State College Station, Raleigh, N. C.

October 14, 1954

Advisory Committee Holds First Session

The Campus Stores Advisory Committee was called into executive session Friday afternoon by Chairman W. H. Pierce to discuss policies and procedures to be followed by the committee.

Purpose of the committee is (1) to study problems associated with the operation of the campus store system, (2) to study welfare problems of students as influenced by their business relations with the campus stores, and (3) to develop such recommendations as appear to be in the general interest of all concerned for consideration by the administration.

Chairman Pierce emphasized that any problem which appeared to merit consideration of the committee must be thoroughly investigated and all facts available obtained before there would be a sound basis for making recommendations. He also emphasized that for the committee to be of service to the college community it must, and would, proceed in a completely unbiased manner in the consideration of any controversial questions or issues.

Suggestions and ideas from members of the student body and faculty will be helpful to the committee and appreciated by it. A number of problems already have been suggested for study. Later in the term the committee expects to hold hearings for the benefit of those who wish to discuss their ideas and suggestions in detail before the committee.

Notices of such meetings will be published in the Technician or campus publications. In the meantime written communications to the committee or personal contact with individual members of the committee will provide much useful information which should provide a foundation and background for its work. Ideas also may be transmitted to the committee through members of the Student Government.

In addition to Chairman Pierce, other committee members are: A. J. Bartley, department of economics; G. B. James, department of agricultural education; Gene L. Warren, senior in agriculture; James H. Cheatham, senior in electrical engineering; and Merdel L. Robinson, Jr., senior in textiles.

Ex-officio members of the committee include the college business manager and the manager of the campus stores.

All Of 53 Women; Coed? N. C. State

North Carolina State College's fall semester enrollment stands at 4,282 students, the college's Registration Office reported today.

The current enrollment figure is 214 larger than last fall's enrollment. The Freshman Class included 1,306 new students and is the largest first-year class in the 65-year history of State College. There were 1,116 new freshmen last year.

Among the students enrolled this term are 53 women and 4,229 men. There are 846 veterans of the Korean fighting and 118 other veterans of military service.

The School of Engineering leads the five other degree-granting schools in enrollment, with a total of 2,168—slightly more than half the college's total enrollment. The enrollment in the other schools includes 743 in the School of Agriculture, 239 in the School of Design, 383 in the School of Education, 204 in the School of Forestry, and 453 in the School of Textiles.

Departments having the largest registrations are the Mechanical Engineering Department including its aeronautical option, with 564 students; the Department of Electrical Engineering, with 477; and the Department of Civil Engineering including its construction option, with 471 students.

A breakdown of the enrollment by classes shows that there are 1,577 freshmen including new students and other students who registered at the college before the current semester, 972 sophomores, 638 juniors, 652 seniors, 46 students seeking professional degrees, and 305 graduate students. In addition, there are 92 special and non-classified students.

Among the students registering at State College for the first time this semester are 342 who have transferred to N. C. State from other colleges and universities.

AFROTC Officers Add Responsibilities

State College seniors enrolled in advanced Air Force ROTC have assumed responsibilities something akin to those which they will have on entering active service. Competent leadership is being shown by these potential officers as they assume command on the drill field and guide underclassmen through maneuvers and drill procedures. Their knowledge of drill procedure is backed by three years of college drill and four weeks of intensive summer training at various encampments.

The AFROTC at the college is set up on a wing level, comprised of three groups, each of which is made up of four squadrons. Cadet wing commander is John Pearman

and assisting him as cadet wing commander is Moncie Daniels. Working with Pearman on the wing staff are: cadet air inspector, Frederick Moore; cadet operations and training officer, Ernest Dean; cadet director of material, James Deal; cadet adjutant, David Sartin; and cadet public information officer, John Parker.

Group commanders are cadets Hugh Baker, Al Pruden, and Joe Hester. Cadet Robert Biggs is director of freshman training.

College Vets Group Hold First Meeting

State College Veterans Association held its first regular meeting Wednesday, October 6, at 7:00 p.m. in the auditorium of Williams Hall. President Bert Kalet presided.

Fred I. Joseph was unanimously elected vice-president of the association. A civil engineering transfer from E.C.C., Joseph was president of the Veterans Association there.

Plans were made for a social to be held Friday, October 15, at Gresham's Lake. All present members are invited to attend and to bring a non-member if possible. Everyone is asked to meet at the Coliseum at 6:00 o'clock.

The next meeting of the association will be held Wednesday, October 20, in the College Union Auditorium.

Engineering Seniors Win Trane Awards

Roy Ewart Johnson, Jr., of Hendersonville and Jack Lindsey Flowers of Winston-Salem, seniors in the School of Engineering have been awarded \$500 scholarships presented by the Trane Company of La Crosse, Wis., for the current academic year, Dean J. H. Lampe has announced.

The scholarships, which were given to the young men on the basis of their scholastic standings, personal characteristics, and extracurricular activities, are the first to be awarded the School of Engineering by the Trane Company.

Johnson is working for a B.S. degree in the aeronautical option offered in mechanical engineering as well as a straight B.S. degree in mechanical engineering. He ranks second in his aeronautical engineering class and fifth in the entire group of mechanical engineering seniors.

Flowers, who is the highest man scholastically of the seniors in the Heating and Air Conditioning curriculum of the Mechanical Engineering Department, ranks second highest of all the seniors in that department.

Around The Campus

Complimentary copies of the Technician are being sent to each department in an effort to keep the faculty better informed on campus news. These copies are being sent in the name of the department head but are available to other members of the faculty and staff.

H. F. Rash, Ag. Sr., New Verville Mayor; Caspari Is Sheriff

Henry Ford Rash, agricultural education senior from West Jefferson, was elected mayor of Verville in last week's election at the campus veteran's community. Rash will serve during the coming year.

Getting 97 of a total 142 votes cast, Ralph swamped his two opponents James D. Logan, architecture senior from Detroit, Michigan, and William J. Reavis, agricultural education sophomore from Angier.

In the race for Verville sheriff Wilson B. Caspari, textile and engineering senior from Ronkonkoma, N. Y., won out over Howard Robbins, Perry C. Bryant, and Carl Horton.

