## AIEE-IRE Names Spring Officers

The State College Chapter of the American Institute of Electrical Engineers-Institute of Radio Engineers elected new officers Tuesday night. The new officers are Gene Scarborough,

Chairman; Ray Briggs, Vice-chairman; Darrell Menscer, Local Secretary; Arnold Moore, AIEE Secretary; and Steve Ledbetter, IRE Secretary. (Photo by Kjosnes)

## Dr. King Urges Passive Resistance For Negroes

By Tom Lewis

"Passive or non-violent resistance should be the way for Negroes to fight segregation" said Dr. Martin Luther King in a speech Monday night to an overflowing crowd at the Institute of Religion in the Needham Broughton High School auditorium.

Dr. King, speaking on the subject of "Non-Violence and Racial Justice", told a mixed audience of over 1700 people that while the colored people

of this country have come a long way since the days of slavery, they still have a long way to go.

He said that while the law has desegregated schools, etc., the people will never be integrated until they forget about racial differences. Integration will never be realized until white and colored people sit next to each other because it is the natural thing, not because of the law.

Dr. King went on to say that the "Solid South" is no longer

in existence. He said that the South can be broken down into three groups, either geographically or by personalities.

**Geographical Divisions**  
Geographically, there is the group that leans strongly towards integration. This group would include Kentucky, Kansas, Missouri, and Maryland.

On the other hand there are those states that violently oppose integration, such as Virginia, South Carolina, Georgia, and Mississippi.

In between these two extremes are those states that want to wait and see what is going to develop. This is the group into which North Carolina falls.

A division by personalities would follow the same general lines except that the extremes would only represent about twenty per cent of the people, while the "wait and see" group would be about eighty per cent.

Probably one of the most significant points of the speech was "Men hate each other because they don't know each other, because they don't communicate with each other. Integration will never be a reality until such a time comes that all men understand and trust each other," stated Dr. King.

## Street And Sidewalk Improvement Planned

### Pershing Rifles Plan Spring Rush Events

Company L, 4th Regiment of the National Society of Pershing Rifles, will begin spring rush Wednesday, February 19th.

Activities will get under way in room 127 of the Coliseum at 1900 hours. The events include a film entitled "The Highest Ideals", followed by a smoker.

Captain Turner, P. R. faculty advisor, will be present for brief words with the rushees.

The smoker and film on Wednesday is open to all interested cadets both Air Force and Army.

There are many coming events for the crack drill team this spring semester. The most notable being the national competition in Washington, D. C., during the Cherry Blossom Festival.

More work has been planned to help State shake off the appellation of "Cow College."

Word came from Dean Stewart's office this week that money was appropriated by the State Legislature last spring for paving and repairing streets, curbs, gutters, and the cinder covered bridle paths otherwise known as walks.

The M&O Department has surveyed the areas to be paved, and is expecting to put the job up for bids around March 1. The actual work is expected to be underway by May 1.

**Large Appropriation**  
A total of \$179,800 was appropriated after the visiting committee of the Board of Trustees was here, and was approached by our Student Government with an appeal.

Not all the walks are to be paved, because some of them cross areas where future buildings are to be placed. Only those roads and walks which are designated as permanent will be handled on this job.

## Starts At 2 P.M.

## Special Show Planned For Saturday's Game

Special ceremonies have been planned for the Maryland-N. C. State basketball game on Saturday in Reynolds Coliseum. The game will be televised over a 26-station network.

The ceremonies will include an appearance of the State College Men's Glee Club, a demonstration by members of the Pershing Rifles, and a special presentation by State Football Coach Earle Edwards.

The Glee Club will sing "Hail Bright Abode" by Wagner and "Ezekiel Saw De Wheel" as arranged by Noble Cain. State College's Alma Mater will also be presented by the group.

This show will mark the appearance of two entirely new manuals. One of the manuals being a form of the break formation, only by flanking movements instead of column movements. The other new manual

will be fashioned after the pass arms formation. The team will also use manual 58 for the first time this school year.

Since the show is on the basketball court, tennis shoes have to be worn in place of boots. White leggings will be worn with the tennis shoes giving the appearance of white boots.

**Pershing Uniforms**  
The platoon will be at full strength with 32 men wearing in addition to the imitated white boots, red uniforms, white scarves, white gloves, and black pots.

Coach Earle Edwards, Atlantic Coast Conference football "Coach-of-the-year," will present a certificate to Dick Christy honoring him as a member of the Associated Press' first-string All-America team. The telecast will begin at 2 p.m.

## Pul. Baptist Church Will Hold Banquet

Pullen Memorial Baptist Church will hold its "Sweetheart Banquet" on Friday, February 14, at 6:30 p.m.

All members of the Pullen Sunday School, the Baptist Student Union, and guests, are invited. Dates are encouraged, but tags will be admitted. Those who need dates should contact Joe Poole, 219 Owen, TE 2-9252. Tickets are 25 cents each.

## Ministers And Laymen Visit Religious Centers

Approximately 150 Presbyterian ministers and laymen visited three North Carolina college campuses Tuesday, February 11, to familiarize themselves with the need for better facilities to house Presbyterian student activities.

The group, headed by Dr. John A. Redhead, Jr., pastor of Greensboro's First Presbyterian Church, toured Presbyterian student centers at the University of North Carolina, Duke University, and North Carolina State College.

Among the activities of the group was a luncheon at Raleigh's First Presbyterian Church. Speakers at the luncheon included Dr. Carey H. Boston, chancellor of State College and a Presbyterian layman himself; and Dr. Harry M. Moffett, pastor of the First Presbyterian Church in Gastonia. A State College student, Paul Yu, also spoke briefly at the luncheon.

**First Delegation**  
Another delegation of Presby-

terian ministers spent Wednesday, January 15, touring religious centers at the three institutions.

At the conclusion of the three-campus visit on January 15, the ministers approved a \$300,000 fund-raising campaign to be held in March for the purpose of building and furnishing facilities for Presbyterian religious activities at five North Carolina colleges. The \$300,000 raised in the drive will supplement \$200,000 already in hand for the half-million dollar project.

Upon the conclusion of the February 18 tour, at least half of North Carolina's Presbyterian churches will have been represented on the visits to Duke, UNC, and State College.

## Atomic Energy

## Dean Lampe Named To Advisory Panel

Dr. J. Harold Lampe, Dean of the School of Engineering at State College, was appointed Monday, February 10, by Senator Henry M. Jackson (D., Washington) to a special Advisory Panel to the Subcommittee on Military Applications of Atomic Energy.

Senator Jackson, subcommittee chairman, described the

group as a "nuclear brain trust" and said it is the first standing advisory group ever employed by a congressional committee in the weapons field.

