### CG Hears NSA Report; No Quorum, No Vote

The Campus Government spent 45 minutes this week hearing a committee report on the objectives of the National Student Association before discovering it did not have a quorum present to act on any business.

This is the third week the NSA question has been considered by the student group.

#### Committee Report

The Promotions Committee, which made the report, first explained the objectives of the organization and followed with a recommendation that State College "should retain NSA membership for two more years." The committee reasoned that the one year trial is not sufficient time to allow for a just appraisal of NSA's merits.

In addition, the committee proposed five points of policy concerning NSA in event the Campus Government retains its membership with the national organization.

#### NSA Objectives

Committee Chairman John Graham offered five main objectives his group found in NSA. First was "to give students of the United States a national voice as a student group." He explained that the NSA has a seat in the UN Educational, Scientific and Cultural Organization.

Secondly, the NSA helps solve campus problems through its regional conferences. For these he listed the installation of honor systems, faculty rating systems, and formation of purchase card systems.

Thirdly, NSA can "supply detailed data for particular campus projects."

Fourthly, NSA provides several services for its members in the two categories of money savers and international tours for students.

#### Money Savers

Money savers were listed as organized tours such as music concerts, lectures, and other educational and tentertainment programs for member schools. The schools would supposedly benefit by obtaining lower rates if the programs were booked through NSA.

Finally, NSA would aid in effecting programs for exchange students.

In its recommendations, the committee stated that in its opinions "the objectives as stated are inherently good." It pointed out that last year's Student Government recommended that State College should remain a member for three years "to give the organization a fair trial."

#### Proposed Policy

The committee offered six recommendations as to policy it State College stayed in the national organization. It first recommended that a NSA Committee be formed "by the appointment of the Campus Government president, with the approval of the Council." Secondly, it asked that this NSA Committee chairman automatically become a member of the Campus Government.

Thirdly, it called upon the Campus Government to "underwrite the

(Continued on Page 12)

### Coliseum Rate Too High; Dance Shifted

High costs of getting the Coliseum caused the Inter-Fraternity Council to switch its Fall Pledge dances to Frank Thompson Gym and the Raleigh Memorial Auditorium.

Rental costs for the giant arena for the two day affair would be 600 dollars, IFC president, Hank Odom was told in a letter from Coliseum manager W. Z. Betts. Additional costs, such as removal and replacement of bleachers and the basketball floor, would be another 700 dollars.

#### Removal Optional

The removal of the bleachers is optional, the letter confirming the organization's engagement date stated. There would be no charge other than the 600 dollars rental and 80 dollars for the basketball floor if the group wished to use the building as it is.

Odom said that the minimum requirements for the floor would entail operation costs of approximately 400 dollars.

Betts stated that the Coliseum would "not make a dime" on the 600 dollar rental fee. This sum, he said, would just cover the costs of lights, heat, cleaning and various other incidentals for the two days.

#### Auditorium Costs

Contrasted with these charges, Artie Shein, dance committee chairman, revealed that Frank Thompson Gym would charge eight (8) dollars for Friday night while the Memorial Auditorium costs 200 dollars for Saturday night.

The charges for removing the equipment were only estimates computed by the Coliseum engineer, Betts emphasized to the TECHNICIAN, and the IDC would be charged no more than the actual costs of removing and replacing the equipment.

### Share Your Car

One of the biggest, peppiest pep rallies in the history of State College is in the making for the game over at Wake Forest next Saturday.

The only way we can make the rally and cavalcade to Deaconland successful is to cooperate. Every student who is planning to attend the State-Wake Forest game should make his plans to be in the big parade.

In order to help students who have no cars, THE TECHNICIAN and the IDC will sponsor a share your car plan. Lists will be placed in all the dorms and at the TECHNICIAN office. Any man who has a car and will take riders, please signify on the list. Also, any man who wants a ride must so note.

State has a very good chance of beating Wake Forest and we go down on record now as predicting a Wolfpack victory over the Deacs.

### The Christian Answer Religion Week Theme

Addresses by three prominent personalities featured "Religion In Life Week" which was begun at the college last Sunday and which will continue through November 12. Theme of the seven-day observance is "The Christian Answer."

#### South Very Active

"There are more new things going on in the South than in the sections which we used to think of as the best farming areas of the country," said Dr. Arthur Raper of Washington, D. C. in a speech to students and faculty members of the Schools of Agriculture and Forestry in Pullen Hall Tuesday at noon.

Dr. Raper, a staff member of the Bureau of Agricultural Economics, U. S. Department of Agriculture, and a native of Davidson County, spoke on the topic, "Rural Life Trends in the United States."

He cited a rapidly rising standard of living in the South evidence of the region's progress and reported a decrease of 620,000 tenants in the South between 1930 and 1945.

Throughout the United States, a greater reliance on science, Dr. Raper said, is increasing farm yields and conserving natural resources.

The nation's farmers, he said, are striving for more products from less acreage.

"An encouraging sign," says Dr. Raper of the increase in the rural non-farm population—city workers who live in the country. Many Southern farmers, he reported, have part-time jobs in the cities and towns, which are additional sources of income.

Dr. Raper, a graduate of the University of North Carolina, will spend the remainder of the week at State College, where he will lead discussion groups and speak to classes in rural sociology.

#### Textile Leader Speaks

"Cooperation through understanding" is the keynote to harmonious labor-management relationships, Thomas L. Carroll of Charlotte, an executive of the National Cotton Council of America, said in an address at the School of Textiles Tuesday afternoon.

#### God and Crises

"Challenge in Crises" was the theme of a talk delivered by Walter F. Anderson, director of the State Bureau of Investigation, to students in the School of Education

(Continued on Page 7)

### 500 Car Cavalcade Leaves State At Noon; Hearses, Highway Patrol Lead; No Classes

The biggest football rally in recent years is being planned for the Wake Forest game, reports Head Cheerleader Al Parker.

When a streamer clad cavalcade of Wolfpack cars invades Deacontown Saturday, November 18, it will mark the first time since pre-war days that the student body had traveled en masse with a special police escort to a Southern Conference football game.

The rally begins at 12:00 noon in front of Frank Thompson Gym when the Red Coat Band teams with the cheering squad to charge up the students for the BIG GAME.

#### Free Streamers

Immediately after Parker's short program, red and white streamers will be given to all drivers to decorate their cars. It is requested that cars assemble in Doak Field so that the caravan will be able to leave promptly at 12:15. This will insure its early arrival at Wake Forest.

At a parking lot reserved for the cavalcade, there will be ample time to eat picnic lunches. Arrangements will be made for the sale of soft drinks.

Just prior to game time, a last minute rally will be staged at Wake Forest.

#### Patrol Escort

The State Highway Patrol and the Raleigh Police Department will serve as escorts for the auto-train from the time it pulls out of the Pack's home until it rolls into the Baptist stronghold.

Major Lambert of the State Highway Patrol estimates that the convoy should take about forty minutes to make the trip in congested traffic.

Parker has high hopes that classes will be suspended at 11:30 Saturday morning for the last big game of the year.

#### Come Early

He requests that all students attending the game in cars bring them to Doak Field prior to noon on the 18th and get them in on the free streamers. He expects a large turnout for the rally and is planning for over 500 cars to make it a "very colorful event."

The famed "Delta Sig Hearse" which created so much excitement among New Yorkers at the NCAA Basketball Tourney last spring is expected to lead the colorful parade, along with Jim Shuping's hearse, representing the TKE's.

#### relaxation of Union members.

A lending library will offer home town newspapers, books, magazines, and long-playing records. Two listening rooms with high fidelity record players will be available.

The main assembly hall will have a capacity of 1,400 persons for dancing and 200 persons for lectures.

Hotel accommodations for eight persons have been provided for. These rooms are for college guests or student's relatives only.

### Union Fee Study Made; Money Needed Now!

The committee investigating student activity fees will soon consider the advisability of charging the fee for the College Union beginning with the winter quarter. Most students will immediately ask, why should we be forced to pay for the privilege of using a building which does not exist? Another question will be what is the College Union, and what will it do with our money?

G. O. Erdahl, director of the College Union, states that the answer to the first question is that the funds originally appropriated by the General Assembly will not be sufficient to do more than construct the building. When the grant was made it was to have paid for most of the furnishings, but prices of the needed items have risen since then.

It will be possible to purchase the furniture and equipment needed for the building if a fund is built up now by collecting the fees which will be paid by the students for the use of the Union facilities.

#### State Fortunate

Erdahl states that State College is fortunate in that the State has furnished the original funds for the construction of the Union. At Ohio State it was necessary to collect fees from the students until five million dollars had been raised.

Every student will pay the Union fee, whenever its collection is begun, just as he now pays a medical fee, a publications fee, or an athletic fee. The Union is to be used only by the members; student or faculty.

Erdahl says that space for some 18 separate activities has been provided for in the plans now under consideration by the State Budget Bureau. The space for these activities has been allocated on the basis of a student survey made in 1949. All of these facilities will be available to the Union members without charge or at minimum cost.

