Open Letter

Diploma: Second View

By Jim Hunt
Now that you the students have heard one side of the diploma story explained, I consider it my duty as the president of the Student Government to present the facts as I see them for your consideration.

Certain portions of the story which appeared in the October 9th issue of *The Technician* were correct. Other parts painted quite an inaccurate picture. I want you to know the whole story, including why your representatives on the diploma style committee acted as they did.

First of all, though the committee appointed by the Chancellor was made up of more students than faculty members, the charge was delivered to this committee to select a diploma that as nearly as possible satisfied both students and faculty. The Chancellor did not appoint an all-student committee or an all-faculty committee. It was a committee composed of representatives of both groups with instructions to come to an agreement of a diploma.

Let me point out that this was a working committee designated

to do a job, that job being to decide on a diploma acceptable to both students and faculty.

This committee held numerous meetings and worked very diligently in attempting to satisfy the groups represented by the student and faculty members on the committee. Needless to say these committee members held widely diverse opinions on diploma size and style.

After several meetings the committee authorized a student in the School of Design to draw up a diploma according to certain qualifications that they were agreed upon. This was done and on October 9th, 1957 this diploma was presented for the committee's consideration.

At this time I became a member of this committee replacing Fred Houtz who had dropped out of school. (Prior to the meeting Jim Peden, President of the Senior Class, discussed with me at length the history of the committee including the work and discussions carried on by it in the past.)

At its October 9th, 1957 meeting the diploma committee ex-

(See DIPLOMA, page 7)

Bennett Cerf To Present American Humor Styles

Bennett Cerf, prominent American author, publisher and humorist, will deliver the lecture, "Changing Styles in American Humor," Friday, October 17, in the College Union.

Cerf began his work as a humorist in college, where he became editor of *The Jester*, Columbia University humor magazine. From that early beginning, he has progressed to the authorship of six popular books of humor and the editing of the *Encyclopedia of Modern American Humor*.

Bennett Cerf is known to his intimates as a man of excessive ambition and vitality. A Phi Beta Kappa, Cerf is currently president of Random House (publishers of the *Modern Library*, etc.). He is a columnist for *The Saturday Review* and panelist on the television program, "What's My Line?"

Cerf will hold an autographing session at 4:00 p.m. in the Watauga Book Store. After his lecture at eight, Cerf will meet informally with the public at a coffee hour lasting until his departure at 9:30 p.m.

BENNETT CERF

International Week Envisions Cooperation of All Peoples

"To present to the campus community programs of international scope in order to develop an international atmosphere more consonant with present world necessities, and to integrate the foreign students into campus life to enable the students to look together in the same direction with a single cause of better, mutual understanding."

The College Union International Committee sponsors International Week on the State

College campus in order to achieve the goals of the committee. The week will begin on October 18 at 8:00 p.m. with an international dance in room 256-258 in the College Union. The dance includes a variety of international music for dancing and it will be open to all College Union members.

Events planned for October 19 include a gallery exhibition, a picture post card display, an international book display, and a religions of the world exhibition all opening on Sunday for the week.

An international music concert will be held in the College Union music lounge at 4:00 p.m. and will include a wide range of music from around the world. This event will be on October 19.

Dr. Frank Graham, United Nations Mediator, will speak to the State College Community and citizens of Raleigh in the

College Union ballroom at 8:00 p.m. on October 19. The topic of his speech will be "The United Nations in the Atomic Age."

An international banquet will be held on October 21 at 6:30 p.m. It will be in the College Union ballroom which will be decorated in an international flavor. A fashion show will be presented following the banquet and will have fashions from all over the world. The banquet will cost \$1.00, and all interested persons should sign up at the College Union main desk.

Canadian slides will be featured at the international photo-scope on October 22 at 7:30 in the College Union theater.

A program of international music will be given over the college station, WKNC, at 7:00 p.m. on October 23. The program may be heard in the College Union main lobby as well as over the campus radio.

"Is Democracy the Most Appropriate Type of Government" will be the topic of panel discussion in the College Union theater at 8:00 p.m. on October 23. The discussion will start with a few main speakers from various countries, and will then be open to the audience for general discussion.

An international soccer game will be played on the field at 4:00 p.m. on October 24. All students interested in playing are requested to sign up at the College Union main desk so that further information can be given to him. Following the game there will be an international picnic at Pullen Park. This will be planned for 5:30 p.m. All persons interested please sign up at the main desk. The cost will be \$5.00.

"Laughter with the Ladies" will be presented by Marcia Robie in the College Union ballroom. The program will start at 8:00 p.m. on October 24.

The international ball will be held in the College Union ballroom from 8:00 p.m.-11:30 p.m. (see INTERNATIONAL, page 10)

Weddige Exhibition Featured At Union

An exhibition of 27 color lithographs opened October 13 in the South Gallery of the State College Union.

The exhibition features the works of Emil Weddige and is open to the public free of charge.

Included in the display are four lithographs by Weddige which were recently presented to the college's School of Forestry by the Dow Chemical Company. The lithographs depict the ancient art of making paper and illustrate the dramatic process of paper-making. The lithographs are entitled "Egyptian Papyrus," "First Paper," "Laid Mould," and "Robert's Machine."

The Dow Chemical Company presented copies of the four lithographs to the four colleges in the United States that teach a course in paper making.

With the exception of the four dealing with paper making, copies of the lithographs will be for sale to the public.

Weddige was born in Ontario, Canada, in 1907. He received his early art training in schools in the United States, including his Master of Arts degree from the University of Michigan. He did advanced study and research in France.

In 1937, he was awarded a fellowship at the University of Michigan where he is now a professor of art.

Weddige pioneered in the contemporary rebirth of color lithographs and has made significant contributions to its development in America. His works hang in permanent museum collections and in private collections.

Nominations Open For 'Miss Wolfpack'

Blue Key Honorary Fraternity announced last night that nominations are now being received for the Homecoming Queen. Pictures and information on the contestants should be submitted to Mrs. Shirley in the Student Affairs Office, 206 Holaday Hall.

Rules for the contest are as follows:

- 1) Contestants must be between the ages of 18 and 25, inclusive.
- 2) Contestants must be single.
- 3) The deadline for entries is 5:00 p.m. Tuesday, October 28.
- 4) One full length photograph and one 8 1/2" by 11" portrait must be submitted for judging. All pictures will be returned after the contest.
- 5) Name of the contestant, and the name, address, and telephone number of the sponsor should be included with the entry.
- 6) Either individuals or organizations can sponsor a contestant. Contestants submitted for judging need not necessarily be a student, either at N. C. State or another college.

The Homecoming Queen Contest is sponsored annually at State College by Blue Key, Junior Honorary Fraternity. Members of the organization will select ten finalists from the contestants submitted. Judges will formally interview these finalists on Saturday morning, November 1, prior to their presentation in the Homecoming Parade that morning.

The winning contestant will be announced by Blue Key during the half-time ceremonies at the State-VPI football game. Other events in the ceremony will feature exhibitions by the Pershing Rifles, Drum and Bugle Corps, and the State College Marching Band. The Homecoming Queen will be officially crowned "Miss Wolfpack" at the Homecoming Dance that night in the College Union, sponsored by the Monogram Club.

