Air Force ROTC Begins Flight Training For Senior Cadets

A program of actual flight training for senior cadets in the Air Force ROTC Detachment at State College will begin Saturday.

This was reported Wednesday by Col. James F. Risher, Jr., professor of air science and commandant of the Air Force ROTC at State College.

State College, Colonel Risher said, is one of approximately 40 colleges and universities selected by the U. S. Air Force to begin flight instruction in connection with its AFROTC training this year.

A group of 42 AFROTC cadets at State College will receive instruction under the new programs. Wilson Air Service will give the instruction at the Raleigh Municipal Airport.

The Air Force, Colonel Risher said, has a three-fold aim in initiating this course: to encourage greater numbers of freshmen and sophomores to compete for advanced AFROTC training; to insure that regular flight training, which will follow commissioning, will be made easier by giving seniors some flying experience; and last to provide an earlier screening of cadets' adaptability for flying.

Air Force senior cadets who have volunteered for and been found qualified for pilot training upon graduation and commissioning are eligible for the course.

No student, Colonel Risher explained, will be allowed to participate at the expense of his academic progress.

Colonel Risher will function as operational liaison between the college and the flying school operator, as well as between the college and the Air Force.

The following Air Force Cadets will participate in the program:

George T. Lathrop, William R. Greene, Thomas H. Briggs, Jr., Robert E. Jobe, Preston A. Collins, Gerald G. Hawkins, David H. Pittard, James S. Batts, Norman L. Zimmerman, Donald E. Hitchcock, Glenn H. Sutton, Ashley C. Leggett, Jr., Perry L. Dean, James R. Agar, John M. Lake, George T. Brown, Richard E. Moser, Joe H. Young, Harold T. Reed, Leonard W. Cotton.

James L. Burton, Jr., David H. Kersey, Kenneth B. Alexander, Glenn E. Carter, John W. Frye, Jr., Jerry M. Absher, Victor G. Dowless, Willis I. Crumpler, Jpe B. Emory, Arthur W. Fihelly, Richard M. Beam, Terry L. Hershey, Parker C. Peedin, John W. Brown, Justus M. Ammons, Luther C. Powell, III, Paul J. Wicker, and Philip R. Pruna.

Covering Campus . . .

ROTC Rifles

Effective Monday, March 4th, all Army ROTC rifles stored previously in the Quonset at the southeast corner of the Coliseum will be stored in the Army ROTC Armory in the basement of the Coliseum.

To draw rifles for drill, cadets must enter and leave the Armory through the large outside door directly under the Army ROTC offices at the southwest corner of the building.

All cadets are requested to visit the Armory prior to drill March 5th in order to orient themselves on the new system. Relative position of rifles within racks have not been changed.

Moody Science Film

Students are invited to attend the showing of the film "Time and Eternity." It will be shown in the YMCA's faculty club room at 7:10 Friday night. This film is being sponsored by the State College Christian Fellowship.

Graduate Students

A meeting of the Council of the Graduate Student Association will be held on Monday, March 4 at 7 p.m. in rooms 248-250 at the College Union.

State Graduate Named As New U.N.C. Chancellor

The Board of Trustees approved last Monday President Friday's recommendation of William Brantley Aycock as the new chancellor at Chapel Hill.

Aycock is a graduate of N. C. State, where he was president of the student body. He later attended law school at the University at Chapel Hill.

President Friday described Aycock as a "man of high courage and energy." Friday told the trustees that the qualities that had been stressed by those looking for a new chancellor were those of an "educator with administrative ability," youth, public speaking ability, and those of a man who is a "Southerner with Southern ideas and traditions."

Also elected by the Board of Trustees Monday was Dr. Gordon W. Blackwell as chancellor of Woman's College in Greensboro.

Blackwell is a UNC sociologist and is director of the University's Institute for Research in Social Science.

In recommending Blackwell for the job, President Friday said, "he is a man of integrity, great vision, and energy."

Recommendations Made On Student Housing

Dr. Frank Graham To Speak At Union

Dr. Frank Graham, former president of the Consolidated University and now mediator for the United Nations in New York, will speak on "The United Nations and The Atomic Age," on Monday, March 4, at 8 p.m. in the College Union Ballroom. The event, which is open to all students, faculty and staff, is sponsored by the College Union Forum Committee.

Dr. Graham, a native of Fayetteville, won his A.B. degree at the University of North Carolina in 1909 and in 1915 received his M.A. degree from Columbia. He is the recipient of numerous honorary degrees.

Graham resigned as president of the Greater University in 1949 to represent North Carolina in the U. S. Senate. He has also served as advisor to the U. S. Secretary of State on Indonesian Affairs.

Members of the Visiting Committees of the Board of Trustees of the Consolidated University presented their recommendations for the three units of the University at the meeting of the full board Monday afternoon.

In recommendations to the Administration of the Consolidated University and the three units, the Committee suggested that action be pushed forward on the problem of married student housing. They also suggested that a thorough study should be made of teaching methods now in use, faculty salaries, utilization of faculty and facilities, and the new pre-testing program for incoming students.

In action of particular interest to the students and staff at State, strong recommendations

were made concerning student housing.

Among the projects mentioned were additional dormitories, the Fraternity housing project, which they said should be "implemented as soon as possible," and "the critical housing situation for married students" which "should be relieved by providing more facilities."

