WVWP Program Will Help WUS Fund Drive

In a further attempt to publicize and solicit funds for the WUS Fund Drive on campus, the State College radio station, WVWP, is sponsoring a special program tonight from 9:00 until 1:00.

The program is a part of the campus-wide solicitation being carried out by many campus organizations this week under the direction of Alpha Phi Omega service fraternity.

In connection with the WVWP broadcast tonight, Alpha Phi Omega will station a representative in the lounge of each dormitory to receive donations. Everyone making a donation between 8:00 and 1:00 will be able to have a song dedicated on the student radio station.

Off-campus students are asked to make their donations to the

World University Service Fund Drive at either the main desk of the College Union or the main desk of the College YMCA.

All fraternities are collecting money within their own chapters.

All organizations collecting money should turn the money into the YMCA by 2:00 p.m. on Saturday.

Of the money collected, 90% will go to the World University

Service and 10% to the Raleigh United Fund.

WUS Program
The program of WUS furnishes textbooks to students where books are hard to get and are expensive. They help furnish additional student housing where student enrollment outstrips available student housing.

From 1954 through 1956, WUS, among other things, opened health centers in France, India, and Indonesia; they built student dormitories in Korea and Greece; opened two TB san-

(See WUS DRIVE, page 4)

Reduction Secured In Movie Admission

A bright spot in Student Govt. report was given by Senator Hagaman of the Economic Survey Committee last Thursday.

The committee announced that all State Students have been granted a 15¢ reduction in the price of theater admission tickets to the Ambassador and Varsity theaters.

The *Technician* will print the poop as to when this reduction will become effective as the information becomes available.

The reduction is expected to be extended to the students on about 90% of the shows, according to Mr. Stone, manager of the Ambassador.

Panel Planned On NC Writing

By Billy Evans
A panel discussion on "North Carolina Writing Today" will conclude North Carolina State College's first Fine Arts Festival on Wednesday, March 5.

The eight day Festival will include such features as a "Good Design" show, several concerts, a one-act play festival, and an appearance by Ogden Nash.

The panel discussion will be-

gin at 8 p.m. in the College Union.

Dr. Lodwick Hartley, head of the English Department at State College, will serve as moderator for the panel composed of Lucy Daniels of Raleigh, Francis Gray Patton of Durham, and Burk Davis of Greensboro, all noted North Carolina writers.

A coffee and autographing hour will follow the discussion.

Books on Sale

During the coffee hour the Watauga Book Store will have on sale books by North Carolina authors. In addition to the authors on the panel, other writers have accepted invitations to attend the panel discussion and coffee hour.

Expected to attend at LeGette Blythe, Dr. C. Richard Sanders, Mrs. Mebane Holloman

Burgwyn, John Harden, Sam Ragan, Dr. Christopher Crittenden, Fred Ross, Mrs. Bernadette Hoyle, Phillips Russell, Lambert Davis, Dave Morrah, and Thad Stem, Jr.

The panel discussion and coffee and autographing hour will be open free to the public.

A dinner will be given at 6:30 p.m. for the writers attending the night's activities.

Other Events

Also planned for the Fine Arts Festival are:

Opening of a "Good Design" show on Wednesday, February 26, at 8 p.m.; a one-act play festival Friday, February 28, at 3 and 8 p.m. in the College Union Ballroom; Raleigh Symphony Orchestra concert Sunday, March 2, at 3:30 p.m. in the College Union Ballroom.

Westminster Choir concert Monday, March 3, at 8 p.m. in Memorial Auditorium; Chamber Music Concert Tuesday, March 4, at 4 p.m. in the College Union Ballroom; Ogden Nash Tuesday, March 4, at 8 p.m. in the College Union Ballroom; and a modern dance concert Wednesday, March 5, at 4 p.m. in the College Union Ballroom.

Dublin Players Will Present Two Plays On Pullen Stage

Pullen Hall will be the site for two performances by the internationally famous Dublin Players, Friday and Saturday nights at 8 p.m.

On Friday night the repertory company will present Paul Vincent Carroll's "Shadow and Substance," and on Saturday night

they will present Sean O'Casey's "Juno and the Paycock."

Plays

The play "Shadow and Substance" might be described as a duel between the head and the heart, between informed and instinctive faith, revolving about the austere character of the Canon and his humble servant,

Brigid, with her visions of St. Brigid and her bottomless faith which she is unable to articulate, the spirit of Ireland itself.

"Juno and the Paycock" takes place during 1922, the period of "the troubles," the Irish Civil War, and concerns Mrs. Boyle, who keeps the home together, and her drunken, debt-ridden husband, "Captain" Boyle, who struts about the suns (bars) of the neighborhood like a peacock (peacock), avoiding work whenever possible.

Tenth Tour

The Dublin Players, formed in 1947 by Ronald Ibbs and his wife, are now in their 10th annual tour season. The Players are appearing in the 1957-58 season for the fifth time in America with a coast-to-coast tour extending from October 1957 through March 1958 and including no less than 55 engagements.

