Textile Open House

MAKING ENDS MEET—Don Purdee, senior in textile management, puts the finishing touches on the warp of a new weaving project in preparation for the School of Textiles' annual Open House exhibition. Production of the fabric shown above will be but one of more than a hundred student projects visitors at this year's "look-see" will witness. Open to the public, the school's textile show will be held in Nelson Building on Hillsboro Street February 26. (Staff photo by Wall)

Consolidated U. Day Success At N.C.S.

Students from W. C., Carolina, and State joined together last Saturday in observance of "Consolidated University Day" here on the campus.

In addition to the meeting of the Consolidated University Student Council, a full program was provided the attending students. A record dance was held in the College Union Ballroom at 4 p.m., followed by the State-University of South Carolina basketball game at 8:15 p.m. Following the game there was a dance in the CU Ballroom lasting until midnight with Dave Brown and his orchestra providing the music.

The CUSC met during the afternoon to discuss problems pertinent to the three campuses. On the agenda was the division of Student Supply Stores profits, a committee report on exam schedules, increase in tuition and other fees.

The semester system was discussed with all the students on the council of the opinion that the quarter system is superior to the newly inaugurated system. The members of the CUSC who represent State College are: Andrew Hinton, Gene Pickler, Colbert Dillard, John Parker, "Doc" Cheek, Bobby Joe Stephenson, Al Parker, Ed Rose and John Tester.

Eighteen Are Initiated Into Pershing Rifles

The following basic ROTC cadets were selected for membership to the Pershing Rifles concluding their pledge period: Charles Thomas Andrews, George Calvin Atkins, Ronald Ellis Brewer, James N. Brown,

Top Textile Exec's Guests For Team Day

State's School of Textiles played host to some of the nation's top textile executives Tuesday in connection with "Team Day"—Textile Education and Machinery Day. Members of the American Textile Machinery Association and the directors of the North Carolina Textile Foundation, Inc., were the guests.

Addressing the industrialists at a morning session, Dean Campbell and Bill Newell, research coordinator in the School of Textiles, said that the school now is conducting the largest volume of research of any of the nation's 10 college-level textile schools and that one research project on reducing waste in the cotton carding process recently resulted in a 50 per cent reduction in this waste. Dean Campbell said that the textile industry is faced with "a real job in the area of marketing and merchandising" in its quest for sales, and the School of Textiles is working toward the use of its facilities in training students for this field of work.

Newell reported that among the research studies now underway are those relating to fiber evaluation, the mercerization of cotton, warp size evaluation, nuclear radiation of fibers, the chemical treatment of parachute fabrics for the Air Force, and the development of better coverings for the Navy's blimps. Newell said the school recently completed a classified research project on mortar powder bags for the Army.

Coliseum Complaints

There will be a meeting of the Coliseum Committee Saturday, February 19, in the New Library. The meeting will begin at 10:30 and last the better part of the day.

(Continued on page 7)

Notice

The following notice was slated to run in last week's TECHNICIAN but through an over-sight on the part of the paper, it failed to be set. The TECHNICIAN offers its apologies to Dr. F. H. Spain, Assistant Director of Admissions, and hopes this corrects the mistake.

We Appreciate . . .

The Office of Registration appreciates the fine attitude which the student body displayed toward the new registration procedure. The *Veterans' Association* and *Alpha Phi Omega* guides are to be commended for the very fine service which they voluntarily gave free of charge. Suggestions for improvement in this procedure will be sincerely appreciated.

Crusaders Chorus At YMCA Sunday

The well-known and very popular Crusaders Male Chorus of Hampton, Va., is scheduled to make another appearance at North Carolina State College on Sunday, February 20, and will present an hour-long concert at 8:00 p.m. in the auditorium of Pullen Hall. The program is sponsored by the State College Y.M.C.A. and campus religious groups. This will be the fifth time the Chorus has performed at State College, and each performance has brought about increasing approval and appreciation of their singing.

The Crusaders Male Chorus is under the direction of Charles H. Flax and is accompanied by Mrs. Hattie A. Bright. Organized on February 12, 1939, by twelve men who wanted to sing because they enjoyed it, the Chorus has grown over the years to include more than forty splendid voices and has gainfully increased its repertoire. The following songs are typical of the selections included in the program: "Dry Bones"; "Old Man River"; "Climbing Up The Mountain"; "I Cried And I Cried"; "Stand By Me"; "Ole' Ark"; "Wagon Wheels"; "Gonna Journey Away"; and "The Lord's Prayer."

Would Be Gentleman At Textile Auditorium

Moliere's "The Would Be Gentleman" will be presented by Players, Incorporated in the Textile Auditorium at North Carolina State College tomorrow night at 8:00 p.m. The College Union Theatre Committee is sponsoring the presentation here.

