tests are tests of achievement, which means that they provide a measure of what a student has learned in those particular subjects through high school study. The so-called "psychology" test is

a test of general college aptitude. A score on this test is less likely to be influenced by the quality or quantity of previous training.

These test results are useful in a number of ways. Of course, English and mathematics tests are used immediately to determine whether a student takes regular college English or mathematics during his first term. All may be used by a student to judge his chances of success in college work. Definitely higher scores in some areas may help to point to some kinds of college study as being more appropriate than others.

Scores Helpful

Some sub-test scores help to point out specific weaknesses or strengths—areas, perhaps, where a student

might expect to need to put forth special effort. The English test is particularly useful in this respect. There are sub-scores in vocabulary, in speed of reading comprehension, in reading comprehension with the speed element removed, in mechanics of expression, and effectiveness of expression, in addition to a total reading score and a total English score.

Of course, one should consider other evidence besides that provided by means of tests, in studying his educational problem. Both high school and college grades are additional clues. Motivation, personal adjustment, health, and efficiency of study habits all have a bearing on a student's success in college. Test data is a particular kind of information which can be most useful when combined with other indications of ability, and when considered in connection with a student's particular background of experience.

Atkins Heads FFA

By JESSE GRIMES

The first fall term meeting of the Collegiate Chapter of the Future Farmers of America was held in 114 Tompkins Hall, September 28, at 7:00 P.M. James Atkins assumed his duties as President for the fall term.

Professor L. O. Armstrong, the faculty advisor for the Chapter, after being introduced by the president, made an interesting talk on "The Importance of Extra-Curricular Activities while here in College." He cited many men who got their start by participating in extra-curricular activities like the F.F.A. and similar organizations.

After the meeting the program Committee, headed by Charles More, served refreshments for the large group that attended the meeting.

New Officers

Other officers who served at this meeting and who will preside at all meetings for this term are as follows: William H. Perry, Vice President; Richard Whitley, Secretary; Robert Wilson, Treasurer; Jesse Grimes, Reporter; Devero Martin, Watch Dog; Jack Jenkins, Student Advisor; Robert Wilson, Fair Booth Chairman and Harold White, Fair Booth Vice Chairman.

Paul Blizard will edit the Key Hole for this year with Thomas Hanes serving as Asst. Editor and David McCracken as Business Manager.

The next regular meeting of the Collegiate Chapter of the F.F.A. will be Thursday, October 12, in Tompkins Hall at 7:00 P.M. Membership is open to all former F.F.A. members and all students of Agriculture Education.

Books Go To Auditor; 151 Bucks Missing

The finances of the Campus Government are in regrettable condition according to reports from Campus Government treasurer Harvey Scheviak.

At the first session of the council on September 26 Scheviak announced that there was an amount totaling \$151.83 which could not be accounted for on the books. He stated then that the books were in a state of general confusion and that the loss was only an error in the bookkeeping. The books have now been turned over to an accountant for an audit.

Campus Government recently resolved another financial difficulty by reducing the salary of the president by five dollars in order to raise the secretary's salary by the same amount.

Long Hairs and Ladies Lounge, Listen To Music

For the music lovers on the campus another weekly series of record concerts has been instituted by the Basic Division. The first of these was presented Friday evening, October 20, at eight in the faculty room of Peele Hall. Room 108 with its comfortable new furniture and record player will offer pleasant relaxation for both students and their dates, faculty, and staff. An ample collection of records, long-playing and standard, will maintain a varied program and contribute to the tastes of everyone. During a short intermission plans for future programming and organization were discussed, as well as the feasibility of refreshments, participation of the local girl's school, and the introduction of live talent.

Sub Patrol Replaces Sea-Going Outfit

Naval and Marine Air Reserve Headquarters, Naval Air Station, Norfolk has just been officially advised that they are to activate Naval Air Reserve Anti-Submarine Patrol Squadron 862, to replace the same type squadron that was called to active duty recently.

The total squadron complement will be over 100 enlisted men of various aviation rates, 30 pilots, and 5 ground officer specialists. Enlisted ratings include Aircraft Mechanics, Radiomen, Ordnancemen, Radar Technicians, Metalsmiths, Yeomen, Painters, Parachute Riggers, and Seamen Recruits. Men in the area with experience in twin-engine type planes are preferred, as well as high school students over 17 years of age.

