Long-Awaited Traffic Light Now Brightly Functions

The new stoplight at Pullen Road — Dunn City of Raleigh. Inset shows close-up of light. Avenue intersection was recently put up by the (Photo by Kjosnes)

City Installs Traffic Light At Dangerous Intersection

By Rob Farrell

A traffic light was erected last week at intersection of Pullen Road and Dunn Avenue.

The light was erected by the City of Raleigh with no expense to the college.

The intersection has long been recognized as a hazard for both pedestrians and vehicles. The College Traffic Committee has been studying the dangerous intersection for several years.

Earlier this semester the Traffic Committee asked the Raleigh Police Department to make a survey of the traffic flow through the intersection. The survey showed that there

was not sufficient traffic to warrant a traffic signal at the intersection. The city then placed new stop signs on Dunn Avenue.

After this, the Traffic Committee recommended that the intersection be blocked, and the Dunn Avenue traffic be rerouted. The motion to block the intersection passed the committee by a slight 5-4 margin. When the recommendation was sent to Chancellor Bostian, he referred it back to the committee.

Another appeal was made to the Raleigh Police Department to erect a light. The department agreed to recommend to the city that a traffic light be placed at the intersection.

This Is A Walkway?

This is a sidewalk? Looks more like a mudhole. Shown above is the walkway leading to the Alexander-Turlington area.

The College Traffic Committee is made up of the Student Government Traffic Committee plus several members from the faculty and administration.

Fraternities Begin Second Rush Period

Second semester rushing, sponsored by the IFC, will be held the first week-end after the semester break on February 6 and 7—Friday and Saturday—from 7:30 till 10:30 p.m.

IFC President, George Howard, had the following brief comment for the non-fraternity men last night; "Anyone interested in learning more about fraternities here at State will be welcome at all of the houses during these times."

There will be no formal invitations mailed by the fraternities. Any student can go by any of the 18 fraternities during this rushing period.

Union Will Show Charlie Chaplin Film

"Tillie's Punctured Romance," the only full length silent feature made by Charles Chaplin, will be featured as the Panorama film presentation this Friday night at 8 p.m. in the College Union theater.

Marie Dressler and many old time "greats" such as Mabel Normand and Fatty Arbuckle make this a rare example of Americana on film.

A Keystone Production directed by Mack Sennett, the film is one in a series of Friday night presentations by the Union Film Committee. The program, which is open to all College Union members, will be followed by a coffee hour.

\$10,000 Donation

State College Graduate Establishes Loan Fund

A \$10,000 student loan fund has been established at State College by Charles Weaver of Detroit, Mich., a 1915 graduate of the college and a native of Franklin, N. C.

In announcing the donation from Weaver, Dr. Carey H. Bostian, chancellor of the college, said the benefaction will be designated the "Charles Weaver Loan Fund" and will be used to aid students enrolled in engi-

neering and science in line with the donor's wishes.

Weaver, president of Charles Weaver, Inc., a Michigan sales firm handling heavy industrial equipment, was graduated with a B.S. degree in mechanical engineering from State College in June, 1915, and is a well-known industrialist in the Midwest.

In expressing appreciation to Weaver for "this magnificent gift," Dr. Bostian said the col-

lege's Committee on Scholarships and Student Aid "will endeavor to make loans to students who will add credit to North Carolina State College."

Loans from the fund, Chancellor Bostian reported, will be made within a few days to students who need help in order to register for the spring semester which begins February 5.

In an exchange of letters with Chancellor Bostian, Weaver expressed the hope that the donation might create "a perpetual Student Revolving Fund . . . for the advancement of knowledge in science and engineering."

Loan Conditions

State College, Chancellor Bostian said, has established conditions for the administration of the loan fund in accordance with the donor's wishes.

The fund, he explained, will be used to make long-term loans to worthy students who will begin making repayment of the principal and three per cent interest within one year from the date of graduation. The interest will be added to the principal.