Dean Lampe is one of 12 leaders in science, industry and education chosen throughout the country to serve on the panel. Through his efforts, North Carolina State College became a pioneer in the field of nuclear engineering education and was the first college or university to build a nuclear reactor for training in the peaceful uses of the atom.

Under Dean Lampe's continued guidance, the college's nuclear education program has steadily expanded until today its training courses include the staffs and facilities of six engineering departments.

**Expert Knowledge Needed**  
In releasing the news yesterday, Senator Jackson declared that "as technology continues to advance rapidly in the nuclear field, and particularly in its military applications, the Subcommittee must be certain that it has available the benefit of the best expert knowledge."

## Donations Needed For Senior Gift

Jim Peden, president of the senior class, has announced that there will be a meeting of the entire senior class some time in March to choose this year's gift to State College.

In making the announcement, Peden said that there was approximately \$75 remaining in the treasury from last year, and that \$203 was collected at registration last week in the Coliseum.

The officers of the senior class are planning to make individual contacts with each senior to supplement the low total now available; these contacts will be made prior to the meeting in March so that the seniors will know how much is available for the gift.

Seniors are urged to contact any of their officers before the meeting to give their ideas on just what the gift will be. The officers are: Jim Peden, president; Neil Birch, vice-president; B. H. Barnette, secretary; and Felton Davis, treasurer.

## Mars Invades Earth

WVWP will present a recording tonight (Thursday) at 9 p.m. of the 1938 broadcast "Invasion From Mars" which brought panic to the nation. The program starred Orson Welles in an adaptation of H. G. Wells' "War of the Worlds."

DR. J. H. LAMPE

# The Technician Fee

To The Members Of The Student Government:

There will be introduced before the members of the Student Government Legislature tonight a bill which is vitally important to the future of **The Technician**.

The bill in question proposes that **The Technician** be allocated \$1.50 from student fees next year instead of the present amount of \$1.15.

The reason that the request is being made is very simple: We are now trying to publish two papers a week while still receiving the same amount of money from each student that we were receiving when the paper was published only once a week.

Briefly, here are some of the reasons for our request that the fee be raised to \$1.50.

(1) The additional printing costs of two papers a week add hundreds of dollars a year to the costs of publishing the paper. (2) An engraving machine, which is absolutely necessary for twice-weekly publication, adds over \$1,500 a year to our costs. (3) Salaries for the men who deliver and mail the paper, since these salaries are paid on an hourly basis, have further increased costs. (These men worked only once a week before the paper became twice-weekly.) (4) Finally, because of a new post-office ruling, we are paying to the Post Office eighteen times as much to mail each paper as we were last year. (Last year we could mail 18 papers for \$.01; this year we are paying \$.01 for each paper we mail!)

Because we felt, and still feel, that a school of our size needed a twice-weekly publication, the change was made last year. (For the last semester of last year, State had, for the first time, a twice-weekly **Technician**.) At the time, we realized that financial hurdles lay ahead of us.

Nevertheless, the change was made. And the financial problems have, as expected, reared their ugly heads. We have cut costs in every way we can. We now must appeal to you, the members of the Student Legislature, for help.

Because we honestly believe that a twice-weekly paper must be maintained at State College, and because the fee must be raised from the old rate of \$1.15 to a new rate of \$1.50 in order that this be done, we call on every member of the Student Legislature to support the bill to raise **The Technician** fee.

—DB

## Dormitory Telephone Abuse

In the January 23 issue of **The Technician** there appeared a letter to the Editor concerning the pay telephones in the dormitories.

Two nights later, on January 25, the handsets were cut from at least thirteen dormitory telephones. (See picture on page 5.) The letter probably prompted this action.

In the past, such damage has resulted in the removal of the telephone for one month. If the phone is damaged a second time, after being re-installed, the phone company has removed it for the remainder of the year.

In this case, however, because the telephone company was of the opinion that all of the damage was the work of one or two students, the telephones have been re-installed.

Had the telephone company decided not to repair the instruments, several hundred men would have had to suffer because of the impulsive destructiveness of one or two people. Such damage is inexcusable.

The Administration is well aware that the pay telephones are not the ideal arrangement for dormitories. To install non-toll telephones, however, would be quite expensive. To finance such a project, every dormitory occupant would have to be assessed an equal part, whether he

wanted non-toll phones or not and whether he ever used the phone or used it every day.

For example, at Tulane there is one non-toll telephone for every eight dormitory residents. Each student pays \$6.75 per semester for this convenience. And at Louisiana State University, each two-man room has a telephone installed, and each resident pays \$10.00 per semester for the service.

Under the present set up here, incoming calls are all free. Only outgoing calls are paid for. Thus, the students who do not use the telephones are not required to subsidize those who make a large number of outgoing calls.

Those students who do desire non-toll telephones have every right to try to get these phones. By talking to their Dorm Managers, seeing their representative in Student Government, writing to **The Technician**, or in any other constructive way, a student may make his desire known.

At State, the students are extremely powerful—much more so than at a very large majority of other colleges. The students have the power to make changes which they feel will improve their school, but . . . these changes must be made in both a democratic and a constructive way.

—DB

## Fraternity Line

### Pre-Registration Needed

by Oscar Grant

The date was February 5. The location was the Coliseum. The situation was a mess. Why? This writer believes there is a very simple answer. State College's system of registering students is a miserable failure. What's worse is the fact that the plight of both students and instructors will get worse. No amount of IBM machines or designated registration times can possibly cure the ails of the present system.

What, then, can be the answer to such a huge and complex problem as the registering of some 6,000 students seems to be? Such an answer is, again, simple. It lies in the adoption of a pre-registration system.

#### What Can We Do?

What can we, the students, do about this situation? First, we should let the head of each department know that we, the students, would like to see pre-registration tried. This could be accomplished by dropping by your department head's office and suggesting he try it. If enough students do this, at least these men will be exposed to the idea.

The second thing which must be done is to get the idea before our Student Government. A Student Government committee might be all that is needed to persuade officials to give the system a try.

In the long run, the responsibility of achieving this change lies with you, the student. Want to give a hand . . . ?

#### Hell-Help Week

Beginning this week, the "18" are starting the traditional "work week" or "hell week" as the case might be. This year, the IFC has gone all out to put State's Fraternities in a good light before the public. With these "work" or "hell" weeks comes another opportunity for State's fraternity men to devote some energy toward a worthwhile cause.

Since some fraternities still insist on putting pledges through "training" during this week instead of giving them

constructive tasks, there would not be much hope of persuading all fraternities to commit their pledges for an entire week. However, certainly no fraternity could object to committing one day out of this week to a worthwhile cause.

Finding this "worthwhile cause" certainly would not be hard. The City Department of Parks and Recreation or the Salvation Army could most likely easily suggest such a project. Perhaps even the College has some project that needs accomplishing. Certainly, the idea needs looking into.

