Are There Privileged Classes At State College?

Ever since the traffic fines against two of State's basketball team became public news two weeks ago, comments have been directed at the college and its traffic policy from every direction imaginable.

Local newspapers have discussed the fines in various columns, sports writers have covered them thoroughly and even the news services have used the story. They have not all expressed an opinion in the matter, and the opinions expressed or implied have been about half and half, pro and con. They have either sympathized with the athletes over the size of their fines or agreed with the college that correct action was taken.

Information received yesterday from a reliable source said that high state and University officials have requested that action be taken before such heavy fines are allowed to accumulate in the future.

We feel that all the publicity and concern that this action has received is entirely unwarranted. It is our opinion that if these fines had not been levied against members of State's basketball squad, there would have been little if any notice from the newspapers and, therefore, no notice from other sources.

As the majority of State students know, the court is not what it has been inferred to be . . . a "kangaroo court". The members have an appointive position and a job to do . . . and it is not pleasant . . . hearing the appeals of students who have violated the parking and traffic rules at the college. They are peers of the students . . . and theirs is the responsibility of disciplining their fellow students for violations of rules made by the student legislature.

Our point is this. We do not feel that the fact that the fines were issued against State basketball players has any significance. These fines would have been placed on us or any other State student who willfully violated the parking regulations repeatedly at the rate of two dollars per violation. All indications show that the students involved had no excuse for their violations and that their attitudes in the matter made sustaining of their appeals difficult, if not impossible.

We are, frankly, tired of hearing the whole mess aired. If the boys concerned had followed the school regulations they would not have been fined. They did not and they received exactly the same treatment any other student would receive. As Mammy Yokum says, "Nuff sed!"

Student Conduct Criticized

Jim Nolan, President of the Student Government, issued a statement last night regarding the conduct of State student crowds in the Coliseum during the last few ball games.

Information which reached The Technician said that Coach Verett Case of the State basketball team also wished to make a statement concerning the conduct, but The Technician was unable to reach him last night before press time.

Nolan said, "There has been considerable comment on the discourtesy the State College students have been showing sitting basketball teams and officials. I am sure that we do

not need to be reminded that many people from all parts of the state have their only contact with the student body at athletic meets. Let's make a concerted effort to show our best side to all visitors, be they players, officials or fans, by treating them as we would want to be treated if we were the visitors."

"Good sportsmanship," he continued, "must be exhibited by the students as well as the players. We recognize our prerogative of disagreeing with the officials, but when such criticism becomes vindictive, if reflects upon the whole student body. Don't let personal feelings for our team so blind us that we

do rank injustice to visitors who have come here to play in good faith."

"Courtesy is contagious. Try it."

Jim Nolan, President
Student Government

Consolidated University Day

State Will Be Host To W C, Carolina

It was announced this week by Bob Lane, Chairman of the Consolidated University Student Council at State College, that Consolidated University Day will be held this Saturday, February 9.

Students from State, Carolina, and Woman's College are invited to take part in the activities planned.

Approximately 500 girls from Woman's College in Greensboro are expected and will arrive at 4:00 p.m. at the College Union. Lane said that "we are having 500 girls and hope to have that many boys on hand Saturday evening to meet them."

Immediately following the arrival of the girls from W.C. there will be an informal record dance and social hour in the College Union Ballroom until 5:00 p.m.

Following supper is the State-South Carolina basketball game at the Coliseum. After the game there will be a dance at the College Union featuring Jesse Barbour and his band.

Notice

All juniors are reminded that orders are still being taken for class rings. Those who were not measured for rings when the Balfour representative was on campus can still be measured and place their order by going by Dean Cloyd's office in Holladay Hall.

Beginning Feb. 14

Fraternities To Hold Open House

Beginning one week from today the seventeen social fraternities on the campus will observe open house. All non-fraternity men who are interested in joining or just looking fraternities over have been invited to drop by any or all of the houses.

IFC President, Bill Greene, announced yesterday that the second semester rushing period, which lasts from February 14-17, offers an opportunity for any student who is interested to visit the fraternities here at State.

New Students

There are over 200 new students enrolled this semester; many have had no opportunity as yet to see a fraternity house. In addition to these new students, many students did not visit fraternities last fall because they wanted to wait until second semester before consider-

ing a social fraternity. Greene urged these and other underclassmen to take advantage of next week's program, which runs from Thursday until Sunday.

Interested students are reminded that they are not obligated in any way to any fraternity regardless of the number of times they visit it.

New Fraternity Row

Another point for those thinking about a fraternity at this time to remember is that before they graduate, many fraternities will have built new houses in the new fraternity row, on which work will start, it is hoped, in the near future.

During next week's open house the following hours will be observed by all fraternities: Thursday, Feb. 14—7:00-10:00 Friday, Feb. 15—7:00-10:00 Saturday, Feb. 16—12:00-12:00 Sunday, Feb. 17—2:00-6:00

Covering Campus . . .

Mardi Gras Dance

The College Union Dance Committee will sponsor a Mardi Gras Dance on Saturday, February 23 from 8 to 12 in the College Union Ballroom. Dave Brown's band will provide fine dancing music for you. The Mardi Gras decorations will add to the gala affair.

The dress will be semi-formal and everyone is requested to wear masks to lend a holiday flavor to the occasion. Stags will be admitted to this dance.

Dance Lessons

The Dance Committee of the College Union will continue to sponsor social and square dance lessons again this semester.

The Social Dance Lessons, which will begin Thursday, February 7, at 7:30 p.m. will again be in the capable hands of the teachers from the Lehman Studio. The course is designed to give non-dancers a working knowledge of most of the basic dance steps.

The Square Dance Lessons began Wednesday, Feb. 6 at 7:30. These are designed to appeal both to the beginner and to people who already know how to square dance.

Both of these functions will be held in the C.U. Ballroom.

