NORTH CAROLINA STATE COLLEGE'S STUDENT NEWSPAPER

Vol. XLI, No. 29 30

State College Station, Raleigh, N. C.

March 21, 1957

Design Stu., Robert Burns, Wins Highest Award In Architecture

The highest international award in architecture—the 44th Paris Prize in Architecture—has been awarded to a student of the School of Design at State College.

He is Robert Paschal Burns, of Roxboro, fifth year student in State College's School of Design, who will receive the 4000 Paris Prize in Architecture.

Another State student, Edwin Freeland Harris, Jr., of Elkin, is the runner-up for the award and was designated the alternate for the honor.

Announcement of the selection of the two State College students for the honors was made by Dean Henry L. Kamphoefner of the college's School of Design, who received formal notice of the development from the National Institute for Architectural Education in New York City. It marks the second time that a State College student has won the award. In 1953, Edward W. Wray of Greenville, S. C., now of Atlanta, Ga., architect, was the winner.

Under the terms of the award, Burns, the 1957 winner, will spend 12 months traveling in Europe and six months traveling in the Western Hemisphere. He will leave on his voyage before July 15.

While in Paris, he will study architectural problems at the Ecole des Beaux Arts.

Burns won the award for completing a design problem calculated to demonstrate his ability in group planning, individual building design, and interior space arrangement. He designed an international airport and terminal.

The Roxboro student will receive his bachelor of architecture degree from North Carolina State College on May 26. He ranks first in his class in the college's School of Design.

He is a member of Phi Kappa Phi, national scholastic honor society, and is co-editor of the Student Publications in the School of Design. He is also a member of Kappa Alpha Fraternity and is a former representative from the School of Design to the State College student government council.

Burns' wife, the former Margaret Tucker of Cleveland, Ohio, is a 1956 graduate of Meredith College and is currently playing the leading feminine role in the Raleigh Little Theater's production of "The Play's the Thing." Mrs. Burns will accompany her husband on his travels in Europe and the Western Hemisphere.

A 1951 graduate of Roxboro High School, Burns studied for one year at Wake Forest College before enrolling at N. C. State.

Harris, the runner-up for the Paris Prize in Architecture, is also a fifth year student in the State College School of Design. He is a 1952 graduate of Elkin High School and is the son of Mr. and Mrs. Edwin Freeland Harris of Elkin. He is a member of Phi Kappa Phi and of Phi Eta Sigma, national freshman scholastic society.

Dean Kamphoefner said it was unusual for both the winner and runner-up to be students enrolled in the same college.

The \$5,000 which Burns will receive as the recipient of the 44th Paris Prize in Architecture brings to a total of \$80,000 the amount of State, national, and international awards won by students and faculty members in the State College School of Design since the school was established on July 1, 1948.

Both departments in the School of Design are accredited on a national basis and have established international reputations as leaders in their field.

Covering Campus . . .

Class Rings

The representative from the four Co., will be on the campus tomorrow to see if there are any students who want adjustments made on their class rings. Any student interested in making adjustments or others who want to order a ring at this time can see the representative of the YMCA tomorrow between 10:00 and 3:00.

AIEE

The Joint Student Branch of the AIEE-IRE will meet at 8:00 p.m. Tuesday, March 26, Room 11, Riddick Laboratories. The agenda will include presentation of computer material, a short movie of work on computers, and a discussion group led by Mr. A. L. Furr of M. Refreshments will be served.

Dance Bids

All freshmen and sophomores to have paid their class dues will pick up their bids for the Freshman-Sophomore Dance at N. C. U. during the remainder of this week between the hours 12 to 2 and 6 to 9.

Crusaders Chorus

The Crusaders Chorus, an all-male group of male voices from Hampton Institute, will present a concert at 8:15 p.m. in the Student Union Hall, on Sunday evening, March 24.

Candidates to Speak At Open Discussion Tuesday In CU

On Tuesday, March 26, the College Union Forum Committee and Thirty and Three will present an open discussion on future campus government policies and plans. The three candidates for president of the student government, Dan Yager, George Cochran, and Fred Houtz, Jr., will be guest speakers. Each candidate will have ten minutes in which to explain his platform. Then the meeting will be opened for questions from the floor.

The program will be held in the College Union Ballroom, and will be broadcast over the campus radio station, WVWP. All students who can possibly attend are invited to help participate in this program.

Dan Yager (second from left) and Bob Lane (right) are shown above talking to Ashley M. Murphy (left), Representative to the State Legislature from Pender County and a member of the Board of Trustees of the Consolidated University, and Edward H. Wilson, Representative from Caswell County, on the current married housing problem.

Yager Discusses Election Platform

In his first public statement concerning his policies if elected President of the Student Body, Dan Yager discussed an exclusive item. Yager said that "many colleges have a discount system with local merchants," and that he would like to work to see such an agreement instituted here at State. He feels confident that "eighty-five per cent of the merchants in Raleigh would allow a ten per cent discount to students." He continued, "if elected President, I would make a concentrated effort to secure a discount service which would benefit all State students."

Full-Time Doctor

Yager would like to see a full-time doctor employed for work in the campus infirmary. Again pointing to other schools, he quoted a recent report of the National Student Association that "sixty-four per cent of colleges with an enrollment of over two thousand have comprehensive medical coverage which usually includes a full-time doctor." He feels dissatisfied with the situation in which, "if a student becomes sick in the afternoon, he is put to bed to await the doctor's round in the morning; or, in serious cases, sent to Rex Hospital."