#### Four-Freshmen Concert

This column would not be complete this week without adding one more congratulations to the IFC Social Committee for the terrific success of the Four Freshmen Concert. Because of hard work which made this concert such a success, State students can perhaps look forward to another concert of this type in the not-too-distant future.

#### Letter to Editor

### You Pay Mine, I'll Pay Your's

Editor's Note: The following is in answer to the letter of January 23 proposing that a fee be charged all students to cover dormitory telephone expenses and thus to make all phone calls free.

There seems to be a certain freshman, Mr. Scott, who wants someone to pay his phone bills. I have incurred an expense that I would like to share also. So— I offer a plan: I propose to pay half his local phone bill and in turn he can pay half my beverage bill. After all, everyone has his own tastes in "extra-curricular activities."

I trust this plan is as feasible as his.

Hugh E. Mauldin, Jr.

#### Fraternity Frustration

The proposal for a fraternity court has been batted around for literally years now; many people in many responsible positions have tried many ways to get around the many problems in building many fraternity houses in one location!

The thorniest problem in the past has been the need for financing; many of you will be surprised to know that this major obstacle has been all but removed. We can get the money now . . . so what's the hold-up? In a word, the hold-up is **POLITICS**.

The big question is now whether or not it is legal to build fraternity houses on State land. The person who is in a position to rule on the legality is the Attorney General of North Carolina, and this man has had the data before him for some time now . . . still no action.

#### Those Few Precious Minutes

Two bells go off simultaneously . . . on Withers Hall and in the Bell Tower. But scores of truly dedicated professors are deaf to these sounds . . . they are so engrossed in their lectures that nothing else in the world matters.

And there's Bill Brighteyes fidgeting in his seat . . . and so is Tom Temper and Jim Jumpy, none of them listening to these last few gems pouring from the mouth of their professor. You see, their next class is at the other end of campus . . . they are sitting in Tompkins and due at Textiles in a little less than

ten minutes. And up at Textiles, the profs aren't particularly interested in holding up their classes because the math profs in Tompkins are getting in one last important point.

You know, our main purpose in life is not to gripe all the time . . . contrary to popular belief. But why do so many of our instructors continue to believe with all their power that their course is the most exciting and important at State College? It's pretty obvious that somebody has to be wrong.

Let us make a request to our instructors . . . politely and without rancor, even adding "please" at the end:

State College faculty, we would really appreciate your planning each lecture or lab period so that we students can go to our next class immediately after the bell rings . . . please.

## Is There Gambling In Our Dormitories?

By Pierre Leveque, Jr.  
Having been aware for a long period of time of a situation existing on campus that is thoroughly and dangerously in op-

position to the established rules of conduct so essential to the proper development of our young, innocent, and immature students, Affairs of State thus received the incentive to conduct an inquiry into the matter and has come up with startling and shocking results.

they lost their financial means of existence at cards. Somewhere, someplace, there must be a solution to this shocking problem that is presently confronting our students, but we dare not offer a solution; we only present the situation and leave it to more brilliant minds to figure out the answer.

Several distinguished State students engage in a favorite dormitory activity.

As may be easily seen by the above photographs, which were taken exclusively for Affairs of State and which seem to hold some veracity as to a true picture of life in our dormitories, collegiate gambling and all aspects of it, to wit, are not exactly non-existent and, to be more specific, are literally thriving and are an everyday part of life in our State College dormitories.

To provide actual statistics as to the approximate number of students that daily indulge in this form of entertainment, pleasure, or means of financial income, or as to a fairly accurate tabulation of the many thousands of dollars that are lost or gained yearly on campus through gambling would be practically impossible, as there are various reasons why such statistics are not sought and made public.

Now it may be argued, and it probably will, that the underlying causes that gambling prevails so much throughout our dormitories is merely an effort on the part of the students to continue rivalry with that certain college "on the hill" that is so famous for its saloons and casinos. A misunderstanding may be taken from this — this writer wishes that it be known that he is all for friendly rivalry with the saloon on the hill, but is this not carrying it a little far? We conquered Carolina on the basketball court, so why cannot we be satisfied with this? It is a commonly-known fact which has stood the test of time that Carolina is the greatest for this sort of things from which she derives her reputation. Carolina has earned her merit of being first in gambling and other vices and it is not our place to attempt to better her at it.

Gambling may also be the cause of our many dropouts and persons who are forced to leave college. While it was previously thought that a large percentage of these students left because they could not pass their work, a new conception herewith comes to light that these students may possibly have been forced to leave school because

It was in the darkness of a movie. Suddenly a girl's voice... "Who's that fooling with my leg?" "That's me, and I ain't foolin'!"

# Ogden Nash Will Appear On March 4 In College Union During State College's First Annual Fine Arts Festival

Ogden Nash, the well-known writer of light verse and television personality, will lecture in the ballroom of the College Union Building at North Carolina State College Tuesday, March 4, at 8:00 p.m.

Ogden Nash

Nash's talk is one in a number of events planned for the College Union sponsored Fine Arts Festival, the first such festival to be held at State College.

The Fine Arts Festival will open on Wednesday, February 26, and extend through Wednesday, March 5, with activities ranging from a "Good Design" show to a panel discussion on "North Carolina Writing Today" planned.

Nash, whose light verse appears in The New Yorker, Saturday Evening Post, and other national magazines, will recite a number of his popular verses and comment on the turn of events in his life that caused their creation.

## Nash's Books

Included among his books of poetry are "The Private Dining Room," "Parents Keep Out (or 'Elderly Poems For Younger Readers')," "Family Reunion," "Versus," "Hard Lines," "I'm A Stranger Here Myself," "Good Intentions," "Many Long Years Ago," and "The Face Is Familiar."

Nash ventured onto the Broadway scene as lyricist and co-author of "One Touch of Venus" and again when he wrote the lyrics for the musical "Two's Company."

On the recording scene he wrote the verse which was recited by Noel Coward on a Columbia recording of Saint-Saens' "Carnival of Animals" while Andre Kostelanetz conducted the music.

For three years, the poet has been developing into a television personality by bringing his quick-wit to the TV panel show, "Masquerade Party."

Although a Yankee by birth, Nash traces his ancestry to south of the Mason-Dixon line. One of his ancestors was Revolutionary governor of North Carolina, while another gave his name to Nashville, Tennessee.

## Other Events

Other features planned for the Fine Arts Festival are:

Opening of the "Good Design" show, Wednesday, February 26, at 8 p.m.; a one-act play festival Friday, February 28, at 3 and 8 p.m.; Raleigh Symphony Orchestra concert Sunday, March 2, at 3:30 p.m. in the College Union Ballroom.