The trophy to be awarded "Miss Wolfpack" is now on display in the College Union, and portraits of contestants will be displayed at the Union on the week preceding Homecoming Day.

All fraternities, dormitories, and campus organizations are urged to participate in order to have the best selection possible for "Miss Wolfpack." Any questions concerning the contest should be directed to Chris Tabor, 218C New Dorm, or John Sprinkle, TE 4-8227.

Also, all campus organizations are reminded to start planning their floats for the big Homecoming Parade.

Musicians To Sponsor Alma Mater Contest

If you know, or can learn, State's Alma Mater in the next two weeks, you may be eligible for a \$10 cash prize. State's chapter of Mu Beta Psi, national honorary music fraternity, is sponsoring the campaign so that State's students will become more familiar with the school song before Homecoming, November 1.

Here's how the plan will work: Several times each week, starting Monday, three Mu Beta Psi members will go out and pick a student at random. If he can sing the Alma Mater (quietly) he will be presented \$10 on the spot; a picture will be taken of the student receiving the prize money, and it will be printed in THE TECHNICIAN the next issue.

So that you will become familiar with the tune of the Alma Mater, it will be played each

day at noon on the bell tower chimes. The Alma Mater will also be played each hour on WKNC, the student radio station. Through these two mediums, it is anticipated that the majority of students will be able to claim the \$10 prize if they are approached, and that the Alma Mater will be heard loud and clear at State's Homecoming.

Following are the words of the Alma Mater . . . LEARN THEM!

"Where the winds of Dixie softly blow, o'er the fields of Caroline

There stands ever cherished N. C. State, as thy honored shrine.

So lift your voices, loudly ring, from hill to ocean side.

Our hearts ever hold you, N. C. State . . . in the folds of our love and pride!"

Campus Crier

Lost: On State College campus on October 7, a man's "Lord Elgin" gold wrist watch. Finder please communicate with H. C. Brown at the College Library. Liberal reward.

The EE Wives' Club will sponsor an "N. C. State Night" on October 29th, at 8:00 p.m. in room 256-258 in the College Union. Guest speaker will be Dr. A. M. Fountain, who is an English professor and has been since 1923. His talk will be based on his recent book, "Places—Names on the State College Campus." All club members and new EE wives are urged to attend.

The Veteran's Association will meet in room 248 of the College Union at 7:00 p.m. on Friday, October 17.

Found: Slide rule in Winston, room 5. Contact S. J. Blackwood, 29-A Verville, Vance 8-5118.

The annual I.E. stag party will be held this Friday, October 17, at Garner's Cabin. Free to all I.E. students. Plenty of food and beverages. Meet in front of the Coliseum at 7:00 p.m. for rides. I.E. freshmen are especially urged to attend and meet the I.E. professors and upperclassmen.

Graduate Teachers - Part Three -

This will be our third editorial on graduate student teachers . . . we are continuing a discussion of the subject because of the great interest shown.

In "Letters to the Editor" of this issue, a faculty member defends the graduate teachers with some well-chosen, thought-provoking words. But we cannot help thinking his ideas are drawn almost solely from the views of a teacher, without taking due consideration of the effects on the undergraduate majority at State College.

The faculty writer has as his main point that "teachers must learn to teach by teaching." This fact is certainly unalterably true. However, we must question if State College is the proper place for an undeveloped young man to gain experience . . . with State undergraduates as subjects of the experiment.

For primarily, State College is dedicated to teaching undergraduates the rudiments of technical knowledge, and, beyond that, how this knowledge will be applied in the world in which he must function. We maintain that the graduate teacher is lacking experience in two major areas; (1) he has not had the benefit of working outside of the college for a sufficient time to give him an insight into practical applications of technical knowledge, and (2) he has not had, usually, the benefits of learning *how* to teach through going through educational training.

Now, in some of our purely mechanical laboratory courses, these "lackings" may not be significant . . . they become significant, however, when the graduate teacher must try to communicate effectively other than the procedure of conducting experiments.

Idealistically—and we do not apologize for idealism—our instructors and professors should first have a technical education, then practice for a time in a technical field, and finally take at least a short course in educational techniques and speech.

Realistically—and realism is not entirely lost upon even the undergraduate—why *should* any man expend such effort to become a teacher in college when the comparative pay scale of teachers is so unrealistic?

That brings us back to our first editorial, wherein we blamed *not* the graduate teacher for our plight but rather blamed the State of North Carolina for not providing adequate faculty salaries . . . and therefore not attracting enough *qualified* men to teach in our college.

Our thoughts questioning the worth of graduate teachers are not designed as a personal attack on the graduates themselves . . . we plead innocent of being that small or petty. The faculty would seem to be hurting its own cause when it suggests that graduate teachers are adequate substitutes for the real thing.

LITTLE MAN ON CAMPUS

BY DICK BIBLER

"WELL, WHY DON'T YOU TRY CARRYING YOUR BOOKS IN THE OTHER HAND?"

Letters to the Editor

To the Editor:

A few comments in defense of the graduate-student teacher appear to be in order.

Perhaps the greatest need in the world today is the need for more and better teachers. This need is particularly acute at the college level. From whence will these teachers come? How are good teachers developed? Unfortunately, there is no mechanism (under our democratic way of life) by which teachers can be mass-produced. They must be discovered, first as bright, industrious youngsters, trained in the subject matter of their own choosing, inspired to see the need and opportunities in the teaching profession, and finally indoctrinated and developed into teachers.

There is, of course, no substitute for experience. This is just as true in teaching as in any other field. Teachers must learn to teach by teaching. Thus the graduate-student teacher has the opportunity not only to determine his real interest in teaching, but to gain valuable experience that can be obtained in no other way. Without this opportunity for discovery and development of new talent, many potential teachers would be lost to other vocations.

Among the other significant advantages in using graduate students as teachers are the freshness of approach of enthusiastic young minds, the ability to present subject matter from the student's viewpoint and more nearly on his level, and the ability, through the use of a greater number of instructors, to subdivide courses into smaller sections.

Thus although there are admittedly certain disadvantages in using relatively inexperienced graduate-student teachers, it would appear that the advantages far outweigh the disadvantages. In the rare event that an intolerable situation develops due to obvious negligence or incompetence, recourse through a formal or informal complaint to the department head is always in order.

W. W. Austin, Head
Department of Mineral
Industries

Editor's Note:

We appreciate Mr. Austin's letter. It is very encouraging to know that our faculty are reading the paper, and take enough interest in the issues presented to write us a letter.

Unfortunately, our "Letters to the Editor" have been steadily increasing in number, and we simply do not have the space to print them all . . . instead, we must take the most representative sample.

Our answer to Mr. Austin's letter, and others similar or dissimilar appears in the editorial section on this page.

To the Editor:

In the last Thursday's issue of THE TECHNICIAN there was an article about some of our elected officers who made a misrepresentation of the desires of their fellow students.

As President of the Junior Class, I feel that each of you have an equal voice in anything that concerns our class.

