## Outstanding Rising Seniors

### 12 Juniors Tapped By Golden Chain

Golden Chain, senior honor society at State College, tapped 12 top-ranking rising seniors at the college for membership in the organization last Friday.

The students were inducted into the order during a traditional ritual held at the College Union Building yesterday at noon.

The new members, all of whom have outstanding records in their academic studies and in extra-curricular activities, are:

John David Barnhardt, Charlotte; George Cochran, Maysville, Ky.; Bob Lane, Richmond, Va.; Edward Knuckolls, Hendersonville; David Weinstein, Lum City; Charles Abernethy, Hic-

berton; Robert Kennel, Newkory; William A. (Bill) Graham, III, Charlotte; Cecil Brooks, Sparta; and Joe Hall, Mt. Holly.

Honorary members selected by Golden Chain this year are Dr. Gerald B. James of the faculty of the Department of Agricultural Education; John H. Lane, Walstonburg; Dott Morton, Raleigh; and Frank Pethal, Raleigh.

John Lomax of Guilford College, senior in engineering, is retiring president of Golden Chain.

## State Receives Large Grant From AEC

Setting a new trend in engineering education, the U. S. Atomic Energy Commission announced last Friday the awarding of a \$122,800 grant to State for the procurement of training equipment for the college's expanding nuclear program.

Chancellor Bostian hailed the grant as a means for the college to broaden the base of its training program in atomic energy and said it will provide new facilities for nuclear study in three departments of the institution's School of Engineering.

A national pioneer in the field of nuclear education, State College began its nuclear engineering training in 1950 when it became the nation's first college to offer instruction leading to B.S., M.S., and Ph.D. degrees. It later built the first nuclear reactor

at any American college or university.

College officials said the grant marks a new step by the AEC in supporting nuclear education.

Dr. J. H. Lampe, dean of State College's School of Engineering, said, "The grant provides broadening support that we all deem so essential to provide needed manpower for this industry. It is a significant development in engineering education."

### Previous Grant

State College had submitted a proposal for the new work to the AEC. Earlier this spring, the AEC awarded N. C. State a grant of \$80,000 for use on the design and construction of its enlarged nuclear reactor, now being planned.

Commenting on the new grant, Dean Lampe stated, "This is recognition and encouragement

from the Atomic Energy Commission to broaden the educational program and to include several fields of engineering in nuclear study."

The grant will go to three departments serving the nuclear training program of State College. They are the Electrical Engineering Department, headed by Dr. George B. Hoadley; Mineral Industries Department, headed by Dr. W. W. Austin; and the Physics Department, headed by Dr. A. C. Menius, Jr.

Several pieces of valuable equipment as well as highly technical laboratory facilities will be purchased with funds from the grant.

### Physics Plans

The Physics Department will buy a one-million volt Van de Graaff generator to be used in its reactor and physics laboratories. It will also purchase equipment for teaching programs in reactor instrumentation and control. Dr. A. W. Walker of the physics faculty will be in charge of the expanded work made possible by the grant in the Physics Department.

Dr. Hoadley said among the new facilities purchased by the Electrical Engineering Department, under terms of the grant, will be electronic computing equipment for the study of reactor control and response and measuring and sensing equipment for use in the study of nuclear particles released in the process of nuclear fission.

He also said the grant will be used to buy equipment to simulate a reactor so that students can experiment with atomic energy and have the possibility of making mistakes in their manipulations without serious physical damage which would result from work with actual reactors—if these reactors did not have safety controls.

Dr. Hoadley announced that three faculty members in his department will be in charge of the expanded electrical engineering work made possible under the terms of the grant. They are Professors William Barclay, Al Goetze, and Edward Manning.

Dr. W. W. Austin, head of the Mineral Industries Department, said funds from the grant will be utilized to carry out significant studies in metallurgy with (See AEC, page 4)

## Covering Campus . . .

### States Mates Club

The State's Mates Club will have a Variety Show Monday, May 13, 8 p.m., C. U. The public is invited.

### Agromecks Here

Agromecks may be picked up between hours of 1-6 p.m., May 13, 14, 15, at the C. U. All students must be cleared with the Business Office, and any student may pick up his and one other student's book. Registration cards must be presented.

### YDC Meeting

The State College Young Democrats Club will meet at 7:30 Wednesday night in the College Union. Committee appointments will be made.

### Selective Service

All students who are registered with local boards and who do not have ROTC deferments based on their enrollment or contemplated enrollment in ROTC should come to the Registration Office with their Selective Service cards in order to furnish data necessary for us to report their ranking to their local boards. This should be done prior to May 20 as we will not have time to take care of this matter after that time. If a student neglects to do this during this time, he should write us a letter furnishing from his Selective Service card the following data: 1. Full Name; 2. Selective Service Number; 3. Date of Birth; 4. Mailing Address; 5. Number and Address of Local Board.