Other officers picked by Verville residents were Rush W. Bondurant, chemical engineer sophomore from Williamston, who was elected fire marshal; Samuel T. Hudson, forestry management junior from Metuchen, N. J., and David L. Strider, agricultural educational junior from Flat Rock, who were named athletic directors; and James H. McKenzie, industrial engineering sophomore from Gastonia, who was unopposed in the contest for recreational director.

In his successful bid for mayor Rash campaigned on the platform of; increased cooperation between Verville citizens and the management office, better expenditure of Verville tax money, and development of greater community spirit.

Commenting on his election Mayor Rash said, "I appreciate the confidence the people of Verville have expressed in selecting me to serve as their mayor during the coming year and I pledge my wholehearted efforts to make Verville a better place for all to live."

Mayor Rash is married to the former Miss Nellie Cauble of Salisbury and is the father of a three-year-old son.

Recent State Grad Gets Two Awards

Paul S. Shimamoto of Waipahu, Hawaii, 1954 graduate of the School of Design at State College, has been awarded scholarships valued at \$950, Dean Henry L. Kamphoefner of the college's School of Design has announced.

An outstanding student at N. C. State, Shimamoto has been awarded a \$500 scholarship by the Massachusetts Institute of Technology for graduate study in MIT's School of Architecture and Planning and the annual \$450 Medary Scholarship by the Committee on Awards and Scholarships of the American Institute of Architects in Washington, D. C. provides for graduate study.

Ag Club Program

The Meredith College girls presented the program at the regular meeting of the Ag Club Tuesday night at 7:00 o'clock.

The program, which was part musical and part comedy, featured Miss Pat Corbett, who played several selections on the accordion and the reading of a humorous letter. The program was a hit with the audience.

EDITORIAL COMMENT:

State Landscaped?

State's campus is at last beginning to look collegiate. Slowly, like a turtle with arthritis, things are shaping up.

It's encouraging to see landscaping being carried on all over the campus. Last week's grading and seeding of the area around the Reactor Building was a real surprise and a very pleasant one.

Landscaping in the dorm areas has also been progressing over a period of years. Even these areas may someday overcome their reputations as eye-sores.

With all the new landscaping, there are still some things on campus that are real irritations.

A Real Disappointment

When students returned to the campus this fall and learned that the new D. H. Hill Library had been completed and moved into, they thought they at last had a decent place to go to study.

Wow! Students were really in for a surprise! The lounge is closed and the reserve room is bare. What is more the library's new service hours are far too inadequate.

These things are little and wouldn't cost a lot to correct. For instance, the old fountain lying in the gutter behind Pullen Hall. It's hardly in its appropriate place and although it would probably not look good anywhere, it would be better somewhere else.

State can never have the appearance traditionally associated with college campuses. The buildings are of such varying designs and they are too close together to have large areas of gardens and hardwood groves.

Once students were able to go to the library in the early part of the day and remain until a reasonable hour without having service interrupted. On Saturday a student is given a hard time for service discontinues at 6:00 p.m.

What is this new luxurious building doing to further a man's education? The building is nice, yes! Even fabulous. However, it's what within the building that counts.

Why can't money be made available for services which are essential to any college? Perhaps, it won't be long in getting better service. Until it does, the new library is a real disappointment.

Dad's Day

A new development in the planned functions of homecoming is the scheduled "Dad's Day." Golden Chain is sponsoring the event in an effort to promote the festivities and to give students an opportunity to bring their fathers up for a game and show them the campus in real style.

Fathers are the honored guests on November 13 when State takes on Richmond. Students who have never given their fathers a guided tour of the campus would do well to invite them up for the event.

The event along with homecoming can do a lot to promote our Alma Mater. Invitations are being sent out by G.C. but the best invitations are not printed or engraved.

Represented for National Advertising by NATIONAL ADVERTISING SERVICE, INC., College Publishers. Representative, 420, Madison Ave., New York, N. Y.

Entered as second class matter, February 10, 1920, at the post office at Raleigh, North Carolina, under the act of March 3, 1879.

Once again our musical notes have brought us together, and this time, we seem to be engulfed with the info. on one of the greatest jazzmen ever to take the spotlight. His name—Stan Kenton.

Stan needs no introduction. To those of you who like him and have followed his music, he is a well-known figure. To those of you who dislike him, you know of his qualities.

Stan is truly a versatile artist of "Progressive Jazz." His "Progressive Jazz," being a new form, has met with much resistance by skeptics and much support by connoisseurs.

The dynamic personality of the maestro is reflected in all his works. No one in the annals of contemporary jazz can meet with the tireless efforts of Kenton. While trying to create a strong interest in the art of jazz, Stan is rightfully placing upon this contemporary music the honors it should have.

Kenton plays both for dancing and listening. It is my belief, shared, I'm sure, with many others, that he should stick to the latter. The writing that Bill Russo has done for the band, the collective playing of the ensemble, and the intricate bits expressed by the magnificence of the maestro have put the band on an untouchable level.

What makes the band sound different from many other jazz bands? One reason is the rhythm section. In most bands, the rhythm section plays together. In Stan's band—no. Kenton very seldom plays with the band; and when he does, his piano is sometimes far to one side of the bandstand.

The Kenton band has recorded all types of music from "Pagliacci" to "City of Glass." Regardless of the type; the talent of the maestro, his musicians, and arranger is reflected in the flow of notes steadily sent forth.

The Kenton band has not always played a progressive, non-rhythmic sound. Throughout the years, with accumulated knowledge, deeper thought, and collective ideas, the maestro has discovered and unearthed this more liquid form of jazz.

If you have never listened closely to any of Stan Kenton's recordings, take my advice and do so. See if you can translate its sound into a (Continued on page 3)

Maurice had a little shirt

A pome by Ogden Gnash

Maurice had a little shirt
A sport-shirt, don't you know?
And everywhere that Maurice went
The shirt was sure to go.
(He was crazy about it.)

He'd wear it first to English class
From thence to Physics Lab
He found himself, like most young men
Quite fond of his VAN GAB.
(Van Heusen's famous rayon gabardine.
A real darby!)