The players, now on their sixth consecutive tour, are recognized by drama critics throughout the country as one of the nation's outstanding repertory companies. In each of the past five seasons they have traveled about 35,000 miles through thirty states and Canada.

Twice during the Korean war, they toured the Far East War Zone at the invitation of the Department of Defense.

Each of the players has had professional experience, and was selected for the company because of his exceptional acting ability.

In addition to the annual tour, Players, Incorporated also produces plays every summer at the celebrated Olney Theater in Maryland and at St. Michael's Playhouse in Vermont.

Mop-Up Problem; "Doc" Not Content

"I will only be convinced that the Student Supply Stores are operating in the best interest of the students when necessary—and at most times compulsory supplies—equipment, and books are merchandised on a cost plus basis," emphasized Student Government President Doc Cheek in his "State of the Campus" address Monday. The object in his "State of the Campus" address was described by President Cheek as purely "informative."

"With the southeastern expansion of the College," spoke Cheek, "I consider one of our first needs housing. Any housing projects in the near future will have to be financed on a self-liquidating basis due to the shortage of educational funds in North Carolina."

"Through the Chancellor the Student Government has asked the Trustees for four hundred additional dormitory rooms."

"A coed dormitory has also been proposed by a Coed Committee. The proposed site is on Hillsboro Street beside the A & P supermarket."

"Vetville, which was not intended to last forever when it was hurriedly constructed, must soon be replaced. We have recommended that a permanent housing project be started that will probably be open to all married students. A small committee of Verville citizens has been working with the Student Government for the improvement of Verville."

"The Development Council along with the Fraternity Committee has asked for 10 acres to put a fraternity housing project on."

"Much has been done in the line of student aid this year. Over 50 per cent of the students now have part-time jobs, and Dr. Lyle B. Rogers now devotes his full time to student aid."

The College Union is fast making strides to reactivate its program. President Cheek had praise for College Union President John Tester's work in budgetary measures, which were necessary by a sizeable overdraft at first. The Student Government President expressed the belief that an increase in the College Union summer school fee will be necessary in the near future.

"I believe that one of the student's main gripes is the Coliseum," declared President Cheek, "and many of the Grievances have been heard by a Committee that is working on the problem."

Along with the hope that the Coliseum can start showing a profit in the near future the need for intramural fields that will not be used for parking lots was pointed out.

No part of the fifteen dollar athletic fee is used for scholarships. "I hope," said Cheek, "that we have a better football team next year, and I believe we will."

"I propose that in the coming spring elections all campus offices will be completely open to all members of its organization," said Cheek. "To exclude any men or women from the chance to run for office is showing a lack of faith in the students voting power."

The \$15 reserve in the activities fee should be used the same year it is collected said Cheek.

As for Parking and the traffic situation the President said he felt that the size of the Tompkins lot should be increased now, and that immediate use of ticket fees should be made.

With the thought "that one should be very thoughtful when spending other peoples money" President Doc Cheek closed his "State of the Campus" address.

EDITORIAL COMMENT:

The CUSC And You

It came as a surprise to several members of the CUSC that relatively few students know what the abbreviation is for and so far as that goes, don't know that such a thing even exists. The letters stand for the Consolidated University Student Council and it is an organization which is representative of all students on the three campuses of the Greater University of North Carolina. Actually, it shouldn't have been a surprise that the CUSC is so little known for little publicity has been given it.

The CUSC is responsible for the Consolidated University Days such as the one here on this campus this past Saturday. The purpose of the event is to unite the campuses into a spirit of oneness as much as the distance will permit. The council, however, has another purpose other than social events. It takes problems of students of the Consolidated University, analyzes them, and recommends action directly to President Gray. Through this means the University administration is informed directly of student gripes and suggestions.

Such moves as a vote to split the profits of the Student Supply Stores, 75 per cent to scholarships and 25 per cent to Student Gov-

ernment as compared to the old 100 per cent allocation to scholarships, are made and carried to the administration. Other moves such as exam schedules are discussed and also opinions are voiced about student affairs. Saturday in the council meeting a general disgust for the semester system was registered and resulted in a direction for the executive committee to approach President Gray as to why the semester system was inaugurated and what he considers its virtues, if any.

Here's where you fit into the CUSC. If you contact the representatives from State, who are listed on the front page of THE TECHNICIAN, they can carry issues before the council and perhaps will be able to reach a solution which will be to the advantage of all three units of the Consolidated University. The council has been active but its effectiveness has been limited because of indifference on the part of some students. It will never be stronger unless all of the student bodies are willing to get behind the CUSC. It has the potentiality of a strong legislative body, being able to go directly to the Trustees and to President Gray.