Westminster Choir concert Monday, March 3, at 8 p.m. in the Memorial Auditorium; Chamber Music Concert Tuesday, March 4, at 4 p.m. in the College Union Ballroom; modern dance concert by a dance

group from Woman's College Wednesday, March 5, at 4 p.m. in the College Union Ballroom; and a panel discussion on "North Carolina Writing Today" Wednesday, March 5, at 8 p.m. in the College Union.

## BELL SYSTEM REPRESENTATIVES WILL BE ON YOUR CAMPUS

## MY CLOSEST SHAVE by Bill Bridgeman

Douglas Test Pilot

"My closest shave was during the first try at a speed record in the fantastic Douglas Skyrocket," says Test Pilot Bill Bridgeman, author of *The Lonely Sky*. "A special B-29 dropped me like a bomb at 30,000 feet... I turned on my rockets and climbed to 40,000... when suddenly all power failed. Rocket power, cabin pressure, heat—everything went—and the window frosted over so I couldn't see. Finally I got the radio going on an emergency battery... and a pilot in a chase plane talked me down to a blind landing!"

## What's it like to be with IBM?

Gene McGrew won a scholarship and went through Princeton in the top third of his class... managed varsity track... commanded an artillery battery in Korea. "When you put a lot of preparation into your career," Gene McGrew feels, "you should look for a lot in return."

Out of the Army in 1953, he discussed IBM with a sales representative. It sounded like real opportunity. After an interview with an IBM branch manager, Gene McGrew was sure. Although sales was only one of many jobs he felt he could handle, this kind of selling (IBM machines are as much an idea as a product) would enable him to capitalize fully on his education, experience, and talents. He's learned also that "no other form of training or career development I can think of provides such diversity of experience in all phases of business and industrial activity. This kind of training and experience develops top business executives."

Thus began an extensive and interesting training program marked by merit salary increases. The first three months of the training course combined introductory machine schooling and observation of branch office operations in Pittsburgh (his home town). The next three months were spent studying the application of the Company's data processing machines to major phases of accounting in business, science and government. With this background of know-how, Gene McGrew was ready for seven months of practical field training, during which he became a real contributing member of the sales team, working with a succession of experienced salesmen in a variety of situations with many different customers. With this experience behind him, he was ready for IBM's famous sales school, a final five-week polishing course in selling techniques.

Outlining programming test

### Receives first assignment

Upon the successful conclusion of this course he was given his long-awaited first sales assignment, his own territory near Pittsburgh. This territory was comprised of some fourteen companies presently using IBM equipment, together with many companies who were logical potential users. Gene McGrew's job is to assist his customers in achieving maximum efficiency through the use of their equipment, as well as to help them ex-

tend its use to new applications. He is also responsible for the development of new business. His biggest sale was to a large industrial corporation. Now installed, this IBM electronic system simplifies various major phases of the customer's accounting work. His fine job with this customer resulted in the expanded use of equipment and the ordering of three additional medium-sized data processing machines. He is now working to develop the sale of one of IBM's largest computers, the 705, to another customer.

Discussing customer's installation

### Future wide open

"Advancement opportunities in IBM," Gene McGrew says, "are excellent, as you'd expect in the leading company in a dynamic and rapidly expanding industry. Ahead of me on the sales management advancement road are nearly two hundred Branch Managerships, seventeen District Managerships, and numerous executive positions at the Regional and Headquarters level in five different divisions."

Checking out new client's system

This profile is just one example of what it's like to be with IBM. There are excellent opportunities for well-qualified college men in Research, Development, Manufacturing, Sales and Applied Science. Why not ask your College Placement Director when IBM will next interview on your campus? Or, for information about how your degree will fit you for an IBM career, just write or call the manager of the nearest IBM office:

# State's Student Teaching Program Reduces Shortage

Through its student teaching program, the School of Education at State College is helping to reduce the State's shortage of science and mathematics teachers.

With the close of the fall semester, 15 seniors enrolled in the mathematics and science education curricula at State College completed their student teaching work.

For nine weeks, the future teachers taught and directed activities in seven high schools under the supervision of high school teachers selected on the basis of effective teaching and the ability to guide and direct the student teachers.

## Student Teachers

A list of the 15 student teachers:

ers, their home towns, the curriculum in which they are majoring, and high schools in which they did their student teaching follows:

Marion Ballard of Shallotte, mathematics—Fuquay Springs High School; Shirley Bunn of Louisburg, chemistry—Needham Broughton High School, Raleigh; James Corbett of Elizabeth City, mathematics—Needham Broughton High School.

Jack Dellinger of Bakersville, mathematics—Cary High School; Arley Dugger of Fayetteville, mathematics—Need-

ham Broughton High School; William Fenner of Tryon, biology—Fuquay Springs High School.

James Johnson of Raleigh, mathematics—Needham Broughton High School; James Marshall of Louisburg, mathematics—Wendell High School; Willie Mayo of Charlotte, mathematics—Garner High School.

Jesse Morgan of Winston-Salem, science—Josephus Daniels Junior High School, Raleigh; Parker Peedin of Smithfield, mathematics—Needham Broughton High School; A. C. Penny of Clayton, mathematics—Clayton High School.

William Stainback of Henderson, mathematics—Needham Broughton High School; Samuel Welsh of Lumberton, mathematics—Needham Broughton High School; and Joseph Vann

of Charlotte, mathematics—Fuquay Springs High School.

## Broad Curriculum

Dr. J. Bryant Kirkland, dean of the college's School of Education, said the instruction program for students enrolled in science and mathematics education at the college includes a broad range of courses in the sciences and in engineering mathematics as well as in professional courses in education.

Prof. Herbert E. Speece is in charge of the professional program in science and mathematics education at the college.

During the student teaching period, the student teachers each have taken charge of two classes including planning procedures, organizing materials, and directing class activities with suggestions and close cooperation from the supervising teacher.

## Book Mentions State

Research at North Carolina State College toward the peaceful use of nuclear energy is discussed in a new book, "Atoms At Your Service."

Reference is found on several pages to State College's production of a higher yielding variety of peanuts by radiation.

Henry A. Dunlap and Hans N. Tuck are the authors of the book, which is designed for the lay reader.

The use of radioisotopes as tracers and radiation as tools in peacetime research and in medical applications are described in "Atoms At Your Service."

## College Union Plans Valentine Dance

A Valentine Dance will be held Saturday, February 15, 1958 from 9 until 12 in the College Union Ballroom. Since the dance is after a basketball game, it will be informal.

Buddy Klein and his Orchestra will play for the dance which is open to both stags and couples as well as local girls' schools, nursing homes, and the YWCA. All College Union members and their guests are cordially invited to attend the affair.