Sentiment seemed strong among individual members of the Board concerning the housing at State. Several comments were made by members after the meeting about the problems among the married students and their hope that appropriations would soon be available for them.

Other recommendations included a blanket general recommendation that more funds be provided for research at all three units of the University.

Campaign Rules Given For Elections

Campaign rules for the general campus elections, to be held in April, were announced early this week by Charles Jackson, Elections Committee Chairman.

The rules are as follows:

1. No election campaign fund may exceed \$75.00. In compliance with this, all candidates must submit an itemized expense sheet within twenty-four hours after final election.
2. No candidate may campaign in such a manner as to disturb classes.
3. Notices must not be tacked or nailed to trees or buildings. String or drafting tape may be used.
4. Each candidate is responsible for seeing that his posters are removed within twenty-four hours after the final election.
5. No campaign will take place within fifty feet of the polls.
6. Sound trucks will not be used during classes nor after six o'clock P.M. Sound trucks may be used during class changes. STRICT COMPLIANCE IS EXPECTED.
7. Candidates for each of the four major offices of the campus government must submit a statement in writing to the Student Government prior to the primary election that if he is a member of the rising senior class and, if elected, he will not graduate from North Carolina State College during his term of office of one calendar year.
8. In case one candidate receives a clear majority in the primary (more than 50% of the total votes, he will be declared the winner without a run-off.

Any violation of these rules can cause a candidate to be disqualified.

Jackson stated that all candidates are responsible for everything their campaign managers do or do not do.

Students look on as Frank Woody and J. B. Lamar give explanation at Hi-Fi Demonstration at the College Union.

Future Athletic Policy Outlined

Consolidated University President William C. Friday outlined his recommendations for future athletic policy within the Greater University at the Board of Trustees meeting on Monday afternoon. He emphasized the role of the Chancellors of the units of the university and the role of the athletic committees. The report called for higher standards to prevent recurrence of problems that have occurred in the past.

"Much has been written and said during recent months about the intercollegiate athletic program of State College and the University in Chapel Hill.

"Since this is my first opportunity to do so I feel that there should be a restatement and clarification of the policy and procedures of the University concerning intercollegiate Athletics.

"The executive committee by a motion passed at its meeting on January 25th 1954 placed the responsibility for the administration of intercollegiate athletics in the hands of the chancellor at each of our institutions. Respecting this procedure and seeking as much conformity as possible I conferred with Chancellors House and Bostian and they, along with all members of the consolidated office and staff and I, submit to you the following statements with our recommendation that it be approved by you, that it replace prior board action which may conflict and that it become operative on your approval:

"(1) The admissions standards of State College and the University in Chapel Hill, as in the past, will be set by the respective faculties.

"(2) The academic standards of State College and the University in Chapel Hill, as in the past, will be set by the respective faculties (I should like to say parenthetically that the present academic standards of

our institutions are higher than those of the Atlantic Coast Conference and they are being enforced.)

"(3) The Director of Athletics shall be responsible, unto the Chancellor, for the administration of the intercollegiate athletic program at each of our institutions and he shall work with and through the duly established Faculty Committee on Athletics.

"(4) The Executive Committee of this Board of Trustees on January 25, 1954 stated that the Athletic Council at each institution shall be advisory to the Chancellor and shall not have administrative or operating authority or responsibilities, except as may be specifically prescribed by the Chancellor and approved by the President.

"(5) The Scholarship Committee and each institution is the agency that awards athletic grants in aid and it is the agency that revokes grants in aid.

"(6) State College and the University in Chapel Hill are members of the Atlantic Coast Conference and the National Collegiate Athletic Association and we will abide by both the letter and spirit of the regulations established by these organizations.

"(7) Periodic reports on all phases of the intercollegiate athletic program will be made to the faculties of our institutions and to the Board of Trustees by the Chancellors or their designated representatives.

"We believe that compliance with the standards and regulations will safeguard the moral and academic integrity of the Consolidated University of North Carolina.

To make our position clear, the members of the Consolidated Staff and I will not tolerate any infraction of these standards or regulations."

Are You Still There?

State College is noted for the apathy of its student body. That is a well known and old fact.

But we think we have a new "fount" of apathy under examination . . . and its not Mr. Joe College Average Student . . . this time its the group who are usually credited with doing a whole lot of work around the campus . . . our "leaders".

Three points in particular are of interest to us . . . maybe progress is being made . . . but it is not too apparent. The first of these is the old time-worn, grey-bearded, bugaboo of student athletic tickets. Last fall, when football season was at its peak and interest ran high, tickets came on the scene. They were a red-hot issue for a few weeks and then, when football season was over, they died like the early buds in a late frost. The whole avowed intention was to do something permanent now so that the issue would not come up again. It will be back just as sure as death and taxes. What happened to the dreams of glory, etc.?

And how about the Coliseum base charge for rental? We can't even recollect how many weeks it has been since the Coliseum Advisory Committee got hold of that one. Word to date on progress toward stated goal; NONE. The big sweat at the time was getting plans made for various spring dances sponsored by college organizations. They said until they had definite word on the fee they could make no plans because of budget restrictions. And here we sit. . .

And what sort of red-tape mess did the diploma change get wound up in? Time marches on . . . and graduation time is nearing. If diplomas are like everything else in the printing trade, they just don't spring into being overnight. It takes time . . . and right now, it looks to us like time is being wasted at a great rate. The last time we heard, a committee had been appointed by the faculty senate to see what possibilities were available and move toward definite action. Net results to date . . . nothing.

