IFC Cites Service In Progress Report

By Lenny Lavitt

Dean Bowers told the Interfraternity Council at its last meeting that over 250 students were pledged. This brings the total fraternity manpower to over 870.

Probably many of the non-fraternity men, especially the freshmen, are wondering what the eighteen fraternities, and in particular the Interfraternity Council, accomplish as members of State College and the Raleigh community.

Scholarship is the principal reason any student is at college, and this is one of the primary concerns of the I.F.C. Right now the I.F.C. encourages scholarship by annually awarding a trophy to the fraternity which attains the highest average. Also a silver cup is awarded annually to the pledge class with the highest average.

Traditionally, the scholastic average of fraternity men has been above and beyond the all men's average. This year every fraternity was above the all men's average of 2.2935. Work is now going on to provide an I.F.C. scholarship to a deserving fraternity man.

Community service is another major field of fraternity endeavor. Each year before Christmas vacation, State's fraternities entertain children from Raleigh's orphanages. Last year the red carpet went out to over 500 of these fine children, who enjoyed parties in the various houses and received Christmas presents from the I.F.C. Santa Claus.

As part of the Greek Week program, the fraternities col-

lected over 9,000 pounds of canned food for the needy families of Raleigh. The Four Freshmen Concert last spring netted over \$550 for the World University Service, which made State College the highest contributor in the Southeast. A similar amount was donated to the State School for the Blind.

In general, the I.F.C. coordinates the activities of all the fraternities. The State College I.F.C. is one of the strongest interfraternity councils in this area. This is due in part to its fine leadership and the policy of our administration, which allows the I.F.C. a free hand in its policies and functions. Con-

(See IFC, page 3)

Yale Professor Speaks To Apollo's Thursday

Professor William Muehl, a layman on the seminary faculty of the Yale Divinity School, will be the featured speaker at the Apollo Club meeting this Thursday afternoon at 5:45 p.m. in the East wing of Leazer Hall.

The subject of Muehl's speech will be "Religion and Politics," the third of the fall series: "Beyond Technology, What?"

Muehl is Professor of Practical Theology at Yale University. He majored in political science at the University of Michigan, and later received the Bachelor of Law degree from the Michigan Law School.

Before assuming his duties at Yale, Muehl was the Director

Student Program Scheduled by WKNC

WKNC Radio will inaugurate a new service for the students of State College when it begins noontime broadcasting Monday, with "No Drill Today!" Popular music will be the theme for the program which will be heard from 12:15 to 1:30 P.M. on Mondays, Wednesdays, and Fridays. "No Drill Today!" will not be broadcast on Tuesdays and Thursdays due to conflicting Military Drill.

Host for the program Monday and Wednesday will be Russ Ford. Friday's program will feature Mike Graham.

Kent Watson, program director says, "This program will be for those who appreciate popular music during the lunch hour instead of Farm Market Reports and Country and Western Music."

30 & 3 Releases Report On Homecoming Floats

November 1 marks the return of the Wolfpack to Riddick Stadium. Virginia Polytechnic Institute will be the guest of the favored State team, which will be honored by the State students with the annual homecoming ceremonies.

Homecoming events are initiated with a parade through the streets of Raleigh, and as in the past, the Order of Thirty & Three is sponsoring the large-scale parade. Plans are in progress to assemble a large and varied array of floats with sev-

eral of the best bands in the State also participating.

Organizations interested and in need of flat trucks may borrow from Cline Construction Co., TE 3-1918; T. W. Gresham Construction, TE 3-1939; C. C. Mangum, TE 3-1831; N. C. Equipment Co., TE 3-4811; N. C. State College Dairy Farm (Western Blvd.), TE 2-9763.

1st, 2nd, and 3rd place awards will be presented at the close of the parade to the winners. The awards are displayed behind the College Union Main Desk. The Thirty & Three request that every organization should get on the "floatwagon" and join the effort to make this State's greatest homecoming ever. A float will give your organization recognition and publicity.

Last year, Sigma Chi, Gold Dormitory, and Arnold Air Society captured top awards for floats in the homecoming parade. Sigma Chi won with the theme, "Kill William—Make Merry," Gold Dorm presented "Wolfnik," the State College version of a Satellite, Arnold Air Society depicted a rocket headed for a hapless Indian.

