FRESHMEN INHERIT STATE COLLEGE

Typical of last Sunday in the Dormitories is shown above in this shot of three freshmen in Tucker Dorm as they prepared to get squared away on their newest field of adventure . . . college life! These men were part of the 1700 new students who enrolled at State today. Photo by Kjosnes

Orientation Program Effective; 1700 New Students On Campus

For the past five days, 1700 new freshmen, the class of 1962, have been subjected to an orientation program which is unique in the history of State College. This year is the first that the entire freshman class has been divided into small groups, each group being shown The College Way by an upperclassman, versed in each phase of college life.

Last Sunday, the new freshmen began arriving in Raleigh to begin their week-long period of indoctrination. On Monday, after a "Freshman Week Band" rehearsal was held Sunday night, the class of '62 attended two general assemblies in the Coliseum. Also given to all freshmen on Monday were Placement Tests.

On Tuesday, another assembly was held in the Coliseum, this time for the purpose of acquainting the new freshmen with the student health services, the ROTC training, and the traffic regulations. Tuesday afternoon the freshmen met the deans of their respective schools, with the purpose of each dean being to explain to them further the objectives of their schools.

The evening session on Tuesday was primarily concerned with acquainting the freshmen with the functions of the College Union and the Inter-Dormitory Council. With Paul Essex, president of the College Union, presiding over the meeting, the many features of dormitory life will be reviewed.

Yesterday, the new freshman class underwent their usual physical examinations in the morning and afternoon, and attended an evening session at the College Union. The subject of the assembly at the C.U. was to better acquaint the Freshmen with the various extra-curricular activities at the disposal of the State student body.

Today was the registration day for all the freshmen and new students. Plans for the next three days include many social events sponsored for the most part by the College Union. The Orientation Week will end Sunday with all students being invited to attend services at the church of their choice in Raleigh.

The Student Orientation Committee, headed by Gilbert Allgood of Washington, N. C., is comprised of more than 100 upperclassmen here at State, who returned to school last Sunday to prepare for this week. (For a list of the student group leaders, turn to page 9.)

Dean Shirley Tours USSR Educ. System

State's Dean of Faculty, John W. Shirley, is currently traveling in Russia in the Educational Exchange program.

The purpose of the trip is to study the educational system of the Soviet Union. The group represents all grade levels, from kindergarten to college; Dean Shirley's particular field of investigation will be the engineering and technical systems of education in the Russian schools.

The tour will last five weeks. During that period, the group will spend two weeks in Moscow interviewing the various ministers of education, sports, etc. Also planned is a tour of the educational institutions within Moscow itself.

The group will study the overall Russian culture, such as the religious activities, sports programs, the museums, the industrial complexes, etc.

Dean Shirley will be taking many pictures while in Russia, and The Technician plans to run some samples upon his return.

Moscow University held particular interest for Dean Shirley; it is the tallest building in Russia, and claims to have a library larger than our Library of Congress.

State Administration Insures Relationship

In order for any college to run efficiently, while at the same time maintain a certain degree of fellowship between the faculty and the student body, there must be men whose primary objective is to insure this relationship.

The men who fill this capacity here at State are constantly on the lookout for ways to make this relationship better. Because there are so many intricate parts of college life, and so that no one man will have more than his normal share of duties to perform, their functions are proportioned, giving each sufficient time to serve the college and the students in his best capacity.

Carey H. Bostian, the Chancellor of State College, has the most grueling job on campus. It is his job to see that all functions of the college are carried on in a way that will put State in the best eye of the public. Also the Chancellor is responsible for seeing that the policies of the Greater University are carried out in good style.

The Dean of the Faculty here at State College is John W. Shirley. It is the duty of Dean Shirley to coordinate the functions of the administration and the faculty and to insure that they are able to work together in the best interests of State College.

The Dean of Student Affairs is James J. Stewart, Jr., who is in charge of, and responsible for coordinating all student ser-

VICES. Another function of this office is to compile records of all students during their stay here, primarily concerning their contributions to the college in the realm of service.

Under the direction of K. D. Raab is the entire admission and registration facets of State College. Besides these duties Mr. Raab's office is responsible for keeping all academic records of students here and for furnish-

(Continued on page 12)

-Notices-

The Alpha Zeta Book Exchange will be open Thursday and Friday, September 11 and 12, and the entire week of September 15-19. It will operate each of these days from 12:00 Noon until 6:00 p.m.

The Young Democrats Club (YDC) will meet Wednesday, September 17, at 8:00 p.m. in the College Union. All interested students are urged to attend. The YDC meets every first and third Wednesday at 8:00 p.m. in the College Union.

Extra-Curricular Activities Offer Open Field To Students

The incoming freshmen will be met with many offers and suggestions for their participation in campus activities.

In their orientation program, Joe Frosh will learn just which activities suit his particular needs and desires. The suggestions will run all the way from participation in social fraternities to joining the various technical societies.

Two of the leading organizations are the YMCA and the College Union, both needing many people to assist them in serving the college. Brief features on both of these organizations appear on succeeding pages.

The social fraternities last year (of which there are eighteen) claimed a total membership of over eight hundred men. This year, over four hundred new students indicated an in-

terest in rushing fraternities, and the various houses are anticipating record pledge classes. An editorial concerning fraternities appears on page 3 of this issue.

Many students believe that the technical and professional societies associated with their particular major give valuable insight and contacts in their chosen fields.

There are many service and honorary organizations on campus; the ambitious freshman will work toward the opportunity of belonging to these groups.

The many campus publications offer interested men the opportunity to express themselves in various capacities.

Each major school has its own publication; the three major publications are *The Technician* newspaper, the *Agromeck* year-

(Continued on page 12)

To House 400 Men

New Dorm Open For Business

Rooms in the South wings of the new dormitory on West campus were opened to students for the first time yesterday afternoon. The two wings will house approximately 400 men in two-man rooms.

The North wings and the recreation area of the dormitory are not yet ready for occupancy. Students who have reserved rooms in these wings have been assigned temporary quarters in other dormitories. The exact date of completion of the two unfinished wings is not known, but housing officials have expressed hope that it will be in the very near future, possibly only a week or two.

The new dormitory is located on the corner of Dunn Avenue

and Dan Allen Drive. Construction was begun on the ultra-modern structure in June of 1957, when fully completed the dormitory will house 820 men. The building has four wings made up of suites of four rooms.

Each room is equipped with built-in beds with innerspring mattresses, dressers, built-in study desks, book shelves, and a bulletin board. The ceilings are of acoustical tile, and the floors are asphalt tile. The furniture is made of maple with a special durable finish.

The central area of the new dormitory will house the dormitory office, student lounges, recreation rooms, mail rooms, laundry pick up stations, and a grille room with soda foun-

tain snack bar. This area is among the portions of the dorm which have not yet been completed.

The cost of the new building will be approximately two million dollars. The structure was built under a loan from the Federal Housing and Home Finance Agency, with the assistance of the Budget Bureau of North Carolina. The architect for the new dorm is Leslie N. Boney of Wilmington, N. C.

Although the South wings of the dorm have been occupied, mail boxes have not yet been installed. N. B. Watts, Director of Student Housing, has stated that the college will endeavor to see that mail reaches these students as quickly as possible.

Shown above is a shot of the New Dormitory, taken from the Agricultural Testing Laboratories on Western Boulevard. The dorm, of which the two wings in the foreground are finished, will house approximately 800 men. The completed portions contain facilities for about 400 men. Photo by Kjosnes

To the Freshmen . . .

