DAVE BARRETT

Dave Barrett To Run For CG Presidency

Dave H. Barrett, a Junior in Civil Engineering from Atlanta, Georgia has announced his candidacy for president of the Student Government.

Dave has wide experience in Student Government having been active in its operation since arriving at State College. He was chairman of the Faculty Evaluation committee and has been a member of the Freshmen Orientation, Constitution, and Promotions Committees.

In a prepared statement released to the TECHNICIAN Barrett stated: "I feel that my experience qualified me for this position and pledge to do all that I can to make the student government an organization on this campus in which they will take an active interest. I earnestly solicit your consideration and support in my campaign."

Mr. Barrett's complete platform will be carried in the TECHNICIAN of April 9.

State's Forestry School Ranks Tops In Nation

Forestry was introduced on our campus in 1929, under the direction of Dr. E. V. Hofmann. At that time Forestry was part of the School of Agriculture, and its faculty consisted of Dr. E. V. Hofmann, Dr. R. W. Hayes and Mr. Lenhart. Not until 1950, did Forestry become a separate school under the direction of Dean R. J. Preston. Today it ranks tops in the country and attracts students from many different states and foreign countries.

The School of Forestry, located in Kilgore Hall, offers four curricula: Forest Management, Wood Technology, Pulp and Paper Technology and Wood Products Merchandising.

All curricula require a thorough knowledge of the basic sciences and a coverage of the humanities as well as specific courses in forest science. The first two years are largely devoted to building a scientific and cultural background, while the last two years contain the professional courses and vary considerably according to the curricula selected.

Forest Management
Forest Management deals with the application of sound forestry principles to the growth and management of forests. This leads to outdoor work which is often strenuous. Success in Forest Management requires a love for this type of work and most of the forest managers would not be happy in any other profession.

Wood Technology
This program prepares a student for technical work in the manufacture of products in the wood conversion industries. Equipment

FOUND—The campus traffic officer has one Cushman motor scooter and a small English type bicycle in his possession. Anyone who has lost either please contact Mr. Burnette at the traffic office.

for instruction available in the Wood Products Lab includes saw mills, dry kilns, veneer lathe, gluing presses, spreader and mixer preservation tanks, testing equipment, conditioning rooms, finishing equipment and a 4kw high frequency generator.

Pulp and Paper Technology
This program trains men for technical and operating positions in (Continued on page 2)

New System To Be Used This Year

Young Dems Invite Senate Hopefuls

The State College YDC is presenting the first of a series of talks on the coming NORTH CAROLINA SENATORIAL PRIMARY. Several outstanding N. C. Democrats have been asked to speak and the first will be on behalf of Kerr Scott. This talk will be presented in Pullen Hall on Wednesday, April 7, at 8:00 p.m. Senator Alton Lennon will have a speech presented on his behalf at a later date. It is hoped that Wingate will also be represented in the third of the series.

Non Frat Men With "C" Eligible

By Jerry Armstrong

The Spring election for dormitory officers has been announced and will start on April 19. All nominations for candidates for each of the offices of president, vice-president, and secretary will have to be turned into Mr. Stewart's office in Holliday Hall no later than April 12.

A new system is being used this year in order to get a more systematic and democratic form of election. The new rules for the election are: An election committee will be set up in each dormitory consisting of the president as the chairman and three other men of his choosing to make up a four man committee. This committee will nominate two men in each dormitory for each of the offices of president, vice-president, and secretary. They will post this list of names on the bulletin board for the addition of any nominations by any student in the dormitory. All the nominations for each of the offices will then be taken to Mr. Stewart and a ballot for each dormitory will be made from this list.

The building manager of each dormitory will be in charge of the voting and this will all be done in a designated place and by a secret ballot method. All runoff election will be handled by the building manager and these will be carried out according to his own discretion. After the voting has been completed, the president will be in charge of the counting of the ballots and it will be his job to see that each candidate running has a representative present for the entirety of the counting.

The qualifications for an officer seeker are: he must have a "C" average, must remain a resident of the dormitory from which he was elected for the tenure of his term, and can't be either a member or a pledge of a fraternity.

An information concerning the election can be obtained by contacting Jerry Armstrong in 107 Berry.

CU Outing Club To Visit Hanging Rock

The Outing Committee of the College Union has planned an overnight hike to Hanging Rock State Park on April 10 and 11. The trip has been organized in co-operation with the University of Virginia. Students from Randolph Macon, Woman's College of the University of North Carolina, the University of Virginia, and State College will participate. All students who wish to make the trip should sign the list in the College Union Office not later than April 9 at 12:00.

COMING EVENTS

- Friday, April 2—7:00 p.m., Dance Lessons, Frank Thompson Gymnasium.
- 8:00 p.m., Golden Gate Quartet, Pullen Hall.
- Saturday, April 3—2:00 p.m., College Union Movie, "Oliver Twist," Textile Auditorium.
- 8:30 p.m., Military Ball, Coliseum.
- Sunday, April 4—8:15 p.m., College Union Movie, "Oliver Twist," Textile Auditorium.

Pictured here are the honorary cadet colonels who will be given special recognition during the annual Military Ball to be held in the William Neal Reynolds Coliseum at North Carolina State College tomorrow night from 8:30 until midnight. The young ladies were chosen for the honor by cadets in the Army and Air Force ROTC units at State College. Johnny Long and his Orchestra will provide the music for the ball. Shown on the top row, left to right, are Miss Bettie Bland of New Bern, the Air Force ROTC queen, whose escort will be Cadet Craig Barnhardt of New Bern and Miss Shirley Graeber of China Grove, Army ROTC queen, whose escort will be Cadet James F. Morton of Rockwell representing the Pershing Rifles Company. Middle row, left to right, are the Honorary Colonels representing the Air Force ROTC: Miss Fran Myers of High Point with Cadet Norman Zimmerman of High Point; Miss Rita Parrish of Charlotte with Cadet Walter Peterson of Charlotte; Miss Winnie Flanagan of Durham with Cadet Joe Ferguson of Raleigh. Bottom row, left to right, are the Honorary Colonels for the Army ROTC: Miss Norma Pittard of Warrenton with Cadet Dan Knight of Norlina; Miss Charlotte Cooper of Laurinburg with Cadet Ed Butchart of Greensboro; and Miss Joan Hills of New Bern with Cadet Fred Hadley of Bloomfield, N. J.

Case Expresses Appreciation For AFROTC Drill Team Half-time Shows

I wish to express my sincere appreciation for the Air Force ROTC crack drill team for their outstanding precision drill performance during half time at the Varsity basketball games. I am well aware of the hard work and of the many hours of practice re-

quired to give them the proficiency that they have demonstrated. Their cooperative attitude and fine support is greatly appreciated by myself, my coaching staff and the members of the Varsity basketball team.

Everett N. Case
Varsity Basketball Coach

Important Campus Elections Info Is Released By Campus Government

Elections for all campus offices are to be held on April 21 and April 28. The election on the 21st is a run-off election which will eliminate all but the two top contenders for each office.

The following schedule, released by Campus Government will be of interest to any student interested in running for office:

April 13th—Meetings of each class in each school will be held for the purpose of nominating Student Government Council members. The time and place of these meetings will be published in next week's Technician.