A Fabulous Graduation

For some time graduation at State College has been unimpressive and has been somewhat of a chore for all those concerned. The basic trouble behind this has been the dismissal of school before graduation with a complete exodus from the campus. Indeed, on graduation Sunday its hard to find anyone here at all except the graduates, the faculty, and a handful of guests.

This year a plan has been proposed which would permit graduation to be held while other students are taking exams. This would lend an air of festivity to the campus and to the memorable event. This would allow seniors to see their friends after graduation, show the campus off with some activity, and to have a commencement topping everything of the past.

The proposed plan would eliminate exams for seniors in courses which they have a "B" average which would cut down on the exam load. There isn't a senior who wouldn't consider this enough incentive to maintain a "B" through the rest of the semester. This would mean one less week of school but a week less in the semester won't make enough difference to offset the pleasure derived by the concerned students through the early graduation.

An early graduation coupled with the proposed Chancellor's Tea followed by an informal dance, would make this State College's most fabulous graduation. This means more to seniors than the average person is inclined to believe. The lack of school spirit has been a problem on this campus and this would do wonders toward raising morale. The proposal is something that seniors want and it would certainly be about the most pleasant event of the four (plus) years spent here.

The move is to make State's graduation one of the most impressive. Little things

such as the inclusion of a chimes concert immediately following the morning service rather than while everyone is inside the Coliseum, are being thought of to improve the exercise. It's up to the faculty to approve the plan if seniors are to be granted a graduation which fits the occasion.

george shearing

Schools for the blind produce many great men, but very seldom do they contribute many great jazz musicians to the world. However, in the case of George Shearing, I think it would be safe to say that he is the greatest musician ever to enter into the world of jazz, handicapped as he was.

He was born in a poor district in London, England and was blind from the day of his birth. His musical career began when he was five years old and was developed along a classical style. Until the age of sixteen, Shearing had decided to be a classical pianist.

After hearing recordings of Art Tatum, Teddy Wilson, and Fats Waller, Shearing decided to give up his classical career and follow the style of music of these great men. He immediately began studying everything available on Braille and records pertaining to American jazz. In 1937, at the age of 17, George Shearing's career began. It was then that he sat in on his first jam session. He played the accordion as well as the piano and was equally adept at both. During the next decade he rose to become England's top jazz artist winning the British Melody Makers popularity poll for seven consecutive years.

Shearing came to the United States in 1945 for a brief visit. He fell in love with America and decided to become a permanent resident. In 1947 he returned with his wife and small daughter. At first it appeared as if his decision was a bad one. He could not interest the agents in his style of music. Then, the break came. The Three Deuces, one of New York's 52nd Street jazz centers, asked him to join in with Oscar Pettiford and J. C. Heard to form a trio. He passed from this group to many more before he became the "complete unique figure in the jazz world" that he is today.

The famous George Shearing Quintet was the next to be born—and quite by accident too. He had been working with a quartet when he discovered, just before a waxing session, that the clarinetist could not play. He dubbed in a guitar and vibraharp to take the place of the clarinet. It was then that the famous Shearing "sound" was revealed to the music world for the first time.

The first waxing, "September In The Rain" was immediately a success. The Shearing group was on its way. Since then, the Shearing men have waxed many sides.

An Evening With The George Shearing Quintet is an album containing "I'll Remember April," "Body And Soul," "Little White Lies," "Jumping With Symphony Sid," "Roses Of Picardy," "Mambo Inn," "To A Wild Rose," and "The Continental."

Another Shearing album is When The Lights Are Low. This album contains the title song plus "I Hear A Rhapsody," "Don't Blame Me," "Thine Alone," "Indian Summer," "There's A Lull In My Life," "I Didn't Know What Time It Was," and "When Your Lover Has Gone."

A good single by Shearing is "Love Is Here To Stay." On the flip side is "Lullaby Of Birdland." Another Album is You're Hearing George Shearing. This is one of the oldest of the collection of Shearing recordings. It has eight of his earlier numbers in it.

Just in case you haven't heard, George Shearing was in Raleigh Tuesday night with the other fine musicians appearing at the Memorial Auditorium.

Dr. C. Bostian Visits Mich. State College

Dr. Carey H. Bostian, chancellor of N. C. State College, left Raleigh last Thursday for East Lansing, Mich., where he participated in ceremonies held in connection with the centennial observance of Michigan State College. Dr. Bostian represented the Consolidated University of North Carolina at the event.

Like N. C. State, Michigan State is one of the nation's Land Grant Colleges established under the provisions of the Morrill Act which was signed into law by President Abraham Lincoln. Michigan State held its centennial celebration on the anniversary of President Lincoln's birth.

U. S. Pay \$17,000 Research Contract

The U. S. Bureau of Ships has awarded the School of Engineering at N. C. State College a \$17,000 contract for research work, college officials said.