CU Officers

Any student interested in becoming an officer of the College Union or a chairman of one of the Union's 16 standing committees may now get an application form from Paul Durrett, Social Director, at the Activities Office at the Union.

Valentine Dance

The Junior Class of Averett College, in Danville, Virginia, has invited the students of State College to a Valentine Dance on Saturday, February 9, 1957. The dance will last from eight P.M. until midnight. The dress will be formal, but dark suits will be accepted. Music will be supplied by Bob Cleveland and his band.

Graduate Dames

Dr. Frank Poole, well-known Raleigh pediatrician, will speak on "How to Keep a Healthy Child" at the February meeting of the Graduate Dames. The meeting will be held Monday, February 11, in Room 256 of the College Union. Bring your questions on child care for Dr. Poole to answer. All wives of graduate students are invited to attend this important meeting.

Judicial Board

In an action before the end of last semester, the State College Judicial Board expelled a student from State following charges brought on counts of forgery and lying to a State College official. The trial was held on January 21.

Reading Class

Any student interested in attending a class in remedial reading should attend a meeting next Monday in Tompkins 113. Many students have doubled their reading rate and comprehension by taking this course. The meeting will be at 12:00 noon next Monday.

S. G. Housing Committee Initiates Action To Contact Legislators On Housing

Fred Houtz, Chairman of Student Government's Married Student Housing Committee, said last night that the Committee has initiated steps to contact all members of the current General Assembly about legislation to permit the college to borrow approximately 2,000,000 dollars to erect some three hundred housing units for the use of State's married students.

The project as planned would replace Verville and would provide housing for both veterans and non-veterans.

During exam week, a meeting of all married students and their wives was held in Riddick auditorium. At the meeting, held January 23, over three hundred people heard Dean of Student Affairs J. J. Stewart explain the situation at present and outline the plans of the administration for the future development

of the program. He stated that the married student enrollment has increased about 30 per cent in the past two years, from 894 in the school year beginning in 1954 to 1433 this past fall. Approximately one-half the married students are veterans of either World War II or the Korean War. He said that at present the only school sponsored married housing available is Verville, which will accommodate 244 of the 1433 families.

Chancellor Carey H. Bostian also spoke to the group, expressing his sympathy with the cognizance of the problem and promised his support to their request for married student housing.

A statement prepared by the Committee in conjunction with the Housing Office listed four previous steps made by the ad-

(See HOUSING, Page 8)

Faculty Senate Recommends That Changes Be Made In Diplomas

By David Barnhardt

It was announced late yesterday by L. W. Seegers, Secretary of the N. C. State College Faculty Senate, that the Faculty Senate has recommended that a change be made in the present diploma.

The problem of the diploma change had been referred to the Committee on Student Affairs by the Senate at the meeting of January 8, 1957. This committee met on January 29 for the purpose of discussing the matter—the students' request for a change in the present style of the diploma.

The committee reached the conclusion that "since approximately seventy-five per cent of the present senior class endorse a change in the diploma, this request should be granted. The Committee, also, favored the de-

sign of the diploma recommended by the students."

The report of the committee was presented to the Faculty Senate on February 5, last Tuesday, and was approved by that body after a minor change (which is indicated below in italics).

In the report the committee stated that it felt that both the present diploma and the one recommended by the students "left something to be desired" and it suggested that a restudy of the design of the college diploma might be a worthy project for another committee competent to study diplomas.

This recommendation will now go to the Administrative Council for its consideration. Finally, the recommendations from the Administrative Council, the Faculty Senate, and the students will be forwarded to the Chancellor for further action.

Sitting Down!

State's basketball squad aren't the only ones having troubles in the Coliseum . . . the students are having troubles too.

Not that anything's bothering them . . . more to the point . . . nothing seems to. From all appearances they are a fickle crowd . . . for cheering has hit a new low this year.

Booing and bad sportsmanship seem to have returned in large amounts, too. The old gripes of yelling during a foul shot by a member of the opposition, booing the referees, cheering enemy fouls, etc., are much too much in evidence.

It isn't all the students' fault though. Without leadership, cheering suffers just as other aimless activities do. The cheerleaders have been conspicuous by their inactivity during the past few games. Seems to us like they might get off their chairs and do a little yelling for the team. After all, the team is State's representative, isn't it?

Complications

The announcement of the 1957 football schedule brings forth an interesting point which someone might think about during the next few months.

Since registration has been scheduled for the 21st of September for some months, the complications involved in holding both registration and the State-Carolina football game on the same day should be highly entertaining for those few people at State College who don't try to attend both.

But how 'bout those poor folks who are interested in going to school and the ballgame too? Looking into the far distant future, we can see that it might be possible that State could turn the trick again . . . at any rate it'll be a good tussle.

We wouldn't get in the middle to say who should have consulted who on the scheduling, but the registration office was there first!!!

"WHY, YES—I HAVE YOUR APPLICATION HERE SOMEPLACE."

Letters To The Editor:

During the height of the discussion over the Alma Mater, a contributor submitted the following as a possible substitute. Unfortunately we have never been able to ascertain the person's name, but, believing that such talent should not go unrecognized, we would like to invite the author to step forth and receive the acclaim of all. Here 'tis:

Note: The following is a reprint of Herbert O'Keef which appeared in the editorial by Raleigh Times Editor Times on Monday, February 4, 1957.