April 15th—Meetings of the entire rising sophomore, junior and senior classes will be held for the purpose of nominating candidates for class offices and the Judicial Board of Student Government. The sophomore class will meet in Pullen Hall at 12 noon. The junior class will meet in the YMCA South parlor at 12 noon. The senior class will meet in Riddick, 242 at 12 noon.

April 5th—Books will be open in the office of Dean Talley in which candidates for all other campus offices may register. The books will be closed on April 16.

30 Cadets Inducted In Arnold Air Society

Thirty Air Force ROTC cadets at North Carolina State College have been inducted into the Arnold Air Society, AFROTC honorary fraternity.

The students were chosen for the honor on the basis of outstanding records in their Air Force training and other studies at the college. The list of new members of the society follows:

Hoyle R. Allen, Oakboro; Robert L. Biggs, Raleigh; Louis J. Burnett, Jr., Greenville, N. Y.; Edwin S. Crow, Jr., Goldsboro; James C. Dean, Newton; Ernest S. Dean, Raleigh; John W. Fuquay, Route 1, Snow Camp; James I. Gillean, North Wilkesboro; Douglas R. Greene, Shelby; Richard W. Johnson, Germantown; Charles N. Kirk, East Bend; Billy R. Matthews, Angier; Edgar C. Mills, Polkton; Frederick M. Moore, Kinston; John W. Parker, Goldsboro; Thomas C. Parker, Saluda.

Frank D. Parrott, Kinston; John D. Pearman, Goldsboro; Dallas Pope, Lillington; Van W. Respess, Pantego; Carl O. Roberts, Jr., Raleigh; David S. Sartin, Providence; Hugh A. Savage, Council; Paul S. Smigell, Philadelphia, Pa.; George A. Speight, Mt. Airy; Joseph R. Stephenson, Winston-Salem; Joe D. Stowe, Cramerton; Clarence B. Weatherly, Durham; Alva E. Williams, Durham; and Richard S. Wimbish, Chapel Hill.

FORESTRY—

(Continued from page 1) the pulp and paper mills. The curriculum is a blend of major courses in forestry combined with chemistry and chemical, mechanical and electrical engineering.

Wood Products Merchandising
This program covers the production and distribution of lumber and other wood products. It trains men both in business methods and in understanding the basic characteristics and properties of the products and structures made from wood.

Employment Opportunities
A wide and rapidly expanding field of employment possibilities is available in the Southeast to young

men trained in forestry. Until recent years most job opportunities were with government agencies in managing our public forests, and this still constitutes a major source of employment.

WHAT COLOR GOES WITH A BLUSH?

A modest little freshman named Caspar Doyle found himself getting quite neurotic. It seemed that every time a girl looked at Caspar, he blushed. His sallow little cheeks turned a violent crimson. Then he would blush more because he was blushing.

He didn't get very far with the ladies and began brooding. Fortunately, he was a wealthy modest little freshman, and he finally bundled his problem off to a psychiatrist.

"I even hate my shirts. I know when I wear a white shirt it's only going to make my blush look redder," he dolefully intoned from the couch.

The head-shrinker's eyes lit up with dollar signs. He said: "Ahem. This trauma is obviously deep-seated and will take a long time to unravel. But meanwhile, try wearing some Vanahue shirts. Van Heusen makes them in lots of colors that will tone down your blush and you're bound to like the smart new collar styles. For your practical side, they're fine smooth broadcloth, color fast and Sanforized. See my nurse for the bill, please!"

Caspar bought Vanahue in all the colors and smart new collar styles for \$3.95 each. It worked. So many of the girls look at him now, he blushes constantly. Everybody thinks he just looks rugged and virile.

Pictured here are the newly-elected officers of the North Carolina State College Chapter of the American Society of Agricultural Engineers. The new officers are in charge of a wide range of extra-curricular affairs and are leading students at State College. Top row, left to right: Julian Goff of Rocky Mount, president; Bob Hedrick of Statesville, vice president; and Albert McCroken of Waynesville, secretary. Bottom row, left to right: Elijah J. Tyson of Monroe, reporter; Jacob Eli Reep of Lincolnton, Newsletter editor; and James Biggers of Monroe, treasurer.

NCS's Dr. Murray Writes First Book About Peacetime Atomic Energy

Ways and means of making peacetime application of atomic energy are outlined in a new textbook written by Dr. Raymond L. Murray, professor of physics in the School of Engineering at North Carolina State College.

It is the only textbook to date devoted to uses of atomic energy for practical, peacetime purposes.

"Introduction to Nuclear Engineering," title of the 400-page text, is designed for teaching on the undergraduate level for juniors seniors and as an up-to-date reference on nuclear engineering for practicing engineers employed by industries using atomic energy.

The book is based on material taught during the last three years in the North Carolina State College nuclear engineering curriculum, the first college or university enterprise of its type in the country.

Dr. Murray has gained distinction for his work in nuclear energy at the Oak Ridge National Laboratory, Oak Ridge, Tenn., for which he still serves as consultant, and as a consultant for several industrial firms using power reactors. He also serves as deputy director of the famous nuclear reactor at State College. Dr. Murray was one of the main designers and engineers of the reactor which is the only college-owned nuclear reactor in the world and is devoted solely to peacetime teaching and research in the field of atomic energy.

The 34-year old nuclear scientist is a native of Lincoln, Nebraska. He received his Bachelor of Science degree in education and his Master of Science degree in physics and mathematics from the University of Nebraska. He was granted his Ph.D. degree in physics by the University of Tennessee. He has been a student of Prof. J. Robert Oppenheimer at the University of California and has done atomic work at both Los Alamos, New Mexico, and Oak Ridge.

Since 1950, he has been a professor of nuclear engineering in the Department of Physics at North Carolina State College, where he teaches courses in reactor theory and reactor design.

"Chrome Clad" STEEL TAPES
are preferred by engineers

When you go out on the job, you want the most durable steel measuring tapes you can get—Lufkin "Chrome Clad." The jet black markings won't wear off, for they are bonded to the line and protected by multiple electroplatings that further build up the fine tape steel from which the line is made. The resulting line is heavier, stronger, and most rust and corrosion resistant. It is easier to read, easiest to clean, and won't surface crack, chip, or peel. Only Lufkin tapes are available with Chrome Clad.

Do YOU belong in this picture of progress?

AS A YOUNG ENGINEER, you'll be particularly interested in Melpar's story of rapid growth as one of the nation's leading electronics laboratories. You'll be interested, too, in the individual recognition and opportunity for advancement—determined solely by your own merit. Melpar has increased its personnel every year since it began . . . and is still expanding—with wide diversification, military and commercial.

Positions available in the following fields:
Data Handling Equipment (magnetic cores, magnetic recording equipment, analogue to digital conversion, shaft digitizers) • Flight Simulation (servomechanisms, pulse circuitry, electronic cabling) • High Frequency Antennas • Audio and Video Circuit Design • Small Mechanisms Design • Mechanical Packaging of Electronic Components • Heat Transfer and Thermodynamics • Design of reciprocating compressors, hot gas generators and diesel engines

Top European Arch. Magazine Features NCS School of Design

One of Europe's top architectural magazines, *L'Architecture D'Aujourd'hui*, published in Paris, has a six-page illustrated article on the School of Design at North Carolina State College in its current issue.