Prof. R. B. Rice, head of the State College Department of Diesel and Internal Combustion Engines and technical director of the research project, said that the new contract calls for a determination of valve wear and failures influenced by rate of cylinder lube oil consumption in the two-cycle Diesel engine.

Working on the project with Prof. Rice is Dr. L. C. Nelson, also of the Department of Diesel and Internal Combustion Engines.

WHAT'S NEW WITH THE C. U.

Notice:
Players Incorporated will present "The Would-Be Gentleman" in the Textile Auditorium at 8:00 p.m. on February 18. Admission by registration card for students and their dates or families. Non-college union members admission charge will be \$1.50.

Thursday, February 17—
7:00 p.m. Ceramics Class. College Union Hobby Shop.

7:30 p.m. Social Dance Lessons in the College Union Ballroom. —Sign up at the College Union Games Desk for the Chess Tournament—

Friday, February 18—
8:00 p.m. Players Incorporated present Moliere's "The Would-Be Gentleman." Textile Auditorium.

Saturday, February 19—
1:00-11:30 Movie: "Night Must Fall" with Robert Montgomery. College Union Theatre.

Basketball

The fact that N. C. State's powerful basketball squad went over the century mark three out of their last four games, did little to impress the voters in this week's AP rating as the Wolfpack still is ranked the 7th team in the nation with a 21-4 record. The top ten for last week are: San Francisco—1, Kentucky—2, LaSalle—3, Duquesne—4, George Washington—5, Marquette—6, N. C. STATE—7, Minnesota—8, UCLA—9 and Utah—10 . . . Several New York papers are still stating that N. C. State may still be offered an invitation to the National Invitation Tournament (NIT) but this is impossible due to ACC regulations against member teams accepting invitations . . . Also it seems that the National AAU Tournament in Denver is also out too, to the huge financial problem involved . . . So it looks like the Pack will have to settle for the ACC crown next month!

Swimming

State swept eight of nine events as they gained their sixth straight victory of the season at the expenses of Pittsburgh 58-24 last week. The Pack also set five new pool records in establishing the win.

Wrestling

N. C. State's wrestling team racked up their fifth win of the season Tuesday against UNC 26-7. The Pack has suffered only one loss thus far and a victory over Maryland in their final match of the season would assure them of a tie for the ACC crown.

Football Managers

With spring practice under way Coach Earl Edwards needs several student managers who would like to help with the football team. If anyone is interested contact Coach Edwards in the Coliseum.

The Dorm Corner

By Terry Lee Hershey

Last Week's Basketball

Syme No. 2 beats Becton No. 2—Syme was able to keep a lead of three or more points most of the game and finally won 41 to 36. Horn (13) and Carpenter (11) were the high scorers for Syme. While Heath (14) and Collier (10) led

Becton No. 2. The second team of Syme No. 2 lost a close game to Tucker No. 1's second 25-37.

Becton No. 1 beat Alexander No. 2—Whitley (24), Powell (18) and Traywick (16) led the high scoring Becton No. 1 team to a smashing 71-46 victory over Alexander No. 2. Norris was the high scorer for Alex. with 16. The second team of Becton No. 1 beat Becton No. 2's 33 to 22. Williams was the high scorer for the Becton No. 2's second team with 15.

Tucker No. 2 beat Becton No. 2—Hobson (11) and Spivey (9) of

Frat Intramurals

BASKETBALL

SAE 78, Theta Chi 15 — The SAEs had little trouble last week as they crushed Theta Chi 78-15. Peterson with 20 and Briley with 19 led the scoring. Taylor tallied 11 for the losers.

SPE 32, PKA 29—A strong SPE squad pulled the big upset of the week as they downed the defending champions PKA 32-29. Sparrow and Gragg with 12 and 8 points respectively led the SPE's scoring. Woolard had 14 in a losing cause.

KA 40, AGR 38 — In another close battle the KA's edged passing the AGR's 40-38 behind the scoring of Turner and McLaughlin. Rogers was the AGR's standout as he tallied 16 for the night.

PKP 46, PEP 40—Don Hitchcock went on a 23-point scoring spree to lead the PKP's to a 46-40 victory over the PEP's. Beran's 16 was high for the PEP's.

Sigma Chi 52, PKT 30 — The Sigma Chi's continued on their winning ways as they won their third victory of the year by a 52-30 margin from the PKT's. Lancas-

Becton No. 2 were not fast enough to stop Gall (13) and Scaggs (10) of Tucker No. 2. The final was 55 to 30 in favor of Tucker No. 2. The second team of Tucker No. 2 was also victorious over Turlington No. 2's second team. Hendrix (22) and Cloninger (16) were the high scorers for Tucker, and Eudy (17) was high for Turl.

