STATE FRESHMEN LICK CHAPEL HILL

Second and Third Teams Given Opportunity to Show Mettle

The State Freshmen had little trouble piling up a 50-to-6 score on Chapel Hill High, with the first team playing only the first and fourth quarters.

In the initial period, when Chapel Hill kicked off, Rackley ran the ball back 35 yards to Chapel Hill's 45-yard line. They carried the ball across the goal line in four plays.

The High School lads then received the ball, but were forced to punt on the fourth down. Rackley caught the punt and ran 65 yards for the second touchdown. The Freshmen then kicked off and held Chapel Hill for downs. After being penalized 15 yards for holding, the Freshmen ran some pretty interference for Rackley, who clipped off 40 yards for another touchdown. The quarter ended with the Freshmen on the ball on Chapel Hill's 1-yard line.

The second quarter found a new Freshman team on the field, with the exception of Rackley. This period the teams were fairly well matched, the Freshmen, however, scoring one touchdown.

In the final period the first team was sent back into the game, and scored two more touchdowns, making the final score 50 to 6, the Freshmen succeeding in making the extra point only twice.

Crabtree and White for Chapel Hill did some pretty work when the former passed to White, the latter running 60 yards for a touchdown.

Those doing work above par for the Freshmen were: Rackley, Johnson, Shuford, Murphy, Seawell and Mayo.

COACH HARRY HARTSELL

HEAD COACH IS AN ALUMNUS OF STATE

Numerous and Varied Experiences Excellently Fit Coach For Duties Here

(By John W. Harrelson.)

Coach Harry Hartsell came to the North Carolina State (then A. & M.) College from Asheville and entered the Freshman Class in 1908. He was graduated in May, 1912, with the degree of Bachelor of Engineering in the Electrical Engineering Course. After graduation he played professional baseball for one season and then entered engineering work. In 1916 the athletic officials of the State College found him directing athletics in the Porter Military Academy. The State College football team was having a very disastrous season in 1916, and Hartsell was offered the position of head coach, which he accepted in mid-season. Coach Hartsell remained with State until he entered

war work in 1918, returning to State again in 1921.

About ten years ago some of the alumni of State College began to talk of a definite athletic policy—a State College athletic policy—with an alumnus in charge of athletics. The selection of Harry Hartsell as head coach in 1916 was the first result of our hopes for State College athletic policy. The World War frustrated our plans for more than two years. After the close of the war efforts were again made to put athletics in State College on a sound basis, and finally, in January, 1921, State again secured the services of Harry Hartsell as Director of of Athletics.

(Continued on page 2.)

WAKE FOREST TO COMMEMORATE LIFE OF MAYNARD

Aviator and Minister to be Honored by His Alma Mater

Wake Forest, Nov. 2.—The life of Belvin W. Maynard, famous Flying Parson, will be appropriately commemorated by his Alma Mater when a large bronze marker bearing his name is unveiled here on November 24th. The marker, which is 17 1/2 x 24 inches, will be placed in Vinget Memorial Hall as a permanent recognition by Wake Forest of his greatness as a pioneer in the art of flying and his service as a minister of the gospel.

As a flyer Maynard established three remarkable records. In 1918 he set the world's "loop-the-loop" record at Pomerantin, France. In 1919 he won the New York to Toronto and return air race, and late in the same year he won undying fame as an aviator by winning the first trans-continental flight from New York to San Francisco.

Maynard's spectacular work as an aviator has obscured in the eyes of many his work as a minister, but those who knew him best say that his ministerial duties were always foremost in his mind. His prime thought was to prepare himself to be a minister, for which he first entered Wake Forest College in 1914. After leaving Wake Forest he rendered patriotic service to his country as an aviator during the war and at the same time took an active part in evangelistic work and Y. M. C. A. duties. Several times since the war he made efforts to return to Wake Forest to complete his ministerial studies. In 1920 he registered, but was prevented from returning by his inability to obtain a house in Wake Forest. Not to be deterred by this obstacle, however, he sought to have a house built for his family, but was not able to carry this project through.

While it is not definitely assured as yet, it is hoped that the members of Maynard's family, including his father, will attend unveiling ceremonies. Old Gold and Black, the college weekly, will issue a Maynard memorial edition during the week of November 3d.

WANTED TO KNOW

A girl can swim much better than a man, but why is it that every time one goes swimming she must have a man teach her anew?

If a girl is wealthy the wart on the end of her nose is never noticed.