## JOB FACTS FROM DU PONT

BETTER THINGS FOR BETTER LIVING  
THROUGH CHEMISTRY

## YOUR INTERESTS, SPECIAL ABILITIES ARE IMPORTANT WHEN DU PONT MAKES YOUR FIRST JOB ASSIGNMENT

### ROOM TO GROW

There's plenty of room to grow at DuPont. One reason is that the very diversity of our products and processes requires specialists in almost every area of science and engineering. Another reason is that DuPont continues to expand in many new directions.

For example, in 1957 sales reached \$2 billion. Four new plants were being built. New research projects were launched, new products marketed.

In 1957, too, new technical men joined DuPont in chemical, civil, mechanical, metallurgical, electrical, industrial, petroleum

by  
John Reid  
Du Pont  
Representative

and mining engineering; in atomic energy, instrumentation, chemistry, physics, mathematics and many other fields.

All this activity points to as bright a future today as ever before in our long history. There's a place for the good graduate in this picture. If you would like more specific information on opportunities at DuPont, we invite you to sign up for a DuPont interview with your placement director.

## Personalized Training Relates to Policy of Promotion from Within

Where do your interests lie? What courses have you taken? What are your special abilities? DuPont tries to match these factors with available jobs to determine your first job assignment within the Company.

Once the assignment is made, the Company helps you apply your knowledge to a problem right away. You learn by doing—in consultation with your supervisor and others working on various phases of the same project. Your performance on the job is evaluated periodically, so you always know where you stand in the eyes of your management.

As you might guess, DuPont's personalized training is closely related to its promotion policy. Almost all advancement is made from within the Company, so if your supervision has indicated that you are ready for promotion, and an opening occurs for which your training has prepared you, you are sure to be considered.

Although DuPont employs about 90,000 people, management authority is decentralized through many departments into small groups—small enough so that the new man's capabilities can be recognized quickly. This type of organization, plus the Company's steady growth, produces many opportunities for the new man.

★ ★ ★

DuPont, over the past 25 years, has spent \$1 on research for every \$3 on production facilities.

## Telephone Wires Cut

A rash of telephone wire cutting hit the campus prior to exams. Shown here is one phone in Turlington which was cut. A majority of the phones in the dormitories on the western side of the campus suffered a similar fate.

(Photo by Kjosnes)

## DU PONT SUMMER JOB GIVES YOU A CHANCE TO EARN AND LEARN

DuPont offers college juniors and qualified sophomores in technical fields the opportunity to earn college expense money this summer while they learn more about the kind of work that will be open to them when they graduate.

The Company has 75 plants and 98 laboratories located across 26 states—a spread that often gives the student a chance to work in or near his own section of the country. Some of these locations have openings for summer employment in 1958.

Students work side by side with practicing engineers and scientists. In this way they gain valuable experience to supplement classroom theory.

Last year, 407 students from 113 colleges took advantage of this program. DuPont pays round-trip transportation expenses from home or school to place of employment. Students are not obligated to continue with the Company after graduation.

For complete details on this program, check with your college placement director.

### SEND FOR INFORMATION BOOKLET

Booklets on jobs at DuPont are yours for the asking. Subjects include: mechanical, civil, metallurgical, chemical, electrical, instrumentation and industrial engineers; atomic energy, technical sales, business administration, research and development. Name the subject that interests you in letter to DuPont, 2494-E Nemours Building, Wilmington 98, Del.

## By Textile School

## Collection of Modern Fabrics Dedicated By Textile Men

The School of Textiles at State College yesterday has dedicated its new "William N. Harriss Collection of Modern Fabrics," a showplace for the world's newest fabrics.

The colorful collection, which contains fabrics from many countries, was given to the college by Cluett, Peabody and Company of New York, a textile firm, in honor of William H. Harriss, veteran company official and 1895 graduate of State College.

Located next door to the collection, which is in the Nelson Textile Building, is an ultra-

modern fabric design and analysis laboratory.

Harriss, a New York resident for many years, is a native of Warren County and was on hand for the dedicatory rites. He unveiled the collection, which will be kept up-to-date with the newest fabrics developed around the globe and will display the textile industry's latest designs before they are shown on the New York market.

## Participants

Also taking part in the ceremonies were Dr. Carey H. Bostian, chancellor of State College; Dr. Malcolm E. Campbell, dean of the college's School of Textiles; Prof. Benjamin L. Whittier, head of the college's Department of Fabric Development; and Robert M. Dowling of New York, vice president of the Sanforized Division and president of the Arrow International Division of Cluett, Peabody and Company.

Dowling presented the collection, housed in an elaborate

wall-side display case, to the college in honor of Harriss who recently observed his 80th birthday.

Dr. Bostian and Dean Campbell, in accepting the gift, lauded Harriss and his contributions as an alumnus of State College and as a key figure in the textile industry. Professor Whittier presided.

In the dedicatory talk, Harriss declared:

"The practical implications of this fabric collection are far reaching. We all know too well that for the present the textile industry is in one of its repeated quiet cycles. It surely needs a 'shor in the arm.'"

## "More Glamour"

"The industry should be given more glamour to catch the public fancy. This collection of fabrics properly exploited could well be the primer to start more public interest in textiles resulting in better business for the industry. . ."

## Campus Spotlight

## Organization Followed Mrs. Yates To CU

by Alton Lee

Mrs. Lois Almata Yates, who stands five feet six inches, came to work in the College Union State Room on September 17, 1954.

Remembering her first impression she said, "The place was really a disorganized mess; business was in the red, and everyone was about to give up. Mr. West, Food Director, told me he thought I might could do something to help them. The profit has always been very low,

but after I had been at work for one month, our gross was three times as much as the highest ever reached."

"I don't take all the credit for this by any means; I've been very fortunate in having excellent help. We all worked together side by side, and we made a business. Things were slow at first, but gradually we got a few more new customers day by day. Now we have more customers than we are really prepared to handle because of our small facilities, but we make out alright."

"We really did start from the bottom, and only because of the cooperation we received have we been able to make a success of the business. Ninety-nine per cent of our customers cooperate very well, and I am sure that there is no college anywhere, where you will find a nicer group of students."

"When we are rushed, they are patient and polite; and it isn't like that everywhere."

"I feel as though the 'young-uns' that work here are my very own. We all try to work with each other, and that's what makes the business go. We are only able to give good service by having cooperation. Actually no one even dreams of how hard we really work. We are open for such a short time that we have to do our business quickly."

Mrs. Yates has worked in food service for much of her life, and she is willing to pitch in and help her waiters when they need her most. "In all of my years of work, I've never seen a place where the students who work there have to pay for their meals, however. It just isn't fair, and I'm bitterly opposed to such a policy. If you aren't in school you get your meals free, but if you're a student, you have to pay for everything you eat. I have never been able to understand it."

Recently a few of the State Room prices were raised suddenly without notice, and a number of the students complained to Mrs. Yates personally. Actually she had nothing to do with the prices, the planning of the menus or the food served. She is merely the hostess. "And that takes a lot more work than people realize," she claims.

