College Releases Tuition Breakdown

Mr. W. M. Murray, Assistant Business Manager of the College, released this week a breakdown of tuition charges. Tuition charges this year are only \$2 more than was charged last year, and this increase is accounted for by an increase of \$2 in the Agromeck fee, which was levied as a required in lieu of an optional fee of \$2.50 for having one's picture in the Agromeck. However, the payments are higher as they fall due only twice instead of being spread over three registrations as in the quarter system. The following paragraphs give the breakdown and explanation as furnished the Technician.

Tuition: Technically, the word "tuition" means "the act or profession of teaching." Charges for tuition, therefore, are taken into the college budgeted receipts, and are applied toward payment of instructional salaries. The annual rate is \$150 for a resident of North Carolina; but since the amount collected from students is insufficient to cover the full cost, and appropriation from tax funds paid by citizens of North Carolina is necessary to cover the deficit, an additional \$210 per year is charged out-of-state students. This, however, is the only differential between in-state and out-of-state rates.

General Fees: In addition to instructional salaries, there are many other expenses incident to teach-

ing, such as matriculation, registration, library, clerical assistances, classroom and laboratory supplies and equipment, custodial and maintenance services to classroom buildings, maintenance of physical education fields, etc. Some schools follow the practice of assessing these fees individually, with students paying variable fees in accordance with their class schedules. As a matter of fact, such plan was once followed here, but many years ago all such fees were discontinued and a flat fee amounting to the approximate average per student total payment of special fees was adopted. Known as "General Fees," and described in the catalog as "Academic Fees," they amount to \$66 per student per year, are taken into the college budgeted receipts and are used in partial support of departmental operating expenses. The only special academic fees now collected are a \$10 per year off-campus laboratory fee for students

(Continued on Page 9)

Consolidated U. Day; 500 WC's Expected

Consolidated University Day is set for this Saturday, February 12. Over 500 girls from Woman's College are expected to attend the big event. The girls are expected to arrive at the College Union Building about 3:30 Saturday afternoon. A record dance will follow in the Union Building and last until supper time. This will provide a wonderful opportunity for the boys and girls to meet before going to the evening events.

The basketball games will begin at 6:15 and 8:15. The girls will have tickets for the student section when they arrive.

Following the games will be a dance in the Ballroom of the Union until 12 midnight. Dave Brown and his Orchestra will furnish the music.

All State College students are encouraged to come and participate in the day's activities. The program committee feels that you will be certain to enjoy the day. With plenty of students there, we can give WC the biggest and best welcome and entertainment that the girls ever had.

USMC To Interview N. C. State Students

The Marine Corps Officer Procurement Team will be on the campus on February 22, and 23 to interview students who desire to earn a commission while completing college.

Juniors are eligible for the PLATOON LEADERS CLASS. Training is conducted during two six-week summer classes. Candidates are paid \$149.00 during the first class and 183.00 during the second. Uniforms, meals, and travel allowance are furnished. Members of the PLATOON LEADERS CLASS are deferred

(Continued on Page 12)

Coming Next Week Would Be Gentlemen

Moliere's "The Would-Be-Gentleman" will be presented by Players Incorporated in Pullen Hall at N. C. State College Friday night (Feb. 18) at 8 p.m.

Under the chairmanship of Fred Rawicz the College Union's theater Committee is sponsoring this dramatic production, which will be free of charge to all State College Students and those who are members of the C.U. There will be an admission charge of \$1.50 for all others.

In five seasons of touring the nation, Players Incorporated has given more than 500 performances of Shakespeare's "Much Ado About Nothing," "Othello," "Macbeth," "Twelfth Night," and "Love's Labour's Lost"; George Bernard Shaw's "Arms and the Man," and Moliere's "School for Wives" and "The Miser."

Now, in their sixth annual tour, they are offering two new productions, Shakespeare's "Julius Caesar," and Moliere's comedy, "The Would-Be Gentleman."

All members of the company are former students of the famous Speech and Drama Department of the Catholic University of America, Washington, D. C., noted for the many Broadway hits which have

Arnold Air Society Hears Army Officer

"Communication is the key to modern warfare," Lt. Col. Mish-towt, Executive Officer of the State College Army ROTC told the Arnold Air Society members at their educational meeting Thursday, February 3rd.

Colonel Mish-towt is a veteran of fifty-two (52) combat missions in a T-6 "Mosquito" type observation aircraft which operated over the front lines of the Korean battlefield, as a member of the Air-Ground team that functioned with such great success in the Korean conflict in the deployment of tactical airpower. Colonel Mish-towt further explained how communications, key to close support, linked the various Army requests for Air support to Air Force planes through the joint control network. Explained also was the procedure by which emergency air support strikes are controlled at the front, the others at JOC (Joint Operations Center). The Air-Ground activities in Korea was an outstanding operational partnership, featuring air officers with ground units, and ground officers with air units.

The Arnold Air Society is composed of Advanced Air Force ROTC Cadets with Cadet Colonel John D. Pearman, Commanding. Cadet Alex Anthony is the Society's Operations Officer and was in charge of the program.

Notice

Fraternities may claim the pictures of their sponsors which were taken for this year's Agromeck by contacting Jim Lewis at 207 Furches Street.

Ivey Agreed to Pay Half the Cost

The Student Directory came very close to being an actuality this past week when the Student Supply Stores agreed, through Mr. L. L. Ivey, to underwrite half the expense of the publication. The Student Government voted a substantial amount of the cost, \$200

for publication and \$50 for clerical work to speed up publication. The vote was 17 to 9 in favor of having the directory published. In addition the Y.M.C.A. voted to contribute \$100.

The approximate cost of a directory similar to the ones of the past was estimated to be \$1,000 which left \$200 to be found. The remainder was to be divided proportionally between the I.D.C. and the I.F.C. according to membership. The I.D.C. voted down the request for \$150 for the directory. This left it unnecessary to bring the question to a vote before the I.F.C. as the organization could not be expected to back a publication not having entire student support and the acknowledged disfavor of the representatives of the large dormitory group.

Question was raised as to the value of publishing the directory so late in the year but it was felt that with new registration data such a directory would be both correct and of value, especially to graduating students and others who use the directory primarily for home town addresses. However, with the delay and the unforeseen lack of funds, it was felt by the committee that it would be best to go before the Student Government and recommend that the appropriation be withdrawn and the directory be dropped until such time as deemed feasible by the body.

The committee was appreciative of Mr. Ivey's cooperation, the interest of the Y.M.C.A. and it thought that the Student Government had acted wisely in appropriating the money toward the publication. The College Union had already arranged to furnish

Looking over some of the proofs and layouts of the new Agromeck are (left to right) Don Joyce, Jack Franks, John Gregg and Dick Barney. These men are planning to give students the best yearbook of recent years. The new book will feature several new twists to standard features as well as some new introductions. (Staff photo by Wall)

EDITORIAL COMMENT:

Research or Educational Center?

North Carolina's newspapers carry articles and features, time after time, lauding the great advancements being made in research through the facilities of State College. Much has been made of the fact that industry looks to State to test products and further developments. This campus seems to be the center of research in North Carolina and possibly in this section of the nation. But, at what price?