Vetville beat Bagwell No. 1—The outstanding player for the "Vets" was Burr who scored 22 points. The Vets won by six points, 39 to 33. The Bagwell team worked well as a team. The second team of Bagwell No. 1 beat Welch-Gold-Fourth's second team by 41-27.

Last week Bagwell No. 1 won their game over Tucker No. 1, when Tucker No. 1 forfeited to Bagwell No. 1.

Alexander No. 1 beat Turlington No. 1—Jones (10), Winchester (10), and Keels (10) were the leading scorers for Alexander with Jones controlling the backboards. Thompson (10) was the outstanding player for the Turlington No. 1 team. The final score was 49 to 26 in favor of Alexander.

Berry beat Turlington No. 1—Berry stormes back in the second half to win 46 to 34. Stanfield (14) and Holt (10) were the high scorers for Berry. Absher (11) and Gaier (13) led the Turlington No. 2 team.

Owen No. 1 beat Tucker No. 1—Holloway (10) and Tripp (10) led the Owen team to a 45-22 victory over Tucker No. 1. Hopkins (10) was the outstanding player for Tucker.

BOB SEITZ

..... for his fine performance on Varsity Basketball Team. The Varsity Men's Wear invites him to come by and select a shirt of his choice, compliments of the store.

We invite all N. C. State students to make Varsity Men's Wear their headquarters for the finest in men's clothing and furnishing.

Hillsboro St.

State Edges Duke in Thriller, 84-78 ACC Lead at Stake Sat. Against Md. Pack Travels to Carolina Tuesday

The battle for the ACC lead will take place Saturday night when State College's cagers meet Maryland in the Coliseum with the winner taking sole ownership of the first place position.

Both teams are dead-locked for the top spot with 10-2 records. State's losses came from Carolina and Maryland while Carolina and Duke have downed the Terps.

Coach Everett Case's lads, fresh from a thrilling 84-78 victory over Duke, will be out to revenge an earlier 68-64 setback handed the

ter dropped in 19 for the Chi's and Holmes scored 12 for the PKT's.

SPE 39, KA 32—The SPE's remained in a first place tie in their division as they edged passed the KA's 39-32. Stephenson and Gragg tallying 16 and 9 points each led the SPE's while Hall with 10 led the KA's.

PKA 48, AGR 33—With John Goodman ripping the nets for 16 points the PKA's got back on the win trail at the expense of AGR 48-33.

Sigma Pi won a forfeit from the TKE's.

HANDBALL

Three handball matches were scheduled last week and all resulted in forfeits, SAE over Sigma Pi, SAM over Lambda Chi and Sigma Nu over PKP.

Pack by Maryland. State also has another big one next Tuesday when the journey to Chapel Hill to meet the Tar Heels in their final conference game of the season.

TABLE TENNIS

The table tennis play-offs reached the final and semi-final stage as Sigma Chi remained undefeated against the PEP's 2-1 while Sigma Nu gained a forfeit from the SAE's. Sigma Nu will meet the PEP's next week with the winner meeting the Sigma Chi's for the championship.

SWIMMING

Fraternity swimming prems are scheduled for Friday night in Frank Thompson pool. Athletic Directors are scheduled to turn in their entries tonight at the field house.

Winter Drills

Seventy candidates reported to Coach Earle Edwards as State College launched 20 days of off-season football drills.

The squad included 17 lettermen. Practice sessions will be held three days a week, ending on March 19 with the annual Red-White intrasquad game in Riddick Stadium.

Textile Experiment Medical Advance

Substitutes for the human heart's principal artery—the aorta and the Y-shaped aortic arch—have been developed experimentally in the School of Textiles at North Carolina State College.

The artery substitute—which, if successful, will be an historic milestone in medical science—was made at the college after Dr. Paul W. Sanger and Dr. Frederick H. Taylor, Charlotte heart specialists, approached Prof. W. E. Shinn, head of the college's Department of Knitting Technology, about the idea.

Working with a modified necktie machine, Professor Shinn knitted Orlon tubing in the exact dimensions of the human aorta and its accompanying aortic arch—an achievement which may bring recovery to older people afflicted with aneurism.

The Orlon tubing which somewhat resembles a tiny knitted necktie already has been used successfully as a substitute for the aorta in dogs and may soon be used on humans.

The Lineberger Foundation provided the funds for the project, and Professor Shinn modified the mechanism of the necktie machine to knit the Orlon tubing the proper shape, size, and quality to replace the aorta.

Fashioned from one of DuPont's fabled "miracle fibers," the Orlon tubing is not subject to chemical change, will not dissolve in body chemicals, and gives promise of pulsing the vital blood through the human body for an indefinite period. One scientist in the School of Textiles at State College said the tubing "should last forever."

Doctors first hit on the idea of using plastics for the artery substitute but found this material to be unsatisfactory. Dr. Sanger then conceived the plan to use an Orlon tubing.

