NORTH CAROLINA STATE COLLEGE'S STUDENT NEWSPAPER

Vol. XLI, No. 27 29

State College Station, Raleigh, N. C.

March 14, 1957

## Covering Campus...

### Dam Film

A film on the construction of the John H. Kerr Dam will be shown at the monthly meeting of the Society of American Military Engineers on Thursday, March 14, at 7:30 p.m. in Room 137 of the Coliseum. All students are invited to attend.

### Pulp and Paper Students

The first meeting of the newly formed Fourdrinier Society will be held on Monday, March 18, at 9 p.m. in Room 159, Kilgore Hall. All students who are majoring in Pulp and Paper Technology are invited to attend.

This is the first organization of its kind founded on the State College campus and with the cooperation of everyone, it can be a tremendous success.

The idea of this meeting is to explain the organization to everyone and outline the qualifications for membership.

### Diplomas

Any senior graduating on May 26, 1957, or at the end of a summer session in 1957, may choose to receive a diploma of the type awarded by State College before the adoption of the present diploma. In order to exercise this choice a senior must go to the Registration Office, Holladay Hall, before noon March 22, sign a request for such a diploma and pay the difference in cost, which is \$1.00. Seniors not making this request before noon March 22 will receive the diploma presently being awarded.

### Lent Services

During Lent there will be a brief moment of prayer and meditation at 10:15 a.m. daily Monday through Friday in the Danforth Chapel. Regular Danforth Chapel Services every Wednesday from 12:40 to 1:00 p.m.

### Industrial Engineers

A very important meeting of the A.I.E.E. will be held on Tuesday, March 19 at 7:00 p.m. in Riddick 320. Chapter officers will be elected for the coming year and plans for the Engineer's Fair will be discussed. Dr. Arnold Grandage will be the feature speaker of the meeting, presenting an explanation and demonstration of the IBM 650. All I.E. students are urged to attend.

### Attention Engineers, Military Students

A film on the construction of the John H. Kerr Dam at Bug's Island will be shown at the monthly meeting of the American Society of Military Engineers. The meeting will be held Thursday, March 14, at 7:30 p.m. in Room 137 of the Coliseum. All engineering students are invited to attend and apply for membership. A.S.M.E. is especially important to those in R.O.T.C. who expect to get a commission in one of the technical services, engineering or otherwise.

### Dance Bids

Tickets and bids for the Freshman-Sophomore Dance will be distributed on the ground floor of the College Union beginning Monday, March 18 through March 29 during the hours 12-2 and 6-9. Tickets are (See COVERING CAMPUS, page 12)

# Founding Commemorated

## Coliseum Kills Base Fee

### Exercises Held In Coliseum

Exercises commemorating the 70th anniversary of the enactment of legislation for the establishment of North Carolina State College were held this morning at 11:30 o'clock in the Coliseum.

Prior to the ceremonies, Governor Luther Hodges was greeted by an honor guard in front of the Coliseum. The honor guard was made up of the Drum and Bugle Corps, the Air Force Drill Team, the Pershing Rifles, and the Army and Air Force Colors.

After reviewing the honor guard, the Governor was escorted to the platform by the Regimental and Wing Staffs of the Army and Air Force ROTC units here.

Both houses of the General Assembly attended and participated in the ceremonies, following the regular meetings of the House and Senate in the State Capitol.

### Barnhardt Presides

Lt. Governor Luther E. Barnhardt presided over the program, which included a mock re-enactment of the bill creating State College.

Kemp Doughton, speaker of the House of Representatives, whose father, the late R. A. Droughton, was one of the sponsors of the measure establishing the college, spoke at the proceedings.

Informal remarks were made by Governor Luther Hodges and by William C. Friday, President of the Consolidated University of North Carolina.

Members of the Senate and House participating in the rites were Senator James M. Poyner of Wake, Senator Henry Gray Shelton of Edgecombe, Rep. Percy R. Ferebee of Cherokee, and Rep. H. Smith Williams of Yadkin.

### Others Participating

Others taking part in the program were Secretary of State Thad Eure, whose father was a member of N. C. State's first class; Chancellor Carey H. Bostian of State College who welcomed the audience; and Dr. A. M. Fountain, chairman of the State College Committee on the History of the college, who was in charge of arrangements for the program.

Music for the ceremonies was provided by the State College Band, directed by Major Christian D. Kutschinski. The college's entire Army ROTC Regiment and the Air Force ROTC Detachment also took part in the program.

The bill creating State College was ratified March 7, 1887. The first students were admitted on October 3, 1889, after the construction of the first building, later named Holladay Hall,

### Cochran Running For S. G. Prexy

Bob Kennel announced this week that George C. Cochran will be a candidate for the presidency of student government.

Cochran, a rising senior in the School of Textiles, has held various offices off and on the campus. Some of the more important offices include President of the Junior Class, Chairman of the Promotions Committee in Student Government, and President of the North Carolina State Student Legislature.

When interviewed by The Technician, Kennel had the following to say:

"In the last issue of The Technician, George gave a brief outline of the pertinent points that will form a basis for his platform. There has been much thought put into his platform and we all believe that it includes many of the outstanding things that we, as students, need and should get. At this time I wish to begin a series of articles that will elaborate on each specific point to show why we want to do these things."

### Lowering of Vehicle Fee

"For the past three years the Student Government has put a lot of work and money towards the building and paving of new parking lots. Most of our major parking lots have been or are in the process of being built. We feel that with the lowering of the registration fee there will still be definitely enough money to facilitate the building of new lots now and when the campus expands. And remember that a major portion of the

George C. Cochran

paving fund comes from parking tickets anyway."

### Date Tickets

"After talking to athletic and administration officials, it seems highly improbable that we will ever receive free date tickets for all events. We do feel that there are concrete possibilities of reducing all football and basketball tickets to a flat \$1.00. Thus we are striving to obtain for the students an adequate date ticket policy which is practical under present conditions. We are not making pretenses of doing the near-impossible; we are basing our campaign on a practical platform."

## Banquet Ends "Greek Week"

North Carolina State's Interfraternity Council brings to a close its annual "Greek Week" program tomorrow night with a banquet at the college Cafeteria.

The highlight of the evening will be a talk by Mr. Lindsay R. Whitchard, professor of English. The Sigma Pi Fraternity freshmen scholarship trophy will be presented to the fraternity whose fall pledge class maintained the highest average.

Bill Greene, president of the IFC, will present keys to those who served on the council during the past year. Greene will also award the IFC's Service Trophy to the fraternity who collected the most canned-food during "Greek Week."

The canned food drive for the Raleigh Welfare Association has become an annual project of the Interfraternity Council and is conducted each year as a part of the "Greek Week" program.

Other highlights of the past week included exchange suppers between the different fraternities and several discussion meetings on problems confronting the college's fraternity men.

A dixie-land jazz concert in Pullen Hall, featuring "Hot-Toddy and his Happy Five," will conclude the program tomorrow night.

Guy Townsend acted as chairman of the "Greek Week" committee.

### Resolution Abolishing Base Rental Fee Passed By Advisory Committee

State's William Neal Reynolds Coliseum Advisory Committee met yesterday to decide the fate of the Junior Class Resolution asking for a lowering or removal of the base rental charge asked for student use of the Coliseum.

The Committee, composed of Chancellor Carey H. Bostian, Coliseum Director Roy Clogston, Dean of Student Affairs J. J. Stewart, R. J. Preston, Dean of the Forestry School, Student Government President Jim Nolan and Chairman Brooks James passed a resolution abolishing the fee beginning July 1, 1957. The resolution provided that only actual expenses be paid by any student organization when the group was using the Coliseum for a non-profit event.

President of Student Government Jim Nolan said last night that due to complications involved in altering the Coliseum budget prior to the end of this fiscal year, the change was postponed until July. He mentioned also that a rescheduling of fees charged for various services at the Coliseum would be necessary before the new plan could be put into effect.