You, the freshmen, constitute the most important class at N. C. State College.

We are looking to you; the freshmen, to bring our campus a whole new, fresh approach to campus life.

It is with hope and keen anticipation that we greet you at the start of the 1958-59 college year. Each fall, the upperclassmen eagerly look to the freshmen for new ideas . . . for new leadership . . . for new initiative in striving to make State College one of the most respected institutions in the country.

You have an unusually great opportunity before you. For as you come to State College, you will discover that growth is its outstanding characteristic; your opportunity lies in growing with your school.

Many of us wish we were in your position, just starting at State. Never before has a year started so full of real promise for the future.

State has completed plans for launching the most ambitious long-range expansion in its 70-year history . . . an expansion in its physical size, in the size and quality of its staff, in its service to students . . . an expansion in its role of top educational center for North Carolina.

You are being initiated into college life by an orientation process unique in State's experience. We hope you will pay close attention to those who will advise you during this 'breaking-in period'. The success of the freshman class in acclimating itself to the college atmosphere will in great part determine the success of State College in the next four years.

We know by now you are growing a bit tired of advice . . . but suffer us to put in our word:

Well-trained technical men are still badly needed in business and industry. However, employers today increasingly are searching for the college graduate who can do much more than derive formulas and quote technical facts . . . they are searching for people with a broader background than that gained from formal study alone.

Undoubtedly, your first responsibility is to your academic work. But let us urge you to broaden your education by participating in the varied extra-curricular program here at State.

Every one of you can find outside interests which will fit both your abilities and your inclinations, interests which will make these next four years (we're optimistic!) much more valuable to your future careers.

It's going to be a full year . . . and if you will give of yourself to State, State will give back abundant reward.

THE TECHNICIAN extends to you a warm, sincere welcome . . . we wish you high success.

—RL

LITTLE MAN ON CAMPUS

SOMETIMES I THINK THE MATH SECTION OF THIS TEST IS A LITTLE TOO ROUGH.

To All State College . . .

The Technician, 1958-1959

Before the school year gets into full swing, we are taking this opportunity to clarify the policy which we of THE TECHNICIAN will follow during 1958-59.

In our mind, it is extremely important that the editor and his staff of a college newspaper avoid—at all costs—the temptation to 'slant' the news in favor of any campus faction. We have an obvious responsibility to treat all campus news, events, and problems without prejudice.

In the past, many people have pointed an accusing finger at our vague policy. They have said ". . . all you do is gripe . . . why don't you use the 'positive' approach" or, on the other hand have said ". . . your paper is nothing but an organ of the administration, sanctioning their every move and decision."

This year, we are determined not to publish a gripe sheet. At the same time, we will not hesitate to speak in clear denunciation of any situation which is unfair either to the students or to the faculty.

This year, for the first time in the history of THE TECHNICIAN, every member of the faculty will receive each issue; also, they will

have the opportunity to express their opinions through the medium of the student newspaper. If the faculty do not take advantage of their opportunity, it will be known that we at least tried to keep the paper from being 'one-sided.'

We urge each and every organization on campus to take the initiative in getting their news in to our paper; because of our limited staff, each organization should appoint a reporter . . . otherwise, your news may not appear in print.

We are asking for your support and cooperation. We welcome your opinions, and we are eager to have a large section each week devoted to 'Letters To The Editor'.

There are many issues which have been ignored or considered 'taboo' in past years. This year, we intend to examine all such issues in the clear, revealing light of honest reporting.

We will make mistakes, and when we do your criticism will be welcomed, in all sincerity.

Other people and other organizations will make mistakes too . . . we can only hope our criticism will be accepted with equal sincerity.

—Roy Lathrop

WAY OUT . . .

with John Cocks

I was sitting at home in our front yard one morning a couple of weeks ago drinking Bloody Marys with my grandmother.

We had both been out late last night at this tremendous party and had managed to cultivate real class-A hangovers. We were just sitting there drinking and wishing we had some aspirin, when the postman came up the walk dragging a train of mail bags behind him.

"Mr. Joe Frosh?" he asked.
"Yeh," I said. "That's me."
"Got a little mail for you. These three bags."

"My God," I said. "All that?"
"Yep." He turned around and left with a tired look on his face.

I looked at all the crap he had left and said, "Hey, Granny, help me dump this stuff out."

She lifted the compress off her forehead and got up and staggered over. Together we emptied the bags on the lawn and then stepped back and stared at it. Then all of a sudden the sun

went out. I glanced up at the sky and saw that a huge black cloud had just come up over the horizon and eclipsed the sun. "Oh Beans, Granny. We better hurry up; it's 'gonna rain," I said.

I picked up one of the envelopes and looked at it. It had this picture of a real modern red and black building on it and had the words "College Union, N. C. State College, Raleigh, N. C." Then I saw that all the other letters had the same thing on them and I opened the one I had and took out the sheet that was inside.

It was mimeographed in red ink on green paper and had this written on it:

"Join! Join now! The Sexual Relations Committee of the College Union needs YOU!"

"IMPORTANT WORK must be done NOW in establishing better sexual relations between the co-eds and the male students and between the male and female faculty members!"

"We are pressing Student Government and the Board of Trustees to set up co-ed dorms and provide after-hour parking areas in the woods near Western Boulevard!"

"In addition, we are asking the faculty of the Sociology Department to set up several SEX-LOGY courses, all of which should prove to be very enlightening to members of both sexes!"

"We need YOUR HELP, so send in your \$50 registration fee TODAY!"

Oh Great Ike, I thought, and I crumpled the letter up and threw it back on the pile. Then it started to rain like hell.

"Come on Granny, let's get inside," I said.

"But all this mail. It'll be ruined!"

"Let it," I said. I grabbed her hand and we stumbled up the front steps and into the house.

NOTICE!

All interested in working in some capacity (Wow!) on the staff of THE TECHNICIAN are asked to come by the offices on Wednesday night, September 17, between 8 and 12 p.m.

Our offices are located in the south end of 1911 Building, in rooms 137-140.

At that time, we would primarily like to find out what you can do, want to do, experience you have had (not necessary), your name and address.

We especially invite those who can type and/or have fair fluency in the English language and get their kicks from working long hours for no pay.

Agromeck Pictures

Yearbook Photo Schedule

You have already paid for this picture through your college fees.

Where: Pullen Hall, coats and ties required.

When: Seniors — Mon.-Fri., Sept. 15-19.

'The Fraternity Way'

From the Files

During the summer months, each of you incoming freshmen received a brochure from the Interfraternity Council, explaining the functions of a fraternity in the general college set-up and also briefly acquainting you with each of the fraternities here at State.

Although this brochure went far in explaining and answering many of your questions concerning fraternity life, there are probably doubts still in your minds about costs, and general worth, of a fraternity.

First of all, you will find that a fraternity, not only here at State, but at any school, costs only as much as an individual wants to put in it. The only cost, outside of food and lodging, (which is essential anyway), is the payment of national and local dues.

In return for these token payments, a student gets the feeling of *belonging*, not only to another gang or group of guys, but to a group of men who share each other's every day lives, and who are willing to help each other at all times with any problem confronting one of the men.

Besides these things which a man gets from a fraternity, there are tangible rewards also. It is a place where a man can take his best girl without any fears of something malicious befalling them. He can sit in a comfortable chair and read the daily paper, well aware that he is among brothers who are all striving for a common goal.

This is the inner part of a fraternity, but not all of the functions of the fraternity are centered around its own house. Each Christmas, many fraternities here at State sponsor parties for the under-privileged children of Raleigh.