He'd wear it when he went to bed
Because he liked nice things,
And Van Gab's special "finish"
Makes it soft as angel's wings.
(Mrs. DiMaggio's)

He'd wear it in the shower
And his roommates thought him daft
But he knew that it was washable
And so he merely laft.
(Certified completely washable, even
for commercial laundries, by American
Institute of Laundering. No bull.)

He loved its Sportown collar,
Fine with tie and fine without.
He was made for Van Gab's colors,
Each one's virile—have no doubt!
(Maury bought Van Gab in all 15 shades)

Note: It also has new Vanafit sizing, which means sportshirt comfort with dress-shirt fit. A great idea in a \$4.95 shirt but not easily rhymable.

\$3,100 Awarded In Textile Scholarships

Jack A. Goldfarb of the Union Underwear Company, Inc., New York City, and the Underwear Institute, Inc., of New York City, a trade association of underwear knitting mills, have established a scholarship and a research fellowship in knitting—valued at a total of \$3,100—in the School of Textiles at North Carolina State College.

Announcement of the creation of the two academic awards was made by Dean Malcolm E. (Sandy) Campbell of the college's School of Textiles, who expressed appreciation for the scholarship and fellowship and said the awards will spur progress in textile education and research at the school.

Dean Campbell also announced that C. Douglas Blanchard of Burlington, a top-ranking senior at the School of Textiles has been selected as the scholarship winner and that Roger L. Pruitt of Millbrook, N. C., and Odessa, Texas, who is working toward a master's degree in textile chemistry at the school, has been chosen to receive the research fellowship.

Under the terms of the new program, Blanchard will receive \$600 and the School of Textiles will receive \$600 from the scholarship fund. As the fellowship recipient, Pruitt will be awarded \$1,000, and the School of Textiles will receive \$900.

The School of Textiles, Dean Campbell said, will invest \$1,000 of the funds that it receives in equipment to be used by the students in conducting research in knitting under the scholarship and fellowship.

Blanchard is president of the Tompkins Textile Council, top-level student organization in the School of Textiles; president of Delta Kappa Phi, honorary textile fraternity; and vice president of Kappa Tau Beta, knitting fraternity. He is also a member of Golden Chain, senior honor society, and is on the "Dean's List."

Pruitt, recipient of the fellowship, received his B.S. degree from Texas Technological College in Lubbock, Texas, in 1952 and enrolled last month as a graduate student in the School of Textiles at North Carolina State, where he is seeking a master's degree in textile chemistry. Following his graduation from Texas Tech, he worked for a short time in 1952 for Burlington Mills in Greensboro. He left Burlington Mills for two years of active duty in the U. S. Army Quartermaster Corps, spending most of his Army service in QM research and development work at Fort Lee, Va.

French Professor Is Visiting Scholar

Dr. Maurice Valet, professor of electronics at the Faculte Catholique des Sciences in Lyon, France, has arrived at North Carolina State College for a three-month stay as visiting scholar. Dr. Valet has come to this country on a Smith-Mundt grant-in-aid through the International Educational Exchange Program. This marks his first trip to the United States. While at N. C. State, the visiting scholar plans to undertake research in industrial application of electronics, his principal field of work. He also has a special interest in color television. College officials have given Dr. Valet the privilege of auditing classes, consulting with faculty members, and using research facilities of the School of Engineering.

Officer: "Are you interested in a commission?"

Recruit: "No, I'll work on a straight salary. My aim's not so good."

You never can tell how far a couple have gone in a car by looking at the speedometer.

My girl friends drinks nothing stronger than pop. But then pop drinks darn near anything.

The editorial and business staffs of the Agromeck, student yearbook at State, are now busily engaged in preparing this year's edition which is scheduled for delivery next May 1. Pictured here are the chief officers of the Agromeck, one of the largest publications of its type in this part of the country. Top row, left to right: John N. Gregg, editor; and Donald M. Joyce, business manager. Bottom row, left to right: William H. Brehm, class editor; Dick Barney, chief photographer; and James Thorne, associate editor.

MUSICAL MOBILES—

(Continued from page 2)

message meant to be conveyed to the world-wide audience of Stan Kenton.

And now it's time for us to spin our musical mobile and be off for another two weeks. When we meet again, it will be within the covers of a terrific album.

NOTICE

Homecoming plans are being completed by the sponsoring organizations which are Blue Key, Golden Chain, 30 and 3 and the Monogram Club, societies and fraternities are urged to start preparing their entries in the parade and to submit their candidate for Miss Wolfpack.

"Am looking for two enterprising salesmen who want to earn \$12-15 for every \$9 investment. This item is just what your classmates want at a price they can't resist. For information send stamped, self-addressed envelope to 403 Mangum, Chapel Hill, N. C."

"Hell, yes," said the Devil picking up the phone.

N. C. State vs FSU

State's grid team fresh from a very impressive 26-0 upset of William & Mary last week, will be looking for its second win in a row this Saturday night when they open a three-game home stand with the Seminoles of Florida State University at 8 p.m. in Riddick Stadium. The Seminoles should provide some real firewood for the home forces, as they have racked up a total of 99 points against their last two opponents; a 47-6 win over Louisville, and a 52-13 rout of Villanova. The Pack, however, after three straight losses, finally broke loose and chalked up its first win of the season. The battle Saturday night will mark the third meeting of the two teams with the young series standing at one all. The game is generally rated as a toss up with a slight edge given to the visitors from Florida State. Pre-game activities will include an "Operation Spirit" formation by the College's Army and Air Force ROTC units. Students will be admitted through their Student Activity Books, and date tickets may be picked up on Saturday night prior to game time at the ticket office for \$1.50.

Circus to Perform at Halftime

Saturday night's festivities will be highlighted by the appearance of the Florida State student circus, the only one of its kind in the nation, which features trapeze acts, acrobatics and a bevy of clowns. The circus is made up of students from Florida State and will perform at halftime.

Freshman basketball Tryouts

Freshman basketball coach Vic Bubas again urged any freshman interested in trying out for the 1954-55 freshman squad to drop by Room 120 in the Coliseum and register. Practice will begin later in the fall.