The two evening performances are being sponsored by the College Union Theater Committee under the chairmanship of Jon Bell of Raleigh. There will be an intermission coffee hour at both performances.

This event, as are all Union-sponsored activities, is open to all students and their dates without charge.

The Dublin Players, in a scene from the Friday night production of "Shadow and Substance," beginning in Pullen Hall at 8 p.m.

Friday At Eight

Symphonic Band Will Give Concert

State College's eighty-piece Symphonic Band will present its annual Winter Concert Friday night at 8 p.m. in the College Union Ballroom.

The band, under the direction of Robert A. Barnes and assistant director Nels Leonard, will present a program including Bach, Tschaikovsky, Beethoven, and Gillis, several light numbers; military marches; and specialties and solos, by members of the band.

Soloist will be Hobart Whitman, who will play Strauss's "Concerto for French Horn."

"Holiday for Trombones" will

be presented as a section solo by the trombones.

A solo will also be presented by David Teague.

Other highlights of the program are:

Bach's "Komm Susser Tod," Tschaikovsky's Symphony No. 4 in F Minor, and Beethoven's "Egmont Overture."

The Concert is open to all students and the public.

Photo by Visual Aids

The annual Winter Concert will be given by the Symphonic Band at 8 p.m. Friday in the College Union Ballroom. Pictured here are the eighty members of the organization.

Grades Are Gods

At examination time each semester, the Honor System at State suffers immensely. In fact, it is all but non-existent.

During the exam period three weeks ago, the "irregularities" (that is, cheating) seemed more numerous than ever. It was evident to many students, administrators, and faculty members that the violations last semester were even more widespread than usual.

At the request of members of the three groups above, we have withheld comment on the situation until some investigations could be made. Now, however, we wish to put the matter before you.

First, we ask of you, is this what you want at your school? Do you care whether State has an Honor System? Are you doing your part to uphold it?

Second, is the Honor System the answer to elimination of cheating and exam stealing? Or is a "police" system better? It must be one or the other.

Under the present system—the "honor" system—each student is pledged not only not to cheat, lie, or steal himself, but also to report such violations if and when he sees them. This, quite bluntly, is not being done. You know it as well as we do.

What are the reasons for the failure of our system? First, the grade one receives has become more important to many students than the learning and understanding of the course. This, obviously, is the most important reason for cheating—grades have become gods. This problem, however, must be resolved only by the individual after he has honestly decided why he is in college.

When you go to work, you know, it will be quite a lot like school. You will study and learn; you will do your work; and you will be graded on what you do. The difference, however, is that you never get to see your grades.

If someone could apply the same idea to college education—studying and working only because of personal motivation—he would have done a great service.

Carelessness Offers Temptations

A second reason for the failure of our system is that tests and examinations are not properly safeguarded. Old stencils and first copies of exams carelessly thrown in trashcans and unlocked doors and windows present temptations to students for whom the good grade is a god.

And for those people who naively say "Oh no, no one could get into this office even if he wanted to," we have only one comment: Don't you believe it.

There is one further point: the practice of teachers leaving the room during examinations and texts. When we asked the reason for this practice, we were told that "it is more or less a symbol of trust in the student . . . to show that the Honor System really works." To this we say "Ha!"

As it now stands in many classrooms, this practice means only one thing to many students. . . . "It's all right now, he's left the room."

The Majority Do Not Cheat

For the majority of the students, who are not going to cheat anyway, whether the professor is in the room or not does not matter. It is only those who are going to cheat that this practice benefits.

In fact, most of the students who don't cheat probably would rather have the teacher in the room, in case there is a question about the test or examination.

We are not implying here that everyone at State cheats. The large majority of the students do not. It is to these people that we are speaking even more than to those that do cheat. Only those of you who do not cheat and who dislike and detest cheating can change the situation. It is your school and your Honor System. It is up to you to make them strong.

An Important New Policy

Last Thursday night at Student Government meeting, a bill was introduced, thoroughly discussed, and eventually passed.

This new bill is no ordinary event; to many of us it is one of the most important decisions that our Student Government has made in years. We are referring to the bill introduced by Aaron Capel, senator from the School of Textiles, which appeared fully stated in the last issue of *The Technician*, on the front page.

We will again state the important provisions of the bill, quoting excerpts: ". . . activities fund is limited . . . whereas it is desired that the Student Government appropriations be made for the benefit of all of the students . . . Be it resolved that all campus organizations requesting appropriations from the Student Government be required to finance all activities for personal benefit, to include: banquets, Agromeck pictures, and private social functions, and to finance trips that do not affect the (whole) student body, either directly or indirectly, . . . effective the fall semester of 1958."

All of us can readily see the overwhelming fairness of this policy. Actually, Student Government has always had the power to decide just what groups will get what appropriations; however, it is now down in writing.

It should be mentioned here that it would be awkward to put the new bill into effect before fall, 1958; many organizations which will be affected by this policy have already planned their budgets in expectation of Government appropriations. Student Government feels perhaps that it is only fair to give these organizations some advance warning of their action.