The squadron will train one weekend each month, for which, members will receive four days base pay of their rate. This amounts to from \$10.00 to \$35.00 dollars per weekend for enlisted men. In addition, the squadron takes two weeks active duty training each summer, for which the men receive full pay and allowances. Other advantages include, valuable training in squadron operation, complete issue of clothing for dress and work, air station privileges while on duty, and the opportunity to be a member of the finest air reserve unit in the entire nationwide command of 27 bases.

The Norfolk unit holds the Edwin Francis Conway Trophy as the most outstanding unit in efficiency and general thoroughness of training. Four of the eight squadrons comprising the local command also hold Noel Davis Trophies which indicate they are the most expert, combat-ready squadrons in the program.

Five openings are also available for men in the lower grades with the Marine Air Detachment of the Norfolk unit for full time active duty.

Men interested in making application for any of the above billets may do so by calling at Hangar LP-12 or building LP-72, East Field, at the Air Station, 7 days per week.

Inconel, a nickel-chromium-iron alloy, is used in jet engine domes, liners and transition sections.

Civil Service Offers Engineering Jobs

The United States Civil Service Commission has announced examinations for Cartographic Aid and Engineering, Cartographic, and Statistical Draftsman for filling positions in Washington, D. C., and vicinity. A few Cartographic Survey Aid jobs in mobile field units will also be filled. The salaries range from \$2,450 to \$3,825 a year.

To qualify, applicants must show from 1 to 5 years, depending on the grade of position, of appropriate experience. Appropriate education may be substituted for all of the required experience for the lower-

grade positions and for part of the experience required for the higher-level positions. Applicants for drafting positions must also furnish a sample of their work. No written tests are required.

Full information and application forms may be secured at most first- and second-class post offices, from civil-service regional offices, or from the U. S. Civil Service Commission, Washington 25, D. C. Applications will be accepted in the Commission's office in Washington, D. C., until further notice.

Nickel was the fourteenth metal to be recognized and the seventeenth element to be discovered. It was isolated and named by Cronstedt, a Swedish scientist, in 1751.

Nickel is contained in various lead bronzes where it improves strength and encourages more favorable distribution of the lead constituent.

The plating industry during 1949 accounted for about 18 1/2% of total nickel consumed. Of this approximately 60% went into the automotive field.

Views and Previews

BY PAUL HODUL

The "Big Red" enjoyed their second straight victory over a hapless V.P.I. eleven. Considering the opposition the victory should be classified as routine procedure, but regardless of the lack of opposition it was very satisfying to see the Wolfpack display a scoring potent punch for a change.

Games like this have long been overdue. The State eleven, with big Elmer Costa leading the defense always has been classified as a good defensive team, but the offensive threat has been sadly lacking for many years.

This malady has had me bewildered for the past four seasons. If it was a case of just not having enough good backs my questions would be easily answered. With backs like Alex Webster, Ed Mooney, Jim O'Rourke, Ray Barkouskie and little Jimmy Smith, it proves that State has as many good backs as any of the opposition that we've encountered this season.

After dwelling on this problem for some time, I have formulated a theory which may give a partial answer to this lack of "Scoring Mania."

The offensive blocking on the Wolfpack has always lacked the steadiness that other good football teams have. It's true that at times the Pack has looked brilliant on offensive blocking, but the majority of games have proved us to be pitifully inadequate in this department. Many times it seemed that Ed Mooney was away for a long gain or a touchdown, when the only barrier in his way was one or two defensive men. A good block at that time would have sent him on his way, but per usual the inevitable happened. The block didn't materialize, and little Ed was snowed under. Ed Mooney is just one of the many backs who have been faced with this situation. No matter how clever or shifty he may be, he still needs one or two of those key blocks before he can carry the pigskin for impressive yardage.

Another drawback in our scoring threat is our conservative type of offense. We certainly would never be classed as a "wide open" football team. A team which continually hits off guard or tackle for a majority of their offensive plays will never be a high scoring team unless they have some powerhouse backs. We have some very good backs, but our scoring threat is stalled by continually hammering through the middle of the line.

Naturally some plays have to be called which will hit off these vital areas, but with a little more "mixing them up" the plays that is, our scoring potential will certainly soar.

The predictions were more accurate last week as compared to previous weeks. The expert Jack Bowers only missed 3 out of 34 to raise his average to a potent .819 pct. Joel Heim missed 5 out of 34 and he's second with a .791. Yours truly is third with a .760 pct. and the fat boy Bob Curran is still on the hind one with a lowly .740 pct.