The magazine cites N. C. State's School of Design as an outstanding center of architectural training in the United States and adds: "Intellectually, it is impossible to imagine a better educational system..."

The French-language journal, circulated widely throughout Europe, South America, Japan, and the United States, praises the relationship between the faculty and students in the School of Design.

The author of the article, Robert Le Ricolais, lauds the work of Dean Henry L. Kamphoefner, Prof. James L. Fitzgibbon, Prof. Eduardo Catalano, Buckminster Fuller, and the late Matthew Nowicki, all of whom are or have been associated with the School of Design at State College.

In addition to N. C. State projects, the journal also carries an account of the State Fair Arena and the part which Nowicki had in its construction.

Theme of the current issue of the Paris magazine is "American Contributions to Contemporary Architecture." Thirteen pictures are used to illustrate the N. C. State article.

Emory U. & Florida St. Start Southern U.S.G.

Emory University at Atlanta and Florida State University at Tallahassee are co-sponsoring a Southern University Student Government Association to fill a need realized on a number of campuses for years.

The need is for organization so students of the southern universities participating can exchange ideas and pertinent information through workshops and clinics, collect and publish vital material and benefit from "intercampus services."

(Continued on page 8)

Three State Graduates Receive Commissions

Three North Carolina State College students, who completed their four-year college courses at the end of the winter term March 17, have been commissioned as second lieutenants in the U. S. Army Reserve.

The new officers are Landon Cheek Davis, Jr., of Norlina, who will report to Fort Benning, Ga., June 8 for additional training before joining an infantry unit; Eugene Alexander Dedmon of Shelby, who will report to Fort Benning May 5; and Charles Lewis O'Briant of Route 2, Reidsville, who will begin his active duty at Fort Benning May 4.

Colonel Middlebrooks administered the oath of office to the new lieutenants in a formal commissioning exercise at the college.

Cheek, son of Mr. and Mrs. Landon C. Davis of Norlina, has completed his studies for a B. S. degree in animal industry. As a student, he was active in the affairs of the Animal Industry Club and the Agricultural Club.

Dedmon, son of Mr. and Mrs. F. S. Dedmon of Shelby, also has completed work for a B.S. degree in animal industry and was active

W.C. Prof Gets Annual Gardner Award

Dr. Franklin Holbrook McNutt, professor of education and associate dean of the Graduate School of the Woman's College of the University of North Carolina, was presented the sixth annual O. Max Gardner Award at impressive ceremonies at N. C. State College here recently.

in the Animal Industry and Agricultural Clubs.

O'Briant, son of Mr. and Mrs. Charles L. O'Briant of Route 2, Reidsville, has fulfilled the requirements for a B.S. degree in horticulture. A member of N. C. State's football team, O'Briant also was active in the Horticultural and Monogram Clubs.

The award is made each spring to the faculty member of the Consolidated University who, in the judgment of the Trustees, during the current scholastic year has made "the greatest contribution to the welfare of the human race."

It was provided by the late Gov. O. Max Gardner in his will and carries an engraved citation and a check for the annual income from a \$25,000 trust fund set up by Governor Gardner.

The program was held at a dinner session in Leazer Hall, with President Gordon Gray presiding.

Four Named Campus Bridge Champions

Richard S. Rogers, James E. Ingram, Blair Jenkins, III, and Ray H. Fentriss, Jr. are the 1954 NCS campus contract bridge champions. The titles were conferred by Louis D. Day, Jr., director of Houston Hall at the University of Pennsylvania and chairman of the National Intercollegiate Bridge Tournament Committee.

More than five thousand students at 173 colleges and universities in forty-four states and the District of Columbia took part in the tournament. Sixteen students at State College took part in the tournament which was directed by Bill Garrabrandt.

Duke University placed third in the nation in North-South play.

EDITORIAL COMMENT:

Just What Have We Joined?

The Student Government last Tuesday voted to join the Southern Student Conference, an organization set up by a group of Southern colleges who were dissatisfied with the National Student Association, a national organization to which most of them belonged. Member school of the SSC are supposed to profit by the exchange of ideas which will take place at the annual meetings of the group.

Included in the constitution of the organization are the following elevated and solemn purposes: "To promote the principles and ideals of democratic government and the American way of life, To impress upon students their rights and responsibilities to their schools, their communities, to humanity, and to God."

This same document also specifically denies membership to all-girl schools and is so rigid that no Negro school is likely to become a member in the foreseeable future.

We realize that such terms as "democratic government" and "the American way of life" are so vague and difficult of definition as to

be practically meaningless and that "students responsibilities to their school, their communities, to humanity, and to God," are likewise open to many interpretation but by no stretch of the imagination can we arrive at a definition or interpretation which would include exclusion of any person or persons as representatives due to either their sex or color.

If the duly elected representatives of this school and other southern schools feel they do not care to hear the ideas of the white ladies or colored gentlemen and ladies well and good, but why, since their decision reduces them to hogwash, include all the high sounding phrases in their constitution?

The cost of belonging to the SSC is not great but we feel, nevertheless, the student body should know what they are getting for their money. Any State delegates to meetings of this group should report fully in writing all ideas acquired at the meeting and Campus Government should act on them as soon as possible. If the value of programs so originated is nil then we should withdraw from the organization.

Where Is Our School Spirit?

What do you think of the spirit on State College's campus? Have you ever compared it to other schools and found that we seem to be lacking something? Does it seem to you that when a football game is played or a program is put on by some campus group that majority of the students just don't give a damn? There definitely is a lack of spirit but the fault doesn't lie in one place.

The basic structure of State College with its six schools doesn't lend itself to a feeling of integration among the students. The engineers have their classes on one side of the campus and the textile boys are on the other. The other schools are just as spread out and within the schools there are numerous departments. Everything at State is as about as decentralized as possible which can easily be seen in the Campus Government, although this is being corrected to some extent.

No little factor bearing on school spirit is the feeling of, "I want to get out of here as fast as I can and never come back." The average student has been shafted so much that he automatically distrusts his instructors before he ever meets the classes. Perhaps, this condition has been brought about to a large extent by the large number of "goof-offs" that are enrolled but there seems to be no excuse for some of the quizzes and grading systems and other injustices that students are subjected to. Actually, the only fair thing would be a board where students could voice dissatisfactions, without fear of retaliation, to an impartial, reasonable group who would listen with a sympathetic ear and then give results if the change seems needed.

What about students being at fault when it comes to lack of school spirit? It's clear that the structure of the school and a few odd balls on the faculty are to blame for some of the lack of school spirit but there is some blame to be put on the students. There is a large number of students so self-centered that they live within a small group of friends and give no time to the college, class or any other group. They enjoy the fruits of the labor of others. Yet, contributing nothing. You can't get them to vote. Yet, they'll gripe about who is elected.