WHITFORD WINS ALPHA ZETA MEDAL

Stands Highest in Classes During
Freshman Year

The first Alpha Zeta scholarship medal to be awarded to a student of North Carolina State College went this year to Larry A. Whitford, a sophomore student, of Silverdale, Onslow County, North Carolina. The medal was presented by Mr. W. C. Mock, a member of the Alpha Zeta Fraternity, before the student body as it was assembled for chapel exercises. In order to receive the medal, Mr. Whitford had to stand highest in his classes for the entire first year, in the Agricultural Department. Mr. Whitford is a graduate of Craven County Farm-Life School, where he graduated as valedictorian with the class of 1920. He taught school a year and then entered the Freshman Class here in the fall of 1921. Since he has been here Mr. Whitford has been an example of the ideal student, taking part not only literary society work and Y. M. C. A. duties, but also working a part of his time to help pay his college expenses.

Henceforth the Alpha Zeta medal will be given annually to the Agricultural student standing highest during the first year's work. The Alpha Zeta Fraternity is a national organization for the raising of the standard of scholarship in agricultural schools, and it was through the local chapter that this medal was awarded.

"What is the hen making all the fuss about?"

"She just laid an egg."

"What's she running for?"

"She is trying to beat it."—Ex.

Head Coach is an Alumnus of State

(Continued from page 1.)

The State College and the alumni are very fortunate and glad to have Harry Hartsell in charge of athletics. He is just the type of man needed to tell and show young men what it takes to build real character and win athletic contests. He made letters and stars in football, basketball, baseball and track. He did not win these honors on his size. It was by hard work and that indefatigable spirit done up in 160 pounds of bone and muscle that made him the equal or superior of all others on the athletic squads. He was always ready for the game, entered with a smile and played in the spirit of a true sportsman. Each game was played with the demeanor becoming a Southern gentleman and with the determination that at the close of the game no fouls could be charged to him. No coach excels Hartsell in teaching his men to play the clean game, a thing so essential in building a character that will succeed in the days to follow the college life.

Here is how one woman cured her husband of swearing: He came home early one evening to do some garden work, and said: "Mary, where is that d—d spade?" He almost fainted when she sweetly replied, "I'll be d—d if I know, John."—Ex.

A DIALOGUE

Time—Before the day of automobiles.

Place—On any country road.

She: "Isn't so grand to be alone?"

EDITORIAL

All is not bird that twitters.

Good-bye, Meredith, we hope you like it over there in the country.

We are glad to notice that The Twig is able to be out again.

V. M. I.'s Flying Squadron evidently had the greater fuel supply.

Our business manager is rather sluggish and seems to have the blues—Queen's Blues, perhaps.

Profiteers may make a rake-off occasionally, but to keep on doing it they must have prophet ears.

If anyone thinks that the R. O. T. C. is not functioning, they should look Anderson over carefully.

Barbers are now using a compound containing honey for a hair tonic. Honey makes the hair grow.

The Student Council lets most leggers go as they like on the campus, but the line is drawn on bootleggers.

The outstanding feature of Sutenfield's talk on "Humidity in Cotton Mills" was that he didn't have a dry subject.

Perhaps you had noticed that we had adopted the one-column editorial system, as suggested at the association convention.

Mr. King, our Y. M. C. A. Secretary, has become so wrought up about the Russian Relief that he is about to take up the Russian belief.

"What sort of foods will we eat in the next century?" innocently asks The Literary Digest. We shudder to think what it will be by that time.

It is all right to make oneself feel at home, but we have our opinion of the editor that put his head in the waste basket because it made him think that he was in jail.

Some guy had the nerve the other day to come along and say that we had mixed the editorial column and the joke column. Why, the idea! Don't you know we always put stuff with a point to it with the jokes?

The boys of N. C. State were very fortunate last Sunday afternoon to hear the noted speaker, Channing H. Tobias, International Secretary of the Negro Y. M. C. A. His message was straightforward and very attractively worded. His subject was the much discussed question of race relations, and although what he said was not so new to us, the manner in which he said it, and the general highly cultured manner of the man, went far toward driving home his message. What the country needs for a better understanding between the races is more men like Mr. Tobias.

The Editor and Business Manager attended the meeting of the Collegiate Press Association at Meredith College last week, and gained a good many new ideas. Speakers of the highest type available made interesting lectures on the subjects peculiarly applying to the work of the college journalist, and carried the prospective newspaper men and women right up to the future field of the newspaper business. The Meredith hosts are to be commended for their great hospitality, and we feel sure that in saying this we are joined by every delegate that was there. The Association meets next spring at Queen's College, in Charlotte.

No doubt we have mentioned it before, but a good thing deserves much speaking, so we are again bringing up the question of athletics for the average student. The teams are more or less limited in their scope, and cannot reach everyone, because of the intensive methods taught. But it would be easy to have some push-ball games or some dormitory tugs-of-war, or anything that gives good exercise and creates a spirit of rivalry. Many universities have the equipment for these things, and since the cost is comparatively small, there is no reason why we should not have it, too. Why doesn't someone get busy and see what can be done?