Traffic Fees

On the question of reducing traffic fees, Yager says, "many facts should be considered before lowering the present fee. According to figures obtained from the administration, the 1965 enrollment here at State should be approximately 10,000. With an inadequate parking situation now, and only two lots plus the strips by Owen and Tucker paved in three years, we must continue work with the parking area program. Some people contend that money from traffic fines will cover future costs of paving and that a major portion of the existing parking lot costs were paid by traffic fines. Actually, a large part of the cost of the present lots came from an accumulation of traffic fines for three years; and this money was used only for the dorm lots—which included the Owen-Tucker strips. The Hillsboro lot and the strips cost al-

most \$16,000, with the Berry lot being unpaid at this time." (Ed. note: Mr. N. B. Watts gave the *Technician* the following information: Hillsboro lot, \$7,465.16, and paid by fees; area by Owen, Tucker, Alexander, and Bagwell—front and rear, \$8,444.57; and an unpaid bill for the Berry lot of \$4,743.40.) "With the set fee," continued Yager, "the Student Government can borrow money against the expected income, whereas with traffic fines such cannot be done. Also, at the present, the students have no guarantee that the areas they have built will always be used for student parking. I am against using student money for this purpose unless the school incorporates the parking areas into the permanent landscape of the campus."

Freshman-Sophomore Cars

In answer to the question "Why won't the State pay or help pay for parking areas?" Yager believes that "the present trend in the State circles is to consider prohibiting Freshmen and Sophomores from bringing cars to our campus rather than to pay for parking areas. We, as students, must show the State that we are willing to assume the responsibility for a problem that is, after all, basically ours. Rather than cut this fee, I would like to see a re-evaluation of the whole fee structure."

Speaking of housing for married students, Yager asserted that "other Vetville students and I have been in constant contact with members of the State legislature, and I will continue to do everything possible to see adequate housing become a reality in the near future." Regarding athletics, Yager believes that "the dollar date ticket now is almost a certainty; but I also would like to see a written contract be formulated reserving a good section of the Coliseum for students and a standard specified time for picking up tickets be adhered to—both items to be made policy for all games."

For the statistician, Yager is twenty-five years old, married and has one child. He is a Junior in Industrial Engineering from (See YAGER, page 10)

Administration To Permit Tape

By David Barnhardt

At a meeting yesterday of Chancellor Carey H. Bostian, J. J. Stewart, Jr., and J. G. Vann, it was decided that students would be allowed to use tape to put up campaign posters.

The Administration has ruled that tape could be used on brick and cement surfaces. No tape will be allowed on any painted surfaces, whether inside or outside of buildings.

Any posters put up on lamppost—since they are painted surfaces—must be affixed to the lamppost with string. String must also be used to attach posters to trees. Posters may be placed on bulletin boards with tacks.

Candidates will be responsible, in accordance with the election

rules, for removing all of their posters.

Not Smith's Decision

Last Monday there appeared an editorial in *The Technician* asking that the ruling against tape be removed and attributed the final decision prohibiting the use of tape of J. McCree Smith. The Administration has informed *The Technician* that the original decision to prohibit all tape was not made by Smith but that it was merely recommended by him and that the final decision was made by the Administration.

At the meeting yesterday, however, the original decision was modified by the Administration, as stated above, to allow tape on brick and cement surfaces but not on painted surfaces.

Billy May Plays for Military Ball

The Military Ball Association has announced that the annual Military Ball will be held this Saturday night from 8 till 12 p.m. at the Coliseum. The dress will be formal; either a military uniform or a tuxedo should be worn.

Tickets are still on sale for the dance and can be purchased at the College Union main desk for \$4.00 per couple.

During intermission Saturday

night the honorary cadet colonels will be presented in a formal figure following a saber drill by a select group of Air Force and Army ROTC cadets.

Music will be provided by Billy May's orchestra under the direction of Sam Donahue. The Billy May band has been popular among colleges and night clubs throughout the country. He was at State last year for the Freshman-Sophomore Dance.

Deadline Tomorrow

Last chance to choose between the two diplomas pictured above for the graduates this year will be tomorrow, March 22, at 12:00 noon in the registration office in Holladay Hall. The choice of the larger old diploma will cost one dollar extra.

Where To - - - ?

The last few weeks have seen several squabbles arise from old sources. We again have been at odds with J. McCree Smith and the M & O and with Roy Clogston and the Athletic Department. Parking troubles and ticket books have hit the forefront with a resounding bang.

There is again in evidence an attitude which we feel is entirely too prevalent among many of the members of the State faculty. Rather than attitude, let us say "memory slip."

That's what it seems to be. In many cases we have noted that certain august members of our faculty and staff have forgotten just why they are here and just why their jobs exist at all.

You know and so do we.

They are here because you and you and the rest of us are here. We are here to get an education and they are here to either educate us or provide the necessary services to see that our surroundings are as they should be if we are to be educated.

This is much too often overlooked. The faculty member begins to regard the students as secondary to the job he is doing . . . he tends to lose sight of the basic goals of the college itself.

This is not as it should be.

First, last and always, the business of this institution should be to provide the students at State with a good education. This, above all. Even above the production of a winning football team, if it means money taken from other portions of the college's operation to support said team.

Student elections are a part of the campus life. They are invaluable training for the students in the conduct of civic and public affairs, affording experience and knowledge which will make them "well-rounded" citizens. Posters are part of their activities . . . why not deface a few buildings for a few days . . . why not pay a man to clean up afterward . . . as long as no permanent damage is inflicted, what possible difference can it make?