AF Cadets Recognized For Drill Proficiency

Air Force ROTC cadets at State College have been recognized for their proficiency during the annual Federal inspection held September 25-26.

Purpose of the inspection was to rate various phases of ROTC training and facilities and to compare the State College Detachment with other units throughout the nation.

The Wing Commander, Cadet Col. Robert L. Wilkins of Fayetteville, and his staff held a briefing for the inspecting officers which was reported as

outstanding. The annual inspection report included this tribute to the State cadets:

"The cadet activities are planned and carried out by a mature, well oriented cadet staff under nominal supervision of the Commandant of Cadets. Special recognition is due to the Cadet Wing Commander and his staff for the excellent cadet staff briefing presented during the inspection."

"The quality of the briefing was equal to a briefing usually anticipated during the spring quarter after the cadet officers have had the benefit of more Air Science IV training and experience."

Chapel Service

DANFORTH CHAPEL SERVICE

for Wednesday, October 15 12:40-1:00 p.m.

Speaker: Rev. Bill Long—Associate Secretary of the State College Y.M.C.A.

Music: Danforth Chapel Choir

Everyone is invited to worship

Nominations Book Open to Freshmen

The election of Graduate Students and Freshmen representatives to the Student Government, and Freshmen Class Officers will be held Oct. 30. Any student interested in running for one of these offices must bring a friend to Room 206 Holaday Hall and sign the Nominations book before 5:00 P.M. Oct. 17. Freshmen are eligible to run for one class office and one Senatorial position.

The number of Student Government representatives to be elected are: Agricultural Freshmen—1, Graduate Students—2; Design: Freshmen—1; Education: Freshmen—1, Graduate Students—1; Engineering: Freshman—5, Graduate Students—2; Forestry: Freshmen—1, Graduate Students—1; Textiles: Freshmen—1, Graduate Students—1.

—NOTICE—

"International Week," beginning here on Sunday, October 19, will be reported on in the Thursday issue of THE TECHNICIAN, including a synopsis of the events which will make up the observation.

One of the main events on the agenda for "International Week" is an opening address by Dr. Frank Graham, who is the mediator for the United Nations in Asia. He will talk Sunday night.

Student, Faculty Talent

Union Prepares For Show

Student, staff, and faculty talent will compete in the fifth annual State College Union "Talent Show" Friday (October 10) at 8 p.m. in the College Union ballroom.

Included in the competition will be pianists, singers, combos, and comedians.

Loving cups will be presented to the best group and first, second and third place winners. Paul Hoover, Raleigh insurance executive and State College alumnus, will be master of ceremonies.

Planning to compete in the event are John Chappel, magician; Roberta Chesnut, Singer;

Stella Joseph, accordionist; Jayne Ayers, singer; the Chapel Choir; Dennis Helms, pianist; and the Bob Shi Band.

David Warren will accompany the singers.

The "Talent Show" will be open to the public.

The event is the first in a series of the College Union theater committee's "Fall Festival of Fine Entertainment."

Among the other productions for the fall will be "John Loves Mary," a three-act play, and "An Evening With Marcia Robie," a program of impersonations with a distinguished comedienne.

Campus Crier

The American Institute of Physics will meet Tuesday, October 14, at 5:00 p.m. in the Catering Room of the College Union. All Nuclear Engineering and Engineering Physics students and Physics faculty are urged to be present, as this is a very important meeting. Coffee and cookies will be served.

All juniors are reminded to have their Agromeck pictures taken this week, Monday through Friday, between the hours of 1:00 p.m. and 9:00 p.m. The pictures will be taken in Pullen Hall, with coats and ties being required for the setting.

The State College Woman's Club will meet this Thursday at 12:00 noon. It will be the second meeting of the year for the group.

On Wednesday, the Young Democrats Club of State College

will meet in the North Ballroom of the College Union at 8:00 p.m. for the purpose of choosing a "Miss Democrat" to represent the YDC in the Homecoming Contest. The beauty contest Wednesday night will feature girls from St. Mary's, Meredith, the Woman's College, and State College co-eds. Reports from the State YDC Convention will also be given.