Among the services to be available will be a snack bar, accommodating 300 persons, which will be open all day and evening. A dining room serving 85 persons and two banquet rooms which will serve from five to 500 persons are also in the plans.

#### Three Lounges

Eleven meeting rooms will be available for the use of campus groups, and three lounges have been planned to provide for the

# The Inquiring Reporter

By BOB CARLSON

Question: Do you think the Campus Government is serving the students' real interests?  
V. A. Brillo, Jr.

Sophomore, Chem Engr.

I, as do most students of this school, know very little of the student campus government. It seems as if none of the students with whom I associate even know of the campus government. This is why I cannot answer this question. I think something should be done to make the students take an interest in the Campus Government. Every one has to cooperate if the C.G. is to succeed.

Billy Howell, Jr.

Sophomore, Design

I don't know too much about it. From everything I can see, which isn't anything, they aren't. No sign of road improvement on the campus, student parking, more student cuts, etc, are a few of the things they might do instead of all this National Study (Student) Association arguing they are doing. On the whole, I think that they aren't doing us a damned bit of good.

Sam Ryan

Senior, Textiles

It seems to me that the Student Government is just an honorary society whose main purpose is to hold weekly meetings. The students that wade through mud and crawl over the construction materials to get to Hillsboro Street will agree with my point of view.

There has been repeated requests for a safe road and decent walkways around Tucker, Owen, Turlington, and Alexander, but I have yet to see any improvement.

Dwight Ham

Senior, Horticulture

The Campus Government seems to me to be in a high state of confusion. It is not for me to say who is to blame for this condition. From what I, and I consider myself an average student, have heard, there is conflict among the members of the Campus Government.

It is very hard for me to make comments on the functions of the

# Greeks Pledge Over 100 Upperclassmen

By TED JACKSON

Would you believe that more than 100 upperclassmen are pledges in the social fraternities at State College?

There is a tie for first place in number of new men between Tau Kappa Epsilon and Sigma Phi Epsilon, with each having 15 pledges. Second place goes to the farmers and foresters of Alpha Gamma Rho. They have 11 recruits who are upperclassmen.

SAE Has No Upperclassmen

As the result of an initiation last (Continued on Page 3)

# Car Owner Seeks Volunteer Firemen

Two State College students recently extinguished a fire which promised to do considerable damage to a car near the campus, and the car owner wishes to contact the volunteer firemen and thank them personally.

The two students put out a fire that was started in the rear seat of a red Mercury by some passerby's cigarette.

The thankful car owner wishes the two students would call 3-7449 after 6 p.m. for a word of thanks.

Campus Government because I am not very well informed on the activities of this group. Whose fault is this, mine or the Campus Government's?

Ed. Note: Probably yours, Mr. Ham, and all you other students who don't know what the Campus Government is doing. Check all the old copies of THE TECHNICIAN and you'll discover that we have printed the minutes of each meeting, plus many editorials, etc. on the activities of YOUR Campus Government. Just in case any of you are interested, the weekly meetings of the Council of Campus Government are open to all students who want to spectate. If you aren't satisfied with what the CG is doing, see your representative and tell him so. He is the man who is elected by you to represent the students.

# Duncan Stuart Exhibits At New York Museum

A painting by Duncan Stuart, faculty member in the School of Design at State College, has been accepted for display at the First Contemporary American Art Exhibition in New York City.

The exhibition, which will be sponsored by the Metropolitan Museum of Art in New York, will open on December 8. The exhibition will be known as "American Painting Today" and will feature the work of leading artists from throughout the United States.

Stuart's contribution to the exhibition is a non-objective painting in oil and on canvas. It is entitled "Events in Continuum."

Notification of the acceptance of Stuart's work was received from Robert B. Hale, associate curator of the Metropolitan Museum of Art.

Dean Henry L. Kamphoefner of State College's School of Design said he considered the Museum's acceptance of the Stuart painting as "a signal honor" for the school.

He explained that the forthcoming exhibition is the first contemporary event of its kind to be presented by the Museum and that previous shows have been devoted to the work of artists who have been dead for half a century.

# Beauts Still Have Time To Enter Contest

Candy Jones, famous cover girl and director of the Conover Career Girl School, will give an accelerated version of the Conover course to finalists at the Maid of Cotton contest in Memphis, December 27 and 28, the National Cotton Council announced today. The well-known magazine cover model will give pointers to the Cotton Belt beauties immediately before the final competition that determines which girl will become King Cotton's goodwill and fashion ambassador on a 64,000 mile international tour.

Blonde, blue-eyed Candy first consulted with Maid of Cotton finalists at the 1948 contest. Her charm, intelligence and vivacious personality made her a favorite with the girls as she briefed them during the contest period. October Brown, well-known beauty authority and model, represented the Conover Studios at the 1949 and 1950 contests.

During the two-day competition, Candy will discuss with the final-

ists the basic principles of the Conover Career Girl training course. Candy Jones is married to Harry Conover, famous Cover Girl creator and head of the Conover organization. Mr. Conover has served twice as chairman of the Maid of Cotton judges.

The winner of the Maid of Cotton contest will spend the month of January in New York City in preparation for her six-month tour. While there she will receive further training in modeling, make-up, radio and television techniques at the Conover Studios under the

# New Gym Needed; PE Facilities Bad

By PAUL FOGHT

Have you written your Representative? Your Representative to the General Assembly of the State of North Carolina, that is.

At the next session of the General Assembly there will be several requests for funds for projects on this campus. Should one be for a new building to replace the Frank Thompson Gymnasium?

### Build New Gym

Last year over 3,000 students signed petitions requesting better athletic facilities and the Board of Trustees decided that the only way to obtain any improvements is to build a new gym.

On October 21st of last year the TECHNICIAN presented a two page photographic comparison between the physical education facilities offered at UNC and at State College.

### Students Agree

This was the opening move in a campaign to better the physical

education program on our campus. The campaign was organized by a student group calling themselves "The Committee for the Betterment of Physical Education and Athletics." In a two week drive they succeeded in getting the signatures of over fifty per cent of the students on petitions asking for a better physical education program. In signing, each man also agreed to an increase in the physical education fee to pay for the improvements.

In January the petitions were presented to the Executive Committee of the Board of Trustees of the College. This group decided that the necessary improvements should be made by the State. The proposal was then referred to the Building Committee with the recommendation that the possibility of obtaining a new gymnasium be investigated.

### UNC Program

The original committee which in-

vestigated the differences between the programs at State and UNC was formed in the spring of '49. Their investigation disclosed that the two programs are supported in the same manner; by student fees.

The gymnasium at the Hill is being paid for from the fees. In addition, each member of the student body is furnished, from the fee, all equipment necessary for gym classes and intramurals, with the exception of shoes. Any student may go into the gym at any time and draw clean socks, towels, sweat clothes or any other equipment needed to take part in any activity. All equipment such as baseballs, bats, and gloves, golf clubs and balls are furnished to the student from his physical education fee.

### Increase Fee

In order to obtain the beginnings of such a program at State, it would have been necessary to increase the physical education fees from six to fourteen dollars a year. The committee circulated petitions asking for the increase and over 3,000 students signed.

The executive committee upon reviewing the question found that the majority of the veterans at State are spending more than the

# WITH THE GREEKS

By FRANK PERKINS

For the numerous greeks on the campus the long awaited week-end is just around the corner—what week-end? why pledge dances of course. This will probably turn out to be something to remember for the freshmen who have pledged a fraternity this term. This will be their first formal fraternity function.

### Phi Tau Chow Hounds

Phi Kappa Tau has recently made an important move in bonding their brothers together by opening their new kitchen which at the present time is feeding about thirty boys. This is an important factor in uniting any group. Many other fraternities are working on this same project but without any apparent

(Continued on Page 12)

\$500 paid to the school by the VA. Any increase in fees, it was said, would be an added cost to the school itself, and what the school would have to pay for the veterans could not be absorbed by the school budget.

# UPPERCLASS PLEDGES—

(Continued from Page 2)

Saturday, Sigma Alpha Epsilon is without a single upperclassman fledgling.

Following are the names of upperclassman pledges in the various fraternities:

### Sigma Phi Epsilon

Charles A. Haynes, Virginia; Tony Woodward, Bailey; D. E. Ward, Virginia; Milan Walker, Vanceboro; R. L. Miller, Wayne Hargatt, Kinston; H. Bogardes, Connecticut; A. Payne and L. McGee, Winston-Salem; Zeb Hargatt, Charlotte; Dale Jones, Florida; Bill Blanton, Richard Yow, Joe Washburn, and Westley Styers.