But posters and football teams are only examples of an attitude . . . they are not the point to this discussion.

We think it is high time that everyone made an "agonizing reappraisal" of their work here and decided for themselves whether they are aiming at the goal of the entire community. Four years is a long time . . . we want the best of our opportunities . . . and we think the rest of the students deserve at least that too.

The Technical Societies

The various technical clubs, societies, and institutes play an important part in the orientation of students to industry. But these organizations have not had the support that could be expected. Besides the importance of these societies in our lives after graduation, they are very valuable to us while here at State. Not only do members of these groups become more familiar with their respective departments through the meetings, but at the same time many important ideas are exchanged that will help us in deciding exactly what kind of jobs we will be interested in after graduation. And a majority of the technical societies are branches of a national organization—therefore we can, by contact with the local chapters, become familiar with our fields on a national scale. Representatives of the many industries that hold job interviews here look for our participation in technical societies as one factor in determining student interest in his chosen field.

Most of the technical curricula have clubs of some sort

for their students—it would probably be a good idea for all of us to find out more about the technical societies and become active members. The opinion of the present members is that technical societies are among the most important of campus activities, with far-reaching benefits both now and in the future.

Let's Not Forget

In all the publicity about Carolina and their championship basketball team, many of us are forgetting that State too had a winning season—not so spectacular as Carolina's record, but successful all the same. State's basketball team tried with all their ability to overcome the flood of misfortunes that came their way. They got raw deals and they lost some of their most valuable players, but it can be honestly said that they never gave up. Looking to next year, there is real reason for hope that State can regain its position as champion of the Atlantic Coast Conference. With the whole student body in support, State can again build a team which will merit national recognition.

The Wolf

My name is Wolf. My permanent address is Campus, N. C. State. In fact, one might say that I'm a part of the campus—sort of a spirit or a fictitious mascot. I'm here because I like it. I like to watch my boys come and go. I share their fun, their pride in a job well done; and I feel their sorrow when things go wrong, their resentment of a dirty deal. My boys like me, too, and that helps. Oh, most of them won't admit it because it isn't becoming to a scientist or an engineer to show much emotion, but they like me just the same. This is my first effort at speaking for them in print. In this column, I intend

to do my best to express their opinions and ideas as if they were mine, as, in reality, they are.

One thorn in State's side needs attention immediately, say my boys, and how right they are! This briar had its birth in the narrow mind of a certain newspaper columnist who writes (Pardon the expression) for a large Raleigh newspaper. I won't mention his name just now, but here's a clue: I'm just "cravin'" to sink my fangs into his column. So, my lads, take a gander at this space next Thursday and watch the fur fly.

Listen Well

Statements of aims by various presidential candidates at the Ag Club last night reflect some diametrically opposite opinions on some very tense subjects.

Some of the candidates want to change some very unpopular fees while others do not . . . and both cite good reasons. Some are in favor of a newly proposed cut system and some are not . . . again with good reason on both sides.

It would behoove those who will grumble and mumble about action taken next year to listen well to what who is advocating in their platform. You can show your feelings on a lot of issues if you will carefully consider the statements of all the men.

Report From Board Of Trustees Visiting Committee

The following is the text of the report of the Visiting Committee of the Board of Trustees as presented at their meeting in the Capitol Building on February 26.

The portion of the report covered here is that dealing with student affairs. At a later date The Technician will reprint that portion dealing with Academic Affairs.

Twelve student leaders met with the Committee at State College for a discussion of student problems and welfare. The President of Student Government expressed the appreciation of the student body for many improvements at State College resulting from past visits and reports of the Visiting Committee. He cited as examples the Cafeteria and the Student Supply Stores, and stated that students were now well satisfied with these services. He introduced other student leaders who presented and discussed with the Committee the following problems:

1. The sub-standard condition of the 244 apartments for married students in the old army barracks on the campus known as Verville, and the critical need for housing for the 1433 married students now enrolled at State College. Reports indicate that the number of married students is constantly increasing and that the problem of their housing is critical. It was also pointed out that housing for married students is essential to a good graduate school at State College.

2. The problem of automobiles and parking areas was presented by the Chairman of the Student Traffic Committee. Appreciation was expressed for the willingness of the Trustees to allow the faculty and students at State College to administer their own traffic problem. A detailed report was made, showing how the academic area was restricted to faculty and visitor parking; how all students were required to register their cars and pay a \$3.00 registration fee; how student violators of any traffic rule were fined \$2.00; and, how approximately \$18,000 has been collected in registration and violation fees for the past two years. These funds are being used to employ traffic officers and to improve parking areas and driveways.

3. The critical shortage of dormitory rooms was called to the attention of the committee by the President of the Interdormitory Council. Housing reports show that more than 2,000 State College students have to live three to a room in small dormitory rooms designed for two and that more than thirty-seven per cent of the student body is having to rent rooms off-campus. It was reported that the faculty couples now living in some of the larger dormitories as Hosts and Hostesses are doing much to improve liv-

ing and study conditions in dormitories.

4. The Editor of the "Technician," the student newspaper, appeared and expressed appreciation for the improvements made in the College Cafeteria.

5. The President of the College Union reported on the growth of their program and stated that use of the building and attendance at events had increased greatly during the past two years. Financial statements showed that the College Union was entirely self-sustained by student fees and charges and was in good financial condition. Attention was called to the need for long-range planning for the future growth of the College Union.