State College was founded to teach Agriculture and Engineering. Supposedly its purpose is to teach students. However, so much emphasis is being placed on research that one wonders if students aren't considered a necessary evil. Time after time fabulous discoveries and technical advancements are made by brilliant men. These men are practically unknown to most students. They are capable people who could do students a great deal of good, but they do research while the less capable take their place in instructing. Are students getting what they should for the time and money involved?

It is often the case that students go to class and hear lectures by men who aren't taught to teach, and many aren't capable of teaching. Some of them know their subject very well but can't put it across, and some know the subject little better than their students. It would be an extremely broad statement to say that if they were better they'd be doing research as the problem is not present in every department and State has some very good instructors who aren't involved in research. The fear though is that it will come to the place where so much emphasis is placed on research that undergraduate instruction will be allowed to slide.

The Diesel department doesn't concern itself with undergraduates anymore and from student reports of the Electrical Engineering department, it seems that this department would rather work only with graduates and research. In more than one school research has gotten to the place that it takes precedent over undergraduate work if the labs are needed at the same time.

It's not hard to see why this has developed to such proportions. Think of the monetary value of such work and just as important, the publicity. A really good professor gets little more attention than the mediocre and there isn't too much of a thrill in day to day lecturing. Research offers excitement and it has brought fame to the college. Progressive men bring more fame to the school than does the educational program. The fame of the School of Design has been brought about mostly by the fame of the men of the faculty. These men are prominent by their own accomplishments, and since so many are on this campus, fame follows and has become associated with the school itself.

The problem has been recognized by the Board of Trustees. The Visiting Committee in 1954 reported "that it is difficult to assess good teaching and reward it properly, while research and writing are quite tangible and loom large in the career of the individual faculty member."—"the committee states its conviction that continued and increased emphasis must be placed upon excellence in classroom teaching, whatever the difficulties, and upon the encouragement of personal excellence upon the part of the individual student." In President Gray's five year report to Governor Umstead, he said, "I am aware that there are factors inherent in the university world which make it difficult to encourage extra teaching effort, particularly in the first two years of college and univer-

sity work. For the most part, personal satisfaction, professional status, and promotion in rank and pay normally are more closely related to research and writing than to excellent teaching. To discover new truth and to make it available is one of the prime functions of the University. Many individuals find that this type of work improves their teaching. These activities are to be encouraged, not penalized."

President Gray added further that "Research in all areas is a fundamental process in the life of the University, and the University is the primary public research agency. If we are to become a truly great university, if we are to consolidate our gains of recent years, we must establish research, particularly basic research, in a more stable position throughout the University. And if North Carolina, as I have noted, is to make more than significant progress during the next half-century, research of all types must be accepted and supported in far greater proportions than in the past."

Certainly State's part in research has done a lot toward progressing North Carolina and the South and it is recognized that research is essential. Many of the projects involved have been essential to the national defense program. Research in Engineering, Agriculture, Textiles and in other fields has made this country the most progressive state in the world. Without research Americans would be deprived of things which are now taken for granted.

Sure, State College has the facilities and the personnel to do such work and it's far easier to get money to have research done at a college than it is to set up individual industrial laboratories. North Carolina does not have a state-owned laboratory dedicated solely to research aimed to the technical advancement of the state. It would be well enough to do research at State if it didn't interfere with the educational program. If State College would place more emphasis on its students instead of research it would graduate far more capable men than it is at the present. While the Legislature is concerning itself with duplication within the Greater University, it might concern itself with the college's purpose and its educational program.

State College could become a school with its students being the best educated in the nation but the way things are going now, it'll become the South's greatest research

(Continued on Page 5)

Letters To The Editor:

Dear Sir:

In the last issue of THE TECHNICIAN, one of your headlines reads as follows: THE TECHNICIAN'S THIRTY-FIFTH YEAR. I think that it must have been just about thirty-five years ago when the picture that you printed of Dr. Sherwood Eddy was taken. It is rather obvious that this picture, one of a gentleman who was graduated from Yale in 1891, is not a recent one. The posters on the campus bulletin boards announcing the forthcoming visit of Dr. Eddy to our campus carried a picture of him that was, I'm sure, considerably more recent. Why not you?

Harold Ramsey
UK 21, Vetsville

EDITOR'S NOTE: Quite simple. The YMCA which sponsored the visit of Dr. Eddy also supplied the picture to the Technician. The picture came to the Technician in the form of a paper mat suitable for a lead casting. Most likely the YMCA used the best it had available and the paper had no other way of securing a photo of the guest.

To The Editor:

I was somewhat surprised at the letter you received last week concerning the air-conditioning of the College Union. I'm sure Mr. Mashburn was misinformed on the subject, because I'm sure he wouldn't make such rash statements provided he knew the facts. From the tone of his letter he sounded like a little boy who got mad when someone said no. I'm sure he couldn't see the far reaching effect

that such a bill could have upon the students of N. C. State.

The fees we pay the College Union have tripled since I have been at State. We now pay \$15 and they wanted to increase it to \$16. When will this increase in fees stop? They have been talking about raising tuition and surely no one wants to do so, but yet Mr. Mashburn thinks we should ask for a raise in fees—that's asking for a raise in tuition in my book as well as those who voted the bill down.

It was pointed out that the C. U. could air-condition by cutting their budget if they thought it necessary. The Student Government never denied the fact that College Union needed air-conditioning. In fact they were all in agreement that they did need it, but they were also in agreement that they should try something on their own and not run to the students everytime they run a little short of money or need something.

Mr. Mashburn spoke of ramrod tactics and misrepresentation of the students. I'm sure he didn't sit in on the meetings because it he had he certainly would have seen both in use by the College Union officials. In order to put a stop to one of the rumors that the Union was using, it was necessary to contact a member of the Board of Trustees and get the word from him. The rumor was unfounded! The Union officials even stooped to name calling is something that surprised the entire group who is used to formulating policies and passing

Pulp-Paper Meet; Form Scholarship

Industrialists from some of the nation's leading pulp and paper companies held an organizational meeting of the new Pulp and Paper Foundation, Inc. at North Carolina State College Friday, (Feb. 4) to find ways and means of advancing the pulp and paper technology program in the college's School of Forestry.

The new foundation approved the spending of \$9,000 on scholarships for future forestry students who make acceptable records, as its first major move. The scholarships will be worth \$600 a year for 4-years study.

E. J. Gayner, III, president of the Brunswick, Ga., Pulp and Paper Company, was elected president of the new foundation, with Dwight J. Thomson, vice president of the Champion Paper and Fiber Company of Hamilton, Ohio, serving as vice president. L. L. Ray, assistant to the chancellor and director of foundations at the college, was elected secretary, with J. G. Vann, college business manager, serving as treasurer. The officers were elected unanimously by the foundation's board of directors in its first official meeting.

Establishing its main offices at State College, the foundation was conceived and organized "to aid and promote, by financial assistance and otherwise, all types of education and research in the field of pulp and paper in the School of Forestry at North Carolina State College. . . ."

Dean Richard J. Preston, head of the School of Forestry, reported that bids have already been let on the school's new pulp and paper technology laboratory, which should be completed by the next meeting of the foundation directors.

The school's pulp and paper technology program has been designed

as a regional project by the Southern Regional Education Board, which includes 17 states.