Here goes for another week:

Frosh Football Ends With Davidson Tonite

By M. WEBBER

Coach Jim Gill's Freshman Football team will ring the curtain down on their 1950 season tonight, when they meet the Wildkittens from Davidson College, at Riddick Stadium. The Baby Pack is currently riding a two game losing streak, and they will have to win this one to stay above the .500 mark for the season.

After starting the season off with two smashing victories over Campbell College and the Carolina Freshman, the Wolflets bogged down in their next two games, and suffered losses at the hands of the Blue Imps from Duke, and the Baby Deacons from Preacher Pre-Flight.

Successful Experiment

Tonight's game will not only see the end of a fairly successful football season, but it will also see the end of a very successful experiment. The experiment was the installation of the split T formation. For the past seasons, the freshmen never had any set offense, but instead they played their games with whatever offense that they happened to be using against the varsity. Each week the freshmen assume whatever offense that the Wolfpack's next opponent is using, and they use that against the varsity in practice to get them ready. This season they held the same role as guinea pigs for the big Wolfpack, but they also found time to practice their own formation.

Whether this wide open split T is going to be used by the Wolfpack next season is a question that only time will answer. In any event these same freshman stars are going to be next year's Wolfpack stars.

Gill to Rely on Hughes

For the fifth time this season, Coach Jim Gill will be relying on Ed Hughes, the speedy halfback from Buffalo, N. Y. and Tommy Swanger, another speed merchant from Hamburg, N. Y. Hughes and Swanger have been the big guns in the Baby Pack's offense in earlier games, and along with George Suda and John Steele they make up a back field that would make any coach happy.

The line play, which is led by big Junior Pearce has been more than important in the Wolflets two earlier triumphs. In the Carolina game they continually kept the baby Tarheels from scoring. Another standout lineman has been Paul Wagoner, younger brother of the famous Wagoner brothers that played for the Pack a few seasons back.

Tonight's kick-off is set for 8:00 P.M.

Owen Nips Turlington; Lose Volleyball Match

Continuing to play close ball games, Owen No. 1 finally broke into the win column by defeating Turlington No. 1 on first downs in a close ball game. Owen made four first downs to two for Turlington. Owen No. 1 continues to play a spirited game and though virtually eliminated from the semi-final round, Owen will be after another win in their last game. Outstanding for Owen were Cham Johnson, Jim Jackum on Defense and Joe Trogden on offense.

Lose to Bagwell

Owen No. 1, though hampered by lack of practice, played two good games against Bagwell in Volleyball. Bagwell won the first game easily but was pushed to win the second one. Owen No. 1 hopes to offer more competition for teams in the future.

Owen No. 1 and Owen No. 2 met in a family handball game and Owen No. 2 came out the winner. Each won a singles game but Owen No. 2 was match winner when Owen No. 1 failed to produce a doubles team. Don Jarrett defeated Jim Harvat and Cham Johnson defeated Bob Paris in the other singles match.

BOB CURRAN, Sports Editor

Pack To Make Like Grant At Richmond

By BOB CURRAN

A victory over the Wolfpack tomorrow afternoon would really serve Coach Dick Esleeck's University of Richmond Spiders many purposes. It would enable the Spiders to vacate the Conference cellar, where they are deeply buried, and it would be the first Southern Conference win of the year for them. It would also make the University of Richmond's Homecoming a complete success.

By beating the Pack, the Spiders can also do something that no other football team in the history of the University has been able to do in 48 years. Since 1902 the Spiders have been trying to beat the Wolfpack, but the closest they got to it was in 1906, when they played a scoreless tie. In their last meeting in 1949, the Pack beat the Spiders 20 to 6, and tomorrow afternoon in Richmond City Stadium the Spiders will be seeking revenge.

Webster Out

Coach Beattie Feathers' Wolfpack will be without the services of sophomore star Alex Webster, who was injured in the VPI victory last Saturday night. Several other sophomore stars will be counted on against the Spiders. Ray Barkouskie, big blocking back from Pittsburgh, Pa. will be used offensively and defensively, and also to kick the points after touchdown. Backing up the sturdy Wolfpack line will be fullback Harvey Yeates who filled in at center for Tom Tofaute in the Maryland victory of a few weeks ago.