The knitted Orlon tubing has minute holes in its surface which first cast doubt on its use as a blood vessel—but doctors have found that as the blood flows through the Orlon tubing these tiny openings are permanently sealed by the coagulating blood.

After Professor Shinn successfully knitted the Orlon in the shape of an aorta, he was asked to make a replacement for the aortic arch, a Y-shaped artery. He simply used the same necktie machine, adapting it to turn out the Y-shaped piece of Orlon fabric in a process similar to that used in making gloves.

Aneurism, a disease striking older people, is a development of

State ROTC Grads; 13 Get Commissions

Thirteen State College ROTC cadets received their commissions as Second Lieutenants in the United States Army Reserve after completing ROTC last semester.

The thirteen who were sworn in by Col. Richard R. Middlebrooks, Professor of Military Science and Tactics, are: Robert Lee Adams, Lexington, Ky.; Talmadge Rudd Burgess, Henderson; Stephen Allen Cooper, East Rockaway, N. Y.; Burton Haims, Brooklyn, N. Y.; Allen Howell Harris, Concord; Van Smith Jenkins, Oxford; Douglas

Ray Kincaid, Greensboro; Charles McLean Marshall, Jacksonville; Raymond Earl Murphrey, Snow Hill; Renford Wendell Peed, Jr., Lucama; Gale Thomas Reeves, Sparta; Paul Brooks Smith, Charleston, W. Va.; and Albert Calvin Stafford, Lexington.

Those veterans who will become college juniors at the beginning of the Fall Semester, 1955-56 academic year, and who are interested in obtaining a commission in the U. S. Army Reserve through participation in the Advance Course Army ROTC are requested to contact the PMST, Room 154, Coliseum at their earliest convenience.

BUT MY NAME IS PRUDENCE PIMPLETON.

GOT LOOSE DANDRUFF? DON'T GET MAD—GET WILDROOT CREAM-OIL, CHARLIE!!

At TEMCO a two-fold opportunity awaits engineers, physicists and mathematicians who want to grow professionally.

First, the entire engineering department is organized under the systems concept. This necessitates the combined services of civil, electrical, mechanical and aeronautical engineers, physicists and mathematicians, all of whom will have the opportunity—indeed, will be required—to become familiar with all areas in the aeronautical sciences. Highly specialized work will be demanded, of course, but it will be conducted within the stimulating framework of a broader background in related fields. Your opportunities, here, for professional growth are unlimited.

Second, TEMCO offers a Master Engineering Training Program designed to develop today's engineering graduates into the systems engineers of the future. This program includes a Graduate Study Plan leading to Master of Science degrees, and a Job Rotation Plan which permits you both to specialize without confinement and to diversify without loss of direction.

For further information on the opportunities awaiting you in Systems Engineering at TEMCO, write I. Nevin Palley, Vice-President Engineering, TEMCO Aircraft Corp., P. O. Box 6191, Dallas, Texas.

A.I.E.E. And I.R.E. Meet Tuesday

The N. C. State College student branch of the American Institute of Electrical Engineers and the Institute of Radio Engineers will meet in Room 11 of the Riddick Engineering Laboratories Building, Tuesday, February 22 at 7:30 p.m., Jim Tommerdahl, president of the group, has announced.

The program also calls for election of AIEE-I.R.E student branch officers, advisors, and Engineer's Council members for the coming year.

Jules Warshaw, director of engineering for the International Resistance Company of Philadelphia, is scheduled to be the featured speaker for the evening. His topic will be "The Release of a New Product to the Production Department."

Believing to recognize her husband, a lady in a suburban train left her seat and put her arms around a man sitting several seats ahead. Naturally, she was greatly embarrassed when the man turned around and she saw that he was a perfect stranger.

"Oh, pardon me," she stammered, "but your head looks exactly like my husband's behind."

The queen and sponsors of the Barnwarming Dance presented annually by the students in the School of Agriculture are pictured above. The dance will be held in the Frank Thompson Gymnasium Saturday, February 19, from 8 p.m. until midnight, with Dave Brown and his Orchestra providing the music. Miss Nancy Cochrane (center) will be the Barnwarming queen. Her escort will be Justus Ammons. Also pictured above are the sponsors, with

their escorts listed. Top row, left to right: Mrs. Margaret S. Weatherly with her husband, Bill Weatherly, chairman of the invitation committee; and Miss Jean Batten with Bob Cooper, decorations chairman. Bottom row, left to right: Miss Margaret Lane with Tom Dixon, Barnwarming chairman; Mrs. Ruth Porter with her husband, Herman Porter, business manager of The Agriculturist; and Miss Anne McArthur with Gene Pickler, program chairman.

