New Network Eases Traffic Headache

Audience Receptive To The Bard's Comedy Hit

The College Union and Players Incorporated scored a double barrelled hit last Friday night in Pullen Hall with a polished, professional version of Shakespeare's *Love's Labor Lost*.

Sponsored by the Union Theater Committee, the Players' sparkling execution of a rich comedy by a man who is known best for his deep, somber tragedies was a well-timed change of pace and proved the company's right to rank with the top repertory groups in the nation.

In a cast of fourteen, fourteen were outstanding. Leading the way was Richard Armstrong as a nonsensically humorous schoolmaster with a mouthful of gibberish spied forth in six-syllable epithets and Willy Switkes as a light-footed minstrel of pungent wit and Terpsichorean grace.

Mixing classical wit with stylish travesty, Players Incorporated brought Shakespeare to life in one of his happiest moments, providing a rare treat for one of the largest Union audiences of the year.

Lost

One Pair Of Gloves

A pair of gloves has been turned into the college by a man who says they were left in his automobile by a second year engineering student at State. He gave the student, who was hitchhiking, a ride from Durham to Raleigh on the night of January 1st, between eleven and twelve at night.

The gloves are now in Room 10 Holladay Hall and can be picked up by the owner on proper identification.

MAINTENANCE DIVISION PUTS FINISHING TOUCHES ON APPROACHES TO COLISEUM

A new traffic network designed to alleviate if not eliminate the vehicular congestion in and around the College is nearing completion. Another link in the projected system was opened just a few weeks ago. It ties Hillsboro Street to Western Boulevard (Rt. 70) via the underpass next to the State College Print Shop on Dunn Avenue. Extensive grading operations were undertaken in order to complete this latest phase of the scheme.

There remains but a short stretch of road to be resurfaced on Dunn Avenue before the project can be labeled finished (see pic).

A pock-marked patch of road between Tucker Dorm and the Print Shop still slows traffic going to and from the dormitories and the Coliseum. Two days before commencement exercises were held there last June, a hole-riddled patch of pavement adjacent to the Coliseum was torn up and resurfaced (see pic). Now a similar section on the opposite side of the Coliseum is badly in need of repair.

Motorists approaching the bad spot are forced to slow almost to a stop, else endanger the mechanical well-being of their cars. Occasionally attempts are made to fill the holes with cinders, but these temporary repairs have proved inadequate. As soon as water becomes lodged in the depressions the cinders slosh out carrying with them even more road fill. Naturally this process enlarges the holes which are already the size of trash barrels and have almost as great a water-holding capacity.

The Maintenance Division is not unaware that repairs of a permanent nature are called for, but they are unable to make them. Funds for permanent road improvements must be sought first.

At the present time there is no specific fund available for permanent highway improvements on this campus, or for that matter at Carolina or the Woman's College. When expenditures of this nature are imminent, a scramble begins to find a source which can be tapped. More often than not budgets for building construction are altered to accommodate those which must be set up to finance road-building projects. This process need not continue.

(Continued on Page 2)

The flow of traffic on Dunn Avenue has been seriously impeded since the holes shown started growing in diameter. This patch of pavement is all that remains to be fixed since the completion of the Western Boulevard-Hillsboro Street link.
(Photo by John Mattox)

... Reviews The Road Situation

HEY MAC, Watch out
For that hole back there!

This is how a section of Dunn Avenue between the Coliseum and Frank Thompson Gym looked as it was being resurfaced last June. Now the section further westward is in such condition as to warrant similar treatment.
(Photo by John Mattox)

Holes ranging in depth from two to eight inches have appeared in the section of pavement from Tucker Dorm to the Print Shop on Dunn Avenue. The temporary repairs made have not been able to withstand the traffic onslaught.
(Photo by John Mattox)

Dearstyne Evaluates Williamsburg

Chief function of the restoration of Williamsburg, Virginia's colonial capital, is "to recall to our minds things which we dare not forget if we are to survive as a nation."

This conviction was voiced in an address at North Carolina State College Monday night by Howard Dearstyne, research architect in the Architectural Records Department of Colonial Williamsburg, Inc.

"One of the paramount lessons which we learn from a study of architectural history is that living architecture has never been static and that each age, taking from the past what it needs and only what it needs, must create for itself buildings of a type and character which satisfy its own physical and spiritual requirements."

"Colonial Williamsburg, therefore, does not offer the buildings of the restored capital of Virginia as models for imitation—rather, it invites their study simply because they are the physical expression of a wholesome way of life from which we are still able to learn much."

"This, then, is one of the primary objectives of the restoration of Williamsburg. Theoretically, however, the rebuilding of any other colonial town of comparable size which retained the same quantity of physical mementoes of its past as Williamsburg, might teach the same lesson. The circumstance which made Williamsburg outstanding and which makes its restoration of such especial significance to us today is that this particular city

was the scene of great events and a stage for the expression of ideas which have become fundamental tenets of our democracy and our present way of life.

"It behooves us, particularly today when the doctrine of human rights is being seriously challenged by a formidable antagonist, not to permit the site of the formulation of these principles of human liberty and justice to fall into decay and become forgotten. We need to have objective reminders of our ideals held constantly before us, lest we lapse into a careless disregard of them."

"Williamsburg's chief function, therefore, is to recall to our minds things which we dare not forget if we are to survive as a nation. And, since ideas and their authors are inseparably linked, the restored city is at the same time a memorial to the great men who in the originals of its buildings, at least, expounded and defended many of the principles by which our nation still lives. . . ."

Following his remarks, Dearstyne and his associate, Singleton P. Moorehead, showed a motion picture, "Williamsburg Restored," a documentary film on the history and restoration of Virginia's colonial capital.

THE DU PONT DIGEST

THE TECHNICAL MAN IN

Production Supervision

Scientists who know both people and processes
are needed to keep Du Pont's 71 plants humming

H. D. Tellman, B. S. in Industrial Administration, Yale '37, checks on product loading methods in Du Pont's Belle, West Va., synthetic urea plant.

Keeping production rolling in a modern industrial plant is a job that appeals to men trained in many branches of science and engineering. If you are looking for opportunities in this field, you won't have to look far at Du Pont, where nearly half the entire technical force is assigned to production supervision.

To qualify, a man must have the ability to understand both the mechanical and chemical phases of production. In addition, he should be a good planner and, above all, have a knack for handling people.