Leading the Wolfpack line will be All-America candidate Elmer Costa, recent "Lineman of the Week," and tackle Fred Davis, a 200 pounder from Rocky Mount. Big Jim Hillman, another tackle will also see plenty of service.

Spiders Rely on Southpaw

Coach Dick Esleeck's Spiders will be counting on Johnny Thomas, a southpaw passer and field general, to lead their offensive maneuvers. On the receiving end of Thomas' passes will be Corky Hohmann, a lanky six-footer and Doug MacLachlan, co-captain of the team.

The Spiders suffering from many early season injuries were idle last week, and will be in great physical shape for their clash with the high riding Wolfpack. Jumping Joe Purina, one of nation's best punters will be in top shape for the battle.

The Pack will once again rely on the running and passing of Ed Mooney, and the line crashing of handsome Jimmy O'Rourke, who is rapidly shaping up as the best fullback in the Conference.

A victory tomorrow will assure the Wolfpack of their best season since 1947, and it will also keep the Pack's winning streak alive.

The probable line-ups:

State	Pos.	Richmond
Butler	LE	Hohmann
Hillman	LT	Wilkoosz
Schacht	LG	Sipe
Tofaute	C	Wolan
Bagonis	RG	Thayer
Costa	RT	Riker
Romanowsky	RE	MacLachlan
Barkouskie	BB	Thomas
Smith	WB	Nuckols
Mooney	TB	Shoemaker
O'Rourke	FB	Ulasiewicz

Prongay Passes SPE's To One Sided Victory

In a re-scheduled football game, the SPE's defeated Theta Chi by the wide margin of 38 to 0. Despite the big score, the small Theta Chi team fought to the final whistle.

In the beginning of the first quarter, Woodard intercepted a Theta Chi pass, and scored a few minutes later. Later in the same period Bob Prongay gave the SPE's a 12 to 0 lead when he went around left end on a long touchdown jaunt.

The second period saw little Bob Prongay unleash two long touchdown passes to Powell and Hobbs, and Powell also caught a pass for a point after.

Prongay Passes

The SPE's came back in the second half with two more T.D.'s to really salt the ball game away. Powell once again scored on a pass from Prongay. Woodard scored his second touchdown of the day on a pass from Prongay.

Conference Standings

Richmond	0	4	0	.000	21	156

This week's schedule:

Friday night—Furman vs. Wofford; South Carolina vs. Marquette.

Saturday—STATE vs. Richmond; VMI vs. Davidson; George Washington vs. Maryland; North Carolina vs. Tennessee; VPI vs. Washington and Lee; Citadel vs. Virginia; Clemson vs. Duquesne; Duke vs. Georgia Tech; William and Mary vs. Boston University; and West Virginia vs. Pittsburgh; Wake Forest not scheduled.

Sigma Chi's Crush PKP; Unscored On

The "Yellow Jackets" of Sigma Chi breezed to their fifth straight victory of the season without a defeat, and the Sigs line once again held the opposition scoreless.

Stymied by PKP's good ground defense, the Sigmen once again took to the air. In the opening minutes of the game "Rifle Arm" Ammons hit Nunis on the Pi Kappa Phi 30 for twelve yards and the first down of the game. The Sigs remained in control of the pigskin most of the afternoon.

The Pi Kappa Phi's had little opportunity to score, because their air attack was virtually intercepted by Lofin and their ground attack halted by linebackers Sartin and Frank Winecoff.

Recover Fumble

The champs wasted little time in crossing the last chalk line. Qualls got a poor punt off which bounded on the Pi Kappa Phi's 40 yard line, and was momentarily fumbled by PKP. Lofin immediately pounced on the ball giving the Sigma Chi possession of the ball. A series of passes from Ammons to Nunis and Lofin, set up the first score. The Sigs scored on a play which Ammons uncorked a 33 yard aerial to Nunis who was waiting for it in the end zone. The try for the extra point once again saw that reliable combination Ammons-Nunis pay off.

Roberts Blocks Punt

A few moments later Roberts blocked a Pi Kappa Phi punt and the Sigs took over on the mid-field strip. After racking up a first down on a pass play which went Ammons to "Snookie" Nunis, Ammons heaved another long one to Qualls which spelled T.D. number two for the Sigs. The final scoring of the game was another pass play; however, this time it was Nunis to Lofin who caused the trouble for the Pi Kappa Phi's.

In the last regular game of the season the undefeated Sigs meet the AGR.