Nolan concluded saying, "I honestly feel it would be best to wait, but I am highly gratified at the action taken."

George Cochran, President of the Junior Class, which originally proposed the change, said "I'm awfully happy to see the thing go through, though I am naturally disappointed that it can't be started until next year. We feel we have accomplished something worthwhile for the future, though."

Other action taken at the meeting included clarification of reservation of parking space at the Coliseum. Director Roy Clogston said that only the east lot would be reserved under normal circumstances and that the west lot would be left open for student parking. He pointed out that on some unusual occasions the west lot might have to be closed too, but that this would happen only rarely.

He continued saying that from this time on, the closing of the lots would be placed in the hands and under the jurisdiction of the Traffic Committee. They would have control over the time that the lots would be closed and the method to be used in closing them.

### Riot Allegations Denied On WRAL

Student Government President Jim Nolan, IDC President Fred Joseph, Syme President Wayne Cotten and Becton President Jim Rose appeared on the evening news show on station WRAL Tuesday night at the invitation of News Editor Ted Davis.

The State students presented their version of the riot which occurred on the campus last Thursday night, refuting allegations made by the police and Raleigh newspapers concerning the behavior of the students.

They denied that any State students had slashed tires on cars and also denied the overturning of automobiles and brick-throwing of which they had been accused by the police and newspapers in sensational news stories last weekend.

### Featured In Fashion Show

Meredith Students Sara Helms and Sara Armstrong buy some of the first spring flowers in front of the Capital this week. The girls will be among those participating in the Fashion Show at the College Union tomorrow night.

# Almost time to Vote . . .

The political pot is beginning to boil on the State campus as various candidates announce their intentions of pursuing the honors of public office.

As the announcement of the Elections Committee noted last week there are almost as many offices open as there are students. Everybody on campus could run for some office if they so desired.

Much has been said about the quality of our various officers and representatives in the past few weeks. They have been criticized for their actions on several matters. There is no better way to be sure of the actions and attitudes of the various candidates than to investigate their announced intentions in various matters and be sure of what you are voting for when you vote.

A carefully contrived campaign can put a candidates name in front of the public with ridiculous ease. And there are many voters who will mark a name on a ballot only because they have heard it before. This can be extremely bad, as is immediately obvious, for a publicity-wise candidate with no interest in the office other than personal gain or glory can slip in with "no sweat."

Often, too, many important offices are over-shadowed by interest in the more obviously crucial offices. The elections for the Judicial Board, the class officers, the publications editors and the legislature representatives are every bit as important as the major officers.

We would heartily recommend that all students pay close attention to all the publicity in the weeks preceding the elections on April 3 and April 10. Separate the sincere promises of effort on the student behalf from the gloriously crusading promises of sweeping change. Elect men who are interested in State and State students.

## Good News vs. Bad

We would like to compliment State College's Interfraternity Council on their food drive for the Wake County Welfare Department being conducted this week.

State could use a lot more gestures of this sort to offset the bad publicity received for incidents such as the riot last week.

As Guy Townsend observes in a letter to the editor this week, bad news is always the type of news that gets the full page heads and the gaudy treatment. While this is undoubtedly attributable to the "nature of the beast" . . . man . . . it hurts to see bad news crowd pleasant news off the front page.

But if there is enough good news and no bad news about State, the good news will inevitably be used.

If more people would emulate the IFC and make good news this could get to be the case.

## Letters To The Editor:

Letters to the Editor must be signed. If it is requested that the name be withheld for a good reason, the letter will be printed and the name withheld. Letters WILL NOT be printed unless they are signed.

To the Editor:

With the episode of the riot at State College not far in the past, I would like at this time to express an individual's opinion. I do not know the details of the riot except what I got from the newspapers and some information from the students. For this reason I see no need to "take up the cause" and defend or commend anyone's actions. In your paper however, I see a definite trend toward "circulation increase" articles rather than the presentation of the news on its own merit. To be specific I refer to the Saturday, March 9 issue of the *News and Observer*. On the front page your paper had several pictures and a rather verbose article on the riot at State. In the same issue, but on the back page of the second section, you had an article on the annual Greek Week at State College. The article was brief, to say the least, and it was all but smothered by the headline above the other "story" about the recent unpleasantness.

Greek Week is for the purpose of bettering student relations with the citizens of Raleigh and assisting the Welfare Department. While the collection of canned goods does not provide as exciting or colorful copy as a riot, it nevertheless will provide subsistence for many of the less fortunate of Wake County. While articles concerning murders, robberies, riots, rapes and incest draw attention and increase circulation of the paper, they do not present a true picture. It might be better occasionally to present the good in a wider scope than to hide it in some obscure part of the paper.

The good will be forgotten soon enough, but the results of the riot will linger, thanks to the eloquent spread given it by the *News and Observer*.

In the interest of objectivity in news coverage, I beg you, Sir, to print this letter in its entirety.

Guy Townsend

Ed. Note. The above letter was received as a copy of a letter mailed to the editor of the *News and Observer* by Townsend last week. He requested that *The Technician* print it also.

To the Editor:

This letter concerns our immature State Students and their riot. First let me criticize your paper, the March 11 issue. It

was my impression from News and Writing course that a paper does not express policy or formulate opinion, at least not on the front page. I'm referring to your pictures and the writing under them. Such a statement as this one, "Then there were those smart ones who watched the Thursday night riots from their dormitory windows" is strictly for the editorial page. Also that one under the court picture glorifies your paper and is nothing short of saying it is the best. On the other hand, congratulations to the photographer for his audacity and interest.

As far as the riot goes, I was one hundred per cent for it. Maybe it wasn't the best thing for the students to do, but they are not to be criticized for it. I don't know why it is that only those people who criticize State have access to ways of expressing their opinion over such public systems as the paper and radio. Doesn't anyone ever come in our defense? Are we always so wrong? Are we not entitled to investigation? People sure did squawk when State was so wrongly accused without trial by the NCAA.

Unfortunately I was not present in the riot. I was disappointed that I did not witness it, after I heard the magnitude of it. I was in bed when I heard of it and I could not believe such a thing was happening here at State. Not here at State! I did not have the initiative to get out of bed, typical of the suppressed attitude here at State. Nor could I believe the incident of the painted car at Carolina. State students just are not recognized for such spirit. I know, our student paper has told us enough times.

I think the students had a legal gripe. I've been at State for three years and have seen the parking situation improve very little. In fact, now we are forbidden to cross the tracks with our cars. (By the way, I haven't got one.) The traffic tickets are too expensive. If a student was to come on the campus Thursday night he would have had to park in Cameron Village, I'm afraid. Unless he did not have a black and white sticker on his car, for we all know they are the only ones that get tickets.

As I expected we all got a paper Friday telling us how immature we are. I was expecting this paper and it disappointed me. (See LETTERS, page 3)

## Teachers Leave! Can They Be Stopped?

State College faces a grave loss of ninety-nine means some 17% have left. Many have been replaced. Of the 99 covered in this report made available by the Chancellor, 62 were noted as replaced but 33 had not been.

Recently, in the budget appropriations for the coming biennium, the Budget Advisory Commission advocated raises for state employees, including the faculty at State, which were less than half the amount recommended by the administrators of the college.

We are losing our best teachers . . . we have been losing them . . . and we will continue to lose them. Two years ago, when the legislature was called upon to provide raises and did not do so, several score of professors and instructors left State for more lucrative positions elsewhere.

For this they cannot be blamed. The wages they are paid are meager in the extreme.

To cite a few examples, we would mention one member of the Engineering School faculty who left State for greener pastures in the last two years and received a salary increase of some \$13,000. Admittedly, this is an extreme example, but other good, dedicated teachers have faced offers only half so enticing and been forced, for the sake of their families' and their own standard of living, to leave State.