A maximum of \$300 per student per year or a total of \$1,200 per student for four years of study will be loaned under the terms of the benefaction.

Chancellor Bostian said the need, scholastic records, and work being done by students to earn a portion of their college expenses will be considered in approving the loans.

A loan which Weaver received while he was a student at North Carolina State College led to his decision to make the donation to his alma mater.

Over One Hundred Expected

Orientation Planned For New Students

Between 100 and 200 new students will arrive at North Carolina State College Monday, February 3, to begin a three-day orientation program.

February 3 will be a day of moving into housing accommodations and taking entrance examinations for the campus newcomers.

Students who have not taken the State College entrance examination will be required to take it from 8:30 a.m. to 1 p.m.

Beginning freshmen with no previous college credit who used the scholastic aptitude test for admission purposes will have to take the cooperative algebra test February 3 at 5 o'clock.

All new students will assemble at 4 o'clock Monday afternoon in Riddick Auditorium where the mechanics of registration and regulations pertain-

ing to attendance and campus traffic will be explained.

A second assembly is planned for Riddick Auditorium Tuesday, February 4, at 8:30 a.m. when health and ROTC information will be given.

Following the assembly, students will take a physical examination in Clark Infirmary and a physical skills test in the Frank Thompson Gymnasium.

From 1 to 3 o'clock Tuesday afternoon, students will meet with representatives of their respective schools to arrange for scheduling courses.

A student activities assembly from 3:30 to 5 p.m. in the College Union Ball Room will conclude Tuesday's activities.

On Wednesday, February 5, the newcomers will register in William Neal Reynolds Coliseum with returning students.

After The Celebration Was Over . . . A Mess

The Berry-Becton-Bagwell quadrangle shows the State Victory. the result of Monday nights "celebration" after

(Photo by Kjosnes)

Seniors Donate !

In the last issue of *The Technician*, Jim Peden, president of the senior class, published an open letter to his class in which he explained the plan for collecting money for the senior class gift. In his letter, Jim pointed out that money will be collected on a donation basis only . . . that the officers of the senior class are depending on the generosity and spirit of the whole class to really put the gift idea over in a big way.

State College has comparatively few real traditions, traditions that have been remembered by our alumni over the years. We have a fine opportunity to make one of our few traditions into something really important to graduates of State . . . the senior class gift.

When we return to State in the years after our graduation and see the gift our class left the school, we will remember that we left something behind besides a lot of gripes and a lot of hard work.

Donate, seniors . . . give State something that all of us can be proud of for a long time.

—RPL

The Russian Challenge

Editor's Note: Though the following is a news story, not an editorial, we feel it will be more thought provoking than the Editorial we had planned to write. (We had intended to remind you to get your polio and flu shots tomorrow, to expound on how sorry the performance in the Berry, Becton, Bagwell quadrangle was, and to say how glad we are to see the new stoplight on Pullen Road. Space, however, is limited.)

by: David Barnhardt

"The Russians are not resting on their laurels. Missiles and Sputniks are only symptomatic of progress by Russia in other directions."

So stated Thomas P. Whitney, Associated Press foreign correspondent, on Monday night at the opening lecture of the Institute of Religion Series being held by the United Church of Raleigh.

(The series, which lasts through February 24, presents one speaker each successive Monday night for the next five weeks. The speaker next Monday at 8:00 p.m. will be Dr. R. Norris Wilson. Students are invited to attend.)

Whitney said that complacency by Americans is the reason Russia won the race into space. He continued by saying that the launching of the Russian Sputnik "should not have been a surprise to us."

Scientific Advancements

Russia has the largest atom-smasher in the world. It is capable of producing 10 billion electron volts. (The largest U. S. atom smasher—a cyclotron—is capable of only 6 billion electron volts.)

The U. S. S. R. has just completed the first nuclear powered surface ship. It is an icebreaker with four times the power of the biggest icebreaker possessed by any other country.