- I. They tell us, sir, that we need a song,
Tra-la-la, tra-la-la, la-la-la!
Maybe we've needed it all along,
Tra-la-la, tra-la-la, la-la-la!
The puny tunes of Ray and Fountain
Or Norris's notes as high as a mountain
Are stuff that simply ain't wuth countin'
Tra-la-la, tra-la-la, la-la-la!
- Chorus—
Then lift your voices, loudly sing
Boop-boop-a-doop, and love me tender;
The glories of winter, fall, and spring,
Wau-gau-rac, men, and smash my fender.
Just mention the cinder paths covered in mud,
The contented heifer chewing her cud—
A cow-college ditty that's classy, Bud—
Fifteen Raahs, and it's sure to send 'er.
- II. The diesel's roar and the whistle screeches
Tra-la-la, tra-la-la, la-la-la!
Are heard all the way from the hills to the beaches,
Tra-la-la, tra-la-la, la-la-la!
So scrap 'em, men! Up to the task,
And answer the questions the national basket-
Et-ball rulers and conference horses ask,
Tra-la-la, tra-la-la, la-la-la!
Chorus—
- III. So hop to it, lads, with a Wolfpack howl,
Tra-la-la, tra-la-la, la-la-la!
Kutschinski will love it, cheek-by-jowl,
Tra-la-la, tra-la-la, la-la-la!
Sing out the glory of the engineer,
The lint-dodger shuttling far and near,
The ag-man leading his sow by the ear,
Tra-la-la, tra-la-la, la-la-la!
Chorus—
- IV. We're waiting, fellows, this wondrous rime,
Tra-la-la, tra-la-la, la-la-la!
Now is as good as any old time,
Tra-la-la, tra-la-la, la-la-la!
Let her rip and snort in the college portal
Till every freshman its words can chortle
And make the writer's name immortal,
Tra-la-la, tra-la-la, la-la-la!
Chorus—

Five Years Ago, Feb., 1952

The Student Government Council passed a resolution approving a petition asking for a change in the method used to distribute the "Mop-Up" profits.

State beats Pittsburgh and Villanova, loses first conference game of season to William and Mary.

Brogans, not black ties, were in order for the School of Agri-

culture Barnwarming, held "Squire Miller's Barn," local recognized as Frank Thompson Gym.

Fifteen Years Ago, Feb., 195 Graduation Date set for Friday, May 8, under speed-up program . . . former Navy Secretary Josephus Daniels to deliver graduation address.

The State "Techs" are currently in fifth place in the Southern Conference standings . . . Duke has first place with Carolina holding fourth.

For The University Trustees: A Problem In Division of Time

Jackie Moreland has left State College and gone back home to Louisiana. News services report from there that he plans to enter Louisiana Tech in a few days.

At first glimpse, that would seem to have ended the basketball recruiting case which has kept State College in such a stir for the past few months. Actually, the case isn't ended.

Still to come, of course, is an announcement as to what the Atlantic Coast Conference may have found in its investigation of the case. State College requested the investigation after the ACC, relying on a report from the NCAA, had fined State College \$5,000 and declared Moreland ineligible at State College. The \$5,000 was to be paid if Moreland didn't remain at State and on athletic scholarship for four years, and apparently it now will have to be paid.

Still to be decided, too, is what if any action State College will take as a result of the NCAA punishment on grounds that State athletic officials made unauthorized offers to get Moreland to enroll here. The State coaches deny any wrongdoing, and State officials have accepted their denials, saying the coaches should have the right to face their accusers in public. Apparently, they never will have that right, and, apparently State officials will continue to accept at face value their denials of wrongdoing.

The whole case brings into sharp focus a problem which will become larger and larger in the immediate future. That, stated simply, is this: Are the chancellors of State College and of the University at Chapel Hill to be expected to spend much of their time at the actual business of being educators?

Chancellor C. H. Bostian at State College is a trained educator, a good one, too. Yet, during most of this scholastic year, he has had to spend a good part of his time wrestling with the Moreland case. He undoubtedly has learned a lot of the ins and outs of college athletics during those months. But, it also is undeniably true that during that time, he has had too little time for his primary business of supervising the actual educational processes of State College, the job the trustees hired him to do.

Chancellor R. B. House at Chapel Hill retires at the end of this school year. He hasn't had recently the problem which have faced Chancellor Bostian, but only recently he spoke his mind at an ACC meeting. What he said showed plainly that he doesn't think much of the way college athletics are being run now.

The trustees of the Consolidated University will have to decide soon how much authority they wish the chancellors in Raleigh and Chapel Hill to exercise over college athletics. The chancellor, of course, should be responsible for the entire workings of his unit, athletics, education, students affairs, etc. But, the Moreland case has shown that a chancellor can be so tied up with one part of the college's work that the other parts necessarily suffer.

Both State and Carolina are engaged now in making sure that they have crowd-drawing athletes in football and in basketball. State College, of course, has had top-flight basketball teams for years, and Carolina's basketball team is now the number one in the nation. Other people shoot at those on top, which means both Carolina and State will be vulnerable to rumors about this or that recruiting practice in basketball from now on.

Carolina is rebuilding in football. It is no secret that many other football-conscious institutions will be watching Coach Jim Tatum and his assistants like hawks, eager for any slip, little or big, which could be reported to the NCAA.

All this makes it sound as if recruiting of high school athletes is right much of a cut-throat affair. It is.

As long as State and Carolina continue to operate full-blown in the business of recruiting high school athletes, the chancellors will have their hands full of athletic problems. For example, should Chancellor Bostian have known that State College officials were going all the way to Louisiana to recruit star basketball player? Should he have known that the assistant athletic director, the assistant basketball coach and the head of the club which provide athletic scholarships had gone to Louisiana just to talk to the prospect? He may have known all that. But, if he should be expected to keep in that close touch with athletics, he'll have mighty little time for any other work.

The trustees of the Consolidated University must face up to the whole problem of athletics. If they want big-time athletics, that presumably would be all right.

But, if they do want them they should tell the two chancellors whether they want them to be educators or supervisors of athletics. They can't be both.

If the trustees want the chancellors to spend the big part of their time on athletics they should make some other provision for someone to look after the educational end of the college business.

Here's Arnold . . .