Soccer Team Open 1954 Schedule

After playing two pre-season games against Fort Bragg, State's soccer team travels out-of-state to officially open its 1954 schedule. The Pack split the two game series with Fort Bragg losing 5-1 and then handing the Fort Bragg outfit its first loss in three years, 3-2.

State is scheduled to meet Roanoke College of Friday and the University of Virginia on Saturday then returning home with a Tuesday afternoon date with Duke University at 3 p.m. and a 10 a.m. engagement with last year's ACC soccer champions, the University of Maryland on Saturday. The public is invited to come out free of charge. All home games will be played on the baseball field behind the coliseum.

Football

S.A.M.-31, Lambda Chi-0

The S.A.M.'s just seem to have done every thing right as they turned a football game into a track meet and crushed the Lambda Chi's 31-0. Quarterback Jerry Gaier was the field general for the SAM's as he passed for two TD's and ran a pass interception back sixty yards and another score. Gaier's capable receiver was Bob Giddins who on another play swept around end to pay dirt. Herb Weiss added the final tally for the strong SAM grid forces. Sontag and Maclaire were standouts in the forward wall.

Sigma Nu-26, Sigma Pi-0

Sigma Nu copped its second straight win in as many starts as they shut out the Sigma Pi's 26-0. Bob Loy chose the air lanes and found the range as he hit Honeycutt, Allin, and Hall for three TD's respectively. Honeycutt hauled in a stray Sigma Pi pass and galloped seventy yards for the final score. The line play was led by Green, Wilson, and Fisher and have managed to hold te opposition scoreless all year.

PKA-6, Kappa Sig-0

The PKA's were held scoreless for three and a half quarters by a determined Kappa Sig squad before finally hitting pay dirt in the final minutes of the fourth quarter thus copping a hard fought 6-0 victory. End Ed Woolard hauled in a long pass from Dick Smith for the TD.

SAE-14, SPE-0

The SAE's got off to a sluggish start in their season's opener against the SPE's. Midway the second quarter, the SAE's pushed the opposition back for a two-point safety, and in the closing minutes of the first half Jim Wheat scampered thirty-five yards for a TD thus making the score 8-0. The SAE's, last years champions, added an insurance tally in the last quarter when Wheat passed to Stuart for the final TD and a 14-0 victory over the SPE's. Gregg, Burton, and Welch stood out on defense for the winning SAE's and Cochran, Moore, and Fuller were the main clogs in the SPE's efforts.

Two teams won by forfeit, the K.A.'s over Farm House and PKT's over TKE's.

Volleyball

Sigma Chi over SPE's

The Sigma Chi's led by Gene Cocks made it two in a row as they downed the SPE's 15-6, 15-1. Thorpe stood out for the SPE's.

Sigma Nu over PKP's

Sigma Nu won the first game from the PKP's with little effort 15-2, but had to get down to some real work before copping the second 15-12 and thus winning the match. Mowery was Sigma Nu's main threat while Bagwell stood out for the losers.

PKA's over PKT

The PKA's swept two straight games from the PKT's by 15-1 and 15-4 with Ayers and Wollard doing the most damage for the Pika's and Bill Hawkins for the PKT's.

Kappa Sig over F. House

The Kappa Sig's won two hard fought contests from the inspired volleyball squad of the Farm House by 15-12 and 15-5 with Thomas leading the way for the winners and Young for the losers.

SAE's over AGR

AGR went down in defeat before the forces of the SAE's by the

Pack vs Florida State Home For 3-Game Stand

Locals Fresh From 26-0 Win Over W-M; But Seminoles Tough

N. C. State's surprising Wolfpack, upset winners 26-0 over William and Mary last week, will face a high scoring Florida State eleven Saturday night at 8 p.m. in Riddick Stadium in its first home appearance of the season.

The invading Seminoles, who have scored 99 points in their last two outings, operate out of an intricate I-formation offense, which places all four backs directly behind the center in a straight line.

The Seminoles, coached by Tom Nugent, dropped their first two games to Georgia and Abilene Christian, but bounced back to whip Louisville, 47-6 and Villanova, 52-13. The passing of Quarterbacks Harry Massey and Len Swantic have accounted for nearly 400-yards and seven touchdowns.

The Wolfpack's demolition job on William and Mary last week certainly didn't follow the form sheet, which had the Tribe labeled a solid 14-point favorite. Not only did the win break a 10-game losing streak for State, but it was the first shutout of an opponent since 1951 when the Wolfpack topped Davidson 31-0.

Hard-hitting John Zubaty, junior halfback from Blairsville, Pa., is currently the top rusher for State with a 5.1 yard average on 33 carries this year. He'll be one of the Wolfpack big guns against Florida State along with Halfback George Marinkov, the Atlantic Coast Con-

ference's leading kickoff return artist, Fullback Don Langston and Quarterback Eddie West.

In front of this quartet is an improved Wolfpack line, led by Guard Mike Nardone, who set up two scores against William and Mary with a fumble recovery and an intercepted pass, Ends Harry Lodge and Henry Brown, Tackle Ben Kapp, Guard Al D'Angelo and Center Dick Tonn.

The Dorm Corner

BY TERRY HERSEY

THREE YEAR STREAK ENDED

When the Bagwell No. 1 "Dragnets" were defeated by the players from Alexander No. 1, it was their first defeat in three years. Also it was the only time that Bagwell No. 1 was scored upon this year.

The Bagwell Dragnets were ahead 13-0 at the half. These touchdowns were made on pass plays by Scott, the first going to Sebastian and the second to Keen, while Pearson made the extra point. But in the third quarter Keels made a touchdown and Shavlik making the extra point. During the last few minutes of the game Mitchell made a TD and it was followed by the extra point by Bell. The line work of Davis and Seaman was the strong part of the "Dragnet's" defense but it wasn't enough.

Becton No. 1 over Alexander No. 2 Becton No. 1 started on a wild rampage in the first quarter and had set their sights on a score of 100-0. But when the second team was sent in the game, the Alexander decided that they had had enough.

The whole team was outstanding and Whitley, Warrens and Gay were playing their very best. Whitley scored 25 pts. The final score was 60-0.