6. The student religious program was described in a report from the Vice-President of the Y.M.C.A. Much is being done for the promotion of better standards of moral and ethical conduct by means of dormitory fraternity programs, chapel exercises, and coordination of the nine denominational religious workers representing the Raleigh churches. Attention was called to the need for renovation of portions of the Y.M.C.A. Building and the obligation of maintenance and operation which was assumed by the College when the building was donated by the Rockefeller Foundation.

7. The President of the Greener University Student Council appeared and requested that the student body be put on record as favoring adjustments in faculty salaries so that good teachers can be attracted and held.

8. The present deplorable fraternity housing situation was discussed by the President of the Interfraternity Council. It was reported that much progress has been made and that plan for implementing a new vital housing program has been presented to University authorities. It was pointed out that the plan calls for this housing to be built at no cost to the College or State and that it will help relieve the critical shortage of rooms at the College.

Findings: Your committee wishes to report the following findings with reference to State College:

- a) Student morale and leadership is good. We were impressed with the sincerity and maturity of the students and the judgment shown in considering and discussing the problems.
- b) There is a great need for additional dormitories, permanent quarters for married students, and on-campus housing for fraternities.
- c) The Student Government is doing an excellent job of handling their part of the automobile traffic and parking problems.

Admissions Applications Up Over Last Year

North Carolina State College announced today that it has received at least 38 per cent more applications from new students seeking to enter the college next fall than it had received at a comparable period last year.

Kenneth D. Raab, director of admissions and registration, said that 1,485 applications from new students were received by State College through Monday, March 18, as compared with 1,075 on April 10 last year.

H. Edwards High School, Asheville; Boyden High School, Salisbury; Reynolds High School, Winston-Salem; 106 Carroll Hall, University of North Carolina, Chapel Hill; New Hanover High School, Wilmington; and Elizabeth City High School, Elizabeth City.

The sharp increase in the receipt of applications was noted by Raab in calling attention to entrance examinations for new students which will be in 10 North Carolina cities on Saturday of this week.

Raab urged prospective students to take the entrance examinations and to submit their applications for admission as early as possible in order that college authorities may plan to take care of their housing and teaching requirements.

Raab explained that the trustees of the Consolidated University of North Carolina have ruled that all students entering the University in Chapel Hill, Woman's College in Greensboro, or State College in Raleigh must take the entrance tests this year.

A summary of the fall and spring semesters at State College shows that a record-breaking total of 5,972 students have registered for courses at the college during the two semesters. Among these were 1,818 freshmen, a record enrollment for first-year students.

The tests will be held beginning at 9:30 a.m. Saturday (March 23) in the following places:

Prospects, Raab said, indicate that State College will have an even larger freshman enrollment next fall.

Myers Park High School, Charlotte; Library, Woman's College, Greensboro; Textile Auditorium, North Carolina State College, Raleigh; Grain-gear High School, Kinston; Lee

State College classrooms and dormitories already are crowded with the present enrollment.

SPORTS

SPEC HAWKING

Notes from the Wolfpack

Assistant athletic director Willis Casey received a son for St. Patrick's Day. The 8-pounder arrived amid the Irish-day festivities and was named, appropriately, Walker Patrick. Mrs. Casey and son are doing fine.

John Maglio will join the College All-Americans for ten games on their eighth annual tour with the Harlem Globetrotters. The big cage show will be in Raleigh April 4 with most of the nation's top basketball names on hand. Abe Saperstein will make a concentrated effort to land Lennie Rosenbluth after the North Carolina star finishes NCAA play.

Duquesne is in the fold for the 1957 Dixie Classic. Coach Duddy Moore returned the signed contract recently, giving the nation's number one holiday cage tournament its third outside opponent. St. Louis, an NCAA participant, and Northwestern had previously been announced. State College officials are still looking for a fourth team.

Speaking of the Dixie Classic, one team has been signed for the 1958 tournament, which, incidentally, will be played on Monday, Tuesday and Wednesday instead of the usual Thursday, Friday and Saturday set-up. The team is Michigan State, Carolina's foe in the finals of the NCAA tourney in Kansas City.

The State All-Stars and Wake Forest All-Stars have two games definitely scheduled for their up-coming tour in addition to several tentative dates. Saturday night the teams open play in Carthage with the State cagers placing a 21-game winning streak on the line. The following Saturday, March 30, the teams will play in Burlington at the Elon College Gym.

If you don't see Dick Hunter's name in the lineup Saturday for the annual Red and White intrasquad football game, don't get alarmed. He is making a strong bid for the varsity baseball team and is by-passing spring grid practice. Fullback Don Hafer also is a candidate for Vic Sorrell's diamond crew.

Jack Kramer's tennis troupe will come to Reynolds Coliseum April 30. The show features Pancho Gonzales vs. Ken Rosewall in the number one match. Dinny Pails goes against Pancho Segura in the preliminary bout of the professional net attraction.

Wiswell, World's Checker Champ, To Appear at CU Next Tues. Night

Tom Wiswell, the world's unrestricted checker champion, will appear in person at the College Union next Tuesday night March 26 at 8:00. He will stage a simultaneous Checker and Chess exhibition during which he plays up to twenty-four individuals at once.

Wiswell has written several books during the past few years on both games.

The event is sponsored by the games committee and all students and friends of the college are invited to attend.

Your Move !!

-Soccer-

There will be a meeting of all varsity and freshman candidates for next year's soccer team Tuesday night, March 26, in the Band Room of Frank Thompson Gym.