Perhaps a little "stick-to-it-tiveness" would be good for the whole gang . . . students, faculty, and everybody.

Students Receive Variety of Aid

In a report to Chancellor C. H. Bostian made this week, Dean of Student Affairs J. J. Stewart revealed a number of pertinent facts concerning student aid and self-help during the present year.

More than 1100 students have been certified for part-time employment by the Student Aid Office since last fall. 270 of these students have been placed in jobs on campus and 330 off-campus. Additionally, odd-jobs have provided work for another 400.

198 graduate students are serving as teaching fellows, part-time instructors, graduate assistants, or in some similar capacity.

In addition to the students mentioned above as working on campus, placed through the Student Aid Office, some 280 other students have obtained on-campus jobs through their own initiative.

Approximately 400 students have found jobs on their own throughout the Raleigh community in stores, filling stations and offices.

Students on scholarship are broken down into three categories: Undergraduates, graduates, and athletes. There are 538 undergraduates on scholarship with a total fund of \$165,000. There are 29 graduate students representing \$50,220 and 130 athletes with scholarship totalling \$116,614. These scholarships include those financed by endowment, institutional foundations, gifts and other sources and cover funds which are not handled through college accounts.

109 students have made loans from the loan funds of the college with a total value of \$28,145. This total does not reflect short-term loans made from a revolving fund of \$2,700 which have totalled \$5410 to date.

From the Files

Five Years Ago—February 29, 1952

A committee of the Board of Trustees will study petitions concerning policy and sales in the "Mop-Up". Controller William D. Carmichael says sales of items in the "Mop-Up" objected to recently by Raleigh merchants as unfair and illegal are indeed legal and will be continued.

North Carolina's Senior Senator, Clyde R. Hoey of Shelby, spoke against any further taxation by the present Congress at the Textile School in an address early in the week.

Carolina languished in 10th place in the Southern Conference Tournament having just absorbed their 15th straight whipping at the hands of State.

State had lost nine games, the most in a season since the arrival of Everett Case at State and was ranked nationally in the second ten.

Fifteen Years Ago—February 22, 1942

"Politicking" is intense as primaries draw near for annual campus elections. Rudolph Pate, present Director of State's News Bureau, is candidate for Editor of the Agriculturist.

An editorial comments on the improbability of changing the attitude of the Athletic Council as long as subsidized athletes are elected to its membership by the student body.

State's Red Terrors look forward to fourth place in the final Southern Conference standing as a chap "name of" Bones McKinney leads the State team in scoring.

Letters To The Editor:

Letters to the Editor must be signed. If it is requested that the name be withheld for a good reason, the letter will be printed and the name withheld. Letters WILL NOT be printed unless they are signed.

To the Editor:

If the Roy Lathrop group (Roy Lathrop, president) can ever forgive me for submitting a letter to the college paper without having it approved by the English Department first, I would like to make a few comments on his latest literary masterpiece in the February 21 issue. I wish to thank him for devoting his whole column to me; it is not everyone here at State who rates this much space in our paper.

I was startled and humiliated when he started discussing the merits of a well written letter like an old English Professor after several years with the department. I should have realized that he being a column writer for the paper and having

achieved such a mastery of the better writing skills would naturally object to the slightest error I might have made in my writing. I sincerely hope that he and the English Department can forgive me if I make a few mistakes in this one, but after reading his response to my poorly written letter of last week, I simply cannot wait until Monday to get help from that department to answer it.

Roy, (please forgive the informal use of the first name), you said you were not going to answer my letter in the same manner and mood as my last letter contained; I guess you didn't, I got the impression you were "crying your eyes out" because I had hurt your feelings by saying your literary masterpiece had made me sick. Don't take it so hard man; we all have our bad days, and February 7 was obviously one of yours.

I would like to find out more about that group at State who can only see one side of college life . . . their side. You said you did not know how many were in the group, if this is true, I think they should elect a new president and replace you. Every president should know how many are in his group.

You said that honest unfavorable comments about your column were appreciated; I got the impression that you did not appreciate mine. It was and it still is my honest critical opinion of your February 7 column, if you will pardon the use of a little local slang, "IT STINKS TO HIGH HEAVEN!"

Know A Local Marilyn Monroe?

Tryouts for "Bus Stop," the three-act play just selected by the College Union Theater Committee to be produced this Spring, will be held on Wednesday, March 6, at 8 p.m. at the College Union. There are eight roles to be cast, plus numerous backstage positions.

The eight roles include 3 parts for women and 5 for men. The most difficult casting problem is that of Cherie, the part made famous by Marilyn Monroe in the screen version of the play. The other 2 female roles are that of Grace, the Bus Stop owner, and Elma Duckworth, her young assistant.

The 5 male parts include: Bo Becker, a young cowboy; Virgil Blessing, a guitar playing ranch hand; Dr. Gerald Lyman, a former college professor and now engaged as a rove; Will Masters, a sheriff; and Carl, the bus driver.

The play, to be presented in May, will be done on an arena stage, recently completed by APO Service Fraternity, in the C. U. Ballroom. It will be directed by Jon Bell, an engineering student, and Barbara White, C. U. staff adviser to the Theater Committee.