The States Mates Club of State College will meet on Monday night in the College Union at 8:00 p.m., with the theme being a "Get Acquainted Party." All State student wives are urged to attend.

There will be a dinner meeting of the Arnold Air Society, Pershing Rifles, and Scabbard and Blade on October 16, at 6:30 o'clock in the Capital Room of the Downtown S&W Cafeteria. There will be a guest speaker and uniforms should be worn.

William Muehl, the speaker for the third meeting of the Apollo Club, is a member of the seminary faculty of the Yale Divinity School. Muehl will address the club on "Religion and Politics." It is the third in a series entitled "Beyond Technology, What?" sponsored by the Apollo Club.

Social Fraternities Part Two

In many cases, our editorial on fraternities and the Interfraternity Council (October 6) was taken as a biting criticism of the system as a whole.

Perhaps our mistake was in that we spoke in general terms rather than limiting our comments to State's fraternities. Now we will correct that mistake.

The whole underlying criticism of the fraternities rested in the belief that the individual fraternities and the IFC are not living up to their potential.

At a technical institution such as ours, fraternities have a much greater potential for service than those at a liberal arts school. For we are in critical need of becoming more "social" people... men who have not only technical knowledge and ability, but men who can move with ease and confidence through society outside the confines of their occupational pursuits.

At a liberal arts school, the classes, the environment, the cultural activities all combine to give the student a certain polish and familiarity with other than physical aspects of living. This "social familiarity" is badly needed by State's men... it is needed if we hope to do more with our lives than be technical servants of the narrow, mechanical world of industry and agriculture.

Since our crowded schedules must be primarily focused on technical subjects, we must look outside our classrooms to acquire that vital polish which will make us communicative with our whole environment.

Social fraternities, along with the College Union and YMCA, can give us this polish. They can assume their partial responsibility of educators, giving their members that which the classroom cannot.

Certainly, the IFC is already sponsoring several activities of service and entertainment to members of both the college and college community. One of the most encouraging aspects of the IFC is the planned lecture series, which will bring outstanding men to this campus (see "Greeks On Campus", this page) to give us of their experience.

Another important facet of the socializing process could be made inherent in pledge training. Pledges could be made to feel proud of their individuality rather than be driven to conformism by men who feel powerful only when they impose their own standards on the supposedly inferior pledge.

State College needs a strong fraternity system... for many of us, it can fill the gap in our education left by over-emphasis on a technical education.

Our fraternities have already done much to fill the gap... they can be proud of their past laurels only so long as they deserve new ones.

LITTLE MAN ON CAMPUS

BY DICK BIBLER

"OH, HE'S OUR MOST POPULAR HISTORY TEACHER ALL RIGHT, BUT I HEAR HIS STUDENTS DON'T LEARN MUCH FROM HIM."

We Get Letters - - - Here's A Sample

To the Editor:

After reading the article on the new diploma, my sentiments were similar to those expressed in the editorial of Thursday's *TECHNICIAN*. I have talked with a lot of students about the new diploma, both last year and this year, and I do not recall but one person who was an advocate of the new block style. I believe that the committee representing the students were not representing very many of them.

The fact that the Administration took it mainly upon itself to change the diploma style is just one more example of the students of State College getting the deal that the college officials want them to get and not what they want.

The only logical choice of diploma style should be the style chosen by the guys that are going to have it hanging on their wall, and not by the men who already have theirs framed.

I sincerely believe that the great majority of State students want an Old English style diploma, and I am disgusted at their being deprived of one simply because some college officials don't like it.

Maybe someday the officials of State will cut the strings on what they obviously consider a "marionette" student body and respect their feelings like most other colleges do.

Jim Hackney

Editor's Note:

Although we agree with Jim that the committee representing the students wasn't very "representative", perhaps we should defend the action of the administration in this case. For it was the administration's idea that the committee have a MAJORITY of students. However, when student opinion was finally consulted through petition, the STUDENT LEADERS ignored it... this cannot be blamed on the administration.