In the near future we must select the company to make our ring. If you have ever had trouble with any class ring (high school, fraternity ring, etc.), please let me know the name of the company that made the ring. This may be done by leaving a note, addressed to me, at the main desk of the College Union.

After a thorough investigation of all the companies submitting bids, we, the entire Junior Class, will select our ring.

Dave Thomas
President of Junior Class

To the Editor:

It is my opinion that THE TECHNICIAN can do without such articles as Chuck Lombard wrote in the October 9th issue. Surely, anyone with common decency, and any writing ability can turn out an article without stuffing it full of profanity and obscene phrases. It's a pretty sorry state of affairs when one has to be ashamed of the language printed in our college newspaper.

Harold Lineberger

Editor's Note:

You poor dear. And Chuck Lombard is a wicked person. And so is J. D. Salinger, who Chuck copied so brilliantly.

WAY OUT...

with John Cocke

Later on that day when the sky turned red and orange to match the leaves, the Big Bad Wolf turned and loped back down the path to the water-hole. As usual he was thinking of nothing in particular; for most of his actions were guided by feelings in his body, either in his stomach or his throat or his mouth, or in his loins. At the moment his mouth and throat were in command, both being very dry and dusty.

Now it happened that as he skidded clumsily around a corner, he came upon the Cat, who was lying on a log across the path. The Cat appeared to be lost in thought and only looked up when the Wolf collided head-on with the log and fell over into the bushes.

"Well now," said the Cat. "Why all the rush?"

The Big Bad Wolf picked himself up and licked angrily at a bruise. "Got to git to the water-hole. Thirsty," he said. But the Cat, who knew not the ways of the Big Bad Wolf, said, "Stay and talk a minute. I have an idea that must be discussed."

"Huh? Wat's that?"

"Well, I was just lying here thinking, and I happened to wonder about this Providence thing. You know, about God caring for each little sparrow that falls, and all that. The thing is, I found one the other day, and being fortunate enough to catch it, I, well, I ate it."

"Well, uh, I dunno," said the Wolf, obviously struggling to find a connection.

"When I thought about it later, I got pretty worried; for I remembered hearing that He liked sparrows quite a bit. But now I wonder what's so bad about it. After all, man, I've got a right to live too, don't I? A man's got to eat." He paused and looked through half-closed eyes at the Wolf, who was staring blankly off into the air and bobbing his head up and down. Then he continued, "What do you think?"

"Huh? Oh yeh. Jus' a minute and I'll see." So the Big Bad

Wolf pulled out a slide-rule that he always kept strapped to his back. He was very proud of his slide-rule, and although he had not the slightest idea how to use it, he thought it gave him a very distinctive air.

"Well now le's see," he said and he gazed upon it and moved the parts back and forth. At this the Cat broke into a quiet, sly laugh.

"You fool," he said. "How do you expect that thing to give you the answer?"

"Whadda you mean? This here Slide-Rule knows everything."

"Oh bull. How can it?"

"Well it just does. I dunno how."

"All right then," said the Cat. "What does it say?"

"Uh, le's see. Here we go. Two ninety-three."

"Two ninety-three? What sort of an answer is that?"

"Whadda you mean?"

"I mean how does it relate to my question?"

The Wolf turned red and began to sputter. "Well, well I . . . Oh I dunno. Ain't none of my concern anyway."

"No," said the Cat. "Apparently not."

"You tryin' to git smart with me, boy?"

At least he caught that, thought the Cat. Maybe there's hope after all.

"Not really," he said. "Shouldn't you give some thought to things like that, though?"

The Wolf looked impatiently around and then said, "Look, I'm thirsty. Got to beat it to the wahter-hole."

"Well go then! Sooth your ignorant throat with water! I hope you bloat yourself!"

At this the Big Bad Wolf bared his teeth and sprang. But the Cat, being a very swift sort of character, leaped up a nearby tree and smiled to see the Wolf sprawled out in the weeds.

"You!" screamed the Wolf. "If you're so smart why ain't you wearin' a Slide-Rule?"

"I don't need one. I can do all that stuff in my head."

Campus Cosmo

Becoming A 'Man' . . . Here and Elsewhere

By Chuck Lombard

After you've beer around a campus for awhile, you begin to get the idea that the world isn't round but rectangular. There are no oceans, forests, or farms; but only buildings, streets, and perhaps a few trees. In short, you unconsciously forget there is any world outside of your own college orbit.

If you are aware of the fact of other schools, you associate them with your own, at best. Surely the men at another college are just like State men, or worse, you guess. But then someday something happens and you find yourself jolted out of orbit and very surprised. Because here is a new world where people are different and yet not unpleasant.

You find yourself on another campus. And after the first strangeness wears off, you sort of get to understand this new world a little . . . and that's when you really look at your old world, your own world. Because now your own college looks different.

It isn't that you don't like State any more; you're far too much a part of her now for that. But now you have a little less magnanimous eye when you behold the state of things at

"home." And it isn't the cow fences that bother you most, even though they are a symbol.

What you keep thinking about is that the whole weekend, when you were on a strange campus and largely among strangers, the least friendly man you met came from State.

It wasn't exactly that he was unfriendly but rather he just wasn't quite so generous with himself. It seemed that next to these other men, on this other campus, his heart was sort of locked up . . . as if he were trained not to display that easy-going, open appearance that you saw all around you.

And then you wonder what would make the State man that way. But you know. It was sophistication. And you damn the word!

You have seen a lot of this apathy around you at State. You were raised on it in high school . . . boys, men, twisting, warping themselves into an unnatural ideal.

They want to be men, you say. What is a man? Is it this outside mien of "toughness"? Must one suppress his love for Life and his fellow man to be a man himself? Must one throw up this just—sufficiently-porous social barrier around all his emotions . . . to be a "man"?

Entertainment Unlimited

Alton Lee

N. C. State Fair

Each year I, as do many other people, say I am not going to the fair this time. It's the same thing every year; and if you've seen one, you've seen them all. The weather is either hot and dusty or rainy and muddy.

Everything on the midway is fixed; the mobs on the grounds act like a bunch of stampeding cattle; the food is bad and the prices absurd; there's nothing special about fireworks, and all exhibit halls are just alike.

So this year I'll stay home. Etc., etc., etc. (Thank you Yul Brynner) By the time you read this, I will have undoubtedly already gone to the fair and experienced all the above mentioned, but then so will all the others who made the same complaints.

There's something magnetic about a fair; it draws a crowd like a saucer of milk draws a cat. Perhaps it's the time element — a once-a-year thrill. Maybe it's the multi-colored waterfalls, the mad frenzy of fireworks, the cotton candy, or even the exhibit halls.

It's difficult to pin-point it, but few people can resist the magic spell which the fair weaves around them. So go on out and enjoy yourself. (Note:

Many grammarians declare that it's impossible to enjoy oneself unless one is egotistical, but we won't go into that.)

Explanation

This is for the many people who have commented on last week's column about commercials. At the risk of sounding somewhat like Jack Webb, I should like to explain that it was necessary to change the names of the products I mentioned last week in order to protect the innocent and the guilty and also to keep any disgruntled members of the advertising world from suing us.