The production supervisor—there are several levels at Du Pont—has

three important areas of responsibility. The first is to the men working for him. He must be able to appraise them skillfully and assign duties accordingly. He must train them not only in the efficient operation of equipment but in safe working practices as well.

A second responsibility is to the customer. He must get the product out on time and provide uniformly high quality at the lowest possible cost. When demand for a product is subject to rapid fluctuations, he must be prepared to make quick readjustments in the scheduling of both manpower and materials.

William Chelgren, B.S. in M.E., Armour Institute of Technology '38, explains quality control methods to a group of Du Pont production supervisors.

The supervisor's third responsibility is to the higher management. Here, again, quality and cost are important factors. He is expected to prepare forecasts, to justify unusual expenditures, and to suggest process improvements leading to greater yield and better quality at lower costs.

One of the toughest nuts a production supervisor has to crack is the scheduling of preventive maintenance for minimum interference with production. In some companies where products are turned out in small-unit operations, a program of breakdown maintenance suffices. At Du Pont, however, where large-unit operations are the rule, unscheduled downtime is costly and something to be avoided whenever possible.

Since it makes over 1200 products and product lines, Du Pont can offer to men interested in production supervision opportunities in many types of operations. In the next issue of the *Digest*, we will describe a specific production operation in one of our 71 plants.

36-PAGE BOOK, "The Du Pont Company and the College Graduate," describes opportunities for men and women with many types of scientific training. For copy, write: 2521 Nemours Building, Wilmington, Delaware.

(Continued from Page 1)

The establishment of a separate road-building fund for all State-owned educational institutions would eliminate all the fuss and bother connected with the process previously described. All requests for road funds would then be channeled and consolidated within one agency and the responsibility for the upkeep and maintenance of the roads constructed with this money would be made clear. The entire operation would be streamlined and simplified.

The General Assembly is in session right here in Raleigh. Now would be an opportune time for those concerned to approach this or that Legislator for the purpose of introducing legislation which would result in an appropriation to take care of the road requirements of the educational institutions run by the State.

See that Legislator right away. Let him know you're here. Let him hear you now.

Textile Curriculum Flexible

In keeping with its policy of revising, eliminating, or adding textile courses according to the changing needs of the textile industry, the School of Textiles, North Carolina State College, has established a fourth-year optional curriculum in Textile Quality Control.

The courses will be under the direction of D. S. Hamby, associate professor at the school.

The purpose of the courses, Professor Hamby said, is to turn out graduates better trained to fill the growing needs of the textile industry for men trained in control and improvement of the quality of textile-mill products. In the past few years, he pointed out, 27 mills have hired graduates of the State College School of Textiles specifically for work in control of process and product quality.

The subject matter of the courses to be included in the fourth-year option will be testing techniques, statistical analysis and evaluation, quality-control-chart techniques and programs, defect-preventive methods, military specifications, administration of testing and research programs, laboratory layout and organization, and process control.

Bye "Dick"

Dick Groat, promising rookie shortstop of the Pittsburgh Pirates and former All-America basketball player at Duke University, will report for Army duty the second week in February, according to word received Tuesday.

Groat, a native of suburban Swissvale, Pa., currently is completing credits at Duke in preparation for his graduation later this month.

The rangy shortstop signed a Pirate contract last June and was with the club from then until the close of the season. He led the Pirates in batting with a .285 average.

'Operation Spirit' Connotation Is Given Broader Interpretation

To correct any mistaken impressions concerning "Operation Spirit" which The Technician may have inadvertently left with its readers the following information is passed along.

"Operation" is by no means re-

stricted exclusively to support of the basketball team. This is in answer to those who have asked why the project was not undertaken during football season when it was so sorely needed.

For one thing, the man who originated the idea did not have time to organize his thinking and subsequent actions until the football season was nearing an end. Also, it was felt by those concerned that support for the movement would not have been forthcoming while the football team was in a slump. The fans were thoroughly discouraged and mighty skeptical about the future and ability of the new coach and his staff; however, conditions have become slightly altered since but, not to any appreciable degree.

Promoters of the "Spirit" scheme have voiced the opinion that they expect the spirit at State College to improve to such an extent that it will carry over to other aspects of the athletic program. These men are aware that the "Spirit" treatments are easy to administer while the basketball team is doing well, and that as such are purely surface stuff. They are also convinced that given time, the spirit will become more deeply imbedded in the minds of those who had previously demonstrated a luke-warm interest in the welfare and support of all the teams, be they football, baseball, basketball, swimming, wrestling or

DISTRIBUTION— (Continued from Page 4)

From The Daily Tar Heel comes a news article explaining one Legislator's stand on the latter issue:

RALEIGH, Jan. 8— Senator R. Grady Rankin of Gaston County said yesterday he is opposed to the practice of naming legislators to the Board of Trustees of the Consolidated University.

"It's getting worse" from session to session, Rankin declared in a meeting of the State Senate Rules Committee, as he touched off the discussion.

He recalled that several sessions ago he was nominated to the board while a prominent man from Gaston who had been a member was left off. Rankin withdrew then

and succeeded in persuading the Assembly to put the other Gaston man back in his place.

But when the Gaston man came up for reappointment, he was knocked off the board in favor of a member of the Assembly.

Several members of the Rules Committee rose to say they agreed with Rankin on the matter.

It is not unreasonable to expect that the three divisions of the Consolidated University should enjoy equal (or proportional) representation on the Board of Trustees. The Legislators now in session would do well to make a thorough investigation of the procedures followed in naming Trustees and the resulting inequities.

More People Smoke Camels THAN ANY OTHER CIGARETTE!

PRE-REGISTRATION?

Not since 1948 have such long lines been formed during Registration as those which were observed on January 2 this year. In-state students hoping to push through the Gymnasium ahead of time in order to finish up the business so that they could return home for the weekend accounted for much of the Friday morning line which stretched all the way into Pullen Park (see pic).

The thought of returning to an inactive campus during the latter two days of a week-end struck many students as bleak in the extreme. Many of them were therefore prompted to buck the registration lines, and many of them were refused admittance to the Gym when they displayed registration permits which identified them as belonging in the group scheduled to clear Frank Thompson on Saturday. So great was the ensuing agitation that *The Technician* has been prompted to take note of it.

Students who are forced to travel great distances in order to arrive on time for the registration ordeal are hardest hit. They have often discovered that the only recourse is to travel Raleighward while the New Year's celebrations are in full swing. This applies particularly to out-of-state students. It is not an exceptional citation, and needless to say it creates bitterness towards the registration system which lingers long. This bitterness should fan the flames under the old pre-registration idea and bring it to a boil, but the flames are always doused by the cold waters of the realists in the registration department.