Whether or not we are going to have some material for football next year was definitely settled last Saturday, when the Freshmen staged a regular walk-off with the boys from Chapel Hill High School, who are supposed to rate among the highest in the State. After the first few rounds of the game, the men were changed rapidly in order to give all a chance to show the stuff they were made of. The bleachers were filled almost as though there was a varsity game on, and the visitors and students were given plenty of thrills. The usually difficult forward pass was executed again and again with the precision of veterans, and the line plunges and end-runs with organized interference were of a type that would do credit to the best of teams.

The novelty of seeing old acquaintances, and of renewing old friendships, has worn off, the freshmen are safely ensconced in their caps, and things have taken on the air of normalcy generally, so we are taking the liberty of suggesting that there should be less noise in the dormitories during study hours. Naturally, there are some nights when one doesn't have much to do, but the fellow that lives next to you may have a "full house" coming the next day, or may be working hard to make up work that he missed while away with the team, or a thousand things. You may have a good new phonograph, or a mandolin that you can jazz like an old hand at the business, but the other fellow probably doesn't have the time or inclination to listen to it. We are our brothers' keeper, after all—let's think of that.

The chapel program is undergoing a renovating, and an entirely new system is being perfected as rapidly as the work can go on. The plans are including arrangements for a student orchestra containing, in the words of one of the committee of affairs, every instrument that has been known since the days of Noah's Ark. Noted speakers from this and other cities will give lectures, and singers will be secured whenever possible. The purpose of chapel is, of course, to give one at the beginning of each day the inspiration necessary for him to have for the tasks that follow, and if the previous exercises have not been effective in doing this, it is hoped that the same accusation cannot be brought against the present program. The successful conductance of the exercises requires the wholehearted support of all the students. Let us always strive to make these exercises both educational and inspirational.

FROM GILBERT'S

DE MAGNETE

"WORD MONGERS" and "CHATTERING BARBERS"

"Word mongers" and "chattering barbers," Gilbert called those of his predecessors who asserted that a wound made by a magnetized needle was painless, that a magnet will attract silver, that the diamond will draw iron, that the magnet thirsts and dies in the absence of iron, that a magnet, pulverized and taken with sweetened water, will cure headaches and prevent fat.

Before Gilbert died in 1603, he had done much to explain magnetism and electricity through experiment. He found that by hammering iron held in a magnetic meridian it can be magnetized. He discovered that the compass needle is controlled by the earth's magnetism and that one magnet can remagnetize another that has lost its power. He noted the common electrical attraction of rubbed bodies, among them diamonds, as well as glass, crystals, and stones, and was the first to study electricity as a distinct force.

"Not in books, but in things themselves, look for knowledge," he shouted. This man helped to revolutionize methods of thinking—helped to make electricity what it has become. His fellow men were little concerned with him and his experiments. "Will Queen Elizabeth marry—and whom?" they were asking.

Elizabeth's flirtations mean little to us. Gilbert's method means much. It is the method that has made modern electricity what it has become, the method which enabled the Research Laboratories of the General Electric Company to discover new electrical principles now applied in transmitting power for hundreds of miles, in lighting homes electrically, in aiding physicians with the X-rays, in freeing civilization from drudgery.

Splinters From The North Carolina Pine

TRUE, AFTER ALL

Prof. Browne: "Mr. Harwell, what is meant by the back electromotive force of a coil?"

Harwell: "That is the electromotive force that you get back when the current reverses."

PERHAPS SO

A sophomore, seeing the list of those freshmen who were going to be taken on the free ride, asked what it was all about. When enlightened, he exclaimed: "Oh, I thought those were the ones that rode on examination!"

TOO LATE, THEN

A woman never realizes that the worst has happened until the salesman says: "We have charming models in 'stouts.'"—Atlanta Constitution.

A FAULT OF THE DECEASED

Her Second Husband: "You're always complaining! It wasn't necessary for you to remarry, you know, Madam."

Wife: "Yes, I know I was wrong to remarry. And if only my husband had been with me when you proposed, he never would have permitted it."—Literary Digest.

UNPROFITABLE

Two Hebrew merchants met in the street.

"What's this I hear?" said the one. "You had a big fire at your place."

"Oh, no," said the other, "it isn't going to happen until next week. But how about you? You're insured, too, aren't you?"

"Yes, I carry both fire and hail insurance."

"I can understand being insured against fire, but I didn't know anybody could make it hail."—Literary Digest.