### Tau Kappa Epsilon

Zack Koonce, Washington, N. C.; Harold Lumley, Greensboro; Dick Sly, Delaware; Bob Phelps, Winsor; Charles Hicks, Virginia; Dick Gilton, Kannapolis; Bill White, Durham; Don Piver and Dave Sawyer, Wilmington; Joe Mason, Winston-Salem; Frank Cauldwell, Maiden; Jack Bowers, Shelby; Paul Goodwin, Concord; Jim Field, Charlotte, and Charles Deese, Kannapolis.

### Alpha Gamma Rho

Jack Reese, Pennsylvania; William Austin, Jefferson; Joe Everett, Virginia; John Stump, Nathons Creek; Frank Harris, Raleigh; John Kittler, Oxford; Harvey Bumgardner, Kings Mountain; David Knox, Cleveland; Houson Warren, Goldsboro; Richard T. Duke, Potocasi; and Fred Zane, West Jefferson.

### Sigma Pi

Jack Balog, Pennsylvania; Gray Bolich, Dobson; John Friscoe, Ohio; Bill Halsey, Virginia; Doug IX, New Jersey; Richard Kennette, New Jersey; Jack Key, Virginia; Cy Painter, Pennsylvania; Hunter Poole, Raleigh; and John Rodman, Maryland.

### Lambda Chi Alpha

Thomas Truelove, Greensboro; Guy Carrow, Williamston; William Randal Harris, Asheville; Larry Miller, Yadkinville; Barnard Graybel, West Jefferson; James Culp, Laurinburg; Richard Ferrel, Mayek; Bob Ferrel, Mayek; and Dwight Warren, Washington, D. C.

Ed. Note: Due to the lack of space this week, the names of the remainder of the upperclassman pledges will be presented in next week's TECHNICIAN.

Ni-Hard is a nickel-chromium white iron used in the mining, processing and pulverizing of industrial minerals. Under severe conditions Ni-Hard outlasts ordinary cast iron 2½ to 5 times.

I took a course in Chemistry; I tried a new reaction; I lit a Lucky with a match And got real satisfaction!

By Ronnie Friedman Columbia University

# Be Happy - Go Lucky!

The campus bells ring out the airs That all the students like, But the air the campus belles prefer Is filled with Lucky Strike!

By Morton Greenberg UCLA

Enjoy your cigarette! Enjoy truly fine tobacco that combines both perfect mildness and rich taste in one great cigarette - Lucky Strike!

Perfect mildness? You bet. Scientific tests, confirmed by three independent consulting laboratories, prove that Lucky Strike is milder than any other principal brand. Rich taste? Yes, the full, rich taste of truly fine tobacco.

Only fine tobacco gives you both real mildness and rich taste. And Lucky Strike means fine tobacco. So enjoy the happy blending that combines perfect mildness with a rich, true tobacco taste. Be Happy—Go Lucky!

### Thanks To State College

When a living being is in trouble, there are always many kind-hearted individuals who will rush to his aid.

In the instance of the truck driver who was pinned in his truck after the wreck on Hillsboro Street last Thursday, State College students and faculty members were instrumental in the entire rescue attempt.

It made no difference to the rescuers that the man was not white. It was simply a case of helping a suffering individual. We would like to see more of this spirit of helpfulness and brotherliness between all races; not only at times of great need, but also in everyday living.

Mrs. Marsh, wife of the injured driver, expressed her gratitude to State College in the only way that she knew. A simple thank you card with a short note of thanks written on the inside was addressed to State College. The note eventually ended up in the offices of THE TECHNICIAN.

By addressing the card to State College, Mrs. Marsh expressed the sentiments of the entire city. Raleigh is proud of State College for its major part in the rescue.

THE TECHNICIAN is even prouder that the oft tabbed "irresponsible" students could act in an emergency even more wisely than men who are supposedly trained to handle just such situations.

### Lack of Pep

We regret to report that the last pep rally was not attended by: the head cheerleader, the president of the Pep Club, the coach, the players, and 98% of the student body.

A pep rally for a game which does not invoke intense interest is of doubtful value. If the team does not attend, the rally's only purpose is to improve the response of the cheering section. When the student body does not turn out, there is no purpose at all in holding a rally.

The cheerleaders should have learned by now that no one will come out on Friday for a Saturday night contest. Since this situation exists, these rallies should be held on the campus Saturday afternoon.

George Pickett, President of the Monogram Club, has suggested that the rally for the Davidson game be held on the day of the game in front of the Mop Up. The cheerleaders and the Pep Club would do well to heed this suggestion.

PRF.

### Leave the Sinking Ship

If the National Student's Association is such a strong, beneficial organization, why isn't it doing something to stem the tide of adverse publicity that local chapters are receiving on many campuses?

The NSA is being attacked not only at State College, but also at Maryland, Georgia Tech, and many other schools.

We admire the students on the campus who fight for their convictions, but when the parent chapter doesn't do a thing to help them, then it seems that it is time for the men to quit fighting.

As soon as THE TECHNICIAN started its campaign against NSA, the national office should have covered the campus with publicity concerning the group. No word of any sort has reached us from the national office.

We suggest that Jack McCracken and the other students who favor NSA stop the fight since they get absolutely no help from the top.

Leave the sinking ship!

\* \* \*

### Organization Study

We notice from the minutes of the last Campus Government meeting that President McCracken has requested the constitutions of all organizations on the campus. A study of these constitutions is to be made by the Campus Government in an effort to determine the worth of the groups.

We feel sure, Jack, that you will find many of these outfits that are a waste of time. When you do, we ask that you revoke their charters and advise the members to seek another group which probably has the same ideals and aims.

A little integrated action rather than so many helter skelter attempts at action is badly needed on the campus. We need the energy and ideas of every man in a concentrated group.

\* \* \*

### Mass Exodus

Nearly everyone on the campus is complaining of the poor school spirit here. The giant pep rally and cavalcade to Wake Forest is our opportunity to show that there is storng spirit at State.

This is one occasion that can be made into a day of real fun for every student on the campus.

Let's cooperate with Al Parker and the other groups which are planning the parade. Fill up your car and join the mass exodus to Wake Forest next Saturday.

\* \* \*

### Student-Faculty Relations

Chancellor Harrelson will be given the opportunity soon to further the cause of better student-faculty relations on the campus.

Al Parker will approach him on the prospect of excusing classes Saturday morning, November 18 so that the student body can participate in a giant pep rally and parade to Wake Forest.

One or two classes on Saturday morning won't ruin our education, Chancellor. We hope you will decide to answer yes when Mr. Parker requests free cuts for next Saturday morning.

### Vic Vet Says

A veteran who is drawing compensation or retirement pay is not receiving a pension, although there is a widespread misconception that these terms are synonymous.

Actually Uncle Sam draws a fine line of distinction where these benefits are concerned.

Disability compensation is a monthly payment made by the Veterans Administration to an eligible veteran because of an injury or illness incurred in or aggravated by service in the Armed Forces.

Another compensation payment generally confused with pension is that for death compensation, which may be paid to the dependents of a man who died in service or who died as a result of a service-connected disability after returning to civilian life.

On the other hand, pension payments are made to Civil War and Spanish-American War veterans because of old age and infirmity and to veterans of both World Wars because of total and permanent disability which may not have any connection with their service.

Dependents of a deceased veteran also may be eligible for a pension, under certain conditions, even though the veteran's death had no connection with his service in the Armed Forces.

For full information contact your nearest VETERANS ADMINISTRATION office

Service retirement pay may be granted to officers and enlisted men leaving the active service in the Armed Forces after having served not less than 20 years or it may be awarded under certain conditions because of a disability incurred or aggravated while on active duty.

### Harvey Heckles; Brooks Berates

## OPEN FORUM

### Ethics?

TO THE EDITOR:

Several times this year the TECHNICIAN editor has made the statement that he wants to make this year's TECHNICIAN an "All-American" publication.

In this respect let me approach an article written in the November 3 edition concerning Campus Government finances. I am referring to "Books Go To Auditor; 151 Bucks Missing."

By no means can the TECHNICIAN even aspire to attain "All-American" rating if within its pages are published articles which are not only untimely, erroneous, and without sufficient proof, but may also be considered by some to be libelous. Indeed, even a case of newspaper ethics is involved.

It was at the first meeting of the council—nearly three months ago—that I made a statement concerning the condition of the accounting books. Many things have happened since then.

Not only was the amount stated in the article incorrect, but the fact that the books went to an accountant for audit is also erroneous.

The tone in which the article was written seems to indicate incompetency on the parts of past Campus Government Treasurers. To those people I feel the TECHNICIAN owes an apology.

I'm not approaching this with any great, College-racking libel suit in mind . . . but just as a reminder: Mr. Editor, if you do have to use last month's copy in next month's edition, please copyread it for timeliness first.