A prime example of this type of thing can be seen in the Junior Class and it's no different from the other three classes. Two class meetings were held this year and together the attendance didn't total half of the enrollment of the class. One meeting was to elect a vice-president and the other to select class rings. There just wasn't enough interest to turn out for the meetings and they were well publicised. Out of a possible \$2,750 which could be collected as class dues, only \$1,250 dollars were collected. Although the dues are \$5, (which includes both this year and next) they wouldn't miss it in the long run. This shows merely that although almost everyone likes a good time, they don't care enough to work a little for it.

What can be done about this situation? It'll have to be started by impregnating the freshman with college spirit and by a revolution within the student body in general. Every student will have to realize that we can progress only through unity and each individual must do his part to bind the college community together.

Suggestion Received on Honor System

Dear Sir:
To the large and ever growing heap of suggestions relating to an honor system, I should like to add another, which has at least the virtue of being appreciably different in approach from that being currently tried.
There is a nearby institution in which an honor system is operating with distinguished success. I refer

to the University of Virginia. Is there a good reason for not sending up periodically (perhaps once a quarter) a car with five or six students representing the cross section of the student body (a different group each time) to spend a day on the campus at Charlottesville, reporting on their return their impressions of the workings of the system—both the results

and the procedures—in the TECHNICIAN? There is surely a State College car which could be made available for such a purpose.

If as a result of many such observations on a working system an equally effective system should develop here, not the least conspicuous of its fruits would be a personal pride and a pride in campus community atmosphere which no penal system, such as that now being used, can ever engender.

Yours sincerely,
F. Brown.

Johnny Long To Play For Military Ball Being Held Tomorrow Night at 8

Johnny Long and his orchestra will provide the music for the eighth annual Military Ball to be held in the William Neal Reynolds Coliseum at North Carolina State College Saturday night, April 3, student sponsors announced recently.

The ball is presented annually by Scabbard and Blade, honorary military fraternity; Arnold Air Society, honorary Air Force fraternity; and the Cadet Officers' Association of State College.

Jackie S. Daughtry of Mt. Olive, a senior and cadet captain in the Army ROTC, is chairman of the ball committee this year.

Bandleader Long is a native of Newell, a 1931 graduate of Charlotte's Central High School, and was graduated from Duke University in 1935.

Lady Lintdodger Pens Top Essay, Wins \$600

Mrs. Ann Price Smith, a pretty brunette in the School of Textiles at North Carolina State College, recently was named the national winner of an essay contest sponsored by America's Textile Reporter.

Mrs. Smith's essay, chosen as the best from hundreds of entries submitted by students from all of the nation's 10 college-level textile schools, was entitled "Why Textile Management and Operating Personnel Should Attend the American Textile Machinery Exhibition at Atlantic City April 26-30."

The winning essay brought Mrs. Smith cash awards totaling \$600, including \$100 as the first-place winner at N. C. State and \$500 as the nation's top winner, plus an expense-paid trip to the American Textile Machinery Exhibition at Atlantic City.

By winning top spot in the nation-wide contest, the N. C. State coed is considered to have made an outstanding achievement in view of the fact that only about one per cent of the nation's textile students is made up of women.

Mrs. Smith, who is working her way through North Carolina State College, estimated that she devoted two or three weeks to the preparation of her essay—a task which required considerable library research, an interview with James L. McIntyre, general manager of the Wake Finishing Plant of the Burlington Mills Corporation, and

hard work in writing the 1,000-word document.

Commenting on Mrs. Smith's award from America's Textile Reporter, Dean Malcolm E. (Sandy) Campbell of the School of Textiles at North Carolina State College, said, "Naturally, we are proud that one of our students won the national prize. Mrs. Smith is a splendid student, an unusually hard worker, and a most attractive young lady."

CU Theatre Comm. Presents Plays Apr. 9

By John S. H. Burns
CU Theatre Comm.

On Friday evening April 9th, at 8:00 p.m. in Pullen Hall, the College Union Theater Committee will present Three One-Act Plays, staged and produced by the students of State College.

This is the third year that State College students have undertaken to stage and produce a series of one-act plays. The past two series of plays have included such hits as **IF MEN PLAYED CARDS AS WOMEN DO**, by George S. Kaufman, **THE MAN IN THE BOWLER HAT**, by A. A. Milne, **THE CLOD**, by Louis Beach, and **THE POTBOILER**, by Alice Gerstenberg.

This year the plays to be performed are **THE BYRONIC**, by Carl Edwin Varney, staged by Sigma Chi and directed by Blair Jenkins; **MOON UP**, by Robert Arthur, staged by Alpha Gamma Rho and directed by Hope Shackelford; and **HEAT LIGHTNING**, by Robert F. Carroll, staged by Pi Kappa Phi and directed by Alex Anthony and Raymond Anderson.

These plays are chosen, cast, directed and produced by the students. A group is free to procure what women are needed to fill the roles; and to get what technical assistance it might need from those who are qualified in theatrical matters. The group must plan its own production, conduct its own rehearsals, and present the show in collaboration with the College Union Theater Committee.

Three judges, who have not yet been named will vote for the Best Play of the Evening, and the Best Actor and Best Actress of all the plays produced. Appropriate awards will be made following the performance.

We look forward to an evening of delightful entertainment comparable to past years' performances. It is sincerely hoped that each of you will attend this show and help to enhance the spirit of Theater here at State College.

Admission will be either by Student Registration Card or by Faculty-Staff College Union Membership Card. Dates admitted free. Otherwise admission will be \$1.50 per person. Also there will be an After-the-Show Coffee Hour in Peele Hall Lounge, sponsored by the College Union Social Committee.

Our Morals And Mores Again

Newsweek magazine Nov. 2, joined the ranks of those who have undertaken to "size up" the younger generation. After making "an intensive study of seven institutions of higher learning," Newsweek found the "campus kids of 1953" to be "unkiddable and unbeatable," but with "little urge . . . to set the world on fire."

The "morals and mores of today's collegians" were studied at the University of California at Los Angeles, Northwestern university, Georgia Institute of Technology, Georgetown university, Howard university, Princeton university and Vassar college. Here are some of the findings:

Today's college students were "shrewder, more mature than their grandfathers, more cautious than their fathers; they worked harder and were more likely to think things through."

They underwent a big change when the World War II veteran came on campus. The vet killed off much of the traditional rah-rah college spirit, so that today it's "nothing like it used to be." The veteran did away with Hell week and hazing, taught students to drink to relieve tension and boredom instead of just to get drunk, and changed the attitude toward dating and marriage. Today—although "students keep this information strictly to themselves"—Newsweek said, "There is prob-

ably more talk about a wild sex life than the actual facts warrant." Although on the whole they were better students than those of the '20s and '30, Newsweek found today's generation to give "little thought to politics or international troubles." Generally, "they accepted McCarthyism although a goodly number in all institutions questioned its methods." Students were "no longer misled into phony Communist-fronts as they were in the '30s"; they were "wary of anything with a Red tinge."

Today's students were religious ("Religion courses on most campuses were well-subscribed, and religious-emphasis weeks were a big hit"), and most of all wanted "to be contented, to have a home and a family, and to make a success of their chosen field."