Income Tax Poop

A certified public accountant will talk with any students as a group and individually to clear up problems related to personal income tax returns, Friday, March 1, at 7:30 p.m., in Room 254 of the College Union Building, sponsored by the College Union House Committee.

Applications for Officers and Chairmen

Students who wish to apply for the position of president or vice-president of the College Union, or chairman of a Union committee are reminded that all applications must be turned in before March 8, 1957. Forms may be picked up in the College Union Activities Office. They should be filled out in duplicate and turned in to Paul Durrett, Social Director of the Union.

Film Talk

Friday, 7:30 p.m. in the College Union Theater. The College

Union Film Committee continues its series of interesting film talks, presenting this week an informative program on Sweden. Lehnart Henrikson, a native of Sweden, will speak, and there will be an interesting movie.

Starlight Room

There is dancing to the mellow tones of the country's finest musicians, as WRAL's Dan Xavier broadcasts his radio program, "Dancing with Dan," from the Starlight Room. Reservations may be made in the Col-

lege Union Activities Office. The Starlight Room opens at 8 p.m. and closes at 12.

Players, Incorporated

This weekend the actors and actresses of this talented troupe visit Pullen Hall to present two full evenings of fine dramatic entertainment. On Friday at 8:00 p.m. the rollicking comedy CHARLEY'S AUNT will be presented, followed on Saturday by HENRY IV (PART ONE). This is a program you cannot afford to miss. Free to Union members and their dates.

Weekend Movie

This weekend the Film Committee presents "Five Fingers",

starring James Mason, Danielle Darrieux, Michael Rennie, and Walter Hampden. The story of the highest paid spy in history... alive today, after the nations of the world swore to kill him! This spy thriller is one movie you should not miss!

A Campus-to-Career Case History

Al Morris (right) discusses a new amplifier system with Howard D. Thomas, one of his foremen.

"After training... it's up to you"

That's what Alfred E. Morris says about the Bell System. "And that's the way I like it," he adds. "Right now I'm in a job I didn't think I'd have for ten or fifteen years."

The job Al thought was more than a decade away is Plant Superintendent for the Hutchinson district in Kansas with Southwestern Bell. "You can sum up my work by saying I'm responsible for the installation and maintenance of all telephone equipment in a large part of central Kansas," Al says. "In times of emergency—a tornado, for instance—I have complete charge of maintaining and restoring service."

Here's how Al describes the steps that led up to his present job: "I started out

in Bell's management training program in 1951. This gave me an excellent opportunity to learn about all jobs in the company—not just the job I'd be doing. The program was well organized, and I got a lot out of it.

"My first assignment was to coordinate a dial conversion in La Crosse, Kansas, a quarter-million-dollar job. My next assignments were in Abilene and Lawrence. Both carried increased responsibility.

"I knew I was moving along pretty fast—but I was really surprised when my present job came up. It bears out what my wife and I thought when I joined Bell—there would be great chances for advancement."

Al Morris graduated in 1951 from the University of Kansas with a B.S. in Industrial Management. He is typical of many young men who are finding interesting career opportunities in Bell Telephone Companies, Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your placement officer has more information about these companies.

Final ACC Tourney Pairings Undecided

Basketball fans throughout the conference area will have to wait until Sunday before the final ACC pairings for next week's dribble derby are known.

According to the rules the pairings are as follows: (according to final position in standings)

- 1 vs 8
- 2 vs 7
- 3 vs 6
- 4 vs 5

In the event of a tie with the defending champion, the champion gets the higher position.

A GOOD SIGN OF SPRING . . .

Lou Pucillo Makes Grade In Big Man's Game As 5-Foot-9 Soph.

There's so much to say about Lou Pucillo that it's difficult to pick a starting point.

It's always gratifying to see a little man make good in a big man's game, and the State College backcourt ace is fast becoming the most popular player in the Atlantic Coast Conference.

Pucillo is a 5-foot-9 sophomore from Philadelphia, Pa., and is playing his first season of college basketball. He's the shortest person ever to receive a basketball scholarship to North Carolina State, and he's proving that Coach Everett Case still knows how to pick 'em—large or small.

Anyone as clever as Pucillo is bound to pick up a nickname or a phrase which adequately describes his many talents. Thus far, he has been referred to as "the Houdini of the hardwood," "the collegiate Cousy," "the dandy dribbler," and "midget magician." Nevertheless, his teammates call him "Peewee."

Rarity

Pucillo is a rarity among college basketball players. He is a clever and talented rookie who can do more things with a basketball than a trained seal and, best of all, he can put it through the hoop.

Little Lou is no "Hot Rod" Hundley, mind you, and he's not trying to compete with the West Virginia Flash. The Wolfpack ace uses his tricks in order to play better ball, and he's got just enough showmanship in him to carry out a dazzling routine.

As a high school student, he was the first customer in line when the great Boston Celtic star played in Philadelphia.

"I used to sit right beside the court so I could watch Cousy," Pucillo says, "and I tried to copy his every move. He has always been my idol."

"It was always the same story every time I went out for a team," he recalls. "The coach would look at me and say 'sorry, son . . . you're too small' and give me my walking papers."

Not being able to do anything about his size, Pucillo set out to improve his cleverness.

Style Paid Off

Lou soon found that his newly-adopted style was paying off. If he couldn't shoot over a play-

er, he learned to dribble around him; if he couldn't pass off the right way, he would whip the ball around his back; and he learned to dribble low to keep from losing the ball.