Harvey H. Scheviak,  
Treasurer,  
Campus Government

Ed. Note: Mr. Scheviak will do well to recall the proceedings of the first meeting of the Campus Government. At this meeting, he was asked if the Council had enough money to give Blue Key \$120 for homecoming decorations. He answered that he "thought so," but did not know since he did not have the books. He also told a TECHNICIAN representative that the books were to be audited. At the latest Campus Government meeting, Scheviak stated that he was only joking when he told THE TECHNICIAN reporter that the books were in bad order

and that he also asked not to be quoted on the matter. The reporter denies being asked not to quote Scheviak. THE TECHNICIAN intended no dig at the past Campus Government Treasurer, but was only reporting facts as they were presented. An investigation of the books for 1949-50 shows that they were indeed not in bad shape. We apologize to Hank Odom for any adverse reflection which the printed statements of Scheviak might have caused.

### No Quorum

To the Students and Faculty: At the last Campus Government meeting, no official business could be transacted due to the lack of quorum.

There are several factors to account for this:

1. Students (representatives) themselves fail to attend C. G. meetings and/or fail to have their alternates attend.
  2. Schools are ignoring the fact that Tuesday from 12 till 2 o'clock is Campus Government time.
  3. Students (of the college) tend to make a farce of many elective positions—they fail to take on the responsibility of electing competent persons to positions of importance.
- Solutions to these problems will not come from any one source. If each group will cooperate with the other, WE, the community, can function as an integrated whole.

### CORRECTIVE MEASURES ARE:

1. Students: elect competent persons.
2. Know something about your Campus Government. Know or learn something of any organization you consider joining.
3. Do not take on more extracurricular activities than you can handle.
4. Schools and faculty council please observe the C. G. meeting hours.
5. Student Representatives: If you do not want your jobs—resign!—and notify your class, promptly.
6. Groups and Societies: Do not schedule outside activities during class hours without proper authorization.

Submitted for your consideration,  
Jeff Brooks, III,  
Representative School of Design.

## Frosh Plan Blowout; Gals Set For Wolves

Plans have been completed for the Tucker-Owen Carnival of fun which promises to be the biggest show ever put on by any dorms on the campus in many a year, says Herb Sosnick, social director of Tucker Dormitory.

The festia, which will be held Friday, November 10th, in the Frank Thompson Gymnasium, will get under way at 8:30 and will continue until 11:30 p.m. The cost for this fun fest is a mere fifty cents, stag or drag. Tickets may be obtained from any floor representative in either dorm.

The leaders of both dorms have been working with the Industrial Recreational Department in planning a program which they promise a party to rival its gaiety. Out of the smoked filled rooms came prom-

ises of plenty of women for the "Wolves" to howl at. Girls from the neighboring colleges will be on hand as well as those that will come from every dirt road that leads to and from Raleigh. (Maybe a few more!)

Gene Wallace and the Statesmen are scheduled to provide the music for the dance.

### Pep Rally Tonite

Tonight at 7:00 sharp the track field stands will vibrate with chants and yells whipped up by Al Parker and his cheering gang.

Line Coach Al Rotella will again be on hand with his rib-tickling remarks about his "troubles." A delegation of Terrapin conquerors led by "Line-man-of-the-week" Elmer Costa will see that Rotella behaves himself.

The Redcoat Band will be on hand to fire up the new songs and chants.

## Bible Gets Once Over From Meredith Prof

Dr. Roger Crook, popular professor in the Department of Religion at Meredith, conducted the first of two discussions on the subject, "Where We Got Our Bible." Wednesday, October 18, The first discussion dealt with the formation of the Bible; the second with what has happened to it since it was formed.

Both discussions will be in Room A of the cafeteria. Fellowship suppers will be served at 6:00 p.m., preceding the discussion. Students desiring to join in the supper may purchase tickets for 60 cents either from the Baptist Student Union office in the balcony of Pullen Hall auditorium or from any member of the executive council of the BSU. Tickets will be sold on a first come, first served basis. Only 48 people can be served in Room A.

These discussions are a part of the annual series of discussions sponsored by the State College Baptist Union. All students are invited to participate.

## Hell Week Getting Quiet?

# Less Hell, More Friendship Advocated In Fraternities

By BOB HORN

Last week the TECHNICIAN published the names of the men pledged to the respective fraternities on the campus. Soon there will be a round of pre-initiation festivities which always stir up a great deal of legitimate controversy.

With this controversy in mind the following article, based on a *Daily Tar Heel* editorial, is offered. At Carolina it was hoped that the establishment of a constructive "Greek Week" would "lead to an eventual termination of some of the ridiculous displays and silly customs which the pledges participate in on campus during initiation."

### Hell-Week Out

Actually the whole idea of an old-fashioned Hell Week that every one used to read about and shudder over is going out of style here as well as at Carolina. Several fraternities on campus have no more than a formal initiation ceremony in the process of initiating new men. These houses seem to have just as much unity and spirit as do the fraternities which still adhere to some of Hell Week's more objectionable features.

Throughout the long weeks of pledge training, fraternities strive to make their pledges conscious of the fact that they are gentlemen and that they have a reputation to live up to. Then in one short week, they apparently do their level best to tear down this concept of a fraternity. In short, many aspects of Hell Week are exactly counter to the goals of pledge-training.

Many fraternity men will say it's nobody's business but their own as to how they run their initiations. They have a point. The IFC could never police a fraternity initiation, and no one would want it to. If a fraternity is bent upon subjecting its pledges to varying degrees of humiliation before initiations, and is convinced that in the long run this policy is best for both fraternity and pledge, the Hell Week will continue as before, regardless of the wishes of other fraternities on the campus.

There is one thing though, which every fraternity man should keep in mind. That is: the general public views fraternities collectively as one group of individuals. If one does wrong, then all are condemned, not just the erring fraternity.

### Initiation Accidents

If some student were killed or permanently injured during initiation, all the fraternities on this campus would suffer. No doubt there would be a move on the part of many to abolish fraternities, and at any rate all could expect to be tied down with University rules and regulations in the future. Accidents during initiations and the ensuing rumors have been the biggest single reason why many people look with disfavor on fraternities.

To those familiar with the fraternity situation, it seems silly to condemn all fraternities for the actions of one. Individual chapters vary greatly on this campus, just as they vary from one college to another, and go from down to up over a period of a few years.

## Recognize these keys?

Light are the famous keys of national honor societies.

No. 9 is an important newcomer. It's the Bell System's new keyset for the direct dialing of Long Distance telephone calls. And, though not yet "national," it already has "chapters" in more than 900 cities and towns:

By pressing these keys, your operator can dial calls straight through to telephones in many distant places. Calls go through faster, more accurately.

Automatic dialing of Long Distance calls by operators, a development of the Bell Telephone Laboratories, is being extended steadily. This new method of putting through Long Distance calls is especially important right now, when the nation is counting on telephone service to help speed the job of defense.

BELL TELEPHONE SYSTEM

Keys shown: 1. Sigma Xi (Scientific Research), 2. Sigma Tau (Engineering), 3. Sigma Pi Sigma (Physics), 4. Beta Gamma Sigma (Commerce), 5. Beta Alpha Psi (Accounting), 6. Blue Key (Service), 7. Omicron Delta Kappa (Men's Leadership), 8. Pi Gamma Mu (Social Science),

Winners of four Norfolk Southern Railway Company Scholarships were announced today by Dean J. H. Lampe of the School of Engineering, chairman of the Awards Committee.

The scholarship and fellowship program was established last year by the Norfolk Southern Railway Company under the direction of Major J. T. Kingsley, president. The scholarships were established to benefit two groups of young people—children of employees of the railway, and boys and girls who are graduates of high schools in the region served by the railway.

\$2,000 Value

The awards have a total value of \$2,000, each winner receiving \$500 for one year of study at either the Woman's College in Greensboro or State College. The Norfolk Southern Railway Co. is also sponsoring a Fellowship in Diesel Engineering for \$1,000 at State. The recipient of this Fellowship will be announced later.

Recipients of the four scholarships, all pictured above, are Louis Stanton Hales of Stantonsburg, Ann Bennett of Charlotte, Walter M. Sawyer of Belcross, and Hubert L. Pittman of Wendell.

Three Holdovers

Three of the scholarship winners—Hales, Sawyer, and Miss Bennett—received the awards for the 1949-50 school year and on the basis of satisfactory scholastic attainment during the year were awarded scholarships for the current academic year.

Miss Bennett will continue her study of home economics at the Woman's College, Sawyer is enrolled in agriculture at State College and Hales is studying civil engineering at State. Sawyer and Miss Bennett are graduates of high schools in the region served by the Norfolk Southern Railway, and Hales is the son of an employee of the railway.

M.E. Scholarship

Hubert Pittman, whose father is depot agent for the Norfolk Southern Railway at Wendell, has been awarded the scholarship in mechanical engineering, and has begun his studies this fall term. He was graduated from the Wendell High School in June, 1950.

Members of the Awards Committee, in addition to Dean Lampe, are J. S. Cox, assistant to the vice-president of the Norfolk Southern Railway Company; Miss Mildred Newton, director of admissions at the Woman's College; Dr. C. H. Bostian, director of instruction in the School of Agriculture; and W. E. Adams, director of instruction in the School of Engineering.