In a period between May 1955 and September 1956, ninety-nine faculty members left State. State's faculty numbers approximately six hundred . . . the

loss of ninety-nine means some 17% have left. Many have been replaced. Of the 99 covered in this report made available by the Chancellor, 62 were noted as replaced but 33 had not been. The most alarming thing was the number who had left State to go to other teaching positions. Admittedly the state of North Carolina can never compete very successfully with industry, but only 37 went to industry, 27 left for higher pay at other institutions, many of them public supported, as State is.

Salaries must be increased. And this quest is something which should be the concern of the students at State as well as the faculty members themselves. The quality of our instruction varies directly with the quality of our instructors. Many of the complaints heard about teaching methods stem back to earnest but inept teachers who are doing the best they can and are the best available for the money offered.

Not all of State's faculty fall in the blanket generality "inept" . . . many of them are seriously interested in sharing their knowledge with others. And they have found some means of "getting by."

When a neighboring institution can offer \$1000 more per year for a comparable position it is past time for some action to be taken. Perhaps this year General Assembly will do something to stop the mass exodus which will no doubt take place this summer if action is not taken.

## IDGAD

ROY LATHROP

The Coming Elections

Within the next few weeks, we will be seeing the start of a lot of campaigning for the various campus offices. Most of us in the past have been a little uninformed about the qualifications of the different candidates—probably because it's so hard to separate the truth from the bull in the fast-running campaigns. But since there is an increasing demand on the men who hold the important positions on the campus, it is much more important this year to look at all the candidates more closely than ever before.

Most of us, if asked, could name some of the good points we would like to see in a man running for a top office. We would ask for someone who is thoroughly familiar with the post he is seeking, someone with experience in the organization he is asking to lead. We could rightfully demand that any candidate be ambitious, that he

present a platform that shows his sincere desire to follow a program that would be most beneficial to the students at State College as a whole. We want a man who has shown leadership in the past—a man who has worked hard at a job he has been given.

None of us want to see campus elections reduced to a popularity contest—and mud-slinging on the part of the candidates or their friends is completely useless. We aren't interested in hearing a lot of talk about what the various candidates don't have, but it is important to hear instead what they can do and intend to do. (See IDGAD, page 3)

## LETTERS TO THE EDITOR

(Continued from page 2)

ists me. Why are our representatives (not in this case) so inefficient on getting such material to us. Whenever something happens, I never hear about it until three days later in *The Technician*. Such as when the basketball tickets go on sale.

I don't see where the revolt riot was such an immature action. Speaking of immaturity the students, did you ever observe the action of the fans at these basketball games? Did you ever observe their condition, drunk! What is so mature about disregard for other people's rights?

Did you ever see the parking lots after a basketball game? Isn't there a law in North Carolina about litter on the highway? Doesn't this apply to our campus? Did you ever see the papers, boxes, liquor bottles and other cans left in the parking lots, scattered over the grass? How about a guy who double parks, or blocks an entrance and is told to move or be towed away and answers, "Tow me away, I have the money to pay for it?" Real mature, you tell me. How about these people who back their car up over the curb and park on the grass diagonally between the sidewalk and road, and oddly enough none of these cars have parking tickets on them. Nor do those that are parked in front of the Coliseum for the hour I was standing there Thursday afternoon.

Robert E. Lyne, Jr., Chairman of the Student Judicial Board, said nothing could be gained by mob violence. I don't know, I wasn't up at the Beacon, Bagwell quadrangle Saturday night and you never saw such a complete and efficient discharge of traffic in your life.

It was orderly and effective without a bit of trouble. Also he said, it could only bring harm to those who participate. It brought nothing but quick results, something that has never achieved here at State. The difficulty could have been settled by more ethical means, such as those conditions you present in your paper each week the changing of the graduating diplomas, the second or third bell on the campus, plans for the spring dances, the argument of athletic tickets. Yes, ethical means are being used and the results are typical of State, none.

Yes, a few were harmed, those who had to pay the fine. A similar thing occurred at a Mississippi school and the students were released because the fines were paid out of the pocket of the student body on the spot. Besides, why should 16 pay the penalty for 700 and especially when that remaining 684 received benefits, they got results the following night. I think if those 16 get suspended it is a crime and the entire Judicial Board ought to be impeached, of course they are not going to say anything cause it does not affect them. But I'm sure they agree with the democratic action or intention of the riot. There never would have been a riot had not the police returned in their howling squad car. Everything was calm when they returned. One cop was reported to have said, "So you're want to have some fun" and that was when the first bomb was fired to the top of the building. It sure was believed that the police enticed and provoked the students on.

We're always harping about enthusiasm and spirit at State. Where's our leadership? Where were our representatives Thursday night? Those we elected to

handle such problems. I don't mean to say they were to quell the riot but they may have handled it ethically were they there and if they had made themselves known to their electors. Where were they Thursday night? Were they studying to keep their B average to be eligible for elections for next year?

A real democratic thing for one of our legislators to do would be to stand up in General Assembly and say, "I don't want to see one cent authorized for those hot-headed-hellions at State." Yes, that's using about as much sense as us immature students.

As far as reserving rights for parking at the Coliseum

## THE TECHNICIAN

March 14, 1957

goes, I can't see this either. I'm an athlete benefitting by such action but I still can't believe in it. Where did the College get authority to reserve such a right? It seems every time the students are involved with the Coliseum, nothing can be done. It seems the Coliseum is not a part of the campus or school. My hearty approval goes to

the "mob." Never has State shown such spirit. Never have the students gathered in such an effective manner. It is something not to be forgotten, it's a feeling not to forget, it's something to talk about, State did have a student body if it was for only a day. There was a feeling of mutualism and common interests. Don Miketa

This may not have any right here but isn't there a law in this country against "double jeopardy"? Aren't these students paying their debt to society in the civil courts? How is it they are tried a second time for the same crime, if it was a crime?

What is so bad about our riot here at State? You have just heard the opinion of those who were directly affected by the action. Those who were the victims of the riot. How about those who were not directly af-

or State. This year we can make elections a huge success by taking the trouble to learn about the candidates, thinking about what we learn, and then marking our ballots accordingly. Let's look for experience, interest, ambition, and sincerity in the various candidates. We all have enough good judgment to not take everything that will be handed to us in the coming campaign — by sifting and sorting everything we hear and see, we can honestly say we have all the best men for the best jobs.

In campus elections, we hold the powerful right to vote as we please. When the ballots are counted, the results will show how well each one of us has taken his responsibility of choosing the leaders for another year.

## C.U. Set Bowling Tourney Mar. 18-30

The C.U. has announced plans for its annual spring bowling tournament. The tourney will be Ten-Pins only.

Qualifying rounds will be rolled at the Man-Mur alleys any time between March 18-30. Each person will roll three games and total pin fall will be recorded by the manager and posted on the score-sheet. On the 30th of March the ten people with the highest totals will have qualified to represent N. C. State in the national air-mail tournament.

On Monday night April 8th the 10 qualifying will bowl for score. The results will be air-mailed to tournament headquarters to be compared with similar entries from all over the country.

Any student is eligible to enter and complete details can be obtained at the Man-Mur Bowling Alleys.

for dorms and March 21 for fraternities.

#### Notice:

Archery, Bait Casting, Target Rifle Shooting, and Trap Shooting. We have been challenged by the University of North Carolina to a Rod and Gun Field Meet. All students interested in trying out for our Archery, Bait Casting, Target Rifle Shooting, and Trap Shooting teams are asked to contact the Intramural Office immediately.

Art Hoch  
Gymnasium, ext. 218

Dan Stancil, IDC Athletic Director, holds the dormitory championship trophy, as Fred Joseph and Cary Warren, athletic directors for Owen I and Becton I, covetously admire it. The cup is awarded annually by the IDC to the dorm team which collects the most points in all competitive sports.