John Kenfield has called the meeting for 7:30. All interested persons are urged to attend.

Season Opens Next Week

Athletics !!!

Ticket Reduction

Globetrotters
Students can buy tickets to Harlem Globetrotters vs the College All-Americans on Thursday night April 4th at 8:00 p.m. at a 50c reduction on any price ticket (\$3.00, 2.50, or 2.00) upon presentation of the student coupon No. 15. Tickets must be picked up by 4:30 on Wednesday April 3.

Jack Kramer's Tennis
Jack Kramer's tennis show is scheduled for the Coliseum on Tuesday April 30 at 8:00. Students are entitled to a 50c reduction on a general admission ticket of \$1.50 with coupon No. 16. Pick up before April 29.

-Intramurals-

Preliminaries for the 1957 fraternity swimming meet are scheduled for tonight at 8:00 in Frank Thompson Pool. Dormitory prelims were reeled off Tuesday night with the finals for both groups set for March 28.

Guards—Bill Rearick, Francis Tokar, Julius Compton, Frank Marocco, Bob McKeithan, Bob Ray.

Centers—Paul Balonick, Bill Hill, Dick Goudie.

Quarterbacks—Ernie Driscoll, Jim Oaks, Winky Gaines.

Left halfbacks—Ken Trowbridge, Pete Seese, Dick Conrad.

Right halfbacks—Dick Christy, John Stanton, Ron Martini.

Fullback—Wally Prince, Arnold Nelson.

Three varsity candidates will not take part in the game because of baseball participation.

They are Dick Hunter, Don Fer and Bob Kennel. Tom Kati and Bill Adams will miss the game because of injuries.

GO, VAN, GOGH!

Once upon a time, when the world was really evil, and a thief lurked behind every bush, cautious men had their shirts painted on! The reason for this is explained by a perceptive saying of those days:

"Forsooth, nothing deters those rapsallions about town. They'll steal anything that isn't buttoned down."

Rough days—particularly for the shirt business, what with painters picking up all the profits. Until, suddenly, an idea of genius appeared. The button-down shirt! This shirt was actually buttoned on to the chest of the wearer, making it absolutely steal-proof!

Today, in these honest times, we still feel its influence. It is

the true ancestor of that glorious style—the shirt with the button down collar! Isn't history interesting?

Van Heusen—because the know so much about the button-down—has done more with it than anybody else. Take our new line called the Van Ivy, for instance. Here are button-downs in tartan checks and stripes. Van Ivy look marvelous with suits and sport coats, and worn open at the neck give you a roguish look. They also have a button on the back of the collar, for authenticity's sake. See them \$4.00 in short sleeve, \$5.00 long sleeves.

PRATT & WHITNEY AIRCRAFT

E. HARTFORD, CONNECTICUT • WEST PALM BEACH, FLORIDA

A Campus-to-Career Case History

After securing field data, Mac McLeran lays out plans for new and additional telephone services.

Figuring on the future

Thurston B. McLeran, called Mac by his friends, is an engineer with Southern Bell Telephone and Telegraph Company at Decatur, Georgia.

Much of his work is concerned with the future—planning for telephone service to meet predicted demands a year, or five years ahead.

"My biggest job to date," Mac says, "has been engineering additional communications facilities for an airbase and adjoining aircraft factory in our district. This means making field studies of the customer's requirements and planning how new telephone facilities can best meet them. Then I translate this in-

formation into working plans for our construction and installation people. It's a big job, and gives me a lot of responsibility. It's challenging work, too, for an engineer."

Figuring on his own future concerns Mac also. He graduated from Georgia Tech in 1952, with a B.S. in Electrical Engineering. He went with the telephone company because of the advancement opportunities it offered. Today, Mac is married and has one child. He looks forward to an interesting career in a growing business where individuals can advance as far as their abilities will take them.

There are many rewarding career opportunities in all Bell Telephone Companies, and at Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your placement officer can give you more information about Bell System Companies.

wanted today...for the

WORLD OF TOMORROW

CURTISS-WRIGHT...Leadership today and tomorrow

If your objective is to put your best into engineering, and get the most from engineering, you belong with an organization like Curtiss-Wright where engineering is the foundation of all activities. Curtiss-Wright offers stability, born of its international leadership in aviation, and of its diversification into other major fields of engineering. Curtiss-Wright's world-wide program for the future is one of action . . . action in which you, as an engineer, can make the most of your abilities. The scope of Curtiss-Wright's engineering and development program permits you to choose the field most interesting to you—in one of the company's 17 Divisions—in one of the facilities located in more than a dozen cities in several states. The diversification of the company's products and activities gives you not only a choice of engineering interest but also assures you of a future stability, because of the continued growth of the company's commercial products as well as defense products. Your future at Curtiss-Wright rests securely upon the steady growth of a constantly expanding national economy.

TAKE YOUR CHOICE—THE FIELD IS WIDE—Here are some of the products and projects from among which you may choose the field most interesting to you and where you can best utilize your talents: aircraft engines, including Turbo-Compound, turboprop, jet, ramjet and rockets; subsonic and transonic propellers; flight simulators, nuclear power systems, test equipment and industrial instrumentation and control systems; jet engine controls and thrust reversers; development of new concepts in propulsion systems for aircraft, helicopters, missiles, drones, and non-military uses; research, design, and testing of advanced weapons systems; development and production of missiles; research in aerodynamics, thermodynamics, metallurgy, chemistry, structures, nuclear energy, ultrasonics, electronics, plastics; development and manufacture of diesel engine governors and precision spring clutches; and the manufacture of diesel and gas turbine engines and military vehicles. There is a place for you, in one of these many activities. Since each division is an operating entity, you work in smaller groups. But, since Curtiss-Wright is a large organization you gain all the advantages which only a company like this can offer you—insurance, retirement, assistance for advanced study, management development program—all of the benefits that will make your association with the company profitable and satisfying to you.