The newest way to affix notices to bulletin boards is through the use of Alnico magnets. About one-fourth the size of a cube of sugar, these new "tacks" are now sold with steel bulletin boards. Each magnet, which is made of a 25% nickel alloy is capable of holding 33 times its own weight.

Religion Week Closes With Speeches, Eats

Religion In Life Week will close with a general meeting in Pullen Hall on November 12th. Dr. E. McNeill Poteat will speak at this time.

Throughout the week numerous group discussions have been held in fraternities and dormitories.

In addition to the student observances a series of three luncheons will be held by the faculty on November 14, 15, and 16. The speaker for these meetings will be Dr. Frank Lewis, president of Mary Baldwin College, Staunton, Va.

Vets Get Religion

Married veterans and their families from Verville and West Haven will have their own program during the week.

The West Campus YMCA Cabinet has announced a full week of religious activities for the vets and their friends. All the speakers and singers will present their programs in the West Campus Y in Verville.

Many outstanding speakers will conduct lectures during the week, including Dr. W. D. Weatherford, Vice-President of Berea College, Berea, Ky.; Reverend E. McNeill Poteat, a Pastor of Pullen Memorial Baptist Church; and Reverend Charles Lynn Brown, Pastor of White Memorial Presbyterian Church.

Included in the list of soloists on the week's program are Mrs. Willis Casey, Mr. C. G. Cathey, and Mrs. Jewel Carter.

Nickel undercoatings are applied to nearly all automotive parts which are finished by chromium plating. Nickel's function is to inhibit corrosion, while that of the chromium coating is to give a hard, non-tarnishing surface finish.

Gauster Appointed

Appointment of Dr. William F. Gauster as visiting professor of electrical engineering at State College was announced recently by Dean J. H. Lampe of the College's School of Engineering and Dr. C. G. Brennecke, head of the Electrical Engineering Department.

Dr. Gauster, a specialist in the field of electric power, will direct the operation of the High-Voltage Laboratory now being equipped at State College, besides participating in the developing program of advanced instruction and research in electrical engineering.

His appointment has been approved by Chancellor J. W. Harrelson of State College, the administration of the Consolidated University of North Carolina, and the executive committee of the board of trustees.

From Vienna

Dr. Gauster comes to State College from the University of Technology in Vienna, Austria, where he was chairman of the Department of Electrical Engineering and a member of the Academic Senate. His association with the Viennese institution was a long one, beginning with his studies as an undergraduate after World War I.

After receiving the doctor's de-

gree with honors in 1924, Dr. Gauster began a varied career of engineering practice with the Elin Electrical Manufacturing Company in Vienna. Four years of research work on power transmission systems led to his appointment in 1928 as Department Head in charge of the planning and design of such systems.

He later built and managed the factory in which his company manufactured mercury arc rectifiers, served as an assistant director of the corporation for seven years, and was responsible for the installation of power equipment in foreign countries. During this period of his career he found time to serve as adjunct professor of electrical engineering at the University of Technology in Vienna. During World War II, Dr. Gauster conducted research in electroacoustics and super-sonics.

Visited U. S. in 1947

Following the war, Dr. Gauster was called to recognize the Department of Electrical Engineering at the University of Technology. He came to the United States for a two-year visit in 1947, visited various universities in this country, and taught at Manhattan College and Fordham University in New York. He returned to Vienna in September, 1949, to resume his duties there.

Dr. Gauster is the author of numerous technical papers, which have appeared in various engineering and scientific journals during the last twenty years, and he holds a number of patents. He represented Austria at the World Power Conference, and was a director of the Austrian Engineering Archive and Curator of the Electrical Engineering Experiment Station at Vienna.

Mag Hits Stands

Final plans for the distribution of the Southern Engineer, which will be released by Monday, November 13, have been revealed by Editor Charlie LeGrand.

All freshmen engineering students will pick up their copies in Mr. Brigg's office on the second floor of Page Hall. Sophomores, juniors and seniors can get their magazines at the office of their respective department heads.

LeGrand says the new system of distribution will be continued if it proves successful.

## Pledge Frolic New Pledges Dance To Johnny Long's Music

By DON PIVER

The annual Inter-Fraternity Council pledge dances have been set for Friday and Saturday the 17th and 18th of November, according to Artie Shein, chairman of the dance committee.

The dance Friday night will be in the Frank Thompson Gym from eight o'clock until twelve. Music will be furnished by Johnny Satterfield and his band from Chapel Hill.

Next on the agenda for the week-end will be a concert in the auditorium of the Textile School at three o'clock Saturday afternoon featuring the famous band of Johnny Long. There will be a formal dance in the Raleigh Memorial Auditorium that evening at eight o'clock which will last until twelve. This also will feature the music of Johnny Long and his orchestra.

The members of the dance committee who are trying to make this one of the most outstanding events of the year are: Pete Lewis, Alpha Gamma Rho; Pete Cloud, Kappa Sigma; Bob Hardaway, Kappa Alpha; and Jack Cameron, Delta Sigma Phi. This promises to be a week-end that the pledges of the various fraternities will long remember, so the committee urges that every pledge will make it a point to attend all of these events.

In the marine field turbine blades, valve trim, and galley equipment contain nickel alloys, and on smaller boats propeller shafts, gasoline and water tanks, nails and other fastenings are made of Monel, which is known as the seagoin' metal.

## Welders Donate Cash For Undergrad Study

State College undergraduate engineers will have an opportunity to win \$6750 in cash prizes in the fourth annual Undergraduate Award and Scholarship Program sponsored by the James F. Lincoln Arc Welding Foundation of Cleveland, Ohio.

Cash awards will be presented 77 collegiate engineers who submit the most outstanding papers on arc welded design and arc welding technology.

The top award will be \$1,000 cash, with second and third prizes of \$500 and \$250 respectively. Seventy-four other cash prizes will be presented. All entrants will receive a copy of the book, "Design for Welding."

According to the Foundation, "this award program is dedicated to progress, through scientific interest in and study of arc welding construction and arc welding technology by engineering undergraduates."

In addition to cash awards, scholarships will be established at the institutions of the first three winners in the amount of the cash award they received. The scholarship will bear the name of the contest winner, and will be awarded at the discretion of the department head. The scholarship will be for study in the same department as the cash award winner is enrolled, and may be used for more than one year. It also may be divided among several students if this is desired.

In accordance with the rules of the contest, entrants must limit their papers to include either design, maintenance and repair, welding fabrication, or research and development.

Any undergraduate student enrolled in any engineering institution in the United States may enter the contest. Papers may be written by more than one student, and may cover a subject which a thesis or term paper is to be written.

Entries will be judged on a basis of ingenuity and originality displayed, clarity of exposition of design, description, procedure and research. Practicability of the result, technical completeness and thoroughness, presentation and the correct use of English also will be important.

For information and rules of the contest, entrants may write to the Secretary, The James F. Lincoln Arc Welding Foundation, Cleveland, Ohio.

## Labor Gov't Aids English Education No Strings Tied To Money Says British Textile Man

The British Labor government has advanced higher education in the British Isles, according to eight world-renowned textile educators from England and Scotland who visited the School of Textiles on Tuesday.

J. B. Speakman, textile professor from the University of Leeds, stated in reference to the present British Government, "This government, more than any other, has aided the universities."

The Britains noted that enrollments in their schools have been increased by scholarships granted by state and local authorities.

**Campus Press Conference**  
At a press conference held for the campus publications, the visiting educators pointed to the fact that grants given to British schools by government agencies are free from any restrictions. W. E. Morton, University of Manchester, said, "No strings are attached to government money, and no English university will accept funds with such qualifications."

Morton also explained that the British textile industry is not nationalized and such action is "politically a long way off, though it has been mentioned. The Liverpool Cotton Exchange, however, has been nationalized."

**Britons Pay High Taxes**  
In answer to questions as to the standard of living of British textile workers, Speakman said that the actual value of the British textile worker's wage ranges from 25 to 45 dollars a week. He also stated that the British worker must pay far higher taxes than his American contemporary, therefore has less money for luxuries.

The educators attended an address by Thomas L. Carroll of Charlotte, an executive of the National Cotton Council of America, in the new auditorium of the School of Textiles Tuesday afternoon and conferred with Dean Malcolm E. Campbell in his office.

Dean Campbell was host to the visiting educators at a luncheon at the Carolina Country Club following Carroll's talk.

Later in the afternoon, the visitors inspected the facilities of the School of Textiles, studied the School's laboratory methods and equipment, and discussed advanced concepts of educational procedures with the textile faculty of State College.

The visitors were also guests of honor at a tea at the home of Dean and Mrs. Campbell, 1315 Williamson Drive, Tuesday afternoon.