Volleyball

The SPE and the Sigma Chi played thrilling ball in all three games of their volleyball set last Tuesday, which saw the Sigs edge out the SPE in the best two out of three games. Even the scores, which were: 16-14, 14-16, 15-13, do not give a vivid picture of how evenly matched these two teams were. This placed the Sigs in a tie for first place with the SPE in their bracket.

Handball

The Sigs fought their way into the quarter finals of the Handball Tournament by beating the Pi Kappa Phi in the doubles and the first match of the singles. It was Lynn Dawsey and "Willie" Jones that took the doubles, and then David Curtis assured the Sigma Chis a place in the quarter finals by winning his match.

In the second match of the evening the SAM eliminated the Sigs in the first two sets. The SAM outclassed the "Blue and Gold" in both the doubles and the one single match that was played.

Sigma Pi's Dump SAE; Pickett Scores Twice

In their first encounter with the SAE's, the Sigma Pi's outclassed them 26 to 0. The Pi's scored their first touchdown of the game right after the opening kick-off, when they went all the way down the field on passes from Charlie LeGrand. The TD came as Earl Pickett went up in the end zone between two SAE's to snag a pass thrown by LeGrand. The extra point was made on a pass to Sunderland in the end zone, and the Pi's led 7 to 0.

Painter Scores on Interception

The SAE's received the kick-off, and behind some nice blocking came roaring up the field. The runner was detected stepping out of bounds, and the play was called back. On first down, a pass was intercepted by Cy Painter, who took it all the way down the side lines for the Pi's second score.

Again the SAE's received, and again they took to the air. This time their pass was intercepted by Mickey Tolan, who returned it to the ten yard line. A few plays later Tolan snared a pass for six more points.

The final score of the game came in the last quarter, when Pickett scored again on a pass in the end zone. With this victory, the Sigma Pi's climbed another step towards their Section Championship.

Second Record Concert

The second of a series of record concerts, sponsored by the Basic Division, is being presented Sunday afternoon, November 5, 1950 at 2 in the faculty room of Peele Hall.

Room 108 with its comfortable, new furniture and record player will offer pleasant relaxation for both students and their dates, faculty, and staff. An ample collection of records, long-playing and standard, will maintain a varied program and contribute to the tastes of everyone. The Sunday program will emphasize rhythm and its various applications in music.

Bagwell Stops Berry' In Close Football Game

Bagwell No. 1 hung up another victory by beating a highly regarded Berry team 6-0. Bagwell got a break early in the game when Roy Thomas intercepted a Berry pass. After the interception, Bagwell moved down the field on short passes by Frank Graham to get its six points. Twice, later in the game, Bagwell intercepted passes to stave off Berry threats and protect the six points lead. Two of the out-

standing players for Bagwell No. 1 were Charlie Reaves and J. C. Whitehurst.

Berry led Bagwell in first downs, but they couldn't score. Al Skarrup, Dick Jewitt and Charley Keeley were outstanding for Berry.

The Big Ten powers in 1950, Ohio State, Wisconsin, and Illinois, are going to start the 1951 season shorn of their Schnittkers, Dornhams, Rehfeldts, Maders, Ericksons, and Osterkorns, so the way is wide open for a new leader to move in.

(Continued from Page 7)

Views and Previews

Getting off the subject of football for a minute, I'd like elaborate on a very pathetic situation that has been brought to my attention. According to a very reliable source I'm given to understand that combat conditions are in effect with one of our varsity sports. The Soccer Team supposedly received adequate funds when they were allowed fifty-cents per meal on their recent trip to Virginia. If we lose any soccer games due to malnutrition of the players, I'll certainly know the reason why.

Another interesting note is the distribution of monograms to the Soccer Team. Eleven men play the game, but only ten monograms are allowed for the team. Besides being short of funds, the poverty stricken State College is short of sweaters and letters. What have we got a Textile School for? Maybe we ought to take up a collection among the other ten players, and buy the eleventh man a sweater.

State Booters Nipped By Winds And Heads

By WALTER KASMAN

State and Washington and Lee soccer teams met on a windy hilltop in the Blue Ridge Mountains of Virginia in a hard fought battle ending in a 2-0 defeat for State.

W. & L. Uses Heads

State, one of the smartest and shortest teams in the Conference, was unable to keep up with the tall W. & L. team. The windy hilltop and the use of a light ball enabled Washington & Lee's booters to keep the ball in the air, therefore using their height to the greatest advantage. This proved to be the winning factor for the much favored Generals.