To the Editor:

I don't know or care who writes "Clean Living", but whoever it was really flubbed on the teaching abilities of Dr. Freyre. Language is no handicap for him whatsoever. He stands head and shoulders above the six physics teachers I know. He is very much interested in seeing that his students learn the material (that I can't say for the others).

He (Dr. Freyre) is one of the few teachers that doesn't teach by the hour; he teaches by the job. Obviously, the author of this dumb article hasn't had Dr. Freyre for any course.

I sat in on his classes last year and instead of dropping a letter grade I raised one. Please, when you throw a low blow like that, you are kicking a gift horse in the... Name Withheld by Request

Hillsboro at State College

Ralph... was that you?

It could have been the prevailing winds coming through the barn that had poor Maude wondering. We can surely sympathize with her expression, with all the preparations for green grass that are taking place on east campus.

Grant Wood, the artist, has been described as a character from Sinclair Lewis' *Main*

Street. He was considered allergic to what his Iowa neighbors called work. When he was not painting he taught children how to make paper look like velvet, or presented ladies with flowers made of glue, which promptly fell apart.

The painting above—"American Gothic"—is considered by many to be his masterpiece.

Greeks On Campus

By Bill Marley

The music of Ralph Marterie will entertain the Greeks on campus at our first IFC function of the year Sunday afternoon, October 26th. The cost of the concert will run one thousand dollars for the band and roughly five hundred for advertisement.

I'm sure you have all heard Jimmy Capps on "Our Best to You" (WPTF, 10:15 to 12:00 midnight, weekdays), giving us some smooth advertising, and along with other state-wide advertising the concert should be successful. Tickets will sell for \$1.25 per person.

Bill Sharp, a member of Theta Chi, has been selected by the IFC to succeed Monty Hicks as Activities Committee Chairman. Monty has dropped out of school this semester.

Some of Bill's responsibilities will include organization of the Christmas party given annually by the fraternities of State for orphans and underprivileged children of Raleigh, and it will also be his responsibility of planning "Greek Week" which

has as one of its high points the food drive.

Last year the Greeks at State did a tremendous job during this drive and collected 9,000 pounds of food to be distributed to the needy families of Raleigh.

Bill is also in the process of promoting a scholarship, which, if all goes well, will be offered to a freshman who pledges a fraternity. This is still in the process of formulation and I should be able to give more details later.

Another thing Bill is working on is a lecture series program sponsored by the IFC. Men who are successful in their respective fields will be asked to speak to the students of State. This is a separate program from the C.U. lectures and the IFC feels that proper publicity will stimulate more interest in a series of this type than has been displayed in the past.

With the annual increase of coeds at State, the college has in the blueprint stage a new dormitory for women. Is it time for consideration of sororities, Greeks?

BOB LINDER

Deacon Passing Edges 'Pack By 13 - 7 Score

The Demon Deacons of Wake Forest combined a vicious offensive attack and a stubborn defense to halt the State College Wolfpack in a 13-7 thriller Saturday in Winston-Salem. Before a crowd of 18,500 the Wake Forest squad brough their season's record to 3 wins against 4 losses.

The eager but mistake-plagued Wolfpack was unable to stage a potent threat until late in the final period, then only to be stopped by an inspired Deacon line. Midway the final period State struck suddenly for their lone touchdown, making the score 13-7.

With minutes left in the game, State got its big chance to record a last-chance touchdown when they held Wake following the kick-off. Taking over after the Deacons relinquished possession of the ball, the Wolfpack prepared to make an all-out push for the goal. On the first play from scrimmage, Claude Gibson who only moments before had gloried in scoring the Wolfpack tally on an impressive catch from quarterback Frank Cackovic, bobbled the ball on State's 48 and Wake Forest recovered.

Twice in the final period the Wolfpack marched within scoring range only to be stopped by the stubborn Deacon defense. A recovered fumble and an intercepted pass saved the day for the Demon Deacons in the final minutes of the game.

Wake Forest led in every department of offensive play, most of the impressive facts coming in the first half. Coming out for the second half, the Wolfpack looked like a different team, as they displayed a much corrected defense. Holding Wake to two pass completions in the second half, the State squad came to

life and put on an impressive offensive show of their own.