The list of educators making the trip to State College:

H. S. Bell, head of the Textile Department, Huddersfield Technical College, Huddersfield, England; G. A. Bennett, head of the Textile Department, Salford Royal Technical College, Salford, England; J. C. H. Hurd, head of the Textile Department, Leicester Technical College, Leicester, England; J. C. Martindale, principal, Scottish Woolen Technical College, Galashiels, Scotland; W. E. Morton, professor of textile technology, University of Manchester, Manchester, England; R. C. Oversby, head of the Textile Department, Bradford Technical College, Bradford, England; J. N. Preston, lecturer in textile chemistry, University of Manchester, Manchester, England; and J. B. Speakman, professor of textile industries, University of Leeds, Leeds, England.

Professor Morton visited the School of Textiles at State College during the spring of 1949 and addressed Dean Campbell's class in "Cotton Quality." Dean and Mrs. Campbell were guests in his home in Hale, Cheshire, England, in October 1949.

The party of visiting textile leaders left Raleigh by train Tuesday for Philadelphia, Pa., where they will inspect the facilities of other top-ranking textile educational and research centers.

## MAID OF COTTON—

(Continued from Page 2)

supervision of Candy Jones and her staff.

The 1951 Maid will be presented with an all-cotton wardrobe created for her by the nation's topflight designers. As the cotton industry's goodwill and fashion messenger, she will visit thirty major United States cities, England, France and, this year for the first time, six Latin American countries. These include Cuba, Canal Zone, Peru, Argentina, Brazil and Uruguay.

The contest is open to any single girl between the ages of 19 and 25 who was born in a cotton-producing state and is at least 5 feet 5 inches tall. Applications may be obtained from the National Cotton Council, Box 18, Memphis 1, Tennessee. Deadline for entries is December 1.

## RELIGION ADDRESSES—

(Continued from Page 1)

at State College yesterday at noon. "As college students," he declared, "we are forced to meet a crisis almost daily, and after graduating, we continue to meet numerous crises during our entire life." "God will help anyone who asks for help to meet the challenge of a crisis," he said.

Director Anderson stated that there were three major points to remember when a crisis is at hand: "1. Take your eyes off the crisis and it will help you to meet it better."

"2. There must be prayer and meditation in every crisis."

"3. The person must be willing to give himself in the interest of others."

In referring to the Bible, Anderson declared "that Jesus was forced to meet a crisis when he was crucified; but he turned his eyes from this crisis and looked toward Heaven."

"The Christian answer in a crisis," he said, "is to look for the challenge and be obedient to the call of Christ."

# Clubbing Around The College

**BOB:** Judy Garland! You're a sight for sore eyes!  
**BING:** Well, I'm here too.  
**BOB:** I know, you gave me the sore eyes.  
**BING:** You're the one on television... giving everyone erratic orbs.  
**BOB:** Don't be bitter, old timer. You'll get into that new medium yet. They're waiting for the wide screen. Then you'll make it. \* \* \*  
**BOB:** I'm Chesterfield's fair-haired boy. Now they have three. I'm fair-haired; Godfrey is red-haired; then there's Bing. \* \* \*  
**BING:** (to Bob) Have you taken a good look at yourself lately? It's getting fatter than you think.

### Hen Party

**STUDENTS' WIVES' CLUB** will meet at 8:00 p.m. Tuesday, November 14th in the West Campus "Y" (Vetville). All students' wives are cordially invited to attend.

### Alpha Alpha Meets

The Alpha Alpha chapter of Sigma Pi Alpha, national honorary language fraternity, will hold its next meeting Tuesday night, November 14, at 7:30 o'clock in the YMCA's north parlor.

All members are requested to attend.

### Earned A Monogram?

Men who have earned a monogram at State College are eligible to join the Monogram Club at the initiation which will be held later this term.

All interested members are requested to contact Bernie Watts immediately.

### E.E. Freshmen Meet

Eta Kappa Nu, honorary electrical engineering fraternity, will sponsor an informative and entertaining meeting of electrical engineering freshmen in Riddick auditorium at 8:00 p.m., Monday, November 13th.

A panel of students, faculty, and a professional engineer will explain what the student electrical engineer will find in his department and his profession.

Following the panel, the faculty and wives will entertain the freshmen with a reception. Any freshmen interested in electrical engineering is cordially invited to attend.

### C.E. Confab

There will be a meeting of the American Society of Civil Engineers Tuesday November 14 at 7:00 P.M. in room 11 Riddick.

Business at the meeting will include nomination of new officers.

### Seniors Meet

A Senior Class meeting has been called for Tuesday, November 14 at noon in Pullen Hall.

The purpose of the meeting is to elect a secretary to fill the vacated post. The class gift to the school will also be decided at the meeting.

### Sophs Want Dough

There will be a meeting of the Sophomore Class Thursday November 16 at noon in Pullen Hall. The purpose of the meeting will be to discuss class dues.

### Agromeck Smoker

Louis Mustian, Editor of the *Agromeck*, announced today that there will be a smoker Wednesday night November 15 at 7:00 in the Alumni Building.

All *Agromeck* staff members and any persons interested in becoming staff members are welcome to attend the smoker.

### SAM Conclave

Three State College engineering students were in New York City last weekend attending the Annual Society for the Advancement of Management Convention which began on Thursday.

Sam Sarvis and Ben Wuller represented the local Society of Industrial Engineers chapter, while Ronald Green will be the State College SAM, delegate.

Through a recent change in the Canadian Precious Metals Marketing Act, palladium articles made of that precious metal must henceforth carry markings of the actual metal fineness. Palladium is a by-product of nickel refining and is produced in great quantity in Canada.

About 300 miles of 9% and 5% nickel steel tubing was installed during the past year by the petroleum industry to resist corrosion in condensate wells.

 LEADING SELLER IN AMERICA'S COLLEGES

# Varsity, Frosh Runners Win Garrison Breaks Own Record

By MAYNARD SHIELDS

State College's freshmen and varsity cross country teams scored an upset over a favored Duke squad last Monday, in the North Carolina State Cross Country Championship, held on the State College course.

Duke's Bob Mayer of Charlotte, came home first in the frosh meet, but the State trio of Joe Shockley, of Raleigh, Eddie Beall, of Alexandria, Va., and Darrel Winslow, of High Point, sprinted home in second, fourth, and sixth places respectively, to give State the edge in scoring.

In the freshmen meet, State had a low score of 43 points, then came

Carolina with 49, Duke with 81, and Davidson with 85. In the varsity meet, State won with a low score of 34, Duke second with 40, Carolina with 66, and Davidson with 78.

Garrison Winner

In the varsity meet State College's Clyde Garrison of High Point and Bobby Leonard of Raleigh darted home in first and second place respectively to take the win for the wolfpack.

In winning the varsity meet, State's Garrison broke his own record by running the course in 20 minutes and 56 seconds. This bettered the course record of 22 minutes and 5 seconds set by Garrison

on October 22 against Carolina.

Bobby Leonard had a very impressive time of 21:22. He passed two Duke runners and a Davidson man in the last half-mile. State's Marshall Vernon ran the course in 21:40 to place sixth ahead of Duke's John Tate, who was seventh.

Wolfpack Favorite

The running of the Wolfpack already has established them as a heavy favorite to cope the Southern Conference Championships to be held next Monday on the State College Course. Coach Tom Fitzgibbons' boys have come along fine and are rapidly shaping up as the team to beat in the conference.

## Views and Previews

BY PAUL HODUL

A rain-soaked field prevented the Wolfpack from attaining a romp over a determined Richmond eleven last Saturday afternoon. Regardless of the score however, it was still an important victory for the "Big Red." It definitely helped guide the Wolfpack towards their most successful season since 1947, when the pack ended with a 5-3-1 record.

The possibility of having a 6-4 record for the season appears excellent at this time. With Davidson, Wake Forest and William and Mary providing the opposition for the next three Saturdays the Pack can almost be assured of earning two out of three. The fact that State could upset Wake Forest and make a clean sweep should never be discounted. Stranger things than that have occurred in Big-Four competition.

That the Deacon team will be favored is a foregone conclusion, but being the favorite in a Big-Four game doesn't exactly act as an asset. The usual response from the underdog is more determination than ever in the hopes of springing an upset.

Last Friday night the Freshman football team concluded their season with an easy victory over an outmanned but not outfought Davidson squad. The victory margin could have been much greater were it not for an over-abundance of inadequate ball handling. The Freshman offensive drives were continually hampered by fumble-itis. The results of a seasons play found the "Baby-Wolfpack" on top of 3-2 record. The victories were over Davidson, Carolina and Campbell, while the two defeats were administered by Wake Forest and Duke.

The Freshman squad should provide ample material for the varsity next year. With a host of clever backs and powerful linemen as their contribution the varsity should be more powerful than ever.

In the not too distant future the State basketball team will commence their season. Coach Case has assembled an array of stars that should make the Wolfpack one of the leading teams in the nation. Short of reserves last year, the Wolfpack will have more than an ample amount of reserves this year. The many stars produced by the Freshman team last year will help reinforce the varsity as they struggle toward their goal of Number 1 team in the nation.