As an outstanding example of the situation which caused the passage of such a bill, consider appropriations for banquets alone. *By the end of this spring semester, more than \$2,000 will have been appropriated for banquets . . . out of a total Student Government budget of something less than \$5,000!*

It is very encouraging that we now know future appropriations will be made "for the benefit of all of the students," that our activity fee is not being spent to benefit any minority group.

Letters To Editor

Easier At Carolina?

To the Editor:

We have remained silent during the controversy over the Engineering Graphics Course in which the freshmen seem to be having some trouble, but one tires of hearing the same crap in each issue of the *Technician*. Of course, Leveque's poll on Engineering Graphics would show that the students are in favor of less work and more credit. Every student at State is in favor of less work and more credit in all courses. However, some employees find that our Graphics course is barely sufficient for their application requirements. If Leveque wants to "party" all the time, he should go to Carolina. Another issue that has arisen

is the proposal that pay phones be removed. John Scott, freshman in M.E., seems to think all students should share in the expense of communicating with local girls' colleges. Of course, some students make calls every night and this would run into some expense. However, we have enough fees added to our tuition as it is, without any more useless expenses.

If the students are so dissatisfied with State College, we suggest they move to our "brother institute" at Chapel Hill. They have neither Graphics nor pay telephones.

College Students Comment On Educational Weaknesses

by Chuck Lombard

Ever since the new moon over Moscow appeared, we've been hearing a lot from our leaders about the weakness of our educations. We decided to find out what the college man thinks about the situation so we began looking through the papers sent to us from other schools.

One thing we noticed was that college men were having a lot to say concerning the importance of the humanities.

From Other Campuses

Columnists in the *Mississippi State Reflector* were praising increased enrollment in the liberal arts department and echoing such trite phrases as ". . . men are not machines" and "even the best technical man is not up to par unless he has a background of general knowledge."

Also, we found letters to the editor such as the following in the *Syracuse Daily Orange*: "Ever since coming to Syracuse University I have seen or heard articles and arguments . . . denouncing the lack of intellectual curiosity, the servile need to conform . . ." But then he says, "A student's behavior reflects fundamentally on himself; however, a professor's attitude and performance are accountable to the two hundred or more students that he instructs or advises."

These men recognized that good education requires a degree of *intellect*. This search and appreciation of the intellectual facts of life (as one might describe the humanities) is evident in the lives of practically every man who is called "Great."

The majority who come to State are interested in achiev-

ing success (our pal Charlie, the "Craven," personally recruits most who are not interested in success for the Hill). And yet we, whose courses are doubtless as hard as any to be found in the country, are honored with some sort of pity for being "Cow Tech," which might be synonymous with "social losers."

There is really no denying that our critics have at least partial point. We have got the brains, but collectively we're not using them. This writer feels that the trouble does not rest entirely with the students but partly with our teachers.

The Role of Teachers

Interest, like bacteria, thrives in its own particular climate, and proper atmosphere for interest in human values is one made attractive by the support of leaders. Teachers are supposed to be leaders, to demonstrate to their students the worth of their subject and to try always to arouse a respect for this worth.

How many times have we walked into an English, Economics, C. C. or History course the first day and been greeted with, "Well, I suppose most of you are taking this course because you have to!" Or try this one . . . "I don't give subjective quizzes in this course because the students don't like them."

Getting out on a limb, we want to suggest that the lack of interest at State in "the finer things" is not the product of dull minds but of an ignorant social straitjacket that was put on in high school and hasn't been loosened since.

The problem for us might be maturity; for the profs, interest.

De gustibus

non est disputandum"—and, quite literally, there's no question about it—when it comes to taste, Coca-Cola wins hands down. In Latin, Greek or Sanskrit, "Have a Coke" means the same thing—it's an invitation to the most refreshing pause of your life. Shall we?

SIGN OF GOOD TASTE

Bottled under authority of the Coca-Cola Company by CAPITAL COCA-COLA BOTTLING CO., RALEIGH, N. C.

No apparent use exists for the bus shown above which has been parked on the east side of the Coliseum for several months now. As can be observed, the elements are doing little

to preserve the bus's appearance which, in turn, takes from the appearance of the Coliseum's surroundings.

Fraternity Line

I F C Planning Kai Winding Concert In May

by Oscar Grant
Plans are now being completed for another concert to be held on Saturday, May 10 similar to the recent Four Freshmen concert. At present, Kai Winding, famous for his trombone arrangements is scheduled and that particular weekend will definitely prove to be a very big highlight on the "greek" social calendar with the I.F.C. Spring Greeks coming on the same day.

Heart Fund
Just another in a series of worthy deeds which is being done by the I.F.C. is the distributing of plastic hearts for the Heart Fund which is presently being carried out by the I.F.C. Activities Committee and its chairman, Sherrill Brinkley.

This, incidentally, leads up to a rather touchy subject which is being discussed a great deal by State's fraternity men. The subject referred to here is the question of having hell week or help week for pledges.

While the issue is primarily one which each fraternity must decide for itself, it is this writer's belief that fraternities that do decide on a type of hell week should keep these activities within their own chapter houses since most of these activities do not serve to keep fraternities in a good light before the public.