Syme No. 1-Stadium over Turlington No. 1

The Stadium Studs made a terrific comeback after losing 6-0 last week. The Studs were in the Turlington No. 1's territory most of the game and finally won the game with the score of 26-0. The highlight of the game was when Faust blocked a kick on the ten yard line and recovered for a score. With the passing of Green to Wilkins and Jones, it was hard for Turl. to stop the next few T.D. Davis on the Turlington team was their best player.

(Continued on Page 5)

United Fund Drive To Be Held Oct. 24-30

This year there will be one and only one campaign for charitable purposes on the State College campus, according to the ruling of the Council of Student Government. This drive will include all the causes of the United Fund of Raleigh and Wake County and the World Student Service Fund, known locally as the Frank P. Graham Fund for Indonesia.

President Lloyd Cheek has appointed a committee, chaired by Harry Welch, to work with Ed S. King of the YMCA (appointed by Dean J. J. Stewart) in making plans for the drive. Andrew Hinton, President of the Interfraternity Council, has appointed a committee of three to work with him in making plans for the fraternities to participate. It is expected that I.D.C., Alpha Phi Omega, the Baptist Student Union, the Wesley Foundation, the Lutheran Students

Association, the YMCA and other organizations will work on the drive. Any organizations willing to help is asked to see Harry Welch or E. S. King. The job is a big one and more help is needed.

The drive will be conducted the last week in October.

The World Student Service Fund is a student-faculty project and it is organized in this country on a nation-wide basis, to help the students and faculty people in the "have not" nations. Last year the amount given by State College students, faculty and friends amounted to \$1,288. The highest amount ever given from State was \$2,400 in 1947-1948.

The percentage of the total student contributions going to the United Fund of Raleigh and to the World Student Service Fund will be determined by the Student Government Committee.

State Prof. Elected To Hold Mason Office

C. B. Shulenberg, professor of economics at N. C. State College and a leader in Raleigh civic affairs, has been elected general grand conductor of the General Grand Council of Royal and Select Masons, an international Masonic body.

His election took place at Asheville, where the council closed its three-day 25th triennial assembly Wednesday. Professor Shulenberg, now in his 28th year as a faculty member at N. C. State, is the first North Carolinian to be named a council officer in 30 years.

Long a top-ranking Masonic official, Professor Shulenberg was grand high priest of the Grand Arch Royal Chapter of North Caro-

lina, 1952; and has presided over all the local York Rite bodies. He is a 33rd degree Mason of the Scottish Rite.

An alumnus of Columbia University, Professor Shulenberg is a chapter member of the Raleigh Torch Club, a member of the Raleigh Kiwanis Club, a member of Phi Kappa Phi, and is listed in "Who's Who in America." He also is listed in the publication, "Who Knows and What."

Other Raleigh Masonic leaders attending the Asheville assembly included Dr. Charles P. Eldridge, past grand commander; Prof. Ross Shumaker, past grand master; and Harrison Kauffman, an officer in the North Carolina Grand Council.

The next assembly of the General Grand Council of Royal and Select Masons will be held at Sun Valley, Idaho, in Sept., 1957.

DORM CORNER—

(Continued from Page 4)

GRIDIRON SCORES FOR THE DORM

Tucker No. 1, with Elliott as the most valuable player, beat Turlington No. 2 by the score of 33-0. Turlington No. 2 put up a good defense with Peterson as a strong player but it wasn't enough. Gatlin was the outstanding offense for Turlington.

Welch-Gold-Fourth, with its light backfield, was able to beat Vetville 13-6. The passing of Garrabrant to Luck and Hannah was responsible for the TD. Vetville's Glenn Buff was the outstanding offense and defense man.

Syme No. 2 won a quick victory over Owen No. 1 when they forfeited.

The "Dragnets" and the Vets Win in Volleyball

Bagwell No. 1's "Dragnets" are back in the volleyball race with two wins to offset the loss of last week. Their first game was against Becton No. 1 which they won 15-5 and 15-12. Their second game was against Turlington No. 1 which they won 15-2 and 15-8. The outstanding players in both games

were Killian, Scott, and Keen, with the spiking of Killian setting the pace for the team.

Vetville won their first game by forfeit of Welch-Gold-Fourth, the second game was a long battle between them and Alexander No. 2. The final scores were 15-2 and 15-5. The whole team of Vetville was outstanding.

Tucker No. 2 was beat by Becton No. 2 by the scores of 16-14 and 15-13. The scores indicate how evenly matched the two teams were. Becton's outstanding players were Sherrill and Jones. While the Seitz, Wagner and the rest of the Tucker team played good ball. Tucker No. 2 did better in their game with Turlington No. 1 when they swept to two 15-0 victories.

Owen No. 1 lost its first game by forfeiting and the second by a hard fought battle against Welch-Gold-Fourth. The final scores were 15-10 14-16 and 8-15, with Welch coming out in the last two games to win.

SQUARE CIRCLE

By Dixon

Quoting Art Quint: "I couldn't get lost if I wanted to."

Wolf tale: Freshman went home over the week end, spent Saturday evening's early hours at the local drug store listening to home town cronies deriding State College's football fortunes. Just before radio-game-time the scorners began to rub salt into said freshman's wounded vanity by suggesting he show his school spirit with a small wager on the upcoming football contest. First he was offered State College and 14 points, then 18 points, 20 points, 24 points and finally State College and 28 points. Each time the jokers offered another point their laughs became more loud. As a final insult one wisecracker suggested the freshman take State College, no points, and get 28 to 1 odds. This was too much for our hero. He pulled out a five of, put up or shut up, money. The smart money boys put up a like five and a joint IOU for \$135. Freshman says he won't press the IOU. He's already had \$135 worth of fun and just wants to hold on to it for the future.

Vetville citizen was showing off some World War II souvenirs to neighbors recently. Picking up a new German P-38 pistol, he remarked, "this has never been fired." A young Korean War veteran asked innocently, "Well, how do you know it will shoot?" Older vet, who got the Purple Heart in Africa and picked up clusters at Normandy and the Battle of the Bulge, eyed young vet silently for a moment, then replied, "The Germans never made a gun that wouldn't shoot."