The Russians have an Atomic Electric Power Plant, which is not under the jurisdiction of the military, that is three times as big as the one we recently opened in Pennsylvania.

Russian Education

In the first ten grades of Russian schools, the students have no electives—all pupils take the same courses. And in the tenth grade, Whitney pointed out, three-fifths of the total instruction consists of science,

math, and related auxiliary subjects.

There is considerable emphasis on discipline in Russian schools. And there is a serious air about education in Russia which is absent in America.

"In Russia," Whitney said, "success in life depends almost entirely on success in school. . . and in getting into a university."

Just last year the Russians began a series of boarding schools that take children from their homes at the age of seven years. The object of taking the children from home when they are so young, he said, is to remove them from the influence of their families. Although there are now only 100,000 children enrolled in these schools, it is predicted that there will be 1,000,000 enrolled in three years.

Almost all students in higher education are supported by government scholarships in Russia. This means that there are few students who are capable that are deprived of higher education because of financial reasons.

A "Science City" was begun a few months ago in Siberia which will cost approximately 70 million dollars. Scheduled to be completed in 3 to 4 years, the "city" will include modern laboratories, a 4 to 6 million volume library, and housing facilities for "tens of thousands of people."

Land of Contrast

In concluding, Whitney said that Russia is a land of contrasts. Though there are few paved roads, there are scheduled jet airliners flying overhead. . . Though most of the people still live in the same type of log cabins that were used 600 to 1000 years ago, these log cabins have television sets inside.

Whitney said we are in competition with Russia in economics, in technology, and in science. We should realize our situation, he said, and remember that "God helps those who help themselves."

LITTLE MAN ON CAMPUS

by Bibler Fraternity Line

Affairs of State

Increased Credit Asked In Graphics

By Pierre Leveque, Jr.
Effectiveness and efficiency in our nation's collegiate student governing bodies vary greatly from campus to campus and depend almost entirely upon the support and cooperation of the student body.

Student governments are representative of the students, and the interest, initiative, and responsibility shown by these elected student representatives determine to a large degree the amount of power and voice that student government will have on campus.

Our Own Governing Body
North Carolina State College has one of the most efficient and well-functioning student governments in the state, comprised, as that of our federal government, of executive, judicial, and legislative branches of power.

The North Carolina State stu-

dent body, working hand in hand with the student government, can, by continuance of cooperation and the desire for improvement, make our college a greater school in which to acquire a skillful education.

Graphics Poll

Of the replies that I have received in answer to the poll on Engineering Graphics Courses that this column published last week, a majority of the students that replied, (78%), think that required work in this course should definitely be lessened while at the same time credit for the course should be increased.

A mere 3% of the students that replied seem to think that Engineering Graphics Courses are satisfactory as they stand and that no change should be made, while 97% agreed that credit should definitely be increased.

IDGAD

ROY LATHROP

Registration

Last year at about this same crucial time, IDGAD raised a question as to the purpose of alphabetical registration. This year the plan is to follow the same procedure . . . so IDGAD will also follow the same procedure by again saying it doesn't make sense.

The main issue involved is not who gets in first, but rather will you and I get through the lines in time to get the schedule we need. Many of us can only work in a certain required course at one time (though the registrars find this unbelievable) . . . in certain cases, if we cannot get the course as planned it will mean waiting a whole year and really messing up the rest of our schedule.

We make a plea for understanding; we ask the registrars to consider the case of Joe Smith. Joe spent many hours with his advisor trying to fit all of his courses into a workable schedule; there were several courses he had to take as prerequisites for other courses to follow. But Joe's last name began with an "S" . . . and S's weren't allowed to register until 2:00 P.M. So Joe finally gets through the right line . . . only to find that "I'm terribly sorry, but that class is full; you'll have to schedule something else at that time. . . ." Well, Joe Smith has to go to State College an

extra semester now; he couldn't get his courses scheduled because his last name begins with an "S".