AND ALWAYS IN STYLE

Why are school teachers like Ford cars? Because they give the most service for the least money.—Life.

PLENTY LATER

"I shall like to share all your trials and troubles, Jack, darling."

"But, Daphne, dear, I have none." "Not now, darling; I mean when we are married."—Passing Show.

ONE FROM MANY

Willie Mock: "You know, I love you; will you marry me?"

Sweet Thing: "But, my dear boy, I refused you only a week ago."

Mock: "Oh, was that you?"

At ninety miles
Drove Edward Shawn;
The auto stopped,
But Ed kept on.

ONE WAY OUT

"Father, I need a new riding habit."

"Can't afford it," he growled.

"But, father, what am I going to do without a riding habit?"

"Get the walking habit."—Boston Transcript.

ACCOMMODATING

Freshman Clement (all out of breath, after a three-block chase after the water wagon): "S-say, Mister, your wagon's leaking!"

TOO BAD

"The follies man will commit over women! It's terrible!"

"Why, what did you do?" "I married one."—Life.

Flub: "Say you had a shower bath last night?"

Dub: "Yes, I sat on the front seat while Anderson was speaking."

SERBIAN ENGLISH

Miodrag Mrshevitch (imitating Shaw quartet): "I got shoes, you got shoes, we got both shoes."

TO PHYSICS (WITH MY LOVE)

Junior M. E. Engineer: "Do you have Vaughan in 'Heat Engines'?"

Would-be Junior M. E.: "No, but I would like to have Derieux in one."

A SAD BIRD, OR JUST PATHETIC?

"Purty Boy" Ferguson: "Why does Professor Browne look at me over the top of his glasses?"

Co-ed: "Because the MAGNIFIED view is too much for his tender heart."

JUST IN TIME

Little Johnnie, who had been praying for some months for God to send him a baby brother, finally became discouraged. "I don't believe God has any more little boys to send," he told his mother, "and I'm going to quit praying."

Early one morning not long after this he was taken into his mother's room to see twin boys who had arrived in the night. Johnnie regarded them thoughtfully for some minutes and then remarked: "Golly, it's a good thing I stopped praying when I did!"—Exchange.

The world is either better or worse each day as a result of your work and influence.

If the world is benefited by the service you render, you are bound to be—there is no power that can rob you of the good which comes from the good you do—likewise, none that can protect you from the harm which comes from the harm you do.

The world—your world—is not measured by the reach of your arm nor the horizon of your vision, but by the never ceasing influence of your thoughts and acts.

These are always making ripples on the surface of time, and those ripples are eternity spreading beyond your most distant expectations.—Selected.

Some folks order their bodies cremated just to cheat the Devil of his dues.

"Hey, Dub, what's your hurry?"

"I am going after a divorce. My wife hasn't spoken to me for six months."

"Better be careful, old man. You may never get another wife like that."—Ex.

THE Y. M. C. A. STARTS ON ITS EXPANSION PROGRAM

Experts in "Y" Work to Make Survey and Offer Recommendations; Luncheon Friday Night

The local Y. M. C. A., under the supervision of the Secretary, E. S. King, has started on its work of expansion and making its program more effective to a greater number of men. The Board of Trustees of the Association, Dr. Riddick, the Promotion Force, Y. M. C. A. officers and Cabinet will meet with Mr. Harry Comer and Mr. Roy L. Vail Friday night at a luncheon, to go over the plans for this survey.

Messrs. Comer and Vail have been invited by President Riddick and the Board of Trustees of the Y. M. C. A. to make a thorough study of the field at N. C. State and make recommendations for improvement. The board expects to double the efficiency of the "Y" here.

H. F. COMER,
Secretary of Y. M. C. A., U. N. C.

Mr. Harry Comer was educated at Vanderbilt and is an all-round Christian man. He is a member of the A. T. O. Fraternity. He was in "Y" work at Georgia Tech. for five years; in the U. S. Air Service overseas; State Student Secretary for Tennessee; two years secretary at the University of North Carolina, and is claimed by the men in the field to be one of the best student secretaries in the South. Mr. Comer comes to us for a few days to help us put on our bigger program.

Another man who is an expert in the Y. M. C. A. field is Mr. Roy L. Vail, the State Boys' Work Secretary for North Carolina. Mr. Vail is a college graduate—a product of the Middle West; he also took a special course at the University of Illinois. He had special training in the Baltimore City Association as Boys' Work Secretary and Recreation Director. Mr. Vail is considered one of the strongest "Y" men in the South, and we are sure he can help us solve our problems here.

DR. W. C. RIDDICK,
President N. C. State College.