There are also different drives during the year for worth-while organizations in which the fraternities of State band together to reach the goal.

To know that you are a part of making many people "belong" is indeed a heart-warming feeling; and to know that you banded together with men just like you to produce this belonging is even more rewarding.

Freshmen, think about fraternities. There is a fraternity here at State for every man in the student body. All he has to do is show that he is interested. . . . That interest will be returned in full. —JM

Five years ago, 1953

Dr. Carey H. Bostian assumed his duties as chancellor of N. C. State College, after 23 years of service to the college in the teaching.

Record-breaking freshman class of more than 1200 students arrive. Total enrollment expected to exceed 4100 this year.

The world's first nuclear reactor to be used exclusively for the peacetime development of the atom was installed at State.

Ten years ago, 1948

The talk of the campus is the upcoming game with the Duke Blue Devils. Aside from the usual articles, there is one advertising a "Beat Dook" pep rally, over which "Miss North Carolina", of 1948, will reign.

All campus publications were having the same trouble as they are having now. . . mainly getting some men interested on working on their staffs.

Fifteen years ago, 1943

Due to the heavy draft calls, the enrollment of State dropped from 2500 in 1942 to 982 in 1943. This number designates only the civilian students and not those who are here in connection with the Government.

Malcolm E. Campbell takes over the post of Dean of the School of Textiles with the resignation of Dr. Thomas Nelson, who has retired after 42 years of service.

Twenty years ago, 1938

Construction of two new dormitories, Becton and Berry, was begun this summer. They are part of a \$1,400,000 building program planned.

Coach Doc Newton prepares his squad for the season opener with the Davidson Wildcats.

Top Men On Campus Lead State College Student Body

by Jim Moore

Again this year as in years past, the student body of State College will be led by the top men on campus, not only scholastically, but also in the realm of character and service.

It is the duty of these student leaders to work with the administration and the faculty of State so that they, with the help of the students, can make State a better school from the viewpoint of both the ones here at school and the outside world.

These student leaders are many. They serve in every capacity from president of our larger organizations to the program chairmen of the smaller ones. But the one thing that all of these men have in common is that they are working to do their part all the time, no matter what capacity in which it may be.

Perhaps one of the most well-known students here at State is Jim Hunt, president of the Student Government. It is the duty of the president to preside over all mass meetings of the student body and to appoint standing committees for the legislature. It is also his duty to see that the elections are carried out in accordance with the manner prescribed in the Constitution.

Eddie Knox is the man who will serve this year as the vice-president of the Student Government. Beside acting as presi-

dent in the absence of Hunt, Eddie will preside over all meetings of the Legislature.

The heads of the YMCA and the College Union are two more men here at State who have, under their leadership, integral parts in the smooth running of our College. Fred Manley, president of the YMCA, is responsible, along with the Coordinator of Religious Activities, for providing the students of State with a full religious program to go along with the social and cultural programs which are taken care of in other ways.

One of these other ways in which a student's social and cultural development is given opportunity to expand is through the College Union. This year the president of the C. U. is Paul Essex. It will be Essex's job to see that, through various committees, each with a specific task, a majority of the students can be exposed to the way in which the C. U. leads a student to a richer and fuller college education.

Also important in the general set-up of the college program are the presidents of the I.D.C. and the I.F.C. The Interdormitory Council will be headed this year by Leonard Dean, whose duty it will be to coordinate all functions of the dormitory residents in the social, recreational, and athletic realms.

This year's Interfraternity president is Larry Carter. Besides being responsible for the success of the two I.F.C. dances, it is the duty of Carter to work

to see that a better relationship between the people of Raleigh and the social fraternities is attained.

The men who are in charge of the various publications here on campus also contribute much to the success of the general college program. *The Agroneck* editor this year is Ralph Boswell, who will be in charge of producing a yearbook of interest to the parents and friends of the students, as well as the students themselves.

WKNC, the student radio station here on campus, will be headed this year by Edward Finch. This station presents many interesting features on its program, as well as good 'studying' music for students on most nights of the school year.

The Technician, with Roy Lathrop at the helm, is the semi-weekly newspaper of the students at State College. The role of the paper is to present the news of the campus, as well as features and editorial opinion on any phase of campus life.

While these men are just a few who contribute to the general welfare of the college, they are perhaps the ones which have the greatest bearing on the actions of the student body and its relationship with the faculty and administration.

In the future, *The Technician* will present several articles dealing with individual organizations on campus in an effort to better acquaint the students with every phase of their life at State College.

Sights and Sounds

by H. R. Hamilton

Feeling that there was no way to satisfactorily spend one week at home, I arrived on campus the night of Saturday, the sixth. I was immediately presented with an insurmountable problem: I had no dormitory room.

Before I left home, I was certain of the fact that I had reserved a room. But, it was easy to see that workmen still occupied my cherished suit in the West Campus dormitory. I envisioned being billeted in the Coliseum for weeks. After several hours of frantic telephoning, I located a housing official who reluctantly (he had to leave home and open his office) assigned me temporary quarters. To this gentleman, I am eternally grateful.

The dormitory to which I was assigned shares its locale with Holladay Hall, the cafeteria, and several other worthy campus landmarks. The stories I had heard about this dormitory! This column does not contain the space to relate these stories. However, as I stumbled through the door, my arms filled with suitcases and clothes, I saw the largest spider I had ever encountered, squatting commandingly in the center of the floor. The stories all came back to me in one flood, and being meek, but particularly deathly afraid of spiders, I spent the night in the park adjacent to our fair campus. I was determined not to return to the dormitory until I had received someone's solemn word that it had been well fumigated and cleaned.

Monday was a new day, and as full of surprises as exam week. I was astonished to see new students walking the campus with the self-assurance of an aged senior. This I assumed

was a result of the newly initiated orientation programs. However, these programs, I feel, may possibly lack something. . . something vital. As an example, I cite:

Having just finished lunch at the College Union, I decided that a walk on the tree-shaded campus would help ease nerves which were frayed during the fight for lunch-line rights. In my wanderings, I was stopped by a freshman clad in carefully fitted, ivy-stripe, grey-green

suit. He inquired the way to The Old Well. I got no further than ". . . twenty-six miles out Hillsboro to the west, through two traffic lights. . ." when he walked off in disgust. A note to this boys room-mate: Please tell him the way. He will be easily recognized, I imagine, when he places his metal Rams head on his desk, dons his light blue crew-neck and asks about the hot and cold running "college beverages" he was supposed to find in the dorm room.

Huge Rocket Engine Planned

An Air Force contract to begin development of major components for a rocket engine in the one million pounds thrust class has been awarded to Rocketdyne, a division of North American Aviation, Inc.

Awarded by Wright Air Development Center after design competition among the nation's rocket firms, the contract began work toward the giant thrusts acknowledged to be essential first steps in manned interplanetary exploration.

Simultaneously, the Air Force under separate contract extended Rocketdyne development of a previously undisclosed engine to provide thrust in the intermediate range between current propulsion systems and the huge million-pound engine. Work in that area has been underway at the North American division since mid-1955.

Both engines named today are liquid propellant systems, similar in principle to Rocketdyne engines for the Atlas ICBM, the Thor and Jupiter IRBM's and the Redstone missile that provided the first-stage boost for the satellite launching Jupiter "C."

Work is being extended that will provide vital experience and refined rocket-engine hardware for application to very high-thrust ranges. It also was applicable to a broad range of significant missions requiring intermediate thrust levels.

Program manager for the intermediate and million pound engines—designated E-1 and F-1 by Rocketdyne—is D. E. Aldrich.