Now I ask you . . . WHY? If Joe Smith and Tom Jones and Bill Brown want to stand in line beginning at dawn, so that they can get the courses they need, why can't they? Just exactly what benefit is gained by doing it by alphabet?

These same questions have been raised before . . . they have also been ignored before by those in a position to answer them. Let's see what happens this time.

Fraternity Rushing

Fraternity members met a lot of men last fall who had decided to wait until second semester to consider a fraternity; many of these men wanted to wait and see how their grades turned out for the first semester, while others wanted more time to consider which fraternity was the best for them.

All of the fraternities hope that you who are interested will come to the various houses on February 6 & 7. If you need transportation, feel free to call on the members to give you a lift. Rushing will be a lot more informal this second round, and there will be more opportunity to get to know the members . . . take advantage of this opportunity to learn about the fraternity system and what it has to offer.

Inaction At Girls' Schools

It looks like it will be the Tommy Dorsey Band for I.F.C. Spring Greeks to be held on May 10 this year. . . There is also a possibility that the traditional afternoon concert may be given by the Gladiolas, which is, by the way, a type of entertainment which will add variety to the event.

After the huge victory parade which celebrated State's victory over Carolina last Wednesday night, this writer is very glad he is not among the many people who has openly criticized the school spirit around campus. Certainly no group could have shown more school spirit than was shown during the victory parade down to Capital Square and down Fayetteville Street.

Congratulations are in order to all who participated. It was one of the few times that such an incident did not result in some kind of trouble and unfavorable publicity for the school. It is unfortunate that the same can not be said for the celebration Monday night which resulted

in such a mess for M.&O. . . Still can't help wondering what is holding up Fraternity Row. Perhaps the so called "red tape" is hiding some pretty important facts which State's "Greeks" deserve to know about.

So Far, Nothing

Not too many weeks ago this writer commented on the idea of attempting to get permission from the administrations of Meredith, St. Mary's, Rex and Peace for these girls to take weekends in Raleigh as they now do when attending dances at other colleges outside Raleigh. So far, nothing has been accomplished along these lines.

Wonder why these schools think it is acceptable for a girl to go to Chapel Hill or Duke for a weekend and yet they still insist that no girl do the same thing in Raleigh? Perhaps a petition from the Student Bodies of these schools, along with a series of requests from State Student Body leaders, would do the trick. . .

Letters to the Editor

Pay Telephones Should Go

To The Editor: . . .

There are fifty-two pay telephones on this campus with which the telephone company makes a huge profit from us. Some students, almost never make a call, but others who are going with girls at one of the

local colleges put a tremendous amount of money into these bandits. A student making one call a day during a four-year course would spend over a hundred dollars on those calls; and who could give away one hundred dollars without missing it?

But students of our brother institution at Chapel Hill are not faced with this problem. They have free local calls. Why do Carolina students always get all the breaks? Included in our tuition are fees for almost everything imaginable except phone service. If the administration would provide free local phone service and add the small amount to our bills, everyone except the phone company, would save money. Let's stop this endless swindle by the phone company!

State College Announces Dates And Fields For Summer School

In a move designed to help meet space age training needs in science and technology, State College today announced it will conduct two summer terms this year.

Faced with a rising demand for engineers and other highly-specialized graduates, officials

said the 1958 State College summer schools—each of which will run for six weeks—will offer a varied schedule of instruction in agriculture, education, engineering, design, textiles, and other technical fields as well as liberal arts courses.

lina's principal center of research and education in technology and the physical sciences, has experienced a sharp increase in the demand for its services since the development of rockets, missiles, and other facilities of the space age.

Its enrollment jumped to an all-time high of 5,756 during the current semester.

Fuller Facility Use

With the summer sessions, the college hopes to make fuller use of its vast array of technological laboratories and allied facilities as well as its professional teaching and research staffs.

Shortages of teachers and classrooms have been cited by educators as two factors which are involved in America's race to keep ahead of the Russians in the quest for more scientists.