IT'S FOR REAL!

by Chester Field

## FIREBUG\*

A thousand curses on that slim,  
Incendiary she  
Who—calculating shrewdly my  
Combustibility—  
Enflamed me with her eyes and let  
me burn so merrily  
That when the fire was out she'd made  
A perfect ash of me.

**MORAL:** Where there's fire—there's smoke. So pull yourself together, chum, and put a flame to the end of your Chesterfield King. Ah-h-h-h—that feels better. Take comfort in that regal, royal length. Enjoy the smoothest natural tobacco filter. Savor the smoothest tasting smoke today—packed more smoothly by ACCU-RAY!

Like your pleasure BIG?  
Chesterfield King has everything!

\*\$50 goes to Daniel J. Sullivan, Holy Cross College, for his Chester Field poem.  
\$50 for each philosophical verse accepted for publication. Chesterfield, P.O. Box 21, New York 46, N. Y.

© Liggett & Myers Tobacco Co.

## State College Ends Basketball Season—15-11 Record Ritcher Leads in Three Depts.; Case Looks to 1958

It was a winning season, since the final record shows 15 victories and 11 defeats, but from a won-lost standpoint it was North Carolina State's worst season in eleven years under Everett Case.

A maker of champions, Case had walked off with nine conference crowns in ten previous years. And the one time they failed to win the big prize, the Wolfpack was only one point off—losing to Wake Forest 71-70.

But this wasn't State's year. Plagued by NCAA trouble, injuries and scholastic difficulty, the Wolfpack fought uphill all the way, yet still managed to win more than it lost.

Only one other State team ever lost as many as 10 games—the 1952 squad—but even that team breezed through the conference tournament and wound up with 24 victories.

From mid-season on, the 1957 Wolfpack had to rely upon four sophomores and a junior. Despite an inexperienced squad, the team would up with bright prospects for the future.

Final statistics show that big John Richter, a 6-8 forward-center from Philadelphia, was the leader in three departments during the year. He was top scorer with 372 points for a 15.5 average, the most accurate field goal shooter with a 51.9 mark, and the best rebounder

—With four Sophs, one Junior & several good Freshmen—Case thinks about next year

with a 12.7 average. Bob Seitz was the team's top free throw shooter, hitting 95 of 109 tries for an 87.1 mark. Seitz, a 6-11 senior who wound up his collegiate career in the ACC tournament, was second to Richter in scoring with 315 points and a 12.1 average.

Whitey Bell, the only junior on the starting team, captured third place in scoring with an 11.3 average. He was followed by Bob MacGillivray at 8.7, Lou

Pucillo at 7.6 and Ken Clark at 7.3.

John Maglio and Cliff Hafer who were declared ineligible after 19 games, had 13.5 and 10.8 scoring averages respectively.

Final figures show the Wolfpack hit 44 per cent of its field goal attempts, 67.3 per cent of its free throws, averaged 46.5 rebounds and 75.7 points per game.

Richter's 31 points against Duke was the individual scoring high for the season. State also reached its team scoring peak against Duke, running up 102 points in the Dixie Classic. Only one team—West Virginia—reached the century mark against State.

## Spring Sports

Coach John Kenfield, Jr. has issued a call to all students interested in trying out for the varsity and freshman tennis teams. Students may contact coach Kenfield either at the gym or on the tennis courts each afternoon after 4:00.

Students are also invited to join any of the other spring sports all ready in progress. (Track, baseball, golf) by contacting the respective coaches.

Coming FRIDAY, MARCH 22

## Engineering Representatives of PRATT & WHITNEY AIRCRAFT

to interview  
senior and graduate . . .

AERONAUTICAL ENGINEERS  
ELECTRICAL ENGINEERS  
CHEMICAL ENGINEERS  
MECHANICAL ENGINEERS  
NUCLEAR ENGINEERS  
PHYSICISTS

Interviews will be held on campus March 22 between 9 A.M. and 4 P.M. Please make your appointment today through the College Placement Office.

## PRATT & WHITNEY AIRCRAFT

E. HARTFORD, CONNECTICUT • WEST PALM BEACH, FLORIDA

Shown here is a Dempsey Dumpster which was set on fire during the riot last week. Used for collecting trash, the Dumpster had most of its paint burned off by the heat.

## Three Attend Nuclear Meet

Three faculty members in the Physics Department of North Carolina State College will play key roles in the 1957 Nuclear Congress now underway in Convention Hall in Philadelphia, Pa.

Dr. Arthur M. Menius, Jr., head of the State College Physics Department, and Dr. J. G. Lundholm of the department faculty will present a technical paper, entitled "Millimicrosecond Coincidence System."

Another member of the staff, Harold A. Lamonds, will serve as co-chairman of one of the technical sessions of the congress.

The congress, which is being attended by scientists from throughout the country, is sponsored by a number of the na-

tion's top-level scientific groups including the American Institute of Physics, the American Nuclear Society, and the American Rocket Society.

### Receive Commission

On Monday, March 4 two new officers received their commissions as Second Lieutenants in the U. S. Army Reserve through the Army ROTC program at N. C. State College. In a ceremony conducted at the Military Department, Colonel Richard R. Middlebrooks, PMST, administered the oath of office and presented commissions to Fred C. Abernethy, Jr., Infantry, Hickory, N. C. and Bobby E. Greene, Quartermaster Corps, of Oxford, N. C.

## Step Into the Expanding Field of Instrumentation

Automatic control, or automation, or data reduction are all Instrumentation, and offer some of the broadest and most satisfying careers available to today's engineers and scientists.

Atomic energy, iron and steel, aircraft and automobiles, chemicals and chinaware, petroleum and electric power are only a few of the many industries which need instruments. This need creates permanent opportunities in many of our operations, including research and development, product engineering, industrial engineering, production, inspection, market development and customer contacts.

The products with which you would be concerned include automatic, high-precision instruments for controlling, recording and indicating temperature, chemical concentration, radiation phenomena, frequency and load and many other conditions. For heat-treaters we make furnaces and process equipment. For the worker in science—whether student or researcher—we make both automatic and manual laboratory-type instruments, with which you may already be familiar.

The Company has about 3000 people—is one of the biggest in its field, yet is compact enough for you to be able to "follow the score." Its reputation for progressiveness in industrial relations, and for quality of product is world wide.

Wayne L. Besselman, our Coordinator of Technical Employment, will be on the campus on March 22, 1957 with information which he will cordially share about our very modern opportunities and rewards for engineers and scientists. Your placement bureau will arrange an appointment with Mr. Besselman, at your request.

## Best Army ROTC Platoon Announced

In platoon drill competition conducted on Thursday, March 7 by the Army ROTC Cadet Regiment of N. C. State College, the Second Platoon of Company "L" was judged the best of the 36 platoons in the regiment in platoon drill.

This platoon led by Cadet First Lieutenant Claude Wayne Moss, the son of Mr. and Mrs. W. J. Moss of Route 1, Rural Hall, N. C., won the contest in

a close final competition by displaying a superior knowledge of drill and precision in its execution. The appearance, alertness, and esprit of all platoon members contributed greatly to their success.

This platoon will represent the Army ROTC of N. C. State College in drill competition at the Cherry Blossom Festival in Washington, D. C. on April 3.

## Men in the know know true from false

More than 50% of college men earn at least half their way through school

☐ TRUE ☐ FALSE

False. While 71% earn part or all of their expenses, the breakdown is: 17% earn nothing; 25% earn less than 1/4; 20% earn 1/4 to 1/2; 14% earn 1/2 to 3/4; 24% earn 3/4 to all.

College men usually marry college women

☐ TRUE ☐ FALSE

False. They might like to, but there are just so many more college men than college women that they can't. However, it is true that college girls usually marry college men.