The problem is one which should be thoroughly discussed and resolved in Campus Government, recurrent editorials on the subject having proven ineffective.

TWO MODEST PROPOSALS

This week *The Technician* would like to go on record as favoring two separate measures, both of which involve deliberation on the part of those who represent us in legislative bodies.

The first proposal is treated in another article in this week's paper. It deals with road appropriations for educational institutions run by the State. The second proposal has to do with the exemption of college students from the income tax policies now enforced by the Federal Government. It is felt that young people who attempt to save their earnings in order to further their education should be given special consideration by the Bureau of Internal Revenue.

Many students spend their summer vacations trying to earn enough money to finance the coming school year. More often than not

they receive in excess of \$600, a sum on which they are obliged to pay a tax. If the \$600 figure was raised to \$1,000 for the benefit of college students, a step to encourage more people to further their educations would be taken, and in so doing the Government would tend to increase the number of people with the greatest earning potential. In the long-run the Government would stand to realize the greatest gain were this proposal adopted, for it would definitely favor the group which in future years could be expected to pay the largest income tax.

Approval or disapproval of the measure suggested depends mainly on whether you are a short or a long-range thinker; however, should anyone agree that this idea has merit, he is earnestly urged to write his congressmen at once saying so . . . while the Republicans are still in a tax reduction mood.

TRUSTEE SELECTION QUESTIONABLE

A measure which would alter the methods by which Trustees are appointed to the Board of Trustees of the Consolidated University has been discussed at length among interested persons at this institution many times. Chancellor Harrelson for one has advocated changing the methods of Trustee selection so that a more equitable representation of graduates of the three major divisions of the University would result.

At present the representation is lop-sided. That is, Trustees who have been graduated from one college outnumber those who represent the other two colleges respectively. Also, the practice of naming Legislators to the Board of Trustees while the General Assembly is in session has come under fire. Trustees are named by the Legislature and quite a few law-makers get on the board as a result.

(Continued on Page 3)

Signs Mislead Roving Reporter

By GEORGE OBENSHAIN

The Roving Reporter asks: "What would be your natural reaction on first approaching the signs at the intersection shown above?" (The pictures were taken while the photographer stood under the underpass near the Print Shop) (Photos by Aubrey Pope.)

All the students who were asked this question agreed that confusion would result. All stated, or agreed when asked, that the "keep right" signs were unnecessary and misleading. Several quick thinkers however said that since the signs are on the State College campus they wouldn't pay any attention to them anyway. One disgruntled driver had such a low opinion of the campus sign situation he would drive left. Several dreamier or more law abiding scholars said they would assume they were approaching a one-way street and would turn right.

Bob Kendrick of Vetsville thought the signs accounted for the record number of sightseers who have been cruising by his cracker box lately.

A talk with J. M. Smith, the campus engineer, uncovered the following information: "Keep Right" signs were ordered for the two intersections when it was found that students were driving to the left of the islands. Arrows were not specified on the order. Mr. Smith would prefer to have no signs at all on the campus other than those needed to locate buildings or departments but has found they are necessary. Drivers persist in parking so as to block streets, driving the wrong way on one way streets, etc.; consequently signs must be erected in an effort to keep some kind of order on the campus. Mr. Smith believes the campus is here for the students' benefit and he will welcome any and all suggestions leading to improvements.

From the Varsity News, University of Detroit:

I serve a purpose in this school
On which no man can frown—
I quietly sit in every class
And keep the average down.

Grad Awarded Ph.D. At Univ. of Minn.

Guy Langston Jones of Kinston, a graduate of North Carolina State College and former resident of Raleigh, was awarded a doctor of philosophy degree by the University of Minnesota at a recent commencement service there, according to an announcement received yesterday at State College from the University of Minnesota.

High School Graduates Are Now More Interested In Higher Education

By RUDOLPH PATE

Graduates of high schools and colleges, once content to rest on their academic laurels after graduation, now are striving to increase their education along both practical and cultural lines even after they have acquired their coveted sheepskins.

That is the conviction of Edward W. Ruggles, who rounded out 26 years of service as director of the North Carolina State College Extension Division last spring and has recently begun an expanded program of adult education at the college.

The fast-talking chief of the college's extension work said he has noted a sharp swing toward adult education in the past few years.

Since Director Ruggles began working for the State College Extension Division on March 1, 1926, the division has provided training for 107,399 citizens. During the past fiscal year alone, the division offered short courses, extension classes, and correspondence courses for 6,783 persons as compared with 461 persons who received similar training during Ruggles' first year of service at the college.

Spotlighting the new emphasis on adult training is the fact that 33,555 persons have enrolled for various types of courses during the past six years.

"People," Ruggles said, "are eager to advance in both their professional and social relations today—a characteristic trait of Americans—but judging from my experience in extension classes, correspondence courses, and short courses, our people are more anxious to improve themselves intellectually than ever before."

"Recent industrial development of the South has presented a new

demand for trained technicians. This demand exceeds that for engineers by approximately eight to one, but technicians have heretofore been unable to receive their training in the South.

"An official of a large industrial plant, recently located in our State, reported that their operation was retarded two years because of the lack of properly trained technicians. Laborers and engineers were available.

"Industry in the South cannot develop faster than these technicians are available. Realizing this need, State College has pioneered in the field and established the first technical institute in North Carolina and one of the first in the South.

"The work for which the training prepares young men lies principally in the middle field of technical activity between the skilled trades and professional engineering. The courses are designed to prepare young men for specific duties in specialized fields of engineering."

4,200 Graduates Placed In N. C.

UNC Tops Placements With 60 Graduates; State Comes Seventh With Fifteen

More than 4,200 graduates of colleges and universities, business schools and high schools were placed in their first regular employment with North Carolina employers during the year ended June 30 by the Employment Service Division of the Employment Security Commission of North Carolina, Chairman Henry E. Kendall announces.

The figures, compiled from the reports from 66 local employment offices throughout the State by John C. Mullen, clearance placement supervisor, and reported to Ernest C. McCracken, state director of the Employment Service Division, reveal that the new placements of graduates top by far the record of any previous year.