The research, teaching, and extension work in forestry at the college is being expanded to meet changing needs and additional calls from the people of the state.

There are now over 200 forestry students from 25 states and two foreign countries now enrolled at N. C. State. Forty-five per cent of the school's 600 graduates are employed in North Carolina, with a total of 80 per cent employed in the Southeast.

The pulp and paper technology program in the school is headed by Prof. C. E. Libby, one of the nation's leading educators in the field.

Actual organization steps consisted of adopting by-laws, approving the corporate seal, electing a board of directors from representatives of 16 companies, electing officers, and considering the legal aspects of the foundation.

LETTERS TO EDITOR—

(Continued from page 2)

bills without personalities entering into the subject.

I'm quite sure everyone wanted to speak on the issue was recognized. In view of this statement I'm afraid I will have to say that he was entirely wrong because I have never known our President, Doc Cheek or Vice-President Bobby Joe Stephenson refuse to recognize anyone. I also must call him on the statement that students were not polled. He made a direct statement in his letter that no student was polled. I'm sure if he would inquire around he would find that quite a few were polled. I didn't poll him personally. However, I feel that the students I represent, the senior class at the Textile School, should be polled by me—and they were, but I can assure him that I will include him the next time such an issue arises.

I am glad to see some students interested in what their government does, but I hate to see such misinformation spread about the people that represent the students.

John Nathan Gregg,
Senior, Textiles

The N. C. Little Symphony Orchestra Presents Concert Sunday Afternoon

The North Carolina Little Symphony Orchestra will appear in concert on Sunday afternoon at 3:00 in the College Union Ballroom.

The Symphony will present a varied program consisting of the Overture from "The Marriage of Figaro" by Mozart, excerpts from the "Nutcracker Suite" by Tchaikovsky, and from "Brigadoon," as well as the "Sandpaper Ballet" by Leroy Anderson and many more

interesting and unusual arrangements.

The Symphony has toured the entire state giving concerts to hundreds of North Carolinians.

"Dress" Pruett wants to know: What type of training program does Du Pont have?

DONALD C. MILLER received his B.S. in Chemical Engineering from Ohio State University in June 1937. During the following month he started work with the Organic Chemicals Department of Du Pont at Deepwater Point, N. J. Since then he has received and given many kinds of technical training. Today Don Miller is a general superintendent at Du Pont's Chambers Works—well qualified to answer questions about training programs for college men.

DRESSLAR M. PRUETT expects to receive his B.S. in Industrial Engineering this summer from Oklahoma Agricultural and Mechanical College at Stillwater, Okla. He is president of the local student branch of A.I.E. Naturally, he is interested in selecting the best job opportunity for a successful career based on his technical training.

Don Miller answers:

Training has many facets in a big firm like Du Pont, Dress, and a great deal of thought has been given to make it truly effective. We look upon training as a very important factor in a man's career. We think that the best way to train a college graduate is to give him a maximum of on-the-job responsibility in a minimum length of time. That's the general guiding policy at Du Pont, Dress.

Of course, each department varies this general policy to suit its special needs. A new man being trained for production supervision may first spend a year or so in laboratory or plant development work. Or he may spend his training period as a plant operator. Thus a man obtains firsthand knowledge of his process, and establishes a bond of mutual respect with the men he'll be working with on his first major assignment.

A young man interested in sales is often first assigned to a plant or laboratory dealing with the products he will later sell; or he may join a group of trainees to learn selling techniques right from the start.

An engineer, chemist, or other technical graduate is usually chosen for a specific job within his major field of study. Such a man brings specialized knowledge and skill to his job, and he is encouraged to put them to use promptly. But at Du Pont his experiences on the job are supplemented with lectures, conferences and discussion groups. In a very real sense, new technical employees continue training in their specialties after joining the Company.

To sum it all up, Dress, Du Pont's training program is individualized to provide a new man with specific opportunities to learn from contacts with more experienced men. The prime objective of Du Pont training is always kept clearly in mind—to develop men for future advancement and effectiveness in the organization.

NCS Faculty Dinner At CU Tomorrow

The annual N. C. State College faculty dinner will be held in the main ballroom of the College Union Building Friday, Feb. 18, at 6:30 p.m., Mrs. L. R. Harrill, president of the College Woman's Club, announced.

An informal program, including an after-dinner talk by Clifton Beckwith of Raleigh, will be presented. The program will end at about 8:30 p.m., and those attending will be invited to remain as guests of the Faculty Dance Club for a dance in the College Union Building.

Mrs. Herman Briggs, chairman of the faculty dinner committee of the State College Woman's Club, will be the dinner toastmaster. She is being assisted in making arrangements by Mrs. C. M. Asbill, Jr.

Tickets may be obtained in the lobby of the College Union Building on Feb. 10, 11, 12, 14 and 15.

WED LIKE YOU TO MEET -

RUDOLPH PATE

Rudolph Pate, the capable Director of the N. C. State College News Bureau.

Rudy began his career at the News Bureau in the winter of 1943. This was only six months after his graduation from State the preceding summer with a B.S. in Agricultural Education, but Rudy had done so well while at the College acting as Student Assistant in the News Bureau that when the post was vacated he was called from his teaching job in Robeson County to come back and take over.

He was born in Robeson County in 1920, the oldest son of Mr. and Mrs. Robert Pate. His schooling, before State, was at Barker Ten Mile High School where he finished in 1938, valedictorian of his class. He was prominent in high school in his 4-H work and originally came to State with Ag. his big interest. His career on the campus was outstanding, with membership in the Golden Chain, YMCA cabinet and Student Government Council in addition to his posts as assistant in the News Bureau and Editor of The Agriculturist his Senior year. He was also a member of the Technician and Wataugan staffs.

Pate held down two jobs at the college until 1946, handling both general college and athletic news. He left for a period of five months that year, but soon returned, this time handling only the single job he holds now.

Rudy lives here in Raleigh with his wife, the former Miss Paige Lewis Brodie, on Cartier Rd., where he still maintains his interest in Agriculture with a large garden where he grows "quite a few crops on a mighty limited basis."

Rudy has made quite a name for himself in his profession. He is Director of District Five of the American College Public Relations Association and has been awarded the Carolina Farmer Degree, the highest honor of the North Carolina Association of the Future Farmers of America. He is now President of the Student Board of Publications and served as Secretary of that group from 1943 until 1946. He is also a member of Kappa Phi Kappa, the honorary Education Society, and an honorary member of Blue Key.

Rudy has done a fine job at State and every student owes him thanks for his able representation of them among the members of the "fourth estate."

CLARENCE DOUGLAS

Clarence Douglas "Doug" Blanchard, Senior in the School of Textiles from Burlington, N. C. Doug entered States in the Fall of 1951, majoring in the knitting option of Textiles and has made an outstanding record here since that time.

In his actual scholastic work Doug has had an outstanding average as evidenced by his election to Phi Kappa Phi, the scholastic honorary fraternity and Sigma Tau Sigma, the Textiles honorary fraternity. He has also been honored by election to the Junior and Senior honor fraternities, Blue Key and Golden Chain. Again in the School of Textiles Doug has exhibited outstanding ability by his membership in Delta Kappa Phi and Kappa Tau Beta, the former a Textiles professional Fraternity and the latter a knitting professional group. He is president of Delta Kappa Phi this year and Vice-President of Kappa Tau Beta.