"He is a great asset to the team," Case remarked. "I defy one player to take the ball away from him, and when two or three opponents challenge him it leaves our players open under the basket. I think Lou is the cleverest dribbler I have ever seen."

"Peewee" is averaging 7.3 points per game but played little during the early part of the season. His top scoring performances were 15 against South Carolina, 14 against Clemson and 13 against West Virginia, Maryland and Florida State.

Fine Jump Shot

Pucillo mixes a fine jump shot with a two-hand set for his point-getting.

Off the court, Lou is a fun-loving, wise-cracking person who is extremely popular with everyone who knows him. He likes movies and music but most of all he likes basketball.

"Basketball has been good to me," he says, "and I hope I can be good to it."

. . . MIDGET HOUDINI

Edwards: "More Than Satisfied With Drills."

Head football coach Earle Edwards said that he has been "more than satisfied" with the results of North Carolina State's first week of spring practice.

"We have accomplished quite a bit," Edwards declared, "and the boys have shown a lot of enthusiasm, spirit and hustle."

The Wolfpack gridders began drills Feb. 19 and will work out four days a week until March 23 when the off-season practice

will be concluded with the annual Red-White intrasquad game.

"We did some experimenting the first week," Edwards said, "by changing some players to new positions. From the looks of things, we definitely will be stronger this year."

Edwards has some 75 candidates out for the 1957 team, his fourth since coming to Raleigh in 1954. Twenty lettermen are included in the group.

MY FAIR OXFORD

Scene: The London drawing room of Professor Moriarty. Kitchen, philologist and elocutionist. As curtain rises, Kitchen is singing and dancing.

Kitchen: Why can't the English learn how to speak? Hey? Why can't a woman be like a man? What? Why can't anybody grow accustomed to my face? So?

Enter Gatsby Donothing, a chimney sweep.

Donothing: P'arn me, Perfizer K, oi w'd loik tao lorn 'ow do spike e'en batterwise thun oi spike naow.

Kitchen: Ugh! (Aside) Yet, he's a challenge. (To Donothing) All right, loathsome, in six weeks, you'll be speaking well enough to go to the Coronation Ball!

Six weeks later.

Donothing: Sao, Prayfooser K, can yez thank what me spikes gentmanly aynuf naow? Do we be gung to Coronation Ball towgedder?

Kitchen: Oh, my Aunt Sally, the blighter hasn't learned a thing. I'm lost. But wait. I'll dress him in a Van Heusen Oxford cloth shirt. Then he'll pass as a gentleman for sure! All I have to do is be sure he keeps his big mouth shut. I'm saved, but good!

(Curtain)

Yes, friends, there's nothing like Van Heusen Oxford cloth shirts to make a gentleman of you. Whether you prefer button-downs, other collars, white or colors, see Van Heusen first. And buy. \$5.

Phillips-Jones Corp., 417 Fifth Ave., New York 16, N. Y.

Wake Forest Big Problem For State's Sophmores Sat. In Season's Final Conference Scrap

Can North Carolina State's four sophmores and a junior stop Wake Forest's four seniors and a junior Saturday night?

The Wolfpack plays host to the Deacons in Reynolds Coliseum at 8:15 in the season's finals for both teams, and the answer to the above question will be answered at that time.

Wake Forest, currently ranked 13th in the nation, will have to throw away its early-season scouting report on State because it's outmoded and obsolete. Lots of new faces will be in the lineup.

In two previous meetings, State and Wake Forest broke even. The Pack won 73-63 at Winston-Salem and the Deacs triumphed 73-66 in the second round of the Dixie Classic tournament.

In the previous contests, the Wolfpack started Cliff Hafer and John Richter at forward, Bib Seitz at center, John Maglio and Whitey Bell at guards. Only Bell, a junior, and Richter will start Steurday night.

The Pack's four sophs are Richter, an All-Conference choice, who will play the pivot; guard Lou Pucillo and forwards Ken Clark and Bob MacGillivray. Seitz and Nick Pond, a forward, will be available for

reserve duty.

All four Wake Seniors are averaging in double figures with Williams' 16 point mark setting the pace. He is followed by Murdock at 15.1, Wiggins at 13.3 and Gilley at 13.1. Carr's average is 6.9.

Richter, a 6-8 honor student in nuclear engineering, is State's top scorer with a 15.4 mark. Seitz at 12.8 and Bell at 11.0 are the other Pack cagers with double figure averages. Clark and Pucillo are hitting at a 7-point average per game.

A red-hot freshman game between the two schools will get the cage program underway at 6 o'clock. Coach Lee Terrill's

yearlings, now 13-5 for the year, defeated the Baby Deacons 79-72 at Winston and lost a thriller, 58-59, at Wilmington.

State enters the game with a 14-10 mark for the season. The Deacons had an 18-6 record prior to Tuesday night's encounter with top-ranked North Carolina.

Athlete of Week

CHARLES CHALKLEY — Paced the freshman track team to a very creditable showing last week in the ACC Indoor games. Took first place in the 600-yard run with a time of 1:16.1. Also member of winning One-mile relay team.

State coaching staff thinks Chalkley could develop into one of the finest runners in the conference.

Men in the know know true from false

It costs more than \$5,000 to send the average student through college

☐ TRUE ☐ FALSE

True. Schools and individual instances vary, of course, but the national average cost is estimated at nearly \$6,000.