A breakdown shows placements of 4,222 graduates, 381 from four-year colleges, 108 from two-year junior colleges, 350 from business and commercial schools and 3,383 from high schools. Of the four-

year college graduates placed in jobs, 318 graduated from colleges in North Carolina and 63 from colleges in other states. Of junior college graduates, 91 were from North Carolina colleges, while 17 were from colleges in other states.

The University of North Carolina, the records show, topped the list with 60 graduates placed, while N. C. Agricultural and Technical College, Greensboro, was second with 28 placements. Other four-year college placements follow: Duke University, 26; Wake Forest College, 25; Woman's College of UNC, Greensboro, 21; Lenoir Rhyne College, Hickory, 18; N. C. State College, Raleigh, 15; East Carolina College, Greenville, and High Point College, 14 each; Guilford College, 12; Flora MacDonald College, Red Springs, and Johnson C. Smith University Charlotte, 10 each; Davidson College, 9; Meredith College, Raleigh, Elon College, and Appalachian State Teachers College, Boone, 7 each; Queens College, Charlotte, North Carolina College, Durham, and Western Carolina Teachers College, Cullowhee, 6 each; Greensboro College, 6; Livingstone College, Salisbury, 4; Catawba College, Salisbury, 3; Atlantic Christian College, Wilson, and Elizabeth City State Teachers

College, 2 each; Shaw University, Raleigh, 1.

Two-year junior colleges: Peace College, Raleigh, 14; Louisburg College and Mars Hill College, 10 each; Pfeiffer Jr. College, Misenheimer, 8; Charlotte College, 7; Gardner-Webb College, Boiling Springs, and Presbyterian Jr. College, Maxton, 5 each; Brevard College, Wingate College, Campbell College, Buie's Creek, and Mitchell College, Statesville, 4 each; St. Mary's College, Raleigh, Chowan College, Murfreesboro, and Pine-land Jr. College, Salemburg, 3 each; Montreat College, 2; Edwards Military Institute, Salemburg, Lees-MacRae College, Banner Elk, Biltmore College, Warren H. Wilson Vocational Jr. College, Swannanoa, and St. Augustine's College, Raleigh, 1 each.

A & M LORE

The young agri college graduate was talking to the old farmer.

"Your methods are hopelessly behind the times," he said. "Why, I'd be greatly surprised if you get one bushel of apples from that tree."

"I'd be dumbfounded if I did," replied the farmer calmly. "That's a pear tree, son."

Smart students know just how to treat
Mid-term anxiety.
They take time out for Lucky Strike
It's good psychology!

Nothing no, nothing-beats better taste

and **LUCKIES**
TASTE BETTER!
Cleaner, Fresher, Smoother!

Ask yourself this question: Why do I smoke?
You know, yourself, you smoke for enjoyment.
And you get enjoyment only from the taste of a cigarette.

Luckies taste better—cleaner, fresher, smoother!
Why? Luckies are made better to taste better. And, what's more, Luckies are made of fine tobacco.
L.S./M.F.T.—Lucky Strike Means Fine Tobacco.

So, for the thing you want most in a cigarette... for better taste—for the cleaner, fresher, smoother taste of Lucky Strike...

Be Happy—**GO LUCKY!**

In home ec, math, or chemistry,
There's one thing you can't measure;
It is a pack of Lucky Strike
For deep-down smoking pleasure!

Lois Epstein
Buffalo State Teachers College

Bernard F. Pierce
University of California

COLLEGE STUDENTS PREFER LUCKIES IN NATION-WIDE SURVEY!

Nation-wide survey based on actual student interviews in 80 leading colleges reveals more smokers prefer Luckies than any other cigarette by a wide margin. No. 1 reason—Luckies' better taste. Survey also shows Lucky Strike gained far more smokers in these colleges than the nation's two other principal brands combined.

Ag Assistant Job Open In Civil Service

Beginning Salary of \$3,410
In Several Governmental Offices
Open For June Graduates

The United States Civil Service Commission has announced its annual examination for Junior Agricultural Assistant. The jobs to be filled from this examination are Agricultural Economist, Agricultural Writer-Editor, Agronomist, Animal Husbandman, Botanist, Entomologist, Fishery Biologist, Forester, Geneticist, Home Economist, Horticulturist, Plant Pathologist, Plant Quarantine Inspector, Poultry Husbandman, Soil Scientist, Statistician, Wildlife Biologist, and Zoologist.

The beginning salary is \$3,410 a year and the positions are in the Department of Agriculture and the Department of the Interior in Washington, D. C., and throughout the country. A written test will be given and education, or education and experience, is required. Pertinent experience alone, in addition to the written test, may be qualifying for Agricultural Writer-Editor. Students who expect to complete their courses by June 30, 1953, may apply.

Full information, including instructions on how to apply, may be obtained at the Placement Office or from the head of the department where the appropriate courses are given.

Man About the Campus

"Big Jim" Burnette, the campus traffic officer whose duty it is to track down and tag illegally parked cars on the campus, has had his burden somewhat lightened with the establishment of several new student parking lots which are ready for occupancy.

E. T. York, Jr., professor of agronomy at the college, has announced.

In announcing the creation of the award, Dr. York said faculty members in the college's Agronomy Department "are delighted over the possibilities of this scholarship" and expressed the belief that it "will prove to be a real stimulus for outstanding performance by our students in agronomy."

"The recipient," Dr. York explained, "will be chosen during the spring term from among members of the Junior Class in Agronomy. The \$200 stipend will be awarded at the time of the recipient's enrollment as a senior."

"The scholarship will be awarded to an alternate in the event that the principal fails to enroll during the school year immediately following his selection."

"Eligible students will be judged on the basis of scholarship, leadership potentialities, professional interests, and contributions to the

college community through participation in extra-curricular activities.

"Recipients will be chosen by a committee composed of members of the Agronomy Department staff."

"The names of the recipient will be inscribed each year on a suitable plaque to be furnished by the National Fertilizer Association. This plaque will remain within the Department of Agronomy and will be prominently displayed in Williams Hall."

Richard Walser Edits New Book On Wolfe

English Professor Has Signed Contract With Harvard University Press For Printing Wolfe Papers

"The Enigma of Thomas Wolfe" is the title of a book for which Professor Richard Walser, of the English Department of North Carolina State College, has recently signed a contract with the Harvard University Press.

Set for an April publication, the volume is an edition of 26 biographical and critical essays about the famous Asheville novelist who died in 1938.

Highlighting the book is a previously unpublished piece, "Justice Is Blind," the only chapter of an uncompleted novel about lawyers which Wolfe began to write the last year of his life. The manuscript of this highly significant fragment was located among the Wolfe papers deposited in the Harvard University Library.