Doug also has taken quite a part in student affairs in the Textiles School with his positions as President of the Thompsons Textile Council and Vice-Chairman of the Textile Honor Council.

Last year Doug's outstanding scholastic ability was recognized by the American Underwear Institute. This group awarded Doug a one-year, 600 dollar scholarship for knitting research.

Doug was born in Burlington 22 years ago and, as stated above, still calls it home. He resides there with his parents, Mr. and Mrs. Clarence C. Blanchard.

When questioned about his plans after graduation this summer, Doug said he hoped to work, "until Uncle Sam gets me."

The Textiles School has provided many excellent men to our campus but only a very few whose records are as enviable as Doug Blanchard's.

An eagle-eyed Tennessee mountaineer led his overgrown son into a country school house. "This here boy's after larnin'," he said to the schoolmaster, "what can you larn him?"

"Our curriculum, sir," said the schoolmaster, "consists of geography, arithmetic, trigonometry—"

"That's fine," interrupted the hill-billy, "fix him up with trigonometry, cause he's the worst shot in the whole family."

State's Discipline Lends To Easier Air

Few State College men realize the freedom which actually exists on the campus. In fact reports of disciplining at other schools approaches the point of being amusing. Church-related schools, women schools, and small, private schools have closer control than does State. The following paragraphs from an Intercollegiate Press release make it quite plain that some students "just ain't lived yet!"

A report on the first student council workshop of church-related colleges of Michigan, held on the Alma College campus, disclosed that Chapel programs at the various schools ranged from one to five a week, and the number of cuts from two a month at Alma to three a semester at Kalamazoo.

At Adrian College, one-hour chapel programs are held three times a week, and students are allowed three cuts per semester. Students must attend chapel for two years of the four or read twenty selected books. Five honor points per semester, making a total of

twenty for four years, are given for chapel attendance.

Albion's chapel meets two times a week and three cuts per semester during the four years are allowed. For each overcut, one-half hour is added to the graduation requirement. One of the two chapels at Albion each week is religious in nature. The chapel committee is composed of student council members.

(Continued on Page 7)

"DOC" EDDY—

(Continued from Page 1)

also criticized the Republican administration's off-shore oil policy and called on the country to make "the rich stop robbing the poor."

He accused the Roosevelt and Truman administration with "codding Communists" and labeled President Eisenhower's first Cabinet as "20 millionaires and a plumber."

The speaker, using as his topic, "The Lost Secret of Life," opened his talk with an account of his experiences at Yale University with Evangelist Dwight Moody and Athlete Amos Alonzo Stagg and said his associations with these men led him to a Christian life.

He spoke of uncertain objects and goals in the world but declared

that "the only immovable center in the world is the Living God."

He described the progress of Christianity in India—"the greatest religious arena in the world"—and told of the union of Christian sects in India in their fight against sin.

Dr. Eddy was introduced by Prof. J. D. Clark of the State College English Department. John Fuquay of Snow Camp, president of the College "Y", presided over the luncheon. The talk was sponsored by the Baptist Student Union, the Wesley Foundation, the Lutheran Students Association, the Westminster Fellowship, and the College "Y."

FRIENDLY Cleaners

2910 Hillsboro

"We Clean

Clothes Clean"

A Campus-to-Career Case History

Manager Ray New explains the importance of good service to one of his assistants

His "individual training" paid off

When Ray New—Business Administration, Buffalo, '51—started with New York Telephone Company, he never suspected his work would face him with problems of this sort—

"My job as business office manager is to see that the customer gets the best possible service. One of my assignments took me into a section of Manhattan that had a large Puerto Rican population.

"Frequently our people would get somebody on the line who couldn't speak a word of English. So I saw to it that each of my representatives learned a few standard Spanish phrases—enough to get somebody to the telephone who could speak English.

"There are no two days alike in this

work, with new problems coming up all the time. The best part of it is that the training program here is tailor-made to the job. First you get a general background in the business, then you go into what I call 'individual training.' That's where your own special abilities are developed and you're encouraged to think out new ways to solve everyday problems—like the one I just described.

"Right now I'm Business Manager in charge of an office doing \$250,000 worth of business a month."

You'll find these things true of college men, like Ray New, who go into telephone work. They've been well trained, they enjoy their present jobs, and they're headed for responsibilities and greater rewards. If you'd be interested in a similar opportunity with a Bell telephone operating company, or with Sandia Corporation, Bell Telephone Laboratories or Western Electric, see your Placement Officer for full details.

EDITORIAL—

(Continued from Page 2)

center. Are students to be looked on as a necessary evil taking up the time of men who could be doing research, or is this college going to look on the teaching of students as its primary purpose? The administration of the Greater University of North Carolina should recognize the problem of over-emphasis on research work and re-evaluate its educational program.

Nationally Known Dr.

Dr. Richard Buckminster Fuller, visiting lecturer at the State College School of Design, gave a public lecture on Industrial Prototyping Strategy Sunday in the Riddick Hall auditorium on the college campus.

Nationally known in design fields, Fuller received wide prominence last year when he designed the rotunda over the Ford Rotunda Building in Dearborn, Michigan.

CAMPUS HEADLINES

Chapel Hill's *Daily Tar Heel* heralded its students' return to school, following mid-year exams, with this three-column, front page head: "Students return to books; 150 women, 175 others hit campus." Just more proof that it's still "men to State, women to W.C., and others to Carolina."

The *Appalachian* of Appalachian State Teachers College recently carried this three-bell announcement: "Local Beta Beta Beta chapter adds to membership." Must be a fraternity for people whose mothers were frightened by the sound of broken phonograph records.

A front page banner across a recent edition of the *Old Gold and Black* went like this: "18 per cent of students fail to meet grade requirements." Undoubtedly, it was the 18 per cent portion beginning at the collar button and going up.

The *Technician* recently ran a front page story declaring, "School of Education Awarded US Grant." Just goes to show that old soldiers never die, they're passed down through the ages to different schools.

The sorority girl had just received an engagement ring and wore it down to breakfast and next morning. To her exasperation no one noticed the ring. Finally, after fuming and squirming throughout the meal, a lull came in the conversation, and she exclaimed loudly, "My goodness, it's hot in here. I think I'll take off my ring."

"Heard you were moving a piano, so I came over to help."

"Thanks, but I've already got it upstairs."

"Alone?"

"Nope, hitched the cat to it and drug it up."

"You mean your cat hauled that piano up two flights of stairs?"

"Used a whip."

DON E. ENGDAHL

College Host To State Convention

Approximately 500 Kiwanians from throughout the State are expected to attend a dinner meeting of the Raleigh Kiwanis Club in the main ballroom of the College Union Building Friday at 6:30 p.m. when Don E. Engdahl of Spokane, Wash., president of Kiwanis International, will speak.

Final plans for the top Kiwanis official's visit here were announced by Dr. Earl W. Brian, president of the Raleigh Kiwanis Club, and Guy W. Rawls of Raleigh, lieutenant governor of the Fifth Division of Kiwanis International.

Invitations have been extended to North Carolina's approximately 80 Kiwanis Clubs to attend the dinner meeting.