Most college men belong to fraternities

☐ TRUE ☐ FALSE

False. Many schools don't permit fraternities, and at major state universities, there are always more independents than fraternity men. Fraternities are, however, at an all-time high in membership.

Jockey brand is America's best known brand of men's underwear

☐ TRUE ☐ FALSE

True. Independent surveys prove that Jockey is not only the best known underwear in the U.S.A. but also in 75 other countries around the world. Just shows how much men value comfort and fit.

Four All-Americans To Play In Classic

Several of the south's top collegiate basketball players will be on hand tonight, when the State All-Stars tangle with Darrell Floyd's All-Stars at the State Fair Arena here, at 8:00 p.m.

No less than four All-Americans and numerous All-Conference choices from recent years are on the rosters of the two teams.

The State team, playing its first home game of the season, is headed by Ronnie Shavlik, Mike Molodet and Bob Speight, all of whom made All-America while playing for the Wolfpack.

In addition, the local All-stars have Lefty Davis of Wake Forest and Joe Belmont of Duke, who were named to the All-Atlantic Coast Conference team last year along with Shavlik and Molodet.

Lou Dickman and Phil Di-ardo, starters on last season's Wolfpack team which compiled a 24-4 record, round out the State All-Stars, who last week ran their victory streak to 2 in a row by capturing the NCA Invitational Tournament.

The Floyd-led group is equally impressive with "name" players. The ex-Furman All-america, who led the nation in scoring last year, heads a strong aggregation which boasts a 21-game winning streak at this point.

Playing with Floyd are Ron Scheffel of State, Rudy D'Amilio of Duke, Mack Isner of West Virginia, Lee Collins of South Carolina, Ron Widenhemmer of Penn State, Mickey Harrington of Mississippi Southern, Willard Harris of Winston-Salem Teachers and Chester Webb of Georgia State Teachers.

The teams met early in the season with the Floyd All-Stars winning 55-47, but both clubs have been strengthened since that time.

Floyd leads his team in scoring with a 21-point average. He is followed by Harrington with a 14.1 mark, Isner and Emilio each with 12, and Scheffel with 9.3.

Molodet, hitting at a 21.7 clip, is the State All-Stars' top point maker. Other averages are Shavlik 17.3, Dickman 16.9, Belmont 15.4, Davis 11.8, Di-ardo 7.0, and Speight 5.5.

Tickets for the game are on sale at Kerr Rexall Drugs in Cameron Village, Huneycutt's in Hillsboro St., and Womble, Inc., in downtown Raleigh. Admission is \$1.25 for adults and 50 cents for children under 12.

Pictured above are Mike Miller, captain track squad, Coach Paul Derr and Frank Murry along with Max Phillips and Herman Walker getting in some early practice.

Everything But The Coliseum Burning Down . . .

If Reynolds Coliseum had burned down this year, it wouldn't have surprised the people at State College . . . especially the basketball staff.

Just about everything imaginable has happened to the Wolfpack this year. Injuries, scholastic trouble, and NCAA miseries took a heavy toll of State cagers, and of course there was the usual percentage of players who quit the team.

Yet despite the topsy-turvy year, the Wolfpack will wind up with a winning season.

This year's record won't win any prizes. When the results have been recorded in the brochures, they will show that this season was the worst of the 11 years Everett Case has coached the Wolfpack. But the mark will be no worse than 14-12 and it could be 18-10.

State began the season in a

hassle with the NCAA over the recruiting of Jackie Moreland. Then came Nick Pond's broken wrist, John Richter's sprained ankle and the loss of co-captains John Maglio and Cliff Hafer.

Eventually, State lost Moreland, Maglio and Hafer, in ad-

dition to Bob Goodrich, who quit the team at mid-season. But some "pre-season" troubles were rectified when Bob MacGillivray and Marvin Kessler returned after experiencing scholastic difficulty.

But that's all history now and the Wolfpack is looking to

Final Enrollment Figures Released

Final enrollment figures for the Spring semester were released by the registration office early this week.

School total honors again go to the School of Engineering by a large bulge. The school has

a lead of over 2100 with its total enrollment of 2926 as opposed to the runner-up School of Agriculture with 808 students. The Freshman class is, as expected, still the largest of the four main groups of stu-

dents, but their total at 1618 is less than double the number of seniors, 845. There are 414 people at State participating in its graduate program.

The Electrical Engineering curriculum is the largest single curriculum with 714 graduate and undergraduate students. Animal Ecology, Agronomy, and Industrial Education list the

smallest number of students per curriculum with a tie at one each.

4909 students remained here from the fall semester, while they were joined by 87 new freshmen, 114 transfers, and 190 former students returning to school.

Total enrollment figures for the second semester are set at 5301.

LOCKHEED

Aircraft Corporation

California Division • Georgia Division

Lockheed Representatives of the California Division and the Georgia Division will be on campus

Thurs. & Fri., March 7 & 8

You are invited to consult your placement officer for an appointment.

Separate interviews will be given for each division.

Both divisions of Lockheed are engaged in a long-range expansion program in their fields of endeavor.

California Division activities in Burbank cover virtually every phase of aircraft, both commercial and military. More than 40 major projects are in motion, including 17 models of aircraft in production—extremely high-speed fighters, jet trainers, commercial and military transports, radar search planes, patrol bombers. The development program is the largest and most diversified in the division's history, ranges across virtually the entire spectrum of aeronautical activity.