Hell Week Condemned
This writer's personal opinion is that hell week is neither necessary or helpful in training pledges into becoming useful members of a chapter. The national Inter-fraternity Council has consistently condemned hell week in the past and most like-

ly will continue to do so in the future.

TV For Freshman-Sophomore
At an emergency call meeting of the Freshman and Sophomore class officers at 11:00 p.m. last Friday night, information was given concerning the coverage of the Freshman-Sophomore by a television network.

Affairs of State has been asked not to release any data or comment on information that has been given so far, but this column will carry definite facts concerning the acquisition of television and radio stations to cover this event next week.

Affairs of State

United Nations Seminar Postponed

by Pierre Leveque, Jr.

A sad and disappointed group of young people were in YMCA Associate Secretary William Long's office yesterday after an inevitable decision to postpone the State-Carolina YMCA-YWCA sponsored United Nations Seminar because of recent highway patrol reports of heavy snow and ice on parkways leading to New York City.

Last night Mr. Long told Affairs of State, whose writer is covering the UN Seminar for The Technician, that the trip will be postponed only until the parkways and turnpikes become passable and that very probably definite plans will be made in the next few weeks.

Conference appointments that have been made with the Russian, Egyptian, Pakistan, and other delegations as well as with NBC News Commentator, for the UN, Pauline Fredrick, have been canceled until a later date.

Freshman-Sophomore Band
In a personal interview with Freshman Class Treasurer Dave Maharam, information was released to Affairs of State Concerning the dance band for the Freshman-Sophomore Dance. Count Basie has been signed to play at the dance. However,

because of an engagement at Pennsylvania State the night before, a concert the next afternoon will be impossible.

Plans are under way to provide other entertainment for the afternoon of the Freshman-Sophomore and will be announced in this column when decisions have been made.

John Lawlor, B.S. in E.E., Brown, '52, answers some questions about

An engineering career with the Bell Telephone Companies

John Lawlor is a Transmission Engineer with New England Telephone and Telegraph Company in Boston. His answers reflect his experiences during five years in the telephone business.

Q How did you begin as an engineer in the Bell Telephone Companies?

A My first fifteen months were spent in "on-the-job" training—changing assignments every three months or so. These assignments gave me a broad, over-all background in telephone engineering. And they were accompanied by plenty of responsibility. They progressed in importance with my ability to handle them.

Q What is the attitude of older engineers and supervisors toward young men?

A I've found a strong team spirit in the telephone company. You're encouraged to contribute your ideas, and they're received with an open mind. Young men and new ideas are regarded as vital to the continuing growth of the company.

Q How about opportunities for advancement?

A I'd say they depend on the man. Opportunities to demonstrate your ability come with each new

job you're given. The size and importance of your assignments grow with your ability to handle them. All promotions are made from within, and the growth of the business is creating new openings all the time. One more thing. Most telephone engineering locations are convenient to colleges. You can aid your advancement by keeping on with your studies.

Q How does the telephone company stack up where pay is concerned?

A Starting salaries are competitive with those offered by most large companies. Raises are based on merit, with several increases during your first two years with the company. What's more, your performance is reviewed regularly to make sure that your pay keeps up with your progress. All things considered, I think a Bell Telephone career is second to none in rewards and opportunities.

Find out about career opportunities for you in the Bell Telephone Companies. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet on file in your Placement Office, or write for "Challenge and Opportunity" to: College Employment Supervisor, American Telephone and Telegraph Company, 195 Broadway, New York 7, N. Y.

Professor Revises Thermo Textbook

"Thermodynamics of Heat Power," revised edition of the widely-known textbook "Theory and Practice of Heat Engines" by Virgil M. Faires, professor of mechanical engineering at State College, has just been published by the MacMillan Company of New York in time for use in spring classes.

Written for courses in thermodynamics for non-mechanical engineers, this new edition by Professor Faires includes chapters on gas turbines and jet propulsion, heat exchangers, mixtures of gases and vapors, and pumps and fans.

Book Recommended
Reviews appearing in engineering journals recommended Professor Faires' first edition for its "numerous and strikingly-clear illustrations which add to the ease of reading and the understanding of the text" and for its "lucid and logical arrangement of the author's presentation of the subject".

The revised edition retains these advantages with additional detailed illustrations and additional practice problems at the end of each chapter accompanied by answers.

Author of Six Books

Professor Faires joined the faculty at North Carolina State College in 1952, coming from Texas A & M College where he was head of the Department of Management Engineering. He is the author of six books covering a wide area of mechanical engineering. Professor Faires has won national recognition as an inspiring teacher and for his contributions to engineering education.

Product Development Engineer Gerald A. Maley, like many other engineers, mathematicians and physicists, came to IBM directly from college. Here he tells how he put his E.E. degree to work in the exciting new field of computer development.

What's it like to be with IBM?

"What really sold me," says Gerald Maley, "was the way they approach engineering at IBM. I had expected rooms full of engineers at desks. Instead, I found all the friendly informality of my college lab."