Dr. W. C. Riddick has always given his liberal support to the Young Men's Christian Association at State College, both personally and officially. "Above all things," says the President, "State College should turn out Godly men." Therefore he is backing the Y. M. C. A. program to the limit. The "Y" also has a sincere friend in his beloved wife.

EXCHANGE NOTICE

The following exchanges have been received this week: Guilfordian, Guilford; Queen's Blues, Queen's College; Trinity Chronicle, Trinity; Davenport Weekly Record, Davenport College; Ring Tum Phi, Washington and Lee; Lenoirian, Lenoir College; Pennsylvanian (dally), University of Pennsylvania; Gamecock, University of South Carolina; Old Gold and Black, Wofford; Richmond Collegian, University of Richmond; Diamondback, University of Maryland; Piedmont Owl, Piedmont College; Purple and Gold, Raleigh High; Carolinian, N. C. C. W.; Furman Hornet, Furman University; Flat Hat, William and Mary.

Anyone desiring to see these will find them on the Exchange Table in The Technician office.

Professor (on Plant Propagation): "Mr. Dixon, when is a plant pot-bound?"

Dixon: "When you can't get it out of the pot."

* * *

Professor of Economics: "Satterwhite, let's assume that you worked for \$40 per month clear of all expenses last summer. Would you work for the same next summer?"

Satterwhite: "No."

Professor (trying to illustrate a certain principle): "Well, then, what would you do?"

Satterwhite: "I'd bootleg."

NEGRO "Y" SECRETARY SPEAKS AT N. C. STATE

Pleads For Appreciation For Talent of Southern Colored People

(News and Observer.)

A word picture of the Southern Negro, not as an industrial asset, but as a literary and artistic asset, was presented by Channing H. Tobias, International Secretary of the Negro Y. M. C. A., speaking at North Carolina State College under the auspices of the Y. M. C. A. there. At the same time Channing plead for a continuance of the splendid spirit of co-operation now extant between the two races in the South.

"The negro students are sympathetic, open-minded and eager for co-operation," the speaker said. "They expect that whenever a negro does something worth while that he be given the credit he deserves. I realize that I speak to the men who will occupy high positions in the economic, social and political life of this State, and I appeal to you to be tolerant and just and to respect personality in a brown, yellow or black face. I have no sympathy with a narrow appreciation of sectional or national life, and I believe in a policy of all men up the world over."

The speaker was introduced by Secretary King of the State College Y. M. C. A. "We are sending missionaries to China and to the isles of the seas," he said, "but this will not avail us anything if we do not give the negro of the South a square deal. We are hypocrites if we do not set our house in order in a broad spirit and accord every man a Christian tolerance."

"P-LEG" BROWN

Clyde Brown, better known as "P-Leg," was back on a visit to the college during fair week, to attend the fair and Carolina game.

Many students remember Mr. Brown as a member of the two year Agriculture course. After finishing his course last year, he went home to assist his father in managing a 975-acre farm. Since his only brother is taking a medical course, "P-Leg" will gradually assume more responsibility of the farm in his father's older days. His many friends at college are looking forward to a great success for him, and the great influence he will have over the farmers of Western North Carolina.

Mr. Brown with his class-mates put on a float in the Agricultural Engineering Department last year that won first prize in the fair. Due to his course in agriculture and training in putting on a fair, he has been elected president of the Madison County Fair. This is no little job, and it shows how the people "back home" value a man's ability and training that may be obtained at State College.

Such organizations as the Agricultural Club and State College Fair offers training, which will make students more useful in the future, that cannot be had in any other way.

The club has a financial scheme for raising money to carry on the fair in the form of a corporation. It is based on sound business principles. There are now for sale 50 shares of preferred stock at \$500 a

RADIO SENDING STATION OPENED

W. L. A. C. Means "We Lead All Colleges"

This radiophone station WLAC of which a suggested interpretation of the arbitrary government call assigned to the station is "We Lead All Colleges," was formally opened Monday evening, October 16, as a State service to the people of North Carolina, by Mrs. Edith Vanderbilt, President of the North Carolina Agricultural Society.

The station is becoming an instrument by which the following services may be transmitted to the individual citizens throughout the State; Concerts and recitals from the Raleigh Auditorium, the three girls' colleges, and the State College band; Agriculture and stock market reports; Agriculture extension news items; Federal and State weather reports; Reports of all State College Athletic contests; and monthly industrial reports for the North Carolina Bankers Association which are made on the twenty-eighth of each month.

At the formal opening of the station the following subjects were presented to the people of North Carolina from the college station:

Law Enforcement—Governor Cameron Morrison.

The Influence of the State Fair—Mrs. Edith Vanderbilt.