At Lockheed in Marietta, Georgia, new C-130A turbo-prop transports and B-47 jet bombers are being manufactured in the country's largest aircraft plant under one roof. The division is already one of the South's largest industries. Moreover, a new engineering center is now in development as part of the division's expansion program. In addition, advanced research and development are underway on nuclear energy and its relationship to aircraft. A number of other highly significant classified projects augment the extensive production program.

This broad expansion program is creating new positions in each division. Graduates in fields of: Aeronautical Engineering, Electrical Engineering, Mechanical Engineering, Mathematics and Physics are invited to investigate their role in Lockheed's expansion.

What engineers are doing at Ford Instrument Company

GUIDED MISSILES:

Typical of FICo is its work on the guidance system for the Redstone Missile and with the Army Ballistic Missile Agency on research, development and design of more advanced systems. Ford is also working with the Air Force and Navy in the missile guidance field.

ELECTRONICS AND RADAR:

Ford Instrument engineers are doing advanced work in electronics for data handling computers. Radar design, transistor work, airborne equipment, and both digital and analog computer development are the backbone of the company's research. The techniques FICo has developed in this work have application in the design of commercial and industrial automatic controls.

CLOSED CYCLE GAS-COOLED REACTOR:

This peacetime application of nuclear power is being studied at FICo. Operation of this type of reactor is based on the use of nitrogen or helium under pressure as the working fluid for direct transfer of energy from reactor to turbine. The feasibility of building by 1961 a power plant using this type of reactor to propel an oil tanker is now being worked on in FICo laboratories.

AIRCRAFT INSTRUMENTATION:

Ground position indicators, course and distance computers and other navigation equipment developed at Ford

Instrument Company are being installed in the most modern aircraft. Instruments for jet engines, for polar navigation, and aerial telemetry are emerging from the laboratories and into the shops of the FICo plants,

For over forty years, Ford Instrument has been designing the computers and controls that our naval guns and torpedoes, direct our rockets and warplanes and more recently, control nuclear reactors. Not widely publicized for security reasons, but highly regarded by the experts in the field, the achievements of the 2500 people at Ford Instrument Company have been advancing control engineering and computer development in many fields. Very soon, FICo will interview applicants on this campus to fill engineering positions for some of the most rewarding and interesting projects in America. Watch for further announcements.

Friday Night In Pullen

"Charlie's Aunt" Opens Two Nights of Plays

Players Incorporated of Washington, D. C., will present Brandon Thomas' CHARLEY'S AUNT on Friday, March 1, and Shakespeare's HENRY IV (PART I) on Saturday, March 2, at Pullen Hall at 8 p.m. Both events are sponsored by the College Union Theater Committee and are free to students, their dates, and other C.U. members.

For more than half a century CHARLEY'S AUNT has regaled audiences in every corner of the world and in every language. When young Lord Babberly is shoved on stage dressed as his best friend's Aunt and announces, "I'm Charley's Aunt from Brazil, where the nuts come from!" the audience knows the fun is just beginning. Charley's Aunt has become everybody's favorite relative, the adopted Aunt of every nation.

Shakespeare's classic HENRY IV (PART I) is really two plays in one: a brilliant comedy and a heroic tale of adventure. The comedy is provided principally by Falstaff, the fat and funny knight who has become a legend. The excitement derives from the rebellion of hot-headed Hotspur and his showdown in battle with young Prince Hal.

One of the finest touring attractions in the field today, Players Inc., is starting their eighth season on the road. Each year they trek approximately 35,000 miles through 30 states and Canada. Twice the troupe has played in the battlefields of Korea and twice they have played for the Defense Department in Europe. Last season they played Shakespeare in the Arctic Circle.

All members of the company are former students of the famous speech and drama department of the Catholic University of America, Washington, D. C.

Ken Lynch, Jr., as the sprightly old imposter Charley's Aunt in Players Incorporated production of the modern comedy classic.

IFC Holds Special Meeting To Draw Up Election Slate

By David Barnhardt

A special meeting of the Interfraternity Council was held yesterday for the purpose of drawing up a slate of officers to run in the campus elections for IFC President, Vice-president, Secretary, and Treasurer.

The Executive Committee presented a slate of six officers; this slate was accepted by the Council. The Executive Committee's slate listed one name for president, two names for vice-president, one name for secretary, and one name for treasurer. In accordance with the Constitution, President Greene then asked if there were further nominations from the floor; there were none, however.

Spec Hawkins then made a motion that if there were any other candidates who wished to have their names on the ballot, they be allowed to have until the next IFC meeting (March 6) to have their names passed on by the Council.

Any candidate, therefore, who wants his name on the ballot must be nominated and have at least a majority vote at the next IFC meeting to have his name considered by the Council for a place on the final slate—which will be drawn up next week. In case there are more than three nominations for president or more than two nominations for any other office, those with the highest number of votes will win places on the ballot.

The final report on the Armstrong Concert showed the expenses were as follows:
Taxes (approx.) \$640.00
Coliseum 521.50

Tickets	65.00
Door Guards and	
Ticket Takers	29.50
Publicity (approx.)	382.00
Armstrong	3000.00

Total \$4638.00
Net profit \$ 293.00
Guy Townsend, Chairman of the Greek Week Committee, moved and had passed a resolution that the fraternities collect canned goods for the Welfare Department this year as the I.F.C. Greek Week Project. Greek Week begins March 11.