Both graduate and undergraduate courses will be taught in State College's 1958 summer terms, today's announcement said.

The first six-week term will run from June 10 through July 18, with freshman orientation scheduled for June 9.

Freshman orientation for the

second six-week term will be held on July 21, with classes beginning the next day and ending on August 28.

Catalogs describing the courses offered during the summer school sessions will be ready for distribution about March 1.

Courses Offered

Courses will be offered both graduate and undergraduate students in agricultural economics, animal industry, chemical engineering, dairy manufacturing, education, electrical engineering, horticulture, industrial arts, mathematics, modern languages, physics, plant pathology, psychology, and zoology.

Geological Engineer Receives Award

Lonnie Thomas Sanford, III, of Charlotte, a State College freshman, has been awarded the International Nickel Company Scholarship for 1957-58.

Sanford was named yesterday by Dr. Lyle B. Rogers, director of counseling at the college, as the recipient of the award.

The scholarship winner is majoring in geological engineering.

Sanford received the scholarship on a one-year basis. It is renewable until graduation upon his meeting certain scholarship requirements.

Students Win Grants For Research Work

The North Carolina Academy of Science has announced the awarding of five research grants to undergraduate and graduate students who are currently conducting research at Elon College, North Carolina State College and Duke University.

State Students Honored
Recipients from State College are Andrew J. Weber and John J. Funderburg.

Weber received his grant for promotion of a population and nesting census of the ring-necked pheasant at Cape Hatteras.

John J. Funderburg, a member of the N. C. Academy working out of State College received his grant for field studies on the bird life of the Raleigh region for comparison with a study made 50 years ago by the Brimley brothers.

Grants Donated
The research awards are made possible partly through an allocation from membership fees of the American Association for the Advancement of Science and particularly through the generosity of individual North Carolinians, Dr. Whittinghill noted.

Upon President Berry's invitation, several local patrons and sustaining members have contributed in amounts up to \$100 this year. Although only one award was given in each previous year, these gifts have made possible the granting of five awards for 1958.

New Professor

Murray Daniel Thornburg, former State Supervisor of trades and industrial education for the State Department of Public Instruction, has joined the faculty of State College.

Anachronism?

Not really. 'Cause if Coke had been around in Caesar's day, Caesar would have treated himself to the sparkling good taste, the welcome lift of Coke! Caesar's motto—"I came, I saw, I conquered." Pretty good motto for Coke too—the prime favorite in over 100 countries today!

"When you care enough to send the very best"

Also . . . Complete Selection

Tickets are now on sale at the College Union, Student Supply Store, and the Coliseum Box Office for the Four Freshmen concert which will be presented on Sunday, February 9, from 2:30 to 4:30 in the Coliseum.

One half of the proceeds will go to the School for the Blind, with the remainder being given to the World University Service.

Since they were signed to an exclusive Capitol recording contract, the Four Freshmen have gained a large following. The Freshmen

have been associated with the Steve Allen, Tennessee Ernie, and Stan Kenton television shows.

Their Capitol album, "Voices in Modern," was on the best selling LP album charts of both Billboard and Cash Box magazines for many months.

The Four Freshmen Capitol version of "Day by Day" sold over 350,000 records. Some of the other Freshmen hits include "Charmaine," "In This Whole Wide World," "Angel Eyes," and "Love Is Just Around the Corner."

Dr. Godfrey Addresses New Phi Kappa Phi Members

The State College Chapter of Phi Kappa Phi, national scholastic honor society, Monday night formally initiated 32 top-ranking seniors as new members.

Phi Kappa Phi in technological colleges is the equivalent of Phi Beta Kappa in liberal arts colleges.

Speaking at the initiation rites, Dr. James L. Godfrey, dean of the faculty of the University of North Carolina, declared that the United States, faced with Soviet Russia's educational advances, must seek

out citizens with "marked intellectual gifts" and "develop them to the full maturity and yield of their powers."