Some people (startling as it may seem) do not appreciate even constructive criticism. It is assumed that our readers out there in the deep, dark jungles of literary land were able to decipher the slightly altered names as being representative of actual products.

Other Stuff

The "Mardi Gras March" and "Warm Up" are two records which seem destined for big things. Pat Boone does the first one and the Tune Rockers do the latter.—Tomorrow is the day Mr. Bennett Cerf of "What's My Line?" fame arrives at the C.U.

To F. J., the other "Miss

Brooks" fan in Raleigh. I just learned that the program has finished it run on WNCT, but it can be viewed now on WBTW providing you have a rather powerful tv-receiver.

"The Vikings" and "This Happy Feeling", two of the summer's biggest movies open, soon at the Varsity. — Next week is the week for the Raleigh Little Theatre's "Inherit the Wind" play. This would be an excellent way to spend an evening instead of studying for a nasty old Physics quiz.

From "Mad" we take this: "A bird in the hand makes blowing one's nose difficult. Oh well!—A reader who prefers to remain nameless has asked me if "The Family Doctor", a comic strip with the philosophy approach, is done by the Jerry Erdahl who runs the C.U.

Your answer is yes; and if you are interested in learning more about it, allow me to refer you to an article I did on Mr. Erdahl and his work last year in THE TECHNICIAN. You may come down to the office and look it up.

(See ENTERTAINMENT, page 10)

'59 Applications Due For Marshall Awards

The British Government is calling for applications for its 1959 Marshall Scholarship Awards. Students are being urged to get their applications in before October 31, when the lists close.

Requirements for these two-year study grants, twelve of which are awarded each year, are liberal. Any American student (including inhabitants of Hawaii and Puerto Rico) of either sex, married or single, may apply—provided he or she has earned a first degree at a recognized university, and is under the age of 26 on October 1, 1959.

Attention is given both to character and scholastic ability, in the judging.

Winners are announced the following April.

Each award is worth around \$1,400 a year, for two (and occasionally three) years, plus tuition at a United Kingdom university, if possible of the applicant's choice. This is estimated to be sufficient for student life in Britain. Passage to and from the United Kingdom is paid. Married men get an extra allowance.

New Dormitory Features Up-to-Date Conveniences

By Rob Farrell

Less than two years ago the corner of Dunn Avenue and Dan Allen Drive was bare except for the small building which houses the College Print Shop.

Today, one of the largest and most modern dormitories in the state fills this space. Approximately 800 men are now occupying this new dorm which is known as the West Campus Dormitory. The first stage of construction on the \$2 million building was begun in June of 1957.

This giant addition to the State campus is constructed in the form of two "boomerangs" connected at their corners by a central activity area. The wings are four stories high with rooms arranged in suites of four. Each suite has its own bath and hall. The suites are connected by an outside corridor with stairs at each end of the wings.

The rooms are equipped with built-in-beds, study desks, book-

shelves, dressers, and closets. These furnishings are finished in light maple with a special durable finish. The walls are masonry block painted in light colors. The floors are asphalt tile and the ceilings are acoustical tile.

Each bath serves four rooms and has ceramic tile floors and walls with plaster ceiling. The corridor of each suite is provided with an outlet for a private telephone.

A counsellor's suite is located on the second floor at the corner of each wing. These suites include a living area, kitchen, bedroom, bath, and closets.

The central area of the new dormitory has not yet been opened. When completed, it will consist of a lounge, grille room, recreation rooms, mail rooms, and laundry pick-up stations. The walls of this portion of the building are panelled in walnut and brick. Acoustical tile is used for the ceilings, and the floors are terrozo.

(See NEW DORMITORY, page 10)

At the College Union

By Oscar Taylor

WHY? There I calmly sat in the snack bar holding a bridge hand with 27 points when up walks a page from main desk who, also calm, says, "It's 11:30". What does this an to me? I guess the two spade bid will have to wait for another day, what a waste of a good hand.

The college union rules state that there will be no card playing from 11:30 to 1:30 p.m. in the snack bar, where else is there to play to get enjoyment? I guess doing without cards for two hours is not really so bad. Of course you can play during the lunch hours in a room on the second floor by asking at main desk in which room you can play.

Bennett Cerf, publisher, humorist, columnist, and panelist, will be in the college union ballroom on October 17. The author of *Try and Stop Me*, *The Life of the Party*, *Reading of Pleasure*, and *An Encyclopedia of Modern American Humor* will talk on changing styles in American humor at 8:00 p.m. A coffee hour will follow the talk.

The event will be free to students, college union members, and guests. Admission charge for the event will be \$1.50 for adults and \$.75 for non-State students.

Dr. Frank Graham, United Nations Mediator, will speak to the State College Community and Raleigh citizens at 8:00 p.m. in the College Union Ballroom, on October 19. The topic of his speech will be "The United Nations in the Atomic Age". There will be a coffee hour following the event to meet Dr. Graham.

The college union weekend movie will be "Magnificent Obsession" with Jane Wyman and Rock Hudson. Shows on Saturday and Sunday at 1, 3, 5, 7, and 9.

BOB LINDER

Determined Pack Set For Battle With W & M

Coach Earle Edwards and his State College Wolfpack take to the road again this weekend, as they travel to Williamsburg, Virginia, to do battle with the William and Mary Indians. Sporting a 2-2 won-lost record after last week's loss to the Deacons of Wake Forest, the Wolfpack will have more than one reason for wanting a win over William and Mary.

It was the Indians, last year, who spoiled a perfect season's record for the Wolfpack. The William and Mary squad defeated the State team 7-6, to hand the Wolfpack its only loss of the season. Despite this loss to William and Mary, the Wolfpack went on to capture the Atlantic Coast Conference Championship.

This year's Wolfpack will be playing its first non-conference game of the season, as all four games to date have been in ACC play. Despite the fact that Saturday's game will not go in the books as conference play, the Wolfpack will be looking for an all-important win. The State squad needs a victory to keep in the running, and a win over

the Indians will go far in avenging last year's defeat.

Looking back over last week's game, Coach Edwards said, "We weren't tough when the chips were down. If we had made good on our opportunities, we could have won the game." Asked about the coming game with William and Mary, Coach Edwards said, "William and Mary's line is just as good as Wake Forest's, and their passing may present as big a problem as we faced against Virginia and Wake Forest."

Preparing for Saturday's game, the Wolfpack finds itself in a different situation than last year. Last year's ACC champs went into the game against the Indians with a perfect record, while this year's Wolfpack will meet the Indians with a 2-2 record. Coach Edwards and his squad will be going all-out for a win over the Indians Saturday, hoping to avenge last year's humiliating defeat.

Following Saturday's game, the Wolfpack will travel to Durham the following week for a conference tilt with the Blue Devils of Duke.

Sports Feature

Soph. Halfback Gibson . . . " . . . Best Since Justice"

North Carolina State College's Wolfpack can boast of many things and one of the biggest at the present time is in the person of a sophomore halfback by the name of Claude Gibson. Claimed as, "the best back from Asheville since Charlie Justice," Claude is living up to the praise he has won for himself during his football career.