. . . By Bill Johnson

1 Commissioned By Army ROTC In Coliseum

Eleven Army ROTC cadets of North Carolina State College received commissions as second lieutenants in the U. S. Army Reserve at ceremonies in the William Neal Reynolds Coliseum last week.

Col. Richard R. Middlebrooks, professor of military science and tactics, administered the oath of office and presented commissions to the new officers.

Students receiving commissions were: Augustus W. Bachman, Jr., Henderson, Ordnance Corps; Paul R. Barton, Charlotte, artillery; Albert D. D'Angelo, Crabtree, Pa., artillery; Jack T. Ruffin, III, Tarboro, Ordnance Corps; Charles C. Bassett, Bassett, Va., artillery; Harold C. Hicks, Oxford, armor; Joseph R. Miller, Jr., Rutherfordton, infantry; Arthur G. Mark, Oxford, artillery; Warren L. Thrower, Rocky Mount, armor; Joseph R. Lancaster, Lebanon, transportation corps; and Harold E. Luck, Cedar Falls, artillery.

Dance Drama And "Poets Theater" At C.U.

The Dance Drama Company, a group of dance-players headed by Emily Frankel and Mark Ryder will present a new kind of entertainment combining dance with drama and music at Pullen Hall on Friday, February 15, at 8 p.m. The event is sponsored by the College Union Theater Committee and is free to College Union members.

Five well-known choreographers have participated in creating a completely new repertoire for the Dance Drama Company: Todd Bolender, who is currently choreographer for the New York City Ballet; Charles Weidman and Sophie Maslow, who have served as choreographic directors for the New York City Opera Co.; Hadassah, exponent of Oriental and Hindu Dance; Frankel and Ryder, who have choreographed a large repertoire which has been presented on their Dance Duo programs all over the United States.

The styles of movement used by the Dance Drama Company are ballet, modern, folk, jazz and Hindu. Every dance is designed to tell a story. The program spoofs the All-American Sports Hero and his successes, glides classically to music by Debussy in a romantic love story; swings to jazz in a play in four scenes about a New York teenage gang; and ends up in fantasy land with a series of sketches called "Haunted Moments."

The Dance Drama Company is the first dance or drama group to attempt this kind of presentation. The Company made its New York debut in April, 1955, and the major critics received the new group with high praise.

"A Poet's Theatre" will be presented by Vincent Godfrey Burns on Monday, February 11, at 8 p.m., in the College Union Theater. The event will be sponsored by the CU Library Committee.

Author, poet and actor, Burns brings with him a new concept in poetry presentation. In his delivery, he makes of each poem a play. His repertoire includes readings from Henry Wadsworth Longfellow, Oliver Wendell Holmes, Walt Whitman, John Greenleaf Whittier, Ralph

Waldo Emerson, Sidney Lanier, Edgar Allen Poe. He also presents many of his own works.

Educated in biology, sciences, theology and history at Pennsylvania State College, Harvard, Columbia and Union Theological Seminary, he has a broad foundation on which to build. He began to find his poetic muse in war. His scrapbook of war verse, "The Red Harvest," begun in the trenches, became a standard anthology of the poetry of war and peace.

With his brother he wrote the sensational "I Am A Fugitive from a Chain Gang" which was made into an epoch-making movie by Warner Brothers. This was followed by a play, "Out of These Chains," a sequel to the former.

Burns has won national attention with his radio programs of poetry: The Soldier Poet over NBC networks; The Poetry Class of the Air, WOR; The Poetry Forum, WEVD; and Rhythms of Life, WMCA. He was awarded the George Washington Gold Medal by the Freedoms Foundation for his inaugural poem to President Eisenhower, "A Nation Prayed."

Across the country into practically every state in the Union during 20 years of poetry barnstorming, Burns has appeared before more than two and a half million people.

WHAT'S NEW WITH THE C. U.

Friday, Feb. 8

7:30 p.m. Craft Shop Test. College Union Craft Shop. C.U. Hobby Committee.

7:30 p.m. Film Talk. CU Theater. CU Film Committee.

8:00 p.m. "Platter Party." CU Snack Bar. CU Dance Committee.

8:00 p.m. "Spring Styles for Students." CU Ballroom. CU Hospitality Committee. Coffee Hour. CU Social Committee.

Saturday, Feb. 9

1:00, 3:00, 5:00, 7:00, 9:00 p.m. Movie, "The Captain from Castile." Starring Tyrone Power, Jean Peters, Caesar Romero. CU Theater. CU Film Committee.

8:00 p.m. "Cabaret Dance." CU Snack Bar. CU Dance Committee.

Sunday, Feb. 10

1:00, 3:00, 7:00, 9:00 p.m. Movie (Same as Saturday).

3:00 p.m. Judging of Photography Contest. CU Gallery. CU Photography Committee.

Tuesday, Feb. 12

5:00 p.m. "Apple Polishing

Hour." Student-Faculty coffee time. College Union. CU Hospitality Committee.

7:30 p.m. Bridge Lessons. College Union. CU Games Committee.

Wednesday, Feb. 13

7:00 p.m. Darkroom Beginner's Night. CU Darkroom. CU Photography Committee.

7:15 p.m. Model Airplane Club. Inquire at CU Main Deck. CU Hobby Committee.

7:30 p.m. Duplicate Bridge. College Union. CU Games Committee.

7:30 p.m. Square Dance Lessons. College Union Ballroom. CU Dance Committee.

7:30 p.m. Ceramics Class. CU Craft Shop. CU Hobby Committee.

Thursday, Feb. 14

7:30 p.m. Social Dance Lessons. CU Ballroom. CU Dance Committee.

7:30 p.m. Copper Enameling Class. CU Craft Shop. CU Hobby Committee. Photography Exhibit Ends. CU Gallery.

ENGINEERING STUDENTS

WE CAN'T PROMISE
YOU THE WORLD...

...but

we can offer you a genuine career opportunity with the leading jet aircraft equipment manufacturer.