North Carolina contributors are Rockingham's John Skally Terry, now at New York University; Don Bishop, formerly of New Bern, now with NBC Studios in New York; Dr. Margaret Church of the Duke University English faculty; and Jonathan Daniels, editor of The Raleigh News and Observer.

Professor Walser has previously written several short articles on Wolfe. He considers this book, however, a major addition to the growing body of Wolfe criticism.

Prof. Walser is also the con-

tributor of an article, "More about the First American Novel," to the current issue of American Literature.

The article tells of two anonymous dramatic pieces which, appearing in Boston just after the publication of William Hill Brown's "The Power of Sympathy" in 1789, have some relevancy to the famous novel.

Professor Walser, a native of Lexington, received his education at Davidson College and the University of North Carolina. He holds the bachelor's and the master's degrees in English from the latter institution. For a number of years he taught in the public schools and at the University in Chapel Hill.

He came to North Carolina State College in 1945 after several years of service in the U. S. Naval Reserve, from which he was released in the rank of lieutenant-commander.

AN OPPORTUNITY FOR GRADUATE ENGINEERS WITH GOODYEAR

Representatives of the Goodyear Tire & Rubber Company and the Goodyear Atomic Energy Corporation will be on your campus to interview Seniors with B.S. and advanced degrees in the following fields of technical study:

- Chemical Engineering
- Mechanical Engineering
- Electrical Engineering
- Industrial Engineering
- Civil Engineering
- Chemistry

Opportunities for graduates with the above degrees now exist in the following fields:

- Plant Engineering
- Production Development
- Process Development
- Research
- Machine Design
- Factory Management
- Technical Sales

Contact your student placement office now
for your interview with the Goodyear Representative
on January 19 & 20

Reading Rate Is Highly Increased

Machine Known As Tachistoscope Helps Students Increase Reading Rates; Psycho Dept. Also Conducts Visual Aids Tests

In a darkened room on the campus of North Carolina State College, students are being trained to increase their rate of reading through quick presentation of a series of numbers.

To see a series of numbers presented at 1/100 of a second is no trick at all. College scientists say it is possible to go way beyond this with training. The method is a carry-over of the aircraft recognition work of pilots in World War II.

The Army now uses the method in its training courses for officers to help them increase their rate of reading. Industrial executives, who have to sift through stacks of papers each day, are becoming more interested in increasing their rate of reading by this method.

Inspectors in industry have found the training to be helpful in their work. A machine, known as the tachistoscope, presents the numbers on a screen at varying rates of speed up to 1/100 of a second.

College students may improve their reading rate and comprehension through emphasis on tachistoscopic training. This was revealed in an experiment conducted at State College by Paul J. Rust, assistant professor of psychology and English.

He worked with a group of 36 freshmen during the fall quarter of 1951. The results indicated that the average reading rate of the group was increased from 169 words per minute to 288.

The emphasis in reading training was placed upon the perception of phrases or through groups, implemented by the use of tachistoscopic exposures of digits, symbols, and form slides at speeds ranging from 1/25 to 1/100 of a second.

"In this connection," Professor Rust said, "it is noteworthy that the recognition of a four-word

phrase at 1/100 of a second adds up to the phenomenal rate of 24,000 words per minute. Obviously, this tremendous speed could not be maintained for consecutive exposures. Yet the fact remains that the eyes are capable of perceiving materials at much greater speeds than are generally considered possible."

The statistical analysis of the final results with the student group showed that the gains in reading rate, comprehension, and tachistoscopic training were all highly significant.

The results, Professor Rust stated, lend support to the contention of such leading reading authorities as Norman Lewis, City College of New York, that "faster reading brings greater comprehension."

Tachistoscopic training, college authorities explained, is only one of several methods for improvement of reading and is not the final answer for advancement in reading skills.

The work on reading is one of many research projects in the field of vision now underway in the Department of Psychology at State College. The research projects are supported by a grant and research professorship in occupational vision, sponsored by the North Carolina State Optometric Society.

In addition, the college's Department of Psychology is engaged in a far-reaching research project on the study of the relationship of visual skills to safe driving on the highways under sponsorship of the State Department of Motor Vehicles.

In one experiment, Prof. Howard C. Olson, Dr. William C. Westberg, and Graduate Assistant Charles C. Mitchell, all of the Department of Psychology faculty, studied "The Relationship Between Visual Training and Academic Improvement."

They worked with a group of 65 sophomores, who were having difficulty in their college training and

had an average of "C" or lower in their studies. Among the findings of the research investigation was that students taking visual training showed significant gains in their reading rates. Visual training also aided reading comprehension and academic achievement.

In another study, Dr. Key L. Barkley of the Department of Psychology faculty directed a research project on the relation of emotions to visual skills. He related this study to the every day problems of driving and work efficiency. The project was conducted by Benjamin Masse, a graduate student.

Preliminary results, Dr. Barkley said, "leave the question still open as to whether very strong emotional tensions would be expressed in changed visual skills."

The Department of Psychology is continuing its vision research in the various fields in quest of practical knowledge which may promote production efficiency, safety at work and on the highways, and the improvement of vision for thousands of persons.

Four out of five polio patients in the United States receive financial help from the March of Dimes. All receive aid of some kind from March of Dimes services.

'Dixie' Comes From Yankee Slaveholder

Dixie, the affectionate nickname for the southern part of the United States, probably came about in this way. A kindly slave owner named Dixie, in New York, sold his slaves to a Southern cotton planter, when slavery was forbidden in the North. His former slaves talked so much of "Dixieland," where they had been happy, that it came to be regarded as a sort of Paradise. When D. D. Emmett wrote the song DIXIE he may not have known that "Dixie's Land" was in the North, or he may have thought the song would have more appeal if it were placed "way down south in de land ob cotton." At any rate nowadays when we speak of Dixie we are referring to the South.

Some students at Southern California were caught recently dancing the "Cemetery Drag" in a graveyard.

The youngsters told police that they went in for tombstone tangos and some beer drinking just for a lark.

U. S. Civil Service Gives Student Aid

The U. S. Civil Service Commission has announced the acceptance of applications for a Student Aid Trainee examination in the fields of physics, chemistry, mathematics, metallurgy, and engineering, for duty in Navy and Army establishments in Washington, D. C., and nearby Maryland and Virginia. Salaries range from \$2,750 to \$3,175 a year.