Leading by a 6-0 score at halftime, the Deacons added their first score on an aerial march which ended on the State 2. After a six yard loss, the Wake quarterback, Norman Sneed, attempted another pass, but seeing no receivers, ran wide to his right and sailed into the end zone for the score.

Opening up in the second half, the Wolfpack struck suddenly with its effective offensive play. Midway in the final quarter, the State squad cashed in on a pair of Cackovic passes for its lone score. The first, good for 49 yards, put the ball on the Wake 20. On the next play Cackovic dropped back and tossed to Gibson again, this time for the score.

After the touchdown, Larry Dixon split the uprights to make it 13-7. Following this, the State squad had two chances for a winning tally snuffed out by a stubborn Wake Forest defensive stand.

The deciding Deacon touchdown came in the final period when Charlie Carpenter passed to Winston Futch on the State 35. At the 30 Cackovic missed an all important tackle and Trowbridge couldn't make it at the 16, and Futch went into the end zone to make it 13-7.

The Wolfpack's next contest will be with William and Mary. Coach Edwards and his squad will travel to Williamsburg to meet the Virginia team October 18. The Wolfpack is expected to show a much improved attack against the William and Mary team, and the boys will be wanting more than ever to claim a victory.

Last year's only defeat was at the hands of William and Mary in a stunning 7-6 upset. This year's game should be a real thriller, as the Wolfpack squad will be out to avenge last year's loss. Going into the tilt next Saturday the Wolfpack will be sporting a 2-2 record.

- Correction -

In the October 9 issue of the TECHNICIAN there appeared an article on "Intramural Football Results" which stated and outlined the scores of all Intramural football games to date. Due to an unaccountable mistake on the part of the Print Shop, this article was incorrect in every respect.

In both the Fraternity and the Dormitory divisions, the tabulated results were confusing and completely incorrect. This mistake was made as a result of a mix-up in setting the

type before the paper went to press. As a result, the game scores were scrambled and jumbled in a most confusing manner.

It is felt by this staff that an apology is due those teams that were unjustly rated and misrepresented. In an effort to correct this situation, a complete picture of the Intramural football results will appear in the next issue of the TECHNICIAN, including ratings and standings of each team.

—Sports Editor

Gabriel Leads Wolflets In 32 - 26 Win Over S.C. Frosh

In Saturday's 32-26 win over the South Carolina frosh the State College Wolflets staged an aerial attack comparable to that of many of the nation's top professional teams. Running behind the accurate passing of Roman Gabriel, the Wolflets led the South Carolina squad all the way.

The first half proved to be a close contest, with the score 14-12 at half-time. Gabriel, the 6-4, 210 pound quarterback, controlled the game all the way with his aerial feats. Passing with remarkable accuracy, his passes went for four of the five touchdowns.

After a 14-12 half-time score, the Wolflets unleashed their aerial attack to advance their lead to 32-12 before the South Carolina frosh could threaten. At the start of the second half, Gabriel dropped back and hit little Glenn Hunter with a perfect 55 yard pass in the end zone.

Then it was Al Taylor, running at quarterback in Gabriel's absence, who took over and scored on a 60 yard run. The next score came as a result of a 41 yard pass from Gabriel to Hunter.

After this, South Carolina came to life and scored two touchdowns in the final period. On a 46 yard pass South Carolina's George Proebster went into the end zone for a score. With a minute left in the game, Ken Daity intercepted a State pass and galloped 97 yards for the final touchdown.

Athlete of Week

Roman Gabriel, 6-4, 210 pounds, of Wilmington, N. C. In Saturday's 32-26 win over the South Carolina frosh Gabriel completely stole the show with his masterful passing. In leading the Wolflets to their first win in two starts, Gabriel's passes went for four of the five touchdowns.

Controlling the game all the way with his aerial attack, Gabriel threw with remarkable accuracy. His most spectacular play of the game came in the third period, when he stunned the South Carolina squad with a perfect 55 yard toss to score.

Playground Program Began Saturday

A playground program for the children of the faculty and staff members of North Carolina State College began Saturday, October 11, at 9 a.m.