International Application of the Radio—Josephus Daniels.

North Carolina's Highways—Commissioner Frank Page.

Value of the Radiophone to Education—Dr. E. C. Brooks.

Radio and the Farm—Dr. B. W. Kilgore.

Connection of State and Capital—Mayor T. B. Heldridge.

Conclusion—Dr. W. C. Riddick, President of the College.

share at 7 per cent interest. At the end of five years the share will be worth practically \$700. This is a good investment for the man with money, and aids the fair at the same time.

NIGHT SCHOOL

H. C. ("BUD") FISHER BREAKS ALL PREVIOUS MESS HALL RECORDS

Has Endured State College Mess Hall Fare for Three Years and More

Until Saturday noon, October 14, 1922, "Bud" Fisher had not missed breaking bread with the N. C. State College boys at the college mess hall since his arrival here as a freshman, three years, ten months and thirteen days ago. This includes all Summer Schools and Christmas holidays.

"Bud" says that the reason for missing this was that he got on the wrong street car, and before discovering his mistake he was well on his way down Glenwood. Of course, his friends will always believe that he was "straying," and that it wasn't a mistake.

He is to be commended by all for being the proud possessor of this title of mess-hall champion, which clearly demonstrates that he can pass the test for endurance.

Why are so many marriages disappointments or failures?

'Cause the partners in the concern are generally taken at face value!

PINE BURR SOCIETY HAS BULL CONFERENCE

P. G. Owen Leads in Aerial and Gas Attack

At its last meeting the Pine Burr Society had one of the most interesting programs that it has had in several moons. If the program had been carried out, it would have been great, but in its infancy it was turned into a game of bull football by the leading exponent of that team, Mr. P. G. Owen. Mr. Owen voted to receive, and on the initial kick-off he raced the ball back for four touchdowns and three field goals. This sudden start fairly took the breath of the on-listeners, but since there was plenty of heated air present near the field of action, they soon recuperated. The game, after this spectacular beginning, settled down to a regular demonstration of old-fashioned football of that particular type. The defense gave up the struggle after the kick-off, and the team scored at will. The ease of handling the visiting team was so apparent that one of the scrub players, Mr. J. W. Harrelson, was put into action and made a very good showing. With a little training he will become a power in the backfield. His forward passes were executed perfectly, and everyone of them was pounced upon by the wonder, "Flash" Owens, and resulted in a touchdown. After a succession of these plays had put the game on ice, an opportunity was given the scrub player to show the stuff he was made of in the actual regions of the enemy. While in this position he made some brilliant end runs and uncorked some new plays that had not been seen in these parts before. His runs were slightly more graceful than those of

the speedy Owen, but they lacked that air of experience that characterizes the play of the varsity man.

Summary: Time of playing, three hours; headlinesman, Cloyd; touchdowns, Owen 68, Harrelson 5; try for point, Clay (failed); safety, Provident Life Insurance Company; equipment, gas masks and smelling salts; timekeeper, Fountain (he lost it entirely); attendance, too great.

'T isn't life that matters! 'T is the courage you bring to it!—Fortitude.

A jay-bird cannot become an eagle by borrowing a few eagle feathers.—Lewes.

POET'S CORNER

BARNYARD BLUES

When the old cow bawls in early morn,
Restless and hungry, awaiting her meal,
The frost lies thick on the haystack new,
And the corn leaves ring like tempered steel.

When the executive cock drops from his perch,
In the broad barn door he takes his stand.
A stream of fog from the nostril spirts,
And the door's iron latch stings a tender hand.

The pigs on the hay still sleeping at ease,
Till the morning sun in the trees has sped,
Till the frost on the pumpkin vine is clear,
And the sourwood leaves again gleam red.

When the old horse neighs for his whiff of hay,
Prancing and beating his stable wall,
The atmosphere has lost its quiet,
Broke by the hungry duck's first call.

When the sheep push through the tethered gate,
Stealing a bite from the late corn patch,
The old hen clucks with an air of pride,
That her long sought brood at last is hatched.

When the birds sail swift to the granary door,
From the old log trough by the open well,
When the farmer's axe strikes a frozen knot,
The chilled blade rings like a distant bell.

Above the noise of fowl and steed
Is the farmer whistling a merry note,
Sailing at ease on life's great sea,
In the quietest waters, in the safest boat.
CLINE.

WHY THE CITY?

A breath from childhood daisy fields
Comes back to me again,
Here in the city's weary miles
Of city-wearied men.

Why live in the clustered place?
And miss the early morn,
If you are used to the populace
Where love and sympathy are born?

Just what the city was made for
I cannot see therein,
It makes the men of nature sore,
And they are the only men.