### ASCE Meeting

The ASCE will meet Tuesday, May 14, at 7 p.m. in the Auditorium of Mann Hall. The speaker will be Mr. Bremer of the Federal Bureau of Public Roads. This will be the last meeting of the semester.

### Korean Veterans

Forms necessary for VA bene-

## 'Dorm Day' Plans For Picnic, Dance

The Interdormitory Council has announced final plans for "Dorm Day," which will be held on May 18. A picnic supper will be served all dormitory residents and their guests in the Pullen Park area.

Students can find the exact location of their picnic areas by referring to posters which will be placed in the dormitories.

At 8:00 p.m., following the picnic, there will be a dance in Frank Thompson gymnasium. Dress will be informal, since the dance follows immediately after the picnic. Music will be by Harall Nall.

IDC President Fred Joseph has urged all dorm students to take advantage of this event.

## Annual 'Y' Clothing Drive Starts; Two Weeks of Collecting Planned

The annual YMCA clothing drive started today. Large red boxes have been placed in the dormitories, fraternity houses, and the YMCA lobby for those who wish to contribute old clothing.

The clothes collected will be sent overseas to such places as Greece, Germany, Austria, Korea, and the Near East. The drive will last for two weeks.

Sam Martin, who is working on the drive, has asked that students give old clothing "that is of little value to us to others who need such clothing urgently." He continued his appeal to the students by saying, "When you see the red boxes, put in that old shirt that you were thinking of throwing away; someone else will appreciate it—and needs it."

### AG Club Meeting

The AG Club will meet at 7 p.m., May 14, C. U. Theater. Primary elections will be held.

### Forestry Club

The Forestry Club will meet at 7 p.m., Tuesday. Dr. Cook from the Pulp and Paper Department will show slides and give a talk about forestry in South Africa.

### Alpha Zeta

Alpha Zeta will hold its annual teacher evaluation in the School of Agriculture, Forestry and Dept. of Agricultural Education May 13-17.

Candidates for Degrees May 26 If you have not been measured for a cap and gown, please come to Room 13, Holladay Hall immediately (no later than May 14).

### 4-H Club Meeting

The Collegiate 4-H Club will meet Wednesday, May 15, 7 p.m., 310 Ricks Hall. New officers will be installed and important plans for next year will be discussed.

## Walsh To Head Monogram Club

Jim Walsh of North Wells, Pa., a member of the soccer team at State College, has been elected president of the Monogram Club at the college for the 1957-58 academic year.

Other new club officers are Joe Rodri of Downingham, Pa., vice president; Dick DeAngelis of Reading, Pa., treasurer; Tom Hayworth of Route 1, High Point, membership secretary; Jay Beacon of Pittsburgh, Pa., recording secretary; Max Pruzan of Paris, France, publicity director; and John Collar of Washington, Pa., sergeant-at-arms.

The Monogram Club, an organization of athletes at the college, sponsors a wide range of extra-curricular activities each school year.

## Last CU Forum Talk Will Feature India

Prof. M. S. Sundaram, Cultural Counsellor to the Embassy of India, will speak in the College Union tomorrow night at 8 p.m.

He will discuss "India's Place in The World Today." The event, which is the last College Union forum committee program for the year, will be open to the public free of charge.

Professor Sundaram was educated at Madras and subsequently at Oxford, England. He was associated with the teaching profession in India for many years. In 1945, he came to the United States as Educational Liaison Officer to the Indian Government where he studied

different aspects of the educational structure of the United States with special reference to higher education.

In 1954, he undertook a round-the-world tour, visiting many of the Pacific countries. During the winter of 1954, Professor Sundaram accompanied the vice president of India on his goodwill tour to South America. He was a delegate to the eighth General Conference of UNESCO in Montevideo in 1954, and to the ninth UNESCO Conference held in New Delhi in the winter of 1956.

Sundaram is married, has one daughter, and lives in Washington, D. C.

This is just one of the models who posed last week for the College Union Photography Committee's program in Cameron Village.

Photo by Barbot

## Wesley Foundation Installs Officers

Officers have been named to head the Wesley Foundation, Methodist student organization at State College for the 1957-58 school year.

They are Richard Hunt Burgess, Du Mont, N. J., a rising junior in nuclear engineering, president; Robert L. Edwards, Sherrills Ford, a rising senior in mechanical engineering, vice president; Bobby Jones of Route 3, Laurinburg, a rising junior in civil engineering, secretary; and Gene Lowrimore of Route 3, Tabor City, a rising junior in nuclear engineering, treasurer.

In announcing the election of the Foundation officers, the Rev. Neal V. McGlamery, minister to Methodist students of State College, said the students were installed in their new posts on April 28.

Headquarters of the Wesley Foundation at State College are located in the Methodist Fellowship Center, adjacent to the Fairmont Methodist Church on Clark Avenue here.