## Departments Get London Recognition

International recognition is being received by North Carolina State College for its nuclear reactor and School of Design.

Recent issues of two London publications have articles which refer to State College.

The October issue of "Atomics" Magazine contains a picture showing technicians checking the State College reactor core.

"Architect on the Campus" an article in the January 2 issue of "The Listener," discusses new concepts in design found on the American college campus.

The new wing to the School of Design at State College is cited in the British journal as an example where extensions to older buildings constructed in the modern manner can be successful.

The article in "The Listener" was written by Thomas Howarth, British writer and critic.

## Notes from the Pack

State College is proud of its athletic achievements this year. At the mid-point of the football and basketball seasons, both teams were ranked among the nation's top ten.

Everett Case is drawing closer to the 300-victory mark since coming to State in 1946. With at least seven games to play, including one game in the ACC tournament, his 12 teams have a combined won-lost record of 296-75.

Facts you couldn't do without: Since Everett Case has been at State, his teams have scored 27,302 points in 369 games while its opponents have scored 22,506 points.

Last week's win over Virginia gives State an 8-0 mark over the Cavaliers since the Atlantic Coast Conference was formed.

It's "home-cooking" for the rest of the season for the Wolfpack. Four more games remain on the State schedule and all will be played in Reynolds Coliseum.

The card reads—Feb. 15, Maryland; 18, North Carolina; 22, LaSalle; and March 1, Wake Forest.

Which brings to mind Vic Bubas' immortal poem, composed

last season at the end of a disastrous road trip. It goes: "Oh how much better I feel, when we play our games in William Neal."

And speaking of road trips, the Pack has a 6-2 mark away from home this year. The two losses were to Clemson, 63-59, and to Duke, 76-75, in double overtime.

## State Drills Continue For '58 Football Sea.

Wet soggy fields and cold biting winds set the atmosphere for Wolfpack hopefuls in the first three days of Spring Practice.

More than fifty boys composed the gridiron group which was divided into five teams. The teams and positions, however, are not stable and will see, as in the past, many changes and alterations.

Practice is begun with calisthenics after which prospects are assembled into different groups. The backs run through plays while the linemen pace through form blocking and live tackling. Their sessions are ended with a dummy scrimmage to stress timing and coordination.

The Wolfpack lost eighteen players after the fall season.

## Winning Wolflets Whip Blue Devil Frosh, 74-65

The State College Wolflets chalked up their thirteenth win of the season against two defeats, Tuesday night by whipping the Blue Imps of Duke by a score of 74-65.

Leading all the way, the Wolflets held a 38-29 margin at half-time. Paced by Larry Lakins, who chipped in with 18 points for the night, and DiStefano with 16 tallies, the Wolflets had little trouble controlling the game. Closely following in the scoring column were Reiner and Niewierowski with 15 points each.

All freshmen who are interested in trying out for the freshman baseball team should attend an orientation meeting to be held in the Band Room of the Gym at 7:00 P.M. on either Wed., Feb. 19, or Thurs., Feb. 20. Attendance at both is not required.

Jim Edwards, Coach

Team	W	L
Duke	8	2
STATE	8	2
Maryland	7	3
Carolina	7	3
Virginia	3	7
Clemson	3	7
Wake Forest	2	8
S. Carolina	2	8

State College went into the game Tuesday night with plenty of determination, but their opponents, the Duke Blue Devils, had just a little bit more, and it showed in the end as the Wolfpack was beaten by Duke, 65-48, before a packed throng of 11,500 patrons at Reynolds Coliseum.

The loss was State's fourth of the season to go with its fourteen victories; Duke's record was pushed to 13-5 by virtue of the important win.

The Pack fell behind early in the game, as a result of its poor shooting and rebounding; and at the half, the Blue Devils had a 27-18 lead.

State fought back early in the second half, and with about ten minutes left to play they had battled to within one point at 38-37. At this critical time, Duke got hot and pulled out in front to stay.

For the Wolfpack, the high man was Captain Whitey Bell with sixteen points, followed by

John Richter with eleven mark-

ers. State's shooting percentage was one of the worst of the season at 35.5%. From the line, the West Raleigh crew hit 4 out of 10 for 40%.

On Saturday afternoon, the Wolfpack will attempt to come

back from the Duke loss when they play the Terrapins of Maryland, in the first televised game this season from the Coliseum.

In the first meeting between the two teams this season, the Pack defeated Maryland in College Park, 57-48.

Captain Whitey Bell goes up for jump shot, as forward Don Gallagher (no. 42) and guard Harold Estis look on. The Duke defenders are Vernon (no. 11), Allen (center), and Schmidt (far right). SWISHHH . . . . . (Photo by Kugler)

## Coach Everett Case Plans Annual Basketball School

Coach Everett Case's second annual Basketball School for Boys will be conducted at Raleigh's State Fair Arena in two one-week sessions this year.

The first session will be from June 15-20 and the second session is set for June 22-27. Reservations are now being accepted for both sessions.

The school will include classes for three age groups. The junior school is for boys from 9 to 11; Intermediate from 12 to 14; and Senior, 15 years of age and over. No high school graduate is eligible for enrollment.

Assisting Coach Case are Vic Bubas and Lee Terrill, assistant basketball coaches at North Carolina State, and several Wolfpack players. Guest coaches will be invited to lecture.

"Our first school last year was highly successful," Case said, "and we have added a second session this year."

Boys attending the school will be housed in the modern Youth Center, located on the State Fairgrounds. Tuition includes room and board in addition to individual instruction.

Case said the school will stress all phases of basketball fundamentals, techniques and team play.

The fee for each session is \$45. Applications may be obtained by writing to Coach Case at North Carolina State College.

## Dean Lampe States General Engineering Employment Picture

"This year it is anticipated that at least 275 industries will send representatives to the State College campus to interview engineering students who expect to graduate in June, 1958," Dr. J. Harold Lampe, dean of the School of Engineering, announced today as he reviewed the present engineering employment picture.

"This is the largest number ever scheduled to visit the School of Engineering in spite of the fact that some 30 companies have already cancelled their plans to visit the college because they do not need beginning engineers at this time," reported the Dean.

### Interview Period

Arranged by the engineering school's Placement Office, the period for employment interviews has already begun and will continue through April.

Dean Lampe emphasized that although early cancellations support the "leveling-off" trends in the employment of engineers, the well-qualified beginning engineer is still very much in demand.

"In an age of rapid, technological advances," he said, "industry is continually seeking the young engineering graduate who has creative imagination and initiative and shows potential leadership."