FACILITIES—To encompass such a rapidly growing program, Curtiss-Wright is constantly adding to its facilities. On an 80 square mile tract in Quehanna, Pa., a new Research and Development Center is being built. Several of the buildings are already erected, while others are in process of construction and still more are being designed especially to house personnel and equipment which will be required for special projects. In other parts of the country also new facilities are being added to our modern, country-wide engineering plant. Look in any direction and you will see evidence of the planned growth of Curtiss-Wright Corporation. This is continuing Curtiss-Wright's leadership today and assuring it for tomorrow. Here is work for engineers who want a real future, offering opportunity as great as your desire to excel.

SIGN UP TODAY FOR INTERVIEW with the Curtiss-Wright representative

MARCH 21

Peden Runs For Senior President

Jim Peden, candidate for president of the Senior Class, this week released his platform for this particular office. His statement is as follows:

"I would like to take this opportunity of announcing my candidacy for the office of President of the Senior Class. My services and experiences have included serving as Vice-President of our Sophomore Class, two years as a representative in Student Government, and as president of the Carolina-Virginia Region of the National Student Association.

"My platform consists of the pertinent problems that will definitely concern the class, as well as new items that will be for the betterment of the Senior Class.

1. A program to promote Senior privileges that would benefit

the members of the class, and bring about greater esteem for Seniors. (This would include such things as exemptions from Senior courses for the fall semester for those with a "B" average prior to exam time.)

2. A committee set up to work with the president of the diploma situation. This committee would establish a permanent basis with the choice of a large or small diploma having an improved and more definite style.

3. Keeping the class informed on all important matters through the use of the Technician which will carry a monthly report to the class.

4. Sincere desire to have the interests of the class foremost.

"Any support that you feel that you would like to give to me will be more than appreciated."

George Howard Is Candidate for IFC President

George Howard has announced his candidacy for President of the Interfraternity Council. Howard has been active in IFC work for the past two years, serving as Representative from Kappa Alpha last year and as Secretary of the IFC this year.

He attended the National Interfraternity Council in New York this past November. A rising junior, Howard has also distinguished himself scholastically—maintaining a 3.3 average in chemical engineering.

Concerning his platform, Howard says, "I have enjoyed working on the IFC during the last two years, for in this time the IFC has greatly expanded the services it renders to its member fraternities. I would continue enthusiastically all present IFC projects and go into any other activity that would strengthen our fraternity system. At the National IFC, Bill Greene and I heard some good ideas as to how an IFC can benefit its members and its school.

"I would like an opportunity to work with these ideas and with such projects as fraternity housing; good publicity of fraternity activities, including continued publication and improvement of the freshman brochure; a useful Greek Week, and a well-organized, specifically regulated rush period.

Military Society Initiates Sixteen

Sixteen outstanding cadets in State College's Army and Air Force ROTC program were initiated as members of Company G, Third Regiment, Scabbard and Blade in ceremonies conducted in the Coliseum on March 14.

Scabbard and Blade is a national honorary society whose membership consists of the outstanding students in all branches of ROTC. Membership in Scabbard and Blade is conferred on third year ROTC cadets who

possess the qualities of good leadership.

The new members are: Air Force—Walter F. Clement, Ronald Gray Conrad, and Winfred A. Heath.

Army—Thurman M. Fields, Jr., Harry D. Johnson, Chris Loyd Kametches, William Robert Harding, Charles Henry Mateer, William A. Mills, James R. Misenheimer, Raymond Douglas Nelson, Eric E. Smart, Richard D. Stover, Furman Lee Walker, Teddy Gray Allen, and Donald W. Bean.

Replacement Named

Gus DeHertogh has been sworn in as a member of the Judicial Board by Bob Lyne, Chairman. DeHertogh was appointed by Student Government President Jim Nolan to replace Charles Webb who resigned from the Board to attend Forestry Camp.

DeHertogh, a Senior in the School of Agriculture, has served as Chairman of the Investigations Committee for the past eighteen months. Dick Rupard, a sophomore in Civil Engineering, was elected by the Judicial Board to succeed DeHertogh as Chairman of the Investigations Committee.

Vitro Offers Early Professional Recognition For M.E.'s, E.E.'s, Physicists, Mathematicians

Apply Your Knowledge At Once In One Of These Advanced R & D Fields

The Vitro Research and Development Laboratory in Silver Spring, Maryland, invites engineering and science majors to discuss a professional assignment in one of these important fields:

Undersea Warfare. Vitro teams are responsible for all phases of research, development, design, prototype fabrication, testing, etc., for the weapons systems presently used in the most advanced Navy submarines. Vitro's work in this advanced region of the national defense program involves new concepts in Torpedoes, Mines, and Sonic Detection. This is a demanding area of study and development work for the graduating engineering or science major.

Guided Missile Ships. Vitro's work on Guided Missile Ships and Systems for the Navy's new fleet includes projects in Fire Control, Systems and Missile Engineering, electrical and mechanical. Most recent installations have been in the cruisers U.S.S. Boston and U.S.S. Canberra.