CAMPUS HEADLINES

A recent feature in the Richmond Professional Institute (of the College of William and Mary) Postscript was headed this way: "Frosh To Get Brothers, Sisters." Yes, but does mother know.

Carolina's Daily Tar Heel was at it again with: "Tell 'Em Right Address, Say Chapel Hill Postmen." Can't blame Carolina students for wanting to keep their whereabouts secret.

Old Gold and Black over at Wake Forest says: "Seminary Plans Gift For Wake." A case of Irish rye would be appropriate.

University of Maryland's Diamondback claims: "Football Fundamentals Found Easy To Explain to Girls." Well, what have you got to say about that, Jim?

The Salem College Salemite front-paged a back-to-school story with: "Teddy Bears, Record Players, Anxious Parents Escort Confused Freshmen To Salem Orientation." Teddy bears, yet. If those gals are confused that much how can Salem help them?

FRAT INTRAMURALS— (Continued from page 4) count of 15-5 and 15-7 as the SAE's opened their season.

SAM's over PEP's The PEP's copped the first game from the SAM's 13-15 but were unable to shave off a last minute rally by the SAM's who took the

final two games, 15-8 and 15-5 thus winning the match.

Lambda Chi over Sigma Pi Led by Smathus and Duffat the Lambda Chi's took the first game, 15-12, dropped the second, 11-15 and stormed back to take the third and final game 15-12.

SPORT SIDELINES— (Continued from page 4)

Coach Eric DeGroat has returned a host of last years stars including two ACC all conference selections, Norman Norris and Aqurreuirosin Carlos. As well as Jim Gillean, and Bobby Sykes plus two freshmen standouts Earl Baxter and Wakin Escobar.

Wrestling Practice and Tryouts

Coach Al Crawford announced that wrestling practice will begin on Monday October 18th and from 4 to 6 each afternoon afterwards in the wrestling room in the coliseum. Anyone interested in trying out for the freshman or varsity squads is asked to come by the field house Thursday and Friday of this week to pick up equipment, etc. Coach Crawford urged all new boys to come early so the fundamentals of the sport can be taken up.

Southern Engineer Delivery This Week

A general meeting of both the editorial and business staffs of the Southern Engineer will be held in the SE office, 318 Riddick, at 7:30 on Tuesday, October 19. Any freshmen or upperclassmen interested in joining the staff are invited to attend.

The staff has announced that the October Southern Engineer, featuring several student-written articles, will be distributed to engineering students during the coming week. The magazines will be delivered to rooms of dorm residents, while off-campus students may pick up their copies in departmental offices.

What makes a Lucky taste better?

"IT'S TOASTED" to taste better!

Doubtless, you've guessed that the Droodle at the right is: Careless two-gun cowboy enjoying better-tasting Lucky while waiting in ambush. Lots of other two-gun cowboys—and many millions of no-gun folks—agree that Luckies taste better. Students, for example, prefer Luckies to all other brands, according to the latest, biggest coast-to-coast college survey. Once again, the No. 1 reason is that Luckies taste better. They taste better because Lucky Strike is the cigarette of fine tobacco . . . and "It's Toasted" to taste better. "It's Toasted"—the famous Lucky Strike process—tones up Luckies' light, mild, good-tasting tobacco to make it taste even better. So, enjoy the better-tasting cigarette . . . Lucky Strike.

LUCKIES TASTE BETTER Cleaner, Fresher, Smoother!

Engr. Students Win Enka Scholarships

Three students in engineering at North Carolina State College have been awarded American Enka Corporation scholarships for the current academic year, Dean J. H. Lampe of the School of Engineering announced.

Winners of the \$400 scholarships are M. Barnes Daniels, Jr., Thomas M. Lynam, and Ronald B. Estridge. The awards are presented annually to outstanding students in chemical, civil, and mechanical engineering to be applied for tuition and other fees.

"Again it is our pleasure to assist the School of Engineering at State College in its most commendable objective of providing qualified young men with educational opportunities," M. Wade-witz, vice president for manufacturing of the American Enka Corporation, said in presenting the scholarship awards.

This is the second year for Daniels and Lynam, both seniors, to hold American Enka Corporation scholarships. While juniors in the School of Engineering, they were awarded the scholarships, and because of their continued high scholastic standings, the American Enka Corporation has elected to continue their financial aid.

Daniels ranks second in his class of 96 mechanical engineering seniors. In addition to his high scholastic standing, he is active in extra-curricular activities. He is a member of Phi Eta Sigma, freshman honorary society, and Pi Tau Sigma, honorary mechanical engineering fraternity. He is also a member of the student chapter of the American Society of Mechanical Engineers and was elected to the Departmental Honor Committee.

Lynam, a civil engineering major and president of the Senior Class, has maintained a better than "B" average while at State College. He received the Chi Epsilon annual award for scholastic achievement during his sophomore

Marine Corps Seeks Officer Candidates

The Marine Corps Officer Procurement Officer has announced that applications are now being accepted from students who desire to earn a commission in the Marine Corps while completing college.

Freshmen, Sophomores and Juniors, pursuing a course of study other than pre-medical pre-dental, theology, pharmacy or music, are being selected for the PLATOON LEADERS CLASS. All training is conducted during two six week summer classes. Candidates receive \$149.05, as pay, for the first class and \$183.45 for the second class. Uniforms, food and travel allowances are also furnished. Members of the PLATOON LEADERS CLASS are deferred from induction. Commissions are tendered upon graduation from college.

Seniors and graduates may apply for the OFFICER CANDIDATE COURSE. Commissions are tendered upon graduation from college. He is an active member of the student chapter of the American Society of Civil Engineers and participated on the State College varsity soccer team.

Estridge, a junior in chemical engineering, received the Phi Kappa Phi award for completing his freshman year with high honors. He is a member of Phi Eta Sigma and the student chapter of the American Institute of Chemical Engineers.

are tendered to candidates who successfully complete a ten-week training class after graduation from college. Mid-term graduates are now being enrolled for the 13th OCC which convenes in March 1955. Candidates eligible for the 13th class must be graduated by 15 Feb.