"Sizing up the collegian of 1953," ended the report, "they might seem dull in comparison with their predecessors of less-troubled eras. But, though they wanted to conform, they were thoroughly and solidly American. . . . Most of all they were young and wanted to make a million dollars. Some of them would. And you couldn't beat most of them anywhere else in the world."

As far as the college press was concerned, the Newsweek article contradicted itself and generalized far too much. Although some papers, like the Ohio State Lantern and the Providence College (R.I.) Cow, termed the effort "Significant" and discovered that students on their campuses "are much the same as students throughout the nation," the majority of college editors attacked the article on at least one point.

The Daily Nebraskan, University of Nebraska, called the study "A description of no one," "Must every magazine in America analyze us" protested the Nebraskan. "Must we be categorized like to many potatoes?" "Must writers conclude that all college students are alike?" At one of the schools studied the UCLA Daily Bruin found four items concerning UCLA that it

didn't know until the magazine came out. Commented the Daily Iowan, University of Iowa: "It seems contradictory to us to link 'conformity' and 'thorough, solid Americanism,' particularly in college students." Typical of the college press reaction was the Heights Daily News, New York University: "The American college student? Tommyrot!"

IT'S ALL A MATTER OF TASTE

It's not surprising Luckies lead in college circulation—These better-tasting cigarettes Are tops across the nation!

Roger Maserang
Southern Illinois Univ.

When you come right down to it, you smoke for one simple reason . . . enjoyment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, L.S./M.F.T.—Lucky Strike means fine tobacco . . . light, mild, good-tasting tobacco. Second, Luckies are actually made better to taste better . . . always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

In cigarettes that always please, The flavor must be right, So students wise choose Lucky Strike, The tops in taste delight!

Robert A. Rutherford
Long Beach State College

COLLEGE SMOKERS PREFER LUCKIES
A comprehensive survey—based on 31,000 student interviews and supervised by college professors—shows that smokers in colleges from coast to coast prefer Luckies to all other brands! The No. 1 reason: Luckies' better taste!

If you try hard to write a rhyme for Lucky Strike to use, It really helps if you would taste A Lucky while you muse!

LEONARD A. BINDER Sports Editor

BASEBALL

Starting with this past week, the spring sports program at State College has really begun to roll. The varsity baseball team has already played two contests, and right this moment is visiting the Clemson Tigers for a set of A.C.C. games to be played over this weekend. The men of coach Vic Sorrell have a goodly number of seasoned men on hand this year as the team seeks the first baseball crown ever won in the new A.C.C.

The squad is led by All-American Johnny Yvars from Westchester, New York. Yvars is perhaps the best player in this section of the country, and more than one major league team has made this young man an offer. Baseball talent seems to run in the Yvars family, for John has an older brother who is a catcher in the National League for the St. Louis Cards. Jack, the younger of the three ball playing Yvars, is one of the mound aces of the current Wolfpack nine. This youngster has a world of potential, and if he can ever progress to the point where he can get his fast ball over the plate with any sort of consistency whatever, Yvars will really be destined for big things here at State and in the future. The pitching staff is led by Bill Hardison, a sophomore from Williamston, North Carolina. This tall righthander has a good assortment of pitches and should be a big winner for State this season. Carl Wyles is back to bolster the team both behind the plate and in the hitting department. Wyles packs a lot of power in his small frame, and his long ball sticking may prove to be an important factor in the Wolfpack's favor this year. Another starter from last year's team who looms big in current State plans is outfielder Sonny Santoli. Sonny is gifted with a powerful throwing arm, and if his batting eye can only improve he might prove to be a really outstanding fly chaser. This crew of holdovers, along with other veterans and a couple of newcomers, make the 1954 edition of the Wolfpack baseball squad a real threat for conference honors this year.

GOLF

The golf team also boasts a fairly large group of returning lettermen. On tap for the coming season are Mel Deitch, Bill Edwards, Tommy Crockett, Phil Margotta and Peanut Lowery. Deitch, a really long hitting swinger from Chattanooga, Tennessee, is back once more in quest of a few par busting rounds for the Wolfpack. This weekend the team is at the home course of the University of Maryland. In the next few weeks the team will have to meet their big four rivals as well as the other squads in the A.C.C. The race for the title is wide open at the present with all of the Big Four teams having an excellent chance for the title.

TENNIS

Once more this season the picture does not look too bright for the men of State in the race for conference laurels. Coach Kenfield is confronted with the problem of having to contend with the Tar Heels of North Carolina for tennis honors in the A.C.C. Since the U.N.C. team is rated in the top five as far as college net teams go, things do not look too good for State or any other A.C.C. school which might have title aspirations. The team here at State is almost totally inexperienced as far as college competition goes. The players are also under a tremendous hardship in not being able to practice many afternoons a week. Because of afternoon labs, the State players only manage to play tennis a few days out of the week while their opponents have many more hours at their disposal with which to perfect the weak points of their game. However, the boys on this year's team have not given up by any means; and furthermore they most probably will hold more than their own against many opponents this year.

TRACK

The State track team will have to rely almost totally on untried personnel in most events this season. The team has been hard hit by the fact that the coaching status of the

Spartans Beat Wolfpack 5-3

"Goose" Amazes Crowd With Antics

The fans who were lucky enough to witness the basketball game held at the Coliseum last Wednesday evening between the College All Stars and the Harlem Globetrotters observed probably the greatest single attraction in basketball today in Reece "Goose" Tatum star of this fabulous world famous team. Tatum has been high scorer in each of these World Series tours which the All-Americans have made with the Trotters each year. "Goose" has caught the fancy of crowds everywhere with his zany ball-handling antics. The 6-3 basketball immortal possesses the longest arm span in basketball today. His arms seem to dangle way below his knees, and when the former are fully extended they measure over 72 inches in length. Tatum's uncanny knack for clowning on the court has been one of the major reasons why the Trotters play to a full house no matter where their travels take them. Because of his clowning on the court, many people are not aware of his prolific scoring ability. Tatum has broken every Globetrotter scoring record and he has not stopped yet! Yes, he is quite a ball player. He showed this at the Coliseum against some pretty fair ones on the opposing team Wednesday night.

Tennis Team Bows To Michigan State

The Michigan State tennis team swept all the honors to rout State's netters, 9-0, in the first match of the season for the locals. The State netters play again today, meeting Dartmouth. The summary (Michigan State listed first):

Singles
Mezel defeated Greenberg, 6-2, 6-3.
Brogan defeated Gough, 6-0, 6-2.
Hoffman defeated Cashion, 6-2, 6-2.
Britton defeated Copperrsmith, 6-4, 6-0.
J. Brogan defeated Frantz, 6-0, 6-3.
Squire defeated Brinkley, 6-4, 6-3.

Doubles
Brogan and Brogan defeated Cross and Reichardt, 6-2, 6-1.
Britton and Squire defeated Frantz and Cashion, 6-2, 6-3.
Menzel and Jimpere defeated Greenberg and Gough, 8-6, 6-4.