Hamilton Standard's tremendous rate of expansion alone is evidence enough of the obvious opportunities now open at this beautiful, modern plant. However, there are numerous other "plus" values which you will want to consider:

- 1) the opportunity for further, tuition-assisted study at R.P.I. Graduate Center.
- 2) the exciting, challenging projects dealing with fuel controls for both jet and nuclear engines, air conditioning systems, jet starters, and turbo-propellers.
- 3) the tremendous variety of openings, so that you may select the field which interests you most.
- 4) the ideal location, in beautiful Connecticut, within easy travel distance to Boston or New York.

These are just a few of the reasons it is essential for you to talk to Hamilton Standard.

If you cannot attend an interview, please send your resume to Ted Fisher at

A Campus-to-Career Case History

Planning for growth. Joe Hunt (left) talks with Jim Robinson (center), District Construction Foreman, and O. D. Frisbie, Supervising Repair Foreman. In Joe's district alone, 600 new telephones are put into service every month.

"I'll take a growing company"

70,000 telephones to keep in operation ... \$20,000,000 worth of telephone company property to watch over ... 160 people to supervise — these are some of the salient facts about Joe Hunt's present job with Southwestern Bell. He's a District Plant Superintendent at Tulsa, Oklahoma.

"It's a man-sized job," says Joe, who graduated from Oklahoma A. & M. in 1949 as an E.E. "And it's the kind of job I was looking for when I joined the telephone company.

"I wanted an engineering career that would lead to management responsibilities.

Moreover, I wanted that career to be in a growing company, because growth creates real opportunities to get ahead.

"But to take advantage of opportunities as they come along, you must have sound training and experience. The telephone company sees that you get plenty of both. Really useful training, and experience that gives you know-how and confidence. Then, when bigger jobs come your way, you're equipped to handle them.

"If I had it to do all over again, I'd make the same decision about where to find a career. Now — as then — I'll take a growing company."

Joe Hunt is with Southwestern Bell Telephone Company. Interesting career opportunities exist in other Bell Telephone Companies, and in Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your placement officer can give you more information about these companies.

Engineering—Four Years or Five?

The courses of engineering at State are now planned to be completed in four years. However, a very small percentage of engineering students complete the course in this allotted time; in a majority of cases, there must be an added semester or an added session of summer school or even an added year before the degree is awarded.

An important question comes to our minds in connection with the planned four-year course. Why does it take longer than planned to complete engineering? There are several possible answers, and these answers, we hope, will be given some thought.

First, possibly the caliber of students enrolled in engineering at State is too low to allow the majority to complete the course in four years. Unfortunately, Mr. and Mrs. N. C. taxpayer hold a trump card in that they can almost demand admittance for their Johnny, no matter how smart or dumb, because "I pay my taxes like everybody else to support N. C. State and my boy should be given his chance for higher education." So entrance examinations in many cases aren't very instrumental in deciding who, with what degree of intelligence and aptitude, can enroll at State.

Either the examinations are too simple to be an indication of the prospective student's ability or else they are given little consideration when an application is presented . . . because Johnny's parents unthinkingly put pressure in the administration.

Secondly, perhaps the courses in engineering are too broad and comprehensive to be absorbed in four years—even by a fairly intelligent student. This possibility would suggest that engineering be put on a five-year basis, so that some of the more difficult courses could be spread out over a longer period of time. Many technological institutions more famous than State have this five year plan, and it is generally conceded (that is, conceded outside of State College) that these other institutions are turning out more qualified engineers.

But of course the main problem is that State is a land-grant institution and depends financially on state and public support. Therefore, State's policies must be determined to suit the legislature and the public as a whole—and the unfortunate fact is that most of the time the legislature and public are unqualified to determine any policy about State. Isn't it too bad that the taxpayer won't let the administration decide who is qualified for admittance and how long a student should stay at State to get a degree? Approximately one-third of the entering freshmen get a degree, and it takes most of this one-third more than eight semesters to graduate. The other two-thirds either flunk out, drop out, or transfer.

Let's not fool ourselves—we aren't paying our whole way through college—not by a long shot; it takes a lot of tax money to pay part of our expenses. And that two-thirds who don't graduate are a tremendous waste of money—they waste their money and the state wastes a lot of tax money when all they do is come here for a few years and then drop out. Probably if the taxpayers knew this, it would hit them where it hurts most—right in their pocketbooks. Maybe then they would get off the administration's back and let somebody more informed run State College.

One last point—the savings that could be effected through a revision of entrance requirements might well be a big factor in raising the whole caliber of State. Instead of wasting a lot of money on a bunch of dumb future-flunkies, that money could be well spent in raising our instructors' salaries, which are quite low in comparison to what industry offers them. Then, and only then, could we approach the ideal situation where more interested, capable instructors are teaching a group of more interested, capable students.

C U Sponsors Roger Wagner Chorale Concert

On its second American tour, the Roger Wagner Chorale will present a concert on Friday, February 22, at 8 p.m. in the Raleigh Memorial Auditorium under the auspices of the North Carolina State College Union's music committee.

Arrangements for Wagner's Raleigh engagement are being handled by the State College Union's music committee, headed by Harry R. England of Raleigh.

The program will be open to all members of the College Union free of charge, but there will be an admission charge of \$1.50 for all others. Students sponsors said tickets may be purchased in advance at Stephen's Music Company in Cameron Village, Thiem's Record Shop in downtown Raleigh and at the State College Union Building.

Directed by Roger Wagner, the ensemble made its first public appearance in Los Angeles City Hall during the 1945-46 season as the City of Los Angeles Concert Chorale, a unit

sponsored by that city's Bureau of Music. Its present name was adopted in 1947, when the chorale made its professional debut under Franz Waxman's baton in "Joan of Arc at the Stake" by Honegger as part of the Los Angeles Music Festival program.