Training for both programs is conducted at the Marine Corps Schools, Quantico, Virginia. Successful candidates are appointed to commissioned rank in the U. S. Marine Corps Reserve and must agree to serve on active duty for three years.

Officers commissioned through either program are initially assigned to the Officer Basic School, also at Quantico, for five additional months of instruction. Many officers then receive specialist training in various fields including aviation, artillery, tracked vehicles, supply, engineering and others.

Anyone interested may see or write to Captain F. R. Hittinger, Jr., Officer Procurement Officer, Room 537, Peachtree-Seventh Building, N.E., Atlanta, Georgia.

Judging Team Places Sixth In Nation

The N. C. State dairy cattle judging team placed sixth in the National Intercollegiate Dairy Cattle Judging Contest held at Waterloo, Iowa.

The three North Carolina State College engineering students, pictured above, are the 1954 winners of American Enka Corporation scholarships, valued at \$400 each. Left to right: Moses Barnes Daniels, Jr., Route 1, Wilson, senior in mechanical engineering; Ronald B. Estridge, High Point, junior in chemical engineering; and Thomas M. Lynam, Morganton, senior in civil engineering.

Dr. J. W. Pou, head of the college's Animal Industry Department, said the team's ranking in the national competition was the highest any State College team has ever attained in the Waterloo event.

The N. C. State team placed fourth in all Holstein classes, sixth in all Brown Swiss classes, and ninth in all Jersey classes.

The team, coached by Dr. W. Ray Murley of the Animal Industry Department, is composed of John Fuquay, Richard Harris, Hubert Cartner, and William Sparrow.

The State team won second place in the Southern Intercollegiate Dairy Cattle Judging Contest held last week in Memphis, Tenn.

Therefore when his case was announced, the youth swaggered up to the bench, waved airily in a gesture of goodwill, gave the judge a big smile and quipped:

"Hi-ya, Judge! How goes it?" The judge smiled and said: "Fine!—ten dollars."

The G-string worn by a fan dancer is called a fan belt.

If you drive for the sheer zest of it
 you owe yourself
 this hour!

If your hands rejoice in the precise balance of a fine gun or the sweet response of a racing sloop . . . then you owe yourself an hour with the Chevrolet Corvette.

You'll find it is, quite literally, like no other car in the world—a heart-lifting blend of the true sports car with all that is best in American engineering.

There is the velvet smoothness of a Powerglide automatic transmission (but with the classic floor selector-lever).

The trouble-free durability of a Chevrolet "Blue-Flame" engine (but with three side draft carburetors to unleash its flashing 150 horsepower).

The ruggedness of an X-braced box girder frame (but with the astonishing impact resistance of a glass-fiber-and-plastic body).

Luxurious seating for driver and passenger in deep foam rubber (but cradled in the traditional security of bucket seats).

Generous luggage room, the panoramic sweep of a deeply curved windshield, the flair of tomorrow's styling (but within the polo-pony compactness of a real road car).

The Corvette blends all this and more. For it is a driver's car . . . a low-slung torpedo with a center of gravity only 18 inches above the concrete . . . with outrigger rear springs that make it hold to the road like a stripe of paint . . . with a 16 to

1 steering ratio that puts needle-threading accuracy at your finger tips.

Frankly, the Corvette is a "limited edition," made only in small numbers. It is intended only for the man or woman to whom driving is not just transportation but an exhilarating adventure, a sparkling challenge to skill and judgment. If you are one of these, then you owe yourself an hour with a Chevrolet Corvette.

Call us now and let us set up a demonstration run . . . for in a short 60 minutes you can discover that motoring has a whole new dimension of delight.

Make a date to drive the

Chevrolet Corvette

150-h.p. overhead-valve engine with three side draft carburetors • Four-leaf outrigger springs in rear • Powerglide automatic transmission • Center-Point steering, 16 to 1 ratio • Form-fitting individual seats • Full instrumentation, with tachometer, oil pressure gauge, and ammeter.

LITTLE MAN ON CAMPUS

by Dick Bibler

"I thought perhaps you didn't know—there are three higher possible grades besides 'D' and 'F'."

"Mill" Does Research On 105-m-Mortar

A new "now it can be told" story has emerged from the School of Textiles, North Carolina State College, as the result of recent declassification of security information on the nature and results of a military-research project conducted by the School for the U. S. Army Ordnance Department in 1952 and 1953 under security wraps.

During the recent Korean war, the Army Ordnance Department awarded a contract to the School to develop a new type of powder bag for the 105-mm. mortars that were being used in Korea for the first time. Previous mortars, as the 60 mm. and 81 mm. types, did not use powder bags, but instead used powder in sheet form that was inserted into the fins of the mortar. Sheet powder was not practical for the larger mortars, however, and the use of powder bags posed several problems that the School was asked to solve.

The bags for the new-type mortar had to be strong enough to hold the powder without tearing, closely enough woven or knitted to prevent fine powder pellets from going through the cloth, waterproof enough to keep the powder dry if the shells and attached bags were exposed to heavy rain in military operations, and completely combustible so that no glowing fragments would be left in the mortar barrel after each firing that might prematurely ignite the next round. The bags also had to be constructed from textile materials widely available in case of emergency, and designed so that they could be filled easily in a powder-loading machine.

Further, a means had to be developed to attach the bags to the mortar boom throughout the rough handling that ammunition can be subject to in transport, and, at the same time, that would permit the bags to be easily removed or replaced in order to control the range of the shell. In designing a means of attachment, the School of Textiles was instructed to keep in mind that the soldier doing the job might be wearing heavy gloves.

Completion of the research project required nearly a year and a half and frequent liaison between researchers at the School of Textiles and Picatinny Arsenal. The final result was a chemically treated coated cotton fabric that met

The famed radio and TV show, Dragnet, has been adapted for presentation on ice and will be one of the principal features of "Ice Capades of 1955" when the big ice show is staged in the William Neal Reynolds Coliseum at North Carolina State College Nov. 2-6. Pictured here is a scene from the Dragnet number.