"Gibson is one of the fastest players I have had in years," head coach Earle Edwards stated. "When he begins utilizing his speed, he will be a great football player."

Gibson is one of the most versatile players on the squad and has all the qualifications for greatness. In addition to being fast, he is an excellent defensive back who had rather intercept a pass or make a bone-crushing tackle than score a touchdown.

A six-foot, 175-pounder, Gibson is up from last year's freshman team and has seen action in all of the Wolfpack's games to date. He was the leading scorer on the frosh squad with six touchdowns.

"Claude is a natural athlete," said Edwards. "He is a fine runner, a top-notch receiver and a rugged defender. The boy has a rosy future."

Playing left halfback on the second unit, Gibson came into his own last week against Wake Forest. He scored State's only

touchdown on a 25-yard pass from Frank Cackovic after setting-up the score with a brilliant catch on a pass which covered 46 yards.

Out-racing the Deacon secondary, Gibson snared three passes for 99 yards and had a 42-yarder called back because of a penalty.

As a ball carrier, "Hoot" has a 3.0 average for nine carries. He is leading the Atlantic Coast Conference in punt returns, having averaged 11.8 yards for five run backs. He has intercepted one pass and hauled back one kickoff 27 yards.

"Gibson's biggest fault," explained Edwards, "is not using his speed to its best advantage. If he would turn on the speed instead of dancing with the defender in an effort to out fox him, he would be hard to stop. I don't think there are many players who can out run him."

Gibson is a product of Lee Edwards High School and a native of Asheville. In high school, Claude was All-Conference and All-State in football and a brilliant track star. During high school he won twelve letters in three sports, and during his first year as a Wolflet performer he was leading scorer on the freshman team. A great all-round performer majoring in Recreation, Claude has a promising future in football.

Notice

THE TECHNICIAN Sports Staff is in need of a writer to help in covering the Wolfpack sports. Anyone who is interested is requested to contact Sports Editor Bob Linder in THE TECHNICIAN offices, 1911 Building (TE2-4732). No experience is needed.

Intramural Track Meet Finals Set For Thursday

The Intramural Track Meet Finals will be held Thursday, October 16, at 8:00 p.m. The finals will be run off for both Fraternity and Dormitory at this time on the track field behind the Coliseum.

Preliminaries were held Monday and Tuesday nights of this week, and a number of finals were held in some field events. Following is an outline of the final results from Monday and Tuesday. In the next issue of THE TECHNICIAN a complete listing will be run of all results of Thursday night's Finals:

FRATERNITY	DORMITORY
Pole Vault	Pole Vault
1. Culp (P.K.A.) 9' 6"	1. Leary (Tuck 2) 11'
2. Thorpe (Sig Nu)	2. Thorne (Syme)
Jeffreys (P.K.P.)	Burton (Turl)
4. seven men tie	4. Smith (Alex)
	Lee (Syme)
Broad Jump	Broad Jump
1. O'Brien (Kap Sig) 19' 6 1/2"	1. Hill (Owen 1) 19' 3 1/4"
2. Davis (Kap Sig)	2. Holmes (Watau)
3. Bartlett (Sig Chi)	3. Gilbert (Turl)
4. Norton (Sig Chi)	4. Salisbury (Turl)
Shot Put	Shot Put
1. Crosby (Kap Sig) 39' 7"	1. Polkotte (S. Dorm) 39' 9 1/4"
2. Warren (Sig Nu)	2. Cordell (Beet 2)
3. Myers (P.E.P.)	3. Givetz (Turl)
4. Oggerino (P.E.P.)	4. Dalton (Berry)
Discus	Discus
1. Crosby (Kap Sig) 108' 1/2"	1. Duricke (Turl) 95' 7 1/2"

4. Duncan (Sig Pi)	Pohlkotte (S. Dorm)
Bartlett (Sig Chi)	

Intramural Football Results

In the October 9 issue of THE TECHNICIAN a listing of Intramural football results was run, which afterwards proved to be incorrect and confusing. The incorrect ratings were a result of a mistake on the part of the Print Shop in setting the type for the article, and as a result many teams were misrepresented and incorrectly rated. As promised in the last issue of THE TECHNICIAN, a complete and correct listing of Intramural results follows:

FRATERNITY	DORMITORY
Sigma Chi 46, PKP 0	Bag #2 1, Vetr. 0
Delta Sig 13, PKA 0	Berry 13, WG4S 0
TKB 8, PKT 0	Owen #1 7, Bec #2 0

"HOME COOKED FOODS"

Notes From The Pack

The talk of the campus this week is the fine show put on last Friday night by the State freshmen and Roman Gabriel. The frosh defeated South Carolina 32-26 in a thriller.

Gabriel, a 6-foot-4, 210-pound quarterback from Wilmington, completed 11 of 17 passes for 200 yards and four touchdowns. Duke coach Bob Cox and UNC coach Bud Carson were on hand for the game and both said Gabriel put on one of the finest passing exhibitions they had ever seen.

The freshmen play Duke here Oct. 23. State and Wyoming have signed for a football game here next year. The game will be played in Riddick Stadium Oct. 31. The Wolfpack will go to Laramie for a return engagement during the 1961 season.

"We are happy that we can bring a team like Wyoming to Raleigh next year," athletic director Roy Clogston said. "We are doing everything possible to schedule the best teams available." State goes to UCLA in 1959 and to Arizona State in 1960.

Professional hockey comes to Reynolds Coliseum for two nights next week. The pennant-winning Charlotte Clippers will

play host to the Philadelphia Ramblers Oct. 21 and 22. The Ramblers are coached by ex-Charlotte star Doug Adams.

Incidentally, the Coliseum will be open for public ice skating beginning Wednesday, Oct. 15, with rental skates available. The hours are from 4 to 6 and 7:30 to 10.

State leads the grid series with William and Mary with nine wins to seven for the Indians. The teams first met in 1906 and the Wolfpack won the first five games without allowing the Indians to score. It was 44-0 in 1906, 24-0 in 1908, 81-0 in 1920, 16-0 in 1940 and 13-0 in 1941.

In the 13-7 loss to Wake Forest, sophomore halfback Claude Gibson of Asheville caught three passes for 99 yards and one touchdown. He also caught one for 43 yards which was nullified because of a penalty.

Ernie Driscoll, who would have been the starting quarterback this year except for an eligibility ruling, is proving a valuable member of the team nonetheless.

Driscoll is helping the coaching staff and directs the "hamburger squad" which runs opponents' plays.

Engineering Students Display Latest Wonders

Satellite tracers and other of the latest engineering wonders will be displayed and explained by students in the School of Engineering at North Carolina State College as a part of the

91st State Fair, beginning Tuesday and continuing through Saturday.

The engineering exhibits will be among the features of the fair's "Science Education in Action," a new department at the State Fair.

Also on display will be State College's sub-critical nuclear reactor assembly that will provide public demonstrations of atomic research.

Several departments of the college's School of Engineering have joined hands to give the public a review of current scientific developments. Sponsor of the student exhibits is the Engineers' Council, a student organization.