An E.E., he came directly to IBM from the University of Buffalo in 1953. Starting as a Technical Engineer, he was immediately assigned to work, with two others, on designing a small calculator. Jerry Maley learned a great deal about computers in a very short time. Incidentally, this small calculator has gone into production. "It makes an engineer feel good," he says, "to see his project reach the production stage—and to be able to follow it through."

Promoted to Associate Engineer after sixteen months, he became the leader of a nine-man team, assigning problems to his group for solution, approving their block diagrams and the models they built. A short while ago, he was again promoted—this time to

Project Engineer. "A particularly interesting aspect of my present job," Jerry Maley says, "is the further development of magnetic cores—new memory storage devices for electronic digital computers." His administrative details have been reduced to a minimum, freeing him for creative engineering work.

Perhaps an hour a day goes into paper work such as requisitioning equipment for his group and reviewing technical publications, in counseling members of his team, and preparing for trips to technical society meetings.

Why he chose IBM

Of course, there were many reasons why Jerry Maley selected IBM. He was vitally interested in computers, and IBM is a leader in computer technology. He comes from a scientific family (his brother is a mathematician), and is fascinated by these IBM mathematical marvels which are revolutionizing ways of doing things in so many fields. He enjoys working on large equipment... and on "pulses." "It's more logical," he says. "In computer work, you can actually see electronics at work. And it's not all solid math, either. What's more, this

field is so new, you're contributing along with everybody else in a short time." He endorses the IBM policy of promoting from within, with merit the sole criterion. The salary factor, although it was excellent, was not his first employment consideration, he recalls. The tremendous advancement potential was of greater importance.

Testing a new development

What about promotions?

When asked about advancement opportunities at IBM, he says, "You can hardly miss in this field and in this company. IBM sales have doubled, on the average, every five years. Company expansion at this rate—

Reviewing technical publications

in a dynamic industry—makes my future look bright indeed." Since Jerry Maley came with IBM in 1953, career opportunities at IBM are brighter than ever, as all business, industry, science and government turn increasingly to automation through electronic computers.

This profile is just one example of what it's like to be with IBM. There are many other excellent opportunities for well-qualified college men in Research, Development, Manufacturing, Sales and Applied Science. Why not ask your College Placement Director when IBM will next interview on your campus? Or, for information about how your degree will fit you for an IBM career, just write to:

INCORPORATED • DALLAS, TEXAS

In Textile Auditorium

Five Films Planned For Design Series

Five outstanding foreign and domestic films will be shown on the State College campus during the spring "Design Film Series."

Included in the program are two French movies, one Swedish picture, one German film, and a special program of three documentary films.

Season tickets for the series are selling for two dollars. Single tickets will be sold at the door at a higher rate.

Tickets

Subscription tickets for the series may be purchased at the college's School of Design, Room 220 Brooks Hall, and at the bookstore of the North Carolina Museum of Art.

The subscription fee is charged by the Design Film Committee to cover the costs of film rental and projection.

The five films will be shown on Tuesday nights at 8 p.m. starting March 11, in the Nelson Textile Auditorium.

The Design Film Committee

was inaugurated several years ago by a group of students of the School of Design who felt that many important and interesting films were not available in the Raleigh area through commercial theaters.

Last season's sell-out program prompted the move of the series to the large Textile Auditorium in order to accommodate the increased interest in the program.

The feature presentations will be supplemented by short subjects.

Films

Planned for this season are: The French film, "Beauty and the Beast," on March 11; three documentaries, "Desert Victory," "Thursday's Children," and "The River," on March 25; a Swedish motion picture, "One Summer of Happiness," on April 15; a second French movie, "We Are All Murderers," on April 29; and the German film, "Maedchen in Uniform," on May 13.

Men's Glee Club Has International Singers

Three other countries and five other states are represented among the members of the State College Glee Club.

The Glee Club has one member each from China, Holland, and Mexico.

Virginia is represented in the group by two students, while the organization has one member each from Kentucky, Maryland, Tennessee, and Alabama.

Raleigh leads in towns represented with five local young men in the Glee Club.

Members

Members of the Glee Club are: First tenor—H. C. Nix, Asheville; John W. Murphy, Matthews, Ky.; Herbert Randolph Little, Charlotte; Robert T. Adams, Winston-Salem; John W. Brown, Raleigh; Truman King, Jr., Raleigh; Robert M. McAdams, Burlington.

Second tenor—Earl E. Marlowe, Kings Mountain; Paslo Yu, Shanghai, China; Darrell L. Boyette, Rockingham; Bailey W. Kahl, Registertown, Md.; William Don Malpass, Norfolk, Va.

Charles L. Sanderson, Erwin, Tenn.; Clifton B. Vann, Wilmington; Grady Dan Knott, Raleigh; Daniel H. Snyder, Raleigh; Clyde E. Hammond, Lumberton; Jim W. Powell, Greensboro.