The vital part of Jockey underwear lasts longer than the rest of the garment

☐ TRUE ☐ FALSE

True. The waistband is usually the weak point of most underwear, but Jockey developed a special, long-wearing, heat-resistant elastic (with U.S. Rubber and the American Institute of Laundering) that actually outwears the garment itself.

## FORD INSTRUMENT COMPANY TO INTERVIEW ENGINEERS HERE

### What engineers are doing at Ford Instrument Company

#### ELECTRONICS AND RADAR:

Ford Instrument engineers are doing advanced work in electronics for defense equipment. Radar design, transmitter work, airborne equipment, and both digital and analog computer development are the backbone of the company's research. The technique FICo has developed in this work has application in the design of automatic and industrial electronic controls.

#### CLOSED CYCLE GAS-COOLED REACTOR:

This promising application of nuclear power is being studied at FICo. Operation of this type of reactor is based on the use of uranium or plutonium rods in the working fluid for direct transfer of energy from reactor to turbine. The feasibility of building by 1961 a power plant using this type of reactor to power an aircraft is now being worked on in FICo's laboratory.

#### AIRCRAFT INSTRUMENTATION:

Ground position location, course and distance measurement and other navigation equipment developed at Ford Instrument Company are being installed in the most modern aircraft. Instruments for jet engines, for fuel management, and aerial navigation are emerging from the laboratory and into the shops of the FICo plants.

Instrument Company are being installed in the most modern aircraft. Instruments for jet engines, for fuel management, and aerial navigation are emerging from the laboratory and into the shops of the FICo plants.

**GUIDED MISSILES:**  
Typical of FICo is its work on the guidance system for the Redstone missile and with the Army Ballistic Missile Agency on research, development and design of new advanced systems. Ford is also working with the Air Force and Navy in the actual guidance field.

For over forty years, Ford Instrument has been developing the computers and controls that aim our naval guns and torpedoes, direct our rockets and warplanes and more recently, control nuclear reactors. Not widely publicized for security reasons, but highly regarded by the experts in the field, the achievements of the 6000 people at Ford Instrument Company have been advanced control engineering and computer development in many fields. Very soon, FICo will interview applicants on this campus to fill engineering positions for some of the most rewarding and interesting projects in America. Watch for further announcements.

**FORD INSTRUMENT CO.**

Division of Sperry Rand Corporation  
22-10 Thomson Avenue, Long Island City 1, New York

### Engineers at Ford Instrument have exceptional opportunities

#### 1. You get a chance to show your abilities

Ford Instrument Company is large enough to offer a variety of interesting work, and small enough to give its engineers a sense of individuality. Your engineering knowledge and abilities will certainly be put to the best possible use. The people you work with will be stimulating and congenial, and the opportunities for your future will be unlimited. It is a company made up of technically minded people. When you tackle problems, an entire team takes part, and each member watches every step of progress from new idea to practical reality.

#### 2. The work involves America's future

On this page are shown a few projects which Ford Instrument engineers have worked on. There are many others, but they all have one thing in common: These vital projects encompass a variety of technological advances which are important steps in the scientific and industrial progress of the country.

#### 3. Job benefits are unusually liberal

Salaries are as good or better than offered by other companies in the field. There are many other job benefits, such as payment by the company of full tuition for advanced study, pension, and insurance. Your future at Ford is stable, because only positions of permanency are offered.

#### 4. Advanced study is at your doorstep

Such excellent schools as Columbia, New York University, Polytechnic Institute of Brooklyn, City College of New York, Cooper Union, Pratt Institute, Stevens Institute of Technology, and Manhattan College are within easy reach. For those interested in advanced degrees this is of value. In addition, most scientific and engineering societies have their headquarters in New York. You can enjoy their regular meetings and the contacts with other engineers.

We often forget the advantages of living in New York or its suburbs. The city, with its opportunities for entertainment, culture, shopping and sports, has everything — it is truly the capital of the world. From the U. N. Building to Radio City, from the glitter of Broadway to the shops on Fifth Avenue, from the Battery to Central Park — New York is an exciting city to see and a stimulating one in which to work.

## Army Cadets Named As Distinguished Military Students

Two cadets of the Army OTC Regiment of N. C. State College have recently been designated "Distinguished Military Students." They are Cadet Major James L. Lowe, Jr., and Cadet Major Jack H. Frazelle. These students achieved this honor by demonstrating outstanding ability in military leadership, and by having a high academic standing both in Military Science and in College.

Cadet Hubbard was promoted regimental adjutant with rank of major, and Cadet Major Lowe, Jr., moved up to regimental S-3.

Cadet Hubbard, a Senior in textiles, is the son of Mr. and Mrs. H. L. Hubbard of Charlotte, N. C.

## WORK IN CALIFORNIA

with State Dept. of Water Resources  
or State Division of Highways

California offers unlimited engineering opportunities in two major activities.

Division of Highways' huge freeway building program offers wide choice of work locations and rotating engineering assignments.

Department of Water Resources handles the State's unprecedented water development program. Work includes design and construction of big dams, power plants and statewide aqueduct system; water quality and flood control.

## BEGIN YOUR CAREER WITH A LEADER IN WEAPONS SYSTEMS DEVELOPMENT

Bell Aircraft Corporation now offers you the opportunity to join the Nation's foremost team of missile specialists. The combined efforts of our engineering team members directed towards the development of better weapons systems for defense have been crowned by such achievements as the Rascal Missile, key weapon in Air Force strategy, airborne electronic and servomechanisms systems, and rocket motors for a variety of missiles programs including the "Nike". The missile and aircraft weapons systems of the future are now being developed in our laboratories. In addition opportunities for a permanent and promising career are also available for engineering and scientific graduates in many other fields including our NEW NUCLEAR ENGINEERING DEPARTMENT.

Be sure to arrange through your placement office to meet with our representative on March 20 & 21 for complete information on the varied, creative assignments offered with the Bell Aircraft Engineering Division.

# New Dormitory Is Designed To Fit Needs of Students

We will soon see the beginning construction of the most dramatic and beautiful building on State's campus . . . the new dormitory that has been needed for so long. And at last we are getting some student housing that makes sense; besides being good-looking, this dormitory will be built so that it is completely functional. A great deal of thought has gone into the design of this dorm so that the needs of the students are given first consideration. Listed below are some of the most interesting features of this 800-man dorm:

(1) Noise will be cut to a minimum by the layout of the rooms. Corridors running the full length of each wing will be built like balconies, open to the outside; from these open corridors will be doors opening into a "section" of four rooms.

(2) Each section of four rooms will have a small hallway in the middle from which doors open into the separate rooms. In each section, there will be a telephone, shower and bath room facilities, and lavatories.

(3) All furniture will be built-in; the beds will be Hollywood style with innerspring mattresses, there will be a sliding door closet for each man, desks are built to the wall with tack board and shelves provided above, and a dresser with ample drawer space will be provided for each man.

(4) The dorm will have a modern grill room in the central portion. Also provided will be a modern lounge and rest rooms for men and women visitors. Trunk lifts will be available for heavy luggage, etc.

(5) Estimated cost—\$2,000,000.

(6) There will be 100 separate sections, housing 800 men.

This modern structure (a cut) will be located on the north side of Dan Allen Drive, immediately South of the College Print Shop. This location will be such that it can be seen from many parts of the campus, adding an impressive touch to a continually growing campus. This kind of dormitory what we have all been waiting for—let's hope there are more like it to come.

State's new ultra-modern 800-man dorm will occupy the hill behind the State College Print Shop on Dunn Avenue. Construction, to begin soon, should be completed by the fall of 1958.

**Wednesday, March 20**

## ENGINEERS

and

## SCIENTISTS

*we'll be on  
the campus  
MARCH 18, 19  
to discuss  
your future at  
Boeing*

*...where you can rise to the top*

Right now you're in the process of making one of the most important decisions of your life.