Ray Briggs of Raleigh, senior in electrical engineering, is chairman of the engineering exhibits.

Col. Represented In Little Theatre

State College will again be represented in the first play of the Raleigh Little Theater's 23rd season, "Inherit The Wind," scheduled for production Oct. 21 through Oct. 26. Featured in the cast will be Arthur Ladu of the English Faculty and Gene Lehman, a graduate assistant at the Experimental Station. Jack Porter of the English faculty is technical director and set designer.

The play which saw 800 performances on Broadway will be the first of five productions. Among the others will be "The Seven Year Itch" and "A Visit To A Small Planet."

Long a favorite with N. C. State students, the Little Theater is offering specially reduced membership rates to the student body at \$6.00 per season. Membership benefits include: the RLT "NewsLetter" containing notice and news of each performance in advance, assurance of reserved seats for each of the five major plays and admission to the five additional Theater Workshop performances. Students interested in obtaining memberships may call the Little Theater (Te: 2-6384) or apply at the Little Theater office at the rear of the auditorium. The theater is located on Pogue St.

WKNC Presents H. G. Well's Drama

"Exploring the Unknown" will present a rebroadcast of the 1938 radio drama "War of the Worlds" Thursday, October 30, at 9:00 over WKNC radio.

"War of the Worlds" was written by H. G. Wells in the early part of the twentieth century, and depicted the invasion of this planet by forces from the planet Mars. The radio adaptation was originally presented on October 30, 1938 and stars Orson Welles.

The program was produced in such a way as to suggest that the invasion was, in fact, happening. The results were devastating: suicides, murders, and evacuation of several Northern cities.

Sights . . . and Sounds

Even through a fog induced this past Saturday at a football game, my senses detected a certain odor in the neighborhood of Syme Dorm. Lo! They planted grass. And West Campus is getting top-soil . . . carefully removed from the hills to its west. That was shrewd planning.

I discovered this past Sunday that it's easier to meet a friend of mine, who lives in the South wing of West Campus, at the Union than to walk from the North wing to the South. The center section hasn't been opened yet. And another thing: I know a lot of guys who are getting tired of going to the Union or the Toddle House for an evening snack because of the lack of a snack-bar in that dorm.

I wonder, in walking around the campus, if those thousands of dollars worth of flowers that were planted last year are annuals or perennials? If I know this college, I can imagine.

Have you seen the size of those ant hills at the New Dorm? I hope I don't meet one

of those beasts at night. "Why doesn't somebody say something nice about the co-eds . . . for a change, I mean." That's what I was asked over a bridge table the other night. Now, I ask you, who hasn't said anything nice about the co-eds, for a change, I mean. If the co-eds would like to hear something nice, I'm sure it can be arranged with little trouble.

I have been asked to say a few words about two of the C.U. programs coming up: Bennett Cerf and Marcia Robie. Very good entertainment.

Department of Heavy Thinking: Why does M&O separate stretches of asphalt walks with carefully designed mud puddles? Wouldn't wet concrete be better?

How to Beat the Rap No. 2: After getting one parking ticket . . . keep it! Placed on the windshield of your car when you park in the wrong lot, it works miracles at keeping another off. I hear that some tickets have been good for this for as much as two years.

Seniors Win Scholarships

Two seniors in the School of Engineering at State College are recipients of Westinghouse Electric Corporation statistics scholarships for the 1958-59 academic year.

Announcement of the selection of the award recipients was made today by Dr. J. H. Lampe, dean of engineering, and the Department of Statistics.

The scholarship winners are Peter R. Antoniewicz, engineering physics student from Salisbury, and Ernest P. McKnight, electrical engineering student from Winston-Salem.

Each scholarship carries a stipend of \$500 and is subject to the condition that each recipient take a full year's course in the college's Department of Experimental Statistics during the senior year.

In addition to their work in statistics, the two winners were chosen on the basis of their outstanding scholastic records. Both have maintained a "B" average.

Antoniewicz is the son of Michael Antoniewicz of Salisbury. During his sophomore and junior years at State College, he served as Student Government senator. He is a member of the American Institute of Physics; Tau Beta Pi, national engineering honor society; Sigma Pi Sigma, physics honor society; and Phi Kappa Phi, national scholastic society.

Young McKnight is the son of Mr. and Mrs. Ernest McKnight of Winston-Salem and is an active member of the American Institute of Electrical Engineers and Tau Beta Pi, national engineering honor society. He is married to the former Rose Marie Ring, also of Winston-Salem.

In Open Letter

President Hunt Discusses Diploma

(Continued from page 1)

pressed almost unanimous disapproval of the diploma which had been styled and drawn up by the design student. Two features were particularly objectionable; one the fact that the printing was of a plain "Grade A Cafeteria" style, and second the fact that all of the printing was on the left side with the signatures on the right side. This particular diploma was thrown out by the committee.

There again ensued a discussion of various diploma styles and sizes. After much further discussion and consideration the committee came to a decision which perhaps pleased no one, but which represented the best compromise that we the student members could get for the student body. This was the decision that the present diploma would continue to be the one awarded to State College graduates. This decision was reached thru our discussions and was unanimously agreed to as the best compromise for our students that we could effect.

After everyone agreed to it the chairman asked someone to put it in the form of a motion for the sake of the minutes. I did this. It represented the best deal for the students that we the student committee members had been able to get and was no surprise move as some persons have inferred.

We did not succeed in returning to the old style diploma possibly desired by the majority of our students, but neither did we go overboard for a radical new style desired by some faculty members on the committee. It was a compromise as most committee decisions must be.

Last spring, following the circulation of the petition asking for a change in diploma style (a petition signed by over 1/3 of the student body), the presi-

dent-elect of the Senior Class, the editor-elect of the *Technician*, and the student diploma committee members met with Dean Stewart. Many statements made in this meeting were reported to you inaccurately last week (though the author carefully avoided using quotation marks around the statements he quoted).

At this meeting, the student members of the diploma committee explained in detail the long and tedious process the committee had gone through in selecting the diploma. They conceded that the decision made

might not have been satisfactory to even the majority of students, but stressed that it was the best compromise that could be reached in a situation where both students and faculty representatives had to agree.

The student committee members having represented student opinion as best they could on the diploma committee, and realizing that a long and thorough consideration of the problem had taken place, continued to support the decision of the committee in spite of the fact that slightly over 1/3 of the student body had registered disapproval

of the decision reached. This stand by the students who had served on the diploma committee ended the meeting.

It is easy for a student leader to gripe. Gripping in the interest of students is also politically popular. To serve on a committee with representatives from groups other than students is not always so easy. It requires pushing for all one is worth in the interest of students but realizing that students cannot have everything their own way. Sometimes it means compromising—not getting everything you realize the students desire; this was the case with the student members of the diploma committee.

Compromising is not easy nor politically popular. In the diploma situation we did not get everything we wanted for the students, but we did prevent the adoption of a diploma which would have been abominable to State College graduates.

In the future, the *Technician* might be well advised to cover such events as last years diploma committee meeting with a reporter, instead of relying on second-hand information; and if it insists on getting its news second-hand it might at least get several opinions before writing its news stories. Editorializing is fine, but it is much more appropriate on the editorial page.