In 1949, the Chorale received its first invitation to sing with the Los Angeles Philharmonic Orchestra under Alfred Wallenstein's direction in a Bach program commemorating the bicentennial of Bach's death. Since that time, Wagner's chorists have been applauded in a number of the Philharmonic's presentations.

The first of a series of annual appearances in the Hollywood Bowl took place during the summer of 1949. Music which the Chorale has interpreted has ranged from songs by George Gershwin to Handel's "Messiah."

Three years ago, the Roger Wagner Chorale was invited to England to participate in London's Coronation festivities, the

receive such an invitation. A 24-voice group sang in London's Royal Festival Hall and then embarked upon its first European tour.

Moreland Case

In the past several months thousands and thousands of words have been written and re-written about the controversial basketball star Jackie Moreland, from Linden, La.

Last week-end, however, he did what many fans have expected for some time—he pulled out of North Carolina State and headed home. Tuesday he enrolled at Louisiana Tech to continue his studies in civil engineering.

The big question now in most fans' minds: Is this the end of the Jackie Moreland Case??? This observer says—Not until the Atlantic Coast Conference completes its report to State on the conference's investigation. This is scheduled for Sunday morning in Greensboro, when commissioner Jim Weaver makes his report.

If this report is favorable and the college succeeds in their fight to get Moreland declared eligible, then Moreland will definitely come back to the West Raleigh campus and play basketball. . . . If the conference report

Frosh Cagers

Post 10th Win

North Carolina State's crack basketball team continued on its winning ways as they dumped the Little Creek Marines 91-83 Tuesday night in the Coliseum. It was the Baby Pack's 10th win of the season against only three setbacks.

"Hotshot" forward Bob Cole led the Pack from the floor with 30 points followed closely by Gallagher with 26. These two lads have been the big factor in the success of the Wolflets thus far this season.

Before the season started, Wolfpack coaches admitted that they had one of the finest first year teams in the nation, and despite the losses of such stars as Moreland, Wessels, and Haig—the Pack continued to role on.

Wolfpack Seek Revenge Against South Carolina Saturday Night Here; Frosh Meets Fort Eustis—

North Carolina State's Wolfpack, displaying their "new look," have set their sights on a revenge battle with South Carolina's Gamecocks in the Coliseum Saturday night.

State is going all out to make-

up for a early season rout at the hands of the South Carolina boys in Charlotte before Christmas. It was the first time a S. Carolina cage squad had beaten Coach Case.

Strengthened by the additions of sophomore Bob MacGillivray and center John Richter, the Pack have begun to take on some of the luster and polish of old. The Case men have copped four in a row and are beginning to generate a little more steam with the ACC tournament just around the corner.

The biggest problem in Saturday's battle will be trying to stop the conference's leading scorer—Grady Wallace who is

averaging close to 30-points per game.

A freshman scrap between State and Fort Eustis will begin at 6:15.

HERE ARE THE FIRST TWO TIE-BREAKERS IN

OLD GOLD'S TANGLE SCHOOLS PUZZLES

IF YOUR answers to the first 24 puzzles conformed to the correct list of answers published at the end of the past semester, you can and must submit answers to eight tie-breaking puzzles, in order to compete for the prizes in the tie.

Remember—first prize is a tour for two around the world, and there are 85 other valuable prizes.

The first two of the eight tie-breakers are published herein, according to rule 2(b) of the official Tangle Schools rules:

2(b) In case more than one person solves correctly the same number of puzzles, the prize tied for and as many

subsequent prizes as there are persons tied will be reserved and those so tying will be required to solve a set of tie-breaking puzzles to determine the order in which the reserved prizes will be awarded.

Each of the tie-breaking puzzles will contain scrambled letters forming the names of either one, two or three American colleges or universities.

Do not mail these tie-breakers now! Save them until you have completed all eight tie-breaking puzzles. Details on when and where to mail the tie-breakers will be published with the eighth puzzle.

TIE-BREAKING PUZZLE NO. 1

Pack Routs Virginia 87-60 For ACC Win

State College's Wolfpack showed some of their old form Tuesday night as they rolled over Virginia 87-60 in the coliseum. It was the Pack's 4th ACC win against five losses and gave them an over all 11-8 season's record.

With sophomore Bob MacGillivray breaking into the starting line-up and pouring in 17 points, State had little trouble in downing their visitors for the second time this season.

Senior guard John Maglio, fighting to hold on to his starting berth, turned in a fine per-

State Hosts ACC Indoor Track Games

The Atlantic Coast Conference Indoor Games will be held at the State Fair Arena here Feb. 23 with all eight conference schools participating, State

formance that netted him 16 points for the evening. State hit on 50.3 per cent from the floor while Virginia turned in a 31.2 average.

College track coach Paul Derr announced.

The annual affair will be limited to freshmen, conference and non-conference divisions this year.

Maryland is the defending champion in the conference and freshman divisions while Florida is the non-conference champion. The Terps won last year's event with 52½ points. Duke nosed out North Carolina for second place by two points, 28 to 26.

Maryland, Duke and North Carolina are expected to stage

a three-way race for the title again this year. Some of the top track stars in this area, including Duke's Dave Sime and Carolina's Jim Beatty, will participate.

Events will include the shot put, high jump, pole vault, broad jump, 600-yard run, 880-yard run, mile, mile relay, two-mile, two-mile relay, 60-yard dash, 70-yard high hurdles and 70-yard low hurdles.

Tickets for the day-long event will be on sale at the box offices in Reynolds Coliseum and the State Fair Arena.

Walter Paulson asks:

Does Du Pont
have summer
jobs for
students?

Bob Carter answers:

Robert G. Carter received his M.S. in industrial engineering from Ohio State in 1951 and joined Du Pont soon afterward. After varied plant experience, he recently undertook an interesting new assignment in the Polychemicals Department at Du Pont's Sabine River Works, Orange, Texas. The major function of his current work is to coordinate cost information as an aid in maintaining cost control.