TEXTILE EXPERIMENT—

(Continued from Page 5)

weak spots in the aorta. When this condition prevails, the blood moving through the aorta at high pressure oftentimes causes the aorta to break at these weak spots—like a blow out in an auto tire tube.

Artery replacements taken from deceased persons and stored in the nation's three artery banks have been used successfully but due to their short supply are not adequate for medical needs. These arteries also are not substantial in some cases and are, therefore, subject to deterioration.

If the Orlon substitutes work, they can be produced on an unlimited scale and can be made available anywhere without the use of preservatives. They can be stored on shelves just like neckties and socks and can be just as plentiful.

SQUARE CIRCLE

By Dixon

Big deal: Impressed by their own self-importance, several TECHNICIAN staffers entertained the inane idea that they, too, like other funkies about the campus, should be granted special parking facilities while attending to journalistic duties. After several weeks shilly-shallying the egotistical egg-heads were authorized permission to use the parking lot north of 1911 building, adjacent to Hillsboro Street ONLY.

Mad fad: The "What's in a name nonsense" craze currently moving across campuses in Western North Carolina makes use of song titles like this:

Jersey on Marilyn.
Marilyn on horse.
Jersey Bounce.

Wolfpack booster: Basketball season brought new headaches for Varsity Men's Wear manager Bill Kiger. Beginning last football season the Hillsboro Street college gift shirts to State College athletes who performed outstandingly during the preceding week. The tall-boy ball game brought Ron Shavlik and Cliff Dwyer into the lucky spotlight. Trouble now, however, is getting shirtilongs long enough to reach down to where belt buckles begin.

Ray Eberle Plays '55 Military Ball

"All America's Singing Favorite" Ray Eberle and his orchestra will be featured at this year's annual Military Ball. April 16 is the date set for the Military Ball, one of the year's most colorful events. Jimmy Capps, radio station WPTF's popular "Our Best to You" Discjockey will be the Master of Ceremonies at the intermission and will introduce the Honorary Cadet Colonels chosen from sponsors of ROTC Companies and AFROTC Squadrons.

Ray Eberle has been an all-American singing favorite and orchestra leader for many years. He has appeared in several motion pictures, had his own radio and TV show, and was featured vocalist with the Glenn Miller Orchestra for six years.

SAE, looking through telescope toward Meredith: "God!"

SKIER LOOKING FOR LOST SKI
 James U. Crouse
 Colorado State College

WHAT'S THIS? For solution see paragraph below.

IN THE DARK about which cigarette to smoke? Take a hint from the Droodle above, titled: Two searchlight crews, one asleep, one enjoying better-tasting Luckies. Your search is over when you light up a Lucky. You'll find out why college smokers prefer Luckies to all other brands, as shown by the latest, greatest college survey. Once again, the No. 1 reason: Luckies taste better. They taste better, first of all, because Lucky Strike means fine tobacco. Then, that tobacco is *toasted* to taste better. "It's Toasted"—the famous Lucky Strike process—tones up Luckies' light, good-tasting tobacco to make it taste even better . . . cleaner, fresher, smoother. So, enjoy the better-tasting cigarette . . . Lucky Strike.

N.Y.C. Art Museum Design School Show

An exhibition prepared by students in the School of Design at North Carolina State College and forecasting design trends during the next two decades will be on display in the Museum of Modern Art in New York City February 15-22.

The N. C. State exhibition, a feature of the fifth anniversary "Good Design" show of the Museum of Modern Art, was previously displayed at the Merchandise Mart in Chicago, Ill.

Prof. Roy Gussow of the School of Design faculty at N. C. State, who headed a faculty committee which assisted students in prepar-

ing the exhibition, will go to New York to help install the display.

Prior to the showing of the N. C. State design work, the museum will feature a display by students at Pratt Institute. The N. C. State display will be followed by exhibitions prepared by students at the Illinois Institute of Technology, the Massachusetts Institute of Technology, the Rhode Island School of Design, the University of Georgia, and the Cranbrook (Michigan) Academy of Art.

In their exhibition, the students of the State College School of Design will illustrate maximum strength with minimum materials, rational construction at minimum cost, and dramatic form in their projects for area planning, home and garden design, and the design of individual objects. The panels and models will be displayed in a frame in which vertical and horizontal supports never meet.

Buckminster Fuller Visiting Lecturer

R. Buckminster Fuller, world-famous engineer, mathematician, and inventor of the Dymaxion car and the "Geodesic House," is serving as a visiting lecturer in the School of Design at North Carolina State College during the month of February.

While at State College, the noted scientist is conducting a special problem with advanced students in the School of Design on the design of a television station. He is also holding seminars and presenting lectures.

Also during his stay at the college he is conducting significant experimental work in light structures for the U. S. Marine Corps.

Fuller is the author of "Nine Chains to the Moon" and other volumes. He was educated at Harvard and is a cousin of Novelist J. P. Marquand.