## Pethal Named S.G. Summer President

Student Government President Fred Houtz announced last night that Frank C. Pethal has been appointed to act as President of the Student Government during the ensuing summer school session.

In addition to the various duties of Acting President, Pethal will concern himself especially with the parking problem. He has been Chairman of the Traffic Committee for the past two years.

**EDITORIAL COMMENT:**

# From The Bell Tower

One day last week at twelve o'clock we received a very welcome jolt. At that time we heard ringing "loud and clear" from our Bell Tower the Alma Mater. Richard Stallings, our bellmaster, was at the keyboard.

We hope he will continue to play the Alma Mater . . . and more frequently. If the upperclassmen become familiar with the tune, maybe we would hear a difference in the singing next fall. And, a little more sentimentally, maybe we would all feel just a little twitch of pride inside each time we heard the bells ring out our unique, but beautiful, Alma Mater.

Another way to help the students learn our Alma Mater would be to give the freshmen and upperclassmen pocket-sized copies of the song next Fall. Student Government will vote on this proposal this Thursday. If you like the Alma Mater, talk to your representative before then and ask him to vote in favor of this measure.

## Have You Heard

How many people, in buying an automobile, would choose one which they knew was unable to get them to classes and back home, instead of paying more for one which they were sure would get them where they were going? Few would be so short-sighted and extravagant to choose the first.

Student Government, however, recently voted to buy a bell for the west end of the campus which is, essentially, a car that does not run . . . at least it doesn't run very well. The bell which was just installed atop Williams Hall could be classified better as a buzzer than as a bell.

The "buzzer" can be heard distinctly (almost by anyone who is (1) standing directly in front of Williams Hall, (2) listening very carefully, and (3) knows exactly when the bell is going to ring.

Of course a bell which can be heard only in several hundred feet away is worthless to those who are further away—or in class with the professor in the middle of "those brief, last minute words" of his lecture.

But remember . . . those responsible saved several hundred dollars by buying this bell. Yes, instead of paying more and installing a real bell, they got us a bargain! Even though one can't hear it, look how much money was saved. . . .

Certainly Student Government made an unsound choice in this matter. Instead of installing the bell which Southern Railway gave us free, they voted to buy and install the IBM bell. Granted, the bell from Southern Railway would have cost much more to install, but at least we would have something to show—or hear—for the money.

We are curious to know if anyone in Student Government had ever heard or seen the type of bell which they voted to buy. . . . In any event, in an attempt to save money, they actually squandered several hundred dollars on a bell which will never be heard by most of the people on our campus.

### Mobile "Whammy" Now on Campus

The Technician would like to warn all students who drive cars on campus that there is now a "whammy" in operation on the campus. The police move it around from place to place . . . so, be awake!

#### From the Oklahoma Daily Newsmen and Red China

Newsmen and Red China from The Oklahoma Daily

Maybe we should have been amused when we heard it but we weren't. In discussing the question of allowing U. S. newsmen to enter Red China, Secretary of State John Foster Dulles last week made an extraordinary statement.

Several American newspapers recently have contended—not without good reason—that the administration's refusal to permit journalists to make the trip into the Communist state constitutes abridgement of freedom of the press.

In denying this, Dulles spat out a pearl that should have made Charles Wilson green with envy. Our secretary of state said freedom of the press regards the freedom to print the news, not the freedom to gather the news.

Wow. This from a public servant on the highest level of American government. Imagine the consequences if such an idea were government policy or law. Newspapers of America: You can print anything you know, but you can know only what we let you know.

Or, people of America: This newspaper will tell you all the facts, just as soon as we get them from the government censor.

Ridiculous? Exaggerated? Sure. Impossible? No. Ask the Germans, ask the Argentinians, ask the Italians. Of course they are different from Americans but Dulles' statement—or its potential meaning—is not too difficult from some of Joseph Goebbels', or Peron's, or Mussolini's.

We are appalled at the fact that such words come not from a left-winger on a soapbox but from one of the most highly placed and influential individ-

uals in Washington and in the free world. We hope the reason is senility and not a reflection of the attitude of other high officials as well.

### "J" Board Policy

The following is a statement by the newly elected Judicial Board on the policy to be followed in cases of mob violence.

The new policy states: The apprehension of any student on the scene of mob violence shall be considered prima facie evidence of participation in the mob violence. Therefore, students arrested at the scene of any mob action, such as a panty raid, will be considered guilty of participating in the raid, unless evidence or subsequent testimony indicates otherwise.

## State Hosts "Big Four Day" Tomorrow, Annual Affair at 2

**Notes from the Wolfpack**  
Little known facts department: William C. Friday, president of the Consolidated University of North Carolina, was a student assistant in the sports publicity office at State College during his undergraduate days.