President Engdahl will speak in Raleigh during an extended tour of the East. He will come to the Capital City from Columbia, S. C., where he is slated to address a meeting Thursday.

The International President's visit here will be a feature of the 40th anniversary observance of the founding of the Kiwanis Club.

Engdahl, president of the Spokane Sash and Door Company and a well-known West Coast business man, was elected the president of Kiwanis International during the organization's 39th annual convention in Miami last summer after having served as its treasurer. Prior to serving as the Kiwanis treasurer, Engdahl was an International Trustee for two consecutive years.

STATE DISCIPLINE—

(Continued from Page 4)

Hillsdale College holds one chapel a week, with three cuts per semester. The vice-president of the college is chairman of the college chapel committee, which selects the chapel speakers. Students are responsible for the worship services. Program vary in content and usually last about forty-five minutes.

Kalamazoo's chapel is held twice a week, and three cuts per semester are allowed. The programs usually last about a half-hour.

The report also disclosed how each of the church-related schools handles discipline. At Adrian, each student must sign a morals card before gaining admittance to the college. This card is a promise that he will not smoke or drink while attending college. Smoking is limited to the fraternity houses. Students may be suspended for a semester or expelled, or put on social probation, for drinking.

At Albion, the student council has no power in student discipline, and smoking is allowed only in specified areas of the campus. At Calvin, student discipline resides in a faculty board. Minor problems go to this board, and serious problems are taken up by the faculty board.

Kalamazoo has a judicial council made up of four students and faculty advisers, who decide on discipline problems, including drinking, and have the power to put a student on social probation for the first offense, and to expel for the second offense.

N. C. State Student Affairs Bulletin

Traffic Regulation Changes—Changes in the campus traffic rules as printed on the 1954-55 traffic map are as follows (insofar as students are concerned):

1. Each vehicle used on the campus must be registered and the permit must be displayed in the lower right-hand corner of the windshield in a permanent manner. Failing to display the permit is a violation equal to failure to register the vehicle.

2. In the event the parking permit is lost or fails to adhere to the windshield, immediate application for a new permit should be made in Room 12, Holladay Hall.

3. The fee for failing to register a vehicle or failing to display a permit has been increased to ten dollars (10.00) per violation. The fee for other violations is still two dollars (\$2.00).

4. If a student feels he is due consideration because of unusual circumstances, appeals may be made on Monday following receipt of ticket to the STUDENT GOVERNMENT TRAFFIC COMMITTEE which meets at 12 noon on Mondays in the College YMCA.

5. Students may park as indicated on the traffic map with the following exceptions: (a) No parking is permitted on the north side of Primrose Avenue from Horne Street to Gardner Street; (b) Parking in the College Union lot, (immediately west of the Union) is permitted only when the person involved is actually going to the Union.

Student Government
Traffic Committee

Fellowships—General Foods Fund, Inc., Fellowships. Stipend: \$4,000. Two of these have been announced for the coming year. For chemical and chemical engineering, or related scientific research involving food preservation, food production, or food processing.

Magazine Subscriptions at Special Rates—During the next two

weeks students and faculty members may take advantage of special subscription rates available through the new Student Magazine Agency. The Agency has been organized to:

1. Provide student employment under the student aid program.
2. Provide uniformity and integrity in all subscription soliciting. (Students have been swindled by unauthorized, non-student solicitors).
3. Give students and faculty full advantage of special rates and publishers' billings.

If you are not contacted by one of the solicitors, you are invited to use one of the business reply cards found on many bulletin boards around campus.

Lyle Rogers, Student Aid Officer

JOBS—

(1) Young woman to work as part-time youth activities director at YWCA.

(2) Work for room off campus—study as you work.

(3) Secretarial position for student wife.

(4) Job for wife of student with two or three years to graduation. Computing work. College mathematics, experience with computing machines desirable.

For further information, call 460 or come to 9 Holladay Hall.

Income Tax Withholding Statements—Any student who has earned over \$100 from College Departments and has been paid by official college check will automatically receive a W-2 Tax Withholding Statement from the Business Office. Any student who earned less than \$100 and had no tax deducted from his pay check will not receive a W-2 form unless he specially requests it of the Business Office. In any event, forms will not be available until after the first week of February and students are asked not to request these forms prior to that time.

N. B. Watts,
Office of Student Affairs

SPORTS

SPEC HAWKINS

Basketball

N. C. State's basketball crew added two more victories last week, against Virginia 98-91 and a record breaking spree at the expense of Clemson 119-85. However, the Pack slipped one notch in the weekly AP ratings. The top ten: San Francisco, Kentucky, LaSalle, Duquesne, Utah, George Washington, N. C. STATE, UCLA, Marquette, and Illinois. . . . State has defeated 3rd ranked LaSalle and meets George Washington the final game of the season. . . . State's 114-97 victory against Virginia was the sixth time this year the Pack has gone over the century mark. . . .

In the event there is a tie for any of the eight places for the ACC tournament to be held at the Coliseum the first week in March, the place position will be decided by draw, except for the team that is defending champion. Thus if State should end the season in a tie it would get the advantage by right of defending their championship.

Swimming

State College's swimming team dropped a 52-32 decision to undefeated Michigan in an exhibition meet last week at Frank Thompson pool. However the local boys set two new American records. DICK FADGEN set a new mark in the 200-yard breaststroke and SONNER, MATTSO, FADGEN, and SONIA established a record in the 400-yard medley relay. . . . This same Michigan defeated Carolina by some 40 odd points. . . . State's regular varsity still remains undefeated against all scheduled competition. . . . Michigan's squad featured four members of last year's olympic team!

Ron Shavlik

RONNIE SHAVLIK the past few weeks has received some national attention through several outstanding sports magazines. The March issue of *Sport* features a 6-page story on the Wolfpack center, and a recent issue of *Sports Illustrated* ran a full color photo of Ron. . . . Plus Life photographers were very much noticed last Saturday night in the Coliseum.

Mail Orders For ACC Tournament Accepted Starting Monday, Feb. 14

Season ticket orders for the 2nd Atlantic Coast Conference basketball tournament to be held March 3-4-5 at the Reynolds Coliseum on the North Carolina State College campus will be accepted beginning Monday, Feb. 14.

In announcing the acceptance date for orders, no postmark time would be observed, but that no orders would be filled that arrive prior to Monday morning, Feb. 14.

The postmark time was eliminated last year to avoid confusion and to give everyone an equal opportunity to secure tickets. Ticket orders may be mailed either Saturday night, Feb. 12 or Sunday, Feb. 13 as long as they do not arrive prior to Monday morning, Feb. 14.

Prices for the tournament remain the same as last year \$9.00 for side arena seats or \$6.00 for

end arena seats. Orders should be addressed to the Atlantic Coast Conference, P. O. Box 5905, Raleigh, N. C. and all checks or money orders should be made payable to the Atlantic Coast Conference. Cash or stamps should not be sent in payment for tickets. Twenty-five cents should be added to the total amount of all orders for insured (Continued on Page 9)

Athlete of Week

Dick Fadgen—Freshman Swimmer . . . set new U. S. swimming record for the 200-yard breaststroke against undefeated Michigan last week . . . traveling the distance in 2:26 . . . old mark was 2:26.9 . . . won two national AAU titles last summer. . . . Best swimming prospect at State in years!