A new Rushing Committee has been formed to study, revise, and rewrite present rushing rules. The members of this committee are Bill Bullock, Chairman, and David Barnhardt, Bob Gardner, and Byron Westmoreland.

Cafeteria Offers Special In Evening

Manager A. G. Sutherland of the State College Cafeteria, Leazar Hall, announced this week that the special plate inaugurated for the noon meal some weeks ago will now be available in the evening also.

The meal, consisting of one meat, two vegetables and bread, has cost the student 40 cents so far, and Sutherland says he intends to hold this price for evening meals also, if the volume causes it to pay its own way.

Menus during this week have featured a wide variety of foods including small steaks, beef stew, spaghetti, chopped steak, ham, frankfurters, fish, potatoes and corn.

Story Published In Raleigh Times On Married Housing Problem

Reporter Charlie Hamilton of the Raleigh Times, a former member of the State College student body, gave State's housing problem a big play in the Monday edition of the Raleigh Times. The story, featuring staff pictures by Madlin Futrell, showed and explained several of the most important problems and factors affecting the married housing on campus.

Hamilton traced the history of Verville, recalling its "temporary" erection following World War II, their practically absolute lack of improvement in the last few years, and the changing attitude toward married housing at State.

Quotations from Raleigh's Fire Chief J. B. Keeter said, "We didn't sleep for nights when they (the two-story units) were put up and women and children moved in," and continued, "we've been amazed that there haven't been fatal fires."

Insurance Department Engineer K. P. Dixon is quoted as saying that "loss of life would be inevitable" in case of a fire and that the two story apartments are "in direct violation of state law."

Hamilton commented on the two alternatives that the administration at State faced: either go all out for married housing, or abandon Verville and disclaim responsibility for married housing. (The College has, of course, chosen the former course).

In conclusion Hamilton quoted J. J. Stewart as saying, "permanent housing is the only answer." The article closed with the comment that "Dan Cupid had won his campus battle and is promising ever more headway. Regardless of campus fashion 20 years ago, marriage and college are a major part of today's campus picture."

Old Mother Hubbard is glad that her cupboard is bare and her dog is dead. Cause since he's not there give people a scare. She has found a man under her bed.

What a MATHEMATICIAN can do at IBM

Mathematics is an ancient but ever-advancing science that contains many forms. It shouldn't surprise you then that it took some time before John Jackson discovered the one brand of mathematics that seemed custom-tailored to his ability and temperament. John is an Applied Science Representative, working out of the IBM office at 122 East 42nd Street, N. Y. C.

First of all, what's it all about? What does a fellow like John Jackson do all day? In his own words, "I keep in touch with the executives of many different companies—advising them on the use of their IBM electronic data processing computers. I personally consult with these customers, and analyze their scientific and technical problems for solution by IBM. Occasionally, I'm asked to write papers, and give talks and demonstrations on electronic computing. All in all, it's pretty fascinating... something new pops up every day." In other words, John is a full-fledged computing expert, a consultant... and a very important person in this

The aircraft people decided that they couldn't afford to wait that long, so they called in IBM. After discussion with top executives, John helped to map out a computer program that saved the organization over 100 days

Mapping out a computer program

of pencil-chewing, nail-biting arithmetic. Later, for this same company, John organized the establishment of computer systems for aircraft performance predictions... for data reduction of wind tunnel tests... and for wing stress analysis. At the same time, he worked with this company's own employees, training them in the use of IBM equipment. John still drops around to see that everything is running smoothly.

Another service that John performs is the constant reappraisal of each customer's IBM operation. Occasionally, a customer may tie himself in knots over a procedural "stickler." Periodically, in fact, John brings IBM customers together... just to talk over what's happening in each other's business—how everybody else handled that old bugaboo in any industry... details.

New field for Mathematicians

John is exercising his mathematical know-how in a field that was practically unheard of ten years ago. Even now, this kind of work may be news to you. It was to John Jackson a few years back when he was an undergraduate at the University of Colorado. At that time, he was considering actuarial work or mathematical research. But John liked the excitement and diversification of science and industry and he wanted to use his

mathematical background in both of those areas. It was not until he was interviewed by IBM that field computing whetted his scientific appetite. A few months later, John launched his own IBM career as an Applied Science trainee.

Promotionwise, John has come a long way since that time. He's now an Applied Science Representative in one of the busiest, most responsible offices in the IBM organization... mid-town Manhattan.

With his wife, Katherine, and daughter, Lisa, 20 months, and John,

Discussing a problem with colleagues

Jr., 6 weeks, he enjoys his suburban Port Washington home. He's happy and he's satisfied. And then, too, John knows a few vital statistics about IBM... such as the fact that the Applied Science Division has quadrupled during the past three years, and that in 1956 alone, over 70 promotions were conferred. If ever a future held promise, here is one.

IBM hopes that this message will help to give you some idea of what a mathematician can do at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists and Liberal Arts majors in IBM's many divisions—Research, Product Development, Manufacturing Engineering, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, IBM will be happy to answer your questions. Just write to Mr. P. H. Bradley, IBM, Room 8701, 590 Madison Avenue, New York 22, N. Y.