The prediction rat race has settled down to a duel between Joel Heim and Jack Bowers to see who is going to be high man on the totem pole. Bowers still leads with an .820 pct; but Heim is slowly creeping up with an .812 pct. Myself and the tall one, (I got specific instructions from his true love not to call him fat) Bob Curran are bringing up the rear with .771 and .750 respectively. I almost said respectfully, but there's nothing respectful about those last two averages. Hold your hats, here we go again.

The predictions:

(Continued on Page 11)

## SAE's Split In Weeks Mural Sports Program

The SAE's took an even split in intramurals this past week. They lost a touch football game to the Sigma Nu's Monday afternoon and a volleyball game to the Pika's.

Wrestlers Win

Thursday night, Hank Odom and Bob Sample won out in the fraternity wrestling. Hank won over Spence of Phi Kappa Phi in the 125 pound class by a fall, and Sample pinned Cauble of Sigma Nu in the 155 division.

Sample advanced to the semifinals and Odom will not take the mat again until the finals when he meets Waters of Sigma Chi.

## Ed Needs 36 Yards To Set New Record

By T. E. RICKS

The Wolfpack will be all out to defeat the Davidson Wildcats when they meet them tomorrow night at Riddick Stadium. The Pack has a two-fold purpose in wanting to beat the Cats. First they are fighting for their fourth straight win, which will bring their average up to 5 and 3. Secondly they are seeking revenge on the Wildcats for that embarrassing 20 to 13 upset of last year.

Mooney Gunning for Record

Ed Mooney, the Pack's offensive star, will be gunning for 36 yards, which will set a new State College record. The "Draper Speedster" has gained 990 yards in the seasons seven games. He is second only to Jack McDowell, who gained 1,025 during the 1927 season. Mooney, the nation's 15th ranked offensive performer will be playing his last home game tomorrow night, along with John Tencick, John Martin, Fred Davis, Ed Hart and Norm Sloan.

Coach Crowell Little's Davidson Wildcats despite an unimpressive record of 2 wins and 4 losses for the current season, are capable of doing some big things. The Presbyterian squad's offense is built around quarterback Auburn Lambeth and fullback C. L. Runyan. Lambeth, who has already pitched over 200 completed passes in his career, is one of the most feared aerialists in the nation. Runyan, the 185 lb. line plunger from Gastonia, is one of the best runners in the Conference. Both of these players played leading roles in Davidson's victory last season, and they will be looking for a repeat performance in tomorrow's nocturnal tussle.

Little Johnny Guiton will probably be a starter tomorrow night, as a result of his offensive showings against Erskine and the Keydets from VMI. The fourth man in

(Continued on Page 11)

## Tech Coach Rates State As Strong Team to Hold

Putting the finishing touches on a week of intensive drills, Head Coach Al Learned told his Gobblers, "Any team with the ability to hold State to a 7-0 game and lead VMI at the half is a team whose potential offense and defense ability cannot be taken lightly."

Emphasis on running offense has held the spotlight this week as the Gobblers prepared for their final home game of the season Saturday at 2:30 against the Richmond Spiders, who are as hungry for victory as Tech.

Two starting backs, Sterling Wingo and Bruce Fisher, will be appearing before the home crowd for the last time. In the line, Ron Raugh, Charles Kernan, Bob Wachter, Joe Church, Roger Neel, and Tim Lawler, all possible starters, will be performing for the partisan crowd for the last time.

Coach Dick Esleeck, Spider head man, is no stranger to Miles Stadium, since he played football on the same sod. He also coached the freshman teams at Tech after graduation. It will be the first time Esleeck has brought a Richmond team to Blacksburg, since the Gobblers have visited Richmond for the past two years.

### Alexander Teams Lead May Meet In Finals

Both Alexander No. 1 and No. 2 have reached the semi-finals in handball. Alexander No. 1 is led by Bob Rosenfelds, "Zig" Eig, and "Ace" Epstein. Alexander No. 2 presents one of the best players on the campus in Jerry Strassler. He is given fine assistance by Jake Almond, Joe Ale and Specks Ross. The boys from Alexander expect to meet each other in the finals.

Alexander No. 2 again puts claim to having the best defensive team in the intramural football. They were sparked by Frank Richardson, who broke through the Becton line to throw the highly touted Becton backs for big losses. In the backfield it was Buck Bruce and Bill Rodgers, who knocked down and intercepted the passes thrown by Becton. Offensive strength was mainly through the air lanes with Richardson throwing to Rodgers.

### Syme Scores 6-0 Win Over Fighting Owen

Owen No. 1 lost the last scheduled football game to Syme dorm by the score of six to nothing. Syme No. 1 proved too strong for the freshmen and managed to score a touchdown in the first half, though missing the extra point. During the second half Owen threatened but failed to have it when it really counted. Syme led in first downs by five to one. Trogden, Vaughn and Jockum were outstanding for Owen. Owen No. 2, though showing great improvement, lost hard fought volleyball games to Vetville and West Haven. Owen No. 2 has played good ball, but the jump into the win column continues to be too much; however, Owen No. 2 is still to be reckoned with. Owen No. 2, after disposing of Owen No. 1, received a forfeit from Welch and received a free pass to the semi-final round of handball competition and may be the team to watch in the finals.

### Turlington Wins

In football this week Turlington No. 1 handed Bagwell No. 1 its first defeat of the season by the score of eight to two. Bagwell took the lead in the first quarter on a safety and it looked as if they would score at will, but two guards from Turlington had other ideas. These guards were Waddel and Marshall. In the second quarter Lowe got a safety for Turlington and the half time score was two all. Then that tragic third quarter rolled around with a sixty yard drive by Turlington, which ended in a touchdown pass from Patterson to Mangum. The pass for the extra point was incomplete.

### Sammy's Defeat Pika's Frat Handball Champs

Sigma Alpha Mu regained the fraternity handball championship after a lapse of four years by defeating the Pikas. Led by stalwarts Stan Cohen, Sam Filreis, Bill Margolis and newcomers Stuart Mintzer and Julie Lavner the Sammys, undefeated in match play, whipped through Sigma Chi, Kappa Sig, and finally Pi Kappa Alpha.

The Sammys trounced all comers and at no time yielded more than six points. Against the Sigma Chi's, the doubles team of Julie Lavner and Stan Cohen came out victorious by the score of 21 to 4. Sam Filreis took the singles 21 to 6. The next opponent, Kappa Sig was defeated in the doubles match by the score of 21 to 4 by Julie Lavner and Stu Mintzer. Bill Margolis won the singles 21 to 6.

In the finals, a determined hard fighting Pika team led by Captain Jim Scull. In the doubles, Julie Lavner and Stu Mintzer defeated the able team of Dewitt and Radford. The score was 21 to 6. Bill Margolis who was held to a standstill at the beginning of the game finally went on to win from his worthy opponent, Jim Scull 21 to 5.

The Sammy handball team, will probably represent State in next year's Big 4 Day Athletic Program.

### PKT Defeats PEP 9-0

In their second game of the season the Phi Kappa Tau gridders took the Phi Epsilon Pi's 9-0. A safety early in the game provided the Phi Tau's with a quick two points. This was followed in the third quarter by a Martin to Futch touchdown pass, with the extra point being provided by a wide right end sweep. Outstanding players for the Phi Tau's were guards Bill Hampton and Don Harkey along with backs Bill Futch and Earnest Isley.

### Athlete Of The Week To Be Aired On WWVP

Something new is to be added to campus activities starting next week. The campus radio station WWVP is going to carry a special along with their usual campus sports coverage on Thursday night. We are going to run the "athlete of the week" on the program. The athletic directors or the team captains of the teams on the campus will choose who they think is the best athlete during the week. The referees will also pick who they think is the outstanding athlete of the week. The results will be tabulated and the man with the most votes will be the athlete of the week.

Sectional titles are pretty well sewed up in all the sections except in section three of football and section four of volleyball. Bagwell No. 1, Syme No. 1, and Berry are the ones who are fighting it out for the

### KA Outdowns SPE 2-1

Two hard charging lines dominated the SPE-KA football game Tuesday afternoon. Though the game was scoreless, the K.A.'s won by the slim margin of two first downs to one for the S.P.E. Neither team could muster an offense because of the superlative defense of the respective forward walls. This victory put the K.A.'s on the top in their section with a record of 3-0, and they have yet to be scored on.

The K.A.'s scored a T.D. in the second quarter, but the play was called back because of a penalty.

Little Bob Prongay lead the losing effort for the SPE's with his passing and running. Harry Stowe, of KA, was outstanding for the victors.

championship of the third section in football. Each team has a record of two wins and one defeat. A play-off may be necessary to decide the winner in this section.

**STATE-DAVIDSON—**

(Continued from Page 9)

the Cats' backfield will be A. C. White.