This examination is open only to persons who have completed one-fourth, one-half, or three-fourths of a college engineering course or who expect to complete such study within nine months of the date of filing application. A written test will be given.

Further information and application forms may be obtained from the U. S. Civil Service Commission and from first- and second-class post offices. Applications should be sent to the Executive Secretary, Board of U. S. Civil Service Examiners for Scientific and Technical Personnel of the Potomac River Naval Command, Building 37, Naval Research Laboratory, Washington 25, D. C.

MEET YOURSELF— 10 YEARS FROM NOW

Ever wonder what you'll be like when the class of '53 holds its 10th reunion? If you started to work for one of the Bell System telephone companies after graduation, here's a pretty good idea.

POSITION IN THE WORLD: On the way up! A Commercial Manager, the company's representative and spokesman to as many as fifty thousand customers. A Transmission Engineer, helping to provide the telephone needs of an entire state. A Supervisor in the Traffic Department, responsible for the speed and quality of local and long distance service in several cities and for the personnel relations of a large number of employees. In the telephone company, jobs such as these are held by relatively young men and women.

FUTURE: Unlimited! The Bell System continually progresses and expands and its personnel grows with it. In the past 25 years, the number of telephones has almost tripled. In the past 5 years, telephone companies have introduced such things as network television transmission, radiotelephone service and dialing of Long Distance calls. And the best is yet to come.

FRAME OF MIND: Confident and proud! You'll be satisfied because you have a rewarding job...not only in pay and security...but in service. You'll be proud of your share in helping provide and develop a telephone service vital to the country's social and economic life.

Like the picture? For further information see your Placement Officer. He will be glad to give you details regarding the opportunities for employment in the Bell System.

J. Paul Sheedy* Switched to Wildroot Cream-Oil Because He Flunked The Finger-Nail Test

HERE'S a sad Lobster tale. Sheedy was really in hot water. His girl kept saying, "The Maine thing I don't like about you is the way you put your hair! Haven't you read about Wildroot Cream-Boil Hair Tonic? Non-alcoholic. Relieves annoying dryness. Removes loose, ugly dandruff. Helps you pass the Finger-Nail Test. Perfect for you 'claws you need Lanolin on that water-soaked hair." Paul got Wildroot Cream-Oil and now he shone looks slick. In fact, he's in salad with every girl on campus. So if you're net-tled about your messy hair, butter shell out 29¢ at any toilet goods counter for a bottle or tube of Wildroot Cream-Oil, "Your Hair's Best Friend." Ask for it at your barber's, antenna to one you'll be tickled pink!

Public Relations Men Appointed To Development Council Committee

Appointment of four new members to the public relations committee of the North Carolina State College Development Council was announced here today by Mose Kiser of Greensboro, committee chairman and member of the council.

Kiser said the committee members are Charles H. Crutchfield of Charlotte, executive vice president and general manager of the Jefferson Standard Broadcasting Company, which operates WBT and WBT-TV; Herbert E. O'Keefe of Raleigh, Sunday editor of *The News and Observer*; John Gordon of Raleigh, Southeastern advertising manager of *The Progressive Farmer*; and John S. Patterson, director of public relations for J. P. Stevens and Company.

The committee, Chairman Kiser said, will advise the Development Council on matters relating to the college's official publications and other public relations media. It will meet from time to time to discuss its work and will report its findings and recommendations to the Development Council, which is headed by E. Y. Floyd of Raleigh.

Kiser said he considered the work of the committee as "a significant part of the Development Council's functions" and expressed the belief that the committee will be able to render "a distinct and needed service for North Carolina State College and its respective divisions."

Mr. P Square Sutton

Ag Club Prepared For Barnwarming

The regular meeting of the Ag Club was held Tuesday night in 118 Withers Hall. A report was given by Don Regan concerning the annual Barnwarming which is to be held in Frank Thompson Gymnasium Saturday night, February 7.

The group was very fortunate to have as speaker of the evening, Dr. Z. P. Metcalf. Dr. Metcalf gave a very interesting as well as a very educational talk entitled, "Are You Getting an Education at State College?"

Upon completion of several other items of business, the Club was adjourned until next Tuesday night at seven o'clock.

Kiser is a charter member of the Development Council and will preside over the meetings of the public relations committee. He is a 1923 graduate of State College and is manager of the Guilford Dairy Cooperative.

Chancellor J. W. Harrelson announced the formation of the Development Council last May 8 and appointed Floyd chairman, L. L. Ray of State College, executive secretary, and 19 members to represent the foundations supporting the college, the alumni, and the schools composing the institution.

The council's principal objective, as outlined by Chancellor Harrelson, is to work for the long-range and continuing advancement of State College. It has a number of committees working on specific projects, such as national founda-

The Lambda Chi's have chosen their Sweetheart. She's Ann Peoples, a Saint Mary's girl who hails from Pittsboro.

tions, special gifts, annual alumni giving, public relations, and other activities.

Union Presents The 39-Steps

The Thirty-Nine Steps, considered by many to be Director Alfred Hitchcock's movie masterpiece, will be shown at College Union Movie-time Sunday night.

Adapted from the novel by John Buchan in the best Hitchcock manner, the picture is a tense, exciting thriller that constantly projects the director's outstanding trademark—suspense!

Robert Donat is starred as a young Canadian who, during a visit to London, finds himself ac-

cidentally involved in an international intrigue. Accosted by a girl who explains that she is a counter-espionage agent on the trail of a ring which has been selling the secrets of the British Air Ministry, he shrugs off her comments as mere nonsense. He receives a rude shock when he later finds the girl murdered and the police fingering him as the killer. Dodging both the police and the members of the spy ring who are also after him, he sets out to complete the girl's task.

Madeleine Carroll plays an engaging young lady who becomes the Canadian's partner in peril as he pursues the riddle of the thirty-nine steps.

George Washington Moves In Tomorrow

the Technician

SPORTS

Views and Previews

JERRY ARMSTRONG, Sports Editor

George Washington, a Deciding Factor

In tomorrow's game more than just another game is going to be played, this game could easily be the turning point in the conference race. Although the University of North Carolina is on top of the conference and Wake Forest is second, this game tomorrow could still be the deciding factor. So far Carolina seems to be well on their way to staying on top of the conference, but one of the main reasons why they are on top is because they haven't played a Big Four team and they will in my estimation lose one game to Duke, two to Wake Forest and two to our Packmen.