State Rifle Team Captures Fourth Place In Army Meet

North Carolina State College's Army ROTC rifle team captured fourth place in the recent Third Army Intercollegiate Rifle Match. A group of 35 college ROTC rifle teams competed in the match. N. C. State's rank of fourth spot in this year's match is the highest standing any North Carolina College has made in recent years, an Army spokesman said. Placing above the N. C. State shooters were teams from The Citadel, University of Puerto Rico, and the University of Georgia. Lt. General Alexander E. Boling, commanding general of the Third Army, has designated the N. C. State sharpshooters as one of the teams to participate in the National ROTC Match. Members of the State College team are John M. Archer, Oteen; Donald Calhoun, Waynesville;

THE Dorm Corner

By Jerry Armstrong

The Spring intramural sports program is just about ready to jump into full swing next week with a full program of softball, horseshoes, badminton, and track events.

Several softball games were played this week with the feature games being the wins of Berry over Bagwell No. 1 and Becton No. 1 over Bagwell No. 2. Next week starting April 5 most of the teams will have their first game of the season. Berry will meet Welch-Gold-Fourth, Tucker No. 1 faces Syme No. 1-Stadium, Alexander No. 1 will tangle with Turlington No. 1, and Owen No. 2 clashes with Bagwell No. 1 on Monday April 5. Horseshoes start April 12 at 4:00. Badminton starts April 13 at 7:00. You may reserve courts for an hour April 5, 6, 7, 8 to practice. See Secretary in Mr. Deer's office.

Big 4 Sports Day. The probable date will be May 12 or 13. The Host School has not yet been decided. The events are listed in the Handbook.

Will all Athletic Directors make it a point to start immediately in lining up your best athletes in each sport? Try-outs will be announced at a later date in May to determine our representative teams.

Track Dates: Dormitory Prelims, Wednesday, May 5, at 6:30. Finals, Tuesday, May 18. Events listed in the Handbook.

All Athletic Directors will meet in the Field House at Riddick Stadium the night before their Prelims at 7:00. All individual entries will be made at this time.

Sophomore righthander Ed. Hobaugh struck out 10 batters and kept eight hits well-scattered to lead the Michigan State Spartans to a 5-3 victory over Coach Vic Sorrell's State Wolfpack and spoil the season opener for State here.

Hobaugh was in trouble only twice. In the second inning State put together four hits for two runs and in the sixth used a pair of singles and a hit batsman to add another marker.

Sophomore Jim Hardison went the distance for State and although he gave up only five hits, he was in constant hot water because of lack of control. He walked five and hit two men and except for the third, fourth and fifth innings was forced to rely on his mates to come up with some outstanding plays to hold down the Michigan State scoring.

Spartans Score in First

The Spartans scored one in the first frame when centerfielder Charlie Mathews tripled home leftfielder Ron Stead, who had walked. In the second two more romped home when Hardison hit Bob Powell, walked Hobaugh and an error by State's Johnny Yvars permitted Powell to score. Stead drove home Hobaugh with a scoring single to deep center.

State rallied for two in the second as Yvars singled and scored on Joe Barringer's long triple. Barringer scored on Norman Norris' single through second.

Michigan State added another in the third when Hardison issued a pair of walks and hit another batsman. A single by Earl Morrall scored the run.

State scored again in the sixth as, catcher Carl Wyles singled moved to second when Hobaugh hit Yvars on the hand and Wyles scored when centerfielder Sonny Santoli smashed a grounder into centerfield. The box:

squad was in doubt for some time. However, this situation has been well taken care of. The team is now being coached by Willis Casey. Casey has distinguished himself around athletic circles by having outstanding success with the State swimming team. If he can notch as many wins on the cinders as he did in the Frank Thompson pool this last winter, there will be many happy smiles around Raleigh and N. C. State in particular come the end of May.

Ceramic Scholarship Cup Once More To Be Awarded At State College

An act of faith in higher education for ceramic engineers that was expressed 27 years ago has recently been renewed at North Carolina State College.

In 1927 the Molan-Drysdale Corporation of Hendersonville, N. C. established at State College a scholarship cup award for the ceramic engineering freshman with the highest scholastic standing in his class. When this happened, a private business in western North Carolina was sewing seeds that today are bearing fruit in big time industry and are continuing to encourage scholarship.

Molan-Drysdale originally presented the College a silver cup on which each year one boy's name was engraved to show excellence in

scholarship. To date the list includes 26 names. After the first cup was covered with names, Molan-Drysdale presented a second cup which was recently placed in the hands of Dr. W. W. Kriegel, head of the department of ceramic engineering at the College, by Bruce Drysdale of Hendersonville, president of the company.

The Molan-Drysdale Corporation is a forward-looking business concern that operates three plants in the Hendersonville area manufacturing high quality face brick and building tile.

In accepting the new cup, Dr. Kriegel stated, "Mr. Drysdale's confidence is well placed. The list of winners reads like a Who's Who of achievement in ceramic engineering. We feel justifiably proud of the accomplishments of these, as well as our other, graduates."

Dr. J. H. Lampe, dean of engineering at the College, hailed the award as "an outstanding example of industry and education working hand in hand to urge forward technological progress in the South."

Ceramic engineering, commonly identified only with brick, tile, or pottery, is that branch of the engineering profession that deals with non-metallic minerals like clay and kaolin, deposits of which are found in North Carolina. The minerals (Continued on page 8)

Basketball All-Time Great!

Ag Club News

The first regular meeting of the Ag Club of the Spring term was held in Withers Hall at 7:00 p.m. Tuesday night.

After a brief business meeting, Mr. L. L. Ray, the speaker of the evening was introduced. In his talk which was very humorous as well as serious, he compared State College as it is today with what it was 25 years ago. He said that many of the new buildings were standing where the college farms used to be located. He also compared student leadership on the campus with what it was in the past, stating that it was vastly improved. He said that the College Foundation, with which he is located, is still growing and is working to improve the administration-student relations, and to guarantee the best in opportunities to State College students.

At the last meeting in the Winter term, officers for this term were elected. They are: Glenn Byrd, President; Reese Allen, Vice-President; Banks Leonard, Secretary; and Charles Weatherly, Reporter. Ag Fair officers elected were: Willard Wynn, Chairman; David Sartin, Vice-Chairman; James Walker, Secretary-Treasurer; and Eugene Gray, Publicity Chairman. For the *Agriculturist*, Bill Enloe was elected as Editor, and Herman Porter as Business Manager.

ANN PRICE SMITH—

(Continued from page 4)

A native of Greensboro, Mrs. Smith has spent most of her life in Harnett and Wake Counties. She attended high school at the LaFayette High School, near Chalybeate Springs, and was graduated from the Pineland High School at Salemburg. She is the daughter of Mrs. Essie J. Price of Route 1, Raleigh, and the granddaughter of Mrs. A. A. Johnson and the late Mr. Johnson of Chalybeate Springs.

The second place winner in the essay contest among students at North Carolina State College is C. Douglas Blanchard of Burlington, a junior. He is the son of Mr. and Mrs. C. C. Blanchard and will be given a free trip to the exhibition in Atlantic City. His expenses will be paid by faculty members in the School of Textiles at

the college in appreciation for Blanchard's accomplishments. Third place winner was Ernest Sternberg, a junior in the School of Textiles.