Frat Intramurals

Basketball

Six basketball games were played last week and one resulted in a forfeit as the first round of basketball competition was completed. Several teams have established themselves as powerhouses in their respective divisions and the final round of action should find the majority of the games nip and tuck all the way.

PKT-47, PKP-26—The PKT's had very little trouble coping a 47-26 victory from the PKP's last week. Lynch and Culp with 14 and 11 points respectively led the PKT's while Hitchcock sank 9 for the PKP's.

SAM-61, T. Chi-10—A strong, well balanced SAM squad grabbed its third win of the season by completely crushing an outmanned and outclassed T. Chi team, 61-10. Giddens 24-point effort was high for the winners.

Sigma Nu-41, Farm House-20—Sigma Nu's strong cage outfit took its third victory of the season in as many starts last week, this time at the expense of the Farm House 41-20. Again it was Honeycutt and Allin, with 13 and 12 points, that led the Sigma Nu scoring parade. Bievens and Harris each collected 6 for the Farm House.

Kappa Sig-51, Lambda Chi-25—The Kappa Sig's remained a strong contender for their respective division crown as they easily downed the Lambda Chi's 51-25. Kaiser's 18-points was high for the winners followed by Teer with 12. Herman tallied 10 for the losers.

Sigma Chi-46, PEP-30—With Lancaster and McKeever leading the way, the Sigma Chi's rolled over the PEP's 46-30 to keep their record unmarked. Cantor's 10 points was tops for the PEP's.

The SAE's gained a forfeit from the TKE's.

Table Tennis

The first of the week the table tennis play-offs get underway with the SAE's, Sigma Nu, Sigma Chi, and PEP's taking part. In first round action Sigma Chi downed Sigma Nu and the PEP's won over (Continued on Page 9)

Pack Returns From Successful Road Trip Against Va. & W.-M.; Host S. C. Saturday and Duke Cagers Tuesday

Coach Everett Case's Wolfpack will be looking for its ninth ACC victory of the season Saturday night when they play host to the Gamecocks of the University of South Carolina, victims of an earlier 91-62 setback at the hands of State.

The Pack will be strong favorites to hold its first place position in the ACC at the expense of the Gamecocks, who have won but one game while dropping ten against conference competition.

State's cagers, still ranked as the sixth team in the nation, handed Virginia a 114-97 setback Tuesday night and last night they were scheduled to meet William & Mary in Norfolk.

Following the South Carolina clash, State will take on Duke, Maryland, Carolina and George Washington in that order.

scored their second highest score against Welch of 75 to 36. Tray-wich (26), Whitley (13) and Langston (13) were the leading scorers. Waynick (24) was the high scorer for Welch. Becton No. 1's second team defeated Bagwell No. 1's by 29 to 19, and Welch's second team by 53 to 29.

Syme No. 1 Beat Alexander No. 2—Nixon (19), Greene (11) and Humphrey (11) were the outstanding players for Syme No. 1. The Alexander team was led by Holt (9).

Owen No. 1 Beat Verville—The Verville team, led by Buff and McGraw, could not stop Owen No. 1 from winning by 44 to 33. Dunn (17) was the outstanding player for Owen.

Two Teams Won by Forfeit—Bagwell No. 2 beat Turlington No. 2 and Tucker No. 1 beat Bagwell No. 1 by virtue of forfeit.

Table Tennis

The table tennis semi-finals are fast approaching. Of the original fourteen teams which were entered there are only four remaining. The first elimination match had the following results: Barry beat Alex. No. 1, Owen No. 2 beat Syme No. 1, Becton No. 1 beat Verville, Syme No. 2 beat Turlington No. 2, Bagwell No. 1 beat Alexander No. 2, Tucker No. 2 beat Owen No. 1, and Tucker No. 1 and Becton No. 2 had no contest. In the second elimination Becton No. 1 beat Barry, Syme No. 2 beat Bagwell No. 1, Tucker No. 2 beat Becton No. 1, and Tucker No. 1 had a by.

Bowling

The bowling results were finally made available after a delay due to a conflict in scheduling the finals. Bagwell No. 1 was the winner with Tucker No. 2 in second. The scores of the finals were as follows: Bagwell No. 1-4 to Becton No. 1-0, Tucker No. 2-3 to Tucker No. 1-1, Bagwell No. 1-4 to Tucker No. 1-0, Tucker No. 2-4 to Becton No. 1-0, Tucker No. 2-4 to Becton No. 1-0, Tucker No. 1-1 to Tucker No. 2-3, and Bagwell No. 1-4 to Tucker No. 2-0.

In the finals the high three-game series was led by Vargo with 356. Some of the others were Bowman, Tucker No. 1, 351; Vargo, Tucker No. 2, 356, 340, 324; Hardesty, Tucker No. 1, 337, 309; Williams, Becton No. 1, 332; and Barnhardt, Bagwell No. 1, 327, 318.

The Dorm Corner

By Terry Lee Hershey
Basketball Last Week

Tucker No. 2 Beat Berry—In a high scoring game the Tucker No. 2 team defeated Berry by a score of 67 to 20. Gall (17) and Casteen (18) led the offense of Tucker while Stanfield (12) led Berry. Tucker No. 2's second team edged out the Tucker No. 1's second by a one point margin, the score was 37-36.

Syme No. 2 Beat Tucker No. 1—Outlaw (18) and Gooding (17) controlled the ball for Syme and made it possible for them to win by 48 to 36. Thompson (15) and Green (14) were the high scorers for the Tucker team. Syme No. 2's second team with McCarter (16) and Jenette (15) beat Turlington No. 2's second team by 58 to 40.

Owen No. 2 Beat Becton No. 2—Owen beat the Becton team by 47 to 33. One of the deciding factors was the offensive playing of Ellis (12). Becton No. 2's second team beat Welch's second by 49 to 29. In a second game Becton's second team lost by 22 to 31 to Bagwell No. 1.

Becton No. 1 Beat Welch-Gold-Fourth—In one of the highest scoring games for the dormitory basketball season Becton No. 1

mailing and handling and no order will be accepted for more than four season ticket books. Persons desiring to sit together may, however, include their orders in the same envelope.

The tournament will open on Thursday afternoon, March 3 at 2 p.m. with a doubleheader and continue Thursday night with another twin bill. The semi-finals will be played Friday night, March 4 and the finals, a single game, Saturday night, March 5.

Members of the Atlantic Coast Conference who will compete for the championship are Duke, N. C. State, Wake Forest, North Carolina, Maryland, Virginia, Clemson and South Carolina. The winner will be recognized as the conference champion.

SQUARE CIRCLE

By Dixon

Of truth and poetry: Fields Cobb, senior in forestry, had a lab project which required him to observe a flock of fruit flies through ten generations. Third generation was all pooped out and turned up sterile. Fields got "Incomplete" on the course.

One of those days: Ag student living in Vetville was declared ineligible to return to school last semester because of a three-point deficiency. Student took three-hour correspondence course and made C. Still he lacks three points of having a C average and now he must surrender his campus residence.

Where there's smoke: Raleigh fire wagon screamed through the east campus Tuesday afternoon only to find a charred awning giving off a little smoke and a spewing fire extinguisher blowing its top in Riddick Hall. Ten minutes later fire truck driver was making another mad dash back through the campus; this time to the interrupted pinocle game down at the station house.