YOU bet we do, Walt! They're part of a regular Technical Training Program which Du Pont has had for years.

Ordinarily we try to assign summer employees to work which ties in with their fields of training in college and with their long-range interests. Informal or formal instruction on Company matters is usually provided.

We're definitely in favor of these summer contacts, for they provide students with practical technical experience and make them more valuable to industry when they graduate. And it gives us a chance to become better acquainted, too, with some of the men we'll be considering for permanent employment, later. It's a program of mutual benefit.

In addition to the Formal Technical Training Program, we frequently have a number of vacation replacement jobs and other temporary positions which are available to college students.

Last summer we hired a total of 720 students from 171 different colleges and universities. Most of these were juniors, or were graduate students about one year away from permanent employment.

You can see our program is a fairly substantial one, Walt.

FREE FILM: "Mechanical Engineering at Du Pont" available on loan for showing before student groups and clubs. Write to the Du Pont Company, Wilmington, Delaware.

SIDELINES

(Continued from Page 5)

The same, then I believe the Moreland Case will be all over.

However, I somewhat feel that Moreland could have helped State a lot more if he would have remained in school until the matter was settled one way or the other. All you can't blame the kid for picking up and leaving if nothing more than from getting tired of seeing the inference "wheels" prolong the matter, as they have been in the past months. One certainly can not get any encouragement from the continued "shafts" that seem to be standard procedure in the Greensboro office.

I was always led to believe that if anyone would bend over backwards to help you in your problems it would be the conference to which you belong. However it seems the ACC fathers are looking out for No. 1 in this state and State can go hang. . . . The question that enters my mind, in trying to figure out the attitude of the conference, is how much do the three phrases—N. C. State—basketball—Everett Case—have to do with the thinking of the conference??? Would Virginia or Clemson get the same treatment if they had a basketball problem? I doubt it!!!

Let's hope that Sunday will bring better news from Greensboro than has come in the past. . . .

1957 Dixie Classic

Now that St. Louis and Northwestern are in the fold, State College officials are trying to line up a western and eastern team for the 1957 Dixie Classic.

Louisville, Canisius, UCLA, Tennessee and several other schools will be sent "feelers" in the near future. It will be hard to top the most recent Dixie Classic (1,200 persons attended)—but tournament officials are going all out to make this year's affair the best yet.

Shea Graduates

Mike Shea, the Wolfpack's crack distance runner, has finished up at State and now heads for Carolina to begin

his graduate work. Mike holds the Atlantic Coast Conference outdoor two-mile record. Shea was one of the college's outstanding distance runners and over the past few years has turned in many outstanding performances on the cinders.

Shea, who is married and has two children, hopes to go into the coaching field.

PROBLEM: *To evaluate the all-round career advantages offered by the widely diversified activities at Divisions of North American Aviation, Inc.*

FIRST STEP: *GET THE FACTS in man-to-man interviews, on campus* **FEBRUARY 19**

As a graduate in Engineering, Physics, Applied Math. or allied subjects you need complete, factual information to help you make a sound decision in choosing your career.

Get the facts in a man-to-man interview with our representative. Let him tell you about our unique placement and training devised to help your potential develop rapidly in a company where continued expansion has doubled the number of employees in 5 years. Your possibilities are wide and varied, as you will see from these brief notes on the 4 Divisions:

AUTONETICS creates automatic controls and electro-mechanical systems of a highly interesting nature. Work includes research, design, development, manufacture and testing; you will become a part of the latest advances in

inertial navigation and guidance, fire and flight controls, analog and digital computers.

ROCKETDYNE is building power for outer space—large, liquid propellant rocket engines. The Field Test Laboratory in the Santa Susana Mountains is the most complete rocket engine workshop in the free world. Here a man meets more aspects

of his specialty in one week than in a year of "conventional" practice.

ATOMICS INTERNATIONAL is pioneering in the creative use of the atom. If you are able to meet the high requirements for this work, you can help introduce a new industrial era. Atomics International is designing and building varied types of nuclear reactors, for both power and research, with the practical experience gained by 10 years in the field.

MISSILE DEVELOPMENT ENGINEERING

Long range missiles, including the intercontinental SM-64 Navaho, present problems of the

most fascinating nature. Speeds, materials and functions now being dealt with were only theoretical a few years ago. The work is vital; the opportunities for you, as a creative

engineer, are correspondingly great.

CONTACT YOUR PLACEMENT OFFICE TODAY Make an appointment NOW to see North American Representative on campus. OR WRITE: Mr. J. Kimbark, College Relations Representative, Dept. 991-20, North American Aviation, Inc., Downey, Calif.

ASCE Installs '57 Officers

Everett J. Poindexter of Tarrboro, a junior in Civil Engineering at State College was installed Tuesday night as president of the college chapter of the American Society of Civil Engineers.

Poindexter succeeds Bob Morton of Route 1, Albemarle, who served as the chapter's 1956 president. Poindexter and five other officers will head the chapter's operation during 1957.

Other officers chosen to serve with Poindexter are Ben T. Smith of Raleigh, vice president; Harold W. Landrum of Wilson, secretary; E. T. Reynolds of Cary, treasurer; Mrs. W. E. Garrison of Lincolnton, editor

of "On The Level," the chapter's newspaper; and Fred H. Edwards of Wadesboro, publicity director.

All the new officers are juniors in civil engineering at State College.

In talks at the meeting, Dr. Ralph E. Fadum, head of State College's Civil Engineering Department, described the functions of the American Society of Civil Engineers, and Prof. Charles R. McCullough of the Civil Engineering Department faculty gave a history of the college's student chapter of the ASCE.

Professor McCullough is faculty adviser of the chapter.