Your decision is important to us, too, because we are interested in engineers and scientists who want to get ahead. We're coming to the campus to give you the facts you need to judge whether Boeing can help you reach the goal you have in mind.

The fact that Boeing is an "engineers' company" is important to your success. At Boeing, you'd work with, and for, engineers—men who talk your language, understand and appreciate your work.

Boeing encourages graduate study, reimbursing full tuition and fees, plus an additional amount for incidentals. Every six months, each Boeing engineer is given a merit review—a personal opportunity for recognition and advancement.

The company's steady, rapid growth assures plenty of opportunities to move ahead. At Boeing, engineers hold positions right to the top.

Another advantage: Boeing assignments are interesting. You'll work on such famous projects as the 707, America's first jet transport; the intercontinental B-52, the nation's principal long-range jet bomber; the supersonic BOMARC guided missile, and top-secret programs that probe beyond the frontiers of the known. At Boeing, you'll be in a young, expanding industry, one with its major growth still ahead.

So whether you plan a career in civil, mechanical, electrical, aeronautical or industrial engineering, physics or mathematics (or related fields), drop in for a person-to-person discussion about your future at Boeing.

May 7—Duke	Here
May 8—Wake Forest	Away
May 11—North Carolina	Away
May 15—North Carolina	Away

\* Denotes Conference Games

An 18-game baseball schedule for North Carolina State has been announced by Athletic Director Roy B. Clogston.

The Wolfpack, beginning its twelfth season under Coach Vic Sorrell, will open play March 28 against Delaware, one of two non-league opponents on this year's card. East Carolina is the other outside foe.

The State College nine will play 14 Atlantic Coast Conference games, including two with each team in the league on a home-and-home basis.

After opening with Delaware, the Wolfpack begins a string of 11 straight conference games April 3 against North Carolina. The East Carolina contest May 3 breaks up the ACC competition temporarily.

Wake Forest and Carolina appear on the schedule three times but only two games will count in the standings. The Wolfpack travels to Winston-Salem twice, with the first appearance counting in loop play.

Clemson's Tigers replace Wake Forest in the traditional Easter Monday game April 22 on the State diamond. Schedule difficulties prevented the Deacons from coming here on that date.

The Wolfpack, who tied Duke in regular season ACC play last year but lost a playoff game to the Blue Devils, will have only four lettermen back from last year's team which compiled a 14-5 record.

The squad will be built around catcher Bob Kenneil, a .415 hitter who was named on the first string NCAA All-District team; outfield Russ Casteen, second baseman Derris Bradshaw and third baseman Jim Creekmore.

## Athlete of Week

Frank Nauss, 220-pound-senior—York, Pa. . . one of the best swimmers ever to enroll at State College, brings to a close his brilliant college career next month in the National AAU Meet at Daytona Beach.

Nauss was one of two triple-crown winners in the recent Atlantic Coast Conference Championships. The husky senior captured the 440-yard freestyle for the fourth consecutive year,

giving him a total of 12 conference championships. . . Nauss holds two national records—the 200 and 500 yard free style events for long course pools. . . At Daytona he will participate in the 1500 meter, 220-yard, and 440-yard events and is a favorite in each . . . his best events are for distance . . . 1500 meters is 67 laps in State's pool.

## HERE IS THE FINAL TIE BREAKER IN OLD GOLD'S

TIE-BREAKING  
PUZZLE  
NO. 8

CLUE: This Nebraska coeducational college of liberal arts is affiliated with the Presbyterian Church. It was chartered and opened in 1882.

CLUE: Conducted by the Jesuit Fathers, this midwestern coeducational university was opened in 1877. It bears the name of the city in which it is located.

CLUE: This coeducational university was chartered in 1845 under the Republic of Texas. It is a Baptist school.

ANSWER 1. \_\_\_\_\_  
ANSWER 2. \_\_\_\_\_  
ANSWER 3. \_\_\_\_\_  
Name \_\_\_\_\_  
Address \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_  
College \_\_\_\_\_

NOTE THAT THE ABOVE PUZZLE CONTAINS THE NAMES OF THREE  
SCHOOLS FOR WHICH THREE SEPARATE CLUES ARE GIVEN.

Players may now mail their completed sets of 8 Tie-Breakers. Before mailing your puzzles, keep an accurate record of your answers. The 8 Tie-Breakers must be answered, neatly trimmed, and enclosed in an envelope, flat and not rolled and addressed to: Tangle Schools, P. O. Box 26A, Mount Vernon 10, N. Y., and bearing a postmark not later than April 5, 1957. Do not decorate or embellish the puzzles in any way. Do not include anything in the envelope but the puzzles.

If, after solutions have been submitted to this set of Tie-Breakers, a tie or ties still remain, those tied will be required to solve another tie-breaking puzzle, in accordance with the official Tangle Schools rules. These tie-breaking puzzles, if necessary, will be mailed to each contestant.

AN AIL PERSONNEL DIRECTOR  
IS VISITING YOUR CAMPUS for  
**PERSONAL INTERVIEWS**  
GRADUATES & UNDERGRADS  
E.E., M.E., PHYSICISTS for  
Positions as  
**DESIGN, DEVELOPMENT  
PRODUCTION and FIELD  
ENGINEERS**

He will answer questions vital to your future  
also outline the records of advancements  
and offer you similar opportunities.

AIRBORNE INSTRUMENTS LABORATORY — Founded and managed by engineers is a team effort in research and development in the fields of general electronics, automation, medical electronics and nuclear physics; for industry, communication, applied sciences not merely the military. Company policy which places special emphasis on individualism, over the years has seen many advancements from within the ranks to top managerial positions. Liberal tuition refund policy encourages furtherance of engineering studies.

## TANGLE SCHOOLS PUZZLES

FOLLOW THESE MAILING INSTRUCTIONS CAREFULLY!

- Use business-size envelope 4" x 9 1/2" . . . sometimes referred to as a No. 10 envelope.
- Each of the puzzles must be neatly trimmed, separately, and placed in numerical order.
- No decorations please! Address envelope as shown.
- Your name and address MUST be on the BACK of the envelope ACROSS THE END and in the position shown in the illustration. Please print or type in CAPITAL LETTERS—LAST NAME FIRST. If mailed according to instructions, 6¢ postage should be enough.
- In the event of further ties, contestants will be mailed an additional tie-breaking puzzle form.

REMEMBER—ENTRIES MUST  
BE POSTMARKED NO LATER  
THAN FRIDAY, APRIL 5, 1957.

FIRST PRIZE—A TOUR OF  
THE WORLD FOR TWO—  
OR \$5,000 CASH! EIGHTY-  
FIVE OTHER  
VALUABLE PRIZES!

## THE HORIZONS ARE UNLIMITED at UNION CARBIDE

E. R. Brown  
of our New York  
Office will be  
on campus, Monday,  
March 25, to discuss  
career opportunities  
in New York City in  
these fields:

Accounting  
Advertising  
Credit  
Foreign Operations  
Management Services  
Patent  
Purchasing  
Tax  
Traffic  
Technical Writing

For further information  
see your Placement Office.  
Then make an appointment.

Union Carbide offers to college graduates opportunities in some of the most rapidly expanding fields in industry—Carbon Products, Chemicals; Alloys and Metals, Industrial Gases; Plastics; Nuclear Energy, and Silicones. In all these fields Union Carbide needs engineers, scientists, and business and liberal arts graduates.

AND CARBON CORPORATION**  
30 East 42nd St. NEW YORK 17, N. Y.

### CU to Present Fashion Show

On Friday, March 15 the College Union ballroom will be the scene of the final fashion show of the year. The show, "Spring Styles for Students," will be sponsored by the C.U. Hospitality Committee.

Models have been chosen from the State co-eds, State College students' wives and representatives from girls' schools in town.