State Featured

The January issue of The North Carolina Engineer, journal of the North Carolina Society of Engineers, includes an article by Dr. N. E. Uyanik, associate professor of civil engineering at State College.

In the article entitled, "Planning and Design Problems of a Maintenance Hanger Frame," Dr. Uyanik discusses problems involved in erecting the \$750,000 hangar and office building now under construction in Winston-Salem.

Uyanik who is consulting structural engineer for the project, reports that the hangar will be the first of its type in this area in that there are no vertical columns in the structure to interfere with the movement of incoming and outgoing planes.

If all the professors in the world joined hands they would reach halfway across the ocean. We are in favor of this agreement.

originated from its University Theater. The department is under the direction of Father Gilbert V. Hartke, O.P., one of the most prominent figures in the American theater today.

From San Antonio, Texas, to Burlington, Vt., the Players have toured major cities and small towns. They have played before seasoned theatergoers and before people who had never before seen a professional production.

The Players still regard their tours of the Far East Command during the Korean War as the high points of their history. Under auspices of the Department of Defense, they made a six-week circuit of Japan and Korea in 1952 to entertain battle-weary GIs, and another longer tour in 1953.

Before each of these tours, they were received at the White House and given a personal sendoff by the President of the United States.

COLLEGE RELEASES—

(Continued from Page 1)

in Forestry and a \$7 commencement fee for each candidate for graduation. Students are required, however, to pay at replacement cost for lost or broken laboratory equipment.

Medical Fees: This amounts to \$12 per student per year, and is taken into the college budgeted receipts to partially defray the cost of operation of the infirmary. It is included in the catalog as a "Non-Academic Fee."

Athletic Fee: This amounts to \$15 per student per year, and is turned over in full to the Department of Athletics in support of the inter-collegiate athletic program. It is included in the catalog as a "Non-Academic Fee."

Activities: These fees amounting to \$35 per year are for various student activities and are turned over in full to the organizations for

A ten-game football schedule, including a five-game home slated regarded as the best in many years, was announced for Coach Earle Edwards 1955 North Carolina State Wolfpack by Athletic Director Roy B. Clogston.

Appearing in Riddick Stadium for home games are five outstanding teams, including Duke University's Orange Bowl champions Sept. 24 in a night affair, the University of North Carolina Tar Heels for a Homecoming Day attraction, Oct. 1, Wake Forest's Demon Deacons, Oct. 15 at night, William and Mary's Indians, Nov. 19 at night and West Virginia's Mountaineers on Friday night, Nov. 25.

5 Away

Road contests will also involve major foes, opening against Florida State's Sun Bowl aggregation of last year on Sept. 17, at Tallahassee, Fla., Villanova at Philadelphia, Pa. on Oct. 22, Furman at Greenville, S. C. on Oct. 29, Boston University at Boston, Mass. on Nov. 5 and Virginia Tech's undefeated Gobblers of last year at Bluefield, W. Va. on Nov. 12. All road games are daylight affairs.

Boston University and Villanova are newcomers to the Wolfpack schedule, replacing Maryland and Richmond, who were met last year. Both teams will be played away from home.

The Oct. 1 meeting with North Carolina's Tar Heels marks the first time since 1943 that the two teams have played in Riddick Stadium. It was also in 1943 that State gained its last victory over the Tar Heels, winning by a 27-13 score.

Edward's Second

The 1955 season will be Coach Earle Edwards' second at the helm of the Wolfpack. Last season his first club won 2 and lost 8, but gave outstanding performances against several highly favored clubs, including holding Duke's Atlantic Coast Conference champs to a 7-7 halftime deadlock before losing, 21-7. State's two wins both came in the role of the underdog, beating William and Mary 26-0 at Norfolk, Va., in an impressive showing and downing Richmond, 14-6 at Raleigh.

Hopes for an improved showing in 1955 will be based on the return of some 16 lettermen from last season and a rising group of sopho-

whose use students in past years have voted to assess fees. Listed in the catalog as "Non-Academic Fees," they are credited to the following organizations or activities:

Agromeck	\$5.65
College Union	15.00
Intramural Athletics	1.50
Physical Education	9.00
Student Activities	
(General-allotted by Student Gov't.)	1.00
Student Government	.65
Technician	1.15
Tower	.25
WVWP	.65
Reserve	.15

Other Non-Academic Fees: Special fees are collected for use by the student bodies of the various schools in connection with publications and other student activities. These are as follow:

Agriculture and Agricultural Education Students	\$5.00
Design, Engineering, Forestry and Textile Students	4.00

There is probably not a single student at the college who, upon reading the foregoing list, cannot find at least one required fee from which he received no benefit. Considered in the aggregate, however, all fees are quite reasonable. In fact, they fall so short of meeting actual operating expenses that the State of North Carolina makes to the college an annual sustaining appropriation of almost \$3 million.

LITTLE MAN ON CAMPUS

by Dick Sibley

"Now that you have exchanged and graded papers—do we have anyone who made a '100'?"

mores who compiled a 4-1 record as freshmen in 1954. The State freshmen scored a major upset in beating the Miami University frosh 14-13 to close out their season.

Then there was the hotel clerk who put himself to sleep at night counting the Mr. and Mrs. John Smiths that had registered.

The majority of the fraternities are planning group attendance to the State vs South Carolina basketball game this weekend with the usual, informal, get-together at the houses after the game. In addition, the Pika's are having a cocktail party and buffet supper at their house before the game.

Last weekend, the AGS's had a dance at the Woman's Club with the Woody Hayes Band playing. The Farm House had their regular party last weekend and have planned a Valentine party for this coming Monday night. The Sigma Alpha Mu men had a party at their house last Friday night and also after the game Saturday night.

The Sigma Chi's traveled to W. C. last weekend to serenade the young lady pinned to Jim Arthur. They proceeded to the Plantation Club afterwards. The Sigma Pi's have a rushing func-

tion planned for this weekend. They initiated seven men last week. The Theta Chi men initiated three this past week, and the Phi Tau's initiated twelve. The Phi Tau's also have planned a rushing program for this week with a smoker on Wednesday, party at Crabtree State Park Friday, supper at the house Thursday for the new pledges, and a banquet Saturday for the new initiates.

The Lambda Chi's had their first party of the semester last weekend and were joined by 15 of their brothers from Wake Forest. One of their big weekends is planned for this week with a combined rush party and Valentine party at the house.

The Phi Ep's are completely remodeling their house. They have been working for the last two weeks decorating it from top to bottom. New furnishings will replace the present furniture. The

pledges have taken on the project of preparing the play room and plan to have it completed within several weeks.

Also enveloped in construction week are the TKE's. They are repainting the house. The Teke pledges journeyed to Pennsylvania and Maryland this past weekend to visit their northern brothers.

The Sig Ep pledges are giving a party for the brothers this Saturday night at the house. Theme of party unknown to brothers. The members journeyed to Meredith Monday night to serenade the young lady who just recently received a pin from Charlie Helms. The Pi Kapp's traveled out to one of their members cabin located in the county for a planned social with costumes this past weekend.