**Three Regulars Out**

Coach Beattie Feathers will be without the service of three of his regulars. Starting center Tom Toffa and guard Walt Schacht will be out with knee injuries, and tailback Alex Webster is still out with a back injury. Coach Feathers is resting these men in the hope that they will be ready for the Wake Forest scrap next week. Harvey Yeates will be moved to center on defense to help bolster the center of the line.

The kick-off is slated for 8:00 p.m.

The probable starting line-up:

State	Pos.	Davidson
Simon	LE	Williams
Hillman	LT	Davis
Cox	LG	Fasul
Martin	C	Whisnant
Bagonis	RG	Kiser
Costa	RT	Branch
Romanowsky	RE	Turk
Barkouskie	QB	Lambeth
Mooney	LH	White
Smith	RH	Guiton
O'Rourke	FB	Runyan

Officials: Orrell Mitchell (Georgetown) Referee; Paul Dunham (Tulsa) Umpire; F. G. (Fats) Heath (Carolina) Head Linesman; Fred Croft (South Carolina) Field Judge.

**SPE's Beat  
Lambda Chi's**

It was a two-up two-down victory for the SPE's when they met the Lambda Chi team on the volleyball court. The scores were 15 to 7, and 15 to 9. Little Bob Prongay, despite his lack of height, was outstanding for the winners in both contests. The SPE's, who were unbeaten until their game with Sigma Chi last week, are now back on the winning kick. As the second round in the volleyball tournament begins, they're tied for first place in Section 2 with the Sigma Chi's.

**Campus Interviews on Cigarette Tests**

**Number 6...THE TURTLE**

They had our slow-moving brother moving at too fast a pace with those quick-trick cigarette tests! A fast puff... a swift sniff... a quick inhale... a rapid exhale. Terrapin's head was spinning —

didn't know if he was coming or going! But he slowed down to his own speed — decided there was no need to rush. After all, he figured,

how could anyone possibly prove cigarette mildness so fast?

And he was right, too! That's why we suggest:

*The sensible test*... the 30-Day Camel Mildness Test, which simply asks you to try Camels as your steady smoke —

on a pack after pack, day after day basis. No snap judgments needed. After you've enjoyed Camels — and only Camels — for 30 days in your "T-Zone" (T for Throat,

T for Taste) we believe you'll know why...

**More People Smoke Camels than any other cigarette!**

**Conference Standings**

This week's schedule:  
Saturday—South Carolina vs Citadel; Clemson vs Boston College; Wake Forest vs Duke; George Washington vs Furman; North Carolina vs Maryland; VPI vs Richmond; VMI vs Georgia Tech; William and Mary vs Virginia; Washington and Lee vs Delaware and West Virginia vs Penn. State.  
Saturday Night — STATE vs Davidson.

**Vets Suffer Muscle, Joint, Tendon Pains**

Nearly three-fourths of all disabled veterans on Veterans Administration disability compensation rolls are drawing their monthly checks because of general medical and surgical disabilities.

This fact was disclosed in a VA analysis of the nearly 2,000,000 disabled veterans on VA's rolls as of June 30, 1950.

In addition to the 73 per cent with general medical disabilities, the analysis revealed another 23 per cent of the veterans with neuropsychiatric conditions and the remaining 4 per cent with tuberculosis.

**Muscles and Joints**

Forty-two per cent of the veterans in the general medical and surgical category, the study showed, had disabilities involving joints, muscles and tendons.

The analysis compared the degree of disability of veterans of World War II, World War I and the regular establishment—all of whom are entitled to compensation for service-connected disabilities.

About six out of every ten World War II veterans on the rolls had disabilities rated at 20 per cent or less; five out of ten World War I veterans were in the 20-per cent-or-under class, and only four out of ten members of the regular establishment were in that category.

**West Haven Scores On Downs Over Welch**

In football, Welch lost to a good West Haven team, Thursday, on first downs. The West Haven line outcharged the small Welch line and this was the deciding factor. It was a scoreless game and after the first quarter, when Welch missed some very fine chances, no one came close to scoring. Twice Welch got the ball past the ten yard line and each time were halted before they could put across the double stripe. The rest of the game was a defensive game with both teams putting up a strong defense. Carl Price was the outstanding player for Welch. Playing left end, he repeatedly threw West Havens backs for losses and broke up a couple of passes with his speedy charges.

**Lady Victory Shines; Tucker Takes Game**

Lady victory finally shone upon Tucker dorm. Tucker took its first volleyball game last week by forfeit. The Tucker No. 1 football team had a harder time of it though as they had to go all out to defeat a game but outplayed Owen No. 2 team by the score of nine to six. The Tucker team led by Harold May and Hill on offense and Barnhart, Craig and Murrow on defense played fine football to record the victory. Scoring in the early minutes, after having intercepted an Owen pass deep in Owen territory, the boys from Tucker held off a determined bid by Owen that almost was enough to overtake Tucker.

**Sports Writers Wanted**

There is a job with plenty of fun attached waiting for you at THE TECHNICIAN office. Bob Curran, Sports Editor of the paper has sent out the call for young, energetic sports writers who want free press passes to all the ball games.

With the winter sports program getting underway soon, there will be plenty of fun-filled tasks for eager sports writers.

In basketball circles, CCNY and Holy Cross completely dominated the East last winter. The Crusaders won 26 consecutive games before losing to Columbia. CCNY, after a slow start, swept the NCAA and NIT tournaments... first team in history to win both events.

# Ceramic Research Program Expanded

The School of Engineering at State College has expanded its ceramic research program to include a number of new projects and the extensions of investigations already in progress, Dean J. H. Lampe announced recently.

Dean Lampe said all of the work is designed to promote industrial development in the State and to discover new knowledge in this field of engineering.

With the completion during the past summer of the \$1,300,000 Riddick Engineering Laboratories, the dean continued, the building formerly occupied by the Department of Engineering Research was made available exclusively to ceramic research. The additional laboratory space and new personnel have made possible a ceramic research program of wider scope.

### New Projects

Recently initiated projects include investigations on spodumene, buff-firing clays, pyrophyllite and sillimanite. To assist in the development of the program, four new members have been added to the ceramic research staff.

"Among the new projects," Dean Lampe said, "is a fundamental investigation of the properties of sillimanite. The mineral is used in the production of super-duty refractories and electrical insulator bodies.

A research project in the field of ceramic fluxes has been undertaken by I. W. Gower. The investigation involves the determination of basic information as to the values of spodumene for use as a flux in ceramic work.

Through an abundant supply of buff firing clays exists in this State, most of the refractories and glazed facing tile that are used in North Carolina are shipped in from Ohio, Pennsylvania, West Virginia, and Missouri. A study of the local clays is being conducted by John H. Hart to determine the possibilities of using this material for glazed facing tile, whitewares, and refractories.

### Local Use

As a result of earlier research at N. C. State College, the use of pyrophyllite in refractories has begun locally. Dr. W. C. Bell, head of the department's ceramic research program, has extended the scope of this study and is now directing a more comprehensive program on pyrophyllite.

An investigation of the effect of thermal treatment of the dielectric properties of ceramic insulator bodies has been extended. Conducted by Dr. Esther M. Tuttle and B. L. Joyner, the project involves the correlation of data regarding the nature and distribution of crys-

# How Do You Like Your Eggs?

All the smiling faces beaming up at our cameraman belong to Outing Club members. expenses for two delegates to be sent to the NSA Congress." These delegates would be the NSA Committee Chairman and the president of Campus Government. Additional delegates might be authorized by the Council, but their expenses would be paid privately.

Fourthly, "the NSA Committee will be directly responsible and subject to the Council of the Campus Government."

And lastly, "the Council shall make final appraisal of NSA to determine the question of future support."

No formal detailed debate ensued on the Committee's report.

### No Quorum

A motion to cease discussion of the question, which was put forth by Jeff Brooks, brought ten minutes of confusion before it was decided that the meeting was shy the needed member to give it the required quorum for carrying out business.

This was after McCracken had sworn in a new member of the group. Paul Dunn, a sophomore in the School of Education, was appointed last week to replace Audry Harrel.

With this revelation, a motion to adjourn was immediately carried.

McCracken announced that officers of the freshman class will be elected on November 21.

tals in ceramic insulator bodies with their resultant dielectric properties.

# WITH THE GREEKS—

(Continued from Page 3)

success. Also to the Phi Tau's we send congratulations on their winning the scholarship cup for the past year.

A series of calls to the different fraternities reveals the following information: no large parties this week-end but plenty of preparation for next week-end. By preparing I mean catching up on the work that is weeks behind so that next week they can fall behind in their work again as usual.

Lambda Chi plans to rush again Thursday and Friday. Most of the

rushing will be conducted at the house with smokers and an informal party. After the Davidson game many fraternity men from Davidson will visit their local chapters on the campus. I feel sure that these men will be amply entertained in their respective fraternity houses.

Phi Kappa Phi plans to take into brotherhood this Sunday Gerson Boyette, Scotland Neck; Robert Saddler and Frank Tutzaer, Greensboro; and William Spence, Overhills.