I predict that State will be on top of the conference and Wake Forest second by the time the Southern Conference Tournament rolls around in the Coliseum on March 5, 6 and 7. Mainly because Carolina doesn't have a strong enough ball club to defeat either Wake Forest or the Wolves.

Tracksters Return from Evening Star Meet

Coach Fitzgibbons and his trackmen returned this week from the Evening Star Meet in Washington where they made an outstanding showing in competition with the main track powers in the nation.

As the events got underway one of the rough blows happened for the team as Buddy Wright, the flash from Dallas, pulled a muscle in his leg and was unable to compete in any of the other events.

Clyde Garrison gave a good showing by taking fourth place in the one-mile event.

Buz Sawyer also did well by coming in fifth in the two-mile event.

The two-mile relay team composed of Clyde Garrison, Buz Sawyer, Dave Miller, and Dave Spangler took third place in this event and won medals for it.

Remember... FOLLOW THE WOLFPACK

Duke Player, All-American

Dave Strauch, Duke University soccer captain from Benton, Pa., has been named to the All-America team selected by the National Soccer Coaches Association. Duke coach Jim Bly has been informed by D. Y. Yonker of Philadelphia, chairman of the selection committee for the association.

Strauch, the top scorer for the Southern Conference champion Duke team with 15 goals in eight games, left Tuesday for New York City, where he attended the All-American luncheon Wednesday afternoon at 12:30 o'clock and was presented an award in recognition of the honor.

The All-America luncheon was scheduled for the Paramount Hotel, at which time the official team of the association was named. As in past years, 55 players were named to the team consisting of 11 first team, 11 second team and 33 honorable players. Strauch was slated to be named to the first team.

A senior, Strauch led the Duke team to its most successful season in recent years. The club won six matches, lost only to national power Penn State and tied defending Conference champion Maryland, 1-1, in an overtime battle. The team beat Virginia and Washington and Lee one time each and North Carolina and N. C. State twice each.

Strauch performed at the left inside position.

Casemen

Win 62-58

Records were made and records were broken when the Casemen invaded the "Beach Boys" from William and Mary to take a thriller 62-58 and extend their hopes of taking another conference title.

The records that were made were: by winning this game Coach Case has now a win total of 100 games at State College and the other one was by only scoring 62 points the Pack made their lowest score of the season.

A "jinx" was one of the records broken in this game as the Pack won their first game at William and Mary in the past four years. Bobby Speight broke the other one by fouling out for his first time this year.

All in all this was one of the hardest fought games this year for the team as they matched the Indians point for point all through the game and barely nosed them by four points in the closing minutes of the game with some pressure "charity" shots by Dave Gotkin.

One of the main factors in the past games between these two teams at William and Mary has been the zone defense of the Indians. This was demolished Tuesday night when forward Bill Kukoy, reminded us somewhat of Sammy Ranzino, with his one-handed push shot which continued to hit from everywhere and never stopped as Bill netted 20 points and high man for both teams. Also two other determining factors were the exploits of Guards Dave Gotkin and Herb Applebaum, who both played one of their top games of the season. Dave was outstanding in not only hitting his shots for 16 points, but also in some very smooth passing and ball handling. Herb was all over both backboards and was one of the main factors in stopping the Indians last period rally.

Half-time score—N. C. State 33, William & Mary 23.

N. C. State	William and Mary
Gotkin	McHoney
Kukoy	Harris
Speight	Chambers
Applebaum	Drake
Knapp	Savage
Thompson	Conte
	MacKelly
	Hortsmouth

Pack Third

The Tar Heels of Carolina still continue to hold the lead in the Southern Conference with a 7-0 record, but closing in the gap fast are the Deacons from Wake Forest and The Wolfpack of North Carolina State with records of 3-0 and 6-1 respectively. This doesn't include some important games played this week by each of these teams in conference competition.

The big game in the conference games will be the game in which the Pack of North Carolina State plays host to a powerful five from George Washington in the Coliseum, tomorrow night at 8:00.

It seems that the seven teams for the Southern Conference Tournament in the Reynolds Coliseum are all but decided this soon, except for the seventh place where there is a hot battle between the Blue Devils and the Purple Paladins from Furman.

Next week everyone is looking forward to the Wake Forest-State game because of the close battle expected, but what most people don't realize is that this game could easily decide who will be the winner of the Southern Conference this year. Both teams are the potential powers in the conference even if Carolina is leading the standing at this time.

These standings are through the games on Saturday, January 10.

CONFERENCE STANDINGS: ALL GAMES									
Team	W	L	Pct.	Pf	Op	W	L	Pct.	
North Carolina	7	0	1.000	534	404	9	2	.818

Minor Sports

Fencing

The Fencing Team, State's newest varsity addition, will make its debut in the Frank Thompson Gym tomorrow when they take on the Tar Heels of North Carolina at 8:00 p.m.

The fencers have eight matches on tap this season and have high hopes of taking most of them. Games are with Johns Hopkins University, Augusta Military Academy, and the International "Y" Fencing Club of Philadelphia. Both the Augusta Academy and the Philly Fencing Club are expected to give the Pack tight matches because they are recognized as two of the best teams in the nation.

Anyone interested in fencing, whether with experience or not, is invited to come to the back of the coliseum any afternoon at 5:00.

Swimming

Coach Casey sends his State swimmers back into action this afternoon when he meets the "Rambling Wreck" from Georgia Tech at 4:00 in the Frank Thompson Gym.

In last year's meet the Statemen took the meet by about 15 points and are a heavy favorite today.

There will be ten events including nine swimming and one diving.

State swimmers are: Frank Nauss, John Deyton, Bobby Mattson, Tommy Dunlap, Allen Hull, Allen Steinberg, Bill Churn, Paul Arata, Don Sonia, Eugene Sikes, John Verreault, Graig Lynes, James Wilson, and Fred Ruppenthal.

Tuesday the Pack will take on the University of Virginia.

State 7th.

Kansas State, pride of the fast-stepping midlands basketball country, replaced Illinois as the nation's top college team today by a slim margin of three points in the ratings of the United Press board of coaches.

For the second week in a row each team received 13 first place votes from the 35-coach rating board, but Coach Jack Gardner's Big Seven powerhouse had an edge in the votes for succeeding places and broke Illinois' five-week monopoly on the No. 1 ranking.

Kansas State had 288 points to 285 for the Illini.

Basing their ratings on all games played through Sunday, Jan. 11, the coaches also boosted Indiana two notches to sixth place and placed Southern California among the top 10 teams for the first time this season.