PARENTS!

Dear Parents,

Each year we find that we have many requests from parents of State College students for a subscription to our college newspaper, THE TECHNICIAN. Realizing that all parents are interested in their son or daughter, and his or her associates, we should like to take this opportunity to enable you to subscribe to our paper.

We are currently publishing twice a week, with a four-page edition on Monday, and from a six to ten page edition on Thursday. For the school year of 1958-59 we shall publish fifty-seven issues. Included in the paper are a sports section, columns, an editorial page, photography and campus features, and coverage of all other campus activities and news.

The price of a subscription for a full year will be \$2.75; if you are interested, please fill in the blank below and remit with your check or money order.

We are looking forward to serving you in 1958-59.

Sincerely yours,
Ray Morgan, Bus. Mgr.

Students Find Challenge In Y, CU

YMCA Begins New Membership Policy; Apollo Club Weighs Ethical Problems

The State College YMCA, one of the most active institutions on this campus, is beginning this year with a new membership policy. Now, when a student registers he will receive a membership pledge card. There is no membership fee, but all who are interested in becoming members of the Y are asked to fill out the card and pledge the amount they feel they can give toward carrying out the work of the Y.

Upon accepting the statement of purpose of the YMCA, one becomes an active member, but if for some reasons of conscience one cannot accept the statement of purpose, he may still become a member of the Y as an associate member. Either type member enjoys the full privileges of the Y.

Newest and most promising project of the Y is the formation of the Apollo Club. The club, named after the mythical god of light and knowledge, will promote broader knowledge and intellectual curiosity. The four meetings each semester will be devoted to a dinner followed by a lecture, delivered by a nationally or internationally famous authority on some subject of humanistic interest and importance.

Membership to the Apollo Club is open to any State student who has a genuine interest in the ethical problems of today. A member will be expected to attend regularly and to pay for his meal, which will be a dollar.

Two activities in which the Y has engaged this year are a freshman retreat, which was held September 5-7, and the YMCA cabinet retreat. The cabinet retreat is an annual affair which features the planning of the year's YMCA programs.

Pictured above is the Y.M.C.A. building on the State College campus, the scene of many of the student activities here. This year the Y has changed its membership policy and has scheduled, through its Apollo Club, several outstanding speakers to come here to discuss with the students problems confronting the world today. Photo by Kjosnes

The State College Union, one of the finest buildings of its kind in the South, is shown above. The social activities of most of the students here at State are centered around the various committees and projects which the CU undertakes during the year. The first event on the CU this fall is a Jazz Concert coming this Saturday. Photo by Kjosnes

College Union Launches Activities For Fall With Saturday Jazz Concert

The State College Union will begin its fall activities on Saturday afternoon with a jazz concert in the Union Ballroom at 3:00 p.m. All students and their dates will be admitted free to the two-hour concert which will feature "the Jazz Journeymen."

The Union is also planning a dance for 8:00 p.m. Saturday night. Approximately 300 girls from W.C. are scheduled to be on hand for the dance. Harold Nall and his orchestra will furnish music for the occasion. All men will be required to wear a coat and tie to the dance.

Students will be admitted to the dance by displaying their registration cards.

The College Union has also released plans for many other weekly activities. These events as well as the facilities of the Union building are open to all students.

These weekly activities are as follows: Free Movies—each afternoon and night on Saturday and Sunday; Bridge Lessons for Beginners—beginning Tues., Sept. 16, 7:30 p.m.; Social Dancing Lessons—Thurs., Oct. 2, 7:30 p.m.; Copper Enameling—each Tues. at 7:30; Ceramics Lessons—each Wed. at 7:30 p.m.; Duplicate Bridge—each Wed. at 7:30; Short Course in Photography; and Sunday Afternoon Record Concerts—in the music lounge at 4:00 p.m.

The Union committees are open to all students. These committees will sponsor dances, concerts, lectures, plays, and social activities throughout the year.

Rush Week Plans Announced; Visiting To Start Thursday

State's social fraternities will begin rushing on Thursday, Sept. 18, when visiting days begin. During visiting days students will be given a chance to visit and become familiar with the various fraternities.

Visiting days will be followed by sign-up days at which time students will be given the chance to sign-up for rush functions with the fraternities of their choice. Formal rushing will begin on Wednesday, Sept. 24. At this time, rushees will begin attending the special functions sponsored by the individual fraternities.

Below is the complete rushing schedule:

Visiting: Thursday—6-10 p.m., Sept. 18; Friday—6-10 p.m., Sept. 19.

Sign-up days: Sunday—2-10 p.m., Sept. 21.
Monday—2-10 p.m., Sept. 22.

Rushing: Wednesday, 12 Noon-10 p.m., Sept. 24;

Thursday, 12 Noon—10 p.m., Sept. 25;
Friday—12 Noon-12 Midn., Sept. 26;
Saturday—12 Noon-12 Midn., Sept. 27.

Interfraternity Council rules require that each rushee visit a minimum of four different fraternity houses during the visiting or sign-up period in order to be eligible to pledge a fraternity that semester.

Fraternities are not allowed to contact any freshman, directly or indirectly, until after visitation period has begun. This is with the exception of formal invitations which the fraternities are allowed to send out. Also, after rushing is over, the fraternities are not allowed to contact any rushee until 12 noon the following Saturday.

The social functions sponsored by the fraternities during Rush Week will be governed by the following rules: (1) There shall be no parties, either in or out of the fraternity houses until the Friday night of Rush Week.

(2) Functions before Friday night will be held in the houses, with no girls or combos attending.

(3) Non-alcoholic refreshments or soft drinks, may be served.

(4) Such entertainment as speakers, movies, slides and skits may be presented during the week of Rushing until Saturday night.

(5) There will be no meals served to rushees during the visiting or sign-up days.

Any fraternity which does not abide by these and other rushing rules may be punished by the Interfraternity Council.

L. L. Ray Predicts: State Income In Excess of \$800,000

Total income from the foundations supporting North Carolina State College this year will reach a record-breaking peak of approximately \$800,000.

The prediction was made Tuesday by L. L. Ray, assistant to the chancellor and director of foundations at State College, in a talk at the semi-annual meeting of the college's Development Council.

C. A. Dillon of Raleigh, council president, presided and declared, "State College has made remarkable progress in the last 10 years—in all directions."

The meeting was highlighted by reports from the presidents of the foundations, officers of the Alumni Association, and other groups supporting the college. The reports all told a continuing story of the support given to State College each year by the more than 300,000 individuals and firms who are participating in various programs aimed at the long-range development of the institution.

Edwin A. Clement of Raleigh, president of the North Carolina Engineering Foundation, said his organization began the year with an objective to raise a quarter of a million dollars in 12 months. Current progress toward the goal now indicates that it will be surpassed. Approximately \$230,000 already has been contributed, he said.

Wolfpack Coach Begins Fifth Successful Year

When the State College Wolfpack opens its 1958 football season September 20, Coach Earle Edwards will begin his fifth year as head coach and strategist of the Atlantic Coast Conference Championship team. Under Coach Edwards' keen leadership, the '57 Wolfpack squad won the ACC championship, and Coach Edwards was named ACC "coach of the year." Coach Edwards masterfully led his team, rated as the conference darkhorse at the beginning of the season, through the stiffest of competition to grab the coveted crown. In addition to winning the title and being named "coach of the year," Coach Edwards can boast of State's first All-American player in many years.