Sponsor of the activity is the Department of Industrial and Rural Recreation of the college's School of Education working in cooperation with the Department of Physical Education.

Facilities of the Department of Physical Education including the Frank Thompson Gymnasium and adjacent playfields will be used.

Director of the playground will be Prof. L. L. (Bing) Miller of the Department of Industrial and Rural Recreation. He will be assisted by students majoring in recreation.

The playground will be open to children between the ages of 5 and 14.

The program will include mass and individual activities, active, hiking, play with toys and other semi-active and quiet games; small children's activities and table games; relays; swimming;

NCS Professor Asserts Methods Of Research

"Sincere research results can be obtained by people who are motivated by an urgent desire to know the unknown, who are willing to work, and who have simple aptitudes for the job they are doing."

This conviction was voiced Tuesday night (October 7) by Dr. P. H. McDonald, research professor of mechanical engineering at North Carolina State College, in a talk to student members of the American Society of Mechanical Engineers which met on the campus Tuesday evening.

Dr. McDonald, who last year

was nationally recognized as one of the most outstanding young mechanical engineers of his generation and was awarded the 1957 Pi Tau Sigma Gold Medal for great achievement in his field within 10 years after graduation, spoke on "Latest Research Projects at North Carolina State College."

In enumerating research projects in the college's Department of Engineering Research, Dr. McDonald pointed out the importance of research in contributing to the over-all educational program of the School of Engineering. He dwelled on the significance of an "integrated research - graduate program," which, he said, affords graduate students opportunities to participate in basic research.

"A good researcher must be a good professional companion... a member of the team, because in this dawn of automation, no one individual can possibly be expected to know it all," he said.

To illustrate how research results are obtained through the cooperative efforts of staff members, graduate and undergraduate students, Dr. McDonald described in detail a recent basic research project for which he was technical director.

The investigation, "Anomalous Response of Dynamic Strain Gage Circuits," was traced from its theoretical conception to its ensuing results.

A native of Carthage, Dr. McDonald has been a State College staff member since 1953.

exploring for a better world

AT THE FOUR CORNERS OF THE EARTH, more than 5000 scientists from 67 countries are joined in an all-out assault on the vast gaps in our knowledge of the universe. In, on and above the earth, studies are underway to learn more about how we can make better use of the planet we call home.

A. ENIWETOK, SOUTH PACIFIC. Four dozen tiny Texas Instruments components (diodes and transistors) rode more than 4000 miles out into space in Operation Farside.

B. NORTH POLE, ARCTIC. recti/riters, TI ink-writing rectilinear recording galvanometers, trace the flicker of the aurora borealis and measure the all-but-invisible polar airglow.

C. SOUTH POLE, ANTARCTIC. Texas Instruments seismic exploration systems plumb the depth of the polar ice cap... TI's famed Worden gravity meters weigh the earth beneath... recti/riter recorders warn scientific adventurers against deadly ice crevasses.

D. CAPE CANAVERAL, FLORIDA. TI transistors and diodes in the Jupiter C missile helped put the Explorers on their journeys... and United States satellites themselves use Texas Instruments transistors.

engineers, chemists, physicists... choose your future SEMICONDUCTORS AND OTHER COMPONENTS. Transistors, diodes, rectifiers, capacitors, resistors, transistor circuit

applications, test equipment, mechanization for the Semiconductor-Components division.

ELECTRONIC AND ELECTROMECHANICAL APPARATUS. Radar, infrared, sonar, magnetic detection; computers, timers, telemetering, intercom, optics, microwave systems; transformers, lenses for the Apparatus division.

BASIC AND APPLIED RESEARCH. MS and PhD level inquiring into data systems and earth sciences, solid state physics, materials, and devices; concentrating on semiconductors, electronic components and systems, military systems, data handling, geophysics at Central Research Laboratory.

come and grow with us

Hitch your wagon to the Texas Star... work at a plant within the city but away from downtown traffic... live within minutes of your work or your play—year around recreational, amusement and cultural activities. A Texas Instruments representative will be on the campus in a few days to give you more details. Please contact your placement office before—