State had possession of the ball well into the third period until W. & L.'s left wing Pizitz "headed" a ball into the State goal after he had faked out State goalie Martie Kallman, who had to protect the goal by himself because of the State Fullbacks being out of position.

Once again the third period proved disastrous for State, for Inside Left Roxwell scored for the Generals. This was the final score of a well played game. Outstanding for State were Moez Zolfagari and Charles Culp.

Ties Roanoke

After a night at Washington and Lee, a tired State team moved to Roanoke College, and to Coach Eric DeGroat's friendly rival Coach John Fox.

A friendly wager was made by both coaches as to the outcome of this game, when they both attended N. Y. U. Graduate School. The boys of both teams wanted to win this game for their respective coaches, but the best they could do was end the game in a 1-1 tie after two five minute overtimes.

In the second period, Center Forward Pete Mavrommatis enabled the State team to go ahead with the first goal of the game, made on a penalty kick.

After a colorful half-time exhibition put on by the Roanoke's Female Cheering Squad, a reheartened Roanoke team came on the field. Basze scored a goal for Roanoke after a few minutes of the third period had gone by. It was his first goal in two years of play, and it proved to be a timely one.

Kare Kragas put on a display of dribbling that left the Roanoke fans breathless.

Enjoy your cigarette! Enjoy truly fine tobacco that combines both perfect mildness and rich taste in one great cigarette - Lucky Strike!

Perfect mildness? You bet. Scientific tests, confirmed by three independent consulting laboratories, prove that Lucky Strike is milder than any other principal brand. Rich taste? Yes, the full, rich taste of truly fine tobacco.

Only fine tobacco gives you both real mildness and rich taste. And Lucky Strike means fine tobacco. So enjoy the happy blending that combines perfect mildness with a rich, true tobacco taste. Be Happy—Go Lucky!

NSA Goes To Committee For Study

The meeting of the Council was called to order by President McCracken and the roll was called. Members absent were Charles Raper.

The minutes were read and corrected.

The Welfare Committee was assigned the job of bring up to date the master schedule of dates and places of campus organizational meetings. The Promotions Committee was told to secure copies of the constitutions of all campus organizations in order to study the purposes, functions, and services of all groups and to report to the Council.

For the Promotions Committee, John Graham, Chairman, reported that the committee was again studying the idea of erecting a bulletin board in a prominent spot on campus so that students might read notices and announcements posted there by Campus Government. The committee is now in the process of preparing an unbiased report to be published concerning the National Student Association. The report is to better familiarize the members of the Council with NSA so that they might be able to vote more intelligently on the matter when it comes up. A report on the Purchase Card System is also to be published by the committee, the purpose being the same as the report on NSA.

Hiliary Daugherty, Chairman of the Rules Committee gave a report on the revised extracurricular point load system as recommended by the Barnhardt Committee who assisted the Rules Committee in the study of the system. Daugherty

read the number of points given to each holder of an office in campus organizations and then moved to accept the recommendation. The motion was passed.

Max Thurman stated that many of the day students at State College desired the opening up of a room somewhere on the campus where they could leave their books while attending classes; in effect, they wanted a Day Student's Room. Professor Brown suggested that the matter be referred to Student Union officials for their consideration. Hal Brown stated that he thought that action was needed now; however, Gil Newton reminded the Council that the "Y" welcomed day students to use their lobby as their campus headquarters.

Tommy Ward pointed out to the Council that most of the classrooms on campus need pencil-sharpeners and he then moved that the Council propose to the various schools of the college to furnish sharpeners for their classrooms. Dr. Bullock reminded the Council members that there is a need also for education of the students, because quite often when the sharpeners are installed, they are promptly removed by the students and taken to their rooms. The motion was passed and the president said that he would write letters to the deans of the schools and/or to the Chancellor about the matter.

President McCracken then went through the minutes of the National Student Association Congress held this past summer and pointed out some important matters dis-

cussed by delegates to the Congress.

Bill Herrmann then rose and moved to withdraw N. C. State College as a member of the National Student Association and the motion was promptly seconded. Herr-

mann then stated his reasons for making the motion. There followed much discussion both for and against the motion until Hank Odum moved to refer the matter to a committee for study as he (Odum) thought that the Council

Members were not well enough informed about NSA to vote on the matter. Odum's motion was seconded and passed.

Respectfully submitted,
Robert W. Scott,
Secretary.