Debt of Gratitude

"In a sense," Dr. Godfrey told the honor students of State College, "we owe a debt of gratitude to the Russians who have awakened us to our greatest and most neglected responsibility."

Dr. Ivan D. Jones, president of the State College Chapter of Phi Kappa Phi, presided over the meeting.

Freshmen Initiate Math Acceleration Program

By Phillip Bunting

This year, State College is trying an experiment in accelerated classes.

In prior years, the superior students were held back by a curriculum arranged for the average student. As a result, the superior students were suffering from boredom instead of using their intelligence to its full capacity.

Freshmen Chosen

Before school opened, Dr. John W. Cell, a top man in the Army's rocket program, along with his colleagues, selected 180 prospective students from the entering freshman class. About 160 of the 180 showed up for a conference before the opening day of school. Sixty were selected out of the 160 for an accelerated course of study as freshmen.

Instead of finishing the first semester the last of this month, the students completed their first semester studies on Decem-

ber 1.

Emphasis on Math

From now until the completion of their college years, emphasis will not be on acceleration but on depth and training in mathematics. When the 160 students graduate they will have the equivalent of a post-graduate education.

By taking advantage of these

accelerated courses, students whose aptitudes lean toward math and science can place emphasis on those fields without doing so at the expense of the liberal arts courses.

Dr. Cell also feels that some changes in our educational system are in order and that the humanities should continue to be stressed strongly.

A Campus-to-Career Case History

Westport's "Mr. Telephone Company"

The Westport, Connecticut, office of Southern New England Telephone Company is managed by John F. Lehr, A.B., Yale, '52. In Westport, John is "Mr. Telephone Company."

"This job has everything," John says; "responsibility, independence, a chance to contribute to the community as well as the company. I have 8600 accounts in my office, and every one of those accounts is a person who has to be pleased with our telephone service. I'm in close contact with the town officials, and take part in many civic activities. Needless to say, it's a very interesting assignment.

"How I happened to choose a career with the telephone company tells you something about the business. After a dozen or so interviews with various

firms, I picked the telephone company because it offered two things I was looking for—immediate opportunity, and long-range opportunity, too.

"You see, I was married in my senior year at college, so I wanted a career where I could start with a good salary, and get the training I'd need to advance in the shortest possible time. That's what I wanted immediately.

"The rapid expansion of the telephone business assured me of the long-range opportunities, because that expansion is creating more and more management positions to be filled. In fact, here I am, Manager in Westport, after only five years in the company. I don't know of another business where you can find more opportunities to get ahead."

Find out about career opportunities for you in the Bell Telephone Companies. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet on file in your Placement Office, or write for "Challenge and Opportunity" to: College Employment Supervisor, American Telephone and Telegraph Company, 195 Broadway, New York 7, N. Y.

Frosh Look To Big Four Title

By
Bob Linder

The State College Wolflets play host to a strong Fort Gordon basketball team, Saturday night at 6:15 p.m. Reynolds Coliseum. State's red-hot Freshman squad will be in for a real battle against the powerful service team, who are 15-4 for the season.

The Frosh, sporting an 8-1 season record, are eyeing the Big Four Title. Coach Lee Terrill is enthusiastic over his squad's showing thus far this season, and "will be disappointed if we don't win".

Things are looking good to others besides Coach Terrill. Coach Everett Case, the old Master of basketball, is looking forward to some good varsity prospects from this Freshman squad. The real problem for Coach Terrill is getting all the boys into the games. "We have so many good boys", he explains.

The big load is carried by a nucleus of seven players, all equally outstanding. High scorer in the nine games to date is guard Mark Reiner, 5-11 from Brooklyn, with a 16.3 point average. Holding down the

other guard position is Lanny VanEman, 6-0 of McKeesport, Pa., who holds a 10.6 point average per game.