EARLE EDWARDS

Coach Edwards came to State College in February of 1954, and in his four years as head football coach he has compiled a record of sixteen wins, twenty-one losses, and three ties. Under his supervision State College football has attained a position of national recognition, and the Wolfpack teams have shown a marked improvement. The football squads turned out by Coach Edwards have steadily climbed into the ranks of the nations top powers.

Since his appointment as head coach of the Wolfpack, Coach Edwards has turned out several fine teams, highlighted by last year's ACC champs, and his football squads of the future are expected to make quite a name for State College. Certainly, State College and its many supporters owe to Coach Edwards a tremendous "vote of thanks" for a job well done.

Soccer Team To Begin Workouts

The State College soccer team, under the direction of Coach Bill Leonhardt, will begin workouts soon in preparation for the 1958-59 season. The Wolfpack squad will open its season Saturday, October 4, against Maryland. Coach Leonhardt has high hopes for his boys, and is expecting a successful year, continuing in much the same winning way as last year's squad.

Last season's soccer team ended a perfect season with a record of four wins against no losses. Prospects this year are looking good, as there will be seventeen returning men from last year's winning team, and Coach Leonhardt expects to pick up quite a few valuable candidates as practice sessions progress.

This season's soccer picture seems to be promising to the Wolfpack supporters. Coach Leonhardt has a host of returning lettermen from last year's squad, and quite a few outstanding new faces. His only concern will be in defensive play this year due to the loss of two key men, but this concern is short-lived as we examine this year's newcomers, who will be filling the gaps left vacant.

Offensively the squad looks very promising, and Coach Leonhardt is looking toward the coming season with optimism... says he of his offensive play,

"We're going to score some goals this year."

Coach Leonhardt looks favorably at the roster of returning lettermen for this season. He is expecting big things from such men as the Alber brothers; Glenn, Derek, and Dennis. At the top of his list we also find Glenn Hampton and Frank Trotman, and other names such as Jim McNatt, who was injured in the first game of the season last year, and will be returning for the first time this season. Boric Brodsky, who was ineligible to play last season will be back on the roster this year.

Coach Leonhardt has announced a meeting of all students, who may be interested in playing soccer and going out for the team, for Tuesday night, September 16, to be held in the Band-room of Frank Thompson Gymnasium. He urges everyone who is interested in soccer to attend this meeting, and to attend the first scheduled practice, Wednesday afternoon, September 17, at 4 o'clock. The practice session will be held on the old baseball field located behind Reynolds Coliseum.

Wolflets Begin Grid Practice

Out to greet Coach Johnny Clements for the beginning of workouts Friday morning, September 5, were forty-two candidates for the Freshman squad. Taking over as head Frosh Coach in the absence of Coach Bill Smaltz, Coach Clements will get down to some serious work in preparation for the Wolflet's opener with Clemson October 3.

Coach Smaltz has been called upon to assist in the varsity workouts, due to the large number of sophomores who have been moved up to the varsity. Because of his knowledge of the many sophomore candidates, Coach Smaltz has been appointed as a varsity assistant coach.

The Wolflet Squad, who finished last season with a very impressive record, will play a five-game schedule this year (this schedule is posted on this page of the Technician). Winner of four out of five games last season, the Wolflets go into the 1958-59 season hoping to continue in their winning ways.

Of the forty-two candidates reporting for practice, we find that North Carolina is represented by twenty-two members of the squad, followed by Pennsylvania with a representation of fourteen boys. The entire roster of the Freshman squad will be printed in the Technician at a later date, as will be a complete roster of the varsity squad.

A Preview Look At ACC Foes

Looking around the Atlantic Coast Conference for the coming season, we find that the Wolfpack is up against a host of formidable foes in their attempt to protect the ACC championship. To retain their title, the State College squad will have to put up a stiff battle against some strong competition.

Rated as the team to watch in pre-season predictions, Clemson opens its season September 20 against Virginia. Coach Howard believes that he has the best material on hand since taking over as head coach in 1940, and according to all predictions he may be right.

Right in the thick of the battle we find the Tarheels from Carolina. Rated by many to take the conference title, it seems that the race will be a hot one between these two contenders. At Wake Forest, Paul Amen seems enthusiastic over his squad this season, as he was heard to say, "This club would push the 1957 varsity right off the field." The Deacon's outlook is still a questionable one, as Coach Amen will readily agree.

Coming to Duke, we see the Blue Devils taking a back seat for the present, but according to many authorities, don't be

CAPTAIN BILL REARICK . . . an All-Conference performer last year, leads the Champion Wolfpack into its sixty-seventh season. Recently chosen on the pre-season Academic All-American squad, Bill excels not only on the gridiron, but in the classroom as well. A senior in engineering, he is finishing his football career at State College this season.

ACC Champs Prepare For Season Opener

Pack Invades UNC For Season Opener

The North Carolina State Wolfpack, last year's Atlantic Coast Conference Champions, will open its sixty-seventh football season against the Tarheels from the University of North Carolina, September 20 at Chapel Hill. For both teams, this contest will be, not only the season-opener, but a continuance of a long remembered rivalry. The Tarheels will be out to avenge last year's 7-0 defeat at the hands of the Wolfpack, and the State gridders are expected to have a real battle on their hands.

This year's Wolfpack team will be tackling quite a job in attempting to measure up to the standards set by the 1957-58 ACC Champion team. Coach Earle Edwards, head Football Coach, seems to have the toughest job in trying to field a strong team from the many newcomers to the squad. Coach Edwards says that this year's team will definitely lack the experience of last year's squad, a major factor in the success of any team, and that, "our success will have to depend upon the play of the newcomers."

Coach Edwards, beginning his fifth season as head coach of the Wolfpack, declares that, "Our prospects are a cloudy issue. We lost eighteen boys from last year's championship team, including some of our most prominent players." Citing heavy personnel losses and inexperience as the main reasons for the not-too-clear outlook for '58, Edwards states, "We lost eight of our eleven starters and sixteen of our first twenty-two. That leaves a lot of gaps to be filled, and our success will have to de-

Coach Earle Edwards, last year's ACC "Coach of the Year," talks it over with a few of his Wolfpack squad. The Atlantic Coast Conference Champs open their season against the Tarheels from Carolina, September 20. In preparation for

the big opener, Coach Edwards has been running his squad through a tough schedule. The defending title-holders are up against some real competition this season as they prepare to defend the coveted crown.

pend upon the play of the newcomers."

Despite the heavy sprinkling of rookies throughout the squad, Edwards is not pessimistic. "I think we could have a good team, and I'm fairly confident as I look forward to '58. However I realize that a good season, won-and-lost-wise, depends upon the strength of the opponents. We have ten tough ones coming up, including all seven of our Atlantic Coast Conference foes."

Out to greet Coach Edwards for the start of the 1958-59 season will be fifty-eight candidates for the Wolfpack squad. Coach Edwards commenced practice September 1, and for the next week a busy schedule will be followed in preparation for the all-important game September 20. Included in the candidates will be fifteen lettermen from last year's ACC championship team; the remainder will be comprised of thirteen seniors, nine juniors, and thirty-six sophomores.

The Wolfpack squad will be held to a strenuous routine of workouts and practice until the big opener with Carolina. Owing to the inexperience of his candidates, Coach Edwards is being compelled to work his boys hard. When the Wolfpack travels to Chapel Hill to meet the Tarheels, there can be no doubt in the mind of any State College supporter . . . the State squad will be ready!

KEN TROWBRIDGE . . . Shown here warming up for the role which he will be called upon to perform this season. Having the unenviable task of taking over the HB position left vacant by All-American Dick Christy, Ken will also be doing most of the squad's kicking.