First bass—John H. Newlin, Danville, Va.; Charles E. Daniels, Raleigh; William D. Todd, Jr., Gastonia; Joe W. Privott, Tyner; Ronald A. Smith, Gastonia; William C. Stainback, Youngsville; Gary L. Johnston, Charlotte.

John Rex McDonald, Cameron; David Scott McRae, Ellerbe; Bernard J. Sweets, Warrendale, Holland; David Malcolm MacCallum, Jr., Southern Pines; Hoyt S. Beard, Pittsboro; Manuel Gonzales, Monterrey, Mexico; Robert F. Shaw, Fayetteville.

Second bass—Robert D. Purvis, Bennett; George E. Setzer, High Point; Pinkney C. Austin, Jr., Granite Falls; Max L. Pope, Raleigh; Carl L. Salter, Sheffield, Ala.; Russell G. Cash-

well, Lumberton; Thomas S. Shinn, Asheville.

Charles D. Gee, Burlington; Richard J. Cashwell, Lumberton; Howard Bryan, Winston-Salem; Gene A. Clemmons, Clayton; Jerry B. Fitts, Raleigh; Paul N. Hinz, Tarentum, Pa.; and Joseph E. Dixon, Maple Hill.

State College Students Will Participate In 1958 National Intercollegiate Bridge Tour.

State College is one of the more than 100 colleges and universities throughout the United States which has entered the 1958 National Intercollegiate Bridge Tournament.

Tournament director for State is George Colton, chair-

man of the College Union Games Committee. Details of the tournament may be obtained from the College Union.

All play will be by mail and will be conducted on the campus in a single session, on a date to be announced by the tournament

director. These hands will be returned to committee headquarters where they will be scored by Geoffrey Mott-Smith, author and contract bridge authority, who will determine campus, regional and national winners.

Prizes will include trophy

cup for the colleges winning the national titles, one cup for the college for the pair scoring highest on the East-West hands and one for the North-South winners. Each of the four individual national winners will receive a smaller cup.

Wolfpack Topped By UNC Tarheels, 81 - 69

It was strictly a case of too much Pete Brennan as the Wolfpack was topped by a fast-striking Carolina crew, 81-69, before 12,000 roaring fans in the Coliseum last Tuesday night.

Brennan, the All-American choice from the Tar Heel lineup, was nothing but tough as he pumped in 32 points to lead the Hill crew to the all-important Atlantic Coast Conference victory.

By losing the game, the Wolfpack dropped to fourth place in the standings with a 9-4 conference record. Carolina moved up the ladder to second place, only a half game behind the league-leading Blue Devils of Duke.

State lost the game at the free throw line, making only 19 of 36 chances for a mediocre 52.7%. From the floor, the Pack was much under its usual accuracy as they hit 25 of 71 shots for 35.2%.

Carolina was not up to par with State as far as their field goal accuracy was concerned. The Heels hit 22 of 63 for 34.9%. From the Line, Carolina sunk 37 of 46 chances for a very good 80.4%.

Guard Lou Pucillo bore the brunt of the State attack as he hit nine field goals and two free tosses for 20 points. Big center John Richter was second high man with 13 markers to his credit. Forwards George Stepanovich and Bob MacGillivray got ten points each.

Next to Brennan, Carolina had only one other with a good night. That was Soph Harv Salz who mustered 19 points.

This Saturday night, the Wolfpack will play its last non-conference game of the Year when they meet LaSalle in the Coliseum. LaSalle is one of few teams who hold a series edge over State, Having won four of seven meetings.

Stepanovich Goes High!

Reserve State forward George Stepanovich gets off a jump shot over the outstretched arm of Carolina's Pete Brennan in the game here last Tuesday night. In the Background is State center John Richter. Carolina took the contest, 81-69. (Photo by Kugler.)

Reiner Aids Wolflets Win Over Tarbabies

The State College winning Wolflets picked up their sixteenth win of the season, Tuesday night, by rolling over the Tar Babies of Carolina 38-27. This gave the State Frosh their third straight victory over the Carolina squad this season, and boosted their won-lost record to 16-2.

Led by play maker Mark Reiner, the Wolflets masterfully controlled the game from the opening minutes. The 5-11 guard dropped in eleven points to be high scorer of the evening. Following closely behind Reiner were Lakins with nine tallies, Niewierowski and Simbeck each with eight, and DiStefano with two. DiStefano and Ranta, alternating at center, did a great job of rebounding to allow State the control.

Both the Wolflets and the Tar Babies played a slow-up control ball game, with the Wolflets emerging victorious. At half time the score read 15-9 with the State squad in the lead. After a very slow moving half, the Wolflets chalked up another win to their winning streak.

The statistics of the game neither team in the higher shooting bracket. State, not up to their usual marksmanship, hit on only 11 out of 26 shots, for a 42% shooting average for the night. Carolina took just 20 shots, making good on 9, for a 45% total.

With only three remaining games left to play during regular season play, the Wolflets go up against Fort Eustis Saturday night in Reynolds Coliseum. Of the three remaining games, only one is a conference game, that being with Wake Forest. Of the Wolflets two losses, one was at the hands of the Wake Forest Frosh, earlier this season, so this one remaining conference tilt should prove to be a real thriller, with the winning Wolflets out to avenge this previous loss.