At the Forward spots are Bruce Hoadley, 6-6 from Raleigh, and Stan Niewierowski, 6-5 of New York City. Hoadley, a "good varsity prospect" is averaging 11.6 points a game, and Niewierowski, the second high-scorer for the squad, has a 15.6 average.

The pivot-men are Larry Ranta and Bob DiStefano. Ranta, 6-8 from Gary, Indiana, is the biggest member of the squad, and is rated as a real comer. The other center, DiStefano, 6-6 of Philadelphia, Pa., is probably Coach Terrill's best rebounder. Larry Lakins, 6-6 from Nappanee, Indiana, is doing a great job as a reserve, and holds a 10.6 point average.

"It's as good a team as I've ever had here", says Coach Terrill, and State College rosters can look forward to many more thrills as this Wolflet squad continues its winning ways and steps into the Big Four Championship.

Varsity Plays Host To Lejeune Marines

North Carolina State's varsity play host to one of the nation's top service teams Saturday night in Reynolds Coliseum, when the Pack takes on Camp Lejeune.

Because the Marines are a non-college team, the game will not count in State's won-lost record.

Camp Lejeune, coached by Major Donald Spencer, has a 19-4 mark for the season but meets Parris Island in two games before coming to Raleigh. The Wolfpack, fresh from triumphs over North Carolina and Maryland, has an 11-3 overall record, 5-2 in the Atlantic Coast Conference.

The Marines are sparked by 6-4 forward Terry Telligman, an All-Southwest Conference choice when he played for Rice. The other starters are 6-2 Ed Peterson of Wagner College at forward, former Florida State star Rick Benson at center, and Marv Leggett and Jim Welsh at guards.

The Wolfpack will start the five "iron men" who played the entire game without substitution in the thrilling 57-48 win over Maryland.

Team	Conference	Games	W	L
N. C. STATE		5	2	3
Carolina		5	2	3
Maryland		4	2	2

Wake Forest		2	2	0
South Carolina		2	2	0

N. C. State's mighty Wolfpack must have had the cheer, "Rip 'em up, tear 'em up", ringing in their ears as they figuratively gave Maryland "Hell" in downing the Terrapins 57-48, in College Park last Monday night.

The victory for State, which puts them in first place in the ACC, was done with the five iron men starters going all the way, the first time in recent Wolfpack history that such a feat has occurred.

For Maryland, it was a bitter defeat, Terp supporters had high aspirations of their spacious new Coliseum being the home of the undefeated, (at least while they were there), and very few had believed that those dreams would so abruptly end.

The West Raleigh group could do little wrong. Throughout the entire contest, the Pack committed only twelve personal fouls, with no individual getting more than three.

Paddlers Dropped By Carolina Fish

The State College Paddlers dropped their first Atlantic Coast Conference meet of the season by bowing, 53-32, to an experienced and fired-up Carolina team last Thursday night at Chapel Hill.

State's Dick Fadden, who has sparked the Paddlers in previous meets, was again the individual star, winning three events. The Carolina team, which now has a 6-0 conference record, was disqualified in the 440-yard freestyle relay because of a faulty start.

The summaries of the meet are as follows:

200-yard freestyle: 1. Schiffman, C. 2. Swicker, C. 3. Kahl, S. (2:15.7).
50-yard freestyle: 1. Fadden, S. 2. Roth, C. 3. Maness, C. (25.8).
200-yard butterfly: 1. Fadden, S. 2. Wachendorfer, C. 3. Turner, C. (2:18.3).
100-yard freestyle: 1. Rose, C. 2. Zickgraf, C. 3. Bittinger, S. (1:52.2).
200-yard backstroke: 1. Nash, C. 2. Merchel, S. 3. Harrison, S. (2:22.8).
200-yard Mahaffy, C. 3. Mercer, C. (2:35.1).
400-yard freestyle relay: Won by State, (Merschel, Harrison, Tolen, Kahl), 4:24.0.