Sophomores To See Plenty of Action

It is safe to say that the sophomores will see plenty of action during this 1958-59 season. The rookies dominate every position except fullback, where only two of the five candidates are sophomores. Of the top thirty-three players listed by Coach Edwards at the beginning of practice last week, we find fifteen sophomores are listed. "We are proud of our sophomores," Edwards says. "The high places they have obtained on our squad is evidence of their potential. I feel sure we've got some Christys and Hunters in the backfield and other All-America prospects in the line."

To briefly run down the roster of the 1958-59 Wolfpack squad, we find five members of the squad who appear to be our best bet for grabbing the headlines. Ken Trowbridge and Ron Podwika have the unenviable tasks of taking over for All-American Dick Christy and speedy Dick Hunter, two of the finest halfbacks ever in Wolfpack history. Both Trowbridge and Podwika performed admirably on the second unit last year and should do well as starters.

Heading the list of guards on the Wolfpack team this year will be Bill Rearick, an All-Conference performer last year and Captain of this year's squad. Rearick, who excels on the gridiron as well as in the classroom, is the hardest hitter in the Wolfpack lineup and ranks with the best in the nation.

Teaming with Rearick at guard will be Joe Rodri, who appears to be a leading candidate for post-season honors. Bob Pepe will also rank high in the race for post-season all-star honors. Pepe, a senior, has been a starter since he was a sophomore and played in all the Wolfpack games last year despite a broken wrist. He is an excellent pass receiver and a tough defensive performer.

Elsewhere in the lineup we find positions filled by such candidates as would give supporters little reason for worry. Starting at quarterback will be Ernie Driscoll, and the twosome of Driscoll and Cackovic is one of which will give any opposing team good reason for concern.

Paul Balonick will have the starting center position all to himself, but the rugged pivotman can count on dependable help if he needs

At fullback we find Don Ha-

fer, who is a hard-running letterman from last year's team. Other names on the roster will include Frank Marocco and Jim Sherron at guard; Kelly Minyard, Larry Dixon, and John Lawrence at tackle; and Jim Crain at end. All these are returning lettermen.

Of particular interest to State College fans will be the name of William "Whitey" Bell, which will be added to the Wolfpack roster this season. "Whitey," the well-known State basketball star of wide-spread fame, was invited to come out for practice.

Long - Range Development Plan Unveiled

After a year of intensive proposed physical expansion, work, involving scores of educators, architects, traffic managers, and engineers, State College has completed its long-range plan for expansion and development.

Shown on the model are the following expansion plans:

Pictured on this page are a three-dimensional layout of the

ern Boulevard, with spaces available for about twenty-three houses. The Court would be reached through a special roadway which would not interfere with the Boulevard traffic.

(1) The Fraternity Court, located on the south side of West-

Above can be seen the three-dimensional model of the long-range expansion plan. At upper left you will notice the area designated for Fraternity Court; area at right of picture will contain

all academic buildings.

Below is the unique design model of a circular classroom building, employing the latest methods of handling traffic flow. —Staff photo

for special short courses. Also in this group of buildings, we find an ultra-modern auditorium to handle all types of lectures and entertainment (Upper left).

(3) Eight new dormitories, each eight stories high with self-service elevators, most of them occupying the space now held by Vetville.

(4) A new Student Center to replace the present College Union, including a cafeteria and an enlarged ballroom (located at right center, immediately in front of the new West Campus dormitory).

(5) The new, already-planned gymnasium, with huge new indoor pool adjoining with seating capacity of 1600 (located on site of present baseball field, next to tennis courts).

(6) Several new classroom buildings, including the circular one shown on this page, to be built beside Williams Hall in back of the College Union building.

(7) A student shopping center in front of Tucker, Owen, Turlington, and Alexander dorms.

The traffic flow will be drastically altered, with many of the present streets being eliminated entirely (example: street running in front of Coliseum will be a walkway, with traffic flowing into the parking lots from the rear).

At the present, it is unclear just what will be done about Riddick Stadium. The most prevalent idea is to move the stadium

facilities to the State Fairgrounds, where parking will not present such a problem and the campus will be freed of great traffic influxes.

The circular classroom building is of unique design, so constructed that students will move into and out of the building in the easiest manner possible, by ramps rather than stairwells. It is so designed that additional space can be created by the expedient of adding floors. The area under the dome will contain a student lounge and reading room.

Everyone at State College can be proud and pleased at the unveiling of this tremendously ambitious plan. Our congratulations go to all those who have worked so hard for so long to make this "dream" campus of the future just around the corner from reality. Dean Hickman has led a fine group doing a fine job.

Impressive Improvements

By Chuck Lombard
Students returning to State this semester will notice many improvements in campus facilities effected during their absence. Among these improvements, which are part of a long range campus development project, is a \$179,000 street improvement program.

The new road which was recently constructed by the tower is shown at left.

Below this is shown the road improvements which are now being carried out in front of the Reactor Building.

Another important improvement from the student point of view is the campus-wide landscaping project. Joining the college in this endeavor is the North Carolina Nurseryman's Association, who members have already contributed more than \$10,000 in plants, shrubs, and trees.

Several of these campus improvements are shown on this page.

The steps in the upper left were given to the college by the Senior Class of 1958. The steps are located behind the library on the same site as the previous slippery bank.

The construction shown above is for improvements to State's electrical system. The college recently suffered a major electrical failure.

At upper right is shown the parking area which has been constructed beside Holladay Hall.

Ag Research Awarded Grant

For the third consecutive year, the Agricultural Experiment Station at State College has been awarded a \$5,000 grant by Philip Morris, Inc., of Richmond, Va.

The presentation of the grant to State College was announced recently by Dr. D. W. Colvard, dean of the School of Agriculture.

Since 1956, the company has made annual contributions of \$5,000 to State's tobacco research program or a total of \$15,000.

Dr. Colvard received notification of the latest grant from Dr. Robert N. DuPuis, vice president for research and development of Philip Morris, Inc. The funds will be used to carry on the Experiment Station's tobacco studies, which are designed to benefit all segments of the tobacco industry.

Dean Colvard said contributed funds have made it possible for the college to plan, initiate, expand, and conduct tobacco research to obtain information on the solution of urgent production problems which otherwise would not have been feasible.

As a result of contributions, the investigations, Dean Colvard said, have been carried out through the acquisition of well-trained professional and sub-professional personnel and the procurement of essential equipment and supplies.

Southern Engineer Staff

Students elected to the staff of The Southern Engineer, official magazine of students in the School of Engineering at State College, for the next academic year are shown here. Top row, left to right: Frank S. Scarpa of Raleigh, civil engineering junior, editor; and James R. Currie of Ogdensburg, N. Y., industrial engineering freshman, business manager. Bottom row, left to right: Robert J. Solomon of New York City, electrical engineering junior, managing editor; and Albert C. Wilfong, Jr., of Claremont, N. C., mechanical engineering junior, circulation manager.

1958 State Engineering Graduates Receive Average of \$460 Monthly

Despite a year of uncertain economic conditions and a rise in unemployment figures throughout the nation, placement of State College's 1958 engineering graduates reflected a picture of stability.

So pointed out Dr. J. Harold Lampe, dean of the School of Engineering, on July 16 as he released the school's annual Placement Report.

Of the 395 engineering graduates in June, 317 accepted employment, 42 plan to attend graduate school, and 28 entered military service. The majority of the remaining 8 had offers of employment, but up to report date had not made a decision.