A recent visitor on the campus was Vince Bagonis, former football line star and brother of John Bagonis, who was also a great Wolfpack lineman. Vince is now teaching and coaching high school football in New Jersey.

An advance note from a national magazine says that John Richter has been named to the magazine's All-District team, which will be released in the fall. The 6-8 sophomore was State's top scorer last year and an All-ACC choice.

### Pack Meets Carolina In Rained Out Affair

The State-Carolina game, which could well be the deciding factor in the ACC baseball race, was postponed until this afternoon when rain called a halt in Chapel Hill on Saturday.

Coach Vic Sorrell will probably send either Rog Hagwood or Billy Franklin to the mound for today's important battle, which if won could put State, now 7-6, in fourth place.

Carolina now has two rained out games to be played, and, with an 8-4 record, has to win both contests to tie Duke, 10-4, for the championship. If the Tar Heels get by the Wolfpack, a postponed game will be rescheduled with Maryland, to decide the outcome.

North Carolina State will host the 11th annual Big Four Sports Day tomorrow afternoon at 2:00 p.m. Several hundred intramural athletes from State, Wake Forest, Carolina, and Duke will gather on the West Raleigh campus to compete for individual honors in eight different events.

The coveted team trophy is awarded the school compiling the most total points during the afternoon.

Last year's event was held at Chapel Hill with the Tar Heels nipping the Pack on the strength of its golf team to cop 1st place honors.

Tryouts have been underway for the past several days, here at State, and all indications show the Wolfpack fielding strong entries in softball, volleyball, table tennis, and horseshoes.

Art Hoch, local intramural director and Big Four Day su-

PROGRAM OF EVENTS				
place		1st round	2nd round	
(RGA) Gymnasium	Golf	12:00	3:15	3:15

Gymnasium	Badminton	2:00	3:15	3:15

ervisor, deems the State squads as some of the finest in years and rates the local lads a good bet to capture the team trophy. Points are awarded to each school on the following basis: 1st—5; 2nd—3; 3rd—2; 4th—1. All students are urged to turn out.

The eight-event schedule includes softball, handball, volleyball, golf, table tennis, horseshoes, tennis and badminton.

Members of the college's physical education staff will act as activity supervisors. Big Four

Day is an annual affair of the intramural departments of the Big Four with the sponsorship rotating each year.

### Week's Schedule

to a young man

with the world on a string

This June, the graduates of our engineering and scientific schools, pockets stuffed with job offers, have "the world on a string."

But there's another "string" attached to this fabulous situation: A man can only accept one job offer.

How can the graduate make up his mind wisely about his vital decision?

We're not going to try to tell you. And we're going to resist the temptation to point out the many advantages of working for IBM—much as our company, like every other, needs top-notch engineering and scientific talent.

We're merely going to leave you with one thought that may help you make your decision:

IBM's President has stated this policy: "... I want this company to be known as the one which has the greatest respect for the individual."

**HAVE YOU TRIED  
THIS EASY TEST?**

Here's an interesting way to test a summer shirt for coolness. Have your friends truss you up like a barbecued pig and put you on a spit. Then have them light a roaring fire underneath you. Then get somebody to keep turning you, slowly and deliberately, over the crackling flames. Do you feel the heat? Do annoying beads of perspiration break out on your forehead and neck? Are you uncomfortable? Does your collar wilt, wrinkle and curl? In fact, do you generally dislike the test?

If any one of these things happen, you're not wearing a Van Heusen Century Sheer, the summer shirt that's about

the coolest you can buy and which features the famous one-piece soft collar that can't wilt or wrinkle, no matter how hot or humid it gets.

The Van Heusen Century sheer Shirt is the summer version of the great Van Heusen Century Shirt. It's made of pique, that featherweight, cool-weave fabric, launders beautifully and (we repeat) it's impossible to wrinkle its collar. Takes no starch either, so it's always soft and comfortable. See it at your campus haberdasher. He's got the Van Heusen Century Sheer in several collar styles. \$4.00.

respect both to high temperature and radiation damage.

The department, he said, will equip an X-ray diffraction laboratory for the examination of metals, alloys, and ceramic materials. It also will buy facilities for an ultra high temperature laboratory including a vacuum and controlled-atmosphere furnace for the melting of refractory metals and alloys; equipment for high-temperature microscopy; and facilities for a corrosion laboratory.

**Control of Heat**

Among the technical bottle-necks standing in the way of the

generation of power from atomic means is the control of the intense heat and radiation which result from nuclear fission. These problems will be dealt with in the studies by the State College Mineral Industries Department.

State College, Dean Lampe said, was chosen by the AEC for the strengthened program in nuclear studies because of the institution's "outstanding faculty." He paid tribute to the North Carolina Engineering Foundation for its part in supplementing the State salary scale so that the college has been able to attract and retain the services of its best teachers and research experts.