Spring styles for all occasions will be presented—school wear, sportswear, beachwear, formal and all. The fashions for the show will be furnished by Ellisberg's of Raleigh and the show will be directed by Mrs. M. Ellisberg.

An informal dance will be held immediately after the fashion show in the ballroom.

## Vitro Offers Early Professional Recognition For M.E.'s, E.E.'s, Physicists, Mathematicians

### Apply Your Knowledge At Once In One Of These Advanced R & D Fields

The Vitro Research and Development Laboratory in Silver Spring, Maryland, invites engineering and science majors to discuss a professional assignment in one of these important fields:

**Undersea Warfare.** Vitro teams are responsible for all phases of research, development, design, prototype fabrication, testing, etc., for the weapons systems presently used in the most advanced Navy submarines. Vitro's work in this advanced region of the national defense program involves new concepts in Torpedoes, Mines, and Sonic Detection. This is a demanding area of study and development work for the graduating engineering or science major.

**Guided Missile Ships.** Vitro's work on Guided Missile Ships and Systems for the Navy's new fleet includes projects in Fire Control, Systems and Missile Engineering, electrical and mechanical. Most recent installations have been in the cruisers U.S.S. Boston and U.S.S. Canberra.

**Land-Based Guided Missiles.** This is a sphere of new technology wherein the engineer can make invaluable contributions to Vitro's research in Land-Based Missile Systems for continental air defense.

Vitro, out of full cognizance of the graduate's desire to begin work of a strictly professional nature as soon as he graduates, is making it possible for seniors to arrange for permanent and full professional positions with its Laboratory now.

### VITRO LABORATORIES IDEALLY LOCATED

Each of the three Vitro locations offers its own wealth of attractions. The largest Laboratory is located in Silver Spring, Maryland, a delightful suburb of Washington, D. C. Within easy driving range are beaches, lakes, mountains, offering a wide variety of scenery and recreation.

The city itself offers sports attractions including major league baseball, football, and ice hockey. Scattered throughout its parks are public golf courses, tennis courts, and bridle paths. Washington, D. C. offers over 1000 musical and theatrical events each year, many of them

at no cost. Schools in this community are outstanding. Homes and apartments of all types and prices are readily available.

Vitro's West Orange, New Jersey Laboratory is situated in the beautiful Orange mountains near one of the most attractive suburbs in the entire State. New York City is only 40 minutes away by automobile. An Armament Test Activity is maintained in Florida at Eglin Air Force Base. This installation is near Fort Walton Beach, a summer resort area on the Gulf of Mexico, with fine white beaches, and a multitude of other attractions.

### Laboratory Visits Scheduled By Vitro Representative

Personal inspection of the Vitro facilities, together with an opportunity to meet with staff members, enable the graduating engineer to evaluate more accurately the organization. The Vitro representative will provide interested seniors with details on how such a visit may be arranged.

### NEW \$2 MILLION LAB NEAR COMPLETION

The new building to house Vitro's expanding operations in the Washington, D. C., Area, will include engineering and drafting offices as well as a complete model shop and testing laboratory. Vitro has maintained laboratories in the Washington Area for the past ten years.

### Full Tuition And Lab Fees Paid By Vitro

Vitro staff members desiring to work toward an appropriate degree or take individual, specialized courses in conjunction with their work assignment, are encouraged to do so by means of Vitro's Educational Assistance Program. Many Vitro staff members have taken advantage of this opportunity with full tuition and laboratory fees being paid by the Company.

### VITRO TECHNICAL REP ON CAMPUS THURS., MARCH 28

#### Make Appointment Now

Interested M.E.'s, E.E.'s, math and physics majors are invited to make appointments now for a personal interview with a member of Vitro's engineering staff when he visits the campus to give firsthand information on available opportunities. Appointments may be made with the Campus Placement Officer

### Representative To Visit Campus Soon For Personal Interviews

Senior engineering and science majors are urged to make arrangements to meet with Vitro representative when visits their campus. This provides the best opportunity for them to learn firsthand about the Laboratory's work.

Vitro offers unusual opportunities for consistent growth in professional achievement. At a brief orientation program, graduate is accorded full professional status and his place in a project team.

The typical Vitro project graduate is charged with responsibility for all phases of a problem, including applied research, development, fabrication of prototype, testing and design coordination.

Vitro's small team system only enables the engineer to his knowledge to work at or but quickens the pace of his professional growth by (1) allowing him of assistance and experienced guidance when he requires it, (2) allowing his contributions to the team to be promptly recognized, (3) giving him broad, over-all understanding.

The graduating engineer starts his career at Vitro quickly becomes a professional who is capable of fully assuming his assignment within a short period because of his rapid in-formation into practical engineering work. The number, diversity and duration of Vitro programs provide its staff members with creative stimulus and remove any possibility of over-specialization.

The Laboratory Division's policy of "promotion from within" provides ample opportunity for growth to Vitro's professional personnel. This policy and expansion rate insure an excellent climate for rapid advancement and professional recognition.

who also has available copies pamphlets outlining Company benefits, policies, and living conditions in the Washington, D. C., Area. Or write Vitro, request further information and pamphlets. Address: Personnel Department, Vitro Laboratories, 963 Wayne Avenue, Silver Spring, Maryland.

## WHAT'S NEW WITH THE C. U.

### Weekend Movie

This week's movie is a suspense-filled thriller set in modern London. It stars Grace Kelly, Robert Cummings and Ray Milland. "Dial 'M' for Murder" as movie is even better than the play.

### Platter Party

Come over to the College Union Snack Bar between eight and twelve p.m. Girls will be present from the surrounding area, and music will be supplied by the jukebox, as usual.

### Film Talk

This week's talk is on Rumania. There will be a film, followed by a talk and a coffee hour. The talk will begin at 7:30 in the College Union Theater.

### Apple Polishing Hour

These informal coffee hours are sponsored by the College Union to promote better student-faculty relations. All students are invited to come and talk with their instructors. Each week a different department is invited, so your professors will be there at some time. The Apple Polishing Hour is held in the area adjacent to the College Union Library every Tuesday at 5 p.m.

### Starlight Club

State College's own nightclub will be open at the College Union this weekend. Make your reservations at the College Union Activities Office early to be sure that there will be room for you and your date. The Starlight Club opens at eight p.m. Saturday and remains open until twelve.

## Lintdodger's Ball Sponsors

Sponsors for the annual Tompkins Textile Council "Lintdodgers Ball" are pictured above. They are, left to right, Carolyn Whitworth of Durham for John Copeland, President of the Council; Lynn Wagner of Charlotte for Charles Mauney, Vice-president; Lois Anne Malo of Cambria Heights, N. J. for Dick Jordan, Secretary and Irene Key of Sanford for Al Potts, Treasurer of the Council.

# Schools of Engineering and Textile Have Dance Saturday

## Engineer's Dance In Coliseum

Final plans have been announced by the Engineer's Council for the St. Patrick's Dance which is to be held Saturday in Reynolds Coliseum. Everett Billingsley, Senior in Mechanical Engineering from Hamlet, reported that the annual dance would feature several events as well as fine musical entertainment.

Jimmy Perkins and his orchestra will furnish music for the event. Perkins, noted for his dance arrangements, will feature twelve pieces, including Charlie Simpson on sax and Bobby Rich on trumpet, and a female vocalist.

Billingsley said at Anne Fitzhugh, currently known as Miss Consolidated University, will be crowned as Queen of St. Patrick's Court. Also the outstand-

ing Senior Award in Engineering will be presented to the student selected on the basis of his service and accomplishments in the Engineering School. Other outstanding seniors in Engineering will be tapped into the Order of St. Patrick during the intermission ceremonies.

Top ranking Freshmen, scholastically, from each department, will be honored as companions of St. Patrick. This is one of the highest recognitions for scholastic achievement bestowed on Engineering lower-class men.