Wolfpack Tops Mighty Terps To Take First Place In ACC

Forward Bob MacGillivray led the Pack to the victory with nineteen points on six field goals and seven free throws. Captain Whitey Bell held second high scoring honors with thirteen tallies on four from the floor and five from the line.

Following these two Pack men were John Richter with eleven points, Lou Pucillo with eight, and Soph. Don Gallagher with six.

The Pack continued the type of play in the Maryland game that has been advantageous to them in the recent stages of the season. It was possession ball

from the start with the Pack not shooting until two minutes had gone by.

Then MacGillivray broke through for a lay-up and was fouled in the process. After he made the charity toss, Maryland got the next seven points to take a 7-3 lead, but that four point margin was as large as it got at any time in the first half.

State pulled into a 27-all tie with two minutes left, but a missed shot and a technical foul, both of which the Terps capitalized on, put Maryland out in front, 31-27, as the half ended.

A Tradition ?

Shown above is a small segment of the students who flooded the streets of Raleigh last Monday night after the Wolfpack defeated the Terrapins of Maryland, 57-48, to take over the top spot in the conference. (Photo by Williams)

Cooperation Asked

After meeting with registration officials, the Student Government Campus Welfare Committee makes the following request to all State College students:

Please observe the correct hour for registration. The following system will be followed: L-L 7:30, M-O 9:00, P-S 10:00, T-Z 11:00, A-B 12:00, C-E 1:00, and F-H 2:00.

Alphabetical traffic lanes will be established by the registration officials, and for this reason, no student will be able to enter the Coliseum before his designated time.

Full cooperation on the part of all students will eliminate the long period of standing in line.

WVWP To Broadcast 'Exam Music'

WVWP, State College's student operated radio station, has announced plans to broadcast

music designed for examination studying all next week.

Union Parking

The Traffic Committee has passed a ruling on the use of the parking spaces on the driveway in front of the College Union.

The ruling states that the spaces are reserved for College Union visitors, but it defines visitors as students, faculty, and guest.

A controversy recently arose on the use of the spaces when several students were ticketed for parking along the drive.

In making the announcement yesterday, Station Manager Bill Bradley told *The Technician* that WVWP will broadcast classical music for six hours on Monday through Friday nights next week. The music will be interrupted only by a station break and two minutes of news every hour.

This is the first time that WVWP has scheduled broadcasts during the exam week.

Bradley said that even though some students may not like classical music, "they will have to admit that it is a good backdrop to study by."

Sticklers!

TAXI DRIVING, at best, is a *checkered* career. Some days, nothing seems to click—including the meter! Traffic crawls, motor stalls, horns bleat, bumpers meet. What a moment to reach for a Lucky—and discover (horrors!) you're fresh out. That's when the most genial driver turns into a *Crabby Cabby*. And why not? He's missing the best taste going... a cigarette that's light as they come. Luckies are all light tobacco—good-tasting tobacco, toasted to taste even better. Try 'em yourself. And step on it!

DON'T JUST STAND THERE...

STICKLE!
MAKE \$25

Sticklers are simple riddles with two-word rhyming answers. Both words must have the same number of syllables. (No drawings, please!) We'll shell out \$25 for all we use—and for hundreds that never see print. So send stacks of 'em with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mount Vernon, New York.

MY CLOSEST SHAVE by Pat Flaherty
1956 Indianapolis Speedway Winner

"My closest shave was at Indianapolis in 1953," says Pat Flaherty, 1956 Indianapolis winner. "The track temperature that day hit 125° and the exhaust fumes hung right down on the speedway. I was going into the north turn at 130 mph when the fumes got me. I blacked out, hit the outside concrete fence, and skidded along for 120 feet. The car was demolished, my helmet was torn off, my safety belt broke—but I didn't break a single bone!"

For YOUR Close Shave—with a razor, not a racing car—try new Colgate Instant Shave. What a way to shave! It's the quickest, easiest way ever, no matter what razor you use. Smooth, too! Shaves your whiskers, saves your skin. A great shave buy for the tough-bearded guy!