As for myself, I'd like to be
On some big country farm,
A milking the cows and chickens
With a muscle on my arm.
WALTON.

RIPPLE, End,
N. C. STATE

BE GREAT TODAY

My life is so little, my vision so small,
Compared with those who have heard
manhood call.

I am but a dwarf when I should be a
giant,

I am so cowardly when I should be
defiant.

In my mind always planning of won-
ders to do,

But doing them never—instead, leav-
ing them to you.

I wonder if there is hope for a fellow
like me,

Who thinks of what in the future he
will be.

The future, it is ever, I need not
worry now,

I'll be a man some day, although I
know not how.

To the heights of the ladder, step by
step, I'll climb,

Until my name is honored, having
reached the heights sublime.

Great deeds I will do then—then,
but not today,—

Why should I work when all I seek is
play?

Thus I go on each day, thinking what
greatness I'll see,

But never stopping a moment to
think when the start of this
greatness shall be.

Today is the time to be great, my lad.
This minute, not tomorrow or next
year!

Each day whole-hearted our lives we
must live,

And learn not to get, but to give.
This day is the time when to all we
must show

That we are men, real heroes, to the
core.

Now is the time our greatness to be-
gin,

To live, to do our best, for evermore.

PROFANITY

(By Dr. Frank Crane.)

The trouble with profanity is not so much that it is wicked, as that it is just plain dirty.

It is not so much that you shock religious people as that you disgust decent people, that we object to it.

Swearers are behind the times. They are hold-overs from a former century.

Nowadays anybody who swears is set down at once as being coarse and vulgar.

The young man who wants to succeed needs to take advantage of everything that may help him on. And swearing will be a black mark against him in any job he may have.

And if he wants to associate with the right sort of girls he must keep his talk clean.

Nobody wants a swearer in the office, nor in the workshop, nor on the train, nor in the hotel. The only place swearing fits is the saloon.

Swearing means you don't know how to talk. Your vocabulary is limited. It is the sign of ignorance.

Swearing means weakness. You will notice that forceful men, whose words carry weight, use simple, plain words.

When you swear it shows your impotence. It is the petty refuge of the helpless. If you can help a thing, help it; if not, keep still; anyway, don't swear.

Swearing has bad kin. It goes with ignorance, brutality, cruelty, drunkenness, licentiousness, viciousness, and anger. And you can tell a habit by the company it keeps.

Swearing that is the sudden, impulsive exclamation is not so bad compared with swearing that has become a vile habit. And when a man gets the habit of sprinkling oaths through his speech constantly he ought to be tied out in the barn with the pigs.

To abstain from swearing does not mean you are a sissy. It simply means you're decent.

To show you are manly, you don't have to have a dirty face, nor black finger nails, nor greasy clothes, nor tousled hair. You can be manly though clean. And you are not showing any manliness by filthy talk.

Even if you want to hurt anybody's feelings, or insult anyone the worst way, use plain English; it hurts much more than curses.

Altogether, swearing is a useless, unclean, and offensive habit.

Quit it!

(Reprinted by special permission to The Technician.)

Some people can do mighty big things in a darn little way!—Harold Bell Wright.

The man who is always borrowing money is just about as unpopular as the fellow who never has any to lend.

Heck: "What is a vacuum?"

Fresh: "Er-er-er, 'Fessor, I got it in my head, but I just can't tell you."

It would be a whole lot more gratifying if a grudge were all that some people owed you.

**ENGINEERING EXHIBIT
AT THE STATE FAIR**

Interesting Display by the Asheville Chapter and State College Student Branch of A. I. E. E.

Although not as extensive and thorough as originally planned, the engineering exhibit at the State Fair was a decided success. It was expected that various chapters of the A. A. E. throughout the State would assist in the exhibit, but the Asheville chapter and the State College Student Branch of the A. I. E. E. were the only ones to have men on the scene.

The part of the exhibit that proved to be the drawing card was the Tesla Coil. This instrument was loaned by the State College A. I. E. E. and operated for the most part by Karl Glenn and Elmer King. The Fair visitors were very much interested in finding out how even a million volts could be harmless under some conditions. That it was harmless was adequately proven by the demonstrators, who took the current at this high voltage into and through their bodies.

Of interest to all was an exhibit showing the development of the wireless from the time of its first commercial application until the present day. To demonstrate the modern radio, concerts were broadcasted during the day from the large State College station, WLAC, and picked up at the Fair Grounds. The concerts and the smaller station in the Engineering Exhibit received its full share of attention.