State College's proposed fraternity row made the Intercollegiate Press week before last appearing in most of the member collegiate papers over the country. The release was a summation of the articles appearing in recent copies of the TECHNICIAN.

Sales Girl (to Home Ec freshman): "Yes, Miss, our brassieres come in five sizes—small, medium, large, wow! and Ye Gods!"

Engineers In Demand 20,000 Vacancies

By Anita Anderson

Uncle Sam isn't the only one keeping tabs on State College engineering students scheduled to graduate in June.

Far-sighted companies realize that approximately 20,000 engineering positions will be unfilled this year. And they don't want their positions among those destined to be overlooked.

The military, who without benefit of sales talk, may employ 73 per cent of June's graduating class, still claims top priority. But company officials, not in that enviable position, realize that because of the continuing shortage of engineers, competition among industrial firms is keener than ever. Already, they have started coming to State College to size up the latest engineering crop.

The School of Engineering, with students comprising over half the total enrollment of the College's six schools, has achieved this repu-

tation through the excellence of its staff, its role of leadership in engineering education, and its teaching and research programs.

All year long, industrial leaders are kept aware of the high calibre of engineers they may expect to get at State College through their professional associations with the School's faculty members. Approximately 150 teaching and research personnel make up a faculty of distinguished scientists in every branch of technology. Of these, a number are considered top authorities in electronics, electrical power, machine, design, ceramic research, heat flow, and several other fields.

Many of the engineering faculty members have authored technical publications and text books, and nearly all play active roles in engineering and educational organizations on state, national, and international levels.

Research work of both fundamental and applied nature carried out in the School of Engineering has won acclaim for State College. State and Federal agencies, large industrial corporations, and small businesses have all brought problems to the engineering staff for solution. In addition, unsponsored research, undertaken by initiative of the staff, has gained recognition for its worth.

Through such activities of the engineering faculty, contact is maintained with leaders in industry, many of whom are State College graduates themselves.

Endorsement of the School of Engineering's curricula by the Engineers' Council for Professional Development and "prepared-ness" exhibited by the School's graduates are other factors that draw industrial leaders to the campus for recruitment purposes.

The employment picture for engineers, which has been encouraging for a good many years, seems to be "getting better all the time." Well over half of the companies that interviewed at State College last year have reported need for the same number or more engineers from this year's graduating class.

Interviews between the students and company officials are arranged by Mrs. Marie P. Wicker, coordinator of student affairs for the School of Engineering. She reports that over 185 companies have already scheduled definite times for interviews between now and May 1. Two-hundred additional firms have been invited to schedule interviews and are responding to the invitation.

LUCKY DROODLES! WE'VE GOT 'EM!

WHAT'S THIS? For solution see paragraph below.

IT'S EASY TO SEE that the Doodle above is titled: Tired anthropologist relaxing with better-tasting Lucky behind freshly dug-up fossil. No bones about it, Luckies taste better to all sorts of people. College smokers, for instance, prefer Luckies to all other brands, according to the latest, greatest coast-to-coastest college survey. Again, the No. 1 reason for Luckies' wide lead: Luckies taste better. They taste better, first of all, because Lucky Strike means fine tobacco. Then, that tobacco is *toasted* to taste better. "It's Toasted"—the famous Lucky Strike process—tones up Luckies' light, good-tasting tobacco to make it taste even better... cleaner, fresher, smoother. So, enjoy the better-tasting cigarette... Lucky Strike.

You don't have any choice on the first and very little on the second . . .

On the third however, it's strictly up to you — a poor choice can throw you years behind your classmates and a good choice can put you years ahead.

At Chance Vought, young engineers (Aeronautical, Mechanical, Civil and Electrical) have every opportunity to make a mark for themselves in the industry that places the greatest value on engineering skill and ingenuity. The very nature of the modern aircraft — its immense complexity and its never-ending development — presents technical problems that are unparalleled in any other field of engineering.

The chart illustrates two things; first, the extent to which our work involves the various engineering and scientific specialties and second, the scope of the opportunities that exist for the young engineer.

For more information regarding these employment opportunities please contact your placement office in order to arrange for an interview with our representative when he is on campus, or write for a copy of "Your Career With Chance Vought Aircraft".

Address:

We invite you to discuss your career opportunities in the aviation industry with us. Contact your placement office today for an appointment for your interview with J. R. Lengen, Chance Vought Aircraft Engineering Personnel Representative, who will visit your campus Feb. 15-16.

Dave Brubeck's Progressive Jazz

State College's Interfraternity Council will sponsor a concert on March 8, 1955, featuring internationally famed Dave Brubeck. The appearance will be from 8:00 to 10:00 p.m. in Pullen Hall, general admission. Brubeck has made a name for himself in the world of modern progressive jazz and if this

State Lieutenant To Go To AF Conference

Lieutenant Jack Hedgepeth, Staff Member of the State College Air Force ROTC Detachment, will depart Raleigh Tuesday, February 15 for Montgomery Alabama where he will attend an AFROTC conference to be held at Maxwell AFB, Alabama located near that city. The conference will last two days and is to be attended by a representative from each ROTC Detachment within the Air Force. The purpose of the conference is to orient each Test Control Officer in the proper and most effective methods for administering the new Air Force Officer Qualifying Test Battery and general educational evaluation problems and possible solutions to them.

The conference will effect directly those students presently enrolled in Air Science II, as Headquarters USAF has directed that all cadets completing Air Science II on or after 1 March 1955, who desire to compete for selection into Air Science III (Advance Course) must be given the new AFOQT Battery, which has a higher validity than the current one in predicting the officer and flying potential of a prospective officer candidate.

Truck School

Bart Rawson, editor of The Commercial Car Journal, arrived in Raleigh to begin collecting data for an article on N. C. State College's Truck Driver Training School.

Looking coldly at the man who had just given him a nickel for carrying his bags twelve blocks, the little boy said: "I know something about you."

"What?" asked the man.

"You're a bachelor."

"That's right. Know anything else about me?"

"So was your father."

USMC TO INTERVIEW—

(Continued from Page 1)

from induction and are commissioned as Second Lieutenants upon graduation from college.

Seniors and graduates are eligible for the OFFICER CANDIDATE COURSE. Candidates are commissioned as Second Lieutenants upon completion of a ten-week course after graduation.

Officers commissioned through either program receive an annual pay of \$3200-\$4600, and receive additional training in one or more service schools leading to an assignment in various fields such as

infantry, artillery, aviation, sea duty, engineering, supply, and others.

The ladies may inquire about the WOMEN OFFICER TRAINING CLASS similar to the male programs, leading to a commission as Second Lieutenant with the same rank and pay as the men. Women officers serve within the fields of personnel, officer management, journalism, education, public relations, and others.

Training for all programs is conducted at the Marine Corps Schools, Quantico, Virginia. There are no drills or uniforms worn dur-

ing the school year.

Be sure and get the facts about these opportunities. The Marines will be glad to furnish complete information without obligation. See them at the College YMCA on February 22 and 23.

Ever wonder which of your goldfish was a girl and which was a boy? Here is a trick we discovered to tell them apart: Add one-half ounce of dichlorodiphenyl-trichloroethane to the water in the goldfish bowl. If he comes floating to the top, he is a boy; if she comes floating to the top, she is a girl.