New Series Of Nite Classes

A new series of evening classes to be given by the N. C. State College Extension Division at High Point College will begin Monday night (Oct. 11).

The two classes beginning Monday are "Production Control" and Shop Mathematics. The classes will be held from 7 to 10 p.m. Monday evenings for 10 consecutive weeks, for a total of 30 hours of instruction.

Instructors will be staff members of the Industrial Engineering and of the Mathematics Departments of State College.

The subjects to be included in the production control class are planning, routing, scheduling, dispatching, and inspection functions in industry. The course will give instruction in organizing the movement of materials, operations of machines, and performance of labor to control and co-ordinate quality, quantity, time, and place.

The practical course in shop mathematics deals with making mathematic computations by the quickest and most accurate methods. In addition to computations of fractions and the manipulation of decimals, the use of the slide rule will be included in the course.

Registration will be held Monday night from 6:30 to 7 p.m. in Room 5, Roberts Hall, High Point College.

Vetville Students Make Ends Meet

BY DORENE LEWIS

(Editor's Note: The following is the last installment of a four-part feature on life in Vetville.)

"The fellows here are all pretty much alike" is a remark heard often in Vetville. It is not unusual to see a future engineer or architect hanging out the family laundry while a sun-tanned toddler passes the clothes pins.

Very few of these men fail in college. The sentiment of most of them is expressed by Loddie Bryan of Sanford, a student in the School of Design, who says: "In my case I have a child to support. You just have to be more serious when you have responsibilities."

Loddie is taking care of their baby girl while his wife, Evelyn, works as a laboratory technician at the Nelson Textile Building. He is awaiting a job to begin next month with the Agriculture Department. "I'm trying to make tuition for next year. My G.I. Bill has run out, but I can just about

make it with both of us working this summer," he estimates.

Most of the boys use up their G.I. allotment before they get through school, he believes, especially those in five-year courses like designing.

In referring to the housing at Vetville, Loddie says, "I feel fortunate in having this, but I believe some money appropriated by the State to establish permanent housing for married students would be worth while. It would be an incentive to married men to come to school."

Added responsibility has not kept the men of Vetville from winning their share of academic honors. Billy Oliver of Selma, a resident of Vetville until his graduation in June, won the award as the outstanding student of the year. He was also president of the Student Government of the college.

The problem of Vetville men upon graduation is not in finding a job, but in deciding which job to take. Many industries send interviewers to State College, and a large number of students accept positions before graduation. Others wait until after graduation to explore opportunities.

In a world of growing competition, the men see the need for continuing education. No longer does the young man whose education has been interrupted have to postpone marriage and a family—not if he has a plucky wife like the working wives of Vetville. Some of the women whose husbands are finding jobs after attaining the B.S. degree are already wondering if there will be housing for them when their husbands get ready to return for the M.S. or Ph.D.

"Is your roommate broadminded?"

"Say, that's all he thinks of."

D. H. Hill Library

D. H. Hill Library Sports New Layout

BY TERRY LATHROP

One of the biggest improvements that has hit the State College campus in years has been overshadowed by its more spectacular nextdoor neighbor. But as those who have used it know, the new D. H. Hill Library is a tremendous improvement and a terrifically beautiful and functional building.

The exterior of the building has probably caught the eye of nearly everyone on campus, but to really appreciate the library you've got to take a look inside.

Coming through the big glass front doors, which are on the side away from Hillsboro Street, one is first struck by the softly modern "decor." Maroon is the predominant color with blonde furniture. It's cheerful but still restful and has none of the drab "library look." The first feature one notices is the big new circulation desk. It's practically as long as the main room of the old library used to be—in fact so long I'd personally advocate roller skates for the staff. This is the place where you check out books from the stacks and receive information about the rest of the library.

To the left of the circulation desk and main lobby is the "reading-for-pleasure" area where current novels and interesting books are placed on open shelves and home-town newspapers are at hand. In this area and in the big west study room smoking is permitted

to add to your pleasure. There are lots of big easy chairs and sofas here for your comfort, too. The atmosphere here is just about as close to the living room at home as you could get.

On farther back to the left is the big west study room. This room is equipped with big tables to set your books and equipment on and big comfortable armchairs to set yourself on. All the current periodicals are arranged in neatly labeled shelves down one side of this room and there are bulletin boards carrying news of national, local and college interest. There is soon to be a huge globe in this room for the aid of all you geographers. Smoking is permitted here too, with the staff's request to use the ash trays and save the tables.

Finding and ordering books is no longer the chore it used to be. The card catalogues have been expanded and are set up in an enlarged area to the right of the main lobby. This is brilliantly lighted and has tables with stools for added convenience in going through the cards.

The all-important reference room is in the east end of the library, with Mr. Wilson in charge. It has

been enlarged and is much easier to use that it previously was. All the reference books are right at hand on the tables or in shelves. There are stools at the reference tables to save you the trouble of carrying the books all around trying to find a place to work. Books and information on nearly every subject are quickly available.

The documents room is next door with Miss Poole, the documents librarian, on hand to give any help needed. All government documents and pamphlets plus many other types are cross-indexed in the files in this room and there is even a viewer for those on microprint.

These are the main functions of any library but our new one offers many more. To mention just a few, there is the room on the second floor, number 232, which contains a rental typewriter. Keys are picked up at the main desk and this is available at any time. There are plans to install lockers where you may leave your belongings safely between classes to save carrying them from, for instance, Pullen to the Textile Building. There is room 319, the undergraduate study room, which is furnished with comfortable

easy chairs and sofas for quiet study. And the big bins outside the main doors for returning books after-hours are really nice, but don't get any ideas about fine-dodging—they'll get you anyhow.

The library has many more new features, but it is difficult to do them justice. Information on the Visual Aid room, the map room and all those blank doors on the second and third floors is available at the desk.

We have a beautiful and terrifically useful facility in our new library. It will give service for many, many years to come. Remem-

ber though, it is ours and it is up to us to show our appreciation of it by treating it as a personal, quite treasured possession. There are darn few rules, but following them will help a lot.

Give this place a trial. So maybe you do associate libraries with book worms, you did come here to get an education and this is one aid that is hard to over-look.

I say "Bravo!"