Vetville, Sigma Chi In Front At End Of Fall Intramurals

A recap of football, bowling, and volleyball finds many phenomenal results. Becton 1 won the dormitory football championship for the 6th consecutive year, Vetville confiscated the dormitory volleyball title for the 5th consecutive time, and Sigma Chi walked away with the fraternity football crown for the 3rd straight year.

A few other of the season oddities saw Sigma Chi pull the largest fraternity football score, beating Lambda Chi (39-0) and Tucker 1 in dormitory football rolled up the largest season score by scoring 33 points on WG4S. 58 games were played in the fraternity division with no forfeits, 9 games were decided by "sudden death" methods of playing off tie games and the championship game was postponed until Jan. 15, 1958.

As well as many odd and exciting aspects of fraternity and dormitory play, keen interest was expressed with a total of 1,467 participating in the winter sports. Becton 1 had the most number of participants (36) in the dormitory league and Delta Sigma Phi (35) was high in the fraternity league.

The standings on the point system lists Sigma Chi (1st), Sigma Phi Epsilon (2nd), and Sigma Alpha Epsilon (3rd) with 480, 402, and 331½ points respectively. Dormitory stand-

ings place Vetville (1st), Becton 1 (2nd), and Syme (3rd) respectively.

WE MIGHT NOT HAVE BEATEN THOSE BOYS FROM THE HILL - BUT WE SURE MADE IT KNOWN TO 'EM THAT THEY WERE IN A BALL GAME - OH WELL, ON TO THE NEXT GAME!

SYMBOL OF SERVICE FOR SEVENTY-FIVE YEARS

Third Tour

Churchmen Visit Student Centers

A study of denominational student centers at three of the State's institutions of higher learning was completed Tues-

day by a delegation of 500 Presbyterian ministers and laymen.

The visiting group of Presbyterians toured student centers at Duke University, the University of North Carolina, and State College.

It marked the third and final tour in a series starting in January and was designed to familiarize the visitors with the need for better facilities to house Presbyterian student activities.

In March, the Presbyterians in North Carolina will conduct a \$300,000 fund-raising campaign for the purpose of building and furnishing facilities for Presbyterian religious activities at five North Carolina colleges. Funds raised in the drive will supplement \$200,000 already in hand for the half-million-dollar project.

On their final tour of Duke, UNC, and State yesterday, the visiting group arrived for a coffee hour at State College yesterday morning and later viewed denominational facilities used by State College students at the West Raleigh Presbyterian Church.

Diploma Exhibit In CU

An exhibit featuring State College's new diploma and diplomas from other colleges is now on display on the ground floor of the College Union near the Games Room.

Alumni Receive Newspaper Articles

Copies of stories and editorials which have appeared in *The Technician* and Raleigh and state-wide newspapers on efforts to secure 500 units for married housing have been prepared by the Alumni for mailing to State College graduates.

Purpose of mailing the articles to the alumni is to inform

them of the efforts being made to improve married housing and the stand of newspapers on the issue.

Other newspapers which had articles reproduced were the *Raleigh News and Observer*, *The Raleigh Times*, *The Charlotte News*, and the *Greensboro Daily News*.

WVWP Will Air International Music

The newly-formed International Committee at the College Union is sponsoring a 30 minute program of music from other countries, to be heard over WVWP, the campus station, from 7 to 7:30 on Thursday nights.

The new committee meets every Monday evening at 7 p.m.

YDC Will Hear Club's Past President

Henry Hall Wilson, Attorney at Law, will speak to the Young Democrats Club Friday at 7:30 p.m. in room 254 in the College Union.

Wilson is past president of the State Young Democrats Club. His talk will consist primarily of why students should participate in the club.

and membership is open to any interested State College student.

THE MAN FROM ALLIED HAS FACTS YOU NEED

Thinking hard about what's ahead after graduation? You probably have some idea about industries, companies, jobs... futures. But you need facts.

Check that data before the Allied interviewer will be here soon, ready to do some straight talking about your future. It's worth the trouble to look into a company that has a dozen research laboratories, over 100 plants, and a nationwide network of sales offices. The worth learning about this company is in a company that makes more than 1,000 products... chemicals, plastics, fibers, and more and more every year. What kind of job? What kind of future? Find out now.

State Demolay Chapter
Installs New Officers

Officers of the State Chapter of the Order of DeMolay were installed at the first regular meeting of the semester last week.

Edwin Murray Rudisill, Jr. was elected to head the chapter as Master Councilor. Senior

Councilor is James C. Martin; Junior Councilor, William O. Marks; Treasurer Hoyt A. Wallace; and Scribe T. Hardy Rothrock.

Master Councilor Rudisill wishes to inform all DeMolays and Master Masons that the State College chapter meets every second and fourth Thursday nights of each month at 7:00 p.m. in Room 108 of Polk Hall.