Other exhibits, put on by the Asheville Branch of the American Association of Engineers, showed the advance made along civil engineering lines from the old Indian surveys in 1760 until the present day. Modern transits, levels and other field equipment, with a complete draftsman's outfit, gave the public a fair idea of the work of the civil engineer of today. Mr. T. A. Cox, Jr., who was in charge of this exhibit, is a brother of Capt. G. C. Cox, State College radio expert.

Topographical pictures, made by Mr. Cox, and pictures showing the improvements of various towns, were also exhibited.

The Health Department of the State furnished an exhibit showing the different types of water filters, and a tabulation showing which towns in the State were using the various methods.

**MEMORY ASSOCIATE
BUSINESS MANAGER**

**Business Manager Consents to Have
Some Aid in Performing Duties**

Mr. D. T. Memory, a Senior Architectural student, has been chosen by the Business Manager as his associate in the numerous duties that daily present themselves to that official. Since the beginning of the weekly paper at the first of the year, the work of the business department has been too much for one man to do, but no one was chosen because of the thought that the work would get lighter as the rush of the first few issues passed. However, it was found that the work continued to be too great, so Memory was chosen as associate manager. Mr. Memory has expressed his interest in the paper several times and has borne out the statement by coming to the office and working at anything that presented itself, and since his appointment to the new position has taken an active part in solving the business manager's problems.

What we like determines what we are.—John Ruskin.

FRESHMEN, NOTICE!

I wish to emphasize the necessity of paying the class and Agromeck fees as soon as possible. All of us must co-operate with Mr. Elms and get this matter over with. We want to get the thousand-dollar section of bleachers up right away, and we can't do it without the support of every member of the class. Please see Elms or his committee at once.

E. C. YORK,
President Freshman Class.

"I hear you have given up drinking."

"Yes, I found that liquor was harming me in many ways. Besides, since I have given it up I have been able to save money. Every time I wanted a drink I put the price of a quart in the bank. At first I made several deposits a day. After checking up this morning I found that I had \$2,344.53 in the bank."

"Good! Could you lend—"

"The bank went broke this morning and I have started drinking again. Don't know where we could get a drink, do you?"—Ex.

WHY ARE YOU AT STATE?

Do You Know?

Why-are you coming to college? Is it in order that you may secure an education which will enable you to make more money and work less? Or is your purpose that of preparing yourself for a greater sphere of usefulness to your fellowmen? Did you come here to have a good time, to fool the "old man," and to keep from working? If you are doing this the majority will regret it in the future. A man is a fool to cut his own throat, yet some fellows here are doing that very thing.

We are a select few—only a comparative small number of boys have the opportunity of a college education. Let us bring ourselves to a realization of the wonderful opportunities that are placed here for our benefit, grasp them, and make our stay at State a profitable one!

SID.

Opportunities pass your door every day. Don't wait for them to come in and drag you out. Go out and grab 'em.

BARNYARD PHILOSOPHY

By
Sidney Pureblood

Your personality is what you make it.

If I make a failure of a piece of cloth I can take more material and make another piece; but if I make a failure of life I cannot live again. Therefore, I must make a success of life!

It is easier in the long run to play the game of life fair.

Is your work hard? Then it must be worth something.

Be wholehearted in all that you do. The hypocrite is always despised.

Don't think about what people will say; think only of whether it is right!

Religion that cannot be applied to business is not religion, it is hypocrisy!

There is no great project or enterprise in all the world that was not first a dream.

Keep "running on high" and "hitting on all six."

Time is the most valuable thing you have—treat it as such!

Let all actions and words come from the heart.

Are you simply a machine, or are you a force, filled with driving power?

I do not know that I will ever be a master of others, but I do know I must be master of myself!

The men who think are the ones who rule the world.

There is no one on God's whole earth who can do your thinking as good as you can do it yourself.

**TIT BITS AND
RANDOM WITS**

By Britt

Any girl P. B. meets:
"Is she very pretty?"

"Pretty? Say! when she gets on a street care the advertising is a total loss."

* * *

"Say, porter, did you find fifty dollars on the floor this morning?"

"Yes, suh." Thank you, suh."—
The Brown Jug.

* * *

He: "Do you think your father would be willing to help me in the future?"

She: "Well, I heard him say he felt like kicking you into the middle of next week."—Tit Bits.

* * *

Hub: "What a glorious spring day! I could dare anything, face anything on a day like this."

Wife: "Come on down to the milliner's."—The Watchman Examiner.

TRY IT

Do you ever feel like raving,
After all, what's the use?"
And the whole world seems to knock
Instead of giving a boost?

Do you ever get to the place
Where nothing seems worth while,
And everything you face
Wears a frown instead of a smile?

If you do, there is something wrong,
And the best way to put it right
Is to light your face with a smile
And stick right in and fight.