### New Trend

Dean Lampe pointed out that many of "our older and well-established engineering and manufacturing companies have informed me that they are now looking forward to offering positions to our graduates who are interested in employment at the going rate and who have made reasonable long-range plans for a career in an industry which is not only engaged in government contractual work, but which is active in supplying the basic needs in our industrial and community life."

"I feel that changing economic conditions, in many cases brought about by the decrease and the cancellation of defense contracts, has resulted in a reduction in the number of employment opportunities for some engineering groups," continued the Dean. "On the other hand, the need for outstanding engineering graduates is great and the opportunity is present in every industrial, engineering, and research organization."

## A. F. Commissions 2 New Lieutenants

The U. S. Air Force gained two new second lieutenants at mid-year commissioning ceremonies at State College.

Spencer Staton Edmondson, Jr., of Rocky Mount and Parker Caswell Peedin of Smithfield were officially appointed when Major Victor L. Nunenkamp conducted the swearing-in ceremony.

### New Lieutenants

Lieutenant Edmondson attended the U. S. Naval Academy prior to his enrollment at State College. He was graduated as an industrial engineer and has been a member of the varsity golf team during all of his years at State.

Lieutenant Peedin received a Bachelor of Science degree in Mathematics Education. While at State, he was a member of Kappa Phi Kappa, the Photography Committee and worked as the photo technician in the Engineering Research Laboratory. He will report for Air Force Pilot training in April.

## Glee Clubs and Bands List Spring Events

Included among the spring semester activities of the State College Bands and Men's Glee Club are a number of concerts, tours for the symphonic band and Glee Club and a regional TV appearance for the Glee Club.

The Men's Glee Club will appear on a 26-station TV network in the Southeastern states on February 15 as part of the events scheduled for the State-Maryland basketball game at the Coliseum.

On March 9 the State College Glee Club and the Watt's Hospital School of Nursing Glee Club will present a joint program at the Durham Baptist Church.

A concert at Winthrop College on March 15 will be followed on the 25th by the Glee Club's tour of the schools in Wake County.

A second joint concert is planned for April 25 when the State organization will appear with the St. Mary's Glee Club on the St. Mary's campus here.

State College's Symphonic Band will present its annual winter concert on February 21 at the College Union Building.

A chamber music concert on March 4 will be given by the Fanfare Band.

The annual tour of the Symphonic Band will be conducted beginning on March 17 and ending on March 19.

Lawn concerts on the College Union Terrace are planned for May 6, 8, 13, and 15.

Throughout the semester, the ROTC Band will participate in formal parades and reviews including the Graduation Parade for both the Army and Air Force.

The spring semester's activities for the State College Bands will end on June 1 when the ROTC commissioning ceremony and commencement exercises are held.

## Ever meet a trusting soul?

"You can't go wrong looking for a job these days," he assures you. "Opportunities are great all over. All the good companies have about the same to offer."

Do they? A lot of not-so-trusting souls think otherwise. They suspect that some companies have much more to offer than others, and they want to find out which those are.

We'll help. We want to tell you how much the Bell Telephone Companies offer in the way of advancement opportunities, training, pay and benefits, professional associates and working conditions. No matter what your educational background—the arts, the sciences, business or engineering—make a date to talk with a Bell interviewer when he visits your campus. You can also get information about the careers these companies offer by reading the Bell Telephone booklet on file in your Placement Office, or by writing for "Challenge and Opportunity" to:

College Employment Supervisor  
American Telephone and Telegraph Company  
195 Broadway, New York 7, N. Y.

BELL TELEPHONE COMPANIES

# New Isotope Laboratory Will Aid Nuclear Research

by Chuck Wood

Nuclear Engineering and Engineering Physics, two of the fastest growing departments on the campus, have taken another forward step in the solution of one of its biggest problems, the co-ordination of nuclear activity and development.

This latest step is the isotope laboratory now under construction in the Textile Building. Completion of the lab in mid February will "up the pace" in nuclear research in all its applied areas with an emphasis on the advancement of textile engineering.

Until Sunday

## Paintings Shown

An exhibit of paintings and graphics by Leslie J. Laskey of St. Louis, Mo., are on display in the galleries of the Union Building.

Laskey is a former faculty member in the State College School of Design, where he worked until June, 1956. He is now on the faculty of the Department of Architecture at Washington University in St. Louis.

The one-man show will continue at the College Union until February 16. The galleries are open to the public daily from 8 a.m. until 11 p.m.

The exhibit is sponsored by the College Union's gallery

The new lab is part of a program to co-ordinate nuclear education and research throughout the school. At the present time, advanced isotope training activity is limited to graduate and post-graduate level; in the foreseeable future, undergraduates will be given the opportunity to take these courses, and applied isotope instruction will eventually be offered in all curricula where it is of practical value.

Though the lab is planned primarily for textile research, other departments will have access to it. Agriculture and Forestry particularly will benefit

committee, headed by James Stevenson of Henderson.

Paintings and graphics displayed in the exhibit will be on sale. Prices will be posted in the College Union lobby.

from the laboratory as they work a great deal with radio-isotopes.

### Idea Not New

Nuclear research in connection with textiles is not an idea unique at State and has been in operation at several colleges, notably MIT. However, officials here plan to go into the field in areas that hitherto have gone untouched with the idea of solving some of their problems through the use of radio-isotopes.

Completion of the isotope laboratory is a firm step forward for nuclear energy, as applied to industry. The scope of activities involving nuclear resources and nuclear by-products is expected to increase 100% in the next five years at State. This new lab will play a part in the forthcoming boom in uses of nuclear science in industry.

## Glee Club Elects Officers

Spring semester officers for the Men's Glee Club were elected prior to the close of the fall semester. Pictured above are (top to bottom) John Murphy, president; Herb Little, business manager; Bill Stainback, assistant business manager, and Gary Johnston, secretary-treasurer. Not pictured is Charles Gee, vice president.

A busy slate is planned for the Men's Glee Club for the spring semester. Details are given on page eight.

Feelin' blue? Need money, too? Students, we've got news for you!

**MAKE \$25**

**MOST POPULAR GAME** that ever went to college—that's Sticklers! Just write a simple riddle and a two-word rhyming answer. For example: What's a big cat shot full of holes? (Answer: peppered leopard.) Both words must have the same number of syllables—bleak freak, fluent truant, vinery finery. Send Sticklers, with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mt. Vernon, N. Y. Don't do drawings! We'll pay \$25 for every Stickler we use in our ads—and for hundreds that never see print. While you're Stickling, light up a light smoke—light up a Lucky. You'll say it's the best-tasting cigarette you ever smoked!