For many years, he was a consulting editor of Fortune Magazine and was the subject of a lengthy feature in Time Magazine's "Personality" section in 1953.

Among the other institutions where Fuller is engaged as a visiting lecturer are Yale University, the Massachusetts Institute of Technology, Princeton University, the University of Michigan, Washington University of St. Louis, Mo., and the Illinois Institute of Technology.

Design Dean

Dean Henry L. Kamphoefner of the School of Design at N. C. State College will address the congregation of the Community Church in Chapel Hill Thursday at 8 p.m.

What young people are doing at General Electric

Young specialist in community relations makes friends in 101 plant cities

General Electric now has 131 plants in 101 cities, and one problem is common to all: How can the company show people in every community that it is a good neighbor?

This responsibility is shared by many and stimulated by 32-year-old John T. McCarty. His job: Consultant, Program Services in Plant Community Relations.

McCarty's work is varied, exciting

McCarty's assignment is to help each of the General Electric plants tell its neighbors what it is doing, what it hopes to do, and how it fits into the community.

He must be ready to travel to 26 states. He prepares community-relations manuals for use in all 101 plant cities. He supervises surveys of community sentiment, and tests the local effects of the company's advertising. And he helps plant management maintain friendly contacts with civic, religious, educational and other community leaders.

23,000 college graduates at General Electric

This is a sensitive and important job. McCarty was readied for it in a careful step-by-step program of development. Like McCarty, each of the 23,000 college-graduate employees is given his chance to grow, to find the work he does best, and to realize his full potential. For General Electric has long believed this: When fresh young minds are given freedom to make progress, everybody benefits — the individual, the company, and the country.

JOHN McCARTY joined G. E.'s Advertising Department as a copywriter after army service and graduation from U. of Michigan in 1947. He has held his present job since June 1952.

Progress Is Our Most Important Product

GENERAL  ELECTRIC

WE'D LIKE YOU TO MEET -

John Wallace Tester, president of the N. C. State College Union. John worked up to his post as president of the Union by the time-honored "through the ranks" method. He started his work at the Union his sophomore year as chairman of the Outing Committee. Last year he moved up to chairman of the all-important Activities Committee from which post he moved, after a successful campaign, to his present post.

John was born June 2, 1933 in Blowing Rock, N. C., though he grew up and attended high school in Lenoir. He graduated from Lenoir Senior High School in the Spring of 1951 and entered State the following Fall. He is enrolled in the Pulp and Paper Technology Curriculum of the Forestry School and has been quite active in the various Forestry groups during his period at State. He has been a member of the Forestry Club since his Freshman year and is a member of Xi Sigma Pi, the Forestry Honorary Fraternity, and of Alpha Zeta, the Agriculture and Forestry Honorary Fraternity, having been elected last year to both of these and also to Blue Key, the Junior Honorary Fraternity. Tester was also active in student government his Sophomore year, serving as a member of the Council that year.

John has no definite plans for the future other than the Air Force. He is at present a member of the Advanced ROTC detachment and expects to serve three to five years with "Uncle Sam" following graduation.

One other definite plan is included in John's immediate future. Over Spring holidays he plans to marry Miss Lois Boyd of Roanoke Rapids, who is at present a Junior at Woman's College.

John has done a fine job with the new College Union this year. It has been a difficult job to get the new building and accelerated program smoothly running, but the results speak for themselves and for John. His recent election to the

Banks Cooper Talley, officially N. C. State College's Coordinator of Student Activities. This year, under the new organization in Holladay Hall, Mr. Talley gave up his old job as Assistant Dean of Students for the newly created post mentioned above. Among his duties

in his new work are handling, as the title states, many of the student activities on the campus. He has had a big hand in the band improvements noted on the campus this year and has established a much closer relationship between many organizations, such as the fraternities and student government, and the Administration.

Banks is originally a South Carolina boy. He was born and raised in Bennettsville and finished high school there. Since he was born in 1928, he graduated from high school in the middle of the war years and served his stint in the closing years of the war in the Army. When he was discharged in 1947, he entered our sister institution at Chapel Hill. He majored in History and was also quite active in extra-curricular activities including student politics and Chi Psi fraternity.

He went back to Carolina after his graduation to do some graduate work in history, but in the Fall of 1951 he came to the State College campus to begin his work in the Dean's office.

Mr. Talley has been honored several times by the students at State for his fine work. He was elected

to honorary membership in Golden Chain in 1953 and the 1954 Agromeck was dedicated to him. This year, he was further honored by his election to Blue Key.

The students here at State owe Banks Talley a lot of thanks, if for no other reason, for his understanding and sympathy with student problems, both personal and collective, and for the friendly

warmth of his office in the basement of Holladay when things "are getting you down."