LaSalle of Philadelphia, Washington and undefeated Seton Hall occupied the third, fourth and fifth rankings, just as they did last week. After Indiana came North Carolina State, Oklahoma A&M, Notre Dame and Southern California teams from the Midwest, two each from the midlands, Pacific Coast and East, and one from the South.

Dear Uncle Joe: I'm a co-ed and go with the captain of the team but I've found that if you give an athlete an inch he'll take a foot.—Betty C.

Dear Betty: Well, let him! After all, who wants athlete's foot?

The scene above is one from the past Duke-State game at Duke, where the men from Raleigh showed the Blue Devils how the game of basketball is played around the Reynolds Coliseum. State won by eighteen points.

Fraternity Sports

By ALTON RAMSAY, JR.

The Fraternity volleyball championship was won last week by Sigma Nu. They defeated P.K.A. in the first two out of three games. The players on the championship team were: Speight, Goss, Agnew, Croxson, Joyner, and King.

Tom Ward, and M. Crow played their usual excellent game for the PiKA's.

Of the two teams, Speight and Goss of Sigma Nu and B. T. Ward of P.K.A. made all fraternity. B. Croxson and M. Crow received honorable mention honors. Speight, Goss, and Ward also made all campus volleyball.

Smith-Douglass Company Donates \$25,000 To School of Agriculture

The Smith-Douglass Company of Norfolk, Va., has donated \$25,000 to the Agricultural Foundation at North Carolina State College for two special projects in the college's School of Agriculture.

Announcement of the financial grant was made last week by Chancellor J. W. Harrelson of State College and Edwin Pate of Laurinburg, president of the Agricultural Foundation, both of whom expressed appreciation for the contribution.

A portion of the grant, Chancellor Harrelson and President Pate said, will be used to purchase highly-specialized equipment for the Soil Microbiology Laboratory. The remainder of the money will go to establish the Smith-Douglass Fund for Advanced Study.

Funds have not previously been available for the two projects, which are regarded as vital to the operation of the School of Agriculture and its farm research, teaching, and extension functions.

Chancellor Harrelson, outlining the significance of the Soil Microbiology Laboratory, said "one of the big deficiencies in the research program of the School of Agriculture lies in the field of soil microbiology" and pointed out that the funds from the Smith-Douglass Company will provide "most of the necessary major equipment for such a program."

In commenting on the fund for advanced study, Chancellor Harrelson explained that "one of the

most important needs in the School of Agriculture at the State College is assistance for staff members in their program of professional improvement."

Chancellor Harrelson said the Smith-Douglass fund will enable the college to assist its staff members in gaining professional improvement and will, therefore, build a stronger faculty for the college's School of Agriculture, which already has attained a high degree of national prestige.

Fellowships For Grads In Foreign Countries

A brochure listing nearly 200 fellowship opportunities for American students to study abroad during the 1953-54 academic year was issued this week by the Institute of International Education, 1 East 67th Street, New York City.

The awards, which are largely for graduate study, are offered to American students by private organizations and by foreign governments and universities. Most of the awards are for study in European and Latin American universities. Grants are also available, however, at the University of Ceylon and at the University of Teheran.

In announcing the opening of the competition for these fellowships, the Institute of International Education emphasized the fact that although a good knowledge of the language of the country is a prerequisite, the awards are not limited to the study of languages and literature. Suggested fields of study in the sciences, the humanities, and the social sciences are given with the listing of grants.

General eligibility requirements for the majority of the grants are (1) U. S. citizenship (2) a Bachelor's degree; (3) a good academic record; (4) a good knowledge of the language of the country of study.

With the Greeks

By ED STRICKLAND

By ED STRICKLAND

As in the past the I.F.C. is keeping up one of the greater fraternity functions on this campus by laying plans for the 1953 "Greek Week."

"Greek Week" has its constructive side as well as the social aspect. This year the project is as always an important one. Moreover, the project planned for this year is one which will call for hard work from each and every fraternity on the campus.

The College Engineer will provide sign post, post hole diggers, concrete and any other material needed for fraternity men to erect

The closing date for applications for grants given by the French government is February 1; for most of the other grants the closing date is March 1.

The pamphlet, entitled "Fellowship Opportunities for American Students to Study Abroad, 1952-53," may be obtained from the Institute of International Education, U. S. Student Program, 1 East 67th Street, New York 21, New York.

The Institute of International Education is a private, non-profit organization which administers international scholarships and fellowships for many private and governmental agencies.

sign posts at each campus entrance telling what building may be reached from that particular entrance.

On the social side of "Greek Week" there are several events planned. First there will be daily exchange of boarders between the fraternities having kitchens and dining rooms.

On Thursday night of next week there will be a meeting of all pledges, and on Friday night "Greek Week" will end with a banquet at the dining hall. Chancellor Robert House of Carolina will be the guest speaker, several other entertainment treats are being planned.

Several of the fraternities are planning to hold open house next week in connection with the overall "Greek Week" activities.

Tau Kappa Epsilon held its annual Founder's Day Banquet and Carnation Ball last Saturday night at the Chez Gourmet. Miss Mary Jane Warrick of Meredith College and Smithfield was chosen the Teke Sweetheart of 1953 and presented with a loving cup.

Several houses are undergoing drastic alterations and redecorations this term. The Teke's are winding up their activities in this field as well as the Alpha Gamma Rho's and P.E.P.

GOODYEAR AIRCRAFT CORP. INTERVIEWING JAN. 19-20

Representatives of Goodyear Aircraft Corporation, Akron, Ohio will be on your campus to interview seniors and graduate students in the following technical study:

- MECHANICAL
- INDUSTRIAL
- ELECTRONICS
- AERONAUTICAL
- METALLURGICAL
- ENGINEERING
- PHYSICS
- ELECTRICAL
- CIVIL
- MATHEMATICS

For opportunities

Design—Complete lighter and heavier-than-aircraft and components, airframes, power plant installations; controls; hydraulics; electronic systems; fuel cells, canopies, wheel and brakes, etc.

Development—Missile, airship, jet aircraft and helicopter projects; electrical and electronic systems, servomechanisms, fiber resin laminates and many other projects having both military and non military applications.

Plant Engineering—Light heat power application including machine design.

Production Engineering—All phases metal fabrication manufacture.

Stress and Weight Analysis

Tool Planning including Tools, Dies, Jigs, and fixtures.