In comparison, out of last year's 300 engineering graduates at State College, 247 accepted employment, 27 entered graduate school, and 8 entered military service.

According to a survey by the Engineering Manpower Commission of the Engineers' Joint Council in May, this stable situation in engineering placement prevailed in 104 of the country's accredited institutions and in 28 others.

"The demand for qualified beginning engineers is as great as ever," said Dean Lampe, "and our students in the top half of their class had as many, and in most cases better, job offers as before."

The 250 companies and government agencies which visited State College this year placed "greater emphasis on good scholastic records and demonstrated leadership, and on selecting good employees more than on selling the students on the company," according to the annual report prepared by Placement Director William H. Simpson.

Forty-nine of these companies were from North Carolina. Figures show that 39 per cent of

this June's graduates accepted employment in North Carolina compared to last year's 31.5 per cent.

"More and more of our engineering students," Dean Lampe said, "are electing to remain in the State as more industrial opportunities are made available."

In an effort to interest more of the State's industries to look to the School of Engineering for their technical needs, more emphasis was placed during the year on the visitation program. Simpson made 215 visits to North Carolina companies, large and small.

The average salary of the 1958 June graduate was \$460 a month. Simpson reports that this is a little better than last year's \$456 average. Salaries ranged this year from \$373 to \$650 a month.

Among the leading industries employing the beginning engineers were the electrical and electronics, aircraft, and construction.

In reviewing the placement activities for the entire year, Simpson announced that 5,192 individual interviews were scheduled—the largest number ever in the history of the school. Senior and graduate students accounted for 4,758 of these interviews and 434 interviews were scheduled for undergraduate students seeking summer employment.

Simpson observed in the Placement Report that although opportunities were less plentiful than in previous years, with only a rare exception, the 1958 June engineering graduate who actively tried, received one or more employment offers by graduation time. He believes that this year's engineering graduate, by having to apply himself more in finding the right type of job, should make a better employee as a result.

Civic Leader Elected As Alumni President

Mose Kiser of Greensboro, general manager of the Guilford Dairy Cooperative and a widely-known Greensboro civic leader, has been elected president of the State College Alumni Association.

Election of Kiser, Class of 1923, as the association's top leader was announced recently by the Alumni Office at the college. He assumed his duties July 1, succeeding Leslie N. Boney, Jr., of Wilmington.

Boney, Class of 1940, has been named chairman of the association's Board of Directors.

James F. Kelly of Raleigh, president of the Aeroglide Corporation and president of the Class of 1943, was named vice president of the association.

C. A. Dillon, Jr., of Raleigh, treasurer and personnel manager of the Dillon Supply Company, was elected a member of the college's Athletic Council. Dillon is a 1947 State College graduate.

Five alumni were named as new members of the association's Board of Directors. They are:

D. Barton Betts of Charlotte, Class of 1940; John C. Boney of Hamlet, '38; James D. Kilgore of Raleigh, '23; C. W. Mayo of Tarboro, '26; Thomas S. Tolar of South Boston, Va., '36.

A key figure in Greensboro's civic and business life, Kiser, the new president of the State College Alumni Association, is chairman of the board of trustees of Wesley Long Hospital and a director of the Security National Bank, Gate City Savings and Loan Association, Borden Clay Products Company, Rockingham Block and Ready Mix Concrete Company, and the National Dairy Council.

He is a director and first vice president of the Greensboro United Fund and a member of the board of stewards of the West Market Street Methodist Church.

Kiser is a past president of the Greensboro Chamber of Commerce, the Greensboro YMCA, the Greensboro Merchants Association, the North Carolina Dairy Products Association, and the High Point-Greensboro Dairy Council.

State Faculty Member Selected For UNC Post

Dr. Donald Benton Anderson, a member of the State College faculty since 1925, was elected to the position of provost of the Consolidated University of North Carolina at a meeting of the Board of Trustees which was held recently.

President William C. Friday placed Dr. Anderson's name in nomination at the trustees' annual spring meeting. He succeeds Dr. J. Harris Purks, Jr., who vacated the post July 1, 1955, to become acting president of the Consolidated University.

A nationally-known scientist and educator, Dr. Anderson will assume his new duties November 1 upon his return from temporary duty this summer with the National Science Foundation in Washington, D. C.

President Friday said Dr. Anderson will relinquish his duties as dean of the Graduate School and head of the Division of Biological Sciences at State College to undertake his new assignment.

In his new capacity, Dr. Anderson, President Friday stated, will be a staff officer in the Consolidated Office of the University in Chapel Hill and will be concerned with educational matters affecting the three institutions of the University. Initially, he will be involved in the undergraduate programs.

In recognition of Dr. Anderson as a top-level teacher, the trustees of the Consolidated University elected him the 1951 winner of the Oliver Max Gardner Award and designated him as the faculty member of the Consolidated University who "during the past year has made the greatest contribution to the human race."

Last March Governor Hodges, who is chairman of the Southern Regional Education Board, appointed Dr. Anderson a member of the new Educational Plans and Policies Advisory Committee of the SREB, an interstate compact covering 16 Southern states.

Campus Radio Station Changes Call Letters

The student radio station, this year, has initiated a change in its call letters. Formally known as WVWP, the student station is now known as WKNC. This change was voted by the members in May of 1958, and put into action by the F.C.C. in the summer of this year.

WKNC began its fall operation on the night of September 7th with a week long series of programs designed for the entertainment of this year's freshmen, during the week of orientation.

WKNC, operating on a frequency of 580 kilocycles, will begin its normal programming next week. This year's program schedule will offer the student early morning musical programs tailored to the waking up hours, a noon time program, "High Noon", for popular entertainment during the school lunch hours, and then, late in the afternoon, the full evening of broadcasting will begin, and continue until the early morning.

The student station offers various fields of entertainment. In addition to the full offering of music, there will be complete coverage of freshman basketball games, news from all world points, reported to WKNC by

news reporters throughout the country, and a bi-weekly program of science fiction plays, written by famous authors.

Ed Finch, the station manager of WKNC, expresses the belief that this year WKNC will offer entertainment and human interest programs that will far exceed any expectations of the station staff of two years ago. He also extends a cordial invitation to the students of N. C. State College to visit the station occasionally and if the visitors' interests are so inclined, investigate the possibility of joining the staff. WKNC is located on the third floor of the 1911 Building.

Dr. Clarkson Awarded Fulbright Exchange Grant

Dr. J. M. Clarkson, professor of mathematics at State College, has been awarded a grant by the U. S. Department of State to lecture abroad during the 1958-59 academic year.

He received one of approximately 400 United States Educational Exchange grants for lecturing and research abroad as provided for under the provisions of the Fulbright Act.

Dr. Clarkson will lecture in mathematics at Robert College in Istanbul, Turkey.

Dr. and Mrs. Clarkson left for Istanbul about the first of August. He will teach at the Turkish institution through June, 1959, when the Clarksons will return to Raleigh.

A widely-known teacher, Dr. Clarkson joined the State College faculty in the fall of 1934 and has been here since that time.

He received his B.S. degree from Wofford College, his M.A. degree in 1926 from Duke University, and his Ph.D. degree from Cornell University in 1934. He taught at Cornell for two years before joining the State College faculty.

While doing graduate work at Duke, he also taught courses in mathematics at the Durham institution.

He is the second State College professor in recent weeks to be named to receive an educational exchange grant. Dr. Cornelius H. M. Van Bavel, associate professor of soils, will conduct research on soil physics at the Agricultural College in Wageningen, The Netherlands, under the terms of a similar grant.