Other officers of the Order are: Senior Deacon is Roy Austin Hutchins; Frank Price, Junior Deacon; Senior Steward, Bailey Kahl; El Clayton, Junior Steward; Boyce Harwell, Sentinel; Thomas Cathey, Standard Bearer; and Kent Watson, Orator.

Frank Purdy, Chaplain; Marshal, Bob Shi; Rolfe Reusing, Almoner; James Robert McLester, 1st Preceptor; Jan Cates, 2nd Preceptor; Eddie Ramsey, 3rd Preceptor; Bill Barksdale, 4th Preceptor; Robert Sugg, 5th Preceptor; Charles Buddy Goodwin, 6th Preceptor; and Milton Holt, 7th Preceptor.

Delta Sigma Phi
To Hold Open House

Delta Sigma Phi social fraternity will hold an open house next Sunday, February 23, from 1-6 P.M. Members of the local chapter extend a cordial welcome to everyone at State College to meet them in their new chapter house. All fraternities, girl schools in Raleigh area, alumni, student body, and college administration.

Delta Sigma Phi is located on Tryon road across from Raleigh Golf Association course about four miles southwest of Raleigh near the Raleigh Municipal Airport.

"Y" To Sponsor Seminars

This year the annual series of YMCA-sponsored spring conferences will be as follows: Washington "Sputnik" Conference-Washington, D. C., April 10-13; Ecumenical Conference-Camp New Hope, Chapel Hill, N. C., April 12-13; State YM-YW-SCA Conference-Quaker Lake, N. C., April 18-20; Southern Area YM-YW Conference-Blue Ridge, June 6-12.

Any student interested in going to one of these conferences should drop by the "Y" and sign up for it.

Carolina's 'Tar Heel'
Receives New Truck

On the same night last week that The Technician was appropriated \$500 by the Student Legislature, The Daily Tar Heel, Carolina's newspaper, was appropriated \$1,466.13 to buy a new delivery truck.

THE PLEDGE YOU SAVE
MAY BE YOUR OWN

Today's column is directed at those young female undergraduates who have recently pledged sororities and are worried, poor lambs, that they won't make good. Following is a list of simple instructions which, if faithfully observed, will positively guarantee that you will be a mad success as a sorority girl.

First, let us take up the matter of housemothers. The housemother is your friend, your guide, your mentor. You must treat her with respect. When you wish to speak to her, address her as "Mother Sigafos" or "Ma'am." In no circumstances must you say, "Hey, fat lady."

Second, let us discuss laundry. Never hang your wash on the front porch of the sorority house. This is unsightly and shows a want of breeding. Use the Chapter Room.

Third, meals. Always remember that planning and preparing meals for a houseful of healthy girls is no simple task. Your cook goes to a great deal of trouble to make your menu varied and nourishing. The least you can do is show your appreciation. Don't just devour your food; praise it. Exclaim with delight, "What delicious pork jowls!" or "What a yummy soupbone!" or "What scrumptious fish heads!" or "What clear water!"

Fourth, clothing. Never forget that your appearance reflects not just on yourself but on the whole house. It was well enough before you joined a sorority to lounge around campus in your old middy blouse and gym bloomers, but now you must take great pains to dress in a manner which excites admiring comments from all who observe you. A few years ago, for example, there was a Chi Omega named Camille Ataturk at the University of Iowa who brought glory to all her sorors.

Camille hit on the ingenious notion of suiting her garb to the class she was attending. For instance, to English Lit she wore a buskin and jerkin. To German she wore lederhosen and carried a stein of pilsener. To Econ she wore 120 yards of ticker tape. Her shiningest hour came one day when she dressed as a white mouse for Psych Lab. Not only her Chi Omega sisters, but the entire student body went into deep mourning when she was killed by the janitor's cat.

Finally, let us take up the most important topic of all. I refer, of course, to dating.

As we have seen, the way you dress reflects on your sorority, but the men you date reflect even more. Be absolutely certain that your date is an acceptable fellow. Don't beat about the bush; ask him point-blank, "Are you an acceptable fellow?" Unless he replies, "Yeah, hey," send him packing.

But don't just take his word that he is acceptable. Inspect him closely. Are his fingernails clean? Is his black leather jacket freshly oiled? Is his ukulele in tune? Does he carry public liability insurance? And, most significant of all, does he smoke Marlboros?

If he's a Marlboro man, you know he's a lot of man. You know he has taste and discernment, wit and wisdom, character and sapience, decency and warmth, presence and poise, talent and grit, filter and flavor. You will be proud of him, your sorority will be proud of him, the makers of Marlboro will be proud of him, and I will be paid for this column.

The makers of Marlboro wish to announce that Mr. Shulman has been paid for this column and will continue to be paid for bringing you his homely philosophy throughout the school year.

Laces and leathers and dozens of things

Ski boots lace easier and faster, stay comfortably tight. They do so because the rawhide leather has been made more pliant with a special treatment perfected by Esso Research. The leather in the skier's boots, the wool in his socks—even the lacquer on his skis—were also made better with the help of other products derived from oil. **ESSO RESEARCH** works wonders with oil.