Land-Based Guided Missiles. This is a sphere of new technology wherein the engineer can make invaluable contributions to Vitro's research in Land-Based Missile Systems for continental air defense.

Vitro, out of full cognizance of the graduate's desire to begin work of a strictly professional nature as soon as he graduates, is making it possible for seniors to arrange for permanent and full professional positions with its Laboratory now.

Representative To Visit Campus Soon For Personal Interviews

Senior engineering and science majors are urged to make early arrangements to meet with the Vitro representative when he visits their campus. This will provide the best opportunity for them to learn firsthand about the Laboratory's work.

Vitro offers unusual opportunities for consistent growth and professional achievement. After a brief orientation program, the graduate is accorded full professional status and his place in a project team.

The typical Vitro project group is charged with responsibility for all phases of a problem, including applied research, development, fabrication of prototype, testing and design cognizance.

Vitro's small team system not only enables the engineer to put his knowledge to work at once, but quickens the pace of his professional growth by (1) availing him of assistance and experienced guidance when he requires it, (2) allowing his contributions to the team to be promptly recognized, (3) giving him broad, over-all understanding.

The graduating engineer who starts his career at Vitro quickly becomes a professional who is capable of fully assuming his assignment within a short period because of his rapid initiation into practical engineering work. The number, diversification and duration of Vitro programs provide its staff members with creative stimulus and rule out any possibility of over-specialization.

The Laboratory Division's policy of "promotion from within" has provided ample opportunity for growth to Vitro's professional personnel. This policy and our expansion rate insure an excellent climate for rapid advancement and professional recognition.

VITRO LABORATORIES IDEALLY LOCATED

Each of the three Vitro locations offers its own wealth of attractions. The largest Laboratory is located in Silver Spring, Maryland, a delightful suburb of Washington, D. C. Within easy driving range are beaches, lakes, mountains, offering a wide variety of scenery and recreation.

The city itself offers sports attractions including major league baseball, football, and ice hockey. Scattered throughout its parks are public golf courses, tennis courts, and bridge paths. Washington, D. C. offers over 1000 musical and theatrical events each year, many of them

at no cost. Schools in this community are outstanding. Homes and apartments of all types and prices are readily available.

Vitro's West Orange, New Jersey Laboratory is situated in the beautiful Orange mountains near one of the most attractive suburbs in the entire State. New York City is only 40 minutes away by automobile. An Armament Test Activity is maintained in Florida at Eglin Air Force Base. This installation is near Fort Walton Beach, a summer resort area on the Gulf of Mexico, with fine white beaches, and a multitude of other attractions.

Laboratory Visits Scheduled By Vitro Representative

Personal inspection of the Vitro facilities, together with an opportunity to meet with staff members, enable the graduating engineer to evaluate more accurately the organization. The Vitro representative will provide interested seniors with details on how such a visit may be arranged.

Full Tuition And Lab Fees Paid By Vitro

Vitro staff members desiring to work toward an appropriate degree or take individual, specialized courses in conjunction with their work assignment, are encouraged to do so by means of Vitro's Educational Assistance Program. Many Vitro staff members have taken advantage of this opportunity with full tuition and laboratory fees being paid by the Company.

NEW \$2 MILLION LAB NEAR COMPLETION

The new building to house Vitro's expanding operations in the Washington, D. C. Area, will include engineering and drafting offices as well as a complete model shop and testing laboratory. Vitro has maintained laboratories in the Washington Area for the past ten years.

VITRO TECHNICAL REP ON CAMPUS THURS., MARCH 28

Make Appointment Now

Interested M.E.'s, E.E.'s, math and physics majors are invited to make appointments now for a personal interview with a member of Vitro's engineering staff when he visits the campus to give firsthand information on available opportunities. Appointments may be made with the Campus Placement Officer

who also has available copies of pamphlets, outlining Company benefits, policies, and living conditions in the Washington, D. C. Area. Or write Vitro, requesting further information and pamphlets. Address: Personnel Department, Vitro Laboratories, 362 Wayne Avenue, Silver Spring, Maryland.

THE HORIZONS ARE UNLIMITED at UNION CARBIDE

E. R. Brown of our New York Office will be on campus, Monday, March 25, to discuss career opportunities in New York City in these fields:

- Accounting
- Advertising
- Credit
- Foreign Operations
- Management Services
- Patent
- Purchasing
- Tax
- Traffic
- Technical Writing

For further information see your Placement Office. Then make an appointment.

Union Carbide offers to college graduates opportunities in some of the most rapidly expanding fields in industry—Carbon Products, Chemicals, Alloys and Metals, Industrial Gases, Plastics, Nuclear Energy, and Silicones. In all these fields Union Carbide needs engineers, scientists, and business and liberal arts graduates.

Golden Chain Announces Parent's Weekend Plans

"Parents' Weekend" will be observed at North Carolina State College April 12-13 under the sponsorship of Golden Chain, the college's senior honor society.

Plans for the three-day observance were announced this week by John Lomax of Guilford College, president of Golden Chain, who said an invitation is being extended to the parents of all of State College's 5,575 students to attend.

The program for Friday night will be featured by an interfraternity sing, sponsored by Pi Kappa Phi Fraternity.

Parents may register for the remaining portions of the program Saturday, April 13, from 9 a.m. until 2 p.m. in the lounge of the State College Union Building.

Saturday's agenda also will include visits to the Engineers' Exposition, a luncheon, tours of the campus, a tea at 4 p.m.