The funds used for carrying out the program under the Fulbright Act are certain foreign currencies or credits owed to or owned by the Treasury of the United States.

Rocket Society Planned

The American Institute of Physics has announced the formation of a student chapter of the American Rocket Society on the State Campus. The purpose of the new society is to promote interest in the fields of rocketry, astronautics, and instrumentation.

The American Rocket Society, the parent organization, is one of the oldest and largest professional societies in the country. It has long been recognized

for its contributions to the field of experimentation and research. The society has recently undertaken the task of educating the layman and the student in the many fields associated with rocketry and space flight. The State College chapter will promote this education campaign.

The date of the first meeting of the society has not yet been announced, but posters will be put out on campus when this date is set.

Campus Leaders Attend NSA Meet.

Seven State College student leaders participated in the 11th National Congress of the United States National Students Association in Delaware, Ohio, Aug. 20-29.

Workshops of the congress were divided into four areas—student government, educational affairs, student affairs, and international affairs.

Students representing State College included:

Eddie Knox of Davidson, vice president-elect of the Student Government; Larry Baxter of Cherryville, treasurer-elect of the Student Government; John Fulton of Wilmington, chairman of the Judicial Board.

School of Forestry Shows Rapid Growth

Classrooms and laboratories valued at more than a million dollars represent the continuing interest of the people of North Carolina in the programs of forestry education at State College.

Established less than 10 years ago, the School of Forestry at State College has had an amazing record of growth.

Student enrollments have climbed steadily since the program was originated as a department within the School of Agriculture in 1929. Following its establishment as a separate school in 1950, enrollment in the School of Forestry has more than doubled.

In response to increasing interest in forestry education, the Executive Committee of the Board of Trustees of the Consolidated University of North Carolina recently authorized State College to create two departments within the School of Forestry. The school had been operating without departmentalization.

Following this authorization, Dr. R. J. Preston, Dean of the School of Forestry, submitted the names of Dr. T. E. Maki and Dr. James S. Bethel to head the new Departments of Forest Management and Wood Products respectively.

Dr. Maki is the Carl Alwin Schenck Distinguished Professor of Forest Management at the college, and Dr. Bethel is serving as acting director of the State College Graduate School, director of the Wood Products Laboratory, and professor of wood technology.

These appointments have been approved by the college and university administrations and the Executive Committee of the Board of Trustees.

Indicative of the growth of the School of Forestry at State College, recent cleared admission figures for freshmen entering the school this fall indicate that the new departments will have substantial support in the years ahead from students interested in studying in the various forestry fields.

The School of Forestry ranks second only to the huge State College School of Engineering in new admissions for the fall semester. Percentage wise, the school is having the most rapid growth of any of the six degree-granting schools at State College.

Both graduate and undergraduate enrollment in the School of Forestry has doubled since 1952. The graduate program leading to the master's

ADMINISTRATION

(Continued from page 1)

ing transcripts of students to prospective employers.

Making sure that all student activities are carried out in an effective way is the duty of Banks C. Talley, Jr., the coordinator of Student Activities. Along with Henry Bowers, his assistant, Dean Talley has under his guidance the fraternities, the student publications, the music activities, the Student Government, and all clubs and honor societies.

In charge of student housing, dormitory housing, and student traffic control is Mr. N. B. Watts. All questions from any student concerning these matters are answered in this office.

To counsel all students concerning any phase of college life is the duty of Dr. Lyle B. Rogers and his assistant, Dr. Kingston Johns. All major tests to determine what a person is best suited for are kept at this office and are administered to students desiring them.

degree had its inception in 1950. Programs leading to the Doctor of Forestry degree, instituted in 1954, produced their first graduate in the 1958 spring semester.

Present facilities for teaching and research in the State College School of Forestry include Kilgore Hall, a three-quarter of a million dollar structure located on the main campus; the Reuben B. Robertson Laboratory of Pulp and Paper Technology valued at more than \$400,000; and a \$250,000 construction authorization for a new wood products laboratory. Construction on the new laboratory building will start in the near future.

The Pulp and Paper Technology program in the School of Forestry, recognized by the Southern Regional Education Board as the regionally approved program in this field for the 16-state area, has drawn wide support from the pulp and paper industry.

The new head of the Department of Forest Management, Dr. T. E. Maki, is a native of Minnesota. He was educated at the University of Minnesota where he earned his B. S. degree in 1929, his M. S. degree in 1931, and his Ph.D. degree in forest soils in 1950.

Prior to his appointment as head of the research program and curriculum in forest management at State College in the School of Forestry in 1951, Dr. Maki had been the officer in charge of the Gulfport, Miss., Branch of the Southern Forest Experiment Station in New Orleans.

Dr. Maki has conducted a wide range of research projects, including such fields as forest genetics, forest influences, seedling and planting, grazing, and tree physiology. He has written extensively for professional journals, scientific publications, and other periodicals.

Dr. James S. Bethel, new head of State College's Department of Wood Products, joined the college faculty in 1949.

ACTIVITIES

(Continued from page 1)

book, and the student radio Station, WKNC.

There are several musical organizations at State, including the State College Glee Club, Band, and Symphony Orchestra. The director of these groups is Robert A. Barnes, with offices on first floor of Pullen Hall.

There are numerous other outside activities here at State which you will meet as your college career progresses. Even though your academic studies will consume much of your time, freshmen and upperclassmen alike can find time to broaden their interests in many ways.

(Ed's note: See Editorial, Page 2).

Students Insurance Offers Broad Benefits

Students Insurance was first brought to N. C. State College in 1952. It was originated by the President of the then Campus Government and has grown gradually from a modest beginning to its present proportions. The original plan was limited coverage for Accidental Death and Dismemberment Benefits and accidental injury expense benefits only. The present broad coverage contract is a far cry from the small benefits in the original plan.

The overall expansion of benefits in Students Insurance at State College did not take place overnight. Rather, they are the result of evolution in such contracts in general and at State College in particular. It can be said with certainty that the element of experience over the last six consecutive years has been invaluable. Practically each and every year during this period some positive progress has been made in improving the students insurance; for instance, the plans have been expanded almost every year by including additional benefits or rates for the same coverages have been reduced, or both.

Pilot Life's Students Insurance Plan at State College this year provides a combination of insurance benefits. These are Accidental Death and Dismemberment Benefits, Accidental Injury expense benefits, Sickness-Hospital Benefits, and Sickness-Surgical insurance. The plan includes coverages specified by the College Health Services and

was drawn after many conferences with and suggestions from the Director of Health Services at State College, and faculty and Committee members of the college.

Expenses resulting from accidents are paid in full up to \$1,000.00. Accidental Death and Dismemberment Benefits are \$1,000.00. Hospital expenses for sickness are paid in full (ward accommodations) up to a maximum of \$250.00. Hospitalized Surgical cases have their expenses paid in full (ward accommodations) for a maximum period of 30 days and \$100.00 for hospital extras and Surgery is paid in accordance with a \$240.00 Surgical Schedule. Surgical Schedule is on file at Clark Hall Infirmary. On non-surgical cases, physician's fees are paid at \$4.00 a day, while in the hospital.

The claim procedure this year will be greatly simplified by channeling through the College Infirmary. In event of accident or sickness the student, if at college, has only to report to the College Infirmary. If a claim on Students Insurance develops, blanks are at the Infirmary. If away from college, consult a doctor and follow his directions. On your return, notify the Infirmary if you have had expenses resulting from an accident, or have been hospitalized, or have had Surgery performed. Claim forms are available at the College Health Services at Clark Hall Infirmary-N. C. State College.