The 10 schools competing in the national competition are all members of the National Council of Textile Education.

Pictured here are the newly-elected officers of the North Carolina State College Chapter of the Future Farmers of America. The membership of the chapter is composed of students enrolled in agricultural education at the college. The chapter sponsors a wide range of extra-curricular activities. Top row, left to right: Elton Thigpen of Mount Olive, president; Herman Haynes of High Point, vice president; Donell Stencil of Kenly, secretary; and James Walker of Reidsville, treasurer. Bottom row, left to right: Theron Sanders of Bailey, sentinel; Bill Ballance of Fremont, reporter; Ralph Ward of Denton, program chairman; and Bobby Lee Watson of Winston-Salem, student adviser.

CERAMIC SCHOLARSHIP—

(Continued from page 7) usually are made into articles that will withstand high temperatures as well as hard wear and tear. The variety of items in the vast scope of the ceramics business includes among other consumer goods mirrors, porcelain sinks, clock dials, glass eyes, enameled ranges, window glass, enameled street signs, table china, art pottery, neon lighting, false teeth, enameled pots and pans, fabrics of glass fiber, and jet engine parts.

Typical of the individuals whose names are engraved on the cups and who are playing major roles in ceramic industries is W. R. McLain of Statesville, who is superintendent of masonry for the Carnegie-Illinois Steel Company South Works.

A. R. Blackburn of Wilson is co-inventor of a revolutionary process for making chinaware and is vice president in charge of operations of Ram, Inc., of Columbus, Ohio. W. W. Gaskins of New Bern is now vice president and assistant manager of the Sierra Talc & Clay Company of Pasadena, California, with operations throughout the United States. Addison Hawley, Jr., of Goldsboro is superintendent of the tile department of Gladding McBean & Company, Los Angeles, California. A Greensboro native, D. W. Sewell, is chief ceramic engineer of Pamona Terra Cotta Company of Greensboro.

E. C. Couch, Jr., and his brother, A. H. Couch, natives of Darlington, S. C., are respectively plant manager of Charles Taylor Sons Company, manufacturers of high temperature refractories at Taylor, Kentucky, and head of the furnace design and improvement section, Libbey-Owens-Ford Glass Company, Toledo, Ohio.

Not all of the scholarship winners have gone into ceramic work but others of them have entered allied fields.

Three of the winners are now enrolled at State College. They are

H. C. Croom of Wilson, a junior and 1952 winner; D. E. Nixon of Charlotte, a senior and 1951 winner; and R. D. Dillender, Jr., of Raleigh, a graduate student and 1947 winner.

The cups on which the names are engraved with the year and scholastic average of the winners are kept on permanent display in the ceramic engineering department as a stimulus to greater achievements for promising ceramic engineers and as a reminder of the successful leaders in the ceramic industry who have gone before.

SOUTHERN STU. GOVT.—

(Continued from page 3)

It is to be wholly a student body organization, a cooperative effort of undergraduates to better govern themselves by pulling together and pooling their resources as a regional unit.

Preliminary steps were taken last spring, soon after campus elections of new student government officers.

Milton Carothers, newly elected president of the FSU student body, sent out letters to six universities interested in forming the organization. Immediately, he had a reply from Gilbert Turner of Tampa, new president of the student body at Emory. Yes, Emory was definitely interested. In fact Turner was in process of sending out similar letters.

Carothers and Turner met during the summer in Tallahassee, deciding to have FSU and Emory co-sponsor invitations to six schools to set up plans for the organization.

As a result of the invitations, an October meeting was held at Emory with FSU, Emory, University of Florida, University of Alabama, University of Tennessee and Georgia Tech represented. Tentative plans for the organization were drawn and a committee was appointed to make a final draft for a constitution.

The constitution committee met December 12 at Gainesville. It consisted of the student presidents of Emory and FSU and also the University of Florida president, Jim Harris of Gainesville.

Currently, the constitution is being submitted to various student senates or legislative bodies for approval. When five universities ratify the constitution, invitations will be sent to a greater number of southern universities to attend

a first annual meeting of the organization May 5 at Emory University in Atlanta.

Membership invitations will be sent to the six universities sparking the organization and also to University of Miami, Alabama Polytechnical Institute at Auburn, Ala., University of Kentucky, Vanderbilt University, North Carolina State, North Carolina, South Carolina, Duke, University of Virginia, Louisiana State University, Tulane, Washington and Lee, Mississippi State and University of Mississippi.

Dr. Studies Quirks of Should Be Fatalities

Some years ago a workman was erecting a scaffold near the top of a 175-foot smokestack when his foot slipped and he plunged toward the ground, striking on his left side in loose rubble after a free fall that by all reasonable calculations should have killed him instantly.

Oddly enough, the victim was reported conscious and coherent when help arrived. His injuries were confined to simple fractures and painful, but minor, bruises and abrasions. After a short stay in the hospital astonished doctors discharged their patient who returned to his job several weeks later apparently none the worse for his heart stopping experience.

More recently a jet pilot testing one of our newest, fastest combat airplanes, encountered trouble in the air and slammed the speeding ship into the ground at better than 200 miles perhour. An ambulance, hurrying to the scene, met the pilot walking away.

These strange cases, all involving the sudden and violent deceleration of the human body, are normally passed off as quirks of fate by a puzzled public. But not for scientific investigators of one of the country's most unique fact-finding organizations—the Crash Injury Research staff of Cornell University Medical College.

Such bizzare and inexplicable happenings are enthusiastically studied by a staff of highly trained investigators at Cornell lead by their director, Dr. Hugh DeHaven.

It was Dr. DeHaven who pioneered in the study of free falls and miraculous escapes like the lucky steeplejack. He long ago dismissed the idea that abrupt stops inevitably result in death. Scientific tests back up his theory. "The human body is surprisingly tough," Dr. DeHaven declares, "and is quite capable of sustaining tremendous forces when properly supported, or packaged."

And on that note—proper packaging—Crash Injury researchers are turning their attention to the nation's number one accident killer—traffic, and more specifically the automobile.

In the automotive phase of their work Cornell specialists, under administrator John O. Moore, are pressing hard toward an answer to the enigmatic question, "Why are people injured in automobile wrecks?". It's not an academic question. Stuffed into his portfolio

Moore has a dozen carefully documented case histories of victims emerging unscathed from 90 mph auto collisions. And contrarily, he has pictures of dead persons with cracked skulls who met their demise in cars ambling along at 35 mph. "It's more than a quirk of fate that some survive and others die," Moore contends. "It's a matter of design, specific points within a car that is causing the trouble. We've learned that much in preliminary studies."

"For example, who knows how many lacerated and bruised faces result from impact with radio and instrument knobs. We feel certain that many facial injuries resulting in collisions could be eliminated by recessing or otherwise redesigning these necessary protrubences." The finding of the crash injury study will tend to reveal other design deficiencies in automotive construction which will eventually be eliminated or corrected according to the promises of manufacturers.

North Carolina is playing a prominent part in the study. Investigators began in Guilford County last September to catalog accidents following the Cornell blueprint. In two months State Highway Patrolmen investigated 166 auto and pedestrian accidents in the Guilford County area, six resulting in deaths and 37 in one or more injuries.