HOUSING

(Continued from Page 1)

ministration toward solving the problem. An unsuccessful attempt made two years ago to obtain authority from the General Assembly to borrow the money, a plan to borrow the money through commercial lending agencies which met with no success, an unsuccessful effort to get the Federal Housing Authority and Home Finance Agency to make a loan to the State College Foundation and an attempt to have private developers build the needed housing have all had a thorough go-

ing over from the administration.

The statement concluded with a suggestion for the only immediately apparent practical solution. This would be a self-liquidating loan from the Federal Housing Authority and Home Finance Agency which must be approved by the General Assembly before it can be made.

The Housing Committee, at this meeting, requested that the married students contact their local General Assembly members while they were home for

(Continued in Column 4)

Starlight Club Declared Success

Last Saturday night the Starlight Club, State College's own nightclub, held its grand opening in the College Union. It was declared a success by all who attended. The room was filled to capacity and many couples were turned away at the door. Students who wish to attend are urged to make their reservations early to be sure that they have a table. Reservations may be made in the College Union Activities Office.

The Starlight Club was created to give the students of State College a place where they can dance to soft music in a subdued atmosphere. They may also purchase sandwiches and soft drinks or coffee during the evening, without leaving their table.

Music for the Starlight Club is supplied by WRAL's Dan Xavier, who broadcasts his radio show, "Dancing with Dan", directly from the Starlight Club every Saturday night.

Armstrong To Play All-time Favorites

HOUSING

(Continued from Column 2)

the between-semester holidays. They were to request favorable legislation and support for the legislation during the current term of the General Assembly.

The Committee reports that progress has been made toward obtaining the legislation. However Houtz said that they needed to obtain some idea as to how many legislators had been contacted, who had talked to them or what other manner had been used in reaching them. He asked that each student who had contacted a member of the General Assembly pass the information along to him through Mr. Watts' office on forms which will be available tomorrow, Jan. 8.

Louis "Ambassador Satch" Armstrong will be blowing his famous horn and singing in his unique style at State's famed Coliseum next Wednesday night at 8:30.

Tickets were sold in the dormitories last night and will be sold for a second and last time in the dormitories next Monday night. Students who failed to get their tickets last night will, therefore, have another opportunity next Monday. Tickets are also being sold at the Coliseum Box Office now and will be sold until concert time next Wednesday night.

The reserved seat tickets are \$2.50 and the general admission tickets are \$1.50. They can be purchased at Kerr Rexall Drug Store or Stevenson's Record Co.

in the Village or uptown Thiems Record Shop and W. ble's Clothing Store.

The concert will feature "Satchmo" himself playing all-time favorites that have earned him the reputation of "greatest jazz musician in history." Selections from "Hi Society"—the last movie he's his All-Stars played in—such recordings as "Mack-t-Knife," "Blueberry Hill," and the immortal "Whiffenpo Song" will probably be among his varied and lively selections for the concert.

He will be here next Wednesday night at 8:00 p.m. at Coliseum. The Interfraternity Council, who is sponsoring the event, hopes that he will play to a full house.

"What's it like to be

A MANUFACTURING ENGINEER AT IBM?"

Four years ago, Yale senior Lee Baker asked himself this question. Today, as a Product Control Engineer in IBM Manufacturing Engineering, Lee reviews his experience and gives some pointers that may be helpful to you in taking the first, most important step in your engineering career.

"It's tough," Lee sympathizes, "for a college senior to feel confident about choosing a job. For four years he's been trained to be critical and deliberate about making decisions. Now, faced with the biggest decision of all, he has only a few months in which to attend job interviews, separate the facts from the propaganda, and select a company—not to mention passing exams and graduating at the same time."

Lee, with a B.S. in Industrial Administration, came to IBM in 1953. Starting as a Technical Engineer in Production Control, he was immediately assigned to the General Manufacturing Education program—a

How to select an employer

To the college senior faced with a job decision, Lee has this to say: "Pick your employer by this simple test: 'Is the company expanding fast enough to provide adequate scope for your talents and ambitions? Is it interested in your long-range management development? Will it treat

"Selling" the system

you as an individual and match your abilities with the most challenging assignments?"

For his part, Lee feels IBM has met this test. Since 1953, he has seen new plants open, dozens of new products evolve, hundreds of new management positions created. Greater authority, responsibility and reward have come his way. And he knows they will continue, for IBM sales

Recognition of individual merit

have been doubling on the average every five years since 1930. He likes the "small-team" engineering system that assures ready recognition of individual merit. And he appreciates the fact that IBM hired him despite his impending service hitch.

What's "life" like at IBM?

At IBM, Poughkeepsie, Lee lives a "full life." He belongs to a local sports car group, drives an Austin Healy. He skis at Bromley. He is a member of the IBM Footlighters and a local drama workshop. At present, he shares an apartment with two other engineers and a "medium-d" set, but plans to marry "the girl next door" (in hometown Hamburg, Conn.), in the very near future. In this connection, Lee advises seniors to pay special attention to company benefits. "They may seem like a yawning matter when you're single, but they mean a lot when you assume responsibilities. IBM's are the best I know."

Lee lives a full life

IBM hopes that this message will help to give you some idea of what it's like to work in Manufacturing Engineering at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists, mathematicians and Liberal Arts majors in IBM's many divisions—Research, Product Development, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, our Manager of Engineering Recruitment, Mr. R. A. Whitehouse, will be happy to answer your questions. Just write him at IBM, Room 9201, 590 Madison Avenue, New York 22, N. Y.

Why on earth can't women see
All the things I see in me?"

MORAL: No matter what face you live behind, it will look happier with a real satisfying Chesterfield out front! Enjoy that BIG full flavor plus the smoothest taste today, because it's packed more smoothly by Accu-Ray! You'll be smoking smiles!

Smoke for real... smoke Chesterfield!