Ted Walker, Senior in Industrial Engineering, reported that decorations will be similar to those of the Engineers' Ball with the motif planned around Irish Green.

## Freshman-Soph. Dance Will Be On Television

For the first time a dance at State College will be televised. Present plans call for televising the Freshman-Sophomore Dance on March 30. WUNC-TV will carry the proceedings from 9 til 10 on Channel 4. Ralph Marterie and his band will provide the music for the dance.

Bids can be picked up at the College Union from March 18 through March 29 between the hours 12-2 and 6-9. It will be necessary to present a receipt for class dues in order to secure bids.

The formal dance will be open to Freshmen and Sophomores only. The afternoon concert will be open to the public at one dollar per couple.

Since the date for the dance had to be set early last year, it was not known that Meredith, Peace, and St. Mary's would be on spring vacation at the time or that the Azalea Festival would be held at that time.

## Textile Dance To Be Held In Union

The Lintdodger's Ball, the annual dance of the Textile School, will be held this Saturday night from 8:00 till 12:00 in the College Union Ballroom.

As usual, the Tompkins Textile Council is sponsoring the event. The Tompkins Textile Council is the ruling student body of the Textile School. Council President John Copeland has announced that the dance will be semi-formal and that the Duke Ambassadors will provide the music. Textile students can pick up their bids for the dance in Mr. Dunlap's office or from Mrs. Dennis.

Also sponsored by the Textile Council will be an open house on Saturday afternoon at Mrs. Dennis' home. All textile students are invited to attend.

## K. Bostian Announces Candidacy For Student Government Secretary

Karl Eugene Bostian, a native of Raleigh, announced his candidacy for Secretary of Student Government today. Gene is a member of the Junior Class in Zoology. Scholastically he is in the upper tenth of his class. In announcing his candidacy,

Gene stated that he is neither an actor nor a politician, but simply a worker for student interests.

Gene is a member of the YMCA Cabinet and served as chairman of their freshman orientation program last fall. He is also a member of the Consolidated University Student Council where he is currently serving as chairman of the group investigating student insurance.

Karl Bostian

## Nomination Books Open Until 23rd

The nomination book for the April 3rd elections will be open until March 23rd. Interested students are urged to visit Dean Talley's Office in Holladay Hall. Several offices do not as yet have any candidates.

No tape of any kind may be used for putting up campaign posters for General Campus Elections. String may be used to fasten posters to trees and lamp posts. Tacks nor nails may not be used for putting posters on trees. Tacks may, however, be used on the bulletin boards. Strict compliance to this rule is expected of each candidate.

## Army Appoints Thirteen to Posts

Thirteen top-ranking students at North Carolina State College have been appointed to various ranks in the college's Army ROTC cadet Regiment, Col. Richard R. Middlebrooks, Army ROTC commandant at the college, has announced.

The list of students receiving cadet appointments is:

William H. Harwell of Route 2, Concord; John A. Watson of Route 4, Kannapolis; Lawrence Harris, Jr., of Wake Forest; D. W. Wright, Jr., of Lynchburg, Va.; Bruce Hilton Webb of Saratoga; Milton Wayne Lee of Mayodan; Neil W. Cameron of Route 1, Cameron; James Dobbin McNatt of High Point, all sergeants.

Yancey C. Elliott, Jr., of Norfolk, Va.; Donald P. Allen of Tobaccoville; Joseph H. Eckerd of Marion; William B. Porter of Washington, N. C., all sergeants first class.

Wilfred Hammond of Farmer, private first class.

## Judicial Board Action

On March 7, 1957, the Student Judicial Board held two trials. The first involved the theft of a sign from an establishment in Chapel Hill. The student was put on probation through the fall semester of 1957-58.

The second trial concerned the stopping of shower drains in a dormitory and flooding the showers, causing damage to the building. The two defendants were given a severe reprimand and a letter sent home to their parents explaining the episode. A second similar offense will automatically demand a more harsh penalty on the two students.

In giving this release Gene stated, "The position of Secretary calls for more than recording and safekeeping the proceedings of Student Government; it is a position requiring responsible leadership. I offer positive leadership to the best of my abilities as well as being the faithful servant of the members of this community."

## COVERING CAMPUS

(Continued from page 1)

available for those students who have paid their class dues. All others may receive their tickets upon paying the dues.

**Religious Emphasis Week**  
Fairmont Methodist Church, at 2511 Clark Avenue, is having a religious emphasis week program beginning on Sunday, March 14, at the 11:00 o'clock worship service.

Bishop Ralph S. Cushman, now a resident of Raleigh, is to be the speaker through Wednesday night, and Rev. W. L. Clegg, Pastor of Hayes Barton Methodist Church will speak on Thurs-

day night, followed by Dr. Howard P. Powell, pastor of Edenton Street Methodist Church on Friday night. Each evening service will begin at 7:30. All college students, faculty and staff are cordially invited to attend these services.

**Veterans Association**  
The North Carolina State College Veterans Association will hold its regularly scheduled meeting on Monday, March 18, at 7:00 p.m. in the C.U. Theater. A new Constitution will be voted on. The guest speaker for this meeting will be Mr. Earle

(Continued from column 2)

Wake Forest already has taken advantage of the Federal money. Other colleges that have utilized the money successfully are: Purdue University, University of Kentucky, Indiana University, Michigan State and the University of Michigan.

Two years ago, the General Assembly turned down a State College request for authority to borrow the funds.

Now, State College will be joined by Carolina in asking the General Assembly to give the permission to borrow funds to build married student housing. The loans would be paid from minimum rents charged students.

Edwards, head football coach here at State. Mr. Edwards is the first in our series of speakers for this year. We hope veterans will plan to attend the meeting.

## AIP Meeting

Mr. Harvey A. Wagner from the Detroit Edison Power Co. of Detroit, Michigan will be guest speaker at the AIP meeting to be held on Tuesday, March 19, at 7:45 p.m. in Room 219, Riddick. Mr. Wagner will discuss the Enrico Fermi Atomic Power Plant to be built near Detroit by his company. The reactor for this power plant will be of the new Sodium-cooled breeder reactor type. He will also discuss some of the problems accompanying the construction of a power reactor. This meeting will be open to anyone wishing to attend.

There will be a very important earlier meeting for all A members. The earlier meeting will start at 7:00 p.m. and will be for the purpose of electing AIP Officers for next year. A members are urged to be present.

## Dunn Dispatch

# Married Students Housing: Ignored

from The Dunn Dispatch

Of all the changes in higher education in the last 20 years, no problem has received less attention in North Carolina than housing for married students.

Until the end of World War II, married students consisted mainly of graduate students. Even this group was small. Fellowships usually were all a student had for money. The graduate who dared the responsibility of marriage usually allowed his wife to work while he earned his advanced degree.

This exception became more common when World War II veterans flocked to colleges.

Today, married students are important segments among student bodies in North Carolina colleges. Governmental assistance is waning, scholarships, parental aid and the willingness of young men and women to work together is giving youngsters the means for education and marriage.

At State College, for instance, one-fourth of the student body is married students. And half of these are making the grade with no GI Bill assistance.

Educational leaders expect

the trend to continue and to grow stronger. This is particularly true among graduate students who realize a need for advanced studies to qualify them for the expanding technical world.

The administration of the Consolidated University of North Carolina already have expressed their concern for the married student facilities at both State College and Carolina. They have warned that the wooden, fire-trap barracks left over from World War II are falling apart.

At Carolina, the administration heeded a warning by the State Insurance Department and announced that its two-story barrack apartments would be closed at the end of the current semester.

State College has similar, but less formal plans for its barracks.

What then? Where will married students live?

Consolidated University officials have found the answer in permanent housing projects. They propose that the projects be built with self-liquidating loans from federal agencies.

(Continued column 6)