WIN YOUR SHARE OF \$160,000.00

IN STOCKS AND BONDS

Nothing to buy to win. Just tell us why you think a Remington Electric Shaver is an ideal gift.

Here is your chance to win up to \$50,000 in stocks and bonds... a share in America's prosperous future. There are a total of 408 big prizes... \$160,000 worth.

WIN! WIN! Prizes doubled—if you buy a Remington shaver between Oct. 13 and Nov. 26 and show on the entry blank the warranty number and dealer's name and address.

	STOCKS OR BONDS WORTH	(WITH BONUS)
1st Prize	\$25,000	\$50,000
2nd Prize	\$15,000	\$30,000
3rd Prize	\$ 5,000	\$10,000
4-8th Prize	\$ 1,000	\$ 2,000
Next 400	\$ 100*	\$ 200*

EASY! Read about Remington's great exclusive advantages—then tell us in 25 words or less, why you think a Remington Electric Shaver is an ideal gift!

Get your entry blank today! At any Drug, Department, Jewelry, Appliance store, or Remington Service Center.

*In U. S. Savings Bonds at maturity value. Contest is subject to federal, state and local regulations.

Buy a Remington — double your prize

Remington Rollectric®

- Only shaver with Roller Combs
- Largest live shaving area of any electric shaver
- Man-sized head has 6 diamond-honed cutters
- Shaves both heavy beard and Hidden Beard: whisker bases below ordinary shaving level
- Gives fastest shave known
- Works on AC or DC (110V)
- America's most popular shaver

Remington Auto-Home Rollectric®

- Every feature of Remington Rollectric plus...
- Dual-volt convenience! It goes where you go—homes, planes, boats, hotels, motels and trains
- Works from a car's lighter receptacle as well as any AC or DC wall socket
- Available in 12 and 110 volt or 6 and 110 volt combinations. No switch or extra cord needed!

Remington Princess

- Designed especially for women
- Petite—yet has 4 times as much shaving area as any other ladies' shaving implement
- Only ladies' beauty shaver with Guard Comb protection!
- No "wrong side" to make you switch sides for legs or underarms, as with "1-way" shavers
- So safe it can't chafe! You can use a deodorant immediately.

Shirt Satellite Launched!

The first Shirt Satellite is finally a reality! Just yesterday, during their lunch hour, Van Heusen scientists launched a Van Heusen Century Shirt into the stratosphere. It's now circling the earth 180,000 miles up, in an orbit so large that a grown man couldn't walk it, even in a whole day! Traveling at the legal 35 miles per hour, it is expected that the Van Heusen Century Shirt Satellite will remain up there in the blue beyond for at least 1200 years. And, with luck, maybe 1201.

"But," you will ask, "what value will the Shirt Satellite have for science?" Just this, friend! It will further prove the immutable law that the soft collar on Van Heusen Century Shirts won't wrinkle... ever! You see, the slick Van Heusen physicists have attached an electronic Wrinkle-rieter to the collar of the Van Heusen Century

Shirt. This clever device will constantly send back electronic reports on the condition of the collar, so, for 1200 years, we earthlings will have absolute proof that the soft collar on Van Heusen Shirts won't wrinkle... ever. Should you ever have any doubts, just drop in to the Van Heusen office, and listen to the reports coming back from the Shirt Satellite.

One more thing—the Van Heusen Century Shirt Satellite will drop back to the earth in the spring of 3157 (possibly 3158) and you're all invited to the return party! If, in the meantime, you want to see the Van Heusen Century Shirt, you can at your campus haberdashery. He has them in 5 collar styles, in white, stripes and colors. \$4 & \$5. At better stores everywhere or write: Phillips-Van Heusen Corporation, 417 Fifth Ave., New York 16, N. Y.

Number One In Nation

Theta Chi Wins Scholarship Recognition

Delta Rho Chapter of Theta Chi here at State has taken a major step in refuting the popular idea that fraternities, fun, and irresponsibility go hand in hand.

At the 102nd anniversary national convention meeting of September 5-7, held at Michigan State University, Delta Rho was recognized nationally for proficiency and achievement in progress and scholarship standings. With respect to the popular idea of the fraternity as a primarily social organization, recognition in both of these areas shows that Delta Rho is keenly aware of the importance of educational responsibility.

For outstanding progress in the areas of leadership, membership, scholarship, et al., Delta Rho was awarded the Sidney Ann Gilpen Lewis Memorial Trophy, of all chapters. This award is of particular significance since it is given on an overall basis. The chapter must not only excel in all areas, but must show considerable improvement in each of these over former standings. For Delta Rho chapter, this was of particular concern, due to its already high record.

For achievement and proficiency of scholarship in class B, (all Theta Chi chapters of schools of enrollment 1,000 to 5,999), Delta Rho was awarded the first-place scholarship trophy. This recognition is awarded on the percentage above the all-men's average within class B. Delta Rho's average was 14.56% above the all-men's average.

The national scholarship award of all three divisions (classes A, B, and C), was awarded Delta Rho chapter for

its scholastic achievement (percentage above the all-men's average). This award, the Stanford Memorial trophy, represents the highest scholastic standing of all Theta Chi chapters in the United States. The Stanford Trophy marks Delta Rho as the top scholastic fraternity of the nation.

Through its recognition of chapter achievement, Delta Rho chapter hopes to have helped to awaken the social fraternity to its responsibility as a college organization.

Wife of Engineer Takes 'Fair' Ribbons

Mrs. Lucy H. Bridgman, wife of C. J. Bridgman, who is a full-time graduate student in Nuclear Engineering here at State, won four ribbons at the N. C. State Fair in Raleigh.

On her first competition try she entered five cakes, one batch of cookies, and one sport coat, which she made for her husband. Her coffee cake entry took first place. She won two second place premiums for an apple sauce cake and a sport coat. A third premium was received for a white layer cake.

Three members of the Theta Chi fraternity stop to admire the trophies and plaques which their chapter won in the recent Theta Chi National Convention. The awards were given to the Delta Rho chapter of Theta Chi here at State because of their excellence in scholarship, leadership, and membership.

Fair Features Complex Nuclear Reactor Set-up

A complex nuclear reactor assembly containing more than \$100,000 worth of natural uranium is being displayed and demonstrated by State students and faculty members at the State Fair, which opened Tuesday and is continuing through Saturday.

It marks the first time that the college has shown a major segment of its atomic facilities at a public exposition.

The reactor assembly, housed in a tent near the State Fair Arena, weighs nearly four tons.

Enclosed in an aluminum tank—four feet high and four feet wide—the assembly embraces 312 aluminum tubes, each of which contains four slugs of natural uranium. The slugs are eight inches long.

The aluminum tubes are arranged in a hexagonal pattern and collectively weigh over 5,000 pounds. The assembly also contains about 2,000 pounds of water in which the tubes are partially immersed.

The State nuclear display was arranged by the School of Engineering and its Physics Department and will be shown along with a traveling atomic exhibit presented by the U. S. Atomic Energy Commission and the Oak Ridge Institute of Nuclear Studies.