**LIGHT UP A LIGHT SMOKE - LIGHT UP A LUCKY!**

### NACA Offers:

Over 40 years experience in research . . .  
Opportunity to solve challenging problems  
Stimulating professional environment . . .  
Graduate study programs for your future

### NACA Needs:

**ENGINEERS:** Aeronautical • Chemical • Mechanical • Civil • Electrical Engineering Physics • Metallurgical  
**SCIENTISTS:** Chemists • Physicists • Mathematicians • Astronomers

ARRANGE THROUGH YOUR PLACEMENT OFFICE TO SEE OUR REPRESENTATIVE:

**MR. WILLIAM M. BLAND, JR.**  
FEB. 17, 1958

**National Advisory Committee for Aeronautics**  
Langley Aeronautical Laboratory  
Langley Field, Va.

Ames Aeronautical Laboratory  
Moffett Field, Calif.

Lewis Flight Propulsion Laboratory  
Cleveland, Ohio

High Speed Flight Station  
Edwards, Calif.

Positions To Be Filled In Accordance With Aeronautical Research Scientist Announcement 61(B).

**NACA: The nations aeronautical research establishment**

## It's Reserve Seat Time Again

Students are shown above picking up their reserved seat tickets for the State-Carolina Basketball game. The issuing dates for tickets are: Carolina game, Feb. 10 thru Feb. 14; Wake Forest game, Feb. 24 thru Feb. 28, from 8:30 a.m.-4:30 p.m. (Photo by Kjosnes)

## Symphonic Band To Give Concert Soon

The State College Symphonic Band will give its Annual Winter Concert February 21, 1958 in the College Union Ballroom at 8:00 P.M.

The eighty piece band under the direction of Robert A. Barnes and assistant director Nels Leonard will present a program including Bache, Tschai-kovsky, Beethoven, Gillis, many light numbers, military marches, specialties and solos by members of the band. The Concert is open to all students and the public.

## Judicial Board Tries Eight NCS Students

The results of recent Judicial Board trials have been released.

On January 16, four students were given reprimands for conduct unbecoming a gentleman. At the same time one student was tried for willfully damaging college property and given a reprimand.

At a February 6 trial two students were given reprimands for discharging fireworks on campus. At the same date a student was put on probation for attempting to steal books from the book store.

## BE IT EVER SO HUMBLE

Today let us apply the hot white light of sustained thinking to the greatest single problem besetting American colleges. I refer, of course, to homesickness.

It is enough to rend the heart, walking along a campus at night and listening to entire dormitories sobbing themselves to sleep. And in the morning when the poor, lorn students rise from their tear-stained pallets and refuse their breakfasts and shamble off to class, their lips trembling, their eyelids gritty, it is enough to turn the bones to aspic.

What can be done to overcome homesickness? Well sir, the obvious solution is for the student to put his home on rollers and bring it to college with him. This, however, presents three serious problems:

1) It is likely to play hob with your wine cellar; many wines, as we all know, will not travel.

2) There is the matter of getting your house through the Holland Tunnel, which has a clearance of only 14 feet, 8 inches. This, of course, is ample for ranch houses, but quite impossible for Cape Cods, Georgians, and Saltboxes, and I, for one, think it would be a flagrant injustice to deny higher education to students from Cape Cod, Georgia, and Saltbox.

3) There is the question of public utilities. Your house—and, of course, all the other houses in your town—has wires leading to the municipal power plant, pipes leading to the municipal water supply and gas main. So you will find when you start rolling your house to college that you are, willy-nilly, dragging all the other houses in town with you. This will result in gross population shifts and will make the Bureau of the Census cross as bears.

No, I'm afraid that taking your house to college is not feasible. The thing to do, then, is to make your campus lodgings as close a replica of your home as possible.

Adorn your quarters with familiar objects, things that will constantly remind you of home. Your brother Sam, for instance. Or your citizenship papers. Or a carton of Marlboros.

There is nothing like Marlboros, dear friends, to make you feel completely at home. They're so easy, so friendly, so welcome, so likable. The filter is great. The flavor is marvelous. The Flip-Top Box is wonderful. The tattoo is optional.

Decorating your diggings with familiar objects is an excellent remedy for homesickness, but it is not without its hazards. Take, for instance, the case of Tignor Sigafos and Estabrook Raunch who were assigned to share a room last fall in the freshman dorm.

Tignor, an ice-skating addict from Minnesota, brought with him 44 barrels over which he had jumped the previous winter to win the Minnesota Jumping-Over-Barrels Championship. Estabrook, a history major from Massachusetts, brought Plymouth Rock.

Well sir, there was simply not enough room for 44 barrels and Plymouth Rock too. Tignor and Estabrook fell into such a violent quarrel that the entire dorm was kept awake for twelve days and twelve nights. Finally the Dean of Men was called in to adjudicate the dispute. He listened carefully to both sides of the argument, then took Tignor and Estabrook and pierced their ears and sold them to gypsies.

© 1958 Max Shulman

And now all is quiet in the dorm, and everyone sits in peace and smokes his Marlboros, whose makers bring you this column throughout the school year.

## ENGINEERS • PHYSICISTS

## MELPAR NEEDS MEN TO TACKLE PROBLEMS NEVER SOLVED BEFORE

At Melpar our engineering staff is primarily concerned with the charting of courses into areas heretofore unexplored. The nature of our work ranges from the development of complete systems for radar, counter-measures, data reduction, computers, and communications to basic research and weapons systems analysis.

To encourage free, unhampered activity, Melpar has developed a unique basis of organization. Our project team system enables you to apply your engineering knowledge and talent to actual problems as soon as you join our organization, without undergoing a formal training program.

As a member of one of our project teams, composed of individuals having varied levels of experience, you will enjoy freedom and a team spirit found only in a young organization of our size. Each project group is charged with responsibility for solving problems from conception of idea through construction of prototype.

This system fosters your career, because it affords you the satisfaction of utilizing your talents and skill to the utmost. Also, it gives you the diversified experience necessary for eventual managerial responsibilities.

Our dynamic growth (we have doubled in size every 24 months for the past 11 years) constantly creates new middle and top level openings; our policy of individual recognition allows you to compete for them strictly on merit, and to receive financial compensation limited only by your ability.

You can select your fields of interest at Melpar, because our R & D activities cover virtually the entire electronic spectrum—we are presently engaged in more than 90 different projects.

Alone of all U.S. cities, Washington, D. C. and its suburbs are devoid of industrial congestion. Melpar, located on a 44 acre wooded tract in Fairfax County, Virginia, is traffic free minutes from lovely homes and apartments. The capital city with its world renowned cultural and recreational facilities is only 10 miles away. Outdoor recreation is possible 215 days of the year.

• Qualified candidates will be invited to visit the laboratory at Company expense.

• Financial assistance is extended for advanced study at any of the fine universities in our vicinity.

## MELPAR REPRESENTATIVE ON YOUR CAMPUS

## TUESDAY

## FEBRUARY 18

To secure an appointment with the Melpar Representative on these dates, contact your Placement Office today.