A detailed medical report accompanied with several photographs of each accident was compiled and forwarded to Cornell researchers. From this mass of material analysts in Dr. DeHaven's fact-finding laboratory first assign a value or a number to each factor involved in the smash-up. Next, the findings are fed to a battery of IBM machines from whence they emerge as coldly scientific statistics.

The statistics, in the next step toward safer cars, will supply the answer to such questions as:

Do sun visor holders cause head

injuries? At what speed? What models?

How much impact before a windshield cracks?

How many injuries are caused by door and window handles?

How often do doors pop open in collisions?

The North Carolina study, which is sponsored jointly by the State Department of Motor Vehicles and the State Board of Health, will furnish Cornell with a minimum of 1,000 cases according to present plans. Together with similar investigations now underway in Connecticut, Maryland and Indiana, the North Carolina study will be continued for at least a year. The Guilford project was completed November 1 and the second phase opened in the Bladen-Cumberland section of the state the same day.

Design engineers of all the major auto and truck manufacturers have expressed interest in the unique fact finding project. On file in Motor Vehicle Commissioner

Edward Scheidt's office are letters from several of the country's most prominent auto builders pledging their cooperation. And while even a minor alteration in design is fabulously expensive the builders

Your Wings are your Passport

wherever you go...

Your Air Force wings are your personal passport to universal respect and admiration. They're a sign—recognized everywhere—that mark you as one of America's finest.

To wear them, you must win them... as an Aviation Cadet. They come with the gold bars of

an Air Force Lieutenant and earnings of over \$5,000 a year! They come complete with the admiration of a grateful Nation.

If you're single, between 19 and 26½, prepare to win this passport to success. Join the Aviation Cadets! For further information, fill out this coupon today.

Campus Part-time Job Applications at YMCA

Four of the College Departments which employ a large number of students on a part-time basis desire to select their student employees for the next school year (1954-55) during the present spring term. These departments are the College Cafeteria, College Union, College Library, and the Students Supply Store.

All students who would like to be considered for part-time employment beginning in September of 1954 by one of these departments, regardless of whether you are now employed by one of these departments, should visit the office of the Self Help Committee on the second floor of the YMCA without delay. Applications and instructions for jobs in these departments are available there.

Pictured above are the Golden Gate Quartet which will appear in Pullen Hall tonight at 8 p.m. The group is credited with starting the popularization of the Negro spiritual and folk music. Students will be admitted by registration card (dates free), and faculty and staff by presentation of College Union membership card. Otherwise the admission will be \$1.50.

Efforts Made To Revive Wataugan

Stories, Poems, Plays Sought For Possible First Issue

Efforts are being made to revive the now defunct humor and literary magazine "The Wataugan." To gauge the need for the magazine on the State campus contributions are now being sought.

Any student who has written a poem, play or short story which he would like to have printed is urged to bring it to Dean Talley's office immediately. Closing date for contributions is April 19th.

SAFETY REPORT—

(Continued from page 9) are anxious to make their products safer.

North Carolina was one of the first states to sponsor the Cornell project. Under the vigorous administration of Scheidt the long-range scientific probe into injury producing auto accidents is only one phase of the state's overall safety program, now recognized as one of the best in the nation.

While it may be two years or

even five years before the project bears fruit, North Carolina considers it of vital importance. As Commissioner Scheidt says, "Safer cars mean fewer deaths and in-

juries. We are glad to cooperate in any project with the ultimate aim of saving lives and reducing accidents. And we are going to reduce accidents in North Carolina."

As an Arthur Murray Student

YOU'RE SURE OF POPULARITY

Yes, good dances are the sought-after partners at parties. How popular are you? Why not come in to Arthur Murray's now and let one of his experts develop your dormant dancing ability? You'll be amazed what dancing talent you have, how really popular you can be. So come in now. Studios open 10 a. m. to 10 p. m.

Scabbard & Blade Selects Members

Scabbard and Blade, national honorary military fraternity, has chosen 10 Army ROTC cadets at North Carolina State College as new members.

The new members were chosen on the basis of outstanding performance in their military and other studies at State College and will receive fourragere in recognition of their achievements. The list of students receiving the honor follows:

Henry Hayne Baucom, Jr., Monroe; William Saunders Blalock, Route 9, Greensboro; James Edwin Cashwell, Route 1, Parkersburg; Miles Robert Cooper, Elizabeth City; John Nathan Gregg, Fort Mills, S. C.; Dale Pennington Gregg, Lenoir; Sammy Paul Jones; Shelby; William Martin Kahn, Raleigh; Thomas McNeill Memory, Wagram; and James DeWitt Tapp, Raeford.

Tomorrow Last Day For Vets Registration

The monthly certifications for Educational Allowances for Korean Veterans should be completed in the registration office on April 1, 2, & 3. The office will be open until 12:00 noon Saturday.

Pilot Policy Holders To Get Better Deal

Mr. J. Marshall Barber, Pilot Life Insurance Co. representative has announced that students may now sign chits at the dispensary for special medical treatment. This new system eliminates the paper work formerly connected with such cases.

A CAMPUS-TO-CAREER CASE HISTORY

"There wasn't a dull minute!"

DICK WALLNER, '52, left a trail of work as he whirled through a year of telephone training. Here he recalls the variety of his training jobs. (Reading time: 36 seconds)

Warm weather calls for more out door activity, which in turn calls for more energy building food. We have it in our properly prepared vegetables. Sandwiches to suit all tastes, plate meals, and breakfast items. At suprisingly economical prices. Make it a point to dine with us today.

THE GATEWAY

Open 7 a.m. to 1 a.m.
1920 Hillsboro St.

In Spring youngman's fancy turns to good food. Our cold plates, wide variety of sandwiches and a tall glass of sparkling iced tea help to beat the weather. Famous for our ice box pies. Plan to have your next meal with us.

THE GRIDDLE

24 Hour Service
2500 Hillsboro Street

"Training can really be interesting. I found that out when I joined A. T. & T.'s Long Lines Department after getting my B.A. at Cincinnati and my M.A. at Michigan in '52. Long Lines is the organization specializing in Long Distance communications. I was put in the training program, and there wasn't a dull minute.

"For instance, one of my jobs in the Traffic Department was estimating the exact number of calls that would be placed in a city on Christmas Day. My estimate was off by only 68 calls!

"Then in the Plant Department, I made a study of damage done to a certain cable. Found out that the most damage occurred in an area used by hunters. Some special public relations work among hunters helped improve that situation.

"And in the Commercial Department, I helped analyze the communication problems of one of the largest textile companies—it had widespread offices and plants. The recommendations made are now in use.

"The variety in my training has carried over to my regular job here in Cincinnati. My job is to see that good service is maintained for private line customers—pipeline and power companies, theater TV and the like. Every day is different.

"As far as I am concerned, I've found my career."

Like so many college people who have joined the Bell System, Dick has a job he enjoys. There are also job opportunities with other Bell Telephone Companies, the Bell Telephone Laboratories, Western Electric and Sandia Corporation. This is a good time to see your Placement Officer for full details.

BELL TELEPHONE SYSTEM