(Continued from Page 2)

d) The College religious (Y.M.C.A.) and social (College Union) programs are well conducted and making sound progress.

e) Students are intensely interested in the problem of securing and keeping good teachers.

RECOMMENDATIONS:

That the University take every possible action to provide adequate housing for all State College students.

a) Additional dormitories must be provided.

b) The Fraternity Housing Project should be implemented as soon as possible.

c) The critical housing situation for married students should be relieved by providing more facilities.

Sticklers!

Brooks Announces Campaign Policy

In announcing his candidacy for Student Government Treasurer, Cecil Brooks released the following statement:

"Our Student Government has progressed tremendously during the three years that I have been at State. Many things have been accomplished toward improving State College as a result of the students tireless efforts.

"As President Friday stated

Cecil Brooks

about N. C. State at the 70th Anniversary exercises, "the job is not completed"; so it is with the work of the Student Government, the job is only begun.

"In announcing my candidacy for Treasurer of Student Government, I appeal to you, the students, for your vote, and your help after elections—if elected—to help make more progress through the coming year than has ever been made in the past.

"I have had experience on the Budgetary and Finance Committee this year, as Chairman of Alpha Zeta Book Exchange, as Treasurer of Kappa Phi Kappa, and Treasurer of Wesley Foundation during the past three years. Because of these experiences I feel confident I understand the duties and requirements of a Treasurer.

"As Treasurer, I promise that each request for appropriations from the Student Government funds will be investigated, if necessary, to insure that every appropriation will benefit the whole student body before it is recommended to the student legislature."

Cochran, Student Gov. President Candidate, Discusses Cam. Policy

Following is a continuation of George C. Cochran's platform for Student Government. Bob Kennel, Cochran's campaign manager, has released the following statement explaining his candidate's platform and discusses items which were mentioned in last week's Technician.

Teacher Evaluation

"Three years ago student government promoted a teacher evaluation program throughout the school. This program, for some unknown reason, was dropped. In my plan for a better State College I want to initiate a program that will be carried out every semester.

While this is going on, evaluation papers will be sent out to graduates to give them a chance to answer the question, "Did this professor possess the capabilities and knowledge to be teaching in college?"

Departmental Preregistration

During the past few years many departments have begun a policy of preregistration. Those of you who are privileged to participate in the program must already realize the great time-saving value it contains for the student during registration. I feel certain that in the future all departments will be practicing preregistration but a definite push by a strong student government will bring the day of reality much closer.

Next week I plan to go into why I will not support political spoil system and why I believe the president should write a weekly report in the Technician explaining what the following are doing:

- a. Student Government Legislature
- b. Faculty Senate
- c. The Administration
- d. The Board of Trustees

Tanen Running For Treasurer

The following statement has been released by Bob Tanen, candidate for the office of Treasurer of Student Government.

"Do you know where your money is going? It is my belief as both a student and a candidate for the office of Treasurer that we do not have the slightest conception of where our money is going. I feel we have the right to know how our money is being used.

YAGER

(Continued from page 1)

Leaksville, N. C. He formerly was a demolition sergeant in the Marine Corps, and is a member of the State College Veterans' Association. He has been an active member of, and a committee chairman in, the College Union and a member of the College Union Board of Directors. Taking an active part in Student Government, he has been

"It is my policy that the students will have an itemized account of where their money is going so that the student government can find out the opinion of the campus if their money is being spent to its best means. This is the main point of my platform.

"I pledge my word that if and when I am elected, that this point will be carried out to its maximum extent and that I will be working for you, the student."

a member of the Student Government Traffic Committee; Chairman of the Student Government Orientation Committee; a delegate to the Consolidated University Student Council; a representative to the State Student legislature for three years, serving as chairman of the State delegation this year; Chairman of the Judicial Board during the past summer; and was president of his class during his Freshman year.

Honorary Officers for the Military Ball are, left to right, Air Force Honorary Colonel, Miss Eleanor Foulds, escorted by Richard Burgess; Lieutenant Colonel, Mrs. Flora Agar, escorted by James Agar; Lieutenant Colonel, Miss Betsy Carol Lane, escorted by Joe K. Cochran; Lieutenant Colonel, Miss Gloria Paschal, escorted by Sid Gordon; bottom row, Army Honorary Colonel, Miss Sophia Leventis; escorted by Chris Kametches; Lieutenant Colonel, Miss Elizabeth May, escorted by Charles Andrews; Lieutenant Colonel, Miss Dottie Cammer, escorted by Joel Parker, and Lieutenant Colonel Pat Simonds, escorted by Teddy Allen.

**Chevy is
America's "hot" car
-officially!**

Chevrolet Wins Coveted Manufacturers' Trophy at Daytona Beach as "best performing U. S. automobile"!

Want facts about performance?

Then look at the official figures from NASCAR's* internationally famous Daytona Beach competition for stock cars. Here's what you'll find: Chevrolet, in two weeks of blistering competition, proved itself as America's Number One performance car. Nothing in the low-price field could touch it.

No other car, regardless of price, scored such a sweep. And Chevy walked away with the famous Manufacturers' Trophy, hands down!

The 1957 Chevrolet is, by all odds, the most astonishing performer ever produced in the low-price field. Best of all, this superiority isn't limited to just a few extra-cost high-performance models. Every type of Chevy—from the six-cylinder models right up to the 283-horsepower "Super Turbo-Fire" V8's, from the single-carburetor V8's with Powerglide to the stick-shift "270's"—is a championship car.