Dr. A. M. Menius, head of the Physics Department, and Dr. A. W. Waltner of physics faculty, said experiments involving the nuclear reactor assembly will be in progress during State Fair week, giving the fair vis-

Rhodes Offer Oxford '59-60 Scholarships

Any student desiring a grant effective in 1959-60 should contact L. B. Rogers, 201 Holladay Hall. Mr. Rogers has copies of applications for Rhodes Scholarships. The value of a Rhodes Scholarship is 750 pounds per year. Scholars who qualify under the G.I. Bill of Rights or other military educational funds may expect the same benefits at Oxford as at an American university. Appointment to a Rhodes Scholarship is made for two years in the first instance for the 1959 awards must be made before Nov. 5, 1958.

scholar's record at Oxford and plan of study warrant such an award. No restriction is placed upon a Rhodes Scholar's choice of studies.

Applications must be in the hands of the secretary of the state committee not later than November 5, 1958.

Qualifications for Rhodes Scholarships are (1) the student must have junior standing, (2) the scholarships are for Oxford University, (3) the application for the 1959 awards must be made before Nov. 5, 1958.

THEY SAID IT COULDN'T BE DONE - BUT TODAY'S L&M GIVES YOU-

They said it couldn't be done... until the Wright Brothers flew this plane for 59 seconds in 1909. Today flying is so much a part of modern life that 40 American colleges offer regular flying courses, many of them for degree credit.

Puff by puff

Less tars & More taste

DON'T SETTLE FOR ONE WITHOUT THE OTHER!

Change to L'M and get 'em both. Such an improved filter and more taste! Better taste than in any other cigarette. Yes, today's L'M combines these two essentials of modern smoking enjoyment—less tars and more taste—in one great cigarette.

Light into that Live Modern flavor!

Kappa Phi Kappa Initiates Twenty-Two

Twenty-two students have been initiated into Kappa Phi Kappa national professional educational fraternity.

The new members were selected on qualities of scholarship, leadership, and on interest in the cause of education.

Kappa Phi Kappa's initiates are: Herbert Carlisle Henley, Jr., Jake Delano Vinson, David John Smith, Jr., Harold August Olsen, Edward Rhone Sasser, William Rufus Barnes, Roger Mozingo, Samuel J. Coley, Haden Eddie Knox, Randall Everette Jobe, Lloyd Laurell Carawan, James E. Rankin, Kelly Raygené Crump, Charles Earl Green, Conrad Cornelius Thorpe, Jr., Ronald Wilson Shearon, Larry W. Watson, James Allen Cox, John M. Jenkins, Jr., Charles E. Russell, Murray Rudisill, and Larry H. Hatley.

Book titles seen in *Fling*, a magazine for MEN:
—“101 things a boy can do with human skin”
—“Raising children for fun and profit”
—“So you want to build a swamp”
—“Tom Swift and his Electric Grandmother”

Pet Hate, #1: Instructors who make up quizzes from the fringe material of the course. That EE is hell.

Pet Hate, #2: Beautiful woman who spoil your entire day by walking out of a restaurant with a damn toothpick hanging out of the corner of their otherwise beautiful mouths.

Pet Hate, #3: That \$15 per student fee that goes to the College Union. Man, that's a lot of long green for camping trips and watermelon feasts. Wonder what percentage of the students actually participate, and I also wonder if it isn't the same old crowd at each event. “Musical Chairs”, anyone?

For the Service Bound: Most books on war, particularly the ones that deal primarily with combat, are a little too gruesome and actually too unreal for us to accept as the real honest-to-goodness truth. Shocking and exciting, yet . . . but real, well maybe.

Mrs. Edsall (wife of Dr. Edsall, Pol. Sci. dept. Head) gave me the book *The Last Parallel*, by Martin Russ. It is unassuming, honest, and at last the real thing. Recommended for all ROTC students who think they are wasting their time. Fly boys won't be interested.

Recommended viewing:

- 1) Ladies bowling night at the Man Mur.
- 2) The corner of Salisbury and Morgan streets at either noon or 5 p.m.
- 3) The outer office of Dean Lampe from 8 a.m. to 5 p.m.
- 4) The curb girl at Sealy's on route 15-A (Wow)
- 5) The YWCA from the 3rd floor of the State Health Dept.

6) The YWCA from the 2nd floor of the State Health Dept. Bldg.
7) The latest *Nugget*

Solution to crowded conditions in the parking lot next to the A & P because of non-student parkers . . . instead of issuing parking tickets (which doesn't seem to help), force the offenders to drink a cup of College Union coffee. That ought to convince anyone that you are serious!

Speaking of dolls:

You seniors probably don't know it yet, but you are going to spend more time in Bill Simpson's placement office than you think. His secretary, Ann C., is about the cutest thing on campus, except Vera in the I.E. office.

INTERNATIONAL
(Continued from page 1)

on October 25. Music will be presented by the Duke Ambassadors Orchestra. The dance will be semi-formal and those without dates are invited because there will be girls from a nearby girls' school.

All the events planned for the week are open to all College Union members and everyone is invited to attend to make international week your week.

The College Union snack bar and State Room will offer one special dish every day for lunch and supper to help International Week and its goals.

Sudden Thought Department

Halloween is almost upon us; everyone bought his trick or treat bag yet? Now that “American Bandstand” can no longer be viewed on Raleigh's tv screens, how will we know what records to play and buy?—Last year at this time the number one record across the country was “Jailhouse Rock”, and this year it's a much quieter tune by Tommy Edwards. Is this an indication of something good?

Radio

The radio version of this column is heard weekly on Thursday at 8:00, WKNC, 580. Listen in; I need you.

COLLEGE UNION
(Continued from page 3)

The outing committee will journey to a Civil War Battleground on October 18 and 19. Sign up before October 17 at the college union main desk. Plans are to leave on Saturday at 1:00 p.m. and return on

Sunday evening. Details for the trip can be obtained at the main desk.

Remember the International Week events planned for next week. In this issue of the technician are listed the events for the week.

FAIR

(Continued from page 8)

itors a chance to get an insight into the peacetime application of atomic energy.

In addition to the nuclear assembly, the college will have on display a GM counting unit, a scintillator spectrometer which measures gamma rays, a neutron counter, and radiation monitoring instruments.

Bobby Leonard and Marvin Moss, both of Raleigh and both of whom are graduate students, will be in charge of the nuclear demonstrations.

Among the several nuclear experiments to be demonstrated will be the activation of different materials such as copper, silver, and gold.

NEW DORMITORY
(Continued from page 3)

The grille room which seats 100 persons will be operated as part of the Student Supply Store chain.

A basement under the central area of the building provides space for storage, transformers, and heat distribution equipment.

The exterior walls of the dormitory are almost complete glass, which provides for light and ventilation. Also each room is equipped with venetian blinds.

Landscaping of the area around the new structure is presently underway. The walks and parking lots on the grounds are constructed of asphalt. Parking for 350 cars is provided.

The West Campus Dormitory was constructed under a loan from the Federal Housing and Home Finance Agency with the assistance of the Budget Bureau of North Carolina.
